

Happy Coal Miners Returning to Work

WASHINGTON—(AP)—The signing of a new contract sent soft coal miners swarming back to the pits today—ending a serious threat to the nation's economy and promising peace in the coal fields for months to come.

Ranger Asked To Aid Search For Brother

DETROIT—(AP)—Texas Ranger Smiley J. Moxley has been asked to come to Michigan and assist officers in their search for his brother, Guy J. Moxley, 41, of Plainview, Texas.

The Texan has been missing since March 23, 1949, three months after he was married.

Yesterday police cleaned up the home of Mrs. Constance Moxley, 2, in suburban Wyandotte after digging in the cellar for clues to her missing "lonely hearts" bridegroom. They found nothing — to the accompaniment of jeers from Mrs. Moxley — and abandoned the digging late Saturday.

Detective Lt. Larry Eastman said he would seek to bring the brother to Michigan to aid the search. It was the Texas Ranger's reported fear that his brother had been slain that led police to obtain a search warrant and make an inch-by-inch search of the house.

Officials said thrice-married Mrs. Moxley failed to report her husband missing until five months had passed. They said she told them, "I don't see why you want him — I don't."

Clad in a brilliant plaid wool shirt, green socks and brown slacks, Mrs. Moxley went about her household work as police crews dug with sledge hammers and picks in her basement.

"What are you digging for?" she joshed the officers. "You'll never find anything there."

Previously one of her former husbands had reported that she kept her dog tied to a big stack of lumber in the basement and would not let members of her family enter the room.

Mad Knifer Slays Four In New York

NEW YORK—(AP)—A 19-year-old youth, just released from a hospital for the criminal insane, slaughtered four strangers and stabbed three other persons in a ten-minute rampage through crowded Brooklyn streets yesterday.

The mad knifer, William Jones, finally was taken into submission with gun butts after police pursued him along three blood-trailed blocks.

Jones, turned loose as sane last Wednesday, wouldn't tell police what made him grab a 14-inch carving knife from a restaurant and rage through the tenement district slashing at the heart of every passerby.

The four who died were men whom Jones apparently never had seen before.

But one of Jones' other victims, a 20-year-old man, was a friend and neighbor. Jones cut him as the victim raised a hand in greeting.

Terror spread through the Brooklyn neighborhood as reports of a madman wielding a knife dripping with blood came from one street — and then another.

People stood frozen on the sidewalks, horror-stricken and helpless as the mad knifer pulled his knife from hiding, struck from behind and piled up his bloody toll.

Other people fled, screaming. Two policemen were finally caught up with the knifer. Jones lunged at them with his bloody knife, but they beat it out of his hand and slugged him to the sidewalk with gun butts.

Blaze Destroys Dallas Theater

DALLAS—(AP)—The Fair Park theater was destroyed by fire early today.

The theater, near the state fair grounds, had been operated for a month as a movie house for Negroes. This had stirred a slight controversy in South Dallas which has been having racial troubles over a long time.

"We haven't found any evidence of incendiaries," Fire Chief C. N. Penn said, "but we are going to give this thing a close investigation."

Former President Of France Succumbs
PARIS—(AP)—Former president of the French Republic Albert Lebrun died today. He was 78.

Lebrun was elected president in 1932 and served until July, 1940, when he was deposed by Marshal Philippe Petain after France's defeat by Germany. Lebrun spent the German occupation in retirement in the French Alps.

Sander Testifies Mrs. Borroto Died Before Air Was Injected

TRUCK COLLAPSES BRIDGE—This 34-year-old steel bridge near Marysville, Ohio, folded up under the weight of a semi-trailer truck, which can be seen at one side of the bridge. The collapse only hastened highway department plans to demolish the bridge next summer. Two occupants of the truck escaped injury.

Death Penalty Is Assessed Love Burglar

DALLAS—(AP)—Handsome Fred Felix Adair, Jr., was convicted today of criminally assaulting a Dallas housewife. He was sentenced to death.

Adair is the 26-year-old former bookkeeper accused of a series of attacks on Dallas women. Dallas newspapers dubbed him the "love burglar."

The verdict was reached by a jury in Judge Henry King's criminal district court. The jury received the case Saturday and was ready yesterday with its verdict, but the judge delayed hearing it until today.

The Dallas woman broke down on the witness stand while describing how she was attacked as her two children watched. She pointed out Adair as her attacker.

Adair had denied the charge. His wife and her sister testified he was home sleeping on the night of the attack.

The tall, slender defendant is under indictment on two other criminal attack charges and also has been indicted for burglary.

The jury filed into the courtroom at 8:05 a. m. and announced its verdict.

Adair himself received the verdict with composure. But his pretty young wife, who has been at his side throughout the trial, broke down and cried. A girl tried to comfort her.

Defense attorneys immediately announced they will file a motion for a new trial. They said it will be based in part on testimony of a state's witness, a woman Adair is accused in another indictment of attacking.

The witness had been called to the stand to describe Adair as he appeared in a police lineup. Presumably the jury wasn't to know they were hearing the testimony of another of Adair's alleged victims. But defense attorneys claim that in an aside, just before she stepped from the witness chair, the woman referred to her own case.

TO TAKE LAND
WARSAW—(AP)—Poland will take over large land holdings of churches under a law to be presented to parliament soon. Premier Josef Cyrankiewicz told parliament today.

Coal Legislation Emphasis Shifts

WASHINGTON—(AP)—The emphasis on coal legislation shifted today as the House of Representatives passed a bill to create a study commission which President Truman wants set up to find a way to lasting peace in the mining industry.

The switch from last week's drive for some form of mining seizure bill was caused by the signing of a strike-ending contract.

Some lawmakers, however, still demanded passage of a standby measure.

Humphreys Will Address Teachers
Joe Humphreys, past president of the Texas State Teachers Association, will be the principal speaker at the Gray-Roberts County Teachers Association meeting at 7 p. m. today at the High School Auditorium.

Humphreys is now principal of Abilene High School.

Huey Laycock, president of the Gray-Roberts County Teachers Association, said refreshments will be served following the address.

Sea 'Thing' Fast Losing Its Appeal

DELAKE, Ore.—(AP)—The dramatic nature of this Oregon coast resort's contribution to oceanic "monster" legends today was overcoming curiosity.

Non-holding townsmen may not wait for a bonafide marine enthusiast. After the last of the time being today in a bid to strengthen its shaky hold on the helm of government.

Labor's majority, 148 seats in the last Parliament, shrunk to seven seats in the Feb. 23 elections.

The government's immediate program was disclosed in a speech written by the party's foreign secretary, George VI. The speech, delivered at today's formal opening of parliament, was one of broad generalities, notable for what it did not say rather than for what it did.

Parliament opened with its usual pomp and circumstance. Flashing jewels, gilt and furs brightened auster London in the centuries old pageantry preceding the opening. Thousands of Britons lined the route from Buckingham Palace to Westminster to see King George and Queen Elizabeth drive in state to inaugurate the new body of lawmakers.

The king's speech made no mention of new nationalization of industries, the basic plank in Labor's pre-election campaign platform. This shelving of socialization was an obvious bid for the support of the nine Liberal party members of the new Parliament.

The Liberals had considered supporting the Labor government if nationalization were halted. Clement Davies, the Liberal leader in the house, is expected to speak tomorrow, and his address will be studied closely for a hint of what the Liberals intend to do.

The main aim of the Laborites now is to steer the government through its budgetary problems in the next few months, and for this reason the king's speech reflected a desire to avoid controversy in the immediate future. The legislative program laid before the Commons was a sketchy one, touching only upon such legislation as might stir little conflict.

The king said his new government will do its utmost "to assist in finding a durable solution to the tremendous problem of atomic energy so that international agreement for adequate control and supervision of the production of atomic energy may be secured."

