It's Only Your Money

Mismanagement in business is something that a healthy number of Americans will not permit.

Millions of stockholders, owners of American corporations, insist on able management to guide their investments.

Still other millions, on payrolls throughout this country, daily contributing to their nation's wealth through production.

Yet, an evidenced lack of management in elected government representatives of the financial condition of this nation is absorbed by far too many of us with a "what does it mean to me" attitude.

It is conceded that should deficit spending federal budgets continue, national bankruptcy will be the end result.

WASHINGTON — (NEA) — There is considerable money business behind Nevada's Sen. Pat McCarran's surprise victory on the \$100,000,000 Spanish loan authorization.

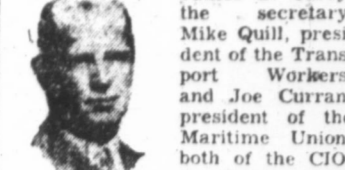

Also, Spain would not be required to live up to the obligations of other Marshall Plan countries. In other words, this is a backdoor approach.

Similar Spanish aid proposals have been made by Senator McCarran in the past, but they have always been defeated.

Fair Enough - Pegler

NEW YORK — The bewildered general public has shown no resistance to the impudent proposition that Philip Murray, the president of the CIO,

By CARRIHER in Pampa 2c per week. Paid in advance (not office). \$2.00 per month, \$5.00 per year.

He is an agent dedicated to execute the Communist program nationally and internationally.

On the same page we find this from Mike Quill, the president of the Transport Workers' Union, consisting mostly of workers in horizontal transportation in the city of New York.

Quill's union followed the Communist line throughout the war. Under Quill, the C. I. O. council of the city of New York issued a flat order to all members to report immediately upon command for any activity that might be assigned to them in any situation.

Without specific announcement to that effect, Quill seemed to turn against the Communists and to join purposes with certain prominent priests of the Catholic Church in the union movement.

However, as far as the public knows, these apparent changes are mere vagaries or fancies. Quill may still be the same fellow at heart who once believed that Bridges was the victim of outrageous plots by enemies of labor.

Mr. J. O. Noah, a neighbor, made a series of color transparencies showing the condition of the baby before Dr. Koch's treatment was used and after that a series of pictures showing progress and recovery.

Is Dr. Koch Right?

Medicine is a little out of my line, except that I know how it can be used for political and selfish purposes.

When too highly organized, just as a unionized labor and other collective schemes can be used to harm instead of help.

Organized Medicine has always furiously resisted the pioneers who tried to be independent individuals, as in the case of Dr. Pasteur and Sister Kenny.

news behind the news

WASHINGTON — President Truman has a family fight and row on his hands as a result of his off-the-record admission that his program of domestic reform must be shelved for the duration of both the Korean emergency and the long-range preparation for a possible encounter with other satellite nations of Russia itself.

In view of the energy and money which will be required to strengthen the United States and its overseas allies for this new world crisis, the president's frank recognition of realities virtually means that the "fair deal" is dead, insofar as he is concerned.

Mr. Truman has never said publicly that there must be such a moratorium on his domestic plans. But, like Woodrow Wilson and Franklin D. Roosevelt, who supported "Dr. New Deal" with "Dr. Van War," he recognizes that the external exigencies and projects must be deferred because of the drain which national defense will impose on the budget, federal personnel and the nation's resources generally.

REVOLT — He top aides, including certain Cabinet members, refuse to accept or abide by this decision. A spirit of quiet revolt and resentment prevails particularly in those executive departments and bureaus which will not expand or enjoy increased budgets.

Already William E. Warner, assistant secretary of Interior, has begun the propaganda of "business as usual" which has been read at the White House.

Declaring that the bill's proponents had "the presidential nod before it was ever introduced," the editorials charge that Mr. Truman responded to "the heat" of the "southern" and "western" industrialists and labor unions.

"We think politics, pure simple and selfish, furnished the basis for presidential disapproval. . . That is the President's most sensitive spot. He judges a lot of things by the yardstick of political expediency. Far more, we believe, than is consistent with reasonable standards of statesmanship."

"If Bob Kerr, Sam Rayburn and other loyal stalwarts from the Southways who have exacted more, they have learned the exact depth of Harry Truman's gratitude and how far he can be depended upon to stand hitched when the heat is on."

