GOVERNMENT AND PRIVATE BUSINESS

The printing and sale of envelopes by the federal government in direct competition with private citizens in every hamlet and city in the country should be abandoned.

"No private industry can compete with the government, which utilizes its postmasters as private salesmen and makes no charge for transportation," it was pointed out by H. C. Holzling, field secretary of the association.

Printing of envelopes may seem a small matter, but the smaller print shops of the nation need the business. The government is not obligated in any sense to take over this private function.

It is true that the government, by having no overhead cost and no transportation expense, can print the envelopes somewhat more cheaply than can local printers.

Too much is demanded of the government, and the Socialistic trend is being furthered more by these demands than by the efforts of Socialists.

Government regulation is one thing, and Socialistic entrance into business is another. Socialism is a system and cannot be effectively used for the rehabilitation of one industry to the detriment of another.

MAD WOMEN HOUSED

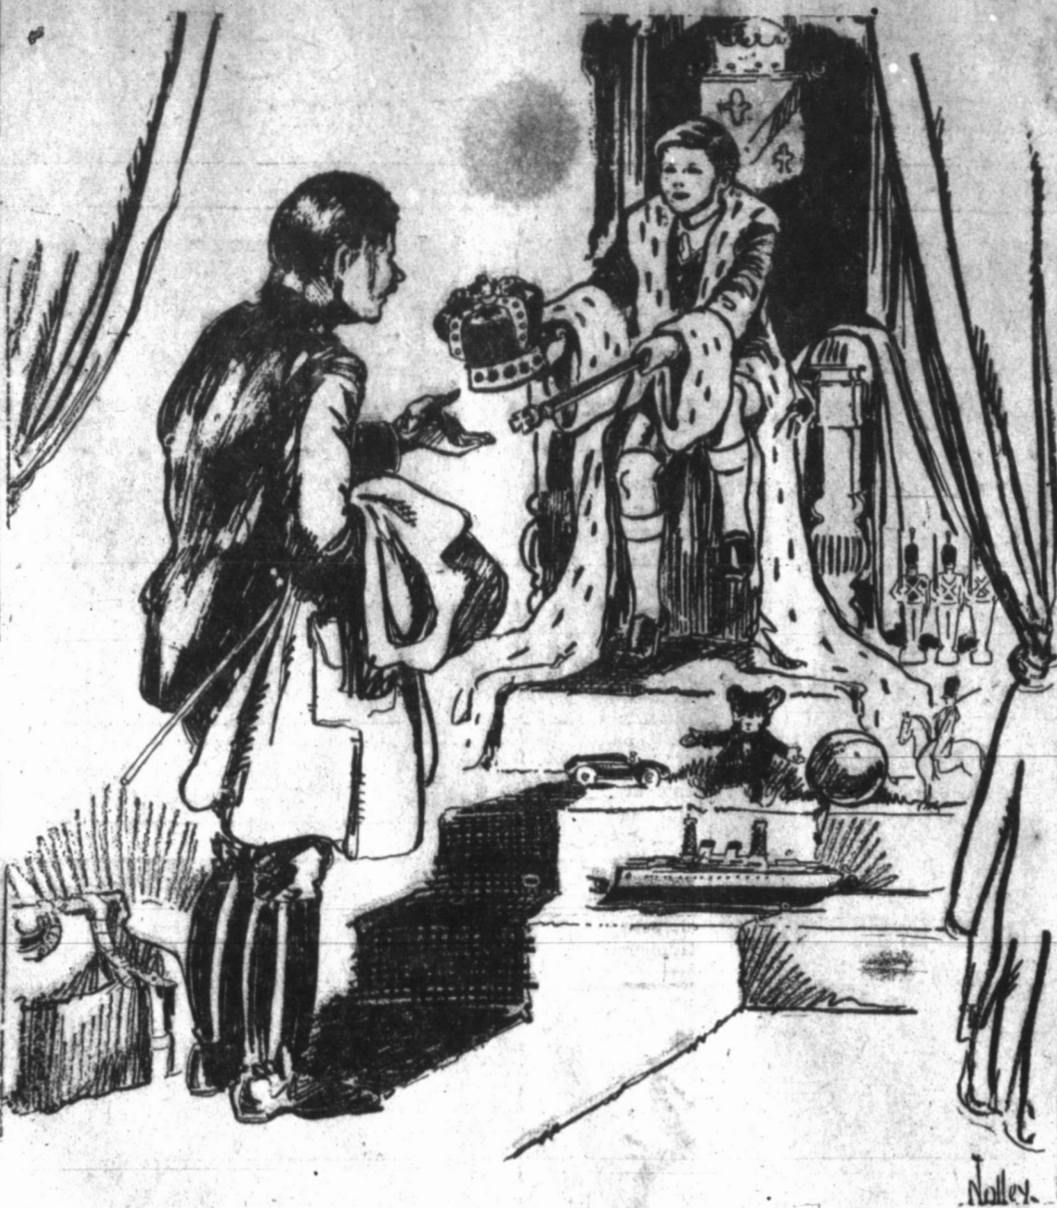

IN EX-EMIR'S HAREM. BOKHARA, June 17. (AP)—In line with their policy of converting royal palaces into public institutions, the Soviet authorities have turned the palace of the former Emir of Bokhara, now in exile in Afghanistan, into a sanitarium for mentally deranged women.

The palace, in days gone by, was one of the show places of Bokhara. Within the spacious grounds, which are surrounded by high mud walls, is a great open-air swimming pool where the emir and his multiple wives and concubines used to disport themselves.

When the emir fled from Bokhara in 1920, he is said to have taken with him to Afghanistan \$10,000,000 in gold, 5,000 camels and 100 concubines, but he left all the furnishings and art objects in his palace intact.

The rooms in which he held his court, gaudily furnished with a bizarre mixture of Persian, Chinese, Russian, English and German trappings, have been converted into a museum. There the local proletariat may see something of the extravagance and luxury in which the rulers of Bokhara lived in the past.

Markets

Chicago Grain
CHICAGO, June 17. (AP)—Wheat:
 Corn: No. 2 mixed 76 1-4.
 No. 2 hard 96 1-2.
 Oats: No. 2 white 38; No. 3 white 35 3-4 to 37 1-2.

With today's North American exports estimated as high as 4,000,000 bushels wheat in Chicago closed strong at virtually the top point reached, 1 7-8c to 3c a bushel over yesterday's finish. Corn closed 1 1-2 to 2 1-8c up, oats 1 to 1 2-8c advanced, and provisions varying from 17c decline to a rise of 17c.

Wheat Table
CHICAGO, June 17. (AP)—

	High	Low	Close
July	98 1-2	96 5-8	96 1-2
Sept.	1.02 1-2	99 3-8	1.01 1-4
Dec.	1.05 7-8	1.03 1-4	1.05 7-8

Wheat Somewhat Higher
CHICAGO, June 17. (AP)—After touching the lowest price in 16 years yesterday, wheat prices today were slightly higher at the opening, traders attributing the rise to stronger foreign markets. Against a close yesterday of 96 1-4 cents for July wheat, the market today opened at 96 5-8 to 96 7-8 cents. Deliveries were correspondingly higher. September wheat touched \$1 at the opening.

KANSAS CITY LIVESTOCK
KANSAS CITY, June 17. (AP)—(U. S. D. A.)—Hogs: 11,000; mostly 25-30 lower; top \$9.70 on 200-220lb butchers, medium to choice 160-350lb 9.25; 130-160lb 8.90-9.55; packing sows 8.15-9.00; stock pigs, medium to choice 70-130lb 8.75-9.60.

Cattle: 7,000; calves: 1,200; extremely dull; slaughter classes, steers, good and choice 950-1500lb 9.75-12.75; common and medium 850lb up 7.50-10.00; fed yearlings, good and choice 750-950lb 9.75-12.25 heifers, good and choice 850lb down 8.75-11.50; cows, good and choice 6.75-8.75; vealers milk fed medium to choice 7.00-10.50; stocker and feeder steers, good and choice all weights 9.00-11.25.

Pennsylvania Oil Prices Are Cut

PITTSBURGH, June 17. (AP)—A price reduction in Pennsylvania crude oil in National Transit, Southwest Pennsylvania, Eureka, Buckeye, and New York transit lines and in Bradford district oil was announced by leading purchasing agencies here today. Oil in National Transit, Southwest Pennsylvania and Eureka lines was cut ten cents a barrel, and five cents a barrel in Buckeye lines. New York Transit and Bradford district were cut 15 cents.

The new prices:
 Pennsylvania grade in New York transit lines, \$2.25. Bradford district oil, \$2.25; Pennsylvania grade in National Transit lines, \$2.25; Pennsylvania grade in Southwest Pennsylvania lines, \$2.15; Pennsylvania grade in Eureka lines, \$2.05; Pennsylvania grade in Buckeye lines, \$1.90. Other grades were unchanged.

Oil Production in Southwest Steady

TULSA, Okla., June 17. (AP)—The daily average production of light crude oil in the Oklahoma City field during the week ending June 14, dropped 5,255 barrels. Oklahoma as a whole maintained constancy. The Midcontinent area lost 9,291 barrels in both light and heavy crude and the United States lost 5,935 as compared to the average for the week ending June 7 estimates the Oil & Gas Journal here in its current report.

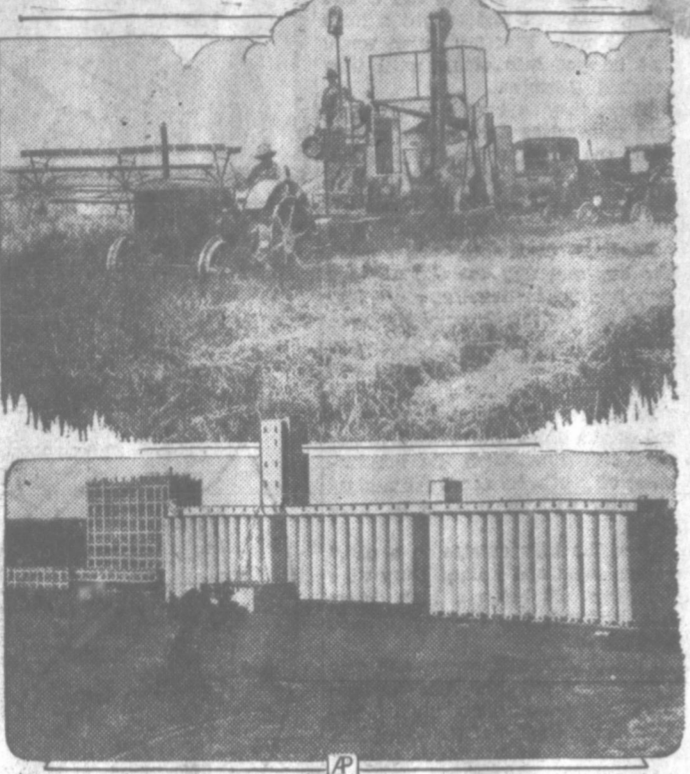

The estimated daily average for the entire country for the past week was 2,578,475 as compared to 2,584,410 for the week preceding. The light oil decrease was 5,374.

L. C. SUTTON DIES
AUSTIN, June 17. (AP)—L. C. Sutton, for more than 20 years an assistant attorney general, died here early today. He had been ill several weeks from a stomach ailment. The attorney general's department was closed during the day and Governor Dan Moody ordered the flag on the capitol lowered to half mast in honor of his memory.

TEN DEATHS IN TEXAS FLOODS

By The Associated Press
 The death toll of floods in Texas stood at ten today, while the damage, principally to growing crops, ran into thousands of dollars.

The name of Franz Zealand, 23, a bridegroom of six weeks, was added to those of nine other persons yesterday when he drowned while crossing Devils River on a horse. His body was recovered.

Zealand met his death when his horse reared and fell. The horse scrambled up the bank to safety, and a Mexican, who was riding another horse, also escaped. Workers under the direction of Police Chief Sam Haynes of San Angelo and firemen continued to search for the body of Try C. Lee, who drowned last week. They planned to dynamite places in the North Concho river, believed to contain the body.

Meanwhile, as a result of cessation of heavy rains, flood waters were receding in South and West Texas.

Bobby Byrnes of Amarillo was among Monday's visitors in Pampa. Mrs. Clinton Henry has returned to her home on the J. A. ranch, after spending several days here with her parents, Mr. and Mrs. Dave Pope, and her sister, Miss Claudine Pope. Mr. and Mrs. A. C. Smith and Mrs. Earl Clayton of Wichita Falls were visitors here yesterday.

Politics Claims Interest of Texas Residents Now

By The Associated Press
 Texas hummed with political talk today as candidates for office entered in the primary on July 26 planned intensive campaigns to get votes and the voters studied completed ballots.

Throughout the state yesterday county executive committees of both the Democratic and Republican parties passed upon names of candidates for state, county, and precinct offices to be placed on the official ballot. Their actions in the case of candidates for state offices had been previously determined by the state executive committees which met last week and certified names.

As a rule, the meetings passed off harmoniously. The committees merely certified the names of the candidates who had paid the required fees, apportioned the cost of holding the primary among the candidates, and perfected details of election machinery.

Places Are Refused
 At Wichita Falls, however, the Democratic committee, refused places on the county ballot to J. R. Ogle, candidate for Wichita county Democratic chairman, and to 45 other persons, candidates for precinct chairman, on grounds that their petitions did not say what the petitioners were. Unofficially it

was stated that all had supported Herbert Hoover in 1928. In a previous similar action against 13 so-called bolters of the Democratic ticket in 1928, the committee was upheld by the Supreme Court.

The Dallas county Republican executive committee, seized on the occasion to rebuke a district executive committee member, Heber Page, for what it termed a breach of party custom in a patronage affair. Page recently sent an endorsement of Federal Judge William H. Atwell of Dallas to a Circuit Court of Appeals post direct to President Hoover, and in resolutions the committee deplored this action as unfriendly to the state and county Republican organizations. The committee, nevertheless, endorsed Judge Atwell.

The Travis county Democratic committee adopted a resolution bar-

ring negroes from voting in the primary, and the McLennan county committee tabled a request from a group of negroes which sought permission to vote in the Democratic primary.

File Wives' Names
 Two candidates for county offices at El Paso, Bob Fletcher and Frank D. Scotten, seeking respectively nominations on the Democratic ballot for tax collector and assessor, filed the names of their wives when a question as to their own eligibility

was raised, Fletcher and Scotten are retired army officers, and opinion was voiced by some that they were not eligible. They prepared to seek a ruling from the attorney general.

What was termed the first publicly attended drawing in many years in Hidalgo county resulted in certification by the Democratic executive committee of that county of the names of 50 candidates.

