PAMPA, TEXAS, MONDAY, OCTOBER 30, 1950

(12 PAGES TODAY)

Weekdays 8 Cents Sunday 10 Cents

GROUND BREAKING—Wilson Huff, right, of Amarillo, was guest speaker at the official ground-breaking ceremonies of the new Negro school building, Sunday. With him are Pampa School officials and participants in the program. Left to right are Knox Kinard, superintendent of Pampa Independent Schools, Rayburn Thompson, president of the board of trustees, Herman Whitley, Oscar Redd and Huff. (News Photo and Engraving)

Negro School Has Ceremony

Wilson Huff, representative of the Lobo Club of Amarillo, was guest speaker at the official ground-breaking ceremonies of the new Negro school building, Sunday afternoon. Huff stated a good school is essential to good citizenship, but a building does not make a school. "Now is no time to turn back," Huff asserted. Huff urged cooperation with the Pampa Board of Education and stressed the importance of ironing out local problems without having to go to court. Other speakers on the program included Rayburn Thompson, president of the school board of directors; Knox Kinard, superintendent of Pampa schools and Oscar Redd, director of the program. Both Thompson and Kinard expressed the hope that the new building would be completed by next spring in time for graduation and stated that construction would be completed in time for the fall term. Kinard expressed the hope that the new public instruction building would be cared for "with loving hands" and that its presence would be an inducement to property owners to improve their premises. Following the ceremonies, barbecued chicken was served.

Zweifel Boomed as Republican Leader

BROWNSVILLE — (AP) — One high state Republican official came out for Henry Zweifel of Fort Worth to become new GOP national committee man from Texas. But the director of organization for the state committee, Frank Blankenbiller, said it would probably be about 30 days before a successor is picked for the late R. B. Creager. Creager, Texas Republican director and national GOP strategist for thirty years, died Saturday. His funeral Sunday was attended by leading members of the party in Texas and his friends. Mrs. Buck West of San Antonio, vice-chairman of the State Republican Executive Committee, spoke out for Zweifel. "We have one man who would make a wonderful successor to Mr. Creager," she said. "He is Henry Zweifel. I have the greatest regard for him and great confidence in him."

Camp Polk Officials Seeking Football foe

SHREVEPORT, La. — (AP) — Athletic officials of Camp Polk said today they were seeking a foe to play a football game with the 45th (Oklahoma) Division Thunderbirds here Nov. 11. A team from a small college is preferred.

Texan Given Medal In Tokyo Ceremony

TOKYO — (AP) — Eight members of the U.S. 24th Division have been awarded bronze star medals. A bronze star with a V for valor was awarded to Pfc Trinidad de la Rosa, Sierra Blanca, Tex. WE SAW... The North Pole mail picking up as the second leg of the season arrived, addressed to "Sanda." There are cold days ahead. Better see Bert A. Howell & C., 119 N. Ward, and have them check your heating system, Ph. 152.

Communists Force Tibetan Retreats

NEW DELHI, India — (AP) — Tibetan troops were reported today to have retreated in the face of Chinese Communist invaders to within 200 miles of the mountain country's capital of Lhasa. India's representative at Lhasa advised his government here that the retreating troops abandoned Lho Dzong (Lolungchung) on Oct. 22 and Shoshado on Oct. 27 and fell back to Pemba Go. Pemba Go is 200 airline miles east of Lhasa, on a main caravan route to Chumbi, an important East Tibetan defense center. A government spokesman here said the caravan journey from Pemba Go to Lhasa usually required a month but could be made in two weeks. Earlier the Kalimpong correspondent of the Calcutta newspaper, The Statesman, reported the Chinese Communists were being driven out of the mountainous region. The Indian government spokesman added that Tibet has asked India for any diplomatic assistance it could give specifically for the "continuance of the good offices which India has made available in the past." The spokesman did not say what assistance India planned but denied that the Tibetan message included a request for military assistance or that the Chinese invasion be brought before the United Nations. India already has sent a note to the Chinese Communist government in Peking expressing regret and surprise at the Red order to invade Tibet. The spokesman said no answer had been received to this note. He added that according to latest reports the Tibetan delegation which has been negotiating here with the Chinese Communist ambassador still planned to go to Peking for further talks. The Tibetans, he said, had gone to Kalimpong, near the Indian-Tibet frontier, to pick up their baggage and planned to leave for Peking via Hong Kong at the end of the first week in November. The Indian spokesman said his government's representative in Lhasa also reported considerable Communist infiltration into the country.

Tito Promises American Aid

BELGRADE, Yugoslavia — (AP) — Yugoslavia's famine-stricken people had assurance from Premier Marshal Tito today that enough American aid will be forthcoming to prevent starvation, with no strings attached. "The American government did not impose any conditions," Tito told the final session of the Congress of Anti-Fascist Women at Zagreb Sunday. "It will be possible to get all we need in order to feed whole districts which are damaged thoroughly by the drought." Discussing the smoldering conflict between his country and the Soviet bloc, Tito declared the Russian-led Cominform nations had prepared an attack "to break Yugoslavia from the inside or from the outside, secretly and openly." Yugoslavia, he added, is quietly suffering continued border provocations which involve human victims "in a small way." As he phrased it, because retaliation would produce fatal results for Yugoslavia and world peace. U.S. Secretary of State Dean Acheson disclosed last week that American food for Yugoslavia is already being loaded for shipment. The Export-Import Bank has advanced \$2,000,000 of an existing \$15,000,000 credit for that purpose.

Pleven Reaffirms German Arms

LYON, France — (AP) — French Premier Rene Pleven promised Sunday that his government would not back down on its demand that Germans be allowed to bear arms only in a European army under supranational European control. Speaking in a party congress of his own left-center Democratic Socialist Resistance Union (UDSR), Pleven said only such a European army "can guarantee to us that the reconstitution of a strong German army will not drag us some way into a crusade or a war of revenge that we do not want at any price." Aside from some campaign speech help given by Nationalist Chairman Guy O. Gabriel, Harold E. Stassen, 1948 presidential aspirant, and a group of Republican senators, GOP candidates largely are being left to fight their battles alone. Mr. Truman's Saturday night talk will cap campaign speeches during the week by Vice President Barkley, Secretary of Agriculture Brannan and other administration figures. Before his political talk the President is expected to wrap up as something of a campaign document a call for Congress to meet earlier than the Nov. 27 reconvening date it set when it quit in September. Senator Lucas of Illinois, the Democratic leader, told reporters

Two Red Divisions Set Up Drive to Slow UN Advance

Pact Nations Set For Finish Today

WASHINGTON — (AP) — The Atlantic powers' defense committee set out to finish framing today the structure of a combined defense force to protect western Europe against any aggression from Russia. But interposed was an old obstacle over which the Atlantic nations had stumbled before — should German forces be organized to participate in the common defense? If so, under what conditions? The opening of today's session held forth hopes that the defense ministers of the 12 pact countries could iron out details and disagreements by tonight. It was a hope, not a certainty. In the first closed-door meeting of the defense committee on Saturday, French Defense Minister Jules Moch presented his government's ideas about the German question. Presumably they were as stated before: the rearming of western Germany, the formation of German military forces, should wait until some form of European defense council is formed. This civilian council would supervise a national military force. If eventually there are any German units in it they shouldn't be big, but should be smaller than division size. This isn't the idea of the United States and Britain. They contend the menace of Russia is so great and urgent that everything possible should be done swiftly, including formation of German units to help the combined defense. They have offered far more consultations with their home governments. Everyone talked about it for long hours on Saturday. Then, after a final meeting held in the evening, the pact nations agreed to meet again today at a special meeting in Paris. The pact nations set out to finish framing today the structure of a combined defense force to protect western Europe against any aggression from Russia. Police Fight Rico Rioting

SAN JUAN, Puerto Rico — (AP) — Nationalists clashed with police today at three towns, in a sudden outbreak which authorities said appeared to be part of an organized uprising. Early reports said four persons — three Nationalists and a policeman — were killed and a number wounded. Reports reaching here said eight Nationalists were arrested. Although the Nationalists follow much the same line in Puerto Rico as the Communists, there was no evidence that the Communists were involved in the outbreak. Both parties demand the complete independence of Puerto Rico from the United States. The island is a territory whose 2,000,000 people are U.S. citizens. The clashes occurred at Ponce, 50 miles southwest of San Juan, and the nearby town of Penuelas, both in the southern coastal area, and at Arecibo on the northern coast. Nationalist opposition to the government intensified recently over the issue of a new constitution which Congress approved. Nationalists stormed the police station at Ponce and an armed clash ensued. Meanwhile a group of 30 police, carrying out a search for the president of the Nationalist Party, Pedro Albizu Campos, went to the home of Albizu's mother near Penuelas and were met by gunfire. The police returned the shots. A report from Ponce said the situation at Penuelas was serious. It said a number of Nationalists with arms and ammunition were entrenched in a mountainous area. Their fire wounded four police. At least three Nationalists were killed in the clashes. About a mile from Ponce, a police corporal was shot and a Nationalist was killed in an automobile. The assailants abandoned the car, containing bombs and ammunition, and fled on foot.

New Information Due Tuesday From Canadian Dam Meet

New, but undisclosed information concerning the Canadian River Dam will be given members of the Canadian River Water Users' Association at a luncheon meeting Tuesday in the new Burger Hotel. The meeting, called by the association's chairman, Mayor Charles Whiteside, Lubbock, resulted in postponing the Pampa City Commission meeting Tuesday afternoon until Wednesday at 1:30 p.m. A letter from Whiteside to City Manager Dick Peep said only that the luncheon meeting would be held and that "new information" on the proposed dam at Sanford, Tex., would be given. The group also scheduled to make a trip to the proposed dam site sometime Tuesday afternoon following the meeting in the hotel.

Services Scheduled For R. T. Crockett

Funeral services for Robert Thomas "Bob" Crockett, veteran of World War I, will be held at 2 p.m. Tuesday in the Duaneke Carmichael Chapel. Crockett died at 12:30 this morning at the Veterans Hospital in Amarillo. He has been ill three months. Crockett was born on Sept. 5, 1886, in Cumberland, Okla. He moved to Pampa from Wichita Falls about 20 years ago. He lived at 615 S. Barnes. Survivors include his wife, Zebedia, Pampa, one son, John Robert of Pampa, his mother, Mrs. Kellie of Checotah, Okla., three sisters, Mrs. Stella Duncan of Oklahoma City, Mrs. Lucy Mayo of Checotah, Okla., and (See SERVICES, Page 23)

Board Calls 14 in December's Draft

The quota for draftees in the Pampa area in December has been announced, according to Charlyne Court, manager of the local Selective Service Board. The Pampa board will call 14 men for induction in December. According to Mrs. Court, the inductees will be chosen out of the last group of men who took their physicals in Amarillo recently. If it comes from a hardware store, we have it, Lewis Hdw.

Jaycee Prexy Visits Pampa

The Junior Chamber of Commerce was represented by the national and state presidents today at a special meeting held in their honor at the Palm Room according to Rusty Ward, local president of the Jaycees. Richard W. Kemler, national president and W. G. McDannel, state president, were accompanied by J. L. Pate, Jr., regional vice president, of Amarillo. The Jaycee officials are on a tour of the organizations throughout the state of Texas. Both officers were recently elected at national and state conventions. Pate met the officials early this morning and remained with them throughout the day. He will escort them to Amarillo upon completion of their inspection of the local branch. The Pampa group presented the executive committee with a special program today at noon. The men seemed well satisfied with the local organization.

Enlisted Reserves Get Discharge on New Point System

WASHINGTON — (AP) — A new point system, based on age, previous service and the number of dependents, is to guide the Army's handling of its reserve enlisted men and officers. In another weekend development the Army announced it is making no more mandatory calls for enlisted reserves except for a limited number of medical and counter intelligence specialists. The point system is to be used in determining (1) which reservists among those on active duty will be sent overseas and (2) the order in which additional reservists would be ordered to active duty in the event of possible future call-ups. Points are called service credits and are to be credited. One credit for each year of the reservists' age over 20, one for each year of previous service, two for each combat award he has earned. (See ENLISTED, Page 2)

Drivers Licenses Postponed Until Examiner Named

The drivers license office in Pampa will temporarily suspend operations at the close of business Friday until a replacement for Examiner Walter L. Roberts can be named by the Department of Public Safety. Roberts has been recalled to active duty with the U. S. Army and ordered to report to Fort Sill, Oklahoma, on Nov. 15. Roberts, who served overseas in the European Theater for two years with the 69th Division, will reenter at his old grade of private, first class. He has been stationed in Pampa for two and one-half years with the Drivers License Division of the Department of Public Safety. As of today the division has not named a replacement for Roberts.

The King Is Dead . . .