Discontent is a powerful success secret in individual lives too. Herbert Vreeland said many years ago to an associate "Do you think I am going to be satisfied with being a conductor? I mean to be president of a railroad!" His co-worker had just told the young man that the most he could hope for was a promotion from brakeman to conductor—where he could make \$100 a month and be "stuck for life."

The Nation's Press

A MAN OF GRANITE

(Truth, London, England)

Once President Truman contrived — and rightly — the Korean aggression as a flouting of the United Nations and all for which that body stands there could be no question of his not being fully supported by the British and other Governments, as there could be no question that once Mr. Attlee proffered that immediate support he, too, would have the wholehearted support of the Opposition parties in this country.

Not a Russian abstention from voting was equivalent to the exercise of the veto may have amused the Kremlin, but they were irrelevant to the true issue, which was not whether the United Nations and President Truman had acted ultra vires but whether open aggression in pursuit of Russian Imperial ambitions could be tolerated.

One of the astonishing factors is the extent to which the United States and with it 39 of the United Nations have been committed to military action in Korea. As long as support for the South Korean forces had been limited to the air, either over the battlefields or even over the appropriate bases and communications centers of North Korea, it could have been interpreted as a gesture of good will towards the invaded and as a lesson to the invader that punishment henceforward will be visited upon all breakers of the peace.

When American ground forces arrived this interpretation became inadequate. The United States then accepted the responsibility of repelling the invading army. Even if the North Korean divisions, variously estimated to be between seven and ten in number, were alone to be encountered the task of mustering an army to fight them would entail serious difficulties for a Power whose four divisions in the Far East are already employed in the occupation of Japan and the other bases, and may also be called upon for the defence of Formosa.

What would be the result if the United States of America were threatened with defeat by the weakest and least significant of the Soviet puppet States? The whole weight of the United Nations would have to be thrown in to retrieve the situation. That, indeed, might be world war.

Should such embarrassment be shared the Americans there must remain the fact that a handful of their troops has been placed on a tiny strip of the teeming Asian mainland, on the periphery of the most formidable military power in the world and flanked by Red China with its victorious revolutionary army and its inexhaustible manpower.

General MacArthur must indeed be a man of granite if he can contemplate without alarm the possibilities of the situation in which he has been placed. His potential foe numbers many millions before a single Soviet soldier need be brought upon the scene.

If you are afraid of it. If the first tinge of a feeling of discontent with things as they are — sends you into a panic, or makes you tense and nervous — then it is a bug-a-boo. But if you recognize it as a friend trying to judge you into something better — then it becomes your friend — and strangely enough you can have a real peace of mind and still feel what the philosophers call a "divine discontent."

Discontent is a powerful success secret in individual lives too. Herbert Vreeland said many years ago to an associate "Do you think I am going to be satisfied with being a conductor? I mean to be president of a railroad!" His co-worker had just told the young man that the most he could hope for was a promotion from brakeman to conductor—where he could make \$100 a month and be "stuck for life."

Vreeland was promoted to conductor. And the chances are very good that he would have been stuck there for life had it not been for his Discontent. Just as he predicted, he did end up as president of a railroad—the Metropolitan Street Railway Company.

Discontent is a bug-a-boo only

The Doctor Says

WRITTEN FOR NEA By EDWIN J. JORDAN, M.D.

SYPHILIS is one of the venereal diseases; it has been fought for so long and with so much success that now there is real hope of eliminating it altogether. It will take time, of course, but the instruments for conquering it are known.

Many years ago a test of the blood was devised by means of which the presence of syphilis could be detected. This test was named after the originator and called the Wassermann test.

There have been several modifications of this test over the years (Kahn, Kline, etc.) and any of the standard tests when properly used and interpreted will show the presence of syphilis even when symptoms are lacking.

Recently many physicians and institutions have started using one or more of these tests on all their patients regardless of symptoms and thus have uncovered a great many unsuspected cases of the disease. Also, many large industrial organizations and indeed whole communities have employed blood tests for syphilis on a mass basis.

By doing this they have found many people who unknowingly had the disease. The fact that such cases could be discovered and treatment started to make the disease non-infectious, has been of great aid in reducing the frequency of syphilis.

Treatment too is improving. For many years the patient with early syphilis could be successfully treated in most cases by certain drugs containing heavy metals such as arsenic, mercury and bismuth. These are still being used with great success.