The Husband Hunter

© 1930 BY NEA SERVICE INC. BY RUTH DEWEY GROVES

BEGIN HERE TODAY
Natalie Converse, jealous of her husband, quarrels over Bernadine Lamont. Alan seeks sympathy from his secretary, Phillipa West, who successfully schemes to arouse Natalie's suspicions, and she leaves Alan. Wounded pride prevents either from seeking a reconciliation, and Alan turns to Phillipa, who plays her part so cleverly that they soon become engaged.

Natalie writes Alan, informing him of her return. Phillipa, fearing of losing Alan, tells him she is obliged to leave home, because of trouble with her father.

Alan's meeting with Natalie, who brings her young sister, Florence, with her, leaves Alan hopeful, but baffled as to Natalie's intentions. Ashamed of his neglect of Phillipa, he goes to her apartment the next day, and without directly asking it of him, she agrees to pay for the furnishings. Natalie asks to talk to him, and he invites himself to dinner. He goes home to dress and is about to leave when Phillipa telephones. She appears distraught and hurt when he tells her he cannot take her to dinner.

After an evening of friendly but evasive talk, Natalie appeals to his love for her, and Alan, torn by his knowledge of his love for her, and his entanglement with Phillipa, is silent. Natalie believes that Alan does not love her. Alan goes, asking if he may return the next evening.

NOW GO ON WITH THE STORY CHAPTER XXXI
It was not a week before Alan was back in his home.

Though there had been a short period during which he believed he never would live there again. For Phillipa had flatly refused to release him from his engagement.

When the left Natalie to seek this release, he went to Phillipa's apartment, and found her engaged in making it habitable with the few pieces of furniture that had been delivered that day.

He could see on her face traces of the mental storm she had been through. But he did not know that it was temper; he thought it was pain. He felt like a brute all evening over the way he let her down about dinner and getting moved. His feeling had, perhaps made it impossible for him and Natalie to reach an understanding. Phillipa, less on his conscience, might not have stood so immovably in his way.

But he decided to face the issue with her squarely, and now he had to go on with it, or know he was a moral coward.

She plainly showed her surprise at seeing him, and essayed a sweetly welcoming smile. He began by apologizing for calling so late.

"But I had to talk with you, Phillipa, and this is better than the office."

"Oh, I couldn't have gone to sleep anyway," Phillipa assured him hurriedly. She wanted to talk too, anxious to put him right if he had any wrong ideas.

Alan looked around for a place to sit.

"Take my suitcase off that chair," Phillipa said, at the same time clearing another for herself. She sat on one foot and curled the other about a leg of the chair, looking small, and childish as a result of the informality of her posture. Her hair was disarranged and there was a smudge on her chin. One fist was stuck into a pocket of the blue smock she was wearing. She made an appealing picture, but Alan was unaware of it.

"Have you any idea why I couldn't have dinner with you tonight, Phillipa?" he asked.

She nodded, her lips moving like a hurt child's. "Natalie?" she said softly.

"Yes, I went up there," Alan answered, his voice grown suddenly husky.

Phillipa waited. Alan could not tell what she was thinking.

"Phillipa, this is all a ghastly mistake!" he blurted out helplessly, pleadingly.

Phillipa stiffened in her chair. She had thrown an arm over the back of it. Now her fingers gripped it until they were white.

"It's a mistake for you to treat me like this!" she cried.

"Phillipa, please..." She was on her feet, facing him. "Don't 'Phillipa' me, Alan. I had enough of that at home. Tell me what you came here to say. What's a ghastly mistake?"

Alan's eyes wavered. He hated what he had to do, frankly called it rotten. But Phillipa was ready for it. She did not draw back an inch. "Say it," she commanded.

"About us," he said finally. Phillipa choked back the bitter laughter that rose to her lips. She realized suddenly that she must get herself under control. She could scratch just as effectively if she kept her claws sheathed until she needed them.

She retreated to her chair and sank into it, weakly.

"You mean—our engagement?" she asked with as much calmness as she could summon up.

"Yes," Alan nodded. "I never can love anyone but Natalie, Phillipa."

Phillipa slumped in her chair,

The New Books

BY RICHARD MASSOCK
NEW YORK—The tercentenary of the Massachusetts Bay Colony has produced a long awaited picture of the Puritan Fathers in their true colors.
 It is Samuel Eliot Morison's "Builders of the Bay Colony," and whether or not you care about New England history, it is thoroughly entertaining.
 In this collection of brief biographies, Morison has tried to show the sincerity and beauty in the lives of the Puritans, a side generally neglected for their gloomier aspects.
 "Although religion was the dynamic force which gave the Bay Colony character and consistency," Morison finds, "it was not an all-absorbing interest."
 The stern immigrants to a new world had their lighter moments, as when in 1627 they danced about a May pole with Indian women as their playmates.
 Nor were they a drab people. "The Massachusetts puritans disliked extravagance," the historian found, "but they appreciated comeliness, whether in ship, a house, or a woman; and they loved brightly colored paint on ships and houses—but not on women."
 On great occasions they might even be gaudy. Governor Bradford wore a Turkey-red suit and besides

the familiar broad-brimmed, high crowned, black felt hats of the cartoonists, his fellow-colonists also wore a sort of beret.
 Morison has happily chosen his characters for their typical lives, rather than the eminence they attained.
RECONSTRUCTIONIST'S STORY
 The reconstruction period in American history has been pretty thoroughly deplored by recent writers. Now comes Henry Clay Warmoth, reconstruction governor of Louisiana, to excuse and defend the men "who upheld the flag" in the south immediately after the civil war.
 At the age of 87, he has written the administration's side of Louisiana's stormy story from 1868 to 1873, while he was governor, and after.
 He tells of his own career as a lawyer, Union soldier and politician and describes the post-war conditions which he says kept the southern Negroes in virtual slavery.
 To his critics, he replies, "I was never a 'Louisiana carpet-bagger,' though I might, in common parlance, be termed a 'scallawag.'"
 North Carolina, which in 1900 had no high schools for negroes, now has 115.
 Earl Clayton left this morning on a trip to New Mexico. He will be gone about two weeks.

The American library association proposed \$1,000,000 fund for the extension of county libraries. It has received more than half of a ten-million dollar fund.

bulkheads by Roberts Marble & Tile company, Amarillo; terrazo floors by Zanchetten Terrazo company, Amarillo; roofing by Lydick Roofing company, Amarillo; lumber by the Panhandle Lumber company, Pampa; glass by the Pampa Glass works.

A metal ceiling is used throughout the building.

Interior of the Diamond Shop is in beautiful birch.

The freight elevator to the basement was furnished by the Panhandle Steel Products company, Wichita Falls.

Some Stores Open

Friday and Saturday, June 13 and 14, were busy days in Pampa, with crowds jamming the stores in the new Gordon-Densheim building. Kraft's Mint was opened for inspection Friday night, between 7:30 and 9:30 o'clock. Whistles and measuring sets were distributed to visitors in the store Friday night, the number of people who inspected the "mint" being estimated at 2,700. When the doors were closed Saturday night, it was estimated that 4,500 people had been in the place that day from the time the doors were opened at 9 o'clock.

Grand opening of the C. & C. System No. 1 was held Friday, from 7 to 9 p. m. Nothing was sold Friday; the occasion being devoted to an inspection of the store by visitors. Souvenirs were distributed to men, women and children who entered the store, on both Friday and Saturday. Toy banks and balloons were given to the children; cook books and kitchen reminders to the women, and cigars to the men. Dold's ham sandwiches, with El Food salad dressing, Brown's cakes, and high grade coffee was served free to the crowd of more than 3,000 persons who were in the store Friday night. More than 2,100 persons were in the store Saturday.

Sale Is Inaugurated

With the opening of the doors on Saturday morning at 8 o'clock, a sale was inaugurated, with same prices at both stores of the C. & C. System, the sale to be from June 14 to 21. Among many specials offered to the Saturday crowd, at the C. & C. No. 1, were half pounds of Dold's Niagara bacon given free with each purchase of hams and lard exclusively, amounting to 99c. Wiley's United Cigar store got off to a late start Saturday. While they were open early in the morning, they were delayed by workmen until 5 o'clock in the afternoon. As an opening special they sold ice cream at the special price of 20c a pint. They estimated the number of people who were in their place on Saturday as more than 600.

Diamond Shop Ready

Formal opening of the Diamond

Shop will be Wednesday, June 18. Souvenirs will be given to the ladies attending the opening; music will be furnished by means of a super-Majestic radio. All who enter the store on the opening date, between the hours of 7:30 and 10 Wednesday night, will be handed questionnaires, that, properly filled out, will concern an offer on a fine Majestic radio. This is an unconditional offer, according to the Diamond Shop, and no one is rebble to enter the contest. The complete stock will be on display, but nothing will be sold Wednesday night. All models of the Majestic radio will be on exhibit at this initial showing. Barney E. Mosely, who has completed a special factory course of Grigsby-Grunow, manufacturers of the Majestic radio, in Chicago, is in charge of the radio department, and will be present at the opening, as will all other members of the personnel with the exception of Lester Sills, assistant manager, who is now in Chicago, taking a course in the operation and maintenance of Majestic radios and Majestic electrical refrigeration.

The Diamond Shop has the exclusive Majestic agency in Pampa.

To Show Tiny Watch

The smallest watch in the world and one of the largest will be on exhibit at the opening of the Diamond Shop.

The smallest watch is a replica of the watch presented to Her Majesty Queen Marie of Rumania. This marvelous timepiece is so small that it can be covered by a dime. More than 38,000 parts of the size used in making this watch would be required to fill a thimble. It is a Bulova wrist watch and keeps perfect time. More than one hundred

models of Bulova watches are carried in stock by the Diamond Shop.

INSECTS—

(Continue from Page 1)

The winter in the straw and is transformed into a small ant-like insect in the spring. These insects lay their eggs in the base of the young wheat plants. In a short time the eggs hatch into worms. These worms kill or stop the growth of the young plants. The worms are transformed into a gnat-like insect that lays its eggs in the growing wheat. The forms from these eggs are the ones found in the straw at the present time.

The wire worm beetles found in the fields in large numbers at present lay eggs in the soil in the late summer, and hatch into wire worms in the early fall. The wire worm eats the germ-out of the seed or eats the growing plant.

total \$965. The next meeting of the committee will be held August 2, when returns of the first primary will be canvassed. More than \$1,000,000 annually is received from the sale of wild animal pelts in North Carolina. Commercial fishermen took approximately 15,000,000 pounds of prawn from Georgia waters last year. Arkansas' first woman baccalaureate speaker was Miss Mary Sue Mooney of Arkadelphia, who made the address at Smackover.

Saves Boy's Life
EL PASO, June 17. (AP)—Lacy Lee, 20, recently honorably discharged from the cavalry at Fort Bliss, saved the life of Francisco Pompien, 10, yesterday when the boy was caught in the swirling waters of the Rio Grande near here. Lee, of St. Paul, Va., was fishing near the scene when he saw the boy, who was wading into a deep hole. Lee raced 100 yards, plunged into the water and pulled the boy to safety. Earl Stuckey is to go to Wichita Falls today to transact business and spend a few days with his family.

Congratulations

SOCIETY

By Miss Willette Cole

Phone 666

Social Calendar

TUESDAY

The Royal Neighbors lodge will hold a special meeting at 2:30 o'clock at the Labor temple. Officers of the Order of the Eastern Star are to rehearse initiatory work at the Masonic hall at 8 o'clock. The entire staff is requested by Mrs. Roy Sewell, worthy matron, to be present.

WEDNESDAY

The Women's auxiliary of the Presbyterian church will meet at 8 o'clock in the home of Mrs. H. F. Morseman, 425 North Stark-weather street with Mrs. G. Cotton as co-hostess.

The Women's auxiliary of the Episcopal church will hold its last meeting of the summer at the home of Mrs. Wm. M. Craven at 3 o'clock. Important business is to be transacted and the attendance of all members is requested.

The Women's Missionary society of the Central Baptist church will meet at the home of Mrs. W. B. Barton, south of the city, at 2:30 o'clock.

Division 1 of the Woman's Council of the First Christian church will meet in the home of Mrs. D. C. Houk, 419 North Somerville, at 2:30 o'clock. All other divisions will meet at the same hour.

Circle 1 of the Methodist Women's Missionary society will meet Wednesday afternoon at 2:30 o'clock in Mrs. C. T. Hunkapillar's home for a program on two lessons from the Missionary Voice.

Circles of the Methodist Women's Missionary society will meet as follows: 1, in the home of Mrs. T. Hunkapillar; 2, at the home of Mrs. John Bradley; 3, at Mrs. Lee Harrah's home; and 4, at the church, all sessions opening at 2:30 o'clock.

THURSDAY

A dance will be given by the Cosmos club at the Schneider hotel between 9 and 12 o'clock. Joe Norman's orchestra will play.

The Women of Mooseheart Legion will hold a regular meeting at the Labor temple at 8 o'clock.

The Ladies' auxiliary to the Carpenters' union will meet at 8 o'clock in the home of Mrs. Jack Denert.

FRIDAY

The regular meeting of the Order of the Eastern Star will be held at 8 o'clock, with Mrs. Z. Freeman, deputy grand matron, present.

Mrs. R. M. Bellamy Hostess at Bridge for Sixteen Guests

Mrs. R. M. Bellamy entertained with four tables of bridge at the Pampa tea room yesterday afternoon. Her guests were: Mrs. Lynn Boyd, Mrs. A. G. Post, Mrs. C. L. Craig, Mrs. George E. Wolfe, Mrs. C. D. Hunter, Mrs. Mary R. Ikard, Mrs. M. F. Roche, Mrs. F. D. Keim, Mrs. J. W. Garman, Mrs. Ralph Trimble, Mrs. H. G. Myers, Mrs. Hugh Donaher, Mrs. Charles Cooley of Ranger, Miss Amy Smallwood, Miss Pauline McKean, and Miss Mary Donaher.

Attractive baskets filled with sweet peas and baby breath decorated the tables at the tea hour and later served as cut favors. Scores for the afternoon were kept on tables of gay butterfly design. Mrs. Boyd made high score, and was awarded lace pieces for a vanity dresser. A guest towel was the favor for Mrs. M. F. Roche's second-high score. Mrs. George Wolfe was consoled for low with a hand-made handkerchief. Top cuts at the tables were made by Mrs. Garman, Mrs. Keim, Miss Donaher, and Miss Smallwood.

Junior Intermediate Christian Endeavor Has Indoor Picnic

Driven indoors by the rain last night, after assembling for a picnic and weiner roast at Harvester Athletic park, members of the Intermediate Christian Endeavor society and their sponsors nevertheless spent an enjoyable evening in the basement of the First Christian church.

Games planned for the out-door event were played, the weiner roast was held, and the picnic supper spread. Twenty-five members of the young people's society were present. The sponsors present were: Mrs. Harry E. Marbaugh, Mrs. C. G. Boles, and Mrs. Hugh Isbell.