STOCKHOLM, Sweden — (AP) — Gustaf VI today was proclaimed "King of the Swedes, the Goths and the Wends," the first new ruler to ascend the ancient Swedish throne in nearly half a century. He succeeds his father, 92-year-old King Gustaf V, whose death Sunday morning after a reign of nearly 43 years plunged the nation into deepest mourning. To all effects and purposes the late King Prince Oscar Frederick Wilhelm Olaf Adolf has been Sweden's monarch since his father's death. But in colorful ceremonies today in the cabinet council room of Stockholm's royal palace he took the royal oath pledging himself to adhere strictly to the constitution and to rule "as a righteous king and gracious father of the Swedish people by a legal, just and mild government." Socialist Premier Tage Erlander read the oath in the presence of the royal family and the court awaited. Gustaf ascended his silver throne, which was covered by his ermine mantle. His jeweled crown and scepter were placed to the left and right of the throne. The new queen, British-born Louise, is the monarch's second wife. She is a sister of Earl (See GUSTAV, Page 2)

Flying Cloud Cargo Stalled

WILMINGTON, Del. — (AP) — The freighter Flying Cloud lay at anchor today while authorities decided the fate of a petroleum jelly cargo loaded aboard the vessel for shipment to Communist China. Sixteen thousand gallons of oil-base jelly, known commercially as a petroleum jelly, were put on the Flying Cloud at Baltimore, Md., last week. A similar quantity of the jelly normally used for medical purposes but reportedly usable for machine lubrication was also on board. The vessel is owned by the Flying Cloud, said the official spokesman earlier disclosed some individuals Chinese had been captured. That was not regarded as intervention. The most critical area in the blitzing northwest front was near Onjong, U.S. tanks and artillery were used there to help the Republic of Korea (ROK) Sixth Division. This is about 45 miles south of the border. More than 10,000 Communists, reported to include some Chinese, fled the division by one-third in three days of fighting. But the Chinese regiment reported by the 10th Corps spokesman was pinned-point in action in northeast Korea, south of the big Chosin hydroelectric plant. The plant supplies vital electric power to Manchuria. The ROK Third Division was stalled in its push toward the reservoir from Hamhung, on the east coast. (See KOREANS, Page 2)

Youth Held in Armory Burglary

A Pampa youth was arrested in connection with theft of government property from the National Guard Armory here Saturday. The youth, who gave his age as 17, was turned over to the FBI in Amarillo today. According to John Wilkinson, chief of police, the boy will be eligible to be tried under the Federal Juvenile Delinquency Act since the case will enter federal court. Under existing state statutes, the youth would be tried as an adult. (See YOUTH, Page 2)

Maurice Costello, Famous 'Has-Been,' Dies in Hollywood

HOLLYWOOD — (AP) — Maurice Costello, matinee idol of two generations ago and father of two famous actresses, is dead. The 73-year-old white-haired actor who in the sunset of life said "it's better to be a has-been than a never-was," succumbed Sunday to heart disease and complications that had kept him in a virtual coma since Tuesday. Frequent death-bed visitors were his once estranged but later reconciled daughters, Dolores and Helene Costello, former actresses. One of the earliest of the great screen lovers, Costello had won stage renown before he entered the infant film business. Born in Pittsburgh, Pa., he began his career there in vaudeville in 1894 with a song: "Here Goes the Mick that Threw the Brick, Hell Never Throw Another." There followed stock company work, then Broadway where he became a matinee idol in "Scotland Yard," "The Kentucky Fool," "The Cowboy and The Lady" and others. He left the stage for the movies in 1905, taking a \$30 a week job with the old Vitaphone Co., where he had to help build scenery as part of the job. Vitaphone started him by name in 1907 with no more chores but, he said later, "I then became known as the first screen player to show signs of temperament." He also was the first to receive fan mail and by 1910 women mobbed him at every public appearance. A nervous breakdown in 1915 shortened his big time career and by the 1920s he was doing bit parts, heavy roles or whatever was available. In recent years he lived in obscurity, doing an occasional radio "soap opera" role. Once when Costello was asked in recent years what became of all the money he earned in his heyday, he said: "We lived well and every down and out actor knew that 'Cos' had a check book." (See COSTELLO, Page 2)

Desperate KoReds Get Chinese Help

SEOUL — (AP) — Two Red divisions—reportedly made up mostly of Chinese Communists—drove tonight on the Korean east coast city of Hamhung, far behind the slowing allied advance toward the Manchurian border. South Korean Republican officers said the counter-attacking force numbered more than 10,000 men and was 30 miles northwest of Hamhung. The Reds were reported well-organized and full of fight. This development came shortly after a U.S. 10th Corps spokesman said two Chinese regiments were in action in the same area—the first official word that a sizable Chinese force was helping the desperate North Koreans. Commenting on the Hamhung report relayed by AP Correspondent Ben Price the 10th Corps spokesman said it "is basically on the right track but the units in mention are larger than our information indicates." Thus it still was not clear whether the South Korean report on the number of Chinese was exaggerated. However, Americans in the Korean Military Advisory Group (KMAAG) said they considered the situation serious. The enemy force was reported smashing at the flank of the South Korean 26th Regiment about 10 miles south of the big Chosin hydroelectric reservoir. The reservoir is about 40 air miles south of the Manchurian border. Price reported that a captured Korean Red officer said the attacking force was under orders to capture Hamhung in a huge offensive chemical center — by Wednesday. There still was no indication whether this was considered open intervention by Red China in the Korean war. Other official spokesmen earlier disclosed some individuals Chinese had been captured. That was not regarded as intervention. The most critical area in the blitzing northwest front was near Onjong, U.S. tanks and artillery were used there to help the Republic of Korea (ROK) Sixth Division. This is about 45 miles south of the border. More than 10,000 Communists, reported to include some Chinese, fled the division by one-third in three days of fighting. But the Chinese regiment reported by the 10th Corps spokesman was pinned-point in action in northeast Korea, south of the big Chosin hydroelectric plant. The plant supplies vital electric power to Manchuria. The ROK Third Division was stalled in its push toward the reservoir from Hamhung, on the east coast. (See KOREANS, Page 2)

Gustav VI Mounts Throne of Sweden

STOCKHOLM, Sweden — (AP) — Gustaf VI today was proclaimed "King of the Swedes, the Goths and the Wends," the first new ruler to ascend the ancient Swedish throne in nearly half a century. He succeeds his father, 92-year-old King Gustaf V, whose death Sunday morning after a reign of nearly 43 years plunged the nation into deepest mourning. To all effects and purposes the late King Prince Oscar Frederick Wilhelm Olaf Adolf has been Sweden's monarch since his father's death. But in colorful ceremonies today in the cabinet council room of Stockholm's royal palace he took the royal oath pledging himself to adhere strictly to the constitution and to rule "as a righteous king and gracious father of the Swedish people by a legal, just and mild government." Mainly About People

The Eastern Star Study Club will meet at 7:30 Tuesday evening in the home of Mrs. Katie Vinson, 805 E. Atchison.

Wanted to buy—2 bedroom brick or stone home. Preferably on North Side. Ph. 2157-W.

The Wednesday luncheon planned by the Baptist Women's Missionary Union will not be held. The executive meeting will be held as scheduled at 1:30, and the royal service program will be given at 2 p. m. in the church parlor.

Maytag washing machine for sale; very reasonable. Contact Paul Vogel, 509 E. Foster, Apt. 2.

A revival meeting will begin at 7:30 p. m. today in the Pentecostal Holiness Church at LeFlore. The Rev. Sybil Greenham will be in the pulpit, and the royal service program will be given by Miss Stark, who will lead the singing. The Rev. G. H. Baxter is pastor.

3-room partly furnished apt. 1029 S. Hobart. Ph. 2046-F.

Pampa's Congressman, Ben Guill, will speak tonight at 7:00 over KPDN.

A revival is in progress at the United Pentecostal Church, 1016 Brown, with A. Thomas of Berger as evangelist. The revival will continue through this week. Nelson Frenchman is pastor of the church.

Pilots' Association Winds Up Breakfast

Pilots from New Mexico, Wyoming, Kansas, Oklahoma, Illinois, Nebraska and Texas, attended the pilots' breakfast at 10 a. m. Sunday at the country club. The breakfast at the country club had 150 persons attended the breakfast. Ed Myatt, former employee of the Civil Aeronautics Administration, explained the organization of the Civil Air Patrol in Pampa, saying that the CAP will be available for use in any emergency in the Panhandle.

The guests were welcomed by Gene Fatheree, president of the Pampa Chapter of Commemorative Service, representative of the Amarillo, representative of the Amarillo, representative of the Amarillo, representative of the Amarillo.

Guests attended from Tulsa, Chilton, Weatherford, Oklahoma City, and Correll, Okla.; Tucuman, N. M.; Elkart, Johnson and Rushfield, Kans.; Lusk, Wyo.; Stonington, Ill.; Kearney, Neb.; and Wellington, Louisiana. Skellytown, Perryton, Cotton Center, Hale Center, Brownfield, Spearman and Pampa, Texas.

Veterans Hospitals Start Drama Plan

WASHINGTON—About 100 colleges and universities are joining a program to bring all forms of drama to patients in some 40 veterans' hospitals.

The Veterans Administration, announcing this, said the program should get into full swing within a month.

NATIONS

(Continued from Page 1) Students in the English and drama departments will visit the hospitals in their area to:

1. Present entertainment—college plays, readings, sketches—in hospital wards and playrooms.

2. Instruct interested patients in theatrical work and advise them in writing, producing, costuming and staging productions of their own.

KOREDS

(Continued from Page 1) The Reds evidently were trying to hold at all costs until wintry blasts overtake the allied forces.

Rep. Ben Guill Makes Broadcast

Rep. Ben Guill will make his weekly radio report to the Panhandle tonight at 7 over radio station KPDN, and it will be followed up by daily reports at 12:45 over the same station.

ENLISTED

(Continued from Page 1) has received, four for each year of active federal service, four for each year of overseas service and eight for each dependent.

Booklet Tells All On A-Bomb Attack

WASHINGTON—The government has come up with its answers to such atomic era questions as:

1. What should you wear if there's danger of an A-bomb attack?

2. What should you do about radioactive dust in your clothes?

3. How soon after an A-attack is it safe to let the cat out?

4. The government's answers to these and a host of other questions appear in its long-promised booklet, "Survival Under Atomic Attack."

It's the first official publication to tell the public in plain English just what to do if the bomb does fall. It costs a dime and you can get it from the Superintendent of Public Documents, Washington, 25, D.C. A more technical discussion was issued by the Atomic Energy Commission last August.

The National Security Resources Board, which put out the 32-page booklet this past weekend, plans to distribute millions of copies through local civil defense organizations. The goal: a copy in every American home.

Unless you're right under an exploding bomb, the booklet says, you can survive—if you keep your head. But you should know these "six survival secrets":

1—Try to get shielded—in a basement or subway if you can, in a ditch or gutter if you have to.

2—Drop flat on the ground or floor.

3—Bury your face in your arms.

4—Don't rush outside right after a bombing.

5—Don't take chances with food or water in open containers. A canopener is one of the handiest things to have around.

6—Don't start rumors. One false one may start a panic that will cost your life.

Beyond these "survival secrets," the new A-bomb defense manual gives a pretty complete course in atomic age living.

"Starting right now," it says, "you should go in for 'fireproof housekeeping.' Don't let trash pile up around your house, and always keep it in covered containers."

Some other hints: If you work in the open, always wear full-length, loose-fitting, light-colored clothes in time of emergency. Never go around with your sleeves rolled up. Always wear a hat—the brim may save you from a serious face burn.

If you have walked through of rubble from a ground burst or water from an underwater burst, be sure to change at least your outer garments and shoes. If the clothing is heavily contaminated by radiation, bury it. You should also manage to take a bath or shower.

Unless you are careful, some radioactivity is likely to be tracked in by pets. Keep your cat or dog indoors. Usually, radioactivity lasts only a minute or so, though it can linger for minutes or even weeks.

But the booklet says the danger from atomic radiation has been exaggerated—the big danger is from blast and burns. Even if you should get radiation sickness, there's a good chance you will recover. In short:

Services (Continued from Page 1) Mrs. Marie Gladney of Durant, Okla.

Rev. Glen Lester, pastor of the Assembly of God Church in Croom, will officiate and burial will be in Fairview Cemetery.

NEW, MIRACLE ELECTRONIC EAR HIDES DEAFNESS

CHICAGO, (Special)—An amazing new electronic ear which hides deafness and transmits even whispers with startling clarity, has been revealed by a noted Chicago electronic scientist.

He disclosed that this miraculous new discovery has rendered old-style hearing aids obsolete almost overnight, and brings new hope to the 76 million persons in the United States who are hard of hearing.

He reported that this electronic ear enables the deaf to hear without any battery showing in the ear and without dangling battery wires.

To acquaint the hard of hearing readers of this paper with this new miracle electronic ear which hides deafness, full details are described in a fascinating booklet, "New Discoveries to Help the Deaf Hear."

It will be sent free in a plain wrapper to anyone who requests it. Address: Electronic Research Department, West 10th Street 8525, Duluth Building, Chicago 20, Ill. A penny postcard will do.

moving to Donley County, where he became a contractor for concrete work. He moved to Wheeler in 1918 and operated the White Hotel until 1945, when he sold the hotel to D. A. Hunt, now of Pampa. Mr. White retired after selling the hotel.

Mrs. White died March 10, 1950.

Wheeler Citizen Succumbs Today

W. H. White, 87, prominent citizen of Wheeler, died early this morning at his home on N. Main following a week's illness. Funeral services will be held Tuesday afternoon at the Wheeler Methodist Church with the pastor, Rev. Daris Egger, officiating.

Survivors include four sons, Jack, Dalhart; Horace, Hartley; Van, Amarillo; Charlie, San Jon, N. M.; four daughters, Mrs. Millie Sharp, Amarillo; Mrs. Lou Hinch, Detroit, Mich.; Mrs. Lena Ferguson, Higgins; Mrs. Violet Alexander, Amarillo; four step-children, Mrs. Mable Williams, George Lamb, Wheeler; Ernest Lamb, Green; Roy Lamb, Happy; one sister, Mrs. W. F. Gold, Wichita Falls.