The speech emphasized that the secretary said it is "our duty and our interest to help such areas toward stability and progress."

Brannon Due Tribute From Farmers Union
DENVER—(AP)—The Farmers Union, only national farm organization supporting the controversial Brannon Plan, goes all out to honor its author, Secretary of Agriculture Brannon, tonight.

It will present Brannon its 1949 award for outstanding service to American agriculture.

OLD PROBLEM OF WANT AND PLENTY EXISTING TOGETHER REAPPEARING

WASHINGTON—(AP)—The old farm problem of "want and plenty existing at the same time" is appearing again, Secretary of Agriculture Brannon said today.

Shortages of food which plagued even the big food producing countries during and directly after the war are being replaced by surpluses in those countries, including the United States, he reported.

Yet these surpluses, the secretary said, are very small when measured in terms of needs in undernourished areas of the world.

This picture of the farm problem, from an international viewpoint, was painted by Brannon in his annual report to President Truman.

Stating that poverty and hunger in shortage areas cause political as well as economic instability,

Physician Denies Intention To Kill Victim of Cancer

MANCHESTER, N.H.—(AP)—Dr. Hermann N. Sander testified in his murder trial today that "there was no indication of life, no reaction," when he injected air into the veins of Mrs. Abbie Borroto.

He also said "I never had any intention of killing Mrs. Borroto."

Under questioning by one of his attorneys the defendant said he believed she died of cancer and he so signified on her death certificate.

Asked then why he dictated the entry in Mrs. Borroto's record that disclosed the air injection, he replied:

"I think it is the duty of every doctor to put down on the charts what he has done for every patient whether it has any effect or not."

The 41-year-old country doctor on trial for murder in the death of the cancer-ridden woman said he called for a syringe the morning of last Dec. 4 after he looked at his patient and thought she was dead.

"It was my opinion then that she was dead," Dr. Sander testified in a calm voice. "I can't explain exactly what action I took then. Something snapped. Why I did it I can't tell. It doesn't make sense."

"Did you have any intention of killing Mrs. Borroto?" asked Defense Counsel Ralph Langdell.

"I never had any intention of killing Mrs. Borroto," replied the doctor.

Q. Did you ever agree to kill Mrs. Borroto?

A. I never agreed to kill her. Q. Did you know what you intended to do with the syringe?

A. I do not know what I intended to do with the syringe. (See SANDER, Page 8)

County Races Taking Shape In Hemphill

CANADIAN—(Special)—Hemphill County Clerk, Hiram Park and Sheriff Clyde Risley have announced their candidacy for re-election. To date they have no opponents.

County Judge H. M. (Hes) Wood has announced his candidacy for reelection, also W. L. Helton has filed for the same office. Helton was county judge here from 1931-1937.

Other candidates for reelection are Mrs. Vergia Reagan, county treasurer; Frank Cole, commissioner, precinct one; Raymond Williams, commissioner, precinct three; Cliff Fyeatt, commissioner, precinct three; and Adcock, commissioner, precinct four.

Mrs. Reagan is opposed by Mrs. Celia Roe, Cole by Orla Curmunt, and Williams by J. T. Tipton. Up to now, Fyeatt and Adcock have no opponents.

Orders to Shoot Escapes Given

HOUSTON—(AP)—"Shoot at 'em when they run — and shoot to stop 'em."

That was the order members of the Texas Prison Board gave prison guards today as part of a three-point program to crack down on escaping convicts.

The order came as General Manager O. B. Ellis called attention of the board, meeting here, to the "wholesale" escapes at Central Prison farm during the past two months. During January and February a total of 20 prisoners have escaped from this farm alone.

Services Slated for Houston Sportsman
HOUSTON—(AP)—Funeral services will be held tomorrow for Minor Stewart, 40, Houston sportsman, who died yesterday after a month's illness.

Stewart was born in Galveston and lived in Houston most of his life.

He was known as an airport owner, midjet racing promoter, pilot, and for his real estate interests.

MICHAEL SHIPKOV

U.S. 'Forced' Into Reread, Events Show

By JOHN M. HIGHTOWER
WASHINGTON—(AP)—The United States is being forced into a slow retreat from Russian-dominated Eastern Europe by Communist methods ranging from the expulsion of Americans to the torture of their native employees.

The fact stood out today from a weekend of sensational developments — which included a claim by the State Department that it has finally solved the "mysterious enigma" of how Red police obtain confessions from their innocent victims.

Here are the events bearing on the critical Eastern European front of the cold war up to today:

1. In Washington, the State Department made public the dramatic story of Michael Shipkov, 39-year-old Bulgarian translator who went through a Communist police torture chamber last August and lived to tell his American friends what happened. Shipkov, recaptured by the Reds, is presumed to be either dead or uttering a lie.

2. At Budapest the Hungarian government — possibly in consultation with Moscow — was looking for a new way to reduce the staff of the American legation there. The United States on Saturday rejected a Hungarian request that the staff be reduced voluntarily on the ground that it is a spy center.

3. From Prague came an American embassy announcement that Czechoslovakia soon will order all U. S. missionaries to leave the country.

4. In Moscow the American embassy staff was adjusting to a heavy increase in operating costs, which after July 1 will go up 100 percent. The revaluing of the ruble last week, the Khrushchev special rate for diplomats, cutting the exchange to six-to-one on March 1 and to four-to-one on July 1.

The State Department is convinced that all along the line the Russians and their satellite governments are trying to seal up the cracks which remain in the Iron Curtain. It was in this process that the scholarly Michael Shipkov got caught last August. Shipkov happened to him was one of the events which led to the break in American-Bulgarian relations.

Shipkov's story, unparalleled in the official public reports of this government, covers a 32-hour period last August. During that time he was under constant questioning by Bulgarian security men. He finally broke and wrote out a detailed confession of crimes which he and the State Department denied never existed.

The department linked Shipkov's story with the cases of Cardinal Mindszenty and Robert A. Vogeler in Hungary. It described the pressure put on the Bulgarians as an "apparently hypocritical Communist tactic."

Mindszenty, Vogeler and hundreds of other Red police victims may have been broken.

Shipkov was resigned to imprisonment because he was a non-Communist openly employed by the American legation.

In his 32-hour ordeal, his story related, he was first questioned at length by seven police who (See U. S. 'FORCED', Page 8)

Third Candidate Seeks Precinct 2 Justice Position

Former Deputy Sheriff Carl Tucker filed late this morning as a candidate for the office of justice of peace, Precinct 2, Place 2, making it a three-man race.

Tucker faces two other candidates, G. L. "Nat" Lunford and W. J. Cornellison.

The office was vacated last year by the death of Judge Charles Hughes a few months after he was sworn in by Judge Lewis M. Goodrich along with the other county and precinct officials.

Peron's Party Wins Provincial Election

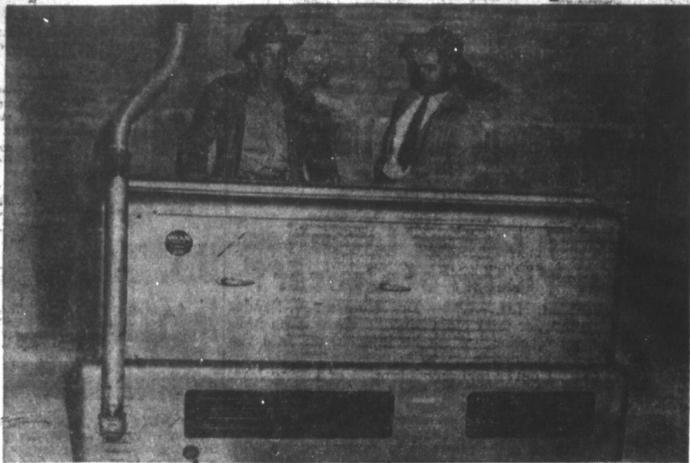

BUENOS AIRES—(AP)—The Peronist party won the elections in Entre Rios province yesterday, continuing unbroken a string of provincial election gains for the supporters of President Juan D. Peron.