Return from Waco

Mr. and Mrs. Scott Rheudasil, their daughter, Mrs. C. C. Matheny, and the latter's children returned Sunday night from Waco, where they were called several days ago by the serious illness of Mrs. Rheudasil's grandfather, J. N. Beauchamp. Miss Alberta Beauchamp of Waco, niece of Mrs. Rheudasil, accompanied them home. She is to spend the remainder of the summer here.

W. S. White, McLean, was a business visitor here yesterday.

Miss Louise Miller made a trip to McLean yesterday.

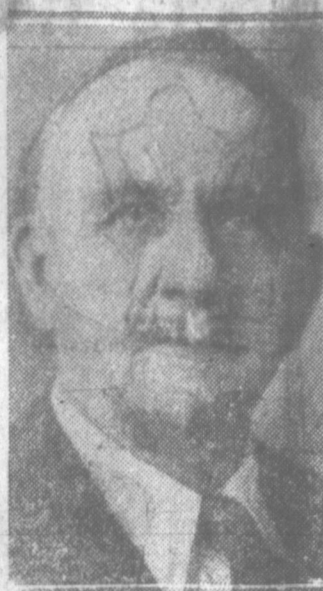

Mrs. E. D. Wall of Skellytown was in Pampa yesterday.

L. G. Graber, of the Postal Telegraph company's office at Dallas, was a business visitor here Monday.

Eero Hooks, manager of the Southwestern Bell Telephone company left Monday on his vacation. Mr. Hooks went first to Amarillo, and from there he will go to Santa Fe, N. M., thru the mountains of that state, and to San Angelo, where he will visit relatives. L. H. Johnson of Berger is working in Mr. Hook's place while he is on his vacation.

W. M. Crow, Tulsa, was a visitor here yesterday.

Feels Like Different Man In Every Way

Wm. FRANKLIN KRUGER

"I was sick and rundown for fifteen years. Stomach trouble made my life miserable. I couldn't sleep well, and there was hardly a night my wife didn't ask me what made me so restless.

"Finally I decided to try Sargon, and my improvements were marvelous. I feel like a different man in every way."—Wm. Franklin Kruger, 1825 Belmont Ave., Fresno, Calif.

Times without number men and women have rejoiced in new-found health through Sargon at a time when they thought nothing would help them.

Fatheree Drug Co., Pampa; Erwin Drug Co., McLean, agents.—Adv.

H. A. Skaggs of Amarillo was in Pampa yesterday.

Miss Neil Crain of Goodnight, who has taught here the past two years, is visiting friends in Pampa this week.

H. L. Clem of Lubbock was in Pampa yesterday.

Premium Paid by Grain Dealer for New Wheat

Martin-Lane Grain company bought its first wheat of the season yesterday afternoon. It was raised and brought in by Kyle Guthrie who lives 16 miles south of Pampa.

The wheat tested 58 with a reasonably heavy percentage of moisture, between 18 and 20 per cent, it was stated. The load measured 58 bushels and 40 pounds. The company will pay Mr. Guthrie a premium of \$1 per bushel.

Mr. Guthrie has 600 acres of wheat, most of which was damaged by hail. The average yield will be from 12 to 14 bushels per acre.

By the end of the week, wheat harvest in this section will be in full blast, and harvest in most fields will be under way by Thursday, a representative of the company believes.

R. F. Williams made a business trip to White Deer today.

C. O. Seeds left today on a business trip to Chickasha, Okla.

Rev. and Mrs. D. H. Truhitte and daughter, Marianne, left today for their home in Westlato, after a visit with Mr. and Mrs. D. H. Coffey.

Hearing in Riot Cases Postponed

CHICKASHA, Okla., June 17. (P)—Preliminary trial of 19 men on riot charges growing out of the fatal wounding of Henry Argo, negro, during an attempt to lynch him here May 30, was postponed today until July 6 on motion of B. F. Holding, Grady county attorney, who said he intended filing charges against six or seven more alleged members of the mob in the meantime.

Examining trial was set for today before Owen Vaughn, justice of the peace.

Holding also told the justice that John Lee, one of the defendants, was under arrest at Amarillo, Texas, and would be returned here, and that he would like to make the one hearing suffice for all.

H. S. Shannon, candidate for constable, made a trip to Bowers City Monday.

Miss Margaret Sue Shanklin of Wichita Falls is the guest of Mr. and Mrs. T. F. Smalling and their daughter, Miss Susie Belle. Miss Shanklin and Miss Smalling are class mates at the University of Texas, Austin. The Wichita Falls girl visited in the Smalling home last summer.

Mr. and Mrs. E. R. Beavers of Wichita Falls returned home Sunday, after a visit of several days in the home of the former's brother, S. A. Beavers.

Dr. and Mrs. W. C. Mitchell arrived last night from Harrison, Ark., after being called home from a fishing trip after their daughter, Miss Ruth Anne, had an emergency operation for appendicitis, Sunday morning at Pampa hospital. Miss Mitchell's condition was said to be satisfactory last night.

Mr. and Mrs. Jack Griffith of Panhandle were visitors here Sunday.

Mr. and Mrs. Roy Sewell and Mr. and Mrs. B. W. Rose returned Sunday from a trip to San Angelo.

H. L. Hunter, representing the Empire Mortgage company, was a business visitor here Monday.

Charles C. Wood, Oklahoma City, was a business visitor in Pampa yesterday.

L. M. Harris, Nolan Harris, and Warren Richardson have returned from a trip to Lubbock.

Mr. and Mrs. D. A. Hunt of Wheeler were visitors in Pampa yesterday.

Charles I. Baucom left today on a business trip to Minnesota.

DON'T SURRENDER

When tempted to over-indulge

"Reach for a Lucky instead"

Be moderate—be moderate in all things, even in smoking. Avoid that future shadow by avoiding over-indulgence, if you would maintain that modern, ever-youthful figure. "Reach for a Lucky instead."

Lucky Strike, the finest Cigarette you ever smoked, made of the finest tobacco—The Cream of the Crop—"IT'S TOASTED." Lucky Strike has an extra, secret heating process. Everyone knows that heat purifies and so 20,679 physicians say that Luckies are less irritating to your throat.

"Coming events cast their shadows before"

TUNE IN—
The Lucky Strike Dance Orchestra, every Saturday and Thursday evening, over N. B. C. networks.

"It's toasted"

Your Throat Protection—against irritation—against cough

*"Beyond 30 years of age, the mortality among overweights rises rapidly with the age and with the weight," says Dr. Brandreth Symonds in an article in The Medical Record. We do not represent that smoking Lucky Strike Cigarettes will bring modern figures or cause the reduction of flesh. We do declare that when tempted to do yourself too well, if you will "Reach for a Lucky instead," you will thus avoid over-indulgence in things that cause excess weight and, by avoiding over-indulgence, maintain a modern, graceful form.

Meet Sam and Wear Diamonds

Lure of the Diamond Has Made History For Thousands of Years

There is a story going the rounds which has a small boy asking his father "What makes a man give a girl a diamond?" The father answers "The lady."

But the real reason a man gives a woman a diamond is much deeper than most people realize. Some people may regard it only as a sentimental convention but even so it has its roots in customs and traditions that go back thousands of years.

In Eastern countries the act of giving has been considered noble since pre-historic times. "God gives" they said, and so agreements and friendships were sealed with precious gifts. Jewels naturally were the medium of wealth in those days. Portable, stable in value and possessed of a peculiar power of rendering satisfaction and delight to their possessors, gems were the money of those times. But they were esteemed not only for the wealth they represented, but for certain mystic qualities ascribed to them.

To dream of diamonds was considered symbolic of success, wealth, happiness and victory. To the diamond was ascribed the power of binding man and woman together in happy wedlock; and so it has become a favorite stone for engagement rings and in some countries for wedding rings. The reader of the Arabian Nights tales will get some idea of the high estate and mighty power of the diamond. The profusion of wondrous jewels mythically created and bestowed upon lucky individuals symbolized the ultimate in delight, according to the fantastic narratives handed down by the Orientals from one generation to another.

Pursuit of the beauty that lives in gems becomes a passion. Mighty potentates struggled and schemed, fought and sacrificed to gain possession of famous jewels which, in themselves, made their possessors famous.

Many a country changed hands; many a nation lost its king, many a people was redeemed from slavery, through the power of some great diamond. Even within the last few centuries, the lure of the diamond has moved through India, Persia, Turkey and other countries.

Several times the dying Roman Empire was saved from destruction by bribing barbaric invaders with some jewel of great price.

That the diamond has always been remarkable for its extreme hardness is indicated by its name, derived from the Greek *Adamas*, *Adamantos*, *adamant*. It has been written at various times as *dynamante*, *dyamaunt*, *dynamant*, *diamant*, *diamownde*, *dyamonde*, *dya-mount*, *diamonde*, *diamont*, *diamond*, *dyamauntz*, and *adamant stone*.

The lore of the diamond is rich in imaginative anecdotes whose appeal never dies. It is asserted by some of the Hindu masters that diamonds, according to their colors and qualities, appealed to the taste as sweet, sour and salty. Marbodius calls the diamond a potent magical charm for protecting the sleeper from evil dreams and the child from the dreaded goblin. The fifth Arabian Heaven, the Garden of Delights, *Jannat al-Naim*, is said to be composed of the purest diamonds.

In the second voyage of Sinbad the Sailor, the hero says: "Then I arose and emboldened myself and walked in that valley; and I beheld its ground to be composed of diamonds, with which they perforate minerals and jewels, and with which also they perforate porcelain and the ox; and it is a stone so hard that neither iron nor rock have any effect upon it, nor can anyone cut off aught from it or break it, unless by means of the lead stone."

"In the mountains of the diamonds are experienced great terrors, and that no one can gain access to the diamonds, but that the merchants who import them know a stragem by means of which to obtain them; that they take a sheep and slaughter it, and skin it, and cut up its flesh which they throw down from the mountain to the bottom of the valley; so descending, fresh and moist, some of these stones stick to it. Then the merchants leave it until mid-day, and birds of the large kind of vulture and the aquiline vulture descend to that meat, and taking it in their talons, fly up to the top of the mountain; whereupon the merchants come to them and cry out at them and they fly away from the meat. The merchants then advance to that meat and take from it the stones sticking to it; after which they leave the meat for the birds and the wild beasts and carry the stones to their countries. And no one can procure the stones but by means of this stratagem."

Marco Polo's description of how diamonds were found is little less credible. Speaking of the country where these precious stones were secured he said: "During the rainy season, the water descends in violent torrents amongst the rocks and caverns, and when these have subsided the people go to search for diamonds in the beds of the rivers, where they find many. In the summer, when the heat is excessive and there is no rain, they ascend the mountains with great fatigue as well as with considerable danger from the number of snakes with which they are infested. Near the summit, it is said, there are deep

valleys full of caverns and surrounded by precipices amongst which the diamonds are found, and here many eagles and white storks, attracted by the snakes on which they feed, are accustomed to make their nests. The persons who are in quest of the diamonds take their stand near the mouths of the caverns and from thence cast down several pieces of flesh which the eagles and storks pursue into the valleys and carry off with them to the tops of the rocks. Thither the men immediately ascend, drive the birds away, and recovering the pieces of meat frequently find diamonds sticking to them."

In giving the Papal Sacred Banner and Blessing to William of Normandy when about to invade England after the excommunication of Harold, Pope Hildebrand sent a diamond ring said to enclose a hair from the head of Peter the Apostle. In the Comtesse d'Anois' fairy story, "The Yellow Dwarf," the mermaid gives the captive King an all-conquering sword made from a single diamond, which rendered invincible anyone who carried it.

The Gnomes have often been pictured as tiny, old men, brown and wry, who keep watch over buried treasures. One of the numerous legends concerning these quaint subterranean folk was that they suffered much and that when they grieved their tears changed into diamonds which remained as the jeweled emblems of pure and unselfish grief.

The interesting but unreliable Sir John Mandeville, 14th century traveler, wrote that "the diamond should always be worn on the left or heart side of the body and that it is possible for a diamond to lose its occult virtue after being handled by evil people; for in the human body there is more potency for good or ill than is generally understood."

According to Boetius de Boodt, diamonds were of different sexes, and some Hindu writers classified them as masculine, feminine or neuter.

It is said that King Arthur held a series of nine "diamond jousts"—one each year, with a diamond as a prize. He had found the diamonds in a glen in Lyonesse where two brothers had fought and killed each other, leaving their crowns.

One of the smallest diamond rings ever made was placed by Cardinal Wolsey on the finger of two-year old Princess Mary on the occasion of her marriage to the baby Dauphin of France in 1518.

Diamonds Have Industrial Uses

There are many commercial purposes for which the diamond may be used, due to its extreme hardness. It is used as a cutting tool in the lathe for turning the edges of watch glasses and pivots of specially hard steel; for boring of cannon; in the manufacture of the finer mechanical tools; for boring small holes in large stones through which fine gold and silver wire is drawn; for the pivot supports of the most accurate chronometers and other delicate instruments; and for cutting glass.

In more recent times it has been used as a rock-drill in the many boring operations connected with mining, tunneling, and sinking of artesian wells, prospecting bores, et cetera.

Diamond Mining Industry
Diamond mining is an ancient industry which existed before the birth of Christ, according to historians, but diamond cutting as an art started only a few hundred years ago, although in India the art of polishing the facets of natural crystals was practiced in the remotest times, and the faceting of stones was practiced in the 17th century.

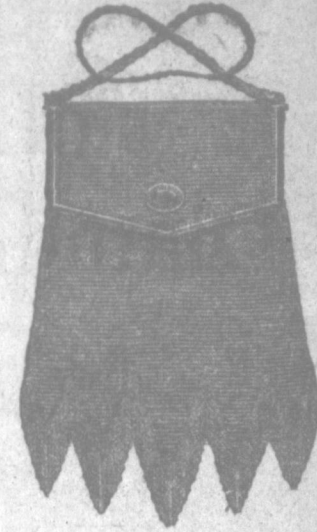

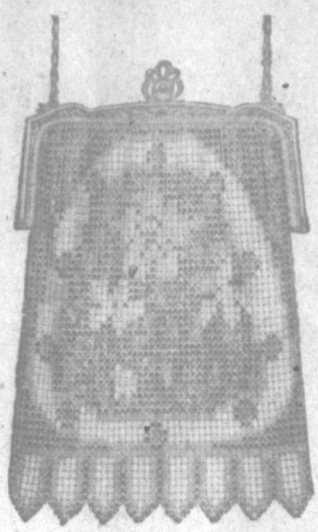

DIAMONDS HIGHLY PRIZED
The price of diamonds and other precious stones in older times, compared with the value of money, has always been high. Comparatively few were found and though a smaller number were able to buy and own them, they were of a class who gratified desire without regard to price and set great store on gems as evidences of power and affluence.

