Officials take sides on Carter's dam ban

By The Associated Press

Officials in 15 states warn that President Carter will be displaying poor judgment and bad timing if he drops funding for 18 dams and other water projects — most of them in the drought-stricken West

Administration sources said over the weekend that Carter will ask Congress to withhold fiscal 1978 funds from the proj-

The sources said Carter would announce his decision today or Tuesday.

Western governors ask drought aid

DENVER (AP) — Western and midwestern governors, while seeking federal aid to get them through the current drought, are looking for some long-range solutions to persistent water-shortage problems

Governors from 11 states and representatives from six others met on Sunday with Interior Secretary Cecil Andrus at the invitation of Colorado Gov Richard Lamm They unanimously endorsed establishment of a task force to study water problems and ways to ease shortages, and they discussed the need for immediate federal aid.

Andrus met some displeasure from governors

tration sources that President Carter may eliminate funding for 18 dams and water projects

Andrus said he considered it "regrettable" they heard of the plan before he could contact them personally. The timing was unfortunate. It would have helped this meeting if the announcement had come next week." he said.

Some governors said they were concerned particularly about effects on agriculture and livestock production — the lifeblood of many western and midwestern states

Jury to meet with Martindale

County Attorney David Martindale said this morning that he had seen but had not yet been presented the two misdemeanor charges returned Friday by the Gray County Grand Jury against Robert Monogue, former administrator of the county's two hospitals -Highland General and McLean General

Monogue is charged in the misdemeanors with compensation for past official behavior." in connection with incidents involving his alleged acceptance of an amount of carpeting and an amount of liquor from companies involved in selling goods to the hospital

Each of the misdemeanor offenses is punishable by a fine up to \$2,000 and up to a year in county jail

The grand jury also returned a felony indictment against Monogue, charging him with misapplication of government property

The felony indictment accuses Monogue of acting with an intent to obtain benefit for himself by paying \$76 to Mrs. Sharon A Mack, knowing the

Both panels have summoned Interior Department officials to testify on a departmental report that claims 10 major producers in the Gulf of Mexico cut back on production despite gas shortages.

A new breed: roller coaster freaks

By MICHAEL A. LUTZ **Associated Press Writer**

HOUSTON (AP) - A 54-yearold grandmother says it's the only place in the American society where it's acceptable to scream.

Another says it's like hitting yourself in the head repeatedly with a hammer. It feels good only after you quit. "It's the greatest thrill on this planet." said

State University of New York art professor Robert Cartmell All were trying to describe why they are

members of a fast-growing cult of thrill seekers who travel the country much like surfers comb the shorelines seeking the ultimate wave. Cartmell and his friends run to a different

drummer — they are roller coaster freaks. Even these buffs can't explain adequately why they repeatedly subject their bodies to 90-foot drops at speeds of 60 miles per hour neck-popping turns, and doubled body weight from the force of gravity at the bottom of the dips A ride on a major roller coaster is a two-minute

escape from all earthly cares. It starts with a slow chain-driven climb to the top of the first drop, usually the biggest on the ride.

Less than two minutes laters, the travelers are returned to an upright position, most with a new faith in a supreme being and a vow — to get back on and ride again.

Cartmell, the reigning guru of the traveling roller coaster set, has ridden 139 roller coasters and may be the leading authority on them.

After painstaking research, Cartmell published his first Top 10 roller coaster rankings in the New York Times in 1974. He has now revised that list with a new No. 1 ranked coaster, the Texas Cyclone at Houston's Astroworld a replica of Brooklyn's famed Cyclone at Coney Island.

Cartmell recently completed an exhibit for the Smithsonian Institute on the history of roller coasters and has written a book on the history of amusement parks

Cartmell also has proven he will go anywhere. anytime to test a new coaster. While suffering from pneumonia. Cartmell ignored his doctor's orders and flew here last year to ride the Texas Cyclone for the first time.

"I told my doctor I just couldn't pass up the opportunity. Cartmell said. I guess this really will brand me as some kind of a nut.