WE SAW...

Jaycee-Eltes doing their part today in the current Red Cross fund campaign. They had charge of five booths in the business section of town and solicited from Dollar Day shoppers.

Generator Installed at Highland General Hospital

POWER PLUS AT HIGHLAND GENERAL HOSPITAL—Dee Love, electrician, and Ed Hollis, City Engineer's Department, inspect the new generator that was installed Friday at Highland General Hospital. The generator, an emergency standby lighting plant, kicks on automatically in three seconds in the event of a power failure. It is 25,000 watts, four-wire, three-phase, 110 and 220 volts, and replaces a war surplus generator that was first installed at the hospital.

If Doing Dishes Takes Too Long, Maybe It's the Age of Your House

NEW YORK — (NEA) — If it takes your wife (or your husband) twice as long as you think it should to get the dishes done, maybe you'd better check up on the age of your house.

In that case, the slow dishwasher you're using probably is the result of a house "disease" the architects call obsolescence. Home-planning specialists go further and call it a kind of creeping paralysis of inefficiency.

Reluctant running water, grumbling plumbing equipment, clanking and inefficient heating apparatus, and badly arranged kitchens are some of the symptoms. A national survey just completed by a Minneapolis regulator company (Minneapolis Honeywell) reports more than half of America's 42,000,000 homes are exposed to the ailment, which takes a toll of weeks of unnecessary labor from the homemaker.

Home owners looking for a cure should begin the survey suggests, by making a detailed analysis of what's wrong with the ailing house.

That slow-motion dish-washing, or a tedious wait to fill the tub for a bath, may mean the pipes are full of accumulated lime. Very often the water pipes in a house 25 years or more old have inner diameters scarcely larger than a lead pencil.

Modern plumbing methods make the solution to this one relatively simple. Flexible copper tubing, instead of rigid piping, obviates the need of ripping out plaster to replace the plumbing.

If there's excessive dust and the heating plant may well be the culprit. Stacks of smoke on the walls near radiators or warm air grills may be traced to the same source — furnace cracks and holes. A good general utility man can patch these holes quickly at small expense.

If the heating system seems beyond redemption, a new oil burner can be installed, for as little as \$600. Or the basement ceiling can be covered with wall-board or other composition material to prevent dirt from filtering through.

Drafts, cold floors and hard-to-heat rooms may also be the fault of a 30-year-old thermostat.

Ancient kitchens usually are woefully lacking in adequate storage space and modern appliances which take the backaches out of housework. This doctoring job will probably be the most expensive of all, but can be done little by little. New counters, cabinets and sink would run to about \$700 (a handy husband can save a lot here), while the full automatic

treatment — dishwasher, laundry and garbage disposal unit would add another \$600.

Only \$3,000, including labor, builds this Ranch-Type Six-Room Bungalow.

Possible through our principle of building after 8 years of research. Everything included for comfort and beauty. Not an empty shell: includes plastering, bath, cupboards, closet space, plumbing, radiant heating, wiring and all fixtures ready to live in. Fantastic but true. Send 25c to cover postage and handling for a regular \$1.00 illustrated book showing several floor plans and full details.

Make Most of What You Have in Color

By LORE KENT
WASHINGTON, D. C. — You don't have to go to a conjurer's college to learn how to work color magic with your surroundings. All you have to do is "bone up" a little on the way famous decorators and color engineers employ color to gain the greatest benefit from its use.

Not long ago, famous colorists in the paint industry got together and developed a simple but effective method of using the thousands of beautiful tints and tones now available in a way that's really tops.

Basically, the technique shows a way of making possessions appear to the best possible advantage. It is a method of using color coatings in such a way that the good features of a room, a house, a building, a piece of furniture — or any object, in fact — are emphasized by surrounding them with areas of a different color, tint, or shade so that the good features stand out. A bad feature is minimized by making sure that it matches its surrounding areas and thus becomes less noticeable. This is part of the art of camouflage.

The colorists also placed emphasis on the "way color" can deceive the eye. As an example, they pointed out that a light-colored house and a dark-colored one — of the same size and at the same distance — will not look the same size. The one painted in a light color will seem larger to you.

Indoors, if you paint the walls and ceiling of one room in a light tint and the walls and ceiling of another room of equal size in a very dark color — the light-walled room will seem much larger than the dark-toned one.

Then there's the matter of the colors which convey the feeling of warmth: the reds, oranges, yellows, yellow-greens. These seem to advance toward you and to bring things nearer. The "cool" colors — the blues, violets, blue-greens and blue-grays — seem to retreat and push things away.

Some colors seem heavier than others. The deep ones do, for instance — in comparison to the pale tints. The "lightest" color of all would be consequently be white; the "heaviest," black. Next time you're traveling, notice the suitcases. See if the light-colored ones don't look lighter in weight than the black ones.

And then there's the point about bright colors. The brighter the area, the larger it seems. This isn't all illusion, either. The brightness in a color stimulates the nerves of the retina of the eye. It produces an image that tends to "swell" in dimensions. The "largest" color is yellow. Next comes red, then green, blue, and finally, black.

Small homes can be benefited especially by the intelligent use of all the color tricks in the bag. Because the typical new home today is limited in size, it's usually desirable to make it seem as large as possible as well as to enhance its architectural beauty. It is the detail of the small home which makes it attractive. This has a truly distinctive color scheme. Well-designed doorways, window boxes and shutters are the areas where you can have interesting color accents. They are especially important in neighborhoods where many houses of the same design are built. You're smart, in other words, to "make the most of what you have — with color."

KNOWN AS "RANCH OAK," this unusual, informal dining set is part of a complete line of typically American furniture designed for the ranch-type house. In natural or "dusty" finish solid oak, interesting features are the chair seats and back of laced strips of natural cowhide, the hand-hewn decorative detail, and the round dropleaf table.

Modern plumbing methods make the solution to this one relatively simple. Flexible copper tubing, instead of rigid piping, obviates the need of ripping out plaster to replace the plumbing.

If there's excessive dust and the heating plant may well be the culprit. Stacks of smoke on the walls near radiators or warm air grills may be traced to the same source — furnace cracks and holes. A good general utility man can patch these holes quickly at small expense.

If the heating system seems beyond redemption, a new oil burner can be installed, for as little as \$600. Or the basement ceiling can be covered with wall-board or other composition material to prevent dirt from filtering through.

Drafts, cold floors and hard-to-heat rooms may also be the fault of a 30-year-old thermostat.

Building Continues to Surge Here in February

Building in Tampa during the past month continued to surge, topping February, 1949, by \$248,249.

Total building permits last month issued from the City Engineer's Office numbered 62 as compared with 28 for the same period a year ago. Estimated value of last month's building was \$333,727 as compared with \$35,478 in February, 1949.

Last month permits were taken out for 25 new residences at an estimated value of \$187,750, while the same period last year accounted for 19 new homes.

Three new businesses last month accounted for \$25,750, and five remodeled businesses were given the value of \$11,950. Nine residences were remodeled at an estimated value of \$11,950.

Seven private garage permits were issued from the City Engineer's Office, valued at \$3,650. Eight buildings were moved into town. Miscellaneous permits, including curb removing and foundation work amounted to \$92,277.

Construction has been started on a two-story four-unit frame apartment house at an estimated value of \$15,000. Located in the Sone-McCoy Addition, the apartment unit is being built at 220 N. Faulkner by L. L. Sone.

There were 35 permits issued from the office during January at a total value of \$140,115. January, 1949, a slow building month for Tampa, had a total of 19 permits issued at a value of \$42,672.