Oriental rulers valued them so highly that fine gems cost more in Colombo than in London. This condition, while prevailing today, arises to some extent from the fact that the rough and native stones are regularly collected by Western buyers and shipped to London whereas stock in the hands of natives is uncertain and variable. Prices depend on the condition of the moment and are influenced by the rank and wealth of the buyers.

Diamonds differ in hardness and also vary in their power of refraction and dispersion of light. In these qualities the Indian excel all others, and the Brazilian comes next, though the South African river stones resemble them very closely and in some cases equal them.

Denmark imports its tobacco products. It smokes British cigars, German cigars and Dutch pipe tobacco.

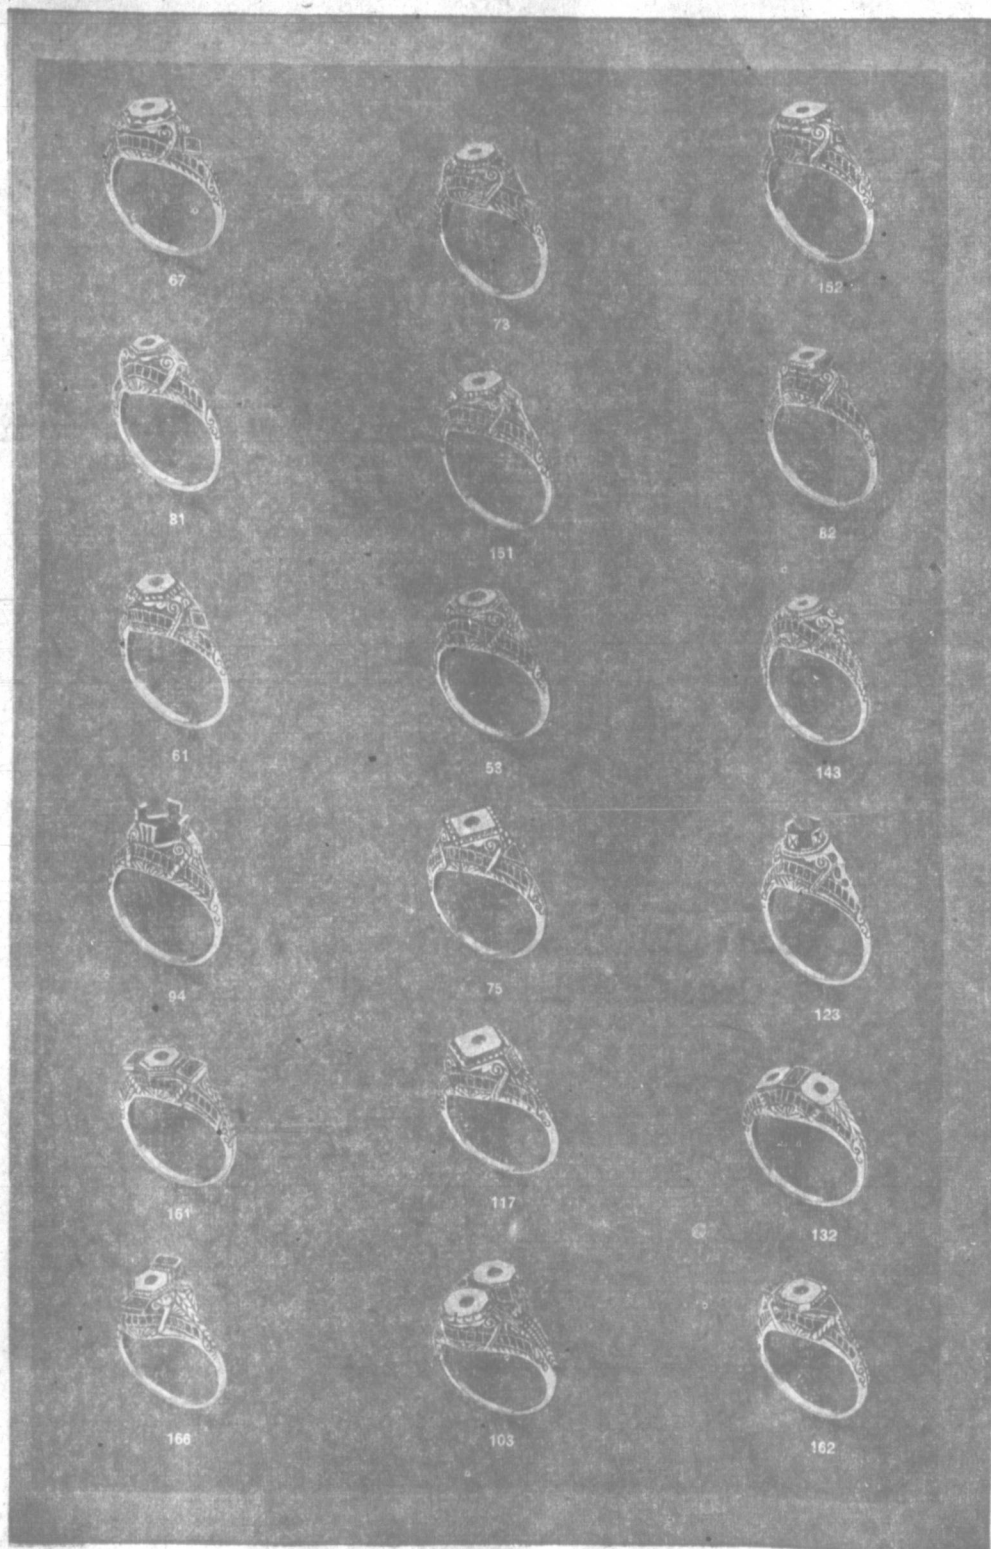

Drouth and late winter freezes caused abandonment of 424,000 acres of wheat in Oklahoma, federal crop statisticians report.

WE CONGRATULATE.

On their opening of one of the most beautiful credit Jewelry Stores in the Panhandle, and we hope they will continue the wonderful progress they have made.

Spear & Susskind, Manufacturing Jewelers, of 21 Eddy Street, Providence, R. I., have been supplying the latest fashioned jewelry to The Diamond Shop for a number of years, nationally advertised merchandise of the highest quality.

"You will particularly note the beautiful costume jewelry and rings, both for the lady and gentleman displayed by The Diamond Shop and products of Spear & Susskind.

"We believe that nowhere else in The Panhandle will you find a more comprehensive display of the world's finest jewelry.

"Spear & Susskind has been in the jewelry business and in the public's confidence since 1907, developing from a small concern of four men to a sales force of thirty-two people catering to the latest fashionable merchandise and striving to give quality and quantity.

About the incomparable Majestic!

Majestic was the first to make a Radio set of superlative value to sell at a price almost any one can afford.

Majestic is a seven tube, all electric A. C. Set of great selectivity and vast range.

Majestic eliminate all A. C. Hum that formerly was so annoying to radio owners.

Majestic employs the new Colortura Dyna mic Speaker which make every colorful note of voice or instrument absolutely life-like.

With Majestic one can distinguish with greatest of ease, the different instruments playing in an orchestra, the different voices singing in a quartet or chorus.

Majestic is shown in six models, three of which are combination Radio and Phonograph; all in handsome period cabinets in the much prized wood-walnut.

1929 sales of Majestics outstripped all other radio sales and so far this year Majestic sales are ahead of last year for the same period of time - is the Radio favorite.

Majestic Radio is seldom offered on the "Used" radio market. Who one owns a Majestic he owns an instrument that is too highly prized to "Trade in" on any other.

Majestic Radio will be demonstrated, side by side if you wish with any other Radio on the market, you too the judge of its superiority in every detail of performance.

Majestic Radio is sold on easy terms all you have to do is to ask the Diamond Shop for a demonstration satisfy yourself as thousands upon thousands have done, that you cannot buy a better Radio at any price ask the price and make terms of having a Majestic installed in your home.

With a majestic you will be in touch with all the important world events and you will have, for yourself, family and friends, veritably, orchestral seats for every out-standing performance by the world's greatest Radio head-liners.

Things to Look For in Purchasing Your Diamond

The intelligent buying of diamonds calls for some of the same qualities required of the connoisseur of fine works of art. The purchaser must have, first of all, an eye for color and line. For these qualities, graded almost imperceptibly, are important factors in determining the value of a gem.

Most people are somewhat color blind but the diamond purchaser cannot afford to be. Many may know red from green, but will fail to discern a slight gradation of some hue or shade.

Faint differences in color having such an important bearing on the valuation of a diamond, the stone should be viewed from an unobstructed neutral north light near mid-day, as well as under artificial light. A dirty brown diamond of little value may look good under certain lighting conditions. The appearance may even vary according to the way it is mounted.

Decisions about color should not be concluded unless comparison is made between one stone of known value and another to be selected. Both should be viewed under identical conditions, at the same time. A diamond may even have a slightly different color on its face

than it has on the side. The reputable jeweler will call attention to any such qualifications; the irresponsible dealer will allow such factors to remain hidden. It is even possible for a stone that looks somewhat bluish on its face to be yellowish in its body, and therefore, actually inferior to a pure white stone.

Even the quality of the lens through which the diamond is viewed for its finer points may have something to do with the judgment passed. The color of its surroundings may sometimes prejudice the buyer. Therefore, when selecting a diamond be careful that the tint of the walls, artificial lighting and the shape and color of the mounting do not affect the real color of the gem.

The importance of cutting has often been over-accented by Americans. Perfect cutting will not altogether redeem a stone of poor quality. On the other hand, the stone must be cut right if it is to reflect maximum brilliance.

The brilliant-cut diamond should have 58 facets, of which 22 facets are in the "crown" just above the "girdle" or greatest circumference of the stone, and 25 facets in the "cuttable", so arranged as to reflect practically all the light that falls upon the face of the stone. The depth from the table or top plane down to a line with the girdle is ordinarily about one-third of the entire depth.

After the light strikes the face of the stone its path becomes a complicated one indeed. It is stunted back and forth from one facet to

another. If these facets are properly cut and arranged all the light eventually is thrown back to the top, dazzling the eye.

The stone that is unproportionately large from the base to the "culet" (the bottommost point) is likely to lose some of the light it has received, producing a dark spot. If the stone is too shallow, it will have a brilliant edge but the center will have a dead appearance, characterized as a "fish eye."

Imperfections of cutting are often revealed when a stone is viewed at various angles and distances. Sometimes the stone that has some brilliance at close range becomes "dead" several feet away.

There are times, however, when brilliance is sacrificed for color. A stone that has a bluish tint may be cut extra deep in order to accent the shade and a stone that has undesirable color may be cut very shallow in order to minimize its handicap. These are only a few of the complicated reasons why those who wish to be sure of having a diamond they will always treasure should make sure they are getting it by buying from a reputable jeweler.

Added to the two factors of color and proportion is the presence or absence of flaws. Tiny carbon spots, cracks, "feathers", and perhaps even cavities, are some of the imperfections which sometimes make a difference. Eliminating as many of these flaws as it is possible without wasting too much of the precious commodity is which he works, is part of the diamond cutter's task.

The diamond is pure carbon in crystal form; therefore, occasionally a diamond will contain a speck of carbon which will affect its value.

Stones that are made gray or black by presence of too much carbon are used industrially for cutting and grinding purposes. This sort of material is known as "bort", not at all to be compared in value with gem quality diamonds. Sometimes a stone of the very finest color will contain a bit of carbon, which perhaps makes it worth less than a flawless stone of less desirable color. The size and number of such flaws diminish the diamond's value according to the degree in which they cut down its brilliance. If they interfere but little with the interior passage of light, little damage is done.

Surface imperfections, too, make a difference. Small nicks, chipped off places, and rough spots make the stone hard to clean.

To weigh the importance of all these flaws and to consider their inter-relationships is an intricate task which the jeweler is best equipped to accomplish. However, any diamond owner confident that his jeweler has served him expertly and honestly, will derive additional pleasure from his stone in knowing some of the reasons for its value.

A number of factors are concerned. The value per carat may rise as the stones grow larger, although the gradual increase may not apply to some of the very large and less wanted sizes. It is not to be assumed, however,

that size is the main thing that makes one diamond worth more than another. For this reason, it is unsafe to "shop around" in buying a diamond unless the buyer is dealing with people in whose knowledge and integrity he has the utmost confidence.

People are beginning to differentiate between quality and size in diamonds, and while the larger stones are uncommonly popular these days, there is more and more insistence upon good color and all around brilliance as brought out through proper proportioning and polishing. The diamond being a most difficult thing for the average person to buy intelligently, it is best to make all diamond purchases from a jeweler known for his integrity and honest dealing.

The jeweler who has a valuable reputation at stake cannot afford to deceive or to make a mistake.

Diamonds Hold Individuality

Dr. Herbert P. Whitlock, curator of minerals and gems at the American Museum of Natural History in describing the qualities of gems in an issue of "Natural History" journal of the museum said: "Most of the famous diamonds of the world have had historic careers, involving violence, cupidity and intrigue. It would be interesting indeed if it were possible for us to write the story of every gem in a jeweler's showcase. Some of them may have been mined only last year, but others may have seen centuries of use as gems."

THE HOME OF DIGNIFIED CREDIT

Basis of Value of the Diamond Rests on Supply

Of the very few luxuries whose value remains stable, the diamond is pre-eminant. Not only does it retain its value, when bought at a fair market price, but over a period of years it invariably gains in worth.

Even today when many commodities are falling in price, diamonds continue to command good prices, and the prices of the larger and better grade stones have actually shown some increases in the past few years.

What is the cause of this? In the first place, the world's supply of diamonds is definitely limited and no one knows when the source of supply will run out. It is believed that the diamond was formed under cataclysmic conditions impossible to duplicate today.

Philosophers and scientists have struggled with the theory of making diamonds scientifically but with no more practical success than the alchemist of medieval times enjoyed. Specimens of microscopic crystals of pure carbon have been made at tre-

mendous cost, but those who are familiar with the gem are certain that it will never be possible to make diamonds of any noticeable size.

So, rarity is one of the basic factors of the diamond's value.

However, it is not to be assumed that cost of production does not enter into the cost of diamonds as diamonds are usually imbedded in a hard clay which must be dug and carted by the ton to fields where they lie for a year or more in order to weather and bring the precious crystal fragments more nearly within reach. Even then the diamond is not to be plucked off the ground, but the clay must be subjected to mechanical action for which expensive equipment is required. Finally, after the clay has been washed away, the rough gems lie mixed with bits of gravel, the minute remains of a huge mass of hard blue earth.

Here begin the steps in diamond production which may best be characterized as "ticklish." The rough stones, often unrecognizable to the untrained eye, must be separated from the worthless gravel and then sent to the diamond cutters. A tedious and painstaking process begins here, sometimes lasting over a period of several weeks for a single stone.