Now penicillin has been added. In the infectious stage of the disease penicillin seems to work successfully in making the condition non-contagious. To others, there are reasons for believing that it has value in other forms of syphilis.

However, many conservative doctors are not yet prepared to say that penicillin can entirely replace the old and tried methods. This scourge of mankind is coming under control. By means of a multiple attack aimed at preventing its spread from person to person, by mass blood tests, by prompt treatment and by newer methods of treatment, it should be possible to conquer syphilis entirely.

Dr. Jordan will answer questions from his readers in a special column once a week. Watch for it.

## Georgia's Defiance of Court Due Test, Negro Leaders Say

By BEM PRICE

ATLANTA — (AP) — Two Negro leaders said today the willingness of Georgia Democrats to be jailed rather than obey the U.S. Supreme Court might be tested soon.

The comment by Dr. William Boyd and Attorney A. T. Walden came after the state Democratic Convention in Macon defied the high court to open Georgia's colleges to Negroes.

Boyd is state president of the National Association for the Advancement of Colored People and a professor of political science at Atlanta University. He put it this way: "They have thrown down the

gauge. We will have to meet the challenge or break faith with the Negro people."

The convention's resolution yesterday asserted the Supreme Court decisions ordering admission of Negroes to Universities in Texas and Oklahoma were not applicable to Georgia.

Convention Floor Leader Roy Harris of Augusta said that if faced with a Supreme Court order to admit Negroes, Georgia's Democrats would go to jail first.

Said Walden: "We hope to be able to give them the chance to do just that." He added that it might be quite soon.

Another convention leader, Charles Bloch of Macon, the man who led the fight against President Truman's nomination at the national convention, observed: "They might put somebody in jail for a little while, but they couldn't keep them there."

Boyd replied: "All this may be good politics but it is not sound policy."

He added that despite all this defiant talk, "Georgia still is a part of the United States."

"Up to now," Boyd continued, "Negro leaders have been aware of suits in other states for equal education. They had hoped for leadership which would make it unnecessary for them to go to court."

Boyd asserted there was not a single state-supported Negro college in the South with an accredited "A" rating.

Actually, neither of the Supreme Court decisions cited by the convention dealt with segregation as such.

These were the cases of Heman Marion Sweatt from Texas and G. W. McLaurin from Oklahoma and both were predicated upon the Dec. 12, 1937, battle by Lloyd Gaines for admission to the University of Missouri law school.

In the Gaines decision the high court held that states are bound to provide within state borders equal education for Negroes and white persons.

The Supreme Court in the Sweatt and McLaurin cases re-emphasized that when it said equal it meant equal and it meant equal in all respects.

Wildlife Officials Praise New Law

WASHINGTON — (AP) — Wildlife authorities welcomed the final enactment of the Dingell bill today as the best news in many years for the nation's fishing enthusiasts.

The bill, jointly sponsored by Rep. Dingell (D-Mich) and Senator Johnson (D-Colo), earmarks revenue from the federal 10 percent tax on sports fishing tackle.

Such revenue, estimated at from \$3,000,000 to \$4,000,000 a year, will go back to the states to help them restore and expand game fish resources. President Truman signed the bill yesterday.

The staple food of big and little fish is plankton, a great variety of plants and animals carried by tides and current.

## Bill Providing Air Control Approved

WASHINGTON — (AP) — Standby authority to control civil air traffic when the president determines such action is necessary for the nation's security is provided in a bill approved by the Senate commerce committee yesterday.

It is designed particularly for "sensitive areas."

The bill, which now goes to the Senate for action, would permit the Civil Aeronautics Board to require filing of flight plans and other data.

It would also authorize the CAB to prohibit or restrict aircraft operation in any sensitive area if the volume of air traffic was so heavy that all planes could not readily be identified.

## Federal Payroll Drops in Year

WASHINGTON — (AP) — The number of civilian government employees declined 131,087 in the past year, before the Korean war broke out.

That left 1,968,940 employees on the payroll at the end of the fiscal year June 30, said a report by the Senate-House committee on reduction of nonessential federal expenditures. The group is studying federal payrolls and other governmental costs. The report covered all civilian employees except those of Congress and the courts.

