FDR Urges 'Liberal Pair Of Candidates

'Low Level' Of Republican Campaign Hit

Assails Idea New Deal Would Put

U. S. Into War By DOUGLAS B. CORNELL

WARM SPRINGS, Ga., April 20 (P)-President Roosevelt urged again tonight that his own party choose a "liberal pair of candidates" and at the same time waded into the Republican opposition for "seeking to frighten the country by declaring the present adminis-tration "is deliberately trying to put this nation into war.'

was an out-and-out political talk that Mr Roosevelt made by radio to a series of country-wide dinners of young Democrats' clubs. And while it carried an obvious bid for continuance of the new deal, in offered no tangible clue to the outstanding political question of the day; will the President seek a third

Asserting that America faces this year much of the same kind of campaign as it did in 1932 and 1936, the chief executive added:

"It seems to me very obvious that if the Democratic party is to defeat the Republican party next November we must nominate a liberal pair of candidates, running on a liberal and forward-looking platform."

Not once did Mr. Roosevelt mention names. He came closest to it, when he said: "I am not speaking tonight of world affairs. Your government is

New Houses For Old

The suggestion is being made this spring that most of us can get new houses for old ones. Fire chiefs are explaining that anyone can make surprising home improvements with just a little effort. Spring Time is Clean-up Time. And, this is Clean-up week in Pam-

The chiefs are interested in the safety angle, too. They recommend checking up on conditions in the cellar, saving that any burnable material that is becoming charred by radiated heat, should be moved to a safe area or else properly insulated. Furnaces and stoves should be checked for broken or rusted parts and should be thoroughly cleaned.

Don't overlook attics, closets and cellars; remove accumulations of paper, rubbish and any old and broken furniture. Clean up the yard and burn papers and trash in an incinerator. If you leave paint rags, oily waste, or cleaning mops about, they may spontaneously ignite. Keep this dangerous material in a metal can with a tight cover.

Electric fuse boxes should be checked to make sure that the correct size fuse is used and that no burnedout fuses are bridged with a coin or piece of metal. All electrcal work or extensions should be checked by an expert electritian. Replace all worn or frayed cords on

Let's make Spring Clean-up Week worthwhile this year. Get a new, safe house for an old, hazardous one!

MEET EDITOR ICHABOD IBID

(The New York Sun) President Roosevelt introduced another character of American folklore in his Jackson day dinner

"I have in mind the predicament of one of the ablest editors of a great paper today, who some

time ago said to me very frankly: 'I'm really in complete sympathy with your program, Mr. President, but I cannot say so pub-licly because the readers and the advertisers of my paper are 90 per cent Republicans and I simply cannot afford to change its unalterable policy of traditional opposition to anything and everything that comes from Democratic sources. Of course, Mr. President, you understand.'

And may I add that the President understood. We know this bird. He is a cousin of the Prominent Businessman who used to turn up at the White House and, after being confronted with the regularly broke down and confessed that he could not see how Mr. Roosevelt could reduce expenses. The businessman's name is Anthony Anon; the editor is Ichabod Ibid. Ibid is a greatgrandnephew of Mrs. Gamp's friend, Mrs. Harris. He came to this country in the famous ship Wabble and, after an association with Feodor Vladimir Carrovitch and Lafayette Mulligan, took the Hugo N: Frye course in journalism conducted for a few

minutes by the Cornell Daily Sun in 1930.
Editor Ibid is a delightful fellow, not a whit less tactful than his cousin Anon. Somebody has described them as the most obliging non-existent in existence. They will agree with anybody about anything Ibid, it is well known, writes his editorial articles in invisible ink on pure ether, but tears them up first. He likes to talk about the Democratic platform of 1932 because, like it was fictitious and about the governmental surpluses that used to be because, like him self, they are invisible. Let us have more about Editor Ibid's quaint sayings; the Brothers Grimm

A KILKENNY CASE

(Providence, R. I., Bulletin) In New York the other day little Frances Kil-

kenny was brought before a city magistrate on the charge of selling magazines in the street. The complaint was entered by one of the board of education's "attendance officers." who, we suppose, are the same officials who used to be known truant officers. He enlisted the service of a policeman, who refused to arrest the girl but greed to take her to court for an inquiry.

