NOTICE TO THE PUBLIC

Any erroneous reflection upon the character, standing, or reputation of any individual, firm, concern or corporation that may appear in the columns of the Pampa Daily News will be gladly corrected when called to the attention of the editor. It is not the intention of this newspaper to injure any individual, firm or corporation, and corrections will be made, when warranted, as prominently as was the wrongfully published reference or article.

THE FUTURE OF AVIATION

At this time when everyone is wondering how seriously to take claims that aviation will supercede automobile traffic for many purposes, it is interesting to read in Time magazine a prediction by a man who forecast rather accurately a decade ago the possibilities of the motor car.

Time quotes Charles Coolidge Parlin, who recently completed a 20,387-mile research flying trip:

"In ten years, 250,000 privately owned planes will fly the U. S. airways; in 15 years, 1,000,000.

"Air transport between neighboring major cities will approach 'street car' frequency.

"A large proportion of U. S. business men will commute between offices and country homes in their own planes, piloted by flying chauffeurs.

"Within ten years, ten companies, producing fewer than 20 makes of planes, will hold more than 90 per cent of the total volume of business."

This is in reality a conservative prediction. The world moves much more rapidly in adopting new inventions than it did when the automobile was first placed on the market.

It is a propos to add that Pampa, and every other city of the 10,000 class, must provide good airports in order to compete with bigger cities in getting business that will travel by air. It pays to swim in the stream of progress.

SMALL IS GAINING

Reports from over the state indicate that Senator Clint Small is gaining in his campaign for governor.

A daily newspaper has completed a poll of the newspaper editors of the state. In the first poll, Senator Small had few supporters in the newspaper field, because he was not well known as a candidate. The poll last week placed Senator Small at the head of the list of the announced candidates. Lynch Davidson led the list as the choice of the newspaper men of the state, but he is not a candidate. Dan Moody had a good following, a little ahead of Clint Small. The fact that Small led all of the other candidates is great news to his friends, especially with the likelihood that either Davidson or Moody, or perhaps both will not announce as candidates for office.

The fact that a number of ugly rumors have been set afloat in West Texas about Senator Small indicates that a terrific drive will be made to break into his West Texas following. It was first reported that he was an anti-prohibitionist. This in spite of his decided and definite statement in his opening speech at Amarillo. He is the first candidate who definitely took a stand against the Literary Digest poll, and affirmed that the prohibition question was an issue in Texas this year. Next comes a statement that Senator Small is a Catholic, in spite of the fact that it was started while he was attending a Shrine ceremonial in Amarillo. He is not a Catholic, but the rumor was started in hope of prejudicing some people against him.

Such gross misrepresentations indicate that the other candidates realize that Clint Small is going to sweep West and North Texas, and that something must be done to break into his following. It is the best indication that Clint Small is gaining and that he is being dreaded by the old candidates in the race.—Canyon News.

Wheat Estimate Larger CHICAGO, June 3. (AP)—Official monthly estimates issued today regarding 1930 domestic winter wheat yields averaged larger than a month ago, and prices early were lower. Opening unchanged to 1/4c off, wheat afterward underwent an all around sag, but then rose to slightly above yesterday's finish. Corn, oats and provisions were firmer, with corn starting 1/4c off to 1/2c up, and subsequently scoring a general advance.

Chicago Grain CHICAGO, June 3. (AP)—Wheat: No. 2 hard 1.05 1-2. Corn: No. 1 mixed 80 3-4; No. 2 mixed 80 1-2. Oats: No. 2 white 41 1-4 to 1-2. Wheat closed firm 1/4-1c a bushel higher than yesterday's finish. Corn closed 1/4-1/2c advanced. Oats 1/2-3/4c up, and provisions varying from 3/8c decline to a rise of 3/8c.

Wheat Table CHICAGO, June 3. (AP)—HIGH LOW CLOSE July 1.07 1.06 1.07 Sept. 1.11 1.09 1.11 Dec. 1.15 1.13 1.15

secretary. This telegram also urged creation of additional federal courts.

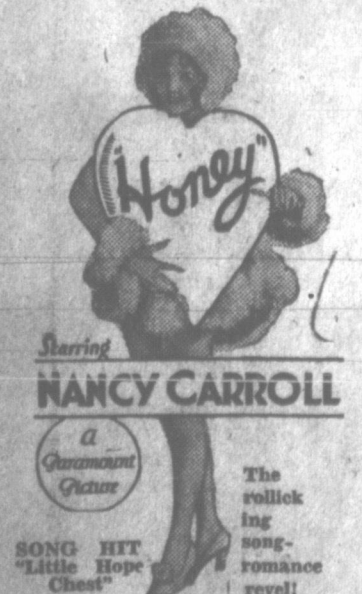

Walsh, who is a dry, commented that it appeared "you addressed yourself to heads of departments as well as to congress." He asked if the bishop sought appointment of government officers.

"My position on that for 30 years has been that it must be an exceptional case for me to take any part in the appointment of officials," Cannon answered. "I was in this work from the moral point and not from the political. I very rarely did it. I have occasionally done so."

Oyez, Math sharks!
 Here's a problem for you stated in terms of simple equations:
 Let "A" equal the amount of carbon black that would be required to print an 8-page issue of the Pampa Daily News for 710,000 years. Let "B" equal the amount

of carbon black in storage at the Cabot Carbon company. Find "A" and you will have the answer to "B".