Mr. White was born in March, 1863, in Tennessee. He came to Pampa, Texas, as a young man.

DR. GORDON MILLER
In Hereford: Stapp Chiropractic Clinic, 112 W. Third
While the wide scope of Chiropractic is amazing the unformed, we do NOT recommend Chiropractic as a CURE-ALL. Chiropractic is effective in those cases only where the cause is found to be defective in organic energization due to spinal misalignment (subluxation). Most all of our cases are those that had previously resisted ordinary methods of healing. Our examination is designed to eliminate those we can't help.
THESE CASES ARE FROM CHIROPRACTIC FILES ALL OVER THE U.S.

Stomach Trouble
CASE NO. 1533: A married lady of 40 years was being treated for the change of life and suffering from indigestion, stomach trouble, nervousness, sinus trouble, headaches, tender bladder and arthritis, none of which had responded to any past treatments. A spinal analysis revealed the cause to be in her spine. Corrective adjustments restored alignment. She was discharged feeling grand, able to eat as she pleased without discomfort, and without a single pain complaint.

Headaches
CASE NO. 1910: A young woman, age 30, came to a clinic, complaining of headaches with nausea, dizziness, aching in back of neck, head and shoulders; was very nervous, had alternate spells of constipation and diarrhea; blood pressure was low and she had nervous dermatitis. X-rays and spinal analysis revealed the cause of those symptoms in the spine. Corrective adjustments restored the spine to normal and when patient was discharged, she had no complaints.

Sinus Trouble
CASE NO. 1186: This case is a lady, age 49, who had a history of 8 years of sinus trouble and hay fever, pains in right side of neck and shoulder, rheumatoid pains in knees, tired back, pressure feeling in stomach, dizziness and nervousness. After going the rounds of doctors, and remedies, she finally came to a chiropractic clinic for spinal examination. After the X-rays located the cause of her trouble, spinal corrective adjustments were begun to realign and remove interference in nerve wave frequencies which restored normal function to the entire ill-functioned body. Upon discharge, this patient reported no symptoms of any kind remained. The body contains everything necessary for health if its forces are free to work efficiently.

Diabetes
CASE HISTORY NO. 2006: A man 70 years old who for 25 years — one third of his life — had been under treatment for diabetes. He had been told repeatedly "once a diabetic always a diabetic." Hearing about Chiropractic through a friend, his curiosity prompted him to visit a chiropractor's office. He agreed to have spinal X-rays taken and in them he was shown a misaligned vertebra which the Chiropractor declared was the cause of the trouble. Spinal adjustments were commenced and two months later a urinalysis and blood test showed complete freedom from diabetic indication.

High Blood Pressure
CASE NO. 1103 is a lady, age 50, who came to the chiropractic clinic unable to work after suffering from high blood pressure, constipation, and nervousness for seven years. A spinal analysis and spinal X-rays located the subluxated frequency interference and adjustments were given to correct the spinal misalignment. Upon discharge this case reported normal blood pressure and no uncomfortable symptoms of any kind and enough energy for two persons.

Constipation
CASE HISTORY NO. 7719. A typical case of constipation. A four year old child who for two years had been required to take a laxative daily. Eventually these failed to help. She was

Ambassador Nasrollah Entezam of Iran (left) was elected President of the Fifth Regular Session of the United Nations General Assembly, now meeting at Flushing Meadow and Lake Success, N. Y. U.N. Secretary-General Trygve Lie congratulates Mr. Entezam.

Tickets for 'Great Virgil' Yet Available

Although most of the tickets for "The Great Virgil" show of magic, slated for 7:30 p.m. today in the Pampa Junior High School, have been sold, a few good seats are still available from Pampa Rotarians and at the Paul Crossman Refrigeration Store, 112 W. Foster.

This one-night stand by one of the world's leading mystics is being put on for the benefit of the Rotary's underprivileged children's and Boys' Ranch funds.

Tickets will be sold also at the door tonight by members of the ticket committee. It is the first time in Pampa's history that a master magician and upper bracket illusionist has performed here and will probably be the last for many months, or years.

The show is sprinkled with a variety of acts. The monotony of costume and backdrop has also been avoided by elaborate and extravagant stage settings and costumes. "Virgil" has brought with him between 9 and 18 tons of equipment including the costumes, backdrops and furnishings.

Nothing appears to be worn, but instead holds that "crisp and fresh" look. The show is rated as one of the cleanest, entertaining, and spectacular magic shows on the road today and includes tricks on the level of past masters of the art.

Wheeler Expecting Net Farm Income To Near '49 Figure

SHAMROCK — (Special) — Wheeler County will have a 1950 farm income not much less than the 1949 income despite heavier than normal rains and other unfavorable crop conditions, reports Ralph Wheat, county agent.

Although 1950 acreages will be less than that of 1949, by 15,000 (49,000 in 1949) acres, this will be partly offset by the increase in price of about 13 cents a pound, Wheat asserts.

Another factor indicated by the county agent is the fact that reduced cotton allotments resulted in the planting of 30,000 acres more in grain sorghums. Additional acreages planted to grain sorghums will give the county additional sorghum income of approximately \$382,000, Wheat estimates.

With the increase in the price of cotton, Wheeler county income will be only slightly less than it was in 1949, Wheat reports. "People should not be gloomy over the crop situation, because it is much better than the layman thinks," the agent concludes.

During the regency of Phillip of Orleans in the 18th Century, a long strip of muslin was adapted for a tie. This was not wrapped around the neck, but was sewn onto the shirt.

Students Present Program Commemorating UN Week

WHITE DEER — (Special) — As a culminating activity of United Nations Week, the social studies classes of White Deer High School taught by Mrs. B. R. Weaks and Kenneth Gibson presented an assembly program Friday afternoon in the grade school auditorium.

Jackie Awtry, a senior, was in charge of the program. A prayer for the United Nations, given by Supl. Ray Vineyard, was followed by the singing of "America the Beautiful," directed by Leslie Talbert, with Billy Joyce Adams, accompanist.

After a brief history of the UN given by the master of ceremonies, five girls discussed some phases of the work of the organization. Betty Jean Williams spoke of the solution of the Kashmir-Pakistan conflict in India; Wanda Richardson of the campaign against hunger throughout the world; LaVelle Rhoades of the fight against disease spearheaded by the World Health Organization; Marilyn Bagley of the campaign against poverty.

As an entertainment feature Lotte Kreis gave a bit of Russian ballet; Judy Wells, a Spanish dance; and a group of students, an American square dance. Participating in the square dance were Nancy Ford and Jack Hood, Betty Coler and Jerry Poole, Wanda Richardson and Jackie Freeman and Bette Webster; and Max Jordan with Floyd Travis as caller.

A model Security Council meeting then brought forth a discussion of the Indo-Chinese problem. Raymond Broome, representing Yugoslavia, presided. Jackie Freeman represented Jean Cheval of France; Floyd Travis, Gladwin Jebb of England; Gene Guyer, Jacob Malik of Russia, who stormed out of the meeting; Bob East, Warren Austin of the United States; and Harold Williams, Nehru of India.

Miss Awtry then gave a summary of the major accomplishments of the United Nations. The program was brought to a close when the audience stood for a moment of silent prayer, after which Margaret Moran sang "The Lord's Prayer."

A number of patrons of the school and a group of pupils from the upper grades in Skellytown, along with the students of the high school and the upper grades in White Deer schools attended the program.

Farmers estimate that it requires at least one acre of good pasture land to supply a dairy cow in the summer season.

HE CAME TO KILL

by ADELINE McELFRESH
Copyright 1950 by MCA Service, Inc.

THE STORY: The affections of Peter Thorne on his homecoming from New York surprises Leana Thorne. He speaks with a British accent, except when he forgets himself and talks with a Hoosier twang. After Leana takes her cousin Peter to the home of his Aunt Maggie, mistress of the Thorne estate, there is a little scene between Peter and Leana. As Leana goes to inform her mother, she notes that the entrance, Arthur Jones, does not attempt to conceal his dislike for Peter. "Miss Leana," Jones says, "don't let him fool you, Peter."

III
MESS MAGGIE was in complete control of the situation even though Peter, Jasper and Sondra Thorne were almost shouting at her in their anger. Leana paused in the door of her employer's room. Sondra stopped in mid-sentence.

"Oh," she said, then, mockingly. "It's the warden. I suppose we will be banished."

"Nothing of the kind," the mistress of Thorne Hill retorted, but her eyes flicked to Leana long enough for the girl to see in them the fear that beheld her stern words. "You may go when I have finished with you—and not one minute before!"

Leana felt Sondra Thorne's hate-filled eyes on her, but she did not turn her gaze from Peter, who had gone to the window. His back was poker-stiff, his hands ground deep into his pockets, but there was about him the alertness of a cornered animal.

"Leana," Miss Maggie, put out her thin, gnarled hand to Leana. "That was about a plan. Leana, fetch me my briefcase."

Ignoring the enmity that seemed to reach out for her, Leana went into Miss Maggie's study. The briefcase was in the bottom drawer of the massive old rolltop desk, unlocked now because Miss Maggie had been using it.

"You've done all right for yourself, cousin mine," Peter Thorne said softly as she passed him to hand the briefcase to her employer. If Miss Maggie heard, she gave no sign.

"Now!" she crowed, as though savoring the mental pain she was causing. "Now, my dear nephews, you shall hear how my new will is going to read."

"You're changing your will?" The startled yelp was Jasper's, although Leana was sure the question was on the tip of Peter's tongue, too. And Sondra's.

"Surprised, aren't you?" the old lady asked brightly. "I thought you'd be." Her fingers fumbled with the catch and she lifted the flap, extricating a folded paper from the briefcase without taking her eyes from the tight faces of her kin. "You thought, I suppose, that I would die without making things right. Didn't you, Peter?" She smiled, maliciously.

"Now, now, Auntie. You know I mean no harm. Why, I'm—"

"You're Brother Pete's boy—exactly!" Miss Maggie spoke sharply. "So is Jasper, but Jasper made his biggest mistake when he married Sondra. I've often wondered, Jasper, how many times you've regretted your marriage."

LEANA remembered Jasper's bitterness toward Sondra, but none of it was visible now in his face. Or in his voice as he said, "I love my wife, Aunt Maggie."

"I wonder," was Miss Maggie's wry comment. She looked at Sondra, "My dear, she said in anything that an endearing tone, 'do you remember the time you offered to leave Thorne Hill if I would give you \$50,000?'"

"Sondra started at that, stony-eyed."

"Would you make that offer again? Now?"

"You're lying!" Sondra blazed. "You sit there, safe in the knowledge that you're going to die, and

have your ghoulish fun sticking pins into me! I hope you do die! You're too mean to go on living!" Leana heard herself cry out, but the shocked recognition of so much bitter hatred in one woman blinded her to the real truth—that Sondra Thorne was afraid of Miss Maggie. Afraid of something else that she could—and probably would—tell.

Leana recognized that fear a moment later, as Sondra sought her husband's eyes.

"Jasper," she pleaded. "Don't believe her, Jasper! She's crazy!" Miss Maggie smiled, her thin old lips drawing down into a sour-persimmon pucker that made Leana shudder. It was almost as though the old woman's heart had shriveled along with her wasted body, until human kindness no longer remained.

"If I were, my will would not be valid. Is that the point you're trying to make, Sondra?" Miss Maggie's laugh was a thin, mirthless cackle. "How wrong you have been to hate me all these years—all of you, Leana, read it." She handed the girl the folded sheets she had taken from the briefcase that lay now across her bony knees.

OBVIOUSLY, Leana unfolded the paper and began reading. After the preliminary statements that she knew Miss Maggie had copied from some previous will, she stopped.

"Miss Maggie," hesitatingly, "I don't think..."

"Nonsense! Read on." Leana shot a swift glance around the room. All eyes were on one pair, boring coldly into her. She read:

"Setting aside all previous wills made by me, Margaret Annabelle Thorne, I hereby leave to my niece-in-law, Sondra Pearson Thorne, the sum of \$3000, this on the condition that she regain possession of my mother's sapphire-and-diamond lavaliers which I have reason to believe she stole and pawned. Said lavaliers must then be presented to my sister Agatha, who is its rightful owner under the terms of our mother's will."

(To Be Continued)

McLean Student In ROTC Training

McLEAN — (Special) — Clyde A. Mounce, son of Mr. and Mrs. Hal Mounce of McLean, has been accepted for enrollment in the University of Texas Naval ROTC unit, as announced by Captain Robert A. Knapp. He is enrolled in the College of Arts.

Mounce graduated from McLean High School this year. Upon completion of his four-year naval science course and obtaining a degree at the university, he will receive a commission as second lieutenant in the United States Marine Corps Reserve or enlist in the U. S. Naval Reserve.

Shamrock Educator Nominated for Post

SHAMROCK — (Special) — Elmer J. Moore, superintendent of the Shamrock schools, was nominated for second vice-president of the State Teachers Assn. by the Wheeler County Teachers last week at Wheeler.

Moore made a report on the inaugural program of the Texas Education Agency held in Austin, Oct. 9.

He is serving his sixth year as head of the Shamrock schools and his 18th as an educator.