The work of cleavage, cutting and

polishing, requires utmost skill and long experience to prevent unnecessary wastage and the possible ruining of a good stone.

Sawing has greatly replaced cleaving. After the rough stones have been broken down to the most desirable shapes and sizes, they are given to the cutter who grinds them with another diamond in a special kind of lathe. The diamond is ready for polishing. Here a steel disc covered with diamond dust and olive oil revolves at 2,000 revolutions a minute, and polishes off each facet. Then the stones must be distributed through importers and retail dealers.

There have been times when diamonds could be worn only by royalty. The diamond has always possessed a peculiar fascination which is now shared by millions of people instead of hundreds, therefore, to the value-making factors of rarity, plus cost of distribution, must be added the immense desirability which diamonds have always enjoyed.

That this value is no ephemeral thing is demonstrated by a chart prepared by the Keystone Publishing company, showing the gradual rise in the average value per carat of the diamond, during the last 100 years.

This chart shows that from 1830

to 1870 the diamond was valued at less than \$100 per carat; by 1890 it was about \$150 per carat. From 1910 to 1920, the value per carat increased until it reached a high mark of \$500. Since that time the diamond has gradually increase in value until today we find it selling around the \$750 mark, per carat. Of course, cheap stones lacking in beauty and value are always to be found at almost any price. And, as has been indicated above, the value of any particular diamond will vary in accordance with a number of factors. But the diamond buyer who deals with a reliable jeweler can invariably depend upon getting full value for his investment today, as well as for centuries past.

Colors in Diamonds Are Greatly Varied

The diamond, when ideally pure, is colorless, but only a small proportion are of this character. A large percentage of the so-called white stones have a tint of yellow, green or brown; a few are of a bluish tint and these are highly esteemed. The diamond is also found at times in red, sapphire-blue, and emerald-green. These are very rare and highly valued. Orange color, violet, canary, and rich browns also bring a good price and are growing in favor.

IT MUST BE RIGHT

THE DIAMOND SHOP
Demands the Best For Each and Every Customer

When a watch is left for repairs at the Diamond Shop, or a ring is to be sized or a stone mounted . . . you can leave it with confidence that it will be returned to you satisfactory in every detail.

The repair department is modern and is operated by experts. Every job "MUST BE RIGHT" before it leaves the Diamond Shop.

We Congratulate the management of The Diamond Shop on opening in their fine new home in Pampa.

A \$37.50 Elgin with a mesh attachment. Has a 15-jewel movement in an engraved case. This is a good-looking, reliable time-piece.

Many Steps in Cutting Diamond To Final Shape

Although diamonds have been in use for personal adornment purposes throughout hundreds of years, the present day style of cutting, known as the brilliant cut, did not come into use until the end of the seventeenth century. It became the universal fashion almost overnight because it brings out to the best advantage the fire and brilliancy of the stones.

While cutters follow the rule of never sacrificing symmetry and beauty for size, nevertheless many unusual shapes are found among large diamonds to permit the largest possible size. Among the most common odd shapes are rectangular, oval and pear-shaped.

The geometrical proportions of modern brilliant cut diamonds provide that about thirteen-eightieths of the total height of the stone shall be above the girdle line and five eightieths below the girdle line. The top of the stone is commonly known as the "table" and the flat surface at the bottom the "culet". Exclusive of the surfaces at the top and bottom, brilliant cut stones have fifty-six facets.

It is recognized by all diamond cutters that to get the best results in the finished stones, definite geometrical proportions must be observed. For instance, the width of the table should be about four-ninths of the diameter of the stone at the girdle. The greatest brilliancy and fire always depend upon maintaining proper proportions.

The use of facets in the cutting of stones was first introduced in the fifteenth century by Louis de Berquen of Bruges, also known as Ludwig von Berquen, a Hollander.

Diamond cutting since its inception has been a leading industry of Belgium and Holland, and, on a smaller scale, also is carried on in several other countries. The diamond cutting centers of the world rank as follows in point of the number of persons employed.

Antwerp, 11,000; Amsterdam, 10,000; Saint Claude and surrounding towns, France, 1,500; New York, 500; places in Germany, 850; Paris, 200; Geneva, 100; Bienne, 80; London, 30.

Antwerp has seventy diamond cutting establishments and Amsterdam fifty, while Saint Claude region has about thirty. In the United States, outside of New York, a few cutters are employed in Cincinnati, Boston and Chicago.

Diamond cutting is naturally divided into three separate operations. These are cleaving, cutting and polishing. Diamonds are six, eight and ten sided crystals and the line of cleavage is indicated by the plane or face of their crystallization.

Knowledge of the most advantageous way to clear a stone so as to remove imperfections and get the best cutting results is acquired by long experience. Careful examination is necessary to determine the direction of cleavage, and the process of "splitting" the stone, as it is described in the language of the man of the street, consists of notching the diamond to be split with another diamond and then placing it upon a support and inserting in the notch a dull steel or iron edge. A sharp blow on the iron usually causes the stone to part.

This operation seems very simple, but cutters agree that a large number of good diamonds can be ruined by improper cleaving.

In fashioning rough diamonds, the sawing process is now largely in use. In this, the diamond is imbedded in a metal cup-like holder by means of solder and then is held in contact with a rapidly revolving disc, the margin of which is impregnated with diamond dust and oil.

When a diamond has been shaped, the next step is to remove the apexes. The process formerly in use for this is known as "bruting", and consisted of mounting two diamonds at the ends of sticks or holders and rubbing them together by hand over a box in which the resultant powder is collected. Now the stones are cemented in the head of an adjustable lathe, and, as the lathe revolves, the stone is brought into contact with another diamond cemented into the end of the holding apparatus which is skillfully guided in the hands of the cutter.

When a diamond has taken shape, it advances to the third stage of finishing, known as the polishing operation. In this process, the diamond is held firmly against a rapidly revolving horizontal wheel of porous cast iron which makes about 2500 revolutions a minute. Diamond dust mixed with olive oil is spread upon the wheel and serves as the polishing medium. This dust is collected in the process of shaping diamonds and also is made from fragments of poor diamonds known as "brutz".

In recent years, semi-automatic machines for polishing diamonds have been installed by many cutters in America. The angles and planes to be polished on a diamond are predetermined and the automatic machinery is set by the operator. The ingenious devices remove the stones from the polishing lap when the desired depth and angle have been attained.

Several of these new semi-automatic machines can be operated by one attendant and the preciseness of the mechanical devices also has lessened the degree of skill formerly required on the part of the polishers.

The value of a diamond is greatly increased in the cutting. Not the least important contributing factor toward this increase is the loss of approximately half of the rough stone in the cutting process. Should an attempt be made to save a large part of a rough stone it might result in sacrificing quality for quantity and there would be a substantial decrease in the value of the finished gem.

Only the larger stones are cut in the United States, but the process and machinery in use are the best that have been developed and American cut stones take rank with the world's finest diamond.

"Cut and recut to conform to newer styles in gem cutting, but never losing their identity, they are never destroyed, they never wear out or decay. Even when buried they are subsequently dug up, only to continue their career, inciting future generations to love and hate, greed and murder, as they have incited those of the past."

"Gold and silver objects are constantly being melted and shaped into newer forms, but a gem can never lose its individuality."

New Lines Are Being Added by Diamond Shop

In keeping with a policy to handle only nationally advertised merchandise, the Diamond shop is adding several new lines. By appointment they have been granted the agency for the famous Majestic radio. The entire balcony will be utilized for the radio department. Every model of the majestic radio can be obtained on very liberal credit terms.

Announcement has been made by the Diamond shop, that they will soon be able to deliver the new Majestic electric refrigerator, made by the manufacturers of the famous Majestic radios. The refrigerator

was placed on the market June 1, and shipment are expected to arrive at the Diamond shop this month. Majestic refrigerators can also be purchased on the credit plan.

Blue-white diamonds, of a grade that one would expect to find only in cities ten times larger than Pampa, will be sold by the Diamond shop.

Flatware and hollow ware in any design one could possibly want; a complete line of odd pieces in the most popular patterns with which to replenish a set; electric toasters, electric irons, electric waffle irons and electric percolator sets are other items in the large stock of the Diamond shop.

Should you desire a gift, for a bride prize, or for any other purpose, you will find a wide selection in the gift department, a new department of the business. Glassware and chinaware will be

handed by the shop, and may be bought on small weekly payments. The Dunbar will be the featured line in this department.

Naturally the Diamond shop will continue to carry in stock the famous Bulova watches that they have handled for the past two years. By appointment, they are dealers for the Gruen watch, carrying in stock at all times practically every model made in ladies and gentlemen's wrist watches, as well as many Gruen pocket watches. The Diamond shop is also the authorized distributor in Pampa of Elgin watches.

JERUSALEM (#)—Women lawyers, only recently admitted to practice in Palestine, have been barred from the religious courts. Those courts deal with marriage and inheritance matters.

Fine Fixtures Are Installed in Diamond Shop

Fixtures installed in the new Diamond shop are made by the Grand Rapids Equipment company, Grand Rapids, Mich. They were made especially for this store; are of beautiful walnut, and are the very latest in design.

Lighting is by Kayline of Cleveland, O. All lights were made especially for the Diamond shop, and no other store in the United States uses these particular lights.

Show cases, display and window trims were made to order by the Roy Tray company, Chicago. Walnut was used in their construction, in harmony with the rest of the fixtures of the store.

Months of planning have given the people of Pampa and surrounding territory one of the real outstanding stores of the Southwest.

Jail Could Be Worse
LLANO, June 17. (P)—A jail may not be the best in the world to live but is better than being bitten continually by mosquitoes in the opinion of Pete Ellington.

Recently Ellington escaped from the jail at Llano and after spending one night in the open fighting the mosquitoes decided to return to prison. He called up Sheriff Dan McDonald and told him that he was ready to return to jail and instructed the official where he could be found.

Ellington was awaiting transportation to Huntsville to start serving a two-year sentence on charge of burglary.

Cigar Store to Have Very Best Fixtures Installed

Roy Wiley, who is opening Wiley's United Cigar store in the Gordon-Deneb building, has lived in Pampa for the last year, being employed by the Panhandle Insurance company and Building & Loan association.

He came to Pampa from Panhandle, where for two and one-half years he was an accountant with the Carpenter Drygoods company.

Mr. Wiley was born in Kiowa, Kans., attended the public schools of that place, and the Wichita Business college at Wichita, Kans., where he lived for fifteen years. He has been employed in two banks in Wichita, the Union Stockyards National and the North & State bank. He is a Mason and a member of the local post of the American Legion.

Mr. Wiley was a representative of the International Harvester company before coming to the Panhandle.

Stock carried in the confectionery will include newspapers, magazines, cigars, soda, and drug sundries. A "Walrus" soda fountain, Frigidaire-equipped, and an "American" show case, have been installed.

A "Soapy" Moody
COLEMAN, June 17. (P)—Coleman has organized a "soapy" Moody for governor club. R. D. Kinney, Jr., is president of the club and is assisted in its direction by a number of business and professional men.

The slogan of the club will be "Clean up Texas politics with 'Soapy'". The emblem will be small bars of soap to be passed out to persons whom it is believed can be prevailed upon to vote for the Fort Worth Laundry man for governor.

COMPLETING RAILROAD
SAN ANGELO, June 17. (P)—Train service from San Angelo to Sonora on the new 85-mile Santa Fe extension will commence July 1, and plans are being developed here, at Eldorado and Sonora for celebrations.

Eldorado already has arranged for a big rodeo on July 4, three days after service is to be started on regular schedule.

14—PINDING OF DEED—
WACO, June 17. (P)—The original deed to the land on which the new Waco municipal building stands has recently been uncovered and was the means of ending a controversy that promised to develop into a warm affair. Search for the document made, at the instance of an attorney for a group of hucksters who were protesting the right of the city officials to oust them from the square market.

It was contended that the city had no legal title to the square and could not exercise control of it. The deed conveying the property to the city bears the date of June 10, 1850, when land in the then village of Waco was selling for \$6 a lot with few takers.

FIRST OATS SOLD
COLEMAN, June 17. (P)—First oats marketed in Coleman from the 1920 crop were sold by Hugh Wheat. The price paid was 50 cents per bushel. The oats tested 27 pounds.

BUENOS AIRES (P)—The Argentine Federation of Agriculture has asked the government to help relieve conditions in the rural districts by providing work on railroads and roads for unemployed farm hands.

SAO PAULO, Brazil (P)—The first recording studio for talking machine records in Brazil has opened here. It will make discs of Brazilian music, both vocal and instrumental and reproduce records brought from the United States in order to save duty.

Great Display of Diamonds Will Be Seen Here

At their opening, the Diamond shop will have on display the largest collection of valuable diamonds and precious stones ever seen in the Panhandle. Thru the courtesy of the Mark Jewelry store of New York City, diamond bracelets, diamond wrist watches, diamond bar pins, and diamond pendants that retail from \$1000 to \$10,000 for each individual piece will be on exhibit. These pieces are seldom shown anywhere except in the largest cities of the world.

Special guards will be employed to watch the display of gems on exhibit by the Diamond shop, as well as the Mark Jewelry store collection. The gems have a total value of \$160,000.

Special burglar-proof safes have been purchased by the Diamond shop at an enormous cost. They are walnut finished and are equipped with all the latest burglar proof devices.

Mr. Via, representing the York Safe and Lock company, York, Pa., personally supervised the construction of these safes and they are the very best in the vicinity. It is practically impossible to break into the safes that guard the treasures of the new Diamond shop.

