## An Easter Message

By Rev. Walter Bartholf, President Bailey County Ministerial Alliance

Easter really comes to the one whose heart is in tune to receive the message from God. We have no record that Easter came to Pilate, Calaphus, or any of the mob which shouted "Crucify Him, Crucify Him" just a couple of days before the resurrection of Jesus from the grave.

Easter has many meanings in the culture of our times. Spring is here, plant life begins its apparent new year of life, determining of fashions in clothing, the Easter Bunny makes its appearance, eggs are dyed many colors and hunted by children, and many others can be listed, Unless one has really considered the events lead-

the Easter Bunny makes its appearance, eggs are dyed many colors and hunted by children, and many others can be listed,
Unless one has really considered the events leading up to Easter, I doubt if one can really understand the full meaning which the resurrection holds for him. The events of the last week seem incredible to us to-day. Palm Sunday-Triumphant entry into Jerusalem with the multitude proclaiming Him as the Messiah; cleansing of the House of Worship; Extra-ordinary teaching regarding true obedience of teachings of Jesus, Judas turning trattor; Last supper in the Upper Room; Carden of Gethsemane's agony of Jesus, yet his commitment to serve the will of God, arrest of Jesus; Mockery of a trial with multitude crying "Crucify Him" histead of Hailing Him as Messiah; Pitale's sentence; crucifixion on Calvary; taking Him from the cross and the placing of the body in a borrowed tomb; the apparent end of Jesus of Nazareth, discoveraged and defeated disciples and friends of Jesus. Then, early on the first day of the week as some of the close friends of Jesus of the back present of the latter of the latte

We wish to thank those who came in during the "Garden Fait". To go into the history of the garden fair is to you ket some three years sheen the effort was made to interest people in gardening. Not only the old timers who are more or less familiar with climatic conditions but the new comers as well. The purpose of the garden fair is to meet, compare new ideas, swap some of the old methods, or see the new items that go to make gardening more enjoyable, convenient, or otherwise more profitable. The thought that a person gardened last year so thereby that qualifies him as an expert is quite wrong. To meet and discuss some of methods practices, and material that one person has used successfully and then to pattern from that and adapt it to our own situations.

Lather Burbank devoted most of his lifetime to the plant world. Indoubtedly be realized that he could learn considerable that had not been thought of. There is always a challange, as well as some disappointment, in the world of plants, Nature, by necessity, has become a rather ruthless proving ground and only the better adapted can survive, Ruthless, maybe-effective, veryl we often wonder why we do this and that and the other that we think is entirely proper for the plants and then have them die or not do as well as we would like, If the plants could talk they could tell us some of the things that we do not know about the general well being that they need to survive, if plants could talk some would still have to latk very plain all the plants could talk some would still have to talk very plain and he will be some language like Ederstand. There we come may varied factors that enter into the things that a plant has to put up with and the methods that we have of measuring them are so inadequate that it is a wonder we get along with plants as well as we do. As one example, how do we explain the difference of fruit trees losing the fruit at our temperature reading of 22 when it is very dry and still the same fruit will stand our measure of 26 degreewhen the air is moist or saturated with moisture.

To sum it up we might be the considerable to be learned,