Judd Asks Some Pertinent Things

Rep. Walter Judd of Minnesota asked some pertinent questions in a speech before the House...

- 1. What went with the \$95 billion spent on national defense since World War II?
2. Why did only one out of every seven defense dollars go for combat equipment between 1946 and 1950?
3. Why did President Truman limit the Air Force to 48 groups when the Republican 80th Congress ordered the Air Force expanded to 79 groups?
4. Why, if communism was a menace in Asia, were there only 6 General Pershing tanks, only 30 propellant (rocket) combat planes, only 1 aircraft carrier, and not a single combat ship in the Japanese area when we entered the Korean conflict?
5. Why did President Truman, on Dec. 15, 1945, officially announce that unless our ally, China, admitted Communists to its government, China would get no American aid?
6. Who was best serving America—the administration which for 50 years defended the Open Door in China, or the Truman administration which abandoned China to Soviet exploitation?
7. Why, when Congress had voted \$10,500,000 military aid for South Korea eight months earlier, had South Korea received only \$200 worth of Signal Corps gear when the Communists attacked, June 25?
8. Whose advice was the administration following when it asked last year for \$150,000,000 in economic aid for South Korea that of its long-time advisers, Owen Lattimore, who said in July, 1949, that "the thing to do is let South Korea die but not to let it look as though we pushed it, hence, the recommendation of a parting grant of \$150,000,000"?
9. Why did Secretary of State Acheson virtually invite the Communists to take Korea, Formosa, and the balance of China by announcing Jan. 12, 1950, that they were beyond our "defense perimeter"?
10. Which was wiser—the administration's appeasement policy that enabled Russia in the 17 1/2 years after World War II to extend its domination from 170,000,000 people to 800,000,000 people or Republican insistence on a firm anti-Communist policy?
11. What will the administration do in the future return to appeasement?
12. What will the administration do in the future return to appeasement?
13. What hope can there be for

Washington.....by Peter Edson

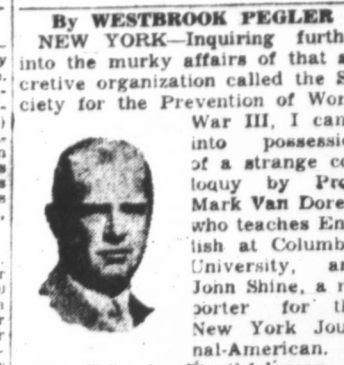

It is now possible to "see Europe" in two weeks. Trans World Airlines carried a party of 30 U. S. newsmen on such a trip...

Newfoundland. The schedule was tight and the pace terrific. But there was time for interviewing, sightseeing and some fun in London, Frankfurt, Heidelberg, Berlin, Zurich, Bern, Geneva, Athens, Rome and Paris.

This is the fastest way to get a quick refresher course on post-war Europe and how it's getting along. Fuller dispatches from various of the cities mentioned above have been printed previously in this space. From the notebook, here are other highlights:
BERLIN MARKETS—In the American sector of Berlin, just across the line from the Russian zone, pitchmen and peddlers daily set up stands on vacant lots and bombed-out ruins. Banners and oranges, which can't be bought in the Soviet sector, are among popular items in trade. This symbolizes the difference between Communist and non-Communist Germany. Russian east zone currency is worth only a tenth of the west zone money. People from the Russian zone flock to allied sectors to buy because prices average 15 percent lower, and there is plenty to buy.
HOMELESS MILLIONS—FRANKFURT—The end of the displaced person and refugee problems in the U. S. zone of Germany is still not in sight. About 320,000 DP's have been resettled, half of them in the U. S. Another 68,000 will be resettled by next March 31. There will then be an estimated 35,000 left in camps. Of these, 30,000 can be absorbed in Europe. The final 5,000 will be medical cases and stateless persons. No one knows what their ultimate fate will be. But all this is a minor problem...

Fair Enough-Pegler

By WESTBROOK PEGLER
NEW YORK—Inquiring further into the murky affairs of that secretive organization known as the Society for the Prevention of World War III, I came into possession of a strange collection by Prof. Mark Van Doren, who teaches English at Columbia University, and John Shine, a reporter for the New York Journal-American.

Mr. Shine is a truthful man. You may form your own opinion as to whether Van Doren is as stupid as he seemed to me in a speech before the House shortly before the recent adjournment that might be interesting to peruse right here. And, while we look them over, we want to keep in mind that Harry Truman has said repeatedly that he sets the foreign policy of the United States.

1. What went with the \$95 billion spent on national defense since World War II?
2. Why did only one out of every seven defense dollars go for combat equipment between 1946 and 1950?
3. Why did President Truman limit the Air Force to 48 groups when the Republican 80th Congress ordered the Air Force expanded to 79 groups?
4. Why, if communism was a menace in Asia, were there only 6 General Pershing tanks, only 30 propellant (rocket) combat planes, only 1 aircraft carrier, and not a single combat ship in the Japanese area when we entered the Korean conflict?
5. Why did President Truman, on Dec. 15, 1945, officially announce that unless our ally, China, admitted Communists to its government, China would get no American aid?
6. Who was best serving America—the administration which for 50 years defended the Open Door in China, or the Truman administration which abandoned China to Soviet exploitation?
7. Why, when Congress had voted \$10,500,000 military aid for South Korea eight months earlier, had South Korea received only \$200 worth of Signal Corps gear when the Communists attacked, June 25?

Before the Dishes Are Done

By BETTY KNOWLES HUNT

MORE "BI-PARTISANISM": Maybe it was naive, but I always thought "bi-partisanship" was something the two major political parties agreed upon mutually and voluntarily.

But that simply cannot be what President Truman and Secretary of State Acheson have in mind when they keep insisting that our foreign policy must be "bi-partisan". As the days and weeks go by, it seems more and more obvious that what they mean by this term is a policy which is determined by the top executive hierarchy, and meekly accepted in toto by all other Americans—without question or alteration.

Take, for example, the new Communist-control bill, which, although it applies to domestic affairs, was motivated solely by the international situation. If ever Congress delivered a bi-partisan vote it was on this bill, which passed the House of Representatives by 286 to 48, and the Senate by 57 to 11. To make it even more emphatic, this overwhelming "bi-partisan" vote was cast by a Democratic Congress over the veto of a Democratic President!

What is the "bi-partisan" opinion of the Senate, or of the American people, on these matters? No official vote or referendum has been taken, but from the record of recent Congressional debates, and from the results of recent Gallup Polls, it seems highly doubtful if the President and his Secretary of State could command a "bi-partisan" majority of either the Senate or the American people in support of their views on these matters. Our Constitution insists that foreign policy must be made by the Executive Branch, "with the advice and consent" of the Senate. It looks suspiciously as if "the advice and consent" of the Senate is to be expediently ignored!

The Low Down from Hickory Grove

More and more, we look like Europe. But we talk about "freedom" — listen to speeches, coast to coast. Everybody is for freedom — it is unanimous. You as a little innocent sample, you go to work and discover a likely looking rifle in some creak and looking you are free to go about putting in a water-wheel and dynamo for turning out some kilowatts, you will learn something about freedom.

Even if it is your very own savings that you will spend on the creek, your very own do-re-mi, you will not proceed. You must ask the Govt., just as it is in Europe, Europe tells you citizens where to get on and off—it makes its socialist kilowatts, it runs the telephone, the railroads. Europe, that is, and who chooses to move to Europe.

Too many good citizens up and down our Main Streets and elsewhere, you will not scan our Govt. road map. The flowering speeches on "freedom" we hold the bag. Look at the 3 men at Morristown, Tennessee, and their astounding feat: whether our forces shall cross the 38th parallel, or whether they must leave the Communist aggressors in control of North Korea, are to be decided not by the General in charge, or his Commander in Chief, but by a majority of United Nations' members, regardless of whether they have contributed a single penny or drop of blood to the battle, or even whether they have actually aided the aggressors!

And these same side-line or even enemy nations are to have an equal voice with the United States, which is doing nine tenths of the fighting, and paying 99 per cent of the bill, in deciding all post-war matters in Korea as well. We are paying the battle bill, and it is a foregone conclusion that we will also be handed the post-war bill as well, whether we like it or not!

Now to Finish the Job

WASHINGTON — Solicitor General Nathan Perlmutter has persuaded Secretary Dean Acheson to postpone any challenge of a California court's decision that certain civil rights provisions of the United Nations Charter supercede and virtually nullify state and national laws affecting the lives and properties of minority groups living in this country.

This peculiar and provoking question arose when the California Circuit Court of Appeals declared unconstitutional a law preventing Japanese from owning land in that state. The jurist held that it violated Articles 55 and 56 of the UN Charter, which guarantee the freedom of minorities with respect to ownership of property and other civil rights. The state immediately appealed the decision to California's Supreme Court.

Many other commonwealths, especially in the South, are interested parties for fear that UN guarantees may be cited by aggrieved individuals as superior to state laws affecting the colored race. So, the attitude of the administration has become a matter of grave concern in legal and political circles.

REINFORCEMENT — Both President Truman and Secretary Acheson hold that neither the UN Charter, the Universal Declaration of Human Rights nor the Genocide Treaty can invalidate state or federal laws on such questions as freedom of individuals, the press, radio, the screen, equal rights for women etc., even though a treaty is supposed to be the highest law of the land.

Secretary Acheson, last July, sent a similar letter to Mr. Perlmutter, asking him to intervene as a friend of the court to set forth the administration's interpretation. California law officers welcomed this reinforcement. But they have been amazed at the government's failure to enter the case.

The explanation is that Mr. Perlmutter thought it unnecessary at this time. He prefers to wait until the California Supreme Court has acted, for it may upset the lower body's decision. If not, he would intervene when an appeal is taken to the U. S. Supreme Court. He agrees with state, however, that neither the United States nor the states have surrendered their sovereignty to the international organization.

TREATY — Regardless of the California litigation and the administration's positive attitude toward the legal preeminence of international agreements, the California controversy may endanger Senate ratification of the Genocide Treaty that was passed over at the last session.

This convention was designed to punish future imitators of the Nazi leaders, who proclaimed their plan of exterminating the Jews and other racial minorities in Germany. But many eminent lawyers, including the American Bar Association, maintain that its provisions are too extreme, especially Section B of Article II. This clause provides for punishment of anybody who causes "serious bodily or mental harm to members" of national, ethnic, racial or religious groups. It does not specify that only those who try to wipe out a whole race or vast portions of the population shall be indicted and tried. It merely says that any harmful act, physical or mental, against "members" shall be considered an international crime. That covers a lot of ground, legally, socially and politically.

National Whirligig

news behind the news

By RAY TUCKER
WASHINGTON — Solicitor General Nathan Perlmutter has persuaded Secretary Dean Acheson to postpone any challenge of a California court's decision that certain civil rights provisions of the United Nations Charter supercede and virtually nullify state and national laws affecting the lives and properties of minority groups living in this country.

Many other commonwealths, especially in the South, are interested parties for fear that UN guarantees may be cited by aggrieved individuals as superior to state laws affecting the colored race. So, the attitude of the administration has become a matter of grave concern in legal and political circles.

The Doctor Says

Director of Research Southern States Industrial Council Nashville, Tennessee

Many people become terribly alarmed if they are told that they have—or one of their children has—a heart murmur. Doctors are particularly responsible for this attitude of fear because years ago they, too, considered any heart murmur as quite serious and often put a person to bed for months at a time just because a murmur was different.

Just hearing a heart murmur is not enough. It is necessary to decide whether the murmur is a sign of serious heart disease and whether it is active or healed. Children frequently have heart murmurs which do not reflect any true disease of the heart. These are called functional murmurs. They are outgrown in time, and do not have any serious meaning.

The murmurs of the heart coming from disease are most commonly caused by rheumatic fever. Some, particularly in children, are the result of birth defects of the heart, and are called congenital murmurs. There are a few other possible causes for heart murmurs, but those two are by far the most common.

Most of the heart murmurs from birth defects are fairly serious. Some of them are responsible also for the "blue babies" of which everyone has heard. Today some of these birth defects of the heart can be corrected by surgery. The question of what to do for those with murmurs caused by rheumatic fever is a complicated problem. It is necessary for the doctor to decide whether the injury to the heart valve (which is causing the murmur) seriously interferes with the function of the heart or not. It is also necessary to decide whether the injury to the valve is healed or is active and is continuing to get worse.

VICTORY FOR THE UNIONS BY CONSENT OF CONGRESS

(Railway Age)

VICTORY FOR THE UNIONS BY CONSENT OF CONGRESS (Railway Age) President Truman has contrived under duress to glue one more blowout patch on the off-punctured Railway Labor Act, so the railroads are still running by the kind consent of Messrs. Hughes and Kennedy. Next to complete capitulation to union demands, seizure of the railroads by the military authorities was just what the brotherhood leaders wanted. They expressed their derision for emergency board appointed by the President; they appropriated many days of the valuable time of one of the President's ablest assistants—Dr. John Steelman; and they imposed heavily on the time of the President himself. The Chief Executive is not, of course, so free of other important duties that he can afford the time thus to act as mediator every few months in a dispute involving 15 one-hundredths of one per cent of the population. If the grievances of all the rest of the American people were to receive from the White House proportionately as much attention as the railway unions insist upon and get, then the President and his staff would have no time at all to devote to public business.