The biggest cut was in the number of civilian employees of the military establishment. There employment dropped from 884,728 to 753,149, a decrease of 131,579.

## Shelley Winters Demands Whole Column About Tour

By BOB THOMAS HOLLYWOOD — (AP) — "Hey, how about doing a full column on my summer theater tour?"

That's Shelley Winters for you. She doesn't want an item or a few paragraphs. Shelley has just returned from eight weeks of touring through Pennsylvania, Massachusetts, Rhode Island and New Jersey in "Born Yesterday."

She came back with a deflated view of Hollywood. "This is an ivory tower, this is nothing," she said. "This town doesn't know what's happening on the outside. That's where the real people are."

But, she added, switching in to high gear: "Movies are still

the major source of entertainment for the American people."

Do the people think that movies are better than ever, as the ads claim? "I don't go for that slogan," she replied. "That implies that movies used to stink."

"I found that people are very interested in movies and movie stars. For one thing, they were very sympathetic to the troubles of Judy Garland. They like her and are pulling for her."

The bubbly blonde said people were surprised to find her normal. "They said I wasn't a bit like my studio build-up," she remarked. "One fellow asked me why are they using Maria Montez's old publicity on you?"

Shelley drew \$1,500 weekly on the tour, plus a percentage which raised the ante to around \$2,000, but she figures to keep little of it after taxes, adding "I guess I bought a couple of planes for Korea." Well, Piper Cubs anyway.

"The trip gave me a lot of confidence," she said. "In fact, I've got too much confidence. The studio is waiting for me to cool off before letting me go back to work."

Capule review: "Pretty Baby" is one of the better light comedies of the season. The plot line sounds just like one of those things — a young girl who is believed to have a baby but doesn't. Still the story is played with such good humor that it is a delight. Hit of the show is Betsy Drake.

## Early Texas Baptist Church Plans Homecoming Sunday

By WILLIAM C. BARNARD Associated Press Staff

A little East Texas church with only 50 members will be the shrine of Texas Baptists Sunday. It's the Baptist church at Independence, Washington County, established in 1839 and Sunday it will have its annual "homecoming."

The first cooperative Baptist work in Texas — the Union Baptist Association — was organized by this church in 1840. In 1845, Baylor University, now at Waco, was founded and built at the side of the Independence church. And the same church, in 1854, baptized a great Texan — General Sam Houston.

All the Baptist initiative of pioneer years of Texas history had its center at the Independence church. It was the early site for state Baptist convention — 10 conventions were held there. The convention's executive board nearly always held its meetings there. Mention some big name among early Texas Baptists — more than likely, during his career, he led a worship service at the Independence church.

The original church building burned, but a duplicate was raised on the spot. Baylor University was moved to Waco in 1886. The old campus now is a

state park. Frank E. Burkhalter of Waco, president of the Baylor Historical Association, said his group is raising money to serve the old pillars of the old campus.

The Rev. John A. Held of Houston, editor of the Gulf Coast Baptist, is president of the Independence Homecoming Association. Speakers for a day-long program Sunday will include the Rev. J. L. Rayburn and Mrs. T. C. Jester of Houston, Judge Ray C. Crane of Sweetwater, son of a former pastor of the church and former president of Baylor; and Mrs. W. A. Wood and Mrs. Lily M. Russell of Waco.

Near the Independence church is the little creek where Sam Houston was baptized by Dr. Rufus C. Burleson, church pastor and president of Baylor.

An unconfirmed story is told that when Burleson and Houston waded into the creek, Burleson suggested Houston should remove his billfold. Houston replied he thought it well to baptize the money as well as himself.

# Mosquito Biting Habits, Nocturnal Nosings Of Moths Subjects of Scientific Research

BALTIMORE — (AP) — Why do mosquitoes bite you one day and not the next? What makes a bee more active at one time than another? And why will a moth dance around a light one night and stay in the shadows the next?

A Johns Hopkins University scientist believes the answer to those and other insect-life mysteries may be found in a study of tiny time and space changes in the weather near the earth's surface.

The university announced that the scientist, Dr. Vincent G. Dethier, has opened a research station at East Bluehill, Me., to try to get to the bottom of the riddle of what makes an insect act as it does.

Dr. Dethier is studying these minute weather changes, usually occurring within five feet from the ground, with the assistance of a bevy of bees, moths, mosquitoes and other insects.