Cartmell started his fascination with roller

has been hooked for life. His interest intensified in 1969 when he started doing research. After riding the Texas Cyclone about 30 times. Cartmell decided to give it the top billing, dropping the previous leader, the Thunderbolt at West Mifflin, Pa. to No. 2.

Mister Twister at Denver, Colo. moved into the rankings for the first time at No. 3. The Coney Island Cyclone, termed by Cartmell as the world's most famous coaster, is fourth.

The rest of the Top 10 includes: 6, the Comet. Crystal Beach, Ontario: 7, the Giant Coaster. Nantasket Beach, Mass.: 8. The Racer, Mexico City: 9. the Giant Dipper. Santa Cruz. Calif: and 10. the Coaster, Allentown, Pa.

The Racer in Cincinnati, Ohio. No. 8 on Cartmell's first listing, and the Cyclone at Denver, previously No. 10, were forced off the new listing by Mister Twister and the Texas Cyclone.

The Thunderbolt is an outstanding coaster. Cartmell said. But the Texas Cyclone is more what people think of as being a roller coaster ride. You can ride it over and over and if you know every inch of the track, it still will thrill you.

roller coasters have a good first drop and then the rest of the ride is a bore. The Texas Cyclone's first drop is so steep (53 degrees) you feel like it's going to bend back under the track.

The Thunderbolt has a 90foot drop at the finish. It is unique because it has its highest drop at the finish. It's an ingenious coaster - double leveled, with all the wicker parts hidden so you don't know what's coming. That's unfair. The aura of danger surrounding roller coasters

is a myth. Cartmell said. "It can give you a heart attack, but as far as other physical danger, it's as safe as a merry-go-round It's safe as long as you stay in your seat, he

When I ride a roller coaster, I always keep both hands on the bar." Cartmell said. "Accidents always happen when somebody is trying to show off. I tell everybdy if you stay in your seat.

Recause of his articles in the New York Times and other publications. Cartmell has built up a correspondence list of about 5,000 other roller coaster enthusiasts.

Injured youth rescued day after accident

A 17-year-old Skellytown youth was listed in good condition this morning at Highland General Hospital after sustaining multiple cuts and abrasions in a motorcycle accident and spending a night in the open.

Ricky Sturgill apparently was riding his motorcycle home to Skellytown from Pampa at about 10:30 a.m. when he went on the right side of a bridge guard rail, according to Trooper Wayne Williams of the Texas Department of Public Safety.

The accident occurred on Texas 152. 2.1 miles east of Skellytown and a half mile west of FM 2386, near the Dorchester

Sturgill was not found until 7:30 a.m. today, Williams said. The trooper said the youth apparently was protected from the cold night temperatures by a

Vermell Meador, director of nursing at the hospital, said Sturgill had been admitted for observation

The big confrontation

The chips are down and the forces of individual freedom and compulsory union membership are poised and ready for the Big Confrontation Probably both sides are running a little scared

It will be a winner - take - all battle between the Good Guys (in white hats, of course) and the Bad Guys (wearing black) The scene will be the halls of Congress in Washington

The meeting of the opposing sides will be one of the most significant occasions on the calendar of the 95th Congress and the outcome, whatever it is. will be a landmark decision.

The Bad Guys want to repeal Section 14(b) of the Taft Hartley Act which makes it possible for a man to hold a job without joining a union. They (the BGs) want to force everybody to join unions and pay tribute to them in the form of union dues. Boo on

The Good Guys, facing a prounion House and Senate, are convinced that right makes might and are ready to take on their opponents. They're on Our Side Hooray for them

Or take, if you will, the network news treatment of President Carter's plan to reorganize administrative branch of

government by allowing him (Carter) to abolish, consolidate. and restructure governmental departments and agencies with out having to get prior Congressional approval (Congress could only veto his plans.) The network newscasters treated this item very warmly, speaking of Carter's efforts "to streamline government." "make it more efficient," and "eliminate red tape." In watching ABC-TV's Sam Donaldson report the matter. I was almost left with the impression that Carter was a modern - day David taking on the giant bureaucracy.