Who is to blame for this state of affairs—practically hand-made to give the creatures in the Kremlin the very kind of propaganda support they need to portray the United States as a chaotic horde of greedy and disunited self-seekers? Are the union leaders at fault when the law—as actually enforced, or rather not enforced—puts a premium on the kind of anti-social conduct which has become a habit with them? No; the union leaders have simply been following the pattern of maximum benefit to themselves as permitted under the existing law as it is administered. Union leaders who, under such circumstances, would tamely accept an "emergency board" award would probably soon cease to be union leaders. Experience has shown again and again that unionists invariably get additional concessions when they flout the recommendations of "emergency boards"—so that they may be expected to go on doing so ad infinitum, until some teeth are put into the Railway Labor Act.

NEEDED—TETH Putting teeth in the Railway Labor Act is the duty of Congress—nobody else can do it. Yet that body, with railway strikes or the threat of them now practically a constant occurrence, refuses even to consider the Donnell Bill, which is the only practical proposal now available for enforcing once for all the peaceful settlement of labor disputes on the railroads. Even the Republicans seem to be cold to Senator Donnell's project—including a good many who are reputedly "anti-union." The reason we have these strikes, or the threat of them constantly hanging over us is that Congress has enacted various legislation which makes it practically impossible for a railroad to fight a strike (i. e., the law against the interstate transportation of strikebreakers); and because Congress remains inert when repeated strikes and the economic demer-

ENTS with a heart murmur is now considered to be pretty good. Many people with this symptom can engage in all but the most strenuous activity, and lead practically normal lives. Many more are perfectly all right unless they overdo in some wholly unnecessary way. Certainly, the alarm of the past is no longer justified. As time goes on, more and more is being learned about this subject, can be expected from our increasing knowledge about rheumatic fever. If this disease can be conquered, then the number of people with heart murmurs will become greatly lessened.

So They Say

To get to the top, advises a banker, start at the bottom. And also on the level.

Radcliff Puts 'Spark' in Pampa's Industries

Company Operated by Radcliff Bros. Important to Success of Local Firms

Ford's Shamrock Boys Ready for Winter Check

It can't be said that Charley Ford is running around with coat collar upturned and hands in pockets as a sign that the weather is changing. However, he's the last boy in town who would let you get by with any damage to that fine automobile you drive. Especially in light of recent government action does your car become more important to you. For that reason Charley, the motorist's best friend, wants you to drop in for a checkup.

Charley's latest warning to the Pampa motorist is that the recent run of weather is treacherous. It looks like summer, it feels like summer, but winter is pretty close. Just because the last winter was extremely mild is no guarantee that this one will follow suit. Even the veteran Panhandler should take action against the possibility of a sudden change in weather.

In short, it's time you got that car in to Shamrock Service and did something about preparing for winter weather. It isn't too hot to do something about lubrication, transmission-differential and wheel bearing checkup. Most important of things to investigate this time of year is the cooling system on that automobile. No one has indicated that anti-freeze will be short this year, but it isn't wise to gamble. That car has a lot of stodge in the cooling system. It needs a scientific clean and flush job. Then, don't say you weren't warned, sufficient antifreeze to protect that "buggy" under any conditions. Charley is ready to do the job for you. He'll check the car from stem to stern, advise you on points that need major service or mechanical attention, drain that cooling system and apply the necessary cleaning agents. Best of all, he'll see that your cooling system is filled with high grade antifreeze that will save you many dollars and much time.

When the subject of power is brought under discussion, it doesn't take long for the informed denizens of the city to bring up those names carrying considerable weight and authority anent the subject. Pampa is no exception to the condition. Start an argument or a discussion on electricity, commence the naming of the leading electrical supply houses. You'll have a pretty desultory discussion without the name of Radcliff.

Even though the city hasn't attained too much age, and at 1111 years old, it has its organizations called young. The majority of these organizations answered to the title of venerable. Such an organization is Radcliff Brothers Electric Co. Radcliff Brothers Electric Co. has become synonymous with electric products in Pampa.

If anyone attempts to overlook the concentration of business on the south side of the underpass, he'll be brought up short by Glenn Radcliff with his notation of the fact that the majority of Pampa business houses are south of the tracks. The majority of Pampa's income, without a doubt, stems from establishments operating in the "older" section of town.

Among the older members of this select group of businesses is the Radcliff enterprise. Radcliff has been a potent name in the supply business, especially electrical supply, for more than 38 years.

To the average person, there isn't much romance attached to an industrial or commercial name. However, were we to dig below the surface and examine the impact on our daily lives of the average local business, we would be overwhelmed by the importance of the firm.

Perhaps the names of the companies represented at Radcliff mean little to you, but they have tremendous importance in your existence. A quick glance at the list reveals Lawson, Wisconsin, Briggs-Stratton engines and parts, Fuller light plants and replacement parts of all description. If you are aware of the method of supply water in this country you'll realize that one of the names contained in Radcliff stocks is pretty important to you. One of these famous names pulls your water supply to the surface.

Many a local organization otherwise without power, is supplied with power and light from without electric power you'd be in a spot for radio performance. Lots of homes and farms would be without light, modern conveniences of related nature, and many farms would pump water with an old windmill of hand-pump machinery on the power line, pump engine, or magneto give you trouble at an inconvenient time, don't condemn it and bemoan your luck. Go to Radcliff Brothers Electric Company and let the experts who know how to set and service department. This department has a full line of factory-approved replacement parts and repair units for each of the products obtained from the Radcliff organization.

It has been a policy of Radcliff Brothers Electric Company to underwrite the performance of their merchandise. Consequently, they are completely equipped with a scientifically organized and operated service department. This department has a full line of factory-approved replacement parts and repair units for each of the products obtained from the Radcliff organization.

As you no doubt know, Bert takes a fling at selling and servicing an outboard motor or two. Along the way he managed to latch on to the franchise for the Johnson Seahorse. There are few boats in the area with outboard motors on them that aren't powered with an outboard from Bert A. Howell & Company. Needless to add, the motors are of the popular Seahorse variety.

It wasn't enough for Johnson to build a good motor and let Bert sell it. Now, the Johnson company comes forth with the most welcome motor news of the year. The new and completely redesigned Johnson '25'. This new motor is known as America's most powerful alternate firing twin. It is characterized by smooth performance, compact assembly, and light weight. The '25' weighs only 85 lbs. while the '20L' hits a 111 of 85 lbs. The new motor has two cycle, alternate firing, 2 port automatic intake, 3 ring aluminum alloy pistons, forged steel ground rods with caged needle bearings large end, steel back bronze pin end.

Johnson has improved vertical adjustment to quick-set thrust socket type of vertical adjustment. No tools are required. A simple hand operation puts the motor in proper position to deliver maximum thrust. The new motor has automotive-type choke, a three position gear shift control, with automatic speed limitations in neutral and reverse to prevent

Bert Howell Announces New Seahorse Outboard

The man who supplies everyone in Pampa with mechanically produced heat and cold, the genial gentleman of Frigidaire, Koch, Utility, Rheem, and so on, is back in the news again. This time it isn't with a story about Fairbanks-Morse heaters, nor is it a blurb about airconditioning and what it will do for your year-round wellbeing and comfort. This time it's a bit about an item that is dear to the hearts of all sportsmen.

It would be foolish to ask the informed person if he knew that Howell, the man with the air-conditioners, dabbled in anything besides airconditioning and heating equipment. In the first place, the word dabbled would be a misnomer. Bert Howell never dabbles in anything, except golf; he hits anything he tackles as if it were the last thing he ever intended to do. Maybe that's the reason for his success.

As you no doubt know, Bert takes a fling at selling and servicing an outboard motor or two. Along the way he managed to latch on to the franchise for the Johnson Seahorse. There are few boats in the area with outboard motors on them that aren't powered with an outboard from Bert A. Howell & Company. Needless to add, the motors are of the popular Seahorse variety.

Leopard Skin Suit For Males on Beach

LOS ANGELES —(AP)— Fluorescent fabrics, and a leisure suit of pure silk tweed, are a few of the style notes from the Roundup of Fashions, a four-day trade show by the Southern California men's apparel industry to an estimated 3,000 buyers from all parts of the nation.

Short sleeves are in overwhelming demand for sport shirts. Loafers jackets are somewhat more dapper, with silk tweed, rayon with raw-silk, and sueded rayon used.

And on the beach, if you dare, bikini-type trunks of something that looks like leopard skin.

Fuel tank, speed control, carburetion, are all improved to a point of satisfaction for the most discerning operator.

What more can the boat owner ask in a motor than counter-balance crankshaft, forged steel connecting rods, aluminum cylinder block with cast-in iron sleeves, removable cylinder head, convenient hand-holds, protected power head, steam-lined gear case, automatic co-pilot, hi-thrust for split second acceleration and DEPENDABILITY.

Most surprising of all is that the new Sea Horse '25' can be purchased for a price equal to the '49 and '50 model 16's.

LUCK IS PLUCK (With One Letter Missing) There is no luck in the fact that the PAMPA DAILY NEWS has a larger circulation in the City of Pampa than there are homes in the city. People buy newspapers to get the news of the day, particularly home town news. They want to know what their friends and neighbors are doing... who's going where... who's engaged to be married... who's in trouble... how many new babies... and so on down the list of home town happenings. Circulating more papers than there are homes in the city is something of an achievement. It doesn't happen very often, but it happens all the time with the PAMPA DAILY NEWS. All of which proves that the local merchant can reach every home in Pampa every day of the week (except Saturday) by advertising in the PAMPA DAILY NEWS. No other advertising medium gives so complete a coverage at a cost so small. THE PAMPA DAILY NEWS

First Baptist Women's Groups Hold Study Periods in Members' Homes

The home of Mrs. W. F. Dunn was meeting place for the Eloise Cauthen Circle, with Mrs. Eula Riggs opening the meeting with prayer. The devotional was given by Mrs. A. Z. Griffen. Current events were given by all members present and the closing prayer was led by Mrs. Roy Lewis. Others present were Mrs. E. L. Anderson, Mrs. C. A. Scott, Mrs. Owen Johnson, Mrs. Tom Duvall and a visitor, Mrs. M. L. Epps. The meeting of Nov. 8 will be in the home of Mrs. L. H. Anderson, 708 E. Kingsmill at 9:30 a.m.

Mrs. Chris Grissom was hostess Monday night to the Roberta Cox Circle. The meeting was called to order by the chairman, Mrs. Kenneth Cook. Mrs. Bill Garrett opened the meeting with prayer. Mrs. Gene Davis gave the devotional. The program on "Current Events" was given by Mrs. Paul Barrett and Mrs. Cook. The closing prayer was led by Mrs. Mike Porter.

Refreshments were served to 10 members.

The Bible study will be taught by Mrs. Denver Allen in the home of Mrs. A. B. McPherson, 1432 N. Russell at 7:30 on Nov. 6.

The Mae Deter Circle met in the home of Mrs. C. E. Powell. The chairman, Mrs. Harold Cockburn, was in charge of the meeting and opened it with prayer. Mrs. L. W. McElrobin gave the devotional and was also in charge

TEEN TALK

By VIVIAN BROWN
 AP Newsfeatures

It's all the little "firsts" that keep popping up about now that make you conscious that this is a pretty important time of life. There's that first touch of lipstick which must be applied with a deft hand to avoid the "painted lady" look. . . . Those first high heels that you learn are for parties and special dates, definitely not daytime shoes. . . . That first perfume that should cast a magical aroma about you, not the overpowering scents used by a sophisticated woman. . . . The first real "date," an exciting experience whether you go to a moving picture or just for a walk. . . . So too it goes with your first off-the-shoulder evening gown, fancy be-ruffled panties, girdle and bra—getting to be a big girl in even more fun than you thought. . . . During this figure-conscious period young bodies need very careful support. Shoes are selected so that arches and ankles are adequately supported. Girdles and bras should be fitted by experts to help mold curves and contour properly. . . . Bosom muscles are sensitive and "tone" is a word which you often will hear used in describing the healthy performance of the muscles. When proper "tone" is not present, the cause often is due to undue strain, suggests Edith Lances, brassiere designer. . . . Miss Lances says the first function of a brassiere is a corrective one. It should give natural lift and support muscles to preserve tone of breast muscles. . . . She advises being fitted at a reliable store whether you've got \$2 or \$10 to spend. Ask the fitter advice about the type of bra you should wear. . . . There are a number of bra styles. A bandeau is the short brassiere that ends just below the bustline. A long-line bra is another variety that comes down to the waist—designed for women who need midriff control. Wired bras are used for deeper separation purposes—not usually worn by very young girls. . . . Miss Lances advises that you never buy a bra without first trying it on. After you've made the proper choice, go into the dressing room and have an actual fitting. Straps should be adjusted to the exact length to insure keeping the bustline in a natural position. If elastic is used, see that it is full and broad. . . . Sometimes frequent washings stretch the elastic and change the fit of the bra. A bias cut bra should keep its shape because the design follows the natural line of the bustline. . . . Not every girl is endowed with a bosom which will adequately fill out a dress, but according to Miss Lances, this is no problem. Any good fitter, she says, can work a little discreet padding into the bra. This is commonly done. Many of New York's finest dress models wear that type of bra. . . . On the other hand the girl who is over-endowed can be fitted to reduce that top-heavy appearance. She should wear an obtrusive bra, one that will serve its function but not be obvious in outline. . . . A well-chosen bra can accomplish so much, so learn to select your clothes with an eye to "optical illusions." Miss Lances advises that if you're small bosomed favor little fitted dressmaker suits with short jackets that taper in at the waist, for a more feminine and flattering silhouette. Wear as much tucking and pleating over the bosom as possible. Strapless evening gowns can be worn if shoulders are good by choosing a design that is softly manipulated across the bosom, with a curved or petal neckline and a snug waistline. . . . If you want to make the least of your bosom, stay away from snug clothes. Sweaters should be brought a size larger so as not to emphasize the bustline. Hip-length jackets with v-necklines help carry out the slimmer look. Single-breasted jackets, fine small patterns and open or V-necklines should be your guide. Clothes should be fitted a shade too loose under. . . . The arms to avoid the strained look across the bust. Avoid tucking, pleating, draping, fullness or huge flowers at the bodice. . . . who wish to drink the bride's health in champagne and which wouldn't be alcoholic enough to offend any guest. . . . If I were you and wished to, I would serve a champagne punch, and coffee for those who don't care for the punch. . . . The South American hoatzin bird can climb trees before it can fly.