Because—
 An almost terrifying mathematician, at the Cabot Carbon company plant, certainly is a mental brother (W. A. Duerr did not mention his name) to the man who figured how many pennies would be required to build a copper tower to Mors, has computed that the Cabot Carbon company has enough carbon black in storage here to print the Pampa Daily News for 710,000 years, provided an average of eight pages were printed six days a week.

Furthermore, this young Scudid has juggled up formulas and a maze of figures and announces that if all the Carbon black now in storage were used to print The News immediately, the area the papers would cover, if spread on the ground would be 67 times the size of Gray county, or 40 million acres. But back to the problem:

Mr. Duerr suggests that after the math sharks have found "A", let them find "C", which is how and where to sell quickly enough carbon black to print The News for 710,000 years!

nounced for the Democratic nomination for governor, has decided not to make the race, he said today.

NEW BRAUNFELS, June 3. (AP)—Paul Loven of New Braunfels, announced "wet" candidate for the Democratic nomination for governor, said today he had mailed his application for a place on the ticket to D. W. Wilcox, chairman of the state executive committee. Loven was the fifteenth person for whom an application had been filed.

DAMAGE SUIT BEING HEARD

A case in which T. S. Skibinski is suing the Safety First Bus company for \$5,000 damages alleged to have been sustained when an automobile in which Mrs. Skibinski and her children were riding collided with a bus at Kingsmill is being tried in 114th district court before Judge Clifford Bray.

The plaintiff alleges that one of his daughter's legs was broken in the accident which he testified occurred when the bus struck his car at the rear. He stated that the machine was wrecked.

Plaintiff's attorneys are Cook,

Smith, and Teed, while Underwood, Johnson, Dooley and Simpson of Amarillo are representing the defendant.

Ends Piles Quick

No Salves or Cutting

Piles are caused by congestion of blood in the lower bowel. Only an internal medicine can remove the cause. That's why salves and cuttings fail. HEM-ROID, the prescription of Dr. J. S. Leonhardt, removes this congestion and strengthens the affected parts.

HEM-ROID is now sold by druggists everywhere, and has such a wonderful record of success even in chronic and stubborn cases that Fatheree Drug company invites every Pile sufferer to try HEM-ROID and guarantees money-back if it does not end all Pile misery.—Adv. No. 1.

When **LIFE is at STAKE!**

FOR ten consecutive years all the winning cars in that classic of automobile racing, the Indianapolis 500 Mile endurance race, flashed across the finish line on Firestone Fires.

IN FACT every famous driver in these races used Firestone Tires. Every one of them for years has refused to use any other and the reasons behind their choice tell a story of Firestone Leadership.

THE Indianapolis Race requires the most expert driving in the world. It is won or lost on the turns. The man who can make the turns at the highest speed is the man who wins. The track is of rough brick and bumpy. As the race progresses, it becomes soaked with oil and very slippery.

THESE men flirt with death, but there is one chance they will not take. They will not take a chance with tires.

THESE drivers buy Firestone Tires. Their tires are not given to them by Firestone, much less are they paid to use them. And herein is the story.

MANY years ago, Firestone did pay drivers to race. The most famous of these drivers was Barney Oldfield and he painted on his car: "Firestone Tires Are My Only Life Insurance".

IN THE course of time Firestone withdrew from racing and the making of racing tires. Then the trouble began. The leading drivers of the country said that it was Mr. Firestone's business whether or not he paid them to use his tires, but it was their business to judge the risks they would take. They would race on Firestone Tires, no matter what they cost, or they would not race at all. And so Firestone had again to make racing tires.

THE difference between a Firestone racing tire and the Firestone tire you can buy from your dealer lies only in the tread. The heat generated in a tire during a race is

terrific. It is heat that causes most tires to fail. The ordinary road tread will burn up on a track, and so for it Firestone substitutes a harder, lighter tread which would be exceedingly uncomfortable on the road but which perfectly answers the track requirements.

THAT, however, is only a detail. The reason why Firestone Tires stand up in any race is to be found in their construction. The same construction that you get in any Firestone Tire.

IN ALL tires other than Firestone, the cotton cords which go to make up the carcass of the tire are merely imbedded in rubber. In the complex twisting and pulling of these cords in a tire in action, the fibers in the cords rub against one another. The friction generates heat and when the heat reaches a certain point the tire collapses.

IN THE Firestone Tire, each of the millions of fine cotton fibers going to make up a cord is thoroughly insulated with rubber in the famous, patented Gum-Dipping process which is exclusive with Firestone. This reduces the friction in the cords and therefore reduces the heat and enables the Firestone Tire to perform normally under conditions where any other tire would collapse.

NO RACING car can be better than its tires. Neither can any other car. The racing drivers trust life and victory to Firestone Leadership. That same leadership is available to you at all Firestone Dealers.

Firestone
 TIRES • TUBES • BATTERIES • BRAKE LINING

Copyright, 1930, The Firestone Tire & Rubber Co.

Again . . .

Firestone WINS!

Bill Arnold driving at the terrific rate of 100.448 miles per hour for 500 miles won The American racing classic in the Indianapolis Memorial day race. Riding on Firestone Gum-Dipped Balloon Tires. This makes the eleventh consecutive Victory in this event for Firestone Gum-Dipped balloon tires. The tires used at Indianapolis this year were identical in carcass construction as the new heavy duty Firestone now for sale.

Equip your car now with the tire the race drivers know will stand the grind.