His brother, Bernard Dethier, formerly of the climatological division of the Patterson Weather Station, Salinas, Calif., is associated with him in his work at East Bluehill.

The Army is a co-sponsor with the university in the project.

It is particularly interested in testing the value of newly-developed insect sprays and other repellents.

The university said that the two scientists are making the first intensive study of those tiny weather changes in relation to their effect on animal life.

The so-called microclimate has great influence over the behavior of living things at the earth's surface, Dr. Dethier explained.

In fact, he said, it is those almost undetectable changes that have the most influence.

The Dethier brothers have set up a series of ingenious experiments at their laboratory in Maine.

To find out what makes a honeybee tick, they have placed sugar containers at strategic spots around the station and are carefully recording the number of bees visiting the containers under different weather conditions.

At night, moths are trapped as they hover around electric lights and their numbers and types are recorded.

With special instruments supplied by the university and the Army, they take continuous readings of small weather changes and at the same time measure corresponding insect activity.

And all the while, a sharp eye is kept on the reaction to insects to repellents as the weather changes.

One of the tests has to do with the biting rates of mosquitoes. The Dethiers themselves have to act as guinea pigs in this one.

They check the weather, then let the insects make a stab at them.

But, most of the time, they outsmart the mosquitoes.

They only let them start biting. And after they get the rate of tries per minute — slap!

## Truman Says Foes Of American Way Disregard Humanity

WASHINGTON — (AP) — President Truman said yesterday the forces confronting this country "have little or no regard for the value of human life."

Addressing a meeting of groups working to provide employment for the physically handicapped, the president declared:

"We are confronted by those who think of human lives only in terms of power. For them the individual is of no consequence. They think of the people only as an instrument for achieving their own lawless ambitions."

While his thoughts were obviously on the Korean war, the president made no direct reference either to the North Korean Communists or the Russian government which supports the Korean Reds.

He addressed the sixth annual meeting of the President's Committee on National Employment of the Physically Handicapped Week in the departmental auditorium here.

## New Texas-Mexico Highway Is Urged

MEXICO CITY — (AP) — A new highway connecting the Texas border with Mexico City is being urged by congressmen from northeastern states.

The road would link Saltillo, San Luis Potosi, and Queretaro over a route which sponsors say is shorter and less mountainous than the present Pan-American highway.

Congressmen from San Luis Potosi and Coahuila states have presented a study of the highway to the communications department and discussed it with President Miguel Aleman.

They said they expected approval, and hoped work might start late this year.

The new highway would extend the present Eagle Pass-Pedras Negras-Saltito road directly south. It would involve construction of 100 miles of road south of Saltillo, another 60 miles south of San Luis Potosi, and extensive rebuilding of already existing secondary roads.

## Delaware School Ruled Inferior

Although the final contract was shaky, it was not unreasonable. # FUNNY FACE

By James Gunn  
Copyright 1950 by NEA Service, Inc.

THE STORY: Jack Lansing and Ellie Lane, old friends of many years, married 22 years ago and made good in the show business as a comedy dance team. Their success was due to Ellie's natural instinct for comedy and her sunny face and Jack's good looks, which made a handsome back-drop for her capers. Ellie knew she was funny faced and shuddered every time Jack called her "Funny Face," she said, "I'll realize what he's stuck with." She believed she was really the ugly wife of a handsome man. At last, after their daughter Janet was born, she divorced Jack, solely because of her fears that she was "ugly." Jack got another partner and eventually disappeared. Janet got a miscegenation suit in a Broadway farce, rose to success as a comedienne and finally went to Hollywood where she was a successful supporting actress. Then she met Ben Mallon, a cameraman, 10 years older than herself and agreeably, comports himself honorably.

VI  
ELLIE LANE had never mentioned her marriage to her closest friends in Hollywood. She had no idea why Ben Mallon asked about Jack, her former husband, but she was not angry.

"Jack was very sweet," she said. "We were young and we loved each other. I can't say anything against him. It just didn't work out. That's a trite phrase nowadays, but it's true."

Ben looked at her sympathetically. "I know," he said. "I know how that can be."

He was referring to himself. A young and unhappy marriage had scarred him badly. He thought perhaps that Jack had treated Ellie shabbily and that she was defending him. She felt disloyal to Jack, but she did not try to correct Ben's idea. It would have been too painful to tell him the whole story.