It developed that the father of Frances is on

relief and that there are nine other children in the family, and that the girl was trying to earn 16, the minimum working age, but it proved later that she was only 15. But she is a high school pupil and could not be classed as a truant because the was out for the Easter recess. The magistrate onsidered it a trifling matter and dismissed the enarge, but the school officer insisted on rearrest irl on the ground that her quest for pin en in vacation time, was a violation of the con ulsory education law.

Behind The News

WASHINGTON. April 20-Unless Congress changes its mind and restores to the Labor Board's appropriation bill the \$45,600 which was to have paid the board's research division next year, the famous finding in the "little steel" case may fall to the ground of its own

This was the biggest case the board ever handled. The finding, just upheld by the Supreme Court, directs reinstatement and back pay for thousands of former Republic Steel strikers. But if the research division doesn't get its money, there will be a big hitch.

The job of seeing that the finding is put into effect is enormously complicated, and it's the research division that has to do most of it. It plans to open five sub-regional offices and take on extra help, and figures the job will take all summer. But the next fiscal year bill "is not in accord with the present policy of the Crackers begins July 1, and as things are now, the division's Department of Justice." money will then be cut off.

Sharing The Comforts By R. C. Hoiles Of Life ---

IS IT POSSIBLE FOR CAPITAL NOT TO

There probably is no way of absolutely demonstrating to an individual the fact that the benefits. resulting from capital are always passed on to the workers, any more than it is possible to demonstrate to a man that water always seeks its level.

In both cases, however, no exceptions can be found.

If there were some way possible in a free country that the benefits accruing to the society by production could be preserved by the producer, certainly some ingenious owner of capital would have discovered this method. It is a law of economics that any benefit or obstacle that is universally placed in front of producers, sconer or later, willy nilly, must be passed on to the con-

If there were some way for the owner of capital to get all the benefits of capital, certainly one concrete case could be pointed out.

It is easy to see that the manufacturers of automobiles, radios, telephones, the great store keepers, the great transportation companies, have all been obliged to pass on to the consumer, sooner or later, whatever advantage accrued to them from more efficient methods of performing the service they were engaged in performing

Just as it is logical to conclude, because no man has ever been able to find an exception to the law of gravity or the law that water seeks its level, so is it logical to conclude that since no man has ever been able to find any exception to the rule that the benefits of capital always, sooner or later, because of competition, willy nilly, must be and are passed on to the consumer.

For this reason, it is of the utmost importance that none of the following be put into practice: Laws that cause a great number of people to be unemployed or that prevent the owners of capital from selecting the right man for the right job; Taxing laws that retard the accumulation of

Or, an unnecessary number of men on the payrolls of the government who do not produce wealth but consume it.

If these laws are put into practice, they retard the accumulation of capital. And, inasmuch as no man has ever been able to cite a case where more efficient capital was not, sooner or later, passed on to the consumer, it follows that the consumers (and they are mostly workers) should be vitally interested in the accumulation of capital.

If every working man could be led to understand this, the above mentioned laws and customs would not be in existence.

NO PARTY LINES

There certainly should be no party lines now between Democrats and Republicans. The new alignment will be whether the voter believes in free enterprise or whether he believes in state socialism.

Of course, those who insist on more and more government control will not admit that they are socialists but, whether they do or not, the man who believes in returning more nearly to the aspirations set forth in the Constitution-equality of rights for each man to pursue happiness-will vote against the party that sponsors measures like the New Deal has sponsored.

And those who believe in more and more the government taking from one and giving to another and regulating the lives of people, will vote for the New Deal

But every student of history, every man who will answer questions about the theories he is advocating, well knows that prosperity comes when the government limits itself to policing he painted the Marx brothers—when Zeppo was still with the gang—as power and, figuratively speaking, keeps the highand byways open so that each man of genius can create and get the fruits of his own labor. SUPPORTING THE LAWS

It is rather disheartening to see the President of the United States condemning Senator Tobey of New Hampshire for advising people to violate the law when the census taker comes around, and to remember that on July 5, 1935, President Roosevelt wrote to Sam Hill, of the House Ways and Means Committee in regard to the Guffey Coal

"I hope your committee will not permit doubts as to the constitutionality, however reasonable, to block the suggested legislation.

