Dental X-Rays Find Trouble Quickly

At most every regular dental examination. your dentist may first want to take a series of X-rays. These X-rays can pinpoint trouble spots before they get to the stage where extensive work is needed or where a painful toothache results.

Even when work is required, the new anesthetics and high speed equipment make it fast and with hardly any discomfort. Many dentists will prescribe a tranquilizer for a patient before their appointment and a pain reliever for use when the anesthetic has worn off. We fill many dental prescriptions and keep the medications they need on hand.

YOU OR YOUR DOCTOR CAN PHONE US when you need delivery. We will deliver promptly without extra charge. A great many people rely on us for their health needs. We welcome requests for
