It is already the landlord 557,000 families. More than 6,-428,000 people, counting 4 to a fam-ily, will be grateful for low rent given in exchange for votes for the party. 1,600,000 landlords will lose income through government com-petition- and 40,000,000 families will be poorer by an average fed-eral tax of \$414 to pay the subsidies, federal and municipal taxes and operating losses, plus interest and salaries of bureaucrats. Local municipal taxes must be raised to provide schools, fire-fighting, po-lice, street, disposal and other say-

vices. Government housing requires the municipalities to grant exemptions from local taxation.

PERRYTON -(Special)- An office of the Texas Employment Commission, headed by Charles Warner of Borger, has been set west of town to care for wheat harvest needs in Ochiltree and Lipscomb counties in Texas, and Beaver and Texas counties, Oklahoma.

The Ochiltree County Commissioners Court has provided water, lights, showers, and ample parking space on the rodeo grounds outside of town where all harvest equipment will be assembled. The Chamber of Commerce has also provided a public address system over which all announcements and calls for laborers and machines will be made.

At the present time, there are about 60 combines, possibly a hundred trucks and more than 200 single laborers waiting in Perryton for the harvest to open.

Men and machines have been pouring into Perryton for the past week until now there is an acute shortage of room accommodations in town.

The harvest headquarters out of own was set up to help accommodate the translent workers with water, bathing, and toilet facilities, but many of them are nearly destitute, and are seeking any type of job to make their meals til they can begin cutting wheat. Due to recent heavy rains, the harvest in Ochiltree County cannot open before tomorrow and the heavy part of the harvest will not open before the end of the week-provided no more rain falls. But with 350,000 acres to be week harvested in Ochiltree County, 182,000 in Lipscomb, and numerous acres in the two Oklahoma counties, it is believed that all ma-

chines, trucks, and laborers will be utilized as soon as the weather will permit. Elevators in the Perryton area have moved most of their government-stored wheat; however, when the harvest gets in full swing,

will be filled in four or five they days, grain men said. It was estimated that local elevators will be able to handle around 3,000,000 bushels in this county. Another 3,000,000 bushels can be stored in quonset-type storage huts on individual farms; but the remainder will have to be stacked on the ground until more

space becomes available. One striking feature of the huge harvest army in town is the way the transient workers cooperate with one another to pass along the information about where trucks and combines are needed, where jobs can be had, and urgent mes-sages from home. Practically every state in the Union is represented in the Perryton area, and many of the workers are college students working to grub stake themselves through school next

O, YE AUDIENCE-The piece I wrote the other day about children more or less toeing the line brought mixed comments to my ears. (Honest, folks, more than once I've heard myself and my column discussed. If I heard a few comments, there just must be many others that I don't hear. That means I've got an audience, like Berle, or Crossy, or the Curbstone Farmer.) ... Well, I've come onto another little thought or two ... and here it (or they) is (or are):

WHEN JUNIOR takes dad's screwdriver and dismembers everything capable of being unscrewed, it might be a good idea to show him how to change the washer in a leaky faucet with the aid of the screwdriver. If Janie sticks her finger in an electric socket and scares both mama and dad half to death, it could be that, by show-ing her a burned out fuse, the fusebox, the electric meter, and trac-ing the wiring through the house, she would know both the dangers and wonders of electricity and wouldn't run in terror when you asked her to help you plug in the vacuum cleaner ... All this is in the way of saying that Junior and Janie aren't nearly so "dumb" as adults seem to think, and their curiosity on the A-bomb, scelatific phenomena, and how things work in general is normal growing process which should be satisfied ... Therefore, guide curiosity of children, for it could be very dangerous ..., as in the case of the light socket,

What's Your Opinion?