It is evident from the above inconsistency that the President thinks the Constitution is of less value than laws passed by the legislature.

THE MAD HATTERS

Around Hollywood

By PAUL HARRISON

HOLLYWOOD, April 20-A redheaded artist with a malicious sense of humor is getting a lot of fun out of his hobby of caricaturing the movie stars. Considerable money, too, because if an actor doesn't want to buy his portrait, his friends usually bid for it.

John Decker's trick is transposing the face of a living subject to the body of somebody in a famous printing. Currently the town is of somebody at Decker's "Victoria snickering Regina" because the face is that of lbous-snozzled W. C. Fields. Similarly the head of Harpo Mark tops the figures of the elegant "Blue Greta Garbo is Raphael's Boy"; Greta Garbo is Raphael's "Mona Lisa"; Mickey Rooney's tough mug is set on a Van Dyke

foppish boy's figure.

The artist won't do these caricature-composites according to any ideas but his own, but the stars usually like 'em. First one he did was George Arliss as Whistler's portrait of Carlyle—a huge canvas that Arliss put over his fireplace. Next Rembrandt's Burgomeisters. They were so delighted that they ordered four additional copies, one as a gift for Director Norman McLeod. Groucho says he built his new home around his picture.

FIELDS BALKS

Fields wants his Queen Victoria portrait but hesitates to pay the price, though he was an guest at the unveiling held in Gene Gowler's office the other day. Over at Panhandle a bunch of old boys have paint-smeared hands and every once in a while they knock the hide off or pull out a splinter, but they are making headway on the boat they are building. The boat-builders include Postmaster Lloyd Waldron, Henry Deahl, Layle Gilkerson, one of the Farlows, and possibly one or two others. The professional kidders of Panhandle tell that the plains admirals started building their boat in the basement of the Panhandle bank building, and that when they got the framework up they decided to move it but couldn't get it out of the place and had to take it apart, but the truth is that they built various parts in the building and carried them out piece by piece. It won't be long until they'll be going on fishing trips to Lake Kemp, and to Lake McClellan when it opens. The boat is 18 feet long

Well, Tony, we're sorry about those other letters. . But, we thought that business was all over. . However, Tony, we have no bone to pick with the fact finders for just turning in their report. . For instance, could use the paper to wrap up city bonds as they fall due. . . I gness you know, Tony, that fer obvious reasons we never could get excited about the fact-finders' information. But, Tony, that's water over the dam now, so let's just forget it. By the way, Tony, I saw Tom Dewey over at Amarillo the other day and he told me to ask you, "howza tricks?... Yeah, Tony, he's still the same old Tom.

DESKIN Wells, the Wellington editor, who refers to himself facetiously as candidate No. 63 on the list of congressional candidates, but who vows he will move up to No. 1 post by election time, was in Pampa over the week-end. . . Deck says things are looking up for him, and usual mile-wide smile was stretched to probably a mile and a half over the congressional outlook. ...Mr. Wells is getting around among the folks.

R. S. Deitz, a former publisher of The Pampa Press, was in town Saturday night and dropped by the office to say howdy.... He has forsaken the newspaper business and now is engaged as a fur-niture manufacturer in Fort Worth .. He has found out, he says, that making living room suites in Cow Town is more prefitable than selling advertising space in Pampa.

GETTING back to Mr. Wells, the candidate—we understand he will not carry any kind of ballyhoo with him on his campaign tour of the district.... If we had our way, which we haven't, it would be unawful for a candidate to take anyhing along with him on campaign trips but himself... He would have to talk turkey to the people along the lines of what he could do to better serve them, and he would not be permitted to cause them to forget about the issues by tickling their amusement palates with a lot of theatrical hokum.

It's a fine kettle of fish when candidate is elected to office simply because he was lucky enough to have had a guitar-strumming stooge who could play a tune hotter and sing louder than an epponent could talk on issues that affected the people.

THE day when issues are with sore throats and tonsillitis to be decided wholly upon their which may interfere with their numerits—and not upon political expediency-may be fur, fur away And, when it politicians will find themselves and to a competent ear, nose and throat their road-shows playing to empty seate which will be as it should be

It is just possible that the name of a Pampa man may be tossed into the race for the state senate. . . . So far, Curtis Douglass, Panhandle, and Max Bover, Perryton, have the field to themselves. The Pampan we have in mind has had his family represented in the senate before.

