

County cuts hospital pay hikes

By ANNA BURCHELL
Pampa News Staff
Five Highland General Hospital executive employees who had been recommended for monthly pay hikes ranging from \$75 to \$150 were voted increases of \$50 each by the Gray County Commissioners' Court in a Tuesday session.

Two other hospital executive level employees had been recommended by the hospital administrator for raises of \$50 monthly each. Both were

approved as recommended. The two recommended for the \$50 monthly raises were Jackie Steel, office manager at McLean, and Mary L. Williams, credit manager for Highland General. The raise brings Steel's salary to \$600 monthly. Records in the office of Jean Scott, county treasurer, show that Mary L. Williams' salary had ranged from \$675 to \$723 per month prior to the \$50 increase. Those recommended for the higher pay raises and their

previous salaries include: —Horace Williams, administrative assistant, recommended for \$150 monthly increase, making \$1,050 before raise. —Krishnadas Thakrar, accountant, recommended for \$100 increase, making \$950 before raise. —Mark Jones, pharmacist, recommended for \$100 increase, making \$1,500 before raise. —Emily Scott, executive housekeeper, recommended for \$75 increase, making \$600 before

raise. —Charles Tanner, chief of radiology, recommended for \$100 increase, making \$1,150 plus \$50 a call before raise. Horace Williams, Scott, Steel and Jones were recommended for pay hikes on May 14 by the hospital board, but the Commissioners Court returned the proposal to the hospital board for further study. The raises are effective May 26 and will be included in checks disbursed on July 1. Proposals

had called for effective dates ranging from March 26 to May 26, but Judge Cain entered an order making all of the effective dates May 26. The hospital met in executive session Monday and approved other names to the list of recommended raises. The Commissioners Court took action shortly after noon on Tuesday. Also approved were grade raises for six hourly employees. In other action Tuesday the court announced it will meet at 9 a.m. July 13 as a board of equalization for hearings on industrial property. A hearing on the local tax rolls will begin at 9 a.m. July 15.

Judge Don Cain said a member of the appraisal firm said recently that he expected the industrial rolls to remain basically the same — "perhaps with a small increase." Commissioners passed a resolution calling for a 7 per cent salary retirement plan for employees beginning Jan. 1, 1977.

Judge Cain said the County is now participating in a 5 per cent plan. He reminded the commissioners that the issue was discussed several months ago but no action was taken. He added that Robert Monogue, hospital administrator, said that he checked with county hospital employees and the majority of them were not in favor of the plan.

Judge Cain said that if the court intended to participate in the 7 per cent plan, the decision must be made before preparing the 1977 budget. "Some are not aware that it is a savings account with 9 1/2 per cent interest," one of the commissioners commented. It was announced that engineers will be in Gray County in July to work on the McClellan Creek Watershed Project. Intentions were expressed for the court to have all work approved so the project will not be unnecessarily delayed. The next regular meeting of the court is set for July 1.

Bicentennial chaps

Red, white and blue chaps are the bicentennial project of Fred Betchan, son of Mrs. Ethel Bethan, 408 N. Dwight. Of his own design, it took "I'd say about a couple of weeks" for Fred and Larry Eccles of Pampa to make the chaps for his use in amateur rodeo events. Beside their colorful appearance, Fred is more concerned about protecting himself than the chaps: "If a bull steps on your leg, it will cut the chaps, not your leg."

Fumes force evacuation

VAN NUYS, Calif. (AP) — Thick, white toxic fumes billowed through the night from a blaze at a swimming pool cleaning chemical plant, making at least 44 persons ill and forcing the evacuation of thousands of residents. Fire Department spokesman Ed Arbuckle said initial reports indicated that some of the 44 persons taken to eight area hospitals were in intensive care units.

He said the 44 included 16 residents of the area, four police officers, two sheriff's deputies, and 22 firemen. Van Nuys is 20 miles north of downtown Los Angeles. Police Sgt. Raymond P. Alaszewski said more than 5,000 persons from a dense residential section west of the Pool Brite Manufacturing Co. were evacuated soon after the blaze broke out at 10:28 p.m. Tuesday.

