

Farm Bill allocates funding to USDA Wildlife Habitat Incentives Program

Funding has been allocated for the USDA Wildlife Habitat Incentives Program (WHIP) in Texas. The USDA-Natural Resources Conservation Service (NRCS) announces the application period for funding to be utilized for the restoration of native degraded habitat on private lands.

Texas received funding allocations for WHIP through the passage of the 2002 Farm Bill. With the new farm bill provisions, producers

requesting assistance will need to have an AD-1026 form on file at the Farm Service Agency. The contract cost-share limitation is set at \$25,000, and all cost-share percentages are set at 75 percent.

WHIP is a voluntary program for individuals who want to restore degraded habitat on private lands. NRCS and interested land-owners work together to prepare a wildlife habitat development plan that lasts a minimum of five years.

"NRCS provides both technical assistance and cost-sharing to help establish and restore native degraded habitats through WHIP," said NRCS Wildlife Biologist Charles Coffman.

The application deadline for WHIP is July 21, 2002. Interested producers would contact the NRCS field office located in their local USDA Service Center.

More information is available on the USDA website at www.usda.gov/farbill.

Stenholm announces E-Rate Funding for Borden County ISD

Congressman Charlie Stenholm announced that Borden Co. ISD has received E-rate funding in the amount of \$12,180 from the Schools and Libraries Division (SLD) of the Universal Service Administrative Company (USAC). This money will be used to help the school district develop telecommunications services and Internet access.

"I support programs like the E-rate that result in direct services to rural areas," congressman Stenholm said. "By helping rural and underfunded school districts provide current technology for their students, the E-rate is helping to ensure that equal educational opportunities are

available to students across the nation, regardless of location or income."

The E-rate program was created as a part of the federal Telecommunications Act of 1996 to ensure that all eligible schools and libraries in the United States have affordable access to modern telecommunications and information services. Applications are open to all public and private K-12 schools and public libraries. Discount funding is calculated according to a school's level of economic disadvantage (based on percentage of students eligible for the national school lunch program) and their location, rural or urban.

Summer Boredom Busters

Now that school is out, parents know that shortly they'll hear that old familiar refrain - "I'm sooo bored." Have no fear - Boredom Busters are here. These tips are perfect for children of all ages. Some offer children the opportunity to make money; others are educational. Still others are simply whimsical. Post this list on your refrigerator and see how many get accomplished by summer's end.

HAVE FUN!

1. Mow lawns
2. House-sit for vacationing neighbors.

3. Baby sit
4. Pet-sit and/or do pet grooming
5. Visit shut-ins or the elderly
6. Volunteer at the public library
7. Operate a lemonade stand
8. Make ice cream
9. Take walks (around the neighborhood, nature walks, etc.)
10. Visit local museums
11. Read a book
12. Hold a neighborhood car wash
13. Tend a garden
14. Fly a kite
15. Go swimming
16. Chase fireflies

17. Watch a sunset/sunrise
18. Run a newspaper route
19. Help your parents with housework
20. Do absolutely nothing for a morning, afternoon, or even a whole day.
21. Ask grandparents or relatives to relate family history to you
22. Gather a group of your friends and visit a nursing home
23. Once each week, try a new fruit or vegetable
24. Turn the TV off for a week
25. Have a family/friend game night once a week
26. Teach your dog a trick
27. Go bird-watching in your

- neighborhood
28. Visit a farm
29. Run around barefoot in the rain (but not during a thunderstorm)
30. Play in the sprinkler
31. Learn a new recipe
32. Write your own biography
33. Organize the family photos into albums
34. Give mom or dad the day off by doing all the housework for them
35. Camp out in the backyard
36. Fix your parents breakfast in bed

37. Give your parents a hug
38. Go barefoot all day
39. Learn the basics of a new language (Internet sites can be helpful here)
40. Make sun tea
41. Go on a picnic in the park
42. Organize a garage sale
43. Find out your mail carrier's name
44. Write a letter to a friend. No computers or e-mail allowed!
45. One day out of each week, read every article in your local newspaper.

Borden County Extension Agent -
Family and Consumer Sciences

Extension programs serve people of all ages regardless of socioeconomic level, race, color, sex, religion, disability, or national origin. The Texas A&M University System, U.S. Department of Agriculture, and the County Commissioners Courts of Texas Cooperating.

Keeping Your Cool

It's impossible to escape the need for water in our lives. In fact, our need for water ranks second only to our need for oxygen. Even when we're not thirsty, our bodies still require plenty of fluids. Maintaining an adequate level of fluids in your diet is an important part of a healthy lifestyle. Water is an ideal source, but other water-based beverages like juice and sports drinks can also count.