Pettengill LIGHT YEARS Democratie Congressman

From INDIANA What About Aliens?

Congressman Dempsey of New Mexico, Senator Reynolds of North Carolina, and a number of other Senators and Representa-tives have bills pending which deal with aliens, immigration, deportation, espionage, etc. In addi-tion, Federal Judge Welsh of Philadelphia has issued warrants for the arrest of agents of the Dies Committee on the ground that by raiding Communist head-quarters, they have invaded the civil rights of a Communist candiate. Judge Welsh expressed the United States Supreme Court an authoritative decision.

Without prejudging the Philadelphia case, it is appropriate to discuss the broader questions involved.

Leaving for a moment the rights of American citizens, two phases of this subject are as clear as sunlight. We can deal with these without raising any question of civil rights under the Constitu-

First, aliens are not citizens. They are the guests of this gov-ernment and have no more rights than the ordinary guests in a house. Congress has the power to exclude them altogether, or to state under what terms and conditions they may enter this country. In addition Congress has the power to order them deported at any time for any reason or for no reason.

No constitutional question is involved. The only question is one of our own policy, both domestic and international. Congress or any State may constitutionally provide that no alien shall own land, that he shall not possess firearms, or become a citizen, or hold office or vote, or be employed on public works, or receive relief at taxpayers' expense. We are not obliged to support aliens. We attempted to cover this to some extent in existing law by provid-ing that an applicant for admising that an applicant for admis-sion to this country must furnish convincing proof that he

apt to become a public charge.

If an alien anarchist or atheist is deported he has no say that his right of freedom is infringed. We may require all aliens to be registered, and finger-printed. All these matters have been decided by courts of this country.

Similarly, it seems plain Congress can also provide that no alien shall discuss political quesalien shall discuss political ques-tions on the platform, in the press, or by radio, or belong to any political organization or party. Second, paid agents of foreign powers Certainly no alien can claim any right to proselyte or propagandize for a foreign coun-try or party. We don't even have to admit a foreign supessador if to admit a foreign ambassador i we don't want to. And on one oc-casion when a British Ambassador once undertook to urge the re-election of a President. same President-Grover Cleveland-ordered him to leave the

rountry.

It seems plain, too, that if an American citizen undertakes to act as the paid agent of a foreign power we have a sovereign right to protect our own institutions. ideals of government, and freedom of action from him principal. It would be an intolerable situation if we had to submit to the propagation of alien philosophies by anyone acting for

a foreign power. So, as far as aliens or paid agents of foreign governments or political parties are concerned, I confess it is difficult for me to shed tears for their "rights" to tear this country down. They have no such rights. They have more rights than spies.

With a native-born or naturalized citizen not in the pay of a foreign power the situation is dif-ferent. He is protected by the Constitution. The Gonstitution gives him the right to advocate openly amendments to it. If example, an American citizen were to advocate an amendment to the Constitution whereby all property would be confiscated. Congress and the courts would be abolished and all legislative and indicial power be transferred to the President, and were to do so openly, no one could object to his advocacy even if the result of the amendment, if adopted, would convert this country into a dictatorship.

If he could convince a tional majority of the American voters that his amendment should be adopted, and we could not con-vince them it should not be adopted, that would be our hard luck That is the democratic proc The people may peacefully a lawfully change their form government in any way the choose. And that right must I

respected by all.

But for citizens to plot and work underground to change this government by force is a horse of a different color. We have the right to require them to work in right to require the open just as we have the right to require lobbyists to registright to require the requirement of the requirement ter and say who are paying t Americans who believe in judgment, they should exercise them.

Pampa Attorney **Plains Director** For State Bar

W. J. Smith of Pampa is the 18th district director of the newly-created self-governing bar of the state The Pampa attorney was appointed Friday by the supreme court, and will attend an organization meeting to be held at the Austin hotel in Austin on Wednesday.

As the self-governing bar is an innovation, Mr. Smith's appointment is for the interval between the present and next July, when directors are to be chosen at a regular election.