Convactor Dampers Regulate Delivery Of Heat to Rooms

Use the damper on your convactor radiator to regulate room delivery of heated air to the exact temperature which is most comfortable. Dampers are easily adjusted by hand. Fully open, they permit a maximum flow of heat through the outlet grille of the convactor; fully closed, they cut off the heat entirely.

Dampers are an auxiliary control to the automatic controls of the central thermostat. Although convectors respond almost instantly to thermostat control, due to the copper or aluminum construction of the heating element, it often is desirable to regulate heat in individual rooms independently of the thermostat setting. This is especially true in bedrooms where a lower temperature is desirable during sleeping hours without affecting temperatures in other rooms.

The damper control also is valuable during mild fall and spring days when only enough heat is needed to take the chill off of rooms.

Years May Tell on Glazing Materials
The grades of putties and glazing materials will fail if improperly applied or not properly cared for after application. These failures do not appear immediately but after some period of exposure and are sometimes interpreted as being due to inferior material. After allowing time for the

Check Items Before Buying An Old Home

In considering purchase of an old house it often is wise to enlist the services of a professional appraiser or other qualified person before making a decision. Most prospective buyers have relatively little knowledge of the finer points of house construction and therefore are incapable of judging correctly the value of an old home.

When the purchase is to be financed through a lending agency, of course, the latter will have the property appraised by specialists before the loan is approved. In a cash deal, however, the buyer is "on his own" in determining value. By having an expert inspect the house the buyer can obtain an accurate estimate of its worth.

There are a number of features which must be considered in determining whether a home is well built. Many are structural details which cannot be readily checked by the average person. Others are in plain view. Among the latter, for example, are the floors. One of the most important parts of a house, they should be strong, durable, attractive, comfortable and easy to keep clean. It is highly advantageous, moreover, to have floors which can be restored to their original beauty at moderate cost after years of wear or neglect.

Floors of hardwood are universally recognized as a mark of quality construction because they meet the foregoing requirements. Builders generally rate such floors as one of the better selling points of a house. Due largely to its distinctive beauty of grain and coloring, oak is the species most extensively used for flooring. Others commonly employed are maple, beech, birch and pecan.

glazing material to set, it is best to paint promptly to seal and protect it. To insure a good water seal when painting over putty, the same number of coats of putty should be applied to the putty as to the seal, and the paint should lap slightly onto the glass. This lapping of paint onto the glass provides a sealing action at the critical edge.

Refrigerator Can 'Take It'

The finish on a refrigerator is subjected to a great variety of severe conditions. Its outer surface is in contact with a hot, steamy kitchen, while the inner one is many degrees lower. The finish must also resist the inevitable hazards of bumps from milk bottles, smears of grease, spills of soup or fruit juices, or energetic scrubbing with alkaline cleaners. The excellent finishes produced for refrigerator surfaces these days take such treatment without chipping or showing the slightest variation from gleaming whiteness.

Seidlitz Paint & Varnish Co. Presents... NEW Multitint PAINTS and Wider COLOR SELECTION... Any of 36 custom-mixed colors, freshly made in just 60 seconds! Guaranteed color uniformity, every time! WSCS of First Methodist Church Slates Japanese Tea for Wednesday

The Women's Society of Christian Services of the First Methodist Church will give a Japanese silver tea in Fellowship Hall at the church on March 8, Mrs. W. L. Boosa will review the book, "The Seven Stars."

Circle One of the WSCS met in the home of Mrs. Charles Wooley, 1200 Mary Ellen, on Wednesday with Mrs. Joe Shelton, circle chairman, presiding over the business meeting.

Letters of appreciation were read from Mrs. C. W. Andrews and the Bethlehem Community Center.

The study on the topic, "Japan Begins Again," was concluded under the leadership of Mrs. R. W. Lane.

Mrs. Lee Harrah discussed "Rehabilitation of Church and School in Japan," and Mrs. W. E. Jarvis spoke on "Entering the Open Door of Japan."

Refreshments were served to Misses E. L. Campbell, Thurman Cline, A. B. Carruth, R. J. Epps, W. S. Epley, R. W. Lane, W. E. Jarvis, W. H. Moseley, Lee Harrah, Joe E. Williams, Joe Shelton, Charles Wooley and one guest.

Mrs. J. E. Kitchman gave the devotional at the meeting of Circle Two, reading poems written by "Christian Japanese. The meeting was held in the home of Mrs. A. C. Stealy, 418 Crest, with Mrs. W. R. Campbell presiding.

Mrs. M. E. Cooper concluded the study on Japan. She said "The lives of the great Christian converts themselves is one of the favoring conditions in Japan."

Mrs. H. R. Van Steekle announced the study to be introduced at the next meeting. It will be "Missions at the Grass Roots."

Mrs. Boosa presided over a short business session and urged the members to attend the Japanese tea on March 8 in Fellowship Hall.

Circle members voted to send a box of used hose and supplies to a girls' school in Japan. She also voiced the wish that other circle members will take used hose to the tea, to be included in the box.

Circle Five will meet with Mrs. Paul Brown on March 15. Mrs. Eben Warner gave a devotional on "Sharing and Giving" at the Circle Six meeting in the home of Mrs. Edward S. Williams, 1144 North Starkweather.

Mrs. Raymond Harrah led the reading of the litany, the group responding.

The study of Japan was continued, with brief discussions on the following: summary on Japan by Mrs. L. M. Hicks; emperor in Japan, by Mrs. J. R. Donaldson; Japan's new freedoms, by Mrs. Joe F. Key; contribution of Western nations to Japan, by Mrs. Julian Key; religious education in Japan, Mrs. Raymond Harrah; women's work in Japan, Mrs. O. L. Statton; Mrs. Bob Curry; music in Japan, Mrs. Clinton Evans; contribution of western churches to Japan; Mrs. R. W. Karr; dream for Japan, Mrs. Ed Williams.

Refreshments were served to 22 members, including two new members, Mrs. Joe W. Black and Mrs. Price Doster, Jr.

There were 13 members present at the home of Mrs. E. P. Hollingshead for a meeting of Circle Seven.

Mrs. Walter Purviance led the study on "Japan," with Mrs. Leon Cook, Mrs. L. H. Bromert and Mrs. H. H. Boynton assisting.

Mrs. Hollingshead had on display linen, china, silver and a doll collection that her sister-in-law,

Grace Friend...

Readers of The Pampa News are invited to send their problems to Grace Friend. Letters not published in the columns will be answered personally provided a self-addressed stamped envelope is enclosed with the question. Writers must sign their names although they will not be printed without the writer's permission.

GAMBLING HABIT HARD TO BREAK

Dear Miss Friend: I am madly in love with a young man who is one of the most charming persons I have ever known. He seems to be devoted to me too and is very considerate at all times.

But he has one trait which worries me when I allow myself to think about it. He loves to gamble and is always betting on all kinds of things. Nothing pleases him more than to be able to take a few days off every once in a while and drive to Nevada to play roulette and those other games. He does this everytime he saves enough money and stays until it is gone.

When I tell him that this is wrong and that he should save his money for our future he laughs and says that money is easy to earn and for me not to worry that he will take care of that when we are married. He says that money is for fun and that the time to have fun is when we are young, that we can save when we are older.

Somehow I just can't believe that his attitude is right and I am afraid my mother will hear of it and I know that she won't like it all and then there will be all of that unpleasantness to face too. Dear Grace, tell me what to do. Do you think that after we are married I will be able to change him?

Naomi

Dear Naomi:

Nothing is harder to destroy than the gambling bug, and you should be sure that it is dead before you marry him unless you are willing to accept the habit with him.

Men who are gambling devotees to the extent you say your fiance is seldom recover from the disease. Marrying him with the idea that you can reform him is very foolish and will bring you nothing but unhappiness.