Ben said: "Do you know where he is?" She shook her head. "Oh, I've

thought of looking him up occasionally. But I'm fairly well-known now. If he'd wanted to see me he wouldn't have had any trouble."

She was quite calm, but Ben imagined he heard a catch in her voice. "You haven't forgotten him?"

"Of course not." "Are you happy without him?" His voice was very gentle; the question did not seem impertinent.

"I'm not eating my heart out, if that's what you mean. Actually I rarely think of him. I have plenty to keep me busy. Janet, work, friends—"

"Janet's going to grow up eventually. You don't want to go on working forever."

"I don't see why not. I don't have to be afraid of getting old, like the glamor girls. I suppose my face will just get funnier with age, and that's my stock in trade."

She was not facing him and did not see the look he gave her. She was silhouetted against the window, in a dim dark housecoat. Her face was thinner and her comic expression had begun to disappear with maturity. Lately producers had been talking about giving her more serious roles.

BUT Ben did not contradict her. He said abruptly: "Eleanor, what I'm trying to say is that I'd like you to marry me some day. I know you haven't thought of that. You have hundreds of friends, but I think sometimes you're lonely. I know I am. And you know how I feel about Janet."

This was a long speech for Ben; he had rehearsed it in his mind, but he could not keep his voice from growing husky. He sat and stared at his hands.

She did not answer at once. She had to revise all her thoughts of

Ellen, and immediately she realized how much she had come to depend on him.

"I don't know, Ben," she said at last. "I think it's probably a very good idea. I just haven't thought about it, that's all."

"I don't want you to make up your mind right away. I don't want you even to try to decide till you're ready."

"It wouldn't be fair to either of us if I did." She smiled. "We're being very solemn. I can't tell you how flattered I am. I don't know how to play a proposal scene—it's way out of character for me. Thank you, Ben, thank you very much."

ELLIE had not felt any emotion except a warm gratitude and friendliness. Ben had managed not to show his feelings at all. But when they tried to talk casually of other things the question was between them. At every break in the conversation one or the other fell silent.

He said goodnight. At the door he turned. He towered over her and there was a look on his face she had not seen before.

"Eleanor, one thing please," he said. "Don't say yes because you're sorry for me."

She was surprised. "Why Ben, why on earth should I feel sorry for you?"

Impulsively she reached up and kissed him, and he went down the stairs.

I don't know what Ben Mallon's thoughts were that night and Ellie Lane never confided in me to the extent of telling hers. But I am quite sure that Ben was too excited to sleep for a long time after he went to bed that night. And I believe that Ellie slept as soundly as ever.

## JACOBY ON BRIDGE

Expert Succeeds With Bold Finesse

By OSWALD JACOBY  
Written for NEA Service

The average player takes many finesse plays, but the expert avoids them. The reason is that the expert tries to develop other resources in the hope that something better than a finesse will turn up.

This does not mean, however, that the expert has no use for a finesse. In many hands it is the normal play. As a matter of fact,

there are times when the expert takes a finesse that the average player wouldn't dream of. An example of this kind is shown in today's hand.

South's jump to four hearts showed a very strong hand. It was not an attempt to "close" the hand at a game bid. South wanted his partner to continue the bidding if he had a good hand. As it happened, however, North had a poor hand and therefore passed.

Although the final contract was shaky, it was not unreasonable. The contract would have been made easily if the ace of diamonds had been in the West hand instead of in the East hand; or if North had held the king of clubs instead of the king of diamonds. With either of these slight changes it would be impossible to defeat a contract of four hearts.

In the play, West opened the jack of diamonds, dummy put up the king, and East won with the ace. East cashed the queen of diamonds and then shifted to the queen of clubs.

## Texas Bus Firms Ordered to Bargain

WASHINGTON — (AP) — Local bus firms serving the Texas coast cities of Beaumont and Port Arthur lost today their argument that they do not come under the jurisdiction of the National Labor Act.

The national labor relations board ordered bargaining representative elections among employees of Beaumont City Lines, Inc., and Port Arthur City Lines, Inc. The elections had been sought by Transport Workers Union of America (CIO).