Fire officials said the toxic fumes were released when water sprayed by firemen came into contact with "100 per cent concentration" trichloro-triazotriene, a chlorine cleaning compound stocked at Pool Brite, a subsidiary of Leslie's Pool Mart. "It's a major emergency," said Arbuckle. "The chemicals are emitting dangerous toxic fumes."

Arbuckle said chemical engineers were on the scene but they had not decided on how the flames should be battled without the risk of adding to the toxic fumes, which initially formed a huge cloud. "We're just going to wait it out," said Arbuckle. "We'll just wait till morning and let the cloud dissipate itself. We're not going to jeopardize any more of our firemen."

Alaszewski said most of those made ill complained of a tightness in the chest and of breathing difficulties after inhaling the fumes. Fire officials said they would begin an investigation later today into the cause of the blaze.

Dallas pair found stabbed

DALLAS (AP) — The bound bodies of Mr. and Mrs. Billy Locklear were found Tuesday in their home in the Oak Cliff section of Dallas. Officers said they had been beaten and stabbed to death. The Locklears' two children, a 3-year-old boy and a 2-year-old girl, were found unharmed. Locklear was 36 and his wife Hazel was 28. Police said the boy apparently is mute they talked with the girl. Authorities were summoned to the house by neighbors who

were worried because they had not seen members of the Locklear family since Saturday. The Dallas County medical examiner said Mrs. Locklear had been stabbed 10 times in the chest. Her husband was stabbed four times. An autopsy indicated Locklear had been beaten with a BB gun, found at the scene bent out of shape with the stock shattered. "The couple was found individually tied, with their hands and feet bound, on the floor of

their living room," officer W.R. Temple said. "They could have been dead several days and at this time we don't know what happened. It appears some kind of struggle took place," said Detective Sgt. Gus Rose. Police have no clear motive for the slayings, Rose said. There were no signs of forced entry into the house. The children were taken to the county juvenile home. Locklear had been disabled by a lung illness. The family received welfare payments.

Embryo transfer successful

WASHINGTON (AP) — Scientists say they have produced a healthy baby baboon by transferring an early embryo from its original mother to another female who carried it until birth. The development is a first for primates and raises the distant

possibility that surrogate mothers also may be feasible for humans, a Texas A&M University researcher said Tuesday. The idea of using substitute mothers for women unable to carry a baby full term has been discussed in recent years. Aside from the technical diffi-

culties, however, the idea raises social, legal and ethical questions. "The real impact of our work is in developing animal models for studying the process of pregnancy, rather than an infertility treatment," Dr. Duane C. Kraemer said in an interview. In the current issue of the journal Science, Kraemer and his colleagues, Drs. Gary T. Moore and Martin A. Kramen, describe how they removed a baboon embryo five days after ovulation from one female and put it into another. Moore is with the Southwest

Foundation for Research and Education in San Antonio, Tex., where the work was done, and Kramen is with the University of Texas at San Antonio. The second female carried the developing male baby for about 170 days until it was delivered by caesarean section on Sept. 5, 1975, the report said. Normal average gestation for this type of baboon is 175 days. Kraemer said the baby baboon, now nine months old, was "normal in every respect at birth and is the same way now."

"We have him running around with a group of his peers at the Southwest Founda-

tion and the only way you can tell him from the others is by his tailcoating." Even with the success, the researchers said their work was preliminary since they only had one success out of 10 embryo transfers. Similar procedures have long worked with other animals, such as mice, rabbits, sheep, horses and cows. Kraemer said the first rabbit embryo transfer was in 1890 and that transplants are routinely done in cattle.

It takes 200,000 gallons of water to produce a ton of alfalfa.

FBI agent questioned

FORT WORTH, Tex. (AP) — Dist. Court Judge Stanley Kirk suggested Tuesday that grand jury testimony given by FBI Agent Lee Stephens be placed before another grand jury for consideration of perjury charges, but Stephens' boss said no perjury was committed. Stephens had testified before a Wilbarger County grand jury in connection with a conspiracy trial of R.D. Brown, former board chairman of the First State Bank of Vernon. Ted Gunderson, special agent in charge of the Dallas FBI of-

ice, said there were discrepancies in Stephens' testimony, but they "can be traced to the lapse of two years since he testified before the grand jury and based on the complexity of the matter." Brown was accused of conspiring with two cotton brokers to steal more than \$10,000 from the First State Bank of Vernon. Kirk ordered a verdict of innocent and said Stephens had made misrepresentations to the grand jury. He did not specify what questionable testimony was given.