You will have to make up your mind that he has the fault and that it will come with him when you marry him. If you want him on those terms it is up to you alone. But consider the situation carefully and make sure that your love is big enough to overlook his weakness. If you feel it is and that you can overlook the gambling, it is entirely up to you and no one else at you will have to live with him.

If you feel that you cannot accept it, talk it over with your fiance and tell him exactly what you think about gambling and tell him that you cannot marry him as long as he has the habit. If he wants to try to give up the habit help him all you can. Then after a time, if you are sure that he has changed, marry him.

Women of the Moose Will Meet Tonight

Women of the Moose, a newly organized group, will hold a weekly meeting at 8 o'clock this evening.

At the last meeting the members held their first night with Mrs. Ed Gehring, senior regent, in charge. There were 30 members present and nine candidates were voted in.

Dr. Billie Hollingshead, had sent from Japan.

Mrs. Boynton conducted the business session. An announcement was made stating that each member is to take a pair of nylon hose in need of mending to the tea on March 8. The hose will be mended and sent to girls in Japan. An announcement was also made that a silver offering for the Japanese will be made at the tea.

The next meeting of this circle will be hosted by Mrs. V. Colburn and Mrs. Boynton at 1203 Williston.

Mrs. H. W. Clodfelter discussed "Home Life in Japan" at the meeting of Circle Eight in the home of Mrs. Sam Cook.

Mrs. J. B. Austin presented the last of the study "Japan Begins Again." Mrs. Cook presided at the business meeting and also gave a short devotional, using as her subject "I am come that they might have life within." Mrs. Frank Shotwell closed the meeting with prayer.

Refreshments were served during a social period.

Two new members were present, Mrs. J. L. Farmer and Mrs. Frank Yealey.

Light and bright new shoes are keyed to Spring suits and dresses. Repeating the beige tones of the suit modeled (center) are blonde kidskin sling-back pumps fringed with a small self bow and white punchwork outlining vamp and toe. Slender threads of mauve and raspberry kid wind and cross to form the lacy, high-heeled shoes (upper left) which are ensembled with a chiffon evening gown printed in harmonizing colors. Matching the blue linen sports

skirt, flat-heeled linen shoes (lower left) have an open vamp framed by soft shirring. Soft cinnamon suede walking shoes (top right) shown with cinnamon-checked wool skirt owe their airy look to wide straps which cross the instep and provide good support for feet. Strips of yellow, pink and blue patent leather are braided to make the wedge-heeled sandals (lower right). These sandals are modeled with a pastel sheer afternoon dress.

Jimmy Hills, Alanreed, Hold Open House

ALANREED - (Special) - Mr. and Mrs. Jimmy Hill opened their home Sunday night for a social of the Young People's Training Union group from the Baptist Church after services.

Sponsors for the group were Mr. and Mrs. Lester Carter. Present for the occasion were Lindsey and Sidney Gilbreath, Charlotte Wilson, Earl Johnson, Eugene Worsham, Beth Hall, Jackie Hill, Wallace Cox, Gene Fort, Dorothy Ball, Jeanne Sherrod, Ann Hill, Jimmy Bruce, Mr. and Mrs. Carter and Mr. and Mrs. Jimmy Hill.

Safety Progress In Texas Called

DALLAS - (AP) - C. Reynolds Weaver, member of President Truman's Highway Safety Conference, says Texas has made "miraculous" but not good enough progress in getting away from traffic deaths.

Here for the 11th annual Texas Safety Conference, he suggested a safety program which would (1) follow up all driver violation records, and (2) follow up all accident records.

Weaver is president of the Automotive Safety Foundation and assistant to the general chairman of the president's conference. He made his remarks in an interview.

Kilimanjaro, an African mountain, springs almost directly from the plains, has no foothills, is 200 miles in circumference at its base, and is said to be Africa's highest.

Tanganyika, a British trusteeship under the United Nations in Africa, was German East Africa before 1918.

AT 413 N. FROST PHONE 1063 EFFECTIVE WEDNESDAY, MARCH 8TH

HAVE ALL THE SOFT WATER YOU NEED AT THE TURN OF A FAUCET WITH -

TEEN - TALK

AP Newsfeatures All of our teen-age gremlins tell us that this is going to be a wonderful year for young modems. But we can't help but take a hasty look at teen-age diaries to see what's been happening lately.

THEY KNOW WHAT THEY WANT. Definitely taboo are boys who imbibe too freely, are inconsiderate about keeping appointments on time and who expect to be kissed on the first date.

As one member of the Atlanta Debutante Club says "I don't like wolves or pigs - alcoholic ally speaking." She explains: "Heavy imbibing is one of the most ill-mannered and inconsiderate things a date can do. Some fundamentally nice guys go through an adolescent stage when they think it's smart to drink the week-end around the clock. Why they want to drag a date to a drinking party, I don't see. Usually his conversation gets in a rut and he acts very silly indeed."

Another girl said that the song "Kiss me once, kiss me twice, and kiss me once again" is true to human nature, so why kiss on the first date? She explains: "Lots of girls think a boy won't ask for another date if he doesn't rate at least a good-night kiss, but if they're fundamentally nice boys, they do appreciate knowing you don't kiss every man you go out with. Kisses will mean more if you do fall in love with him."

One pet peeve of the 29 debutante members of the club was the boy who is expected at eight and calls at 8:45 to say he'll be a little late. Also in the taboo category is the inconsiderate boy who doesn't tell his smartly dressed date until he arrives at her home that he is planning to take her to a barn dance.

The girls all think that boys should be able to accept their own responsibilities as far as

dating goes. The man doesn't have to be a genius but he should be eager to develop new interests so that there is a basis for wholesome, interesting companionship.

THEY'RE HUSBAND CONSCIOUS (or people think they should be.) Even the U. S. government offered to act as cupid recently. A Massachusetts girl wrote to the Department of Agriculture saying she was interested in animals and would like to find a job working with them.

Her letter drew a reply from the director of Fish and Wildlife Service. He advised that "although there aren't too many women working with wildlife at present, there will be more in the future. He advised trying a hand at working as a biologist in wildlife work, animal illustration or photographer."

BUT... he said: "one other opportunity which shouldn't be overlooked is that of an interested and helpful wife of a biologist, photographer, refuge manager or other wildlife worker. There are a great many prospective husbands

in this field when you are ready for one."

Are you listening, girls? WHAT THE BOYS WANT... At Fairleigh Dickinson College in Rutherford, N.J., President Peter Sammartino in preparing a course on "Preparation for Marriage" queried the young men on whether they lost respect for young ladies who were too free with their affections.

The faculty found that 84 percent of the male students said they did lose respect for such girls.

The young men were more interested in girls for wives who had personality, good grooming, fairly good education, and who were interesting conversationists and good listeners. They put thumbs down on the too-talky, giggly, pseudo-sophisticated, overly-made-up and street smoking female.

The value of Oregon's forest and lumber products is estimated to be in excess of 700 million dollars annually.

The Social Calendar

MODAY The Eastern Star study Club will meet at 7:30 p.m. Monday in the home of Mrs. W. H. Moseley, 1329 Christine. TUESDAY The Merten Home Demonstration Club will meet in the home of Mrs. T. G. Groves, Humble-Martin Camp, at 2 p.m. Tuesday. B&FW Club will hold a board meeting in the Schneider Hotel at noon Tuesday. Members of Pampa OES will be guests of the Mobeck chapter at 7:30 p.m. Tuesday. Those who plan to go should contact Mrs. Hal Suttle at telephone 1819. WEDNESDAY Holy Souls P-TA will meet Wednesday at 2:30 in Parish Hall, 500 North Ward. First Methodist WSCS will give a Japanese silver tea in Fellowship Hall on March 8. Mrs. W. L. Boosa will review the book, "The Seven Stars."