In its ruling the NLRB pointed out the lines make advertising contract through a Chicago firm, purchase their equipment outside

the state, and are wholly owned subsidiaries of National City Lines, Inc., of Chicago. The NLRB ruled that the lines, therefore, operate in interstate commerce and come under NLRB jurisdiction.

NLRB also overruled the line argument that separate bargaining units in each city be set up. NLRB said the cities are only 20 miles apart, that office of the two firms are identical and that contract talks have been on the basis of "single representation for the employees both locations."

## Remodeling and Enlarging Central Baptist Church Turns Out To Be Major Project for its Members

Remodeling the brick church at 513 E. Francis Avenue and enlarging the building is taking a big part of the time of members of the Central Baptist Church.

Two new sections are being added to the sides of the church and the interior is being remodeled. The Rev. Hal Upchurch, who has been here since 1948 is the present pastor.

For the past two weeks, he has been holding a revival in Happy.

Present membership of the Central church is 991, which is a growth from the 48 charter members who began the organization on the last Sunday in April, 1930.

This group of 48 met until the fall of that year in the rooms over the Cotton Chevrolet Building. During that fall the membership picture of the lots which the present building is situated and their first permanent meeting place was selected.

The present building was erected under the patronage of Dr. John C. Stott.

Stott's school enrollment of the church is 261 with E. D. Williams as Sunday School superintendent. In the training units there are 26 young people enrolled with their respective teachers. Raymond White who is also educational director.

#### The Rebuilders of a Nation

The Old Testament books of Ezra and Nehemiah tell the story of two men of vision and courage who led an exiled people from Babylon back to the Jewish homeland. It is also the story of the rebuilding of Jerusalem. The great story has a present-day aspect for Jews once more are seeking to fulfill their age-long dream of living in the historic Holy Land. In that ancient time many Jews remained in Babylon, where they had established roots in their exile, and gained considerable prosperity. There they built so strong a Babylonian Judaism that it lasted until the 11th century A.D. Similarly many Jews of today will continue to make their contribution to the lands in which they are so well established. But the homing instinct is strong in some, and thousands of displaced persons still dream of finding a secure place in a Promised Land.

Let me recall briefly the events leading up to the life and work of Ezra and Nehemiah. The Northern Kingdom of Israel was established after Solomon's death, when 10 tribes rebelled under Jeroboam. One hundred years later the armies of Babylon overpowered the Southern Kingdom of Judah and carried most of the people to exile in Babylon. A vivid account of that exile is to be found in Psalm 137. The best things in life are sometimes valued only after they are lost and the Israelites in exile recounted the sins of the past and their failure to heed God's command and call.

When King Artaxerxes inquired about the first expedition failed. I believe the later work of Nehemiah made reconstruction possible, as well as the religious revival and the national restoration. Minor details, though, are unimportant beside the actual achievements of these great leaders, who accomplished their purpose in spite of delays, enemies, and countless frustrations. The devotion of Ezra and the courage of efficient Nehemiah, triumphant past and their failure to heed God's command and call, history combine to form an inspiring story.

#### E. Douglas Carver Completes Eight Years as Pastor of Baptist Church

THE REV. CARVER, Mrs. Carver and their two daughters, Carolyn (above) and Gwen.

Other activities of the church include the Wednesday evening meetings of the juniors and intermediates, officers and teachers and the pre-school group, The Sunbeams. At 8:15 p.m. on Wednesdays, a prayer service is held and at 9 p.m., is choir rehearsal.

#### German Girl to Speak At Church of Brethren

Over a year ago the Church of the Brethren made arrangements with the State Department whereby select German young people could be brought to America for one year of high school training. Brethren families over America have opened their homes to these students and they are supported and cared for as children of the family. To date, 300 young people are living in American homes.

The young people of the local Church of the Brethren have invited one of these students, Miss Christel Lasartak, to be their guest in Pampa. Miss Lasartak has been living in the home of Mr. and Mrs. C. A. Olwin of Cushing, Okla., where she completed her high school training this past spring. She will attend the Pampa Rodeo Saturday evening. On Sunday morning, at the Church of the Brethren, she will tell the story of her life in a warring and war-torn world, and give her impressions of America.

#### Christian Science

"Soul" is the subject of the Lesson-Sermon which will be read in all Churches of Christ, Scientist, on Sunday, August 13.

The Golden Text is: "The Lord is my portion, saith my soul; therefore will I hope in him" (Lamentations 3:24).