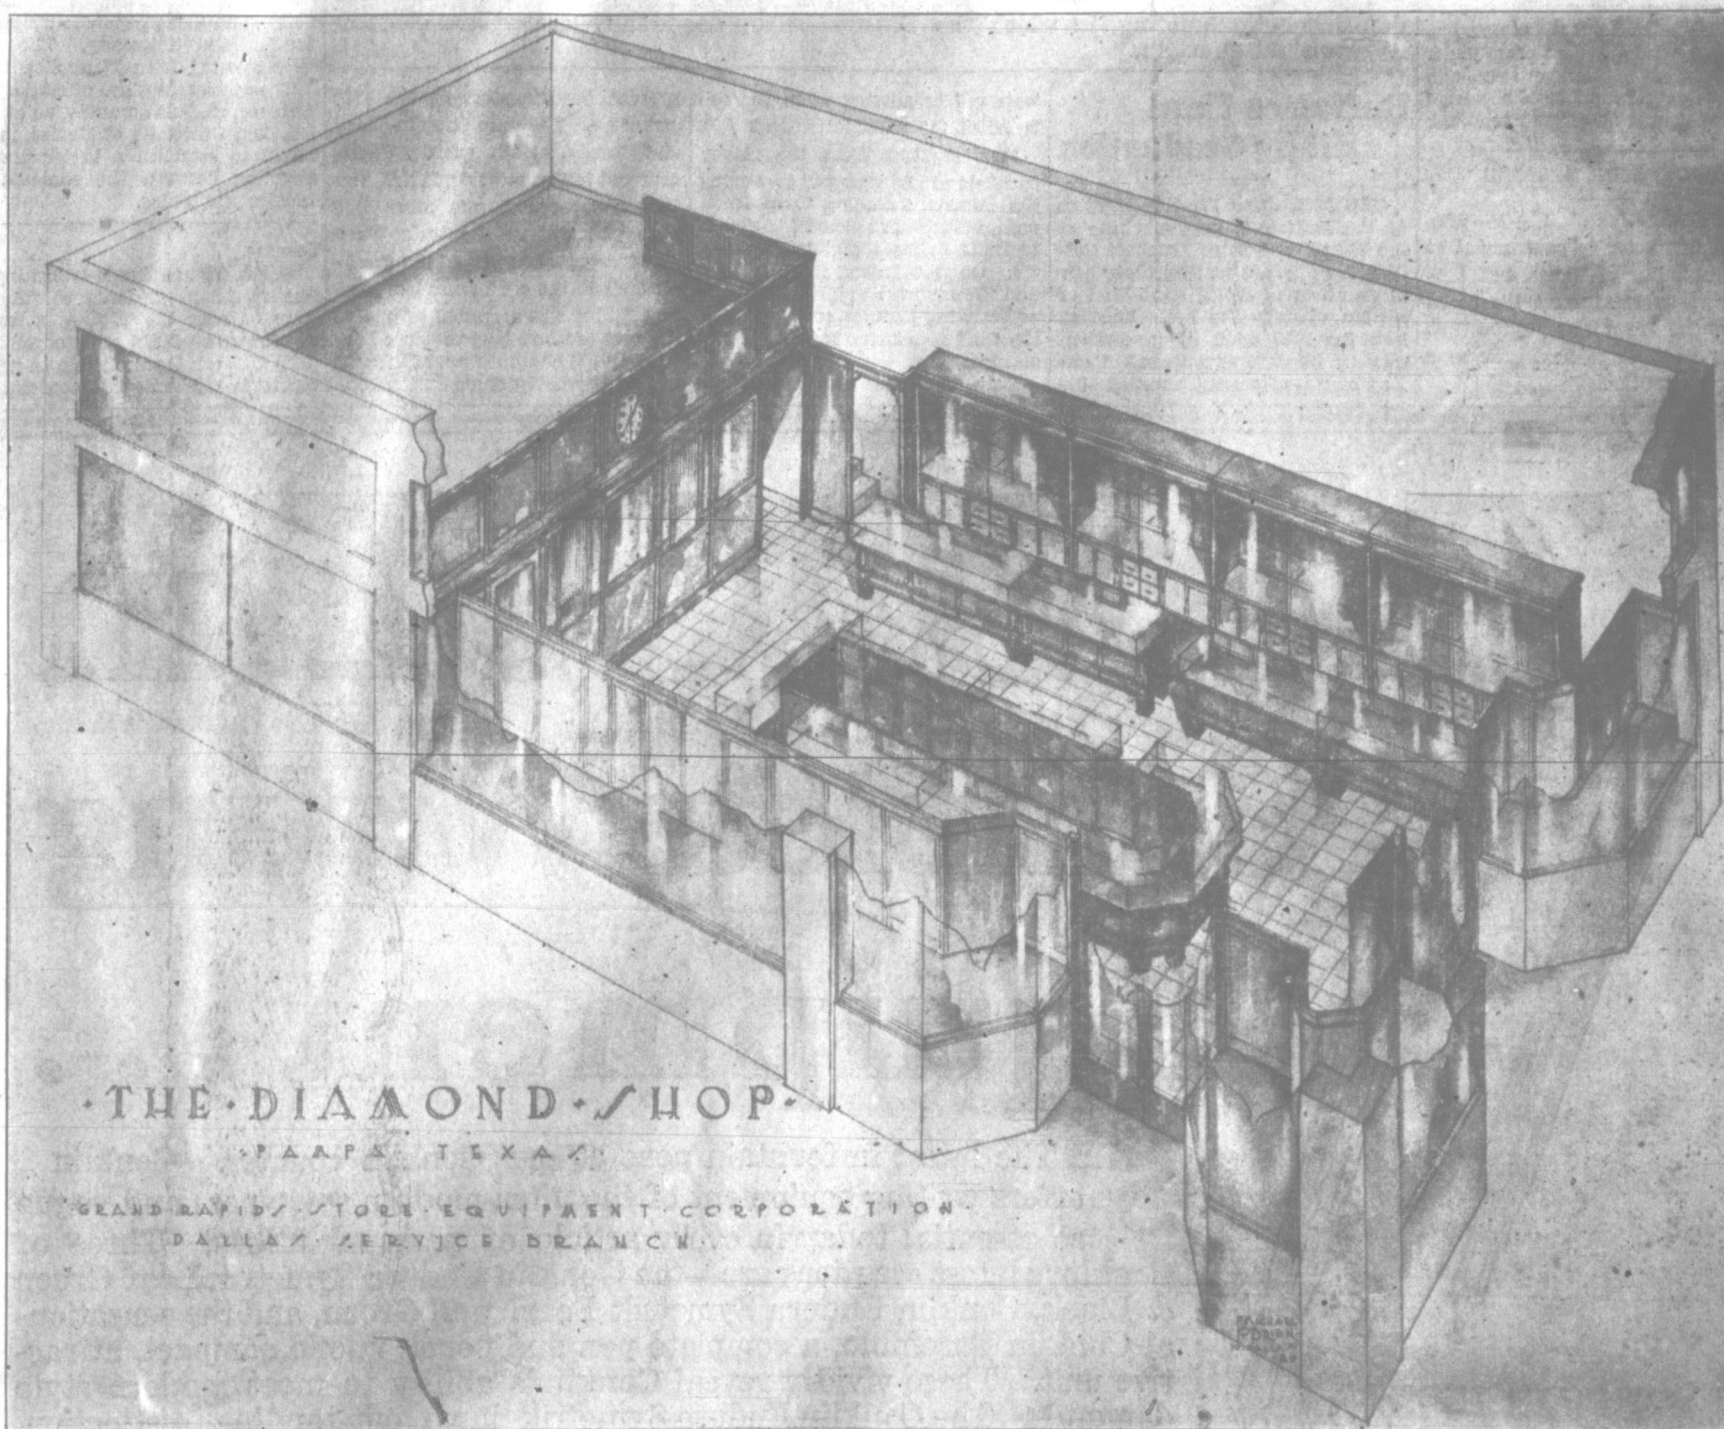

Married 61 Years
SAN SABA, June 17. (P)—Mr. and Mrs. Richard Kolb, pioneers of San Saba county, recently celebrated their 61st wedding anniversary. Kolb is 89 and his wife 80. The couple still is actively engaged in the operation of their ranch. Kolb is a veteran of the Texas rangers and of the Confederate Army and has been member of the Masons for 56 years.

Accidents Are Too Plentiful in Texas, He Says

AUSTIN, June 17.—(AP)—Urging that steps be taken by the government and industrial leaders to curb the number of industrial accidents, H. T. Kimbro, member of the industrial accident board, recently stated that an average of 400 mishaps are reported daily in Texas. He said there probably were many more accidents in the state, the 400 representing only the number reported to the board.

Kimbro attributed the advance in the number of accidents to the ultra-mechanical, fast living and superficial age in which modern commerce finds itself embroiled. He asserted the time had arrived when a halt should be called and that there were too many punitive laws. He also stated the tendency to adjust the full scope of human activity to a set of laws was harmful. The increasing number of industrial accidents constitutes menace to the general public, Kimbro said. The accident figures compare to one of the big days at the front during the World War and are more than the average daily loss of life during the entire Civil War, he declared.

The average person, according to Kimbro, believed that between 20 and 30 industrial accidents are reported daily to the board and is amazed to learn that it averages around 400. That means an annual casualty list of 146,000 and the total casualties suffered by the Texas troops at the front during the World War were only about 2,000, Kimbro said. He pointed out that this number were accidents that come under compensation insurance only and that the actual number of accidents may be double the figure reported.

PROFESSOR RESIGNS

AUSTIN, June 17.—(AP)—Max White, instructor in government at the University of Texas, has tendered his resignation to the board of regents. He will attend the University of Chicago next year as a research assistant.

Recent Quarters of The Diamond Shop

—Photo by Fred's Studio

The Diamond Shop (above) was recently vacated to permit erection of the new Gordon-Denebeim building, in which the Diamond Shop has ideally located and elegantly furnished quarters.

Buffaloes Hard Hit by Graduation

CANYON, June 17.—(AP)—Mentors of the Buffaloes, grid machine of the West Texas State Teachers College, literally are tearing their hair in an effort to evolve some kind of a plan whereby the holes knocked into the 1929 team by graduation may be filled to advantage. A galaxy of stars from the vaunted 1929

team will be missing when the roll is called for candidates next fall. Four regulars from the flashy backfield of last year will be among the missing, including Tarp Newman, fullback, Pat Gerald, halfback, McInnis, halfback, and Jones, quarter. Gerald's broken field running and Newman's line plunging were outstanding features of the play of the Buffaloes in the T. I. A. A. circles last year. Both 1929-ends also will not be

present for the start of the 1930 campaign. They are Captain Ward and Bandy. Both guards, Saunders and Miller, a tackle, Elkins, and Thompson, center, are other line men who will not be back. Ward was recognized as one of the greatest ends in the conference last year, and Elkins was regarded as one of the best tacklers ever to don a Maroon and White uniform. Miller was one of the best guards in the con-

War on Speeding Getting Results

SAN ANTONIO, June 17.—(AP)—San Antonio is in the throes of an animated merry-go-round and the city rapidly is getting rich as the result of fines paid by motorists in corporation court.

The merry-go-round works like this: The increasing amounts being paid in fines will enable the city to hire more motorcycle policemen to catch more motorists to pay more fines to hire more policemen, and so on.

The program was put into operation under the regime of Judge Dave Watson who increased the amount of fines paid by careless motorists from \$49,770 in 1928 to \$110,486 in 1929. Judge Watson recently resigned to run for the office of district attorney was succeeded by Judge A. L. Matlock who promised to keep up the work.

If the 1930 fines increase in the same ratio as they did in 1929, it was believed likely several more policemen will be added to the traffic force to apprehend motorists who fail to observe the city ordinances. The war has been waged primarily against speeding, reckless driving and stop sign violators.

TO STUDY IN MEXICO

AUSTIN, June 17.—(AP)—Albert Costley of Austin and Helen Theford of Tyler have been awarded summer scholarships to the National University of Mexico. The scholarships include tuition, traveling expenses and living expenses while attending the university. The two were selected from 27 applicants.

The scholarships are offered by El Antepo, student organization of the National University of Mexico, in an effort to establish a better understanding between the students of Mexico and Texas.

Coach Claude Reeds is looking to the freshmen students to fill the gaps. Under the T. I. A. A. rules, freshmen students who enroll before October 1 are eligible to participate in intercollegiate contests.

Attorneys to Meet at San Angelo

FREDERICKSBURG, June 17.—(AP)—The second meeting of the West Texas District and County Attorneys' Association will be held in San Angelo October 3 and 4. Alex Jung, Fredericksburg attorney and vice-president, announced.

The organization was formed at Ballinger May 22, with representatives in attendance from the West Texas section.

Officers elected in addition to Jung were Roy L. Hill of Ballinger, president; and Emsy Swain, Eden, secretary-treasurer. The executive committee is composed of Jung and Walter Early of Brownwood, D. I. Durham of San Angelo, Fielding Hammond of Burnet, Carl Runge of Mason, Maurice V. Brooks of Roby and Robert P. Brown of San Angelo.

RESIGNS POSITION

AUSTIN, June 17.—(AP)—Dr. Mayer Bodansky, professor of bio-chemistry at the University of Texas School of Medicine at Galveston, has resigned his position to undertake research work. Felix Paquin has been named instructor in bio-chemistry to take over some of the work of Dr. Bodansky.

Dr. J. R. Bradley, associate professor of the practice of medicine, also has resigned, officials of the institution announced. The vacancy has not yet been filled.

MANTUA, Italy (AP)—One of Vergil's ancient dramas is to be performed here in connection with Mantua week as a part of the celebration of the 2,000th year of the old Roman poet. This city was Vergil's birthplace.

Sweet Potatoes May Be Raised on Large Scale

AUSTIN, June 17.—(AP)—Establishment of a new farming industry, the production sweet potatoes on a large scale, is seen by officials of the department of agriculture within the next few years. A 25 per cent increase in 1930 over the 1929 acreage devoted to this commodity has been noted by E. T. Crozier, chief sweet potato inspector of the department, in a report to J. M. Del Curto, chief entomologist.

Crozier stated that stimulus to the growing of sweet potatoes in Texas has been given by the establishment of pest free zones by the department of agriculture. This has resulted in the investment of outside capital in packing, storage and curing plants which were expected to further stabilize the industry by enabling producers to keep their product for a favorable market.

One of the greatest disadvantages that has been met by the sweet potato grower has been the lack of these storage and curing plants. Formerly, Crozier pointed out, it was necessary for the grower to market his product immediately after it was removed from the soil, due to the great danger of its spoiling. This had a tendency to force the market down and only farmers residing in districts where there were curing plants could obtain a fair price for their product.

Moody to Speak at Tyler June 28

AUSTIN, June 17.—(AP)—Governor Dan Moody will be the main speaker at the dedication of the new municipal airport at Tyler, June 28. Invitations have been extended to other state officials and to citizens of all cities in the state.

Galloway Calhoun, former assistant attorney general and now a resident of Tyler, will make the presentation speech which will formally open the northeast Texas city's 233-acre landing field. The field is equipped with fueling devices, a large hanger and other equipment. It is the only first-class landing field between Shreveport and Dallas and Dallas and Beaumont. Squadrons of army planes from Fort Sill, Fort Crockett and Kelly field will take part in the dedication ceremonies.

BIG EGG DISPLAYED

BRIGGS, June 17.—(AP)—Mrs. G. J. McGuire of Briggs may not own the goose that laid the golden egg but she is the owner of a hen that laid one of the largest eggs ever recorded here. She recently exhibited an egg laid by one of her hens that was eight and six eighths inches long and six and one-half inches around. It was laid by a Rhode Island red hen that is five years old.

BUDAPEST (AP)—Hungary's foreign trade showed in the first three months of 1930 a favorable balance for the first time in five years with exports approximately \$3,500,000 in excess of imports. Live stock and flour for European neighbors were chief items.

World's Most Famous Diamonds

The much-sought brilliancy of diamonds lights up many a page in history and legend.