Carter, of course, only desires

to have the bureaucracy operate

more effectively, ... he does not purpose, in the process, to have the federal government have a reduced role in directing and controlling the lives of the American people. But suppose a right - of - center administration had offered the same proposal as Carter's, but for the purpose of reducing the power of the federal government? How do you suppose the media would, for example, have handled an identical proposal by Richard Nixon while he was still President? I can imagine the network newscasters portraying the plans as a "power - grab, and an attempt "to destroy Congress, the Constitution, and the right of the people to political representation." All in all, we would have been left with the impression that the same gang of sneering, brown shirted, youths mentioned

AFL-CIO plans attack via public relations

The AFL-CIO, looking for backing in the Democrat-controlled Congress, has chosen this spring to fight for an omnibus revision of basic labor laws, including repeal of the "right-towork" provision of the Taft-Hartley Act.

A tax on the labor federation's 14 million members will finance a public relations campaign aimed at winning public support and understanding. An AFL-CIO source said the tax is expected to raise \$750,000.

Labor's senior legislative strategists decided on the one bill approach rather than a piecemeal attack during private weekend meetings here. The union's executive council which holds its winter meeting today, is expected to approve the program and AFL-CIO President George Meany will unveil it Tuesday

Although labor sources say they expect a hard fight in Congress, they believe chances for success are the best in a decade with Democrats controlling both Congress and the White

According to sources, labor lobbyists will seek to use a bill already introduced by Rep. Frank Thompson Jr., D-N.J., chairman of the House labor subcommittee, as the vehicle for the changes they want. His bill would make major changes in the 41-year-old National Labor Relations Act.

The Thompson bill, called the Labor Reform Act of 1977. would ease union organizing efforts by speeding the representation process. Through amendments AFL-CIO lobbyists would include repeal of Section 14-b in

Union officials view the Thompson bill as an effort to redress what they contend is a legal imbalance that permits employers to delay union organizing attempts. They say employers often find it cheaper to break the law and pay the fines rather than permit union-

Also a part of the legislative strategy - and as the first test of Carter's campaign promises - the AFL-CIO is pushing for quick passage of four bills that were vetoed by former President Ford. These measures would ex-

pand union picketing rights at construction sites, remove the ban on political activities by federal workers, require that half of all imported oil be carried on U.S. ships, and set strict requirements on the res-

a) Stir yeast, water, dry milk and sugar in 2½ quart crock or nonmatallic bowl until yeast is dissolved. Stir in flour gradually until a smooth batter forms. Let stand loosely covered in warm place. 3 to 5 days. Stir down batter occasionally. Store loosely covered

b) Replace exact amount of starter used for each recipe by stirring equal amounts of homogenized milk and flour back into starter. (For example, replace 1 cup starter with ½ cup homogenized milk and 1/2 cup flour). Let stand loosely covered until it bubbles, overnight. Stir down. Each time this process is repeated, the starter becomes more active and develops a more sour flavor. Note: if stored as much as two to three weeks between usings, just pour off the watery layer on top and replace following procedure in (b)

DAMASCUS, Syria (AP) Secretary of State Cyrus R. Vance said today "very sharp differences' remain among the Israelis and the Arabs on how to deal with the Palestinians

peace talks in Geneva. Vance told a news conference before departing for home after his six-nation Middle East tour that "all parties agree on the need for peace" and would like to redirect their economies away from massive military

expenditures. But "one must be careful not to be overly optimistic." he cautioned. The secretary of state was

seen off at the airport by Syr-

ian Foreign Minister Abdulha-

lim Khaddam. He told reporters that his visits to Israel. Egypt. Jordan. Lebanon, Saudi Arabia and Syria gave him "a clear understanding" of the Middle East situation. He said all six governments are prepared to resume the Geneva talks during the second half of this year. But he said the Arabs themselves were divided on how Palestinian interests should be represented. A major topic of Vance's

week of talks was ways to bring the Palestinians into negotiations with Israel, which refuses to negotiate with the Palestinian Liberation Organization until it formally recognizes Israel's right to exist. Vance said the Israelis and Arabs do not even share the

same definition of peace. To the Israelis, peace includes full diplomatic relations, he said, but to the Arabs, it involves only an end to the state of war with relations developing later. The secretary of state said Syrian President Hafez Assad would probably meet President