Doughnuts Go to Halloween Party

ALL IN THE HALLOWEEN PICTURE—apple cider, doughnuts, black cats and trimming.

By GAYNOR MADDOX
 NEA Staff Writer

Ever pass a dish of doughnuts to a crowd of teen-agers? They gobble them in a second. So plan to serve them in black cat boxes with sweet cider if you want your teen-age Halloween party to be a huge success. Here are a few donut games for that Halloween party:

Improve Your Telephone Voice

By ALICIA HART
 NEA Staff Writer

Despite the fact that the telephone has become so commonplace as to be taken for granted in our daily living, many women have never learned to talk on the instrument. . . . Technically adept at putting their calls through, and well-versed in the rules of telephone etiquette, they still create an unfavorable impression upon their listeners because of their voices. . . . Women who claim they don't like to talk on the telephone are usually admitting their discomfort. Their point—that the facial expressions observed in personal chats add much to any conversation—is a valid one. . . . Be that as it may, if they plan to use the telephone as a medium of communication, they should accept its limitations and set about correcting their own failings. . . . One particularly unfortunate telephone voice is the meek, mild one that makes listeners yell "What's that?" and "Louder, please." No matter how competent a person you may really be, the person at the other end of the wire is likely to conclude that you are ineffectual and without self-confidence. This is a handicap in both business and social relationships. . . . Equally unattractive is the telephone-shouter who attempts to convey her message by vocal power alone. Not only is such a voice unpleasant to the unfortunate ear at the other end of the line, but it also marks the shouter as being unsure both of herself and of the instrument. . . . Affection is also to be avoided when speaking on the telephone. Don't "put on" a special voice; it makes you appear insincere. . . . If you have voice problems even when talking with people face to face, take particular care to speak your best on the telephone. Nasality, whininess, flatness and accents are likely to be intensified when passed through the wires. . . . A cup of dried skim milk and 1 1/2 ounces of butter added to a quart of water will give the same food value as a quart of whole milk. . . . When your cold gets into your throat and chest and cough develops, work fast. Creomulsion relieves quickly because it: 1. Soothes raw sore throat and chest membranes. 2. Loosens and helps expel germ-y phlegm. 3. Mildly relaxes systemic tension. 4. Aids nature fight the cause of irritation. 5. Has stood the test of millions of users. . . . You must be pleased or your druggist will refund your money. **CREOMULSION** relieves Cough, Chest Cold, Acute Bronchitis

Pass the Donut.
 The group splits into teams of not less than six each. Boys and girls, alternating, sit on the floor, one behind the other. The leader of each group balances a donut on his nose, and without touching it, has to pass it onto the nose of his teammate sitting behind him. She, in turn, still without using her hands, passes the donut back to the nose of the boy sitting behind her, and so on. If they use their hands or drop the donut, it goes back to the leader who begins all over. The first team to navigate the donut successfully from one end to the other wins. And it's hilarious fun to see the members of both teams trying to engineer the difficult feat and keep their eyes on the other team's progress. . . . Bobbing for Donuts
 Hang donuts on rubber bands (don't string) from the chandelier. The contestants stand behind their backs; and, at a given signal, have them start munching the donuts. The first one to finish and whistle the first two lines of "Dixie" is the "winner" and receives the prize. . . . Donut Snatch Dance
 Finally, this perfect icebreaker: Each girl, as she enters the house, is provided with a donut. This donut has a bow of red cellophane ribbon tied around it—distinguishing it as the donut. She is asked to carry this around with her, and warned that any man who is able to snatch a bite of it without using his hands, is entitled to dance with the young lady. Since she must carry it at all times, even while dancing, other men can "cut in" by biting the donut as she dances by. . . . Incidentally, by reversing the procedure and having the boys carry the donuts, and the girls on the donut-snatching end, even funnier results can be obtained; at the same time it solves the wall-flower problem, since the girls win dances simply by snatching bites of donuts.

What's RIGHT?
 You would like to introduce a friend to a group of acquaintances but are not sure you can remember all of their names. **WRONG:** Don't start the introductions. **RIGHT:** Realize that it is better manners to make introductions when they are called for even though you have to ask names than to omit the introductions entirely. The popular equivalent of Punch and Judy in France is Guignol.

Grace Friend

CHAMPAGNE FOR THE WEDDING
 Dear Mrs. Friend:
 I have a problem to solve about the reception at our wedding. My parents said I should decide, and I have in turn decided to ask you what to do.
 I am to be married next month in church, and three will be a reception following. My parents do not serve wine or liquor and most of our relatives are very definite in their opinions about this matter. My fiance's family do not "drink" but they do serve wine with special dinners and I have seen them serve a hot toddy after winter sports when we all went to their mountain cabin for a snow party.
 My fiance just assumed that we would have at least one toast in champagne at our wedding reception, but I told him we'd better not. He did not object, but seemed a little disappointed.
 So I asked my father and mother if we might have champagne at the wedding and Daddy said "if you want it, I'll be glad to get it." Mother says we should think about it, as it would insult my aunts and uncles who think it is a sin to taste it.
 What do you say, Grace Friend?
 Yours, A.P.R.
 Dear Miss R:
 In this era of tolerance where drinking is concerned you should be able to serve a champagne punch which would satisfy those

On the other hand the girl who is over-endowed can be fitted to reduce that top-heavy appearance. She should wear an obtrusive bra, one that will serve its function but not be obvious in outline. . . . A well-chosen bra can accomplish so much, so learn to select your clothes with an eye to "optical illusions." Miss Lances advises that if you're small bosomed favor little fitted dressmaker suits with short jackets that taper in at the waist, for a more feminine and flattering silhouette. Wear as much tucking and pleating over the bosom as possible. Strapless evening gowns can be worn if shoulders are good by choosing a design that is softly manipulated across the bosom, with a curved or petal neckline and a snug waistline. . . . If you want to make the least of your bosom, stay away from snug clothes. Sweaters should be brought a size larger so as not to emphasize the bustline. Hip-length jackets with v-necklines help carry out the slimmer look. Single-breasted jackets, fine small patterns and open or V-necklines should be your guide. Clothes should be fitted a shade too loose under. . . . The arms to avoid the strained look across the bust. Avoid tucking, pleating, draping, fullness or huge flowers at the bodice. . . . who wish to drink the bride's health in champagne and which wouldn't be alcoholic enough to offend any guest. . . . If I were you and wished to, I would serve a champagne punch, and coffee for those who don't care for the punch. . . . The South American hoatzin bird can climb trees before it can fly.

ACTUAL CASES WHERE HADACOL HAS RELIEVED NAGGING PAINS IN ARMS, LEGS, BACK, SHOULDERS
 When Due to Lack of Vitamins B₁, B₂, Iron and Niacin in Their Systems!

Mrs. Laurence Theriot, 740 Arabella Street, New Orleans, Louisiana, is most enthusiastic in her praise of HADACOL. She states: "HADACOL has been a blessing to me. For quite some time I suffered pains in my arms and hands. Then I tried a bottle of HADACOL and was greatly relieved. After the third bottle all pains left me." (HADACOL gives such wonderful results because it actually relieves the REAL CAUSE of aches and pains when due to these deficiencies. And continued use helps prevent such aches and pains from coming back.)

Mr. Harry Springer of 5608 Greer Avenue, St. Louis, Missouri: "I had nagging aches and pains for some time and I continued to suffer pain. Then I read about HADACOL in a newspaper. I bought the first bottle and within a week I felt quite a bit better. And since taking the third bottle I have no pains at all. Right now five of my co-workers are taking HADACOL on my recommendation."

Mrs. Ebel Caraway, Box 192, Clay, Louisiana, who had such a deficiency: "I had been suffering from pains in my neck so bad I couldn't sleep and had no appetite. I decided to try HADACOL, since the testimonials of so many people convinced me it was worth a chance. After taking only one bottle, all the pain and soreness had left my body. I found my energy had returned and now I feel better than I have in years."

WHY HADACOL GIVES SUCH WONDERFUL RESULTS
 ACT NOW—HADACOL is not a quick-acting pill which gives symptomatic relief—HADACOL gives such remarkable results because it actually relieves the REAL CAUSE of aches and pains when due to lack of Vitamins B₁, B₂, Iron and Niacin in the system. And continued use of HADACOL not only helps give continuous, complete relief but also helps prevent such annoying pains from coming back. A big improvement is often noticed within a few days!
WHAT HADACOL DOES
 The great product not only supplies weak, deficient systems with extra quantities of Vitamins B₁, B₂, Iron and Niacin but also beneficial amounts of precious Calcium and Phosphorus—elements so vital to maintain good health and to help guard against such deficiency ailments. **BE FAIR TO YOURSELF.** Start taking HADACOL today.
 HADACOL comes in special liquid form so that it's quickly absorbed and assimilated by the blood. A big improvement is often noticed within a few days. Buy HADACOL today.

Experts Cite Points Most Important When Planning a Home Laundry

When you start to plan an all-electric home laundry for your new home or to remodel your present one, laundry specialists name three points you should consider: (1) the location in the house; (2) the function of the room;—will it be a laundry solely, a general utility room or a combination kitchen-laundry? the arrangement of appliances, counters and cabinets for efficient "assembly line" washday operations.

Advance planning before you build will make the most effective use of available space and avoid guesswork and makeshift installations which later cost you needless climbing, heavy bundle lifting, pleasant surroundings, and even peace of mind.

Here is what the experts say on the important points you will want to take up as you plan for future workless washday.

Architectural style of your house, room size, and plumbing location, of course, and in many small one and two story homes, the basement continues to be the laundry. First floor laundries, however, have been voted for by 75 per cent of women planning changes, according to recent surveys, and they believe this location will eventually supersede the basement entirely. The post-war emphasis on the basementless "ranch" house has a direct bearing on this view.

The elimination of stair climbing has been a strong factor in influencing women in favor of the first floor, particularly those with large families who must do laundry several times a week. The pleasant surroundings on the first floor and the accessibility of the laundry room to other household activities, such as keeping an assured eye on the children, proceeding with meal preparations, sewing, mending, and the uncounted tasks a woman faces, makes a difference.

In the two story house with upstairs bedroom, as much as 66 per cent of the family wash comes from the second floor. Since all soiled clothes and linens, changed on the second floor and clean clothes are stored in bedroom bureau or upstairs closets, the saving in stair climbing and clothes bundle carrying is considerable.

While the second floor laundry is thought "revolutionary" by many families, it may well become the standard home laundry of the future in two story structures. The laundry equipment weighs approximately 600 pounds which means no unusual structural problems for the

builder or remodeler. Modern washers do not require bolting to the floor. A fluid drive mechanism on one new washer, for example, eliminates vibration.

Best location for the second floor laundry usually is near the bathroom so that both rooms can be served by one set of plumbing connections.

In farm homes, a first floor utility room is no innovation. The utility room has served many a farm family as a men's shower, a place to hang outdoor clothes, a room for canning, a storage center for extra kitchen supplies. In suburban homes it might double for a sewing and mending room, as a planning center, with desk and telephone, or as a playroom for children when they can't be outdoors.

In new homes and many old ones being remodeled, an extra large kitchen has offered an ideal possibility for a combination kitchen-laundry. This permits easy alternation between cooking and washing without leaving the room.

Good lighting is particularly important in sorting, spot removing, mending, and ironing. Appliances should be located so that doors do not swing into positions blocking use of the devices or cabinets. If no dryer will be incorporated in the laundry in the yard, an outside entry to the room is advisable.

The automatic washer and the electric water heater should be put as close together as possible to eliminate long pipe runs between the two for the hot water. The size of water heater needed depends upon a number of factors; hot water requirements, size of family, automatic equipment

in use (such as a dishwasher in addition to the clothes washer), geographical location. Models are available in capacities from 30 to 62 gallons to meet family needs and pocketbooks. Whether a portable or cabinet rotary ironer is best depends upon space limitations.

Laundry engineers recommend an assembly line order of laundry equipment with appliances arranged from right to left. This puts the water trays at the right followed by the automatic washer and dryer and then the ironer. Modern laundry equipment can fit into as little as five feet of wall space. However, home laundry engineers say that the ideal arrangement is to have a base cabinet between the washer and dryer and ironer. Counter space on the opposite side of the sink from the washer is also advisable. A utility room arrangement allows space for use of accessory equipment such as a clothes hamper on wheels, portable rack for hanging ironed clothes, sewing machine, small desk and telephone, order supplies. In all laundries, of course, linoleum or rubber tile is advisable.