Among the citations which comprise the Lesson-Sermon is the following from the Bible: "Yea, in the way of thy judgments, O Lord, have we waited for thee; the desire of our soul is to thy name; and to the remembrance of thee" (Isaiah 26:8).

The Lesson-Sermon also includes the following passage from

the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "Only by losing the false sense of Self can we gain the eternal unfolding of Life as immortality brought to light" (page 335).

## LISTEN CLOSELY!

Another weekend is here! Soon the Church bells will again tell us that it's Sunday morning.

How are we to spend this day? A picnic or an outing might be fun, or maybe a visit to Aunt Mary's. Of course, we can turn over and go back to sleep, or maybe we should complete that delayed chore. As individuals, we have these choices to make—and more.

But as human beings whose destiny is guided by a greater power, we have no choice. Our blessings and our very lives have been bestowed and not earned. They have been entrusted to our care while on earth, and they are not ours to squander or to abuse.

If you begin now to attend Church regularly and to support its work, you will want no other choice—for you will be turning an obligation into a great joy. As men and women, it is our divine privilege to dedicate one day each week to the glory of our Benefactor.

Listen to the Church bells ringing on Sunday morning! Listen closely, for this is a day of worship, of prayer and thanksgiving.

**THE CHURCH FOR ALL ... ALL FOR THE CHURCH**

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

# One American Soldier Dies, Despite Heroism of Texan

By HAL BOYLE  
NAKTONG RIVER FRONT IN KOREA (AP) - This is the story of the death of one American soldier in Korea. His name was Private Jack. There are a lot of men like him over here.

Private Jack was a dark small cheerful kid of 21. Some older soldiers thought he would be one of the green ones to worry about when trouble started.

A week or so ago the trouble did start. Private Jack's outfit had to pull back from Kunchon under pressure from Red troops.

The outfit was ambushed and used everything from cooks to gasoline cans to crash through. Private Jack was clipped in the leg by a shell fragment. But he fought the entire six hours until the road out was secure. Then he mended his wound.

The medic said he would be evacuated. And they sent him back despite his objection. He spent three restless days in the hospital. Because he was so anxious to rejoin his buddies the doctors released him with a splinted leg.

He grabbed several prisoners and penetrated some thousands of yards beyond it was caught in heavy fire from 200 or more Red troops.

As the patrol began to withdraw with its prisoners, Private Jack stayed behind to protect its flank with his M-1 rifle. As he limped back he went down.

Sgt. Fred Mills of New Braunfels, Texas, went back to get him. He dragged Pvt. Jack some 800 yards through sniper rifle, machinegun and mortar fire. He loaded him on an abandoned peasant oxcart, and pulled the cart down the road until it collapsed.

Then Sgt. Mills and two other members of the patrol, Cpl. Oscar J. Ellis of Sharpshooter, Ky., and Pvt. Gerald Coolidge of Rural Route 1, Hopewell, Pa.

# Communists Face Crackdown in Western Germany

BONN, Germany (AP) - West German Communists faced a double-barreled crackdown today at the hands of both allied and German authorities.

The interior ministers of 11 West German states agreed yesterday on prohibition of two major Communist meetings planned in the allied sectors. They discussed means of outlawing communism in the West but decided such a move would have to be made by a federal constitutional court being set up by the Bonn regime.

At the same time western allied authorities banned the biggest Communist newspaper in Western Germany, the Dueseldorf Freies Volk. The paper was charged with "printing matter prejudicial to the prestige and security of the allied forces." It was the third Red newspaper to be shut down in West Germany in the past week.

The 11 West German ministers also agreed on joint counter-measures against Communist infiltration into the western states. They discussed means of financing a 100,000-man police force to be placed under the direct command of the federal government in case of emergency.

# UN Flag at Armed Forces Headquarters in Tokyo

General Douglas MacArthur (right), commander of the armed forces acting in behalf of the United Nations to restore the peace in Korea, shakes hands with the Chief of Staff of the United States Army, General J. Lawton Collins, after receiving the blue-and-white U.N. flag (center) which once flew over the headquarters of the U.N. Mediator in Palestine. The flag was sent to General MacArthur by U.N. Secretary-General Trygve Lie, who expressed hope that it would fly until peace is restored in Korea. General Lawton Collins brought it to Tokyo.