The water in your body serves many purposes. It regulates temperature, removes waste, carries nutrients and oxygen to the cells, helps moisturize the skin, cushion and lubricates joints to keep body parts moving smoothly and help promote regularity.

You are more likely to become dehydrated during

extreme weather and physical activity, so keep liquids on hand for those hot or cold days when you are working out. Dehydration symptoms include fatigue, headache, dizziness, nausea, dark-colored urine or infrequent urination, labored breathing, increased body temperature or dry skin. Thirst is not always the first sign of dehydration.

Most experts agree that we should try to consume eight 8-oz. glasses of water daily. However, your needs can increase depending on your age and level of physical activity. Truly, the important thing to remember is that adequate hydration is an important part of your health.

Information taken from *Kraft Food & Family Magazine Summer 2002*

Eight Tips for 8 Glasses

1. If you haven't been including a lot of water in your diet, resolve to work your way up to the full eight glasses.
2. Fill a 1-liter bottle of water and take it with you to work.
3. Give yourself small rewards each week if you drink your eight glasses.
4. Many fruits and vegetables contain water and can count toward your total fluid intake.
5. Caffeinated and alcoholic beverages have a diuretic effect, so try alternating them with water.
6. To rehydrate your body first thing in the morning, drink a glass of water before you

7. Perk up your taste buds! Replace one glass of water with flavored drink mix, lemonade, iced tea or juice.
8. Make a rainbow colored beverage by freezing flavored drink mix in ice cube trays and serving them with water.

SEEDS FROM THE SOWER

Michael A. Guido
Metter, Georgia

A little boy came stumbling out of his bedroom. Patiently, his father picked him up and asked, "Why can't you sleep?"

"I don't like my room," he answered.

"Why?"

"Because," he said, "it's full of lonely."

Our biggest problem today is loneliness.

Although we have more people, there's more loneliness. People are facing their temptations and troubles all alone.

Is your life "full of lonely"? That's because your soul's homesick for the Lord.

Come to Him who promises, "I will never, never fail you or forsake you." Then you'll say, "The Lord is my Helper. I am not afraid of anything."

NOTICE TO CREDITORS

Notice is hereby given that original Letters of Guardianship of the Estate of **Irene Low Creighton**, an Incapacitated Person, were issued on **June 18, 2002**, under Probate Cause No. 358, pending in the County Court of Borden County, Texas, to: Peggy Westbrook of Borden County, Texas.

All claims should be addressed in care of the attorney for the Estate addressed as follows:

Mrs. Peggy Westbrook
Guardian of the Estate of Irene Low Creighton
c/o Paula J. Smith
GARRY R. TERRELL, P.C.
P.O. Box 64968
Lubbock, TX

79464-4968

All persons having claims against this Estate which is currently being administered are required to present them within the time and in the manner prescribed by law.

Dated this **21st** day of **June**, 2002

2001 Drinking Water Quality Report

(Consumer Confidence Report)

806/756-4391

BORDEN COUNTY WATER SYSTEM

Special Notice for the ELDERLY, INFANTS, CANCER PATIENTS, people with HIV/AIDS or other immune problems:

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/Centers for Disease Control and Prevention (CDC) guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

OUR DRINKING WATER IS REGULATED

by the Texas Natural Resource Conservation Commission (TNRCC) and they have determined that certain water quality issues exist which prevent our water from meeting all of the requirements as stated in the Federal Drinking Water Standards. Each issue is listed in this report as a violation and we are working closely with the TNRCC to achieve solutions.

En Espanol

Este reporte incluye informacion importante sobre el agua para tomar. Si tiene preguntas o discusiones sobre este reporte en espanol, favor de llamar al tel. 806/756-4391 par hablar con una persona bilingue en espanol.

Where do we get our drinking water? Our drinking water is obtained from Ground water sources. It comes from the following Lake/River/Reservoir/Aquifer: OGALLALA. TNRCC will be reviewing all of Texas' drinking water sources. The source water assessment process will be completed within three years. It is important to protect your drinking water by protecting your water source.

ALL drinking water may contain contaminants.

When drinking water meets federal standards there may not be any health based benefits to purchasing bottled water or point of use devices.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (800-426-4791).

About The Following Pages

The pages that follow list all of the federally regulated or monitored constituents which have been found in your drinking water. U.S. EPA requires water systems to test up to 97 constituents

Secondary Constituents

Many constituents (such as calcium, sodium, or iron) which are often found in drinking water, can cause taste, color, and odor problems. The taste and odor constituents are called secondary constituents and are regulated by the State of Texas, not EPA. These constituents are not causes for health concerns. Therefore, secondaries are not required to be reported in this document but they may greatly affect the appearance and taste of your water.