Rules and regulations governing ethics of the law profession in Texas, as submitted by a Texas Bar Association committee, were adopted by the supreme court, after 3,-831 Texas lawyers had declared in favor of the self-governing There were 40 opposed, and 687 who favored the system with certain ex-

Appointed by the court as officers of the self-governing bar were Angus Wynne, Longview, president; Few Brewster, Temple, vice-president, and 21 directors to hold office until a regular election.

The rules among other things provide a precedure for disbarment of unethical practitioners and de-scribe methods of dealing with cli-ents and the public.

In addition to the Pampa attorney, other directors named included Elmer T. Lincoln, Texarkana, Harly C. Keen of Beaumont, Gor-don Simpson of Tyler, Tom Suggs, Denison, John E. Kilgore, Wichita Falls, L. H. Lowe, Corpus Christi, and M. E. Griffin of Plainview.

Oilers Open Season Against Borger Gassers

Dilbeck Will Be On Mound Here Tuesday

will open Tuesday afternoon at 3 o'clock when the Pampa Oilers ce the Borger Gassers at Road Runner park. The Oiler bosses are ng on every baseball fan in and around Pampa to be in the stands opening day because they want to put to a bid for the attendance trophy to be presented the team having the largest opening day crowd. Few, if any, of the clubs are ready

to go but ready or not the lid will be lifted Tuesday afternoon, weather permitting, of course. Lefty Rex Dilbeck will be on the mound for the Oilers.
Although not near their full

strength, the Oilers will face Manager Gordon Nell and his Gassers with a stronger team than opened the season last year. Manager Grover Seitz has better and more experienced fielders, better pitching and catching but may be a little boys scheduled to report soon, and won't be long before the Oilers will be ready for all comers. Lose Two Games

The Seitzmen dropped two games to the St. Joseph (Mo.) Angels Friday and Saturday but showed for Thursday and Friday games. Then they go south to return May 3 9 decision Friday afternoon for the first night game of the and a 17 to 4 battle yesterday afternoon in a duster Several promising rookies bobbed

up during the two games. Outstanding probably was the playing of Phil Potter of Hammand, Ind., who played a good game in the outfield and hit sensationally. On Friday he bagged a home run, double and two singles and yesterday he hit a Merle Adams, rookie first base-

man who was in the outfield, was vesterday's hitting star along with Malvica, veteran shortstop. Each collected a double and two singles. Joe Fornasero, outfielder, who hit a double and single Friday bagged a triple yesterday. Seitz Has Worries

Manager Seitz has a worry in that so far he has been unable to uncover enough players who can hit and also field. When one shines afield he has shown a weakness at the plate and the hitters have appeared weak in the field.

Old time hickory weilding was demonstrated yesterday by Moore and Glunt of the Angels. Moore bagged five hits on five trips to the plate, including two doubles, luding two doubles. Most of the Oiler pitchers came

through in pretty fair shape. Parrish was the victim ow a withering attack Friday while Mosley was on the firing line yesterday. He was ripped up by five errors, however. The work of Cullum was probably utstanding. He showed a nice fast ball and a good curve.

The season will officially open ruesday with Borger here for two

Riggs Beats Guernsey To **Enter Finals**

HOUSTON April 21 (AP) - Irrepressible Bobby Riggs brought out his greatest shots today to conquer poker faced Frank Guernsey in the emi-finals of the River Oaks tenis tournament here. The national champion needed ev-

Guernsey beat Riggs the last time they met—in the Seabright tournament last year—and Riggs knew he had a tough job on hand to beat the mite champion of intercollegiate tennis.

The match started in favor of the 24 year old Rice Institue player. It took nine games for Riggs to assume the lead, 5-4, and in the tenth game he had set point and lost four straight to the unsmiling collegian. Riggs finally won in 14 He ran out the second set con-

What does that now-familiar phrase "Member of the Federal Deposit Insurance Corporation" mean to you? It means that your bank is one of 13,600 of the country's 15,000 banks which have qualified for F.D.I.C. membership. Each depositor in an insured bank is protected against loss to a maximum of \$5,000 of his total deposits.

The federal government itself does not guarantee bank deposits. The government contributed \$150,000,000 to the capital of the F.D.I.C., but is not under agreement or obligation to contribute anything further. The banks themselves pay the entire cost of deposit insurance, being assessed one-twelfth of one per cent of their average total deposits each year.