The famous Koh-i-noor or "Mountain of light" diamond, valued at more than one-half million dollars, now weighs about 106 carats but originally weighed 787 carats. It was believed that all diseases could be cured by the water in which the Koh-i-noor had been placed.

This diamond was known as far back as 1304, says Dr. G. F. Herbert Smith. He says it fell into the hands of the Mogul emperors in that year; that legends trace its history some 4000 years previously. It was given its name by Nadir Shah in 1739 when he sacked Delhi. He was murdered by one of his officers after his victorious return to Persia. Later the stone found its way to the Temple of Juggernaut and finally it was presented to Queen Victoria.

What was in the other eye of the Temple idol whose one eye held the Koh-i-noor? The twin of this diamond is considered to be the other half of the 687-carat parent stone which was known as the Great Moat.

The French traveler Tavernier, saw the other half of the stone in 1665 in the possession of the Great Mogul of India. Some say this stone was not related to the Koh-i-noor; others claim that it is the diamond now known as the Oryol, and still others think that it has been lost or broken into smaller pieces.

The Oryol diamond is named after Prince Orlow, who presented it to Empress Catherine of Russia, as an ornament for her hair. It originally was an eye stone in the statue of Brahma in the Temple of Mysore. It had been stolen by a French soldier and was sold to an English sea captain and then to a London dealer. The stone is rose cut and weighs 194 1/2 carats.

A soldier also took the famous and beautiful "Sancy" diamond. Traditions say that this gem was taken from the dead body of Charles the Bold, after the battle of Morat in 1477. After numerous exchanges, the gem came into the possession of Nicholas de Harial, Sieur de Sancy, who loaned it to Henry IV of France. Robbers seized and murdered the servant entrusted with the delivery of the stone.

Confident of both the loyalty and the ingenuity of his servant, de Sancy had the body examined. The diamond was found in his stomach. Sancy sold it to Queen Elizabeth and finally it returned to the possession of Louis XV., who wore it on his hat.

Accounts of its later ventures differ, but eventually it came into the possession of a wealthy Maharajah in India. It now belongs to Lady Astor, who wore it on the occasion of taking her seat as the first lady elected to British Parliament. It weighs about 53 carats.

The Regent or Pitts diamond, bought in Golconda, by William Pitt, grandfather of the Earl of Chatham, is said to have been found by a slave in India in 1701. He cut his leg and in the bandage covering the wound enclosed the diamond. Later he exchanged it with an English skipper

for a free passage to another country. The skipper sold the gem to a merchant for \$5,000, who in turn sold it to Mr. Pitt for \$100,000. When Mr. Pitt returned to England he had the 410-carat stone recut to about 163 carats. In 1717, Mr. Pitt sold the diamond to the Duke of Orleans when it received the name "Regent". Napoleon Bonaparte is said to have had the Regent mounted in his sword hilt. Since then it has remained in the French treasury and can now be seen in the Apollo Gallery of the Louvre, Paris.

The finest of all known blue diamonds is the Hope, a 44 1/2 carat stone, of an extraordinary sapphire-blue color. The known history of the diamond started in 1830 when it came into the possession of a London pawnbroker. Later it became the property of Henry Thomas Hope, a London banker. Many authorities believe that the Hope is part of a blue diamond weighing 112 carats obtained by the French traveler Tavernier in 1642 in India and sold by him to Louis XIV of France. While no further mention of a stone of this weight appears, in an inventory of the French crown jewels made in 1791, a "fine, light-blue diamond, 67 1-2 carats" is listed.

When the Crown Jewels were stolen in 1792, this stone disappeared with the rest and was never recovered. It is believed that one large and two small stones were made from it and that the large one reappeared as the Hope.

Misfortune befell the owners of this gem, according to tradition, ever since it was first purchased by Tavernier. After many exchanges the stone was finally purchased by Edward B. McLean, Washington, D. C., in 1911. Soon after his only son was killed by a motor car. After leaving the McLean family the stone was purchased by Monsieur de Hautville and three months later Madame de Hautville was killed in the same way as little Vinson McLean. Subsequently the eldest son having taken poison by mistake, died in terrible agony; the daughter was accidentally drowned and the younger son was blinded by the explosion of a gun while out shooting. The de Hautvilles then parted with this peculiar gem. Who will be its next owner?

The Shah diamond, at present one of the Russian crown jewels, a clear gem weighing 86 carats, was given to the Czar by a Persian prince. It originally weighed 95 carats and was engraved with the names of three well-known Shahs of Persia, being one of the few known engraved diamonds. The earliest date and inscription correspond to 1591 A. D. Other dates correspond to 1641 and 1824 A. D. The stone is not of the finest as it has a yellowish tinge, but it is of perfect transparency.

The Polar Star, a brilliant jewel of 40 carats, is usually stated to be one of the Russian crown jewels, although the only stone of this weight noted by Ferman in 1925 in the Russian Diamond Treasure is a briolet and all descriptions of the Polar Star show it to be a brilliant. The diamond was supposed to have been in the possession of Joseph

Bonaparte at one time and is said to have been later purchased for the Russian crown. It is noted for its rare purity and lustre.

The Jubilee, one of the largest of the known diamonds, weighed around 650 carats before cutting. Its present weight is 239 carats. It is a recent discovery having been found in Jagersfontein mine, South Africa, in 1894. It was called the Jubilee due to the fact that it was cut in 1897, the year of Queen Victoria's diamond jubilee.

The largest and finest Brazilian diamond ever found is the Star of the South, which was discovered in 1853 by a slave woman in the mines at Bagagem, where most of the large Brazilian diamonds have been discovered. The slave received her freedom and a pension for life as a reward. Before cutting, the stone weighed 254 carats, but was reduced to 128 1-2 carats after it was cut by Coster of Amsterdam. Although not perfectly white, it is regarded as one of the finest large diamonds of the day. So far as is known it is now in the possession of Mulhar Rao, the Gaikwar of Baroda, India, who purchased it for \$400,000.

The Star of the East, so called because of its ownership for many years by the Archduke Franz Ferdinand of Austria-Este, weighs about 26 carats. The assassination of this prince in 1914 was the immediate cause of the World War and so far as is known, the diamond was still in his possession at the time of his death.

Very little seems to be known about the Pasha of Egypt, an octagonal diamond weighing 40 carats. It was purchased for the Egyptian Treasury by Ibrahim Pasha and is the property of the Egyptian Government.

The Pigott or Lottery diamond was brought to England in 1775, by Lord Pigott, an Irish Peer who served as Governor of Madras, India, and is supposed to have been presented to him by an East Indian princess. After his death a pawnbroker in London purchased it. It was later disposed of by lottery. In 1818 the stone became the property of Ali Pasha, Khedive of Egypt, who before he was assassinated left instructions to destroy it at his death. It is said to have been done.

Of green diamonds the Dresden preserved in the Green Vaults at Dresden, Germany, is the finest and one of the largest known. Authorities differ as to its weight which is given as from 40 to 48 carats.

The Stewart diamond was found in South Africa in 1872. In the rough it weighed almost 290 carats but was cut to a slightly yellowish brilliant of 123 carats. It is said to be in the possession of an Englishman, but no further history of it is available.

The Florentine or Tuscany diamond weighed around 139 carats, and was formerly in the possession of the Duke of Tuscany. It is described by Tavernier as being "clear, of good form, cut on all sides into facets and tending somewhat to a citron color." It is rose cut and has the form of a star with nine rays. Since the city of Florence included Duchy of Tuscany, it was often

known by both names. It is supposed to be among the crown jewels of Austria today.

The Tiffany is perhaps the largest and finest of yellow diamonds. It was found at Kimberly, South Africa, about 1878, and was cut in Paris to a double brilliant weighing 138 1-2 carats. It was exhibited at the exposition in Chicago in 1893 by Tiffany & Company of New York City and is now in their possession.

The Nassak diamond so far as is known was found at one of the famous cave temples at Nassak, India. The British got control of the gem when they acquired that part of India in 1818. Its present cut form it weighs 78 5-8 carats and is triangular in shape.

The Empress Eugenie was owned by Catherine II of Russia, who gave it to her favorite, Potemkin. From a grand niece of Potemkin, Napoleon III of France purchased it for his bride, Empress Eugenie as a wedding

gift. It weighs 51 carats and is of oval shape. At present it is supposed to be in the possession of the Gaikwar of Baroda, India.

The English Dresden is a Brazilian diamond which weighed 119 1-2 carats in the rough, when found in 1857. The same year Mr. T. Dresden of England purchased it and had it cut to 76 1-2 carats. It is said to be in the possession of the Gaikwar of Baroda, India.

The Star of South Africa was discovered by the Boer, Schalk van Niekerk in 1869. This diamond weighed 83 1-2 carats before cutting, after cutting 46 1-2 carats. It is triangular in shape and of great brilliancy. It was sold to the Countess of Dudley for \$125,000.

WARSAW (AP)—Travel to Russia has increased so much that an additional train has been put on the line between Warsaw and Moscow and trains passing through here

Builders of New Gordon-Denebeim Structure Believers in Pampa

"Many people have doubtless wondered why we built only one story in constructing our building," said August Gordon, in commenting on the Gordon-Denebeim building.

"The foundation and steel is laid to carry four more stories but we did not want to overbuild. There is such a thing as overbuilding a town. A two-story building would have been of no benefit to the city, and J. M. Dodson of the Pampa National had promised us he was going to build a six-story building so we decided to await the development of the city."

from Berlin and Paris halt only 50 minutes instead of three hours as heretofore.

"I have always wanted the corner where the Gordon-Denebeim building now stands. I was corresponding with my father-in-law asking him if he wanted to be a partner in buying the lot. In May 1920 the lot was offered us for \$50,000. It was purchased by V. E. Fatheree, from whom we purchased it two weeks later, in June, after we had decided to offer Mr. Fatheree a profit of \$10,000."

"In awarding the contracts for the Gordon-Denebeim building we specified that Pampa union labor be used, and that all material, as far as possible, be bought in Pampa."

"I believe in Pampa and expect to make my home here always." Mr. Gordon came to Pampa in

July 1926 and established the Gordon stores company at 106 Cuyler. He comes from a family of merchants. His father was a merchant in St. Joseph, Mo., for 45 years. Of the ten children in the family, the daughters are married to merchants and each son is a merchant. Abraham Denebeim, Mr. Gordon's father-in-law, lives in Kansas City, Mo., and is a large owner of real estate in that city. Mr. Gordon said "He is sold on Pampa and believes it has a great future ahead of it."

CANBERRA (AP)—The cornerstone has been laid here for a Roman Catholic cathedral to cost \$2,500,000. The ceremony was attended by Prime Minister Scullin and Commonwealth Treasurer Theodore, both members of the faith, and many church dignitaries.

Old Red Shirts Hold Spotlight With Mussolini

BY HUDSON HAWLEY
FLORENCE, Italy, June 17. (AP)—Red-shirted veterans of Garibaldi's campaigns, wearing square-voiced "forage caps" strikingly similar to those used by union soldiers in the civil war, were centers of attraction second only to Il Duce himself on Mussolini's recent "progress" through the provinces.

At every big meeting in the public squares, and at the mammoth military review here, the grizzled octogenarians were in evidence.

Being mostly of sturdy peasant stock, they trudged by two and three along with the youngsters of the Black Shirt militia, taking all the dust and heat. Only a few of them consented to use canes and if any member of a local reception committee had so much as dared offer them an automobile he would have had a duel on his hands.

They all turned out in uniform, their red clad breasts heavy with medals. The' invariable gaudy bandana handkerchief was around every neck. Their trousers were baggy old affairs, some of corruoy, others reminiscent of the extinct zouaves. It was surprising how few of them wore eyeglasses, and not a one turned up with crutches or in a wheel chair.

These remarkably spry "ancients" whose service records dates back to anywhere between 1860 and 1870, asked no special favors, but got many. Mussolini let it be known that their uniform was a good pass when they wanted to get near him, and whenever he spoke there was always a little knot of them right under the balcony, hanging on every word.

Independent citizens they are; they have no woman's auxiliary and they seem to have a sublime contempt for the sons of Garibaldi's organization—ever for their own kin in it. They are perfectly able to take care of themselves and they let everybody know it.

Mussolini made no political capital out of the Garibaldians. He seldom mentioned them in his speeches, and while always glad to shake hands with them and give them his infectious smile, was camera-shy when asked to pose with them.

The reason may be that the men of '60 and '70 had to fight the pope's troops, and that Garibaldi himself was a rabid anti-clerical. In these days of religious peace, brought about by himself and Pius XI last year, the Duce prefers not to revive painful memories.

First Diamond Shop Location Here

—Photo by Fred's Studio
Sam Fenberg's Diamond Shop, which tomorrow will open in its fine new quarters, was first located here in Fatheree Drug, No. 1 (above). Those in the picture are L. R. Riddle, jeweler, and Abe Fenberg, the latter now located in Los Angeles.

BUFFALO BILL AND NICK CARTER THRILL BRAZIL

RIO JANEIRO, June 17. (AP)—Dime novels which thrilled a generation in the United States now growing bald and gray, have just begun to send tingles along the spines of Brazilian youngsters.

The adventures of Buffalo Bill, Nick Carter, King Brady and other heroes of wild and wooly days have been translated into Portuguese and may be bought at street stands for six cents. Moreover, Buffalo Bill is advertised thusly:

"Most emotional and true account of the prowess of Colonel Cody, national hero of the United States; a real school of strength, dexterity, loyalty and courage for our brave youth."

Chinese Army Men In Japan
NANKING, June 17. (AP)—Thirty Chinese army officers, all graduates of military academies in this country, have been sent to Japan to take advanced courses in military sciences for a year.

Soviet Expands In North
ARCHANGEL, June 17. (AP)—Soviet authorities on Novaya Zemlya, the great Arctic island off the Russian coast, have appropriated funds to establish a new colony which will be the northernmost on the island and about the same latitude as Spitzbergen.

BRAZIL RECEIVES BIG LIST OF IMMIGRANTS

RIO JANEIRO, (AP)—In the past four years 405,622 immigrants entered Brazil, according to figures in President Washington Luis' recent messages to congress.

Portuguese, naturally, were first with 142,788 entries and Japanese next with 45,308. It is estimated however, that within five years Japanese will be close to, if not ahead of, the Portuguese.

How the peoples of Europe are turning to South American for new homes may be judged from the other nationalities in the list. There were 35,245 Italians, 26,963 Spaniards, 24,251 Lithuanians, 21,131 Germans, 21,112 Poles, 18,850 Rumanians, 11,275 Syrians, and 6,947 Jugo-Slavs.

Prohibit Liquor To Youths

TOKYO, (AP)—Hampel Nagao, a deputy, is campaigning for a bill introduced by him forbidding sale of liquor to persons under 25 years of age. The present law limits sales to persons of 20 years or more.