Thirteen Schools Represented On All-Tourney Cage Squads

WARREN'S WARMUP

By Warren Mason—News Sports Editor

QUESTION: What major leaguer went to bat 600 or more times the most seasons during his career?

BASKETBALL MAY UNDERGO one of its most extensive rule changes at the conclusion of this season as a result of the experimental rules made during the Texas Junior College Tournament at Texas A&M last weekend. The "penalty box" rule, the purpose of which was to keep the stars in the game, was generally hailed by coaches who had teams entered in the tourney.

The rules called for three-minute stints on the bench by players for each foul after four. In the first 15 minutes of the second half such a foul called for two minutes and in the last five minutes for one minute. A substitute was allowed each time so that a player played short as in ice hockey.

The tournament ended with what many spectators called the most thrilling basketball game from start to finish they ever witnessed and brought Lon Morris Junior College through as the surprise champion of the tourney. The new foul rule was responsible.

Lon Morris beat Tyler, the defending champions and also defending National Junior College Champion, 73-71 for the title. During the last 10 minutes of play Tyler had three of its best performers collect their fifth personal fouls and two of Lon Morris' stars did likewise.

Under the new rule these boys served their two-minute "sentences" then returned to help their teams stage a thrilling finish. Neither team could have replaced these boys adequately, which would have meant that under regular basketball rules, both teams would have finished the game with mixed combinations of first and second stringers.

It was a goal by one of the boys that had "fouled out" that tied the score at 66-66. Coach Bob Carter of Amarillo JC said he was all for the new rule and that teams in other sections would be for it when they tried it out. "It works fine, enables a boy to play without worrying about the number of fouls being called on him."

Carter also was enthusiastic about a rule substituted for the current last two-minute rule whereby a team that fouled keeps the ball by getting a free throw then takes it out of bounds. Here the rule was changed to give one free throw then put the ball in play with a jump.

Coach Robbie Robinson of Allen Academy said the penalty box rule did not cause excessive fouling as some thought it might. Hal Albrecht, Southwest Conference official who worked in the tournament, said he liked the rule and hoped it would be put in effect generally. "It is obvious that under this plan a player with four fouls can go on and play his normal style of basketball without having to guard against picking up that fifth foul."

Jewell McDowell, Texas A&M's all-Southwest Conference guard, who has played 30 college games without ever fouling out, wondered if perhaps a player shouldn't pay with a longer sentence in the penalty box for his fifth or sixth foul. McDowell reasoned that "after you've worked to make a guy foul out you like to think maybe you can score better against the next guard they put on there."

There was some opposition. Coach Thurman Hill of Lamar College said he'd rather see a man go out and stay out when he gets his fifth foul "I don't believe in players committing so many fouls, however, I believe a player shouldn't foul unless it's to stop a shot. But it might be worth trying in some sections of the country as an experiment."

One player got nine fouls and served five two-minute sentences. Several got six or seven. Few collected five fouls in the first half and most times the fifth foul came in the last five minutes. Forty-six fouls were the most called in one game with 23 fouls in 12 of 23 games at least one player got five or more fouls.

Marty Karow, basketball coach of A&M, originated the rule. It's a known fact that something has to be done about the penalty rules in basketball and the answer, with some changes. The system has worked fine in ice hockey and may also do the same in basketball.

Pampa Harvester basketball coach Clifton McNeely had a big share in helping the Grand Home Plows win the AAU title at the basketball tournament in Amarillo last weekend. He paced the Plowboys scoring in two of the four games they won in taking the crown in 12 of 23 games at the all-tournament team.

It was McNeely's ability from the free throw line that won the semifinal game for the Plows Friday night against the Wayland College Pioneers. With the score all knotted and 15 seconds left to play, McNeely, with two free throws and earned both with the pressure on to give the Plows the right to move into the finals of the tourney.

Playing on that team alongside McNeely was one of the leading players in the area, J. W. Malone. ANSWER: Nine times Roger "Doc" Cramer went to bat more than 600 times in a season — a major league record.

Pampa Boxers Face Lefors Pirate Mittmen Tomorrow

The Pampa Boys Club boxing team will travel to Lefors tomorrow night in an attempt to avenge an early season defeat handed them by the Pirates. They were defeated by Coach Mac Winter's mittmen in their first bout after the organization of the club.

The Pampa team has come along rapidly since that defeat. They defeated Panhandle the next weekend, and then fought Shamrock to a draw the next match. They dropped the next team match to Wellington and then defeated Krebs last weekend to make their season's record battle.

The fights tomorrow night will be held in the Lefors High School Gymnasium, the first bout starting at 7:30. A large number of bouts is anticipated.

The Lefors team is studded with fine fighters, from the smallest 60-pounders on through the heavier weights. Many of tomorrow night's bouts will be return affairs from the earlier meeting. The rapidly improving Pampa squad will be out to avenge personal losses.

Some of the probable bouts will match Frank Smith of Pampa against either G. D. Redus or Don Maples of the Pirates; Ronnie James against Jerry Herring, in what will be a rubber fight, both owning one win over the other; Claude Porterfield will probably face Bill McFarley; Billy Ed Cooper will be fighting somebody; Tommy White may face Eugene Parks, if the little Pirate slugger is fighting for the Lefors squad; Keith Kelly may face Hugh Bralley; Jimmy Bennett will probably face Friday Todd; Delmar Cox will meet Bill Clemmons and Dick Murray will face Ike Doom.

Those are just some of the probable pairings for tomorrow night, with many more expected to fill out the card.

WARREN'S WARMUP

AUSTIN — (AP) — The best basketball players in the 30th annual Texas High School Basketball Tournament played for 13 different schools.

Sportswriters covering the three-day tournament at Austin last week today announced their "all-tournament" teams in the three-division meet.

Gruber's Leslie Cator and big Kelly Jim Duncan of Cayuga were the only unanimous choices. Gruber, Class B champion, and Canyon, Class A titlist, were the only schools to place more than one man on the teams.

The sports writers' selections: CLASS B: Leslie Cator, Gruber; Lynn Hart, Gruber; Kelly Jim Duncan, Cayuga; Norman Mitchell, Waelder; and James Hatton, Warren.

CLASS A: Troy Burrus, Canyon; Billy McCurry, Birdville (Fort Worth); Joe Abbott, Canyon; Richard Zamora, South San Antonio, and Loyd Kilpatrick, French (Beaumont).

CLASS AA: Doyle Brunson, Sweetwater; Johnny Crouch, Vernon; L. G. Dupre, Texas City; Billy Wood, Austin (El Paso), and Ronnie Sizemore, Corpus Christi.

Hart and Burrus lacked just one vote of being unanimous choices. Sizemore, sparkplug of Corpus Christi's Class AA champions, was the only player the Bucs placed on the all-tournament team.

Gruber won the Class B title by beating Waelder, 43-3; Canyon the Class A by thumping South San Antonio, 49-25, and Corpus Christi the Class AA by defeating Vernon, 40-34.

West Texas teams dominated the tournament, winning two championships, placing three teams in the Class AA semifinals and monopolizing the all-tournament teams.

The only defending champion in the 1950 tournament, Texas City, in Class AA, lost out in the first round to Sweetwater. The 42,000 who saw the tournament last Thursday, Friday and Saturday was 1,500 under attendance in 1949. But the 7,100 on hand for the Class AA championship game Saturday night was a new record. Seven thousand and watched the Class A and B championships decided.

The record book for Class B was practically rewritten, with eight new marks posted. Duncan, 38 points, was the most scored by a B division player in a single game and his 68 for three games was also a new high. Cayuga's 68 points was a new single game mark and the Texas State of the Border Conference, the letter can win the Cayuga-Forreston game and the 152 points Cayuga had for three games.