Foundation for Research and Education in San Antonio, Tex., where the work was done, and Kramen is with the University of Texas at San Antonio. The second female carried the developing male baby for about 170 days until it was delivered by caesarean section on Sept. 5, 1975, the report said. Normal average gestation for this type of baboon is 175 days. Kraemer said the baby baboon, now nine months old, was "normal in every respect at birth and is the same way now."

On the light side

WEST SALEM, Wis. (AP) — Ellef Ellefson is 72 and figures a 300-mile workout on his nickel-plated bicycle is just the thing to keep trim for the 21st century.

In cooperation with regional planning commissions and the state Natural Resources Department, the former farmer has mapped a 325-mile bike trail along rural highways from the Mississippi at La Crosse north to Bayfield on the Lake Superior shore.

He was among about 25 who rode it last year. The repeat ride is scheduled July 10-17, sponsored by La Crosse Wheelmen, Inc. Ellefson's plan calls for extending the route next year to Galena, Ill., and eventually following the automotive Great River Road along the Mississippi to New Orleans.

"We have got to think more and more about what we are going to do with bicycles.... In the 21st century the bike will really come into its own, and we had better start getting prepared," he said.

MAITLAND, Fla. (AP) — When Edward and Eleanor Lawrence were married 23 years ago, they bought a shiny new Packard Clipper and drove to Canada on their honeymoon.

The Lawrences are repeating the 3,000-mile journey next week. And they'll be traveling in the same car — just as black and sparkling as the day Lawrence drove it off the showroom floor.

"It's a long trip, but it's a trustworthy car," says Lawrence, 79. "It's never let us down yet, and I don't expect it will."

Lawrence says he paid \$3,800 for the 1952 Packard new, and estimates he's spent \$3,000 for repairs while driving more than 133,000 miles.

To Lawrence's way of thinking, the old Packard's reliability more than makes up for its 14 miles to the gallon on the highway and 12 miles a gallon in town.

"I don't mind the gas because I've seen how these new cars are made," he said.