Deposit insurance does not make all banks equally safe. Sound management will always be a vitally important factor.

THE TWENTY-EIGHT MILLIONTH FORD CAR

Behind the 28 millionth Ford car, which came off the line April 8, 1940, are other famous Ford "millionth cars": the 25 millionth, produced Jan. 18, 1937; the 20 millionth, April 14, 1931; and the 15 millionth Model T, May 6, 1927. THIRTEEN MILLION CARS IN THIRTEEN YEARS!

Under one management, the Ford Motor Company has built and sold 28,000,000 Ford cars.

No other maker even approaches this total. No other has so many cars on the road today.

How has it been done?

Not by building a "cheap" car. People do not go on buying a "cheap" product for thirtyseven years.

Not by squeezing workers to achieve a low price. The Ford Motor Company took the lead years ago in paying higher wages, shortening hours and improving working conditions.

Not by monopolistic methods. Henry Ford has always encouraged competition. He has made his company's inventions and technical advances available without charge to any one who wanted to adopt them.

Free competition in the industry has presented a constant challenge to find ways of offering better and better value to the public.

The Ford Motor Company holds the lead in total number of cars built and sold because it has met this challenge with more than ordinary vision and skill - backed by a set of business principles which the American people respect and approve.

As these 28,000,000 cars have been produced, the company's experience has continued to accumulate. Its facilities have continued to increase. Profits have been consistently turned back into the business to provide the means for offering still greater value.

The Ford Motor Company today knows how to build a better car than it has ever built-it has the resources to build it - and it is building it.

In the few moments it takes you to read this, half a dozen of the finest Ford cars that have yet been built-part of the twenty-ninth million-will come off the assembly lines. FORD MOTOR COMPANY

GREAT VICTOR HERBERT' STARS TEXAN

Musical Booked At LaNora; **Crown Shows Adventure Film**

By BROWNWOOD EMERSON

A Texas girl, Mary Martin, musical comedy star, is teamed with Allan Jones and Walter Connolly in Paramount's musical romance, "The Great Victor Herbert," showing at the LaNora Wednesday and Thursday.

It's a story of the gay days of the turn of the century the great Irish-American composer ruled Broadway and the star of his operettas were the toast of New York. There's 28 of Herbert's song intersperced in the picture, including "Ah! Sweet Mystery of Life," "I'm Falling in Love with Someone," "March of the Toys," and "I Might Be Your Once-in-a-While."

There's a novel plot in RKO Radio Fine Arts "Isle of Destiny," photographed in Cosmocolor. Story deals with a society girl, a round-the-world flier, captured by gun-runners. It's swashbuckling tale of adventure, with June Lang causing plenty of heart-interest for two fighting leathernecks.

The cast is headed by William Gargan and Wallace Ford as the marine buddies; June Lang as the flier; Gilbert Roland as the smuggler of munitions and pearls; and Katherine DeMille as a jealous native wife, adept at hitting the mark with the poisoned darts of her blow gun. At the

Lon Smith Will Retire At End AUTOMOBILES Of Current Term 62-Automobiles for Sale

AUSTIN, April 20 (A)-Lon A Smith, 71, chairman of the Texas Railroad commission and a member of that body longer than any other man except the late Allison Mayfield, announced today that he would retire at the end of his current term January 1.

The race for Smith's place on the important, three-man commission important, three-man commission, probably will draw more entrants than any other 1940 contest. The list already includes Sen. Olan R. Van Zandt of Tioga, Olin Culberson, former commission official, Pierce Brooks of Dallas, runner-up in the 1938 lieutenant governor's race, Rep. Ross Hardin of Prairie Hill, John D. Copeland, Jr., former commission official, Baker Saulscommission official, Baker Sauls-bury of Pampa, William H. McDon-ald, former land commissioner, Frank Holton of Houston, Carl Nesbitt of Mineola, Howell Cobb of Brady, John Paul Jones of New London, Larry Mills of Dallas and Ray Motley of Waxahachie.

Smith, railroad commissioner since Jan. 19, 1925, and former Rusk county clerk, state senator and state comptroller, said he asked only "that I be remembered as a 'servant worthy of his hire'." "I desire no greater reward," he continued, "and deserve no greater