Public Participation Opportunities

Date: July 22, 2002

Time: 9:30 a.m.

Location: Borden County Courthouse

Phone No: 806/756-4391

DEFINITIONS

Maximum Contaminant Level (MCL)
The highest permissible level of a contaminant in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG)
The level of a contaminant in drinking water below which there is no known or expected health risk. MCLGs allow for a margin of safety

Treatment Technique (TT) -

A required process intended to reduce the level of a contaminant in drinking water.

Action Level (AL)-

The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

NTU - Nephelometric Turbidity Units

MFL - million fibers per liter (a measure of asbestos)

pCi/l - picocuries per liter (a measure of radioactivity)

ppm - parts per million, or milligrams per liter (mg/l)

ppb - parts per billion, or micrograms per liter (µg/l)

ppt - parts per trillion, or nanograms per liter

ppq - parts per quadrillion, or picograms per liter

Inorganics

Year	Constituent	Highest Level at Any Sampling Point	Range of Detected Levels	MCL	MCLG	Unit of Measure	Source of Constituent
2001	Arsenic	22.5	22.5000-22.5000	50	0	ppb	Erosion of natural deposits; Runoff from orchards; Runoff from glass and electronics production wastes.
2001	Barium	0.033	0.0330-0.0330	2	2	ppm	Discharge of drilling wastes; Discharge from metal refineries; Erosion of natural deposits.
2001	Fluoride	5.5	5.5000-5.5000	4	4	ppm	Erosion of natural deposits; Water additive which promotes strong teeth; Discharge from fertilizer and aluminum factories.
2001	Nitrate	0.79	0.7900-0.7900	10	10	ppm	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits.
2001	Selenium	8.8	8.8000-8.8000	50	50	ppb	Discharge from petroleum and metal refineries; Erosion of natural deposits; Discharge from mines.
2001	Sodium	87.8	87.8000-87.8000	NA	NA	ppm	Erosion of natural deposits; By-product of oil field activity.

NA = MCL not applicable - not regulated. Special Monitoring Requirement.

Organics NOT TESTED FOR OR NOT DETECTED

Disinfection By-Products NOT TESTED FOR OR NOT DETECTED

Unregulated Contaminants

Year	Constituent	Average of All Sampling Points	Range of Detected Levels	Unit of Measure	Reason for Monitoring
2000-2000	Bromoform	.1	1.0000-1.0000	ppb	Unregulated contaminant monitoring helps EPA to determine where certain contaminants occur and whether it needs to regulate those contaminants
2000-2000	Chlorodibromomethane	0.5	0.5000-0.5000	ppb	Unregulated contaminant monitoring helps EPA to determine where certain contaminants occur and whether it needs to regulate those contaminants

Lead and Copper

Year	Constituent	The 90th Percentile	Number of Sites Exceeding Action Level	Action Level	Unit of Measure	Source of Constituent
1999	Lead	1.1000	0	15	ppb	Corrosion of household plumbing systems; Erosion of natural deposits.
1999	Copper	0.0640	0	1.3	ppm	Corrosion of household plumbing systems; Erosion of natural deposits; Leaching from wood preservatives.

Total Coliform NOT DETECTED

Fecal Coliform NOT DETECTED

Violations

Violation Type	Explanation	Health Effects	Duration	Steps to Correct
MCL-FLUORIDE		Some people who drink water containing fluoride in excess of the MCL over many years could get bone disease, including pain and tenderness of the bones. Children may get mottled teeth.	3/26/1982 to PRESENT	

Required Additional Health Information for Arsenic

The maximum contaminant level (MCL) for arsenic will be decreasing from 0.05 mg/l (CCR - 50 ppb) to 0.01 mg/l (CCR - 10 ppb) effective January 23, 2006. EPA and States are still discussing the level. Until these issues are worked out, TNRCC is providing the following health effects language according to new Consumer Confidence Report (CCR) reporting requirements for arsenic. Because the highest reported arsenic level on this report is above 10 ppb, this information is required by EPA:

"Some people who drink water containing arsenic in excess of the MCL over many years could experience skin damage or problems with their circulatory system, and may have an increased risk of getting cancer."

FLUORIDE

Water supplied by the Borden County Water System exceeds the maximum constituent level of fluoride as established by the TNRCC.

To correct the MCL violation, the Borden County Water System provides fluoride free water to all children, under the age of 14, who receive their water through service connections to the Borden County Water System.