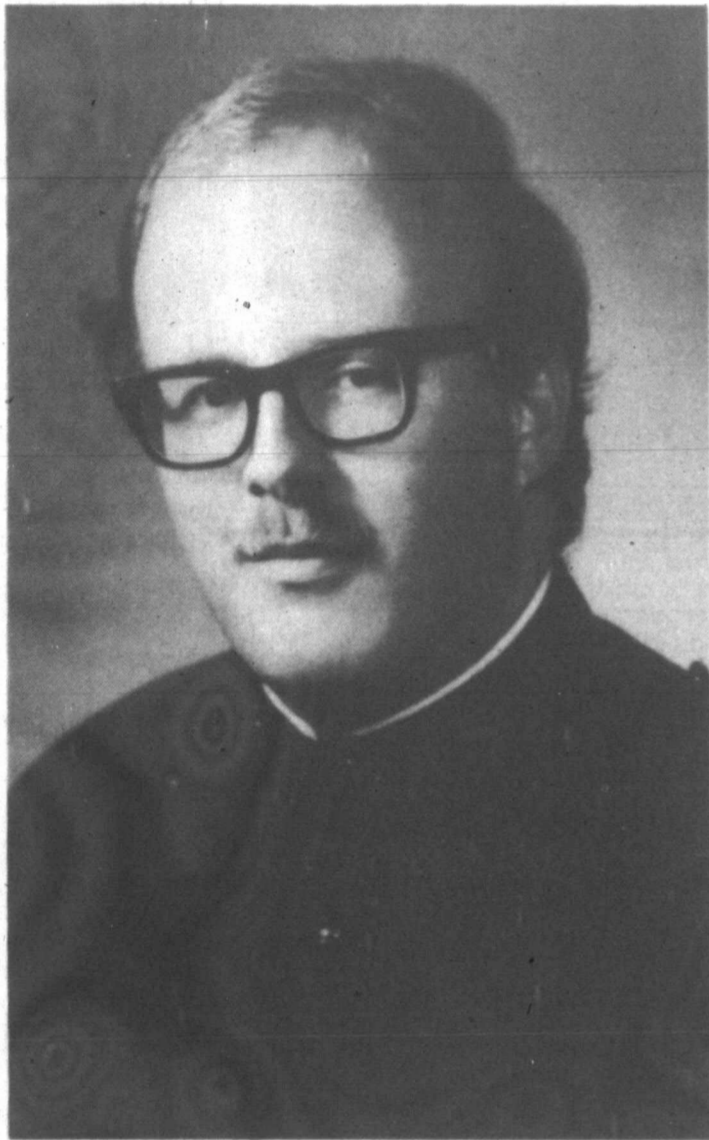

BRISTOL, R.I. (AP) — The Bristol County Elks Lodge is sponsoring a Bicentennial contest for junior high school pupils, but the participants will be in their 30s before they find out who won.

The lodge is inviting pupils to submit essays or sketches depicting what they think life in the area will be like in the year 2000.

The entries will be stored in a time capsule and placed in a Bicentennial monument this year, said Roman A. Kreher, Elks representative.

The capsule will be opened in 24 years and the winner will be the former pupil whose prediction of future life in Bristol County was most accurate.

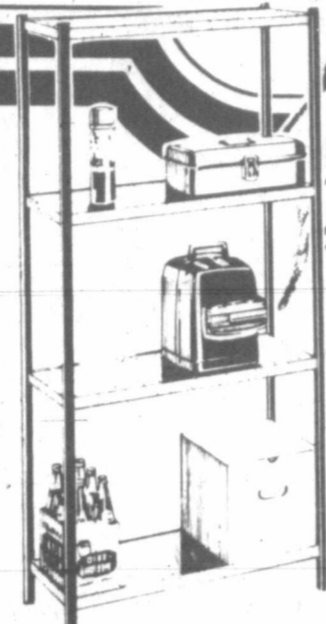

Kreher said the Elks are establishing a \$100 trust this year which, with interest accumulated over 24 years, will be awarded the winner.

Salvation Army Cadet

Cadet Frederick Andrew McClure III of Pampa received his commission as a lieutenant during commissioning exercises for cadets at the Salvation Army School for Officers Training in Atlanta on June 6. He is scheduled to be appointed as an officer at a Salvation Army Post in one of the Southern States. The curriculum McClure completed includes theoretical and practical courses in ministry, community service, study of the development and administration of the Salvation Army. Cadet McClure is the son of Major and Mrs. Fred A. McClure of 421 Branch Drive in Silver Springs, Md.

Mystery jar causes 12 hospitalizations

HOUSTON (AP) — A dozen persons remained hospitalized today as officials continued an investigation of a mysterious chemical compound found in a glass jar on a vacant lot.

Dr. Walter A. Quebedeaux Jr., county pollution control director, said late Monday he was 90 per cent certain after two days of laboratory tests the compound was orthochloro-benzylidene-malonitrile.

Dr. Ralph Coleman, head of emergency services at Westside General Hospital, said little is known here about the chemical.

"I know small amounts are very dangerous and I know it is used in drug manufacture and in the manufacture of chemicals for chemical warfare," Coleman said.

Coleman said discussions would be held with Army hospital officials in Washington.

The National Poison Center in Pittsburgh also was being asked to assess the situation.

"It's not an insecticide as first thought," said Mike Ellis, associate director of the poison control center at John Sealy Hospital in Galveston.

"The symptomatology doesn't fit," Ellis said.

Seven men were hospitalized Sunday and the number increased Monday after others exposed to the chemical returned for further checks.

"Anybody who has had contact or been around the station should watch for respiratory

problems," a spokesman said.

More than 20 members of the volunteer fire department answered the Saturday call when the glass jar was run over by a tractor and mower as Gary Stevenson, 23, was mowing the vacant lot. The fumes spread rapidly.