Gruber's 43 points was the most scored in a Class B championship game. Waelder, 36 points, was the most scored by a losing team in the title tilt and the 77 points was the biggest aggregate score in the final game.

Duncan, a six foot, two inch, 17-year-old junior, sank 17 field goals and five three throws for his record. Vernon's five regulars in basketball were regulars on the football team. Sportswriters covering the tournament were of the opinion Canyon was the best team in any division. . . Vernon had one of the largest delegations at the tournament. . . A 42-car caravan of fans and the members of the school board, who chartered a plane for the trip to Austin after the Lions won their semifinal game Saturday morning. . . Three of Waelder's players were ailing and played with high temperatures, an interscholastic League official reported.

Honorable mention for all tournament honors included: Class B: Rex Hitt of Forreston, Robert Fletcher of Gruber, Tommy McCollum of Cayuga, Pat McCrory of Waelder, Howard Morrow of Waelder, and Joe Hatton of Cayuga, and Wayne Loyd of Forreston.

Class A: Homer Bond of Teague, Steve Sanchez of South San Antonio, Johnny Vick of South San Antonio, Gorman Wiseman (Port Worth), Ray Burrus of Canyon, Garland Butler of Canyon, and Frank Harvey of French (Beaumont).

Class AA: Robert Knight of Corpus Christi, Billy James of Vernon, Gary Sides of Austin (El Paso), Lynn Mullen of Austin (El Paso), Jerry Norton of Texarkana, Carl Nun of Sweetwater, Loyd Giles of Texarkana.

Border Cage Title on Line at Arizona Tonight

Arizona can win the Border Conference basketball title tonight by beating Hardin-Simmons in Tucson.

For Hardin-Simmons to finish on top it must: (1) break Arizona's string of 84 consecutive victories on its home court, (2) beat tricky Tempe tomorrow night and (3) trip last-place Flagstaff Wednesday. They are the only conference games this week and bring the conference play to an end.

Hardin-Simmons can lose one game — so long as it isn't Arizona — and finish in a first place tie.

Last week was costly for Arizona. When it hit Texas for three road games it was ranked 15th in the nation with 34-2 record; it appeared to be headed for the NCAA or National Invitational Tournaments; and appeared to have its fifth straight conference title wrapped up.

Then it lost to Hardin-Simmons and West Texas. In so doing it probably lost its national rating and probably gave up its chances of being invited to the Madison Square Garden event.

Hardin-Simmons is the most surprising team in the league. It was supposed to finish in the second division. It showed nothing in early-season games, losing two of its first four conference dates. Since then it has won nine in a row.

Kentucky's Rupp Yells 'Foul' While State Gets Bid to NCAA Tourney

NEW YORK — (AP) — Baron Adolph Rupp, the Kentucky Wildcats, is yelling "foul" today but it won't do any good. North Carolina State, not Kentucky, will carry Dixie's colors into the NCAA Basketball Tournament.

The bluegrass coach wanted to try again for a "grand slam" this year in the NCAA and the National Invitation Tournament. But he has to settle for just the NIT.

Rupp accepted the NIT bid last night immediately after Carolina State won the NCAA nod. The Carolinians (24-5) got their invitation from the District Three Selection Committee because Kentucky declined to meet North Carolina State in a playoff.

Rupp has a different explanation. "No one on the committee or from the NCAA consulted us about a playoff," he said. Anyway, the Baron added, a playoff would have been ridiculous because Kentucky's record (25-4) is much better than Carolina's.

Only cage five so far having a chance to win both crowns is Braxley, The Florida III. Braves are entered in the NIT and will play the Big Seven winner March 20 for the District Five bid to the NCAA.

Nine teams are entered in the 12-club National Invitation and the other three were scheduled to be announced today. The tournament begins Saturday.

Only three of the eight clubs making up the NCAA Tournament have been named. They are Holy Cross (26-1), Ohio State (19-3) and North Carolina State (24-5), all in the eastern half.

The Eastern half of the NCAA is scheduled for March 23-25, the Western half at Kansas City March 24-25 and the title game March 28 at Madison Square Garden.

Entered in the NIT are defending champion San Francisco (19-6), Kentucky (25-4), Long Island U. (20-4), St. John's (22-4), Syracuse (17-7), LaSalle (19-3), Duquesne (22-3), Bradley (27-3) and Western Kentucky (24-6).

Candidates for the three remaining NIT spots are Kansas State (16-6), CCNY (16-5), Niagara (20-6), Cincinnati (18-5), Toledo (22-6), Villanova (24-4), Eastern Kentucky (16-6) and St. Louis (15-9).

Final make up of the NCAA Tournament will come March 20. The remaining Eastern spot, District Two (Middle Atlantic), has CCNY, Columbia (19-7), Cornell (17-4), Princeton (13-8) and Niagara as candidates.

The District Five (Missouri Valley) candidate will be the winner of the playoff between Bradley and the Big Seven champion. Still in the running for the Big Seven title are Kansas (13-9), Kansas State (16-6) and Nebraska (16-6).

In District Six (Southwest), the contenders are Arizona (24-4), Houston (16-7) and the Southwest Conference co-champs, Arkansas (12-12) and Baylor (13-11).

Brigham Young (20-11) plays Denver (18-12) tonight for the Skyline Six title. The winner will represent the Rocky Mountain District in the NCAA playoffs. The Pacific Coast Conference champion will represent the West Coast District at Kansas City, UCLA (22-5), Southern Division champ, will meet Washington State (19-11), Northern winner, in a playoff.

The average professional hockey team has nearly 600 hockey stocks owned by its players every season.

MY BIGGEST BONER

Dilhofer Called for Change-of-Pace; Riviere Didn't Know Flack From Flick

By TINK RIVIERE
Former Cardinals' Pitcher

I was a recruit pitcher from Texas with the St. Louis Cardinals at Chicago's Wrigley Field in April, 1921.

I started the third game of the season. We were leading until the seventh or eighth inning. The Cubs got two men on, and up came Max Flack. Pickles Dilhofer gave me the sign for the change of pace.

Flack hit the ball over the right field fence on top of brown house. That's how well I remember where he hit it. The Cubs led 4-3, after that.

Branch Rickey, then managing the Cardinals, jumped up and motioned violently for me to come out of the game. He was waving his hands like a windmill. He signaled Catcher Dilhofer to come out, too, sent in an entire new battery.

"Judas Pris, Riviere, don't you know Flack is the best change-of-pace hitter in baseball!" said Rickey, when I got to the bench. "Mr. Rickey, I don't know Flack from Flick." "You should have heard him smart."

Rickey took Dilhofer out because he called for the change-up. Troubled by neuritis, I later pitched in the Texas League but what happened in Chicago will do as my biggest boner in baseball.

NEXT: Harry Gumbert, the Pirates' relief pitcher, threw to a base that wasn't there.

Burke Almost Certain Ryder Cupper After St. Pete Win

ST. PETERSBURG, Fla. — (AP) — Jack Burke, a 27-year-old sportsman with a wealth of golf in his system, is almost certain to play with the Ryder Cup Team this year.

The curly haired kid picked up 70 Ryder Cup points with victory in the St. Pete Open yesterday. He also picked up \$2,000 and is second to Sam Snead in both money winnings to date and Ryder points.

Running his money to \$7,400 and Ryder points to 208, Burke breezed by his idol and teacher —dazzling Jimmy Demaret.

Snead won \$600 for his sixth place finish and leads the money parade with \$5,158. He has 238 Ryder Cup points.

Demaret collected \$387.00 on a tie for eighth place and stands third with \$6,146.16 this year. He is a third in Ryder points at 164-12.

Ryder Cup leaders behind Demaret are Chandler Harper, Ellsworth Vines, Henry Ransom, Skip Alexander, Ben Hogan, Pete Cooper and Chick Harbert.