Name Gunboat Sun Yat-Sen
SHANGHAI, June 17. (AP)—China's newest gunboat has been designated the Sun Yat-Sen in honor of the founder of the republic. It is hoped to have the craft ready for launching on November 12, Dr. Sun's birthday.

Resorters Swim and Ski
GARMISCH, Ger. (AP)—While early bathers here deport themselves in Riesser Lake, the snow on the mountains surrounding the twin cities of Garmisch and Partenkirchen is still so abundant that skiing continues as popular as in winter. By using the suspension cable cars up the mountains Zugspitze, one may enjoy winter sports and a swim on the same day.

Many Sign But Fail to Ratify General Pacts

BY P. I. LIPSEY, JR.
Associated Press Correspondent

GENEVA, June 17. (AP)—The vast discrepancy between the number of signatures to general international conventions and the number of ratifications of these conventions is one of the unsolved problems of the League of Nations.

At every council and assembly session this bugbear thrusts up its head and is rewarded with a few lusty blows of the tongue. But it continues, despite denunciation, to interfere seriously with the business of making agreements effective.

The League council at its recent session attempted to analyze the causes for long delays between signatures by plenipotentiaries and ratifications by the governments at home. Lack of ratifications has nullified many treaties, some of which were signed with great enthusiasm.

Among causes for delay the council found: lack of time available in parliaments; constitutional systems of the countries; necessity for new national legislation before certain conventions can be put in force; relationship between certain convention and other conventions which have been signed but are not in force.

The council suggested the following measures for hastening the process of ratification: more attention to the preparatory work of conferences which formulate general conventions and fewer conferences; meetings of signatory states to ask each other why they have

not ratified; insertion in conventions of a time limit within which ratifications must be deposited; extension of the use of conventions which provide for their coming into force immediately upon signature, without the necessity of ratification.

The committee which investigated the situation which causes so much gloom and exasperation, added a drop of consolation in this form:

"The results obtained up to the present with regard to ratification of conventions concluded under the auspices of the league, are more satisfactory than those obtained in the case of general international conventions negotiated outside the league."

FORMER BRAKEMAN MADE BISHOP BY METHODISTS

"BIRMINGHAM, Ala., June 17. (AP)—From brakeman to bishop is the record of the Rev. Arthur J. Moore, of Birmingham, recently elevated to the college of bishops of the Methodist Episcopal church, South.

Born in Georgia in 1889, Mr. Moore neglected his early education for the more fascinating business of becoming a brakeman. He spent most of his time on the railroad until he was 20 years old, serving in various capacities. He was married at the age of 16.

Turning suddenly from railroad to the ministry he soon became a sensation as an evangelist. During the last 20 years he has served many important Methodist charges in the south, and now becomes the youngest bishop in the history of Southern Methodism.

Find Abyssinian Relics

VATICAN CITY, June 17. (AP)—Father Bernardino Asaiz, Capuchin

missionary, has discovered the fourteen tombs of the Mindjos dynasty of the Kings of Kaffa, in southwest Abyssinia. He has also found traces of cities and churches, with 62 sacred stones, which go back to the sixteenth century.

Church Adopts Escutcheon
PHILADELPHIA, June 17. (AP)—The Reformed Church in the United States has adopted a coat of arms. The escutcheon is divided into four sections separated by a cross upon which appears the legend "In Hoc Signo Vincas" meaning "In this sign conquer."

Gasoline tax collected in Mississippi for May totaled \$662,180.46.

Kentucky authorities use a motor speed boat for use in enforcement of game and fish laws.

Mecca Pilgrims Ask Ibn Saud to Renew Holy Land

MECCA, Arabia, (P)—Moslem pilgrims have petitioned Ibn Saud, king of the Hedjaz, to rebuild the ruined section of the holy railway of Islam.

Supported by a Moslem conference in Mecca in 1926, and attended by pilgrims from Algeria, Morocco, Egypt, Syria, Mesopotamia, India, Java, South Africa, Turkey and Persia, Ibn Saud demanded that the whole of the Hedjaz railway be given over to him, so as to take its control out of Christian hands.

Formerly the railway was Turkish property. The Moslems regard it in the light of a religious trust, since the line was constructed with funds contributed by Moslems all the world over with a view to facilitating pilgrimages to Mecca.

After the war, the sections of the line situated in Syria and Palestine were taken over provisionally by France and England until the question of property rights should be settled. The greater part of the railway in the Hedjaz is in ruins because, during the war, the Bedouins stole the railway ties and used them as fuel.

Some two years ago, representatives of England, France and the

Hedjaz met in Haifa, in order to discuss questions of administration. The delegates of the Wahabi ruler, however, retired when the others refused to tackle the problem of property rights.

This Is Paris

PARIS (P)—Arturo Toscanini played hide and seek with several hundred people who wanted to call on him during his stay in Paris, take-off point for his 60-day European tour with the New York Philharmonic symphony orchestra.

Officially Toscanini stopped at a luxurious modern hotel. Actually he and his family had the run of a tiny hotel hidden away in a quiet street five minutes' walk from the Opera house. Not a porter or attendant would admit Toscanini's presence.

The concierge told callers that there was most assuredly some mistake, as Monsieur Toscanini was a guest at a big well known hotel, the name of which he furnished glibly.

At that hotel a secretary was busy for three days writing regrets for invitations tendered Toscanini.

THREE W'S
The Toscanini's are traveling en famille on this trip as they usually do.

The family includes Signora,

kindly, motherly and auburn haired, with a smile that is the philharmonic's barometer. Then there is Piccio, a Belgian griffin dog, and the three W's.

The three W's are Wanda and Wally, handsome grown-up young ladies and Walter, a monocled young man with a sensitive face. Old timers say he resembles Toscanini in his youth.

The entire family will attend every one of the Philharmonic concerts during the two months' tour.

It is Signora Toscanini's custom to hear the concerts from the wings and greet her husband between numbers.

ROYAL AUDITORS SOUTH FRANCE RESORTS

If the Philharmonic's beloved conductor thrilled at the prospect of playing to the king and queen of England, nobody knew it.

Toscanini received the information that their Majesties would attend his first Albert Hall concert without comment.

But let one of his children come near him and the great leader's face is instantly aught.

LOW IRISH INCOME TAX DRAWS BRITISH MONEY

DUBLIN, (P)—The lower income tax of the Free State as compared with England, especially with the recent addition to the British tax in the Snowden budget, has led to

the hope that many wealthy Irishmen who moved to England when the Free State was established will come back to Erin.

The normal tax in England is now 50 per cent higher than the Saorstad rate and the super tax is also considerably lower here.

Moreover there is no immediate prospect of increased taxation in Ireland. The budget for the coming year shows a deficit of roughly \$8,750,000 on a total income of \$121,250,000, but the excess is regarded as largely abnormal and will be raised by borrowing rather than by increased taxation.

INN KEEPERS DESERT

PARIS, June 17. (P)—An exodus of small inn keepers and merchants from the Riviera is indicative of a transformation in the vacation resorts of Southern France.

Several successive bad seasons on the Riviera, caused by what seems definite indifference of the weatherman toward that long favored region, have driven the smaller hotel keepers to other sections.

One of the most favored in this change is the Touraine country through which flows the Loire river. The weather is mild the year round and on the Paris-Bordeaux highway small taverns are springing up much as they used to exist from Marseilles to Monte Carlo.

Sam Fenberg Has Had Colorful Experiences

Gave Up Promoting of Fights to Be Jeweler

Little did Sam Fenberg, stranded and destitute, in Houston, Tex., one Sunday morning in 1918, dream that twelve years later he would be the owner of one of the finest jewelry stores in the Panhandle.

"Hungry?" said Sam, in speaking of this experience, "I'd say. Not one red cent in my jeans; I had nothing but a headache and a dirty shirt." Some newsboys he chanced to meet came to his aid by giving him a place to sleep and enough money to again enjoy the pleasure of a square meal. This episode is associated with Sam's venture in the theatrical business.

Sam A. Fenberg was born in Des Moines, Ia., April 22, 1900. His father, Charles Fenberg, operated the Jewelry store which he established in the year of 1883. At the age of 7, Sam was selling newspapers on the streets of his native Des Moines and he continued on this job until he completed grade school. Desire for clothes as good as the other boys wore was the cause of his seeking other employment when he entered high school. Sam obtained a job as delivery boy for a cleaning shop at the stupendous wage of \$2.50 per week. To secure this remuneration he was often forced to work from 3 in the afternoon, after school to 9 at night. However, with the money received from this job and some others, Sam made his way, and graduated from high school in 1916. Learning what many had learned before, that it is difficult to make a success in one's home town, Sam, with two companions, journeyed to Denver, aided by friendly brakemen, who overjoked their method of transportation.

Bellboy in Hotel

Sight-seeing occupied their time until their funds were gone and they came to the realization that they must get employment immediately. Sam thus secured his first job away from home as a bellboy in the Albany hotel, where he remained for six months, but this was a mere "blind alley" to Sam, and determined to rise, he quit his job and secured another as a traveling salesman. He later abandoned this also, when he found he was making no gains, and was an advance man for a troupe of actors-traveling over the entire United States, Canada, and Mexico. One incident is salient in Sam's memory of this theatrical venture. The company of eight were booked to play in a small town

Diamond Sam

SAM FENBERG

and upon arrival discovered that the theatre had burned, so there they were, broke and hungry.

"Cold?" said Sam, in telling of the incident, "worse than that, it was freezing. I remembered that I had in my trunk some 'jumping jacks' that I used to sell, and as promoter it was my job to do something, so we got the novelties out of my trunk and staged a street show. It was a good one, too, and we accepted all donations that were offered. By this means, after staging other shows, we acquired enough money to make the next jump and get our regular booking."

Quits the Theatre

Two years in the theatrical business convinced Sam that he was no Flo Ziegfeld. He had no more capital than when he started. Sam abandoned the theatre and returned to Des Moines and his father's jewelry store, gaining knowledge which he later was glad to profit by. After a year in the store, Sam again felt the urge to travel and in 1920 left his native town. In Ft. Worth, which at that time was a booming town, due to the fact that it was the center of the oil development of such fields as Ranger and Breckenridge, he met Frank Soodhalter, also of Des Moines, and they began a partnership which still exists, except for a period between 1921-1926. They sold jewelry from a drug store window that they had rented and in a few months they were operating three stores, two in Ft. Worth and one in Duncan, Okla.

"Made" Florida Boom and Tried Show Business

Sam returned to Des Moines in 1921 after selling out his interest in the business to Frank in 1920. Charles Fenberg had prospered during the years from 1917 to 1921, so tall credit jewelry store, a pioneer he, aided Sam in establishing a commercial adventure. Sam being one of the first jewelers to sell on the time payment plan.

Promoted Fights

In 1922 Sam became tired of being "tied-up" inside a store. He turned his business over to his brother, and became a sports promoter, being associated with Dave Fidler, "who is today one of the outstanding promoters in the U. S. A.," said Sam. They managed a string of fighters. "Some of the fighters we started in the fighting game were Sammy Mandell, present lightweight champion, Ace Hudkins, Ray Miller, and scores of others. Little did those boys dream when they fought in the club for \$75, that the time would come when they could demand \$50,000 for one fight. However, this venture did not prove as profitable as expected so I quit and in the early part of 1924, I began work with Shaw's, one of the leading credit jewelers of Akron, O. I held this position until December of '24, when I was called back to Des Moines by the death of my father. Early in 1925 I was in Cleveland, O., as manager of Klivan's Inc., one of the large stores of that city. Too many bosses caused me to resign in April, 1925, and accept a position as general manager with Lesch & Company, in Chicago. This is a very high class store and sold nothing but diamonds and precious stones. The wandering fever again struck, so soon I was right down in the heart of the Florida real estate boom. That bankroll of \$1,000 I had was like a pebble on the beach in Miami, as at that time you could buy a ham sandwich for about six dollars, or get a nice room in a cot house for \$10, that is, providing you knew some one who could recommend you. One week of laying around, and the bank roll was about gone. Something had to be done. I tried selling real estate for a while but this was soon given up for the art of promoting anything the suckers would fall for. You know, anybody who went to Florida, regardless of who he was or where he came from, was classified as a real sucker. I promoted motorcycle races, horsehoe pitching

contests, wrestling matches and what not, but regardless of what I made, it wouldn't last down there.

"In January, 1926, I was back in Chicago, with less money, but a knowledge of Florida and a lot of experience. Those raw winds sweeping over Lake Michigan were too cold, so I took a position as a traveling man for a leather belt concern, with the allotted territory of the state of Texas. Once more I came to Houston, and here I had good luck, where before I had had bad. It was there that I met Mollie Marilyn Leder, and took her as my wife. This was about the only real break I ever had. After a short honeymoon, we went to Des Moines

and there I renewed the partnership with Frank Soodhalter, who had also returned to Des Moines, after traveling all over the country. The three of us came to Panhandle, Tex., in April, 1926, and established the first Diamond shop in a drug store window. Prosperity came and a branch store was opened in Pampa, located in the Patheco Drug number one. This was in August, 1926. The space allotted us proved inadequate, resulting in our moving into the old Davis building, where the slogan 'Meet Sam and Wear Diamonds' was inaugurated. Evidence of the prosperity which has come to the partnership can be seen in the two stores we are opening in the Got-

don-Denebeim building. In addition to the Diamond shop and Kraft's Mint in Pampa, we operate Kraft's Mint in Wellington and Kraft's Mint in Shamrock. In 1926, we did a business of \$16,000; last year the total was \$350,000. We have set one half million as our goal for 1930."

Always active in making Pampa a better city in which to live, Mr. Fenberg is energetic in public work, being chairman of the publicity committee of the B. C. D. member of the Pampa Masonic lodge, Consistory of El Paso, and Shrine temple of Amarillo. He is a member and one of the organizers of the

Elks lodge of Pampa, and belongs to the Pampa Lions club, and the Pampa Country club.

WORK MORE PLENTIFUL

SAN ANGELO, June 17.—(P)—Because business and employment conditions in San Angelo and territory have improved to such an extent that it is no longer needed, the city employment agency here has been closed.

The agency was organized early in March and more than 200 persons were supplied with work. During the last 15 days of May less than a job a day was obtained through the agency and applicants were scarce.

Summer Term Begins

DENTON, June 17, (P)—More than 600 students, representing every section of Texas as well as Louisiana, Oklahoma and Arkansas have been enrolled in the summer session of the Texas State Teachers College for Women. Among these, forty are attending the first session of the graduate school, taking work in six departments toward Master's degrees.

One hundred eighty-one degrees were conferred on students representing practically every section of Texas at the twenty-seventh Commencement exercises June 2. Of this Bachelor of Music degree.