A combination kitchen-laundry may alter appliance arrangement to some extent depending upon location of the kitchen equipment. Laundry appliances can be segregated with the kitchen devices or can be separated by a lunch bar or a low partition.

Before you build, or modernize, you should consult an appliance dealer as well as appliance officials. Dealers who install complete home laundries and kitchens of leading matched brands can contribute greatly to the success of your project for better electrical living.

Expenditures for modernizing and repairing homes are expected to run as high as \$7,000,000,000 this year. This estimate is based on reports of home improvements from retail lumber and building materials dealers. Some 15,000,000 existing houses have been extensively remodeled since the end of World War I. Improvements include new roofs; heating plants; addition of new rooms; modernization of bathrooms and kitchens; installation of insulation and weather stripping; replacement of floor and flooring materials; construction of garages; repainting; finishing of attic and basement rooms.

This unprecedented volume of home remodeling is further emphasized in the annual report of the Federal Housing Administration. It reveals that \$1 in every \$6 of loan insurance written by the FHA is for home repairs, alterations and improvements. Of the cash disbursed in 1949 by financial institutions under Title I of the National Housing Act, 18 percent was used for exterior finish, 12 percent for insulation, 6 percent for roofing.

There are several strong factors which are impelling more people than ever before to modernize their homes. Widespread wage increases, continued high employment, higher dividends from financial institutions and securities, veterans' insurance refunds—all have afforded homeowners the means and incentive to alter their dwellings to meet higher living standards. There is also a heavy movement to remodel existing houses in order to bring a better sales price for them.

Buyers of used dwellings want a structure composed of modern materials with plenty of room and more comfort than most new houses afford for the same expense. The Construction Research Bureau, national clearing house for building information, found in a survey that 87 percent of prospective house purchasers demand high-grade plumbing, picture windows, modern kitchen equipment, fireplaces and other "extras." They also express a strong preference for a fully-insulated house.

Besides the comfort, fuel savings, fire-resistance and other advantages which a home insulated with mineral wool brings, it is asked for because it gives the house a high re-sale value if the purchaser should decide to sell later.

U.S. Bureau of Mines points out: "There is such a widespread demand for insulated houses as living quarters that in the event of resale an insulated house is more easily marketed. The insulated house is also a better mortgage risk for the lender since the borrower's cash position is improved by decreased fuel expenditures and because of the less frequent need for redecoration."

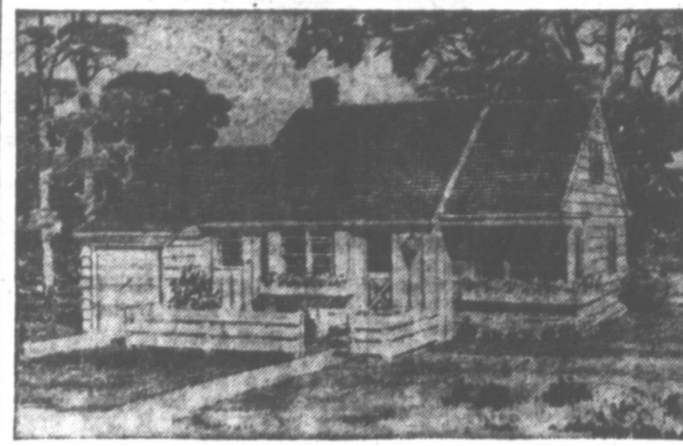

Vegetation is just beginning to reappear in the Valley of 10,000 Smokes in Alaska, 38 years after the eruption of Mt. Katmai.

Three kinds of foxes—red, white and blue—are found on the Aleutian Islands.

Small House With Big Appeal

Rooms of generous size and convenience make up this compact small house designed for 55' lot. The picturesque exterior features a charming facade; decorative door-lantern; finish of vertical board and batten combined with stone and shingles. Expansion attic contains space for future 14'2" x 10' bedroom and space for study, sitting room or sewing room. 17'6" x 11'4" living room is entered through vestibule. Location of kitchen-dinette is convenient for answering door-bell. Central service hall gives access from garage to kitchen, to cellar and to rear entrance. Minimum hall space means maximum building economy. Each of the two first-floor bedrooms has cross-ventilation. Walls and roof areas are insulated with mineral wool to insure year-round comfort, winter fuel economy and fire-safety.

Accessories Set Mood of Room

Proper choice of accessory furniture and decorations reflects the homeowner's personality and good taste, sets the mood of a room and rounds out the interior design.

Accessories should be functional and interesting, and should include such "working" items as mirrors, ashtrays, lamps, clocks, cigarette boxes, vases and prints or pictures.

Selection should be with an eye to scale. Accessories should not be too large or too small for adjacent pieces. A large room

calls for dramatic accessories such as floor and table lamps, large panel mirrors, over-sized coffee-table. Conversely, smaller areas can better utilize decorative pieces in reduced scale such as small end tables.

Too many unnecessary decorations and gadgets give a cluttered effect. Avoid bric-a-brac, excessive carvings and any other gingerbread likely to create dust and make cleaning difficult.

Neighbor Gives Car A First Class Push

HASTINGS, Mich. (AP)—When Cleave Strow, 66, had trouble starting his car, neighbor Leonard L. Willey was glad to help out with a push.

In fact, he pushed Strow's car over an embankment, and his own went tumbling after it. Both vehicles overturned, but neither driver was hurt.

Check House's Condition Before Starting to Paint

By BOB SCARFF
Written for NEA Service

If you are an average homeowner, chances are that your house needs painting badly. At least, that is what the statisticians say. So take a quick look outside to see if they are right.

Before painting, however, check the condition of your house and correct all structural defects. Joints, flashing, siding and tin work must be sound and secure to prevent entrance of moisture.

As long as the original paint adheres firmly to sound wood, light sanding or wire-brushing is sufficient to ready the work for painting. But when the paint has blistered, peeled or checked, it must be completely removed.

If this destruction occurs only in small areas, scraping is sufficient, although it is difficult to avoid a patched appearance unless all the paint is removed over a considerable area.

Where defects are widespread, the old paint should be removed with a blow torch and putty knife. To use, move the torch evenly and carefully over the painted surface with the flame pointed slightly downward, melting the paint just far enough ahead of the putty knife so the knife can thoroughly remove the paint. The torch nozzle should be held three to four inches away from the surface being cleaned in order to soften the paint film.

Good painting requires good materials. That means both your brush and paint. Go to a reputable dealer and let him advise you about the best types of materials for your particular home.

The quantity of paint required for a job is determined by roughly computing the overall area in square feet and deducting for the various openings. Coverage is about 800 square feet per gallon for primer and 600 square feet per gallon for finish coat.

When painting a house, work from the top down. Painting is a fair-weather job, so plan to do it this fall when the weather is cooling. Another reason for choosing this season is that leaf-bearing

shrubbery close to the house will be bare.

Many painting failures may be traced back to the fact that the surface was either damp or drenched with sunlight while being painted. Always paint behind the sun; that is, start working in the morning on a portion of the house that the sun has just left and, as the day progresses, follow it around the house.

In working on siding, the edges should be painted first, then the faces. Do only a few boards at a time in order to avoid unsightly laps caused by brushing over paint that has already set. If the paint is laid on evenly and brushed out carefully, there will not be any runs and sags and the thin, economical coat will adhere properly to the surface.

A common fault is to paint visible surfaces carefully but to neglect the bottom edges of siding, the tops of door and window frames, and other places that don't meet the eye. As these are the spots where moisture collects, covering them is important from the standpoint of protection.

For painting in high places, an extension ladder is ideal. If two ladders are available, by all means secure a pair of ladder irons so you can run a plank between them. A stepladder is handy when painting the lower part of the house.

Q—What type of wax should be used on asphalt tile?—Mr. F. D.
A—Water-emulsion or self-polishing waxes that are free from oils are suitable and safe for asphalt tile. They should be applied as instructed by the manufacturer. Never use paste wax or liquid wax that has a solvent base on asphalt tile. These waxes will soften the tile and mar the surface.

Some 5,000 natives of the Ryukyu Islands now worship at 25 Christian churches of various denominations.

Clean Surface Before Painting

When you plan to transform worn and dirty surfaces into new and beautiful ones with the aid of paint or enamel, it's important to remember that you don't begin by dipping your brush in a can of gleaming color. You start by preparing the surface carefully.

To ready a surface for its new coating, you make sure that it is clean—that it's free from grease and wax—and that it's satin-smooth. In nearly all cases, you also make sure that it is desert-dry.

It's easy to clean a surface naturally, with the prepared cleaners which are dissolved in water. It's a simple matter to remove wax with turpentine or mineral spirits.

Your important task, usually, is to remove the rough areas and old paint that has cracked and is beginning to peel. If it's a metal surface, rust should be completely banished. Your aids, at this stage of the game, will be steel wool, a wire brush, sandpaper and—if you're going to remove the old coating entirely—paint-and-varnish-remover and a scraping tool.

After the surface is clean and smooth, your next step is to fill all cracks, dents or nail holes with a crack-filling material such as putty, wood filler or spackling. These can be applied with a putty knife or even an old kitchen table knife. Next, you sand the filled places smooth and remove the loose dust. After that, you're ready for your new finish. The type you'll need, of course, will depend on the finish you desire and the surface you are coating.

The National Geographic Society says puppets are so old no one knows when they were invented.

Collingsworth Man Hurt as Door Falls

SAMNORWOOD — (Special) — C. W. Roberts, 89, a pioneer of Collingsworth County, suffered injuries of the legs and back, recently, when the overhead garage door on which he was working fell and pinned him to the floor.

Mrs. Roberts saw the accident and was able to lift the door from his body before summoning help.

Roberts came to the county in 1888.

McLean Group Names President

McLEAN — (Special) — Carl Pettit has been chosen president of the McLean chapter of the Future Farmers of America for the 1950-51 school term.

To serve with him will be B. W. Duncan, vice president; Gale Plummer, secretary; D. O. Taylor, treasurer; Dean Helms, reporter; George Railsback, assistant reporter; Eddie Reeves, watchdog; Jesse Roberts, Jr., assistant watchdog; Donald Smith, song leader.

C. J. Magee is instructor and sponsor of the FFA.

Shamrock Principal Named Teacher Head

SHAMROCK — (Special) — Arthur Wells, principal of the Shamrock Junior High School, was chosen vice president of the Wheeler County unit of the Texas Teachers Assn. at a meeting in Wheeler last week.

Wells holds his bachelor of arts and master of education degrees from Texas Tech, Lubbock.

This is his first year as head of the local junior high.

McLean Girl Wins Poetry Contest Place

McLEAN — (Special) — Barbara Barrett, daughter of Mr. and Mrs. Harry Barrett, won third place in the September poetry contest sponsored by Laura V. Hamner of Amarillo.

Miss Barrett is a senior in McLean High School.

FROM NINE TO FIVE

By Jo Fischer

I always set my alarm clock two hours earlier than necessary. That gives me plenty of time to oversleep.

Margaret Truman Makes TV Debut

NEW YORK — (AP) — Margaret Truman made her singing debut on television Sunday night.

"I loved it," the President's concert singing daughter said after the telecast. "Everybody was so nice to me — and I had fun."

Miss Truman, on the air six minutes, sang two songs as a guest artist on Ed Sullivan's "Toast of the Town" (CBS) Variety Show.

The studio audience of 750 gave enthusiastic applause to her offerings—"O'er the Hill," a hunting song from the American Revolutionary War period by Francis Hopkinson; and "My Johann," by Edward Grieg.

In the studio audience were Secretary of the Treasury John W. Snyder and a group of 27 friends of Miss Truman.

The President and Mrs. Truman were reported here to have tuned in on the program in Washington.

The program was carried to 19 cities as far west as Omaha, Neb. CBS reported the audience at 10,000,000.

Samnorwood Erects Monument to Men Killed in WW II

SAMNORWOOD — (Special) — A monument honoring all men from the Samnorwood area who gave their lives in World War II has been erected in a small memorial park set aside for that purpose on the school grounds.

The monument will bear the name of each person who gave his life during the past war.

In addition to the monument, individual markers in honor of teachers and children who died while associated with the Samnorwood school, have been placed in the park.

McLean Family Has Fourth Fire

McLEAN — (Special) — The trailer house of Constable and Mrs. Luke Henley was completely destroyed by fire of unknown origin last week.

Both city fire trucks answered the call, but the fire was already out of control by the time firemen arrived, it was stated. Henley was on duty and Mrs. Henley was out of town when the blaze occurred.

This is the fourth fire to hit the Henley family this year. Several months ago, the residence of Jack Henley, brother of Luke, was destroyed by fire. Later, a barn at the Buck Henley place, east of town, burned to the ground. A few weeks ago, the home of C. E. Henley, father of the three victims, was damaged by fire.

also of Pampa. A men's quartet, composed of Bodenhamer, Bill Day, Homer Wilson and S. A. Cousins, presented a short musical program.

The group will meet once each month.

WTSC Consultant To Hold Classes in McLean School

McLEAN — (Special) — Mrs. Mary Sligar, consultant from West Texas State College, will conduct a class, the third Tuesday of each month, on Child Growth and Development. The course will be conducted especially for McLean school teachers and will be held in the high school building.

Those enrolled in the class are Mmes. Lucille Parker, Lawrence Hauck, Bill Day, Jim Back, Charles Weaver, Helen McWilliams, Merle Norman, Mr. and Mrs. Paul Kennedy, and Alfred Duncan, Tommy Atkins and Jimmy Sanders.