Leading money winners for the year: Sam Snead, White Sulphur Springs, W. Va., \$3,158; Jack Burke, White Plains, N.Y., \$7,400; Jimmy Demaret, Ojai, Calif., \$6,146.16; Cary Middlecott, Ormond Beach, Fla., \$4,785.

Jim Ferrier, San Francisco, \$4,706.66; Fred Haas, Jr., New Orleans, \$4,450; Henry Ransom, St. Andrews, Ill., \$3,208.83; Chandler Harper, Portsmouth, Va., \$2,700; Ellsworth Vines, Los Angeles, \$2,200; John Palmer, Badin, N.C., \$2,111.83.

Competition Is Tough at St. Pete

ST. PETERSBURG, Fla. — (AP) — When Jack Burke shot 67-67-69 —272 over a par-71 golf course and then has to sweat it out to be sure of victory, the competition is tough.

Jack Burke's four great rounds did win the St. Petersburg Open yesterday but it was close finish. The handsome young fellow saw Chick Harbert and Toby Lyons both bid to take away his victory.

Going into the final round Harbert had tied Burke at 203 by shooting two sensational rounds of 65. Lyons had 205.

Just as Burke birdied the 18th hole, word came that Lyons scored a hole in one on the 18th. Three pars would tie him for the lead but went over par on the 16th and 17th and parred the last one.

Harbert needed an eagle on the last hole to deadlock Burke. Harbert stoked an 18-footer that scarcely missed doing it.

Boxing one-time great, Al Ketchum, the owner-trainer of a three-horse racing stable this winter at Hialeah.

ENM Wins NMC Title

(By The Associated Press)
Eastern New Mexico University held its second straight New Mexico Conference cage title as the circuit ended the season over the weekend.

ENM finished with a 12-1 record after defeating fifth place Panhandle A&M (Goodwell, Okla.) twice in a row to clinch the crown. Highlands (Las Vegas, N.M.) was second with a 12-3 record.

GIRL SCOUT NOTES

TROOP 14

Brownie Troop 14 visited the Blackburn Shaw 8th St. Funeral Home Monday, Feb. 27. This was a most enjoyable trip to see such a beautiful place, which is indeed a credit to Pampa.

Those who attended were: Bonnie Glaxner, Patay Huffines, Ann Boese, Linda Kay Steele, Rebecca Skelly, Shirley Hankhouse, Martha Gordon, Marilyn Toepfer, Sydna Morris, Maynette Loftus, Linda Joyce McDonald, Heidi Schneider, Wanda Wehrung, Becky Palmer. Co-leaders: Mrs. B. E. Palmer, Mrs. Azelle Loftus. Committee mothers: Mrs. Robert Huffines and Mrs. Dan Glaxner.

Later in the afternoon an election of officers was held. New officers are Marilyn Toepfer, president; Maynette Loftus, vice president; Becky Palmer, treasurer; Sydna Morris, secretary. Outgoing officers are: Shirley Hankhouse, president; Linda Kay Steele, vice president; Linda Joyce McDonald, secretary, and Rebecca Skelly, treasurer.

TROOP 28 Under the leadership of Mrs. W. E. Hinton, Mrs. J. C. Gordon Rice and Mrs. M. S. Steward has just completed its First Aid course and will soon receive Standard First Aid Certificates. Thanks, Mrs. J. M. Fitzgerald for a well instructed group.

TROOP 19 Cooking badges are being worked for in Troop 19. Each week two girls bring something they have made for the troop to eat. Believe me, the chocolate cake and cookies served a week ago were delicious. Leaders of this troop are Mrs. Buri Lewter, Mrs. W. L. Kretzmeier and Mrs. Clem Followell.

TROOP 15 Brownie Troop 15 is one of the first to start on wood carving. This is always an active troop. Their leaders are Mrs. Myles Morgan, Mrs. Chae Lander and Mrs. E. J. Radcliff.

Mr. and Mrs. Lawrence S. McBee of San Pedro, Calif., are parents of a daughter, Karen Linette, born Sunday morning. She weighed 6 lbs. 8 oz. Paternal grandparents are Mr. and Mrs. Horace McBee of Pampa, and maternal grandparents are Mr. and Mrs. A. E. Johnson of Colorado Springs, Colo.

Texans See Demonstration Of Jet-Assisted Takeoff

By WILLIAM C. BARNARD Associated Press Staff

It was an elevating experience. Normally, big, four-engine airplanes climb 400 to 500 feet per minute. But this one climbed at the rate of 6,000 feet per minute. And the angle of ascent was an amazing 60 degrees.

Several thousand people saw the big ship nose spectacularly into the sky at Dallas Sunday. It was part of a jato demonstration given by Braniff International Airways. Jato means jet-assisted take off. Brother, it really assists.

On one takeoff, Pilot Bill Walner cut one of his four engines just as the ship left the ground. At the same moment, he fired two cylinders of jato. The plane went right on up.

The final demonstration — the first public one ever given by an airlines company in the U. S. — was scheduled as a takeoff at full engine power, plus four cylinders of jato.

The cylinders are attached to the underside of the fuselage. They are 10 inches in diameter and three feet long and contain fuel and oxygen to burn it. When they are set off, a smoky gas spurts out, giving the plane a big push.

We climbed aboard for the ride. At the beginning of the runway, Pilot Walner held the brakes till the propellers spun at full power. He let go, and the huge craft shot into the air, trailed by a tremendous column of white smoke. Passengers were pressed back into their seats. Fourteen seconds later the rocket fuel was gone and Walner leveled off.

"I had figured on a climb of 45 degrees," he said later, "but we did 60, degrees or better. We really were hanging on the propellers."

Braniff planes flying into the 14,404-foot high airport at La Paz, Bolivia, carry jato as a precautionary measure on takeoffs in the rarified air. But no Braniff plane has ever had to use it.

Hydrogenation is a process for turning liquid vegetable oils into solid white fat.

Merchandise Demand Still High in State

DALLAS — (AP) — Declining construction awards, increased demand for department store merchandise, and high level demands for durable goods accents the 11th Federal Reserve District business review for March.

The March 1 review from the Dallas Federal Reserve Bank covers the period from January 11 to February 15 in its report.

Strong demand for department store merchandise persisted through January and the first half of February, the report says, adding that the heavy demand becomes evident in December.

Department store sales were off more than seasonally, but were ahead of January, 1949, by 5 percent.

Construction contract awards, however, dipped seven percent from December's heavy volume. Still, they were 44 percent ahead of January, 1949.

Residential awards remain only slightly below what the federal reserve calls the "high monthly average of the last half of 1949." There was a substantial increase of awards in public works and public utilities projects.

The bank reports an over-all petroleum products demand in excess of production which caused a drop in supplies on hand at the refineries.

Construction contract awards, however, dipped seven percent from December's heavy volume. Still, they were 44 percent ahead of January, 1949.

Condemnation Suits Started

DALLAS — (AP) — Warren Moore, federal attorney for the Eastern Texas district, has filed condemnation proceedings for title to 5,600 acres behind dams being raised at Lavon, Grapevine, and Garza-Little Elm on the Trinity watershed.

The filing was at Sherman. Moore, a resident of Tyler, said buyers for Army engineers failed to reach purchase agreements with owners of ten farm tracts (1,300 acres) at Grapevine; 15 tracts (1,800 acres) at Garza-Little Elm, and 22 tracts (2,500 acres) at Lavon.

He said work of clearing the lakesites must proceed rapidly this year; that he had asked the Department of Justice for special attorneys, and that "we are sure to see many more such cases filed at Sherman."

Out-of-season blossoming of fruit trees usually indicates the tree has been through a difficult time from drought disease or insects.

Irritation of Externally Causes PIMPLES To gently cleanse broken out skin, then soothe itchy irritation, and so aid healing — use time tested RESINOLINTMENT AND SOAP