Stevenson and his father, R. K. Stevenson, 45, nine firemen, and a hospital employee now have been hospitalized.

The symptoms include breathing problems, changes in skin color and pulse rate, fatigue, and liver and kidney ailments.

"We are now seeing increased liver damage, pulmonary-lung damage, and developing signs suggesting early kidney damage," Coleman said.

By FRED S. HOFFMAN
AP Military Writer
WASHINGTON (AP) — U.S. intelligence sources say Russia has built six plants that may be capable of producing biological warfare weapons that were banned by a U.S.-Soviet treaty.

Some intelligence reports describe the plants as "suspected" biological warfare production and storage facilities.

Other sources say the plants may be making "biological-associated products" for agricultural purposes but could be adapted easily to turn out warfare materials.

Russia and the United States both have ratified a treaty which bans development, production and stockpiling of biological weapons, such as germs that would spread infection and cause death.

In late 1969, President Richard M. Nixon renounced any U.S. resort to germ warfare and promised to destroy existing stockpiles of biological weapons. The Army said this destruction was completed in 1973.

Nixon also pledged that future U.S. government research in biological weapons would be limited to defensive measures, such as immunization serums against germ weapons that other countries might use against the United States.

A senior defense official told Congress two years ago that "reliable verification" of other countries' actions regarding biological warfare was deemed not possible under the treaty.

With on-sight inspection ruled out, U.S. intelligence agencies have used satellites to watch

for possible violations of the ban.

As a result of surveillance of Soviet territory, a recent intelligence report said that a sixth suspected plant had been located at Aksu, about 100 miles south-south-west of Omsk in central Russia. It was said to have tight security around it.

The plants are reported spaced several hundred miles apart along a main rail line from the Moscow area to central Russia.

Although there was no outright accusation that the Russians are cheating, one intelligence report said the plant designs "indicate they were built for biological warfare capability."

Motor boat ran over boy

AUSTIN (AP) — A search resumed today for a 13-year-old boy who is missing after he and two companions were run over by a motor boat late Monday in Lake Walter B. Long near Austin.

Donald G. Richardson, 38, operator of the boat, was placed under \$15,000 bond on charges of injuring one of the three boys.

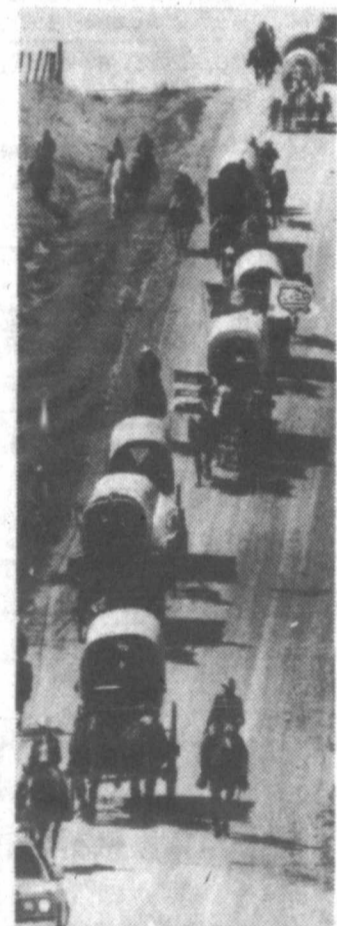

Drawing lots may decide Dumas race

DUMAS — An official tally in the race between Moore County Commissioner Precinct 1 June 5 runoff showed that Dan Hatter, incumbent, and George Murphy, were tied for the post.

The recount was called Monday by Murphy who polled 258 votes to Hatter's 260. An official from the county clerk's office showed a mistax had occurred in one voting box.

The winner, officials said, will be decided by a drawing of lots unless one of the candidates demands another recount or unless one withdraws.

James R. Lovell, Moore County Democratic chairman, will meet with the candidates. However, he was out of the city Monday.

HITTING the Bicentennial trail, the Wagon Train Pilgrimage makes its way through rolling Iowa countryside en route to Valley Forge, Pa., where it's scheduled to arrive July 3.