Dear Abby By Abigail Van Buren

DEAR ABBY: Here's the situation: Lori, a 31-year-old single woman was recently adopted by her lover, Charlie, a 35-year-old man with two children and a wife who refuses to give him a divorce.

Charlie and Lori now live together and because they have. the same last name, everyone assumes they are man and

Charlie says his lawyer advised him that this arrangement is better for him than marriage because if Lori and he split, she can't sue him for alimony. Also, since he's supporting Lori he can claim a nice tax deduction.

prolongs life? I am not trying to put you on a spot in answering these questions, it is just that I am so confused. I don't know what to think or believe.

DEAR READER - I am not surprised that you are confused. Medicine is not an exact science and scientists often disagree over more exact matters - such as nuclear energy. In medicine, new techniques or new medicines are tested and they have their proponents who think they have had good success in using them and their opponents who have had less satisfactory experiences with the same

medicines or techniques. Whether a person should have a graft put in to detour blood around a block in one or more arteries to the heart muscle depends a lot on the individual case. There are some combinations where surgery will prolong life but your description of the location of your occlusions does not fit that category.

Which is why we were sit-

we asked her. "Terry has loops, but many

other fabrics have loops," she said, reaching for a swatch of toweling. "A towel has terry on both sides. It used to be all cotton, but now the conventional towel is 84 per cent cotton and 16 per cent polyester. Blending makes a very strong piece of cloth and substantially reduces your shrinkage factor, and cotton got very expensive. Woven terry is used for towels.

She picked up another swatch. "This knitted terry is flat on one side - as I said, woven terry has loops on both sides. This drapes easier, which is why it's used extensively for sportswear, women's robes, etc.

Gillman's visitor left just as we said, but what does 'terry'' come from, what does it mean, and she called over to him, how would you define terry cloth?

"Terry was the first true no-iron fabric and still is," he yelled.

'We also make frosty terry," she resumed, offering a pink and white sample. "The loops are white over the basic color which gives it a frosty look and

"In woven goods," he went on, "you have a warp and a fill, a back side and a face. In knitted goods, you have two components, the face and the back, do you understand?"

Right. "In the terry knits, the blends, polyester would be all hidden to the surface. See, you have a 50-50 blend on the back side and basically a 100 per cent cotton on the face. All the loops are Understand?' Um.

"So in woven terry, your face is cotton, your back side is cotton, your warp and your fill are a blend, but the cotton is what touches the consumer.

Whatever you say. We thanked them and left and looked in the dictionary. It says "terry" is derived from the French "tirer, to draw," and means "any of the loops forming the pile of a fabric, when left uncut.

Otherwise, there is no complete agreement among experts that having the graft will prolong your life. It may relieve your symptoms if you are having chest pain. With the one exception

(blockage of the main left coronary artery) I usually prefer that the patient try a medical program. But that program means a lot more than just taking pills. Remarkable results can sometimes be achieved by going on a strict diet to eliminate every ounce of excess body fat a person may have. It should be a low-fat, low-cholesterol diet of about 1200 calories a day or restricted enough to produce a gradual loss of fat. As the fat disappears the chest pain will begin to occur less often and

may finally disappear. There are some studies that suggest that as you reduce you will also help to clear the arteries. The problem most people have is that they do not stay on a diet. They do not lose all the weight they need to lose. If you need to lose 40 pounds, losing 15 may help but it is far short of the results

that could be realized. Of course, smoking, alcohol and probably coffee should be eliminated. Incidentally the patients who do eliminate weight and follow a good program after surgery are the ones who get the best results from surgery — or the associated medical program.