... Heres a litle matter that Im going to say something about today, and its probably none of my business but since Im a tax payer and voter, Id just like to give my opinion of the thing. ... Ive been aiming to say something about this ever since I read in the paper where the City was going to drag your car off to the pound if they caught it on violation in the parking zones . . . now that was a pretty broad statement to make to the ordinary run of citizens, who after all are not Ph. 2466J Off. 866 Ph. 1169J too criminally inclined toward our laws . . . especially the parking ordinances . . . in fact after that piece came out in the paper several of my farmer friends from out of town told me that it looked like Pampa was trying to drive them away . . . that mabey the merchants here in Pampa didn't want their trade . . . naturally I done some tall talking, and

told them it was probally more of a bluff than anything else, is one of the chronic violators . . . but this will start all of these old country boys to thinking again . . . what if you came to town to do some shopping . . . or mabey to see your Your listing Doctor . . . and you parked your car towntown, and you put your nickle in the meter for the 60 minutes parking . . . but something happened, and you failed to get back on time . you'd feel kind of funny if your car was gone . . I no I would . I think the parking meters are a fine thing for a tow of this size . . . they keep people like me from taking up parking space all day . . . they give people with some business in our town a place to park and take care of that business . . but the best thing they do is to bring in about 32,000 dollars a year in revenue . . . and if it wasnt for that 32,000 dollars Corner Lot \$900.00 in nickels every year, our taxes would probably be higher . Can be two fine lots. lets leave the meters like they have been, and not haul off no more cars . . . I thought makey we made some kind of a White Deer Remistake when we quit giving our visitors a courtesy card anyway this is my own opinion and probably wont amount to 116 S. Cuyler Ph. 3373 anything . . . but 32,000 dollars a year in nickles is not FOR SALE - 60°x126° corner lot, Benedici Annex Addition. Also rose building rock. Call 663J after 5 p.m.

... how about going into the ice cream business ... you no how these people here in Pampa love ice cream ... and the main season is just starting ... weve got one of the nicest Malt Shops, and its for sale ... is the Stafford Malt Shop, and its located at 508 South Cuyler ... circum-stances beyond our control forces us to sell ... if interested in getting in a profitable business of this type that is practically all profit, come in and talk it over ... it can be hought worth the money ... would even con-sider a good automobile in on the deal ...

. Got a letter from County Attorney John Studer today, and I couldn't figure out why John would be a writing me ... I was about half afraid to open it but I did ... you no what was in it bet afraid to open it but I did ... you no what was in it bet it afraid to open it but I did ... you no what was in it bet I did ... you no what was in it . a good luck chain letter . . . I wish people would quit 116-Farms, Tracts, Ranches sending me stuff like that ... I soent the whole day writing 12 copies of that letter, besides the 36 cents I was out for postage ... Were got two nice houses out on North Sommerville that Bell was accessed to major oil coo. \$1.00 a. rental. Priced \$30 per scre. Write B. H. coo. Panna News.

we now sell . . . and they're priced very reasonable.

... speaking of that chain letter that I got ... its been over 72 hours and nothing's happened yet . it said Frank Roosevelt was elected president 36 hours after he got his ... FOR SALE

, you no when it comes to selling good houses that Jim Arndt is in a class by himself . . . hes getting to be as good as I used to be in my younger days . . . mabey better . . . any way Jim was just in with a new listing on a completely furnished 3 bedroom home, and he is really enthused about it and when Jim gets worked up over something its really good . . this 3 bedroom home is a good one . . . its been well taken care of . . . everything about its good . . . and Jim says the furniture cant be beat anywhere, even on down to the console radio . . . says the owner is fixing to take a big licking just on the furniture . . . now if youre wanting to buy a good home, with everything in it ready to move in, get ahold of Jim, and he'll be glad to show you this nice place . . It will take about 3500 dollars in cash to handle the deal . . .

... weve got a good wheat farm not to far away from Pampa that can be bought worth the money . . . its even got some grass land on it . . . would make someone a dandy home for the balance of their lives . . , lays right in the new oil trend NE of Pampa, and its priced worth the money . . . owner will give ed with all the accessories one needs for safe immediate possession . . . its leased for oil now . . .

this year as we have more meters. . . .

... Id better shut this thing off ... seems when I get to talking I dont no when to stop ... and this talking that Im doing now is expensive ... every time I open my big mouth in this paper they buy some more equip-ment ... sometimes I wonder whether I'm working for the paper or Uncle Eam ... anyway ... when you read this go to Church. You'll feel better the rest of the day.