Former Pampan Runs Station at Shamrock

SHAMROCK — (Special) — H. B. Gyne, formerly of Pampa, has moved to Shamrock and is operating a newly-purchased service station here.

Gyne, former Wheeler resident, and station operator, moved to Pampa two years ago and operated a plumbing shop there.

Mr. and Mrs. Gyne have two daughters, Nettie V. and Karmon Sheila. They are in the Shamrock schools now.

Brotherhood Head Named in McLean

McLEAN — (Special) — Sammy Haynes has been elected president of the Methodist Church brotherhood, which has just been organized.

Haydn Bodenhamer was elected vice president and Clifford Allison, secretary.

W. B. Weathered, of Pampa, was guest speaker. He was accompanied by Huelyn Laycock,

Two Irish Girls In Queen Contest

SHAMROCK — (Special) — Shamrock has two girls in the race for queen at Draughton's Business College, Amarillo. They are Freida Johnson and Emma Lyon.

The Collegian Club, composed of young men at the school, made these nominations along with five others. Election date will be just before the club's annual Christmas party in December.

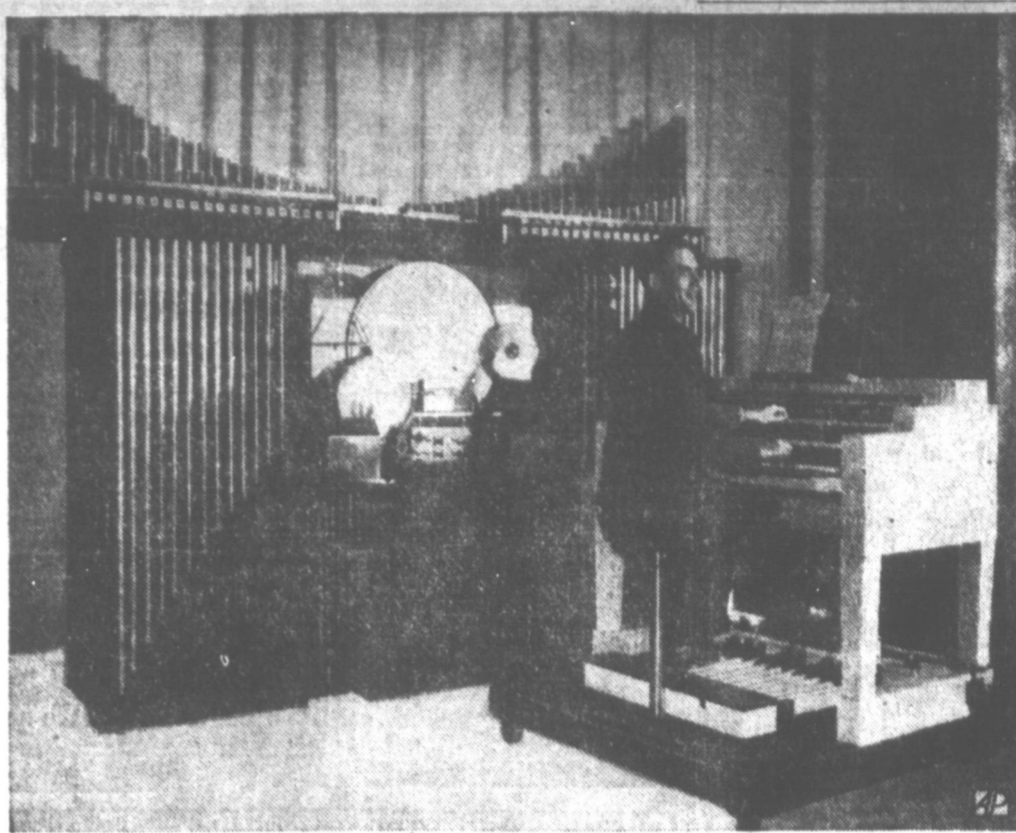

Miss Johnson is the daughter of Mr. and Mrs. Kenneth Johnson, Shamrock, while Miss Lyon is the daughter of Mrs. J. C. Dennis, Lela.

Rotary Governor Visits Shamrock

SHAMROCK — (Special) — Lloyd A. Wicks of Ralls, district governor of the 183rd District, Rotary International, will make two speeches in Shamrock, Nov. 2 and 3.

Wicks plans his annual visit with the Shamrock Rotary Club at a business meeting Thursday at 7:30 p. m., in the Dixie Cafe.

He will be chief speaker at the weekly luncheon meeting of the Rotarians Friday at noon.

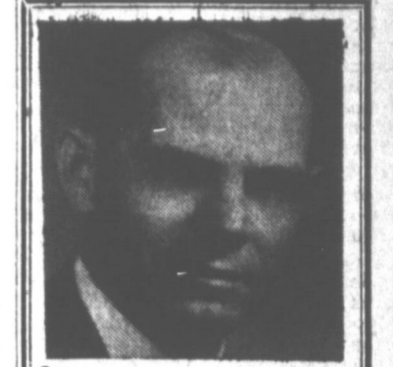

PORTABLE ELECTRONIC ORGAN—Thomas E. Handforth of Temple City, Calif., sits at console of portable electronic organ (background) which he devoted three years of spare time to build. Organ and console are made of parts of scrapped organs. Center movable section of organ has base drum, snare drum, tom tom, wood block, tambourine, castanets, a Glockenspiel and whistles for special effects. Console is mounted on dolly with 75 feet of cable between organ and console so latter can be moved around.

the flying saucer business. Get your friends to help carry the framework outside. You will find it has a strong urge to rise because of the balloons. Be sure you pick a sunny day. You want that aluminum foil to glisten. They say that's what a saucer does.

Be sure there are no trees or telephone wires nearby, then let her go and it will rise into the sky. Once the homemade disc is up a hundred feet or so and moves with the wind, you can't tell the difference from a genuine article.

This should settle the flying saucer problem for all time, don't you think?

Lightning travels too fast to take a zig-zag course, although it may appear to do so.

Ott says . . .

"I am mighty proud . . . Of that new policy contract my company came out with recently — The Jefferson Family Provider. It's a new low cost plan — a special plan for preferred risks only — for a little more than the regular cost of \$5,000 whole life insurance, the plan provides you \$14,460 total protection for your family.

Let me give you further particulars — no obligation.

Flying Saucer Easy to Build, Every Home Should Have One

(Editor's Note: The following story was submitted to the Associated Press with a note that said: "Don't think I'm nuts. I just got fed up with people reporting flying saucers. I made one. It worked fine. We let it go on Friday, a payday when Main Street was crowded with shoppers. It seemed as though every telephone in town went into action.")

By PETE STEVENSON
(Lock Haven Express Staff Writer)
LOCK HAVEN, Pa. — (AP) — This flying saucer business is nothing to get excited about.

It's easy as pie to build one. It's not much harder to make it fly. There is nothing mysterious about it. Any boy who builds model planes can put a flying saucer together in a couple of hours.

It took a little invention on the part of the "flying saucer department" of the Lock Haven, Pa., Express, but on a recent afternoon a saucer flew over Central Pennsylvania. It caused quite a stir and traffic was snarled on Main Street. Here's how it's done:

Go to a shop where model planes are sold. Buy a dozen or so four-foot lengths of quarter inch balsa wood strips. Pick up a few tubes of airplane cement. At a grocery store purchase two or three rolls of aluminum foil. Get a ball of kite string at the dime store — and a box of balloons.

top side or it will lift to the ceiling.

Don't make the circle larger than the front door or you won't be able to get it outside. Keep the balloons inside the two circular sides by lashing the top and bottom together with string.

You are now ready to go into

FAMILY GROUP—Great Britain's first family posed at Buckingham Palace in London for this rare and animated portrait of four generations of royalty. Standing are King George, left, and the Duke of Edinburgh. Seated, left to right, are Queen Mother Mary, Princess Elizabeth, holding her youngest child, Prince Anne, and Queen Elizabeth, holding young Prince Charles.

SOMETHING TO SING ABOUT NOW—Joined in harmony were Mr. and Mrs. Horace Francisco of Butler, N. J., as they celebrated their 70th wedding anniversary. Both are 95.

LONG-STEMMED—Betsy Croft was voted "Miss Corpus Deliciosus" for California State Bar Assn. fashion show.

RED FASHION PLATES CAPTURED—Paratrooper Sgt. James Clifton, of Little Rock, Ark., guards a group of North Korean prisoners captured in the Sukchon area after the Yank air drop last Friday. The Reds wear winter uniforms similar to the type used in Red China. (AP Wire)

WHITE HOUSE PENMAN—Adrian Tolley, head of the executive mansion's social office, demonstrates his penmanship in addressing invitations to White House functions.

SCOOTING ABOUT ROME—Victoria Vaccari rides past Arch of Constantine in Rome aboard a motor scooter, latest fad in Italy. The scooter covers 125 miles on a gallon of fuel.

CELEBRANT—Kristen Schmidt, 16 months old, of Anaheim, Calif., is all set for the city's Halloween festival.

IN AT THE FINISH—Representatives of four countries who helped stifle Communist aggression in Korea stand at ease before the United Nations banner. They are (left to right): Corporal Robb of Australia; Sgt. Harold Gervais of the United States; Cpl. Rhee Hoo, Republic of Korea, and Sgt. Eugenio Bretania of the Philippines.

Rock of Ages Keeps Religion Alive in Bare Korean Church

By BEM PRICE
HAMHUNG, North Korea—It was a bare little church just around the corner from a bombed out electric plant. The small building nestled beside a broad concrete highway. Curiosity impelled us to enter—two correspondents and a former Korean law student from Seoul. We had expected to find it empty; religion rides rough seas in Communist countries. North Korea had five years of Red rule. To our amazement, we heard the rich, resonant tones of an organ. Then young voices lifted in a hymn. Our eyes adjusted to the dim light. They took in an ancient pump organ, four bare benches and a pulpit. A young man was seated at the organ. Ten little girls lined the benches. None was more than 12 years old. The organ music and the singing stopped. The young man looked up, a question in his eyes. The girls looked up, too—and, like little girls everywhere, giggled. Through our Korean friend, we asked them to continue. The music resumed, ever so softly. The organist nodded. The children began singing again. There was no mistaking the hymn. Their young voices rolled out, clear and strong. "Rock of ages, cleft for me..." Before the hymn was finished,

a scuffling intruded from the rear of the church. Through the door came an old man. He extended his hand. The singing stopped. The old man reached into a dilapidated briefcase and drew out a book. He began to read in Korean. Our Seoul friend said the old man was reading from the New Testament. Our Seoul friend, San Ku Lee, began talking with the little gathering. He talked to them of democracy, of the blessings it could bring to people, of freedom from fear, of freedom of religion. They listened avidly—the organist, the ragged old man, the little girls. The chilly October sun cast the pattern of a cross on the floor. Then the two churchmen began talking. Lee translated for us. This had been a Methodist church. During the Red Korean regime, the Communists had banned reading of the Bible. But they had permitted singing. — And through the old hymns, like "Rock of Ages," Christianity lived on in hearts of these Koreans. — In poultry raising, culling is the process of removing from the laying flock those hens which either do not lay at all or produce only occasionally.

Football Confuses Young British Star

HOLLYWOOD—(AP)—Jean Simmons has seen her first American football game, and she's confused. Miss Simmons is Britain's brightest young star. She came here to (1) announce her engagement to Stewart Granger; and (2) to help ballyhoo her latest picture, "Trio." Also, she is taking in some of the local attractions. One of these included last week's grid encounter between U.C.L.A. and Stanford. "It was my first American football game," she told me, "and I must say I was pretty confused. Nobody explained the game to me and I didn't know what they were doing. "I think our own football or soccer, in England is more exciting. The players cover more ground and you don't have the long waits between plays." The young actress admitted the card stunts put on by the rooting sections, but wasn't impressed by the cheer leaders. "I don't like

Solon Says U.S. Must Help Itself

DALLAS—(AP)—U. S. Rep. Ed Gossett of Wichita Falls says America must rely upon its own strength instead of the United Nations for protection against aggression. "A brief review of history should convince us that we must, in the last analysis, rely upon our own strength," Gossett said. "Not since the dark days of the Civil War has this government been so imperiled both from within and without. Our survival in this mad and morally bankrupt world depends upon two things, economic stability and military invincibility."

Let's Re-elect Ben Guill
 The Congressman Who Can Get BOTH Parties to Work For THE PANHANDLE OF TEXAS

THE PICTURE OF INTER-PARTY CO-OPERATION

Ben Guill, Congressman from the 18th District of Texas, is pictured above in a candid camera shot talking with Democrat Sam Rayburn of Texas, Speaker of the House, and Republican Joe Martin, of Massachusetts, Minority Leader, the two most powerful figures in Congress. Because of inter-party co-operation like this, Ben Guill is a member of the powerful House Agriculture Committee. Because of inter-party co-operation, Ben Guill got top Department leaders to travel to Amarillo from Washington for the only small business clinic ever to be held in Texas. Because of inter-party co-operation, Ben Guill has been able to get more attention for the Panhandle than any other Congressman could have got in a full term.

BEN GUILL—through his honesty and ability—is doing an outstanding job as our Congressman. He deserves a full term of his own. Let's re-elect the man who has proved he can do something for the Panhandle.

Re-elect Ben Guill November 7