I am sending you The Health Letter number 4-7, Weight Losing Diet, as that is probably where you need the most help. I can't overemphasize the importance of losing any weight you can. Dr. J leads 76ers to comeback over Cavs

By ALEX SACHARE **AP Sports Writer** A message for Philadelphia

basketball fans: when there is a Doctor in the house, the patient is not dead until the final buzzer. The Philadelphia 76ers trailed

89-65 with 22 seconds left in the third period and by 13 with just 3:19 remaining in Sunday's game against Cleveland. Some fans at the Spectrum in Philadelphia gave up.

'A lot of people left with two minutes to go." said Julius Erving, the marvelous Dr. J. "I noticed that. They'll be surprised when they read tomorrow that we won.

The 76ers, with Erving scoring 13 of his 34 points in the fourth quarter, came back and won on a pair of free throws by Lloyd Free with 18 seconds left. Philadelphia Coach Gene Shue described the comeback as incredible, but not Erving, who scored seven of his team's last nine points.

"I've seen teams come back on us." said Erving. "So why not us? In this game, you never say die until it's over

low...there is a 10 year warranty on Gas Air Conditioning!

Install Gas air conditioning now and forget about major cooling problems for at least ten years. And, ten years is a loooong time. Time for children to finish junior high, high school and graduate from college. That's a lot of summers for you to enjoy a cool, comfortable home without worrying about expensive maintenance to your cooling system.

How can we give a 10 year warranty on Arkla-Servel Gas air conditioning when the other kind offers only five?

The answer is in quality construction and Gas air conditioning's simple operating system. Most of the important parts in an Arkla-Servel are stainless steel and they are put together by craftsmen. And, there are fewer moving parts to wear out. Gas air conditioning lasts longer, lasts better.

Install Gas air conditioning now and be ready for next summer . . . and the next . . . and the next . . .

Call for a free cooling survey. There is NO OBLIGATION.

Pampa choirs honored

Pampa singers took top honors during Friday night's Chamber Choir and Madrigal Festival at Amarillo College.

According to John Woicikowfski, Pampa High School choir director, an award for the outstanding performance of the festival was given in each of two categories — junior high and senior high school divisions. Pampa won both.

The Pampa Junior High School chamber choir was rated number one among junior presentations. The 27-member choir was directed by Elena Donald. PJHS choral music

instructor. Pampa High School's music department was represented in the senior division by an eight member madrigal group. Woicikowsski said the octet was also featured in the concert choir's performance last week for the Texas Music Educators Association convention in

The festival is an annual event sponsored by Amarillo College. Eleven area schools participated in this year's program. Woicikowski said. A choral music clinic for the singers preceded the concert.

HARLINGEN, Tex. (AP) — The man who held about 75 law officers at bay with an impotent pistol was charged with three counts of aggravated kidnaping stemming from a bizzare series of events that began Saturday at a Border Patrol checkpoint in South Texas.

Raul Aguilar Parrish, 46. of Houston, allegedly wounded Border Patrolman Cecilio Ruiz when Ruiz discovered an undetermined amount of marijuana in the automobile's trunk.

That incident ignited a 10hour saga covering five coun-ties during which Parrish held a total of six hostages and com-

andeered four vehicles. He led a parade of about two

dozen law enforcement vehicles ly-armed officers was unaware on a stretcher to a local hospito his final stop, a motel in this Rio Grande Valley city.

He was negotiating with Texas Ranger Gene Powell through a doctor and a Drug Enforcement Administration (DEA) agent when, after taking an injection of valium, a tranquilizer. The DEA agent snatched the .44 magnum revolver out of his limp, sedated

grip. We were ready to blow him away. It's a good thing we didn't shoot him ... His gun only had five spent shells in the chamber." said an officer on the scene who refused to give his name
