Reds Gain 7 Miles in Bloody Fighting

Bitter Battle Shapes Over War Blame

slam-bang battle over foreign policy shaped up today in the congressional campaign with Democrats and Republicans blaming each other for the Korean war.

Senator Wherry of Nebraska, the GOP floor leader, took the firing line to accuse Democrats of trying to "whitewash the Truman administration's blunders that paved the way for war in South Korea."

Senator McMahon. Democratic senator running for re-election in Connecticut. charged Wherry and a majority of the Senate Republicans with having "fought almost every administration ef fort to keep Europe out of the hands of the Communists."

After a shouting word battle over the issue in the Senate yesterday, both sides agreed today that the people are going to hear a lot about foreign policies and the men who make them before the November voting.

Democrats leveled fresh attacks on a statement by four Republican members of the foreign rela tions committee accusing the administration of inviting the Communist attack on Korea by its previous hands-off policy there.

IA Texas Democrat

BY DAVID BAXTER

A Texas Democrat whose name and epistle I am not authorized to print, thinks I'm all wet about Bolsheviks being

democrats and democracy really being alien to American constituthe same time, I notice, with some satisfaction that he's

pretty hot under the collar about the Government (and what is that today if it isn't majority rule without individual rights?) runernment's position all along has been that in grabbing formerly State-owned tidelands, it has done so in the interest of the majority of all the citizenry and State rights be hanged. No State is supposed to even have a right to its own property if the "majority"-the people in the other States decide against it. Here is where plain, ordinary force rules and morality and inherent right go into the ashcan. Democracy in action. I shouldn't think a Texan would be so anxious to defend such a principle.

Now about Bolsheviks. First, let's be reminded that the Russian party which overthrew the debauched old Czardom was not "the communist pary" or "the bolshevik" party. It was properly named The Russian Social-Democratic Party. The "Bolsheviki" were the majority of that party -a democratic party. To this very day no one loves or uses the word "democracy" more than the Soviets. My dictionary defines "Bolshevik" as: "Greater, larger, more, with illusion to the majority." The Democratic Party in America is very properly our Bolshevik party. People who believe in majority rule without qualifications and without regard to right or wrong so long as a majority decides things are Bolsheviks in exactly the same sense that Russian Communists are.

In Russia there were two factions in the Social-Democratic Party, the Bolsheviki (majority) and the Mensheviki. The latter wanted to attain the same collective ends the majority desiredexcept that they wanted to go slower and form a sort of "loyal opposition." The Mensheviks were like the modern Republican Party leadership who "me too" the Nude-Felers heg for "unity" and "bi-partisan" policy while pretending to be an "opposition" group. The Russian Bolsheviks put up with their Republicans just long enough to get their programs going and consolidate it, then they started liquidating the spineless Mensheviks, who richly deserved it.

My dictionary says that "democracy" is "a form of government in which the supreme power is vested in the people and exercised by them or their

The people. The Russian Bolsheviks or Democrats use the word "masses." "Of, by and for the masses." Nothing is said about individuals. Everything is mass this and mass that. The spirit of collectivism. Furthermore moral people could hardly agree that supreme power is vested in the masses of people. It was never intended to be in the United States. This government was founded on human, individual rights and Golden Rule morality. as exemplified in the Declaration

of Independence (and who can be independent and ordered around by agents of majorities at the same time?) While the Constitution compromised a bit, it nevertheless provided for the Bill of Rights, which guaranteed each citizen certain rights which no majority could ever take away by vote or otherwise. That fact of rights alone deprives the people or masses or majority of any supreme power. They have no supreme power, for example, to stop you from thinking, speaking, writing or worshipping as you please. But under a democracy which does vest supreme power in the people, they do have power to suppress any or all of these rights. And that is what is growing on us today-instead of a constitutional Republic: we are becoming a democracy, agents of majorities dictating everything and rights be dashed. Initiative

Burns or scalds of the skin accounts for many deaths and serious or unsightly scars. Most

of them could be prevented by little caution. Also prompt and intelligent emergency treatment can often help to avoid the most dangerous effect

of heat. The damage done depends upon the surface involved, the heat of the object causing the injury, and the length of time during which the skin has been in contact with the source of heat. Hot solids or liquids are the most common causes of burns, Sliding down a rope, chemicals, electricity and such agents as ultraviolet lamps, X-rays, and even sunshine also cause particu-

lar kinds of burns. In first degree burns there is merely some reddening of the burn. Second degree burns cause actual blistering of the skin; the skin over the blister has been completely killed. Third degree burns involve not only the skin itself, but also the tissues lying beneath it which are killed and

charred. Slight burns - except those caused by chemicals, X-rays, and unusual types of burning-can be treated by any one of several excellent ointments. These sintments, if they do not have to be applied to too large a skin surface, reduce the pain and aid the healing. They should not be used, however, if the burned surface extends over a wide area of the skin. They can do heal harm in such burns rather than any good. For severe burns, including second and third degree burns, the advice of a physician should be sought as soon as possible. Until he comes, it is wise not to do too much. Loose clothing should be

Large burned surfaces should not have greases, oils, or ointe ments put on them. These are difficult to remove, may produce pain, and often interefere with what the physician wishes to do later. Neither absorbent cotton nor jodine should be applied to the burn. Cotton will stick and injure the skin still more when it is removed later.

Burns caused by chemicals are best treated by washing the area immediately and continuously cluding Fred Broisio, one time with large quantities of water until all traces of the chemical have been removed. Enough readers still seem to be confused on this subject to make it worthwhile to go over the penalty again. If you are one of the dozen or so people who understands this point completely or one of the two or three people who never makes an insufficient meld, I trust you will forgive me for wasting your time with some articles on this subject. If you are one of the great majority I recommend strongly that you save these articles and know exactly what to do when this happens next.

As a starter there is no penalty at all unless you are playing in a partnership game. The reason is that when you put cards on the table illegally you are helping the other players. If you have no partner you are merely helping your opponents and that in itself is enough penalty. However, when you have a partner you may gain an advantage by showing some of your cards il-legally. Hence there must be Chinese Air Force
