SOVIET TRADE:

Russia may be expected to look for more American and Allied goods once the wheat deal has really firmed up. There are hints that Russia may be interested in cotton and above all in industrial goods. The Russians will be followed by the satellites, who long since have been eyeing the prospect of extended trade with the West but have been restrained by the Russians, who call the signals. The way now seems open for them to line up, not only for wheat but for other purchases as well on this side of the Iron Curtain.

TIME HEALS ALL:

The current break in relations between the Philippines and the new Malaysian Federation is not expected to last long. The Philippines broke with the new federation because of a longtime Philippines claim to North Borneo, which was included in the new nation. But the Filipinos have not such strong feelings on the issue as have other summit meeting among their television sets.

Lefors-Canadian Major District 2-A Encounter

Two of the toughest defenses in the Top O' Texas clash Friday at Canadian, one featuring a potent passing attack along with it and the other a tremendous ground game.

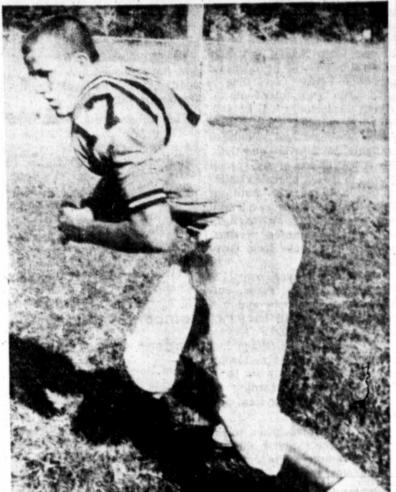

Pre-season favorite Lefors and pre-season cellar selection Canadian meet in the District 2-A opener after a first-half season that has changed the picture

Lefors went through its first two games unscathed, then, hurt by key injuries, bowed to strong Stratford and unbeaten Stinnett. he Pirates, recovered from the injury jink, proceeded to smash previously unbeaten Gruver last week. 37-6, to justify their rating, although looking anxiously over their shoulder at strong Wellington

Canadian however, has proven themselves anything but cellap-dwellers. Starting out raw, unproven and unwinning, coach Dwain Currie's Wildcats have bufft up a 1-3-1 record, with two of the three losses being twopoint heartbreakers.

"They could blow us plumb out of the park. . . they're that good a team." says Lefors coach Dunnie Goode. "Coach Dwain Currie has brought them

THIS IS A tribute. . . to one of the finest young men I have ever met. . .a Pampa High School senior named Larry 'Shotgun' Gregory.

Testimonials are usually written after a person is dead, when they don't mean much. This is written for a boy who is very much alive, but who had a piece of him die yesterday.

For Larry Gregory turned in his football uniform yesterday . .turned it in of his own volition. . . before his doctors or his family or his coaches had to make him do it. Turning in that uniform, that he had worn so proudly and so well, was possibly the most painful thing he ever had to do in his life. . .but Larry Gregory did it like a man . .and kept his promise.

LARRY GREGORY, when in unior high, was tabbed as fine an all-round athlete as had ever come out of Pampa. . .on a par with contemporaries Kenny Hebert and Randy Matson as a truly great star. . . an outstanding football player, basketball player, baseball player. . .you name it, Larry did it. . and did it well. When Larry was a sophomore,

he was stricken with an illness . .an illness that doctors felt again when a senior.

government, dealing with the bureaucrats only when you are forced to do so by law. If you do your best to avoid adding to the federal payroll, your own conscience will not trouble you even if government hires another million civilians to make work for one another. If you do your best, that's about all you can do for the time being but if you don't, depend upon it, the tax bite will grow worse and worse. I know a few people who ap-

pear to honestly believe taxes will not get much worse, even if they live for another 30 or 40 or even 50 years. On the other hand, most of them realize that the debt their children and grandchildren will have to face, will grow larger every year. If any can live with their own conscience under such circumstances, I can not help but sorry for them and their children and grandchildren. It is not known exactly which is the world's longest river: the Nile, the Amazon, or the Mississippi-Missouri. The last was once taken to be the longest but Army engineers now give its total length as 3, 891 mi. Both the Amazor and the Nile are thought to be over 4,000 mi. Uncertainty comes about because of measuring these rivers on maps of small scale.
