Law Shoots Man; **Town Up in Arms**

Highway Patrolmen and a Texas Ranger have been patrolling rville streets since Sheriff Ben Lee shot a man to death here last Saturday.

Lee said today he shot Tom Bill Fatherstone, 29, during a scuffle while trying to arrest the heavily-built man "for disturbing the "for disturbing the peace and being drunk."

"The patrolmen and the ranger came at my request and as a result of threats made against me," the sheriff said. "They're not here right now. The patrol-men went to attend the Governor's funeral. But they'll be

Lee said Fatherstone had a police record and two years ago was indicted on assault charges after the beating of former County Attorney Lamar Palmer.

"Saturday afternoon I was driving down the main street here when Fatherstone hollered at me and cursed me, telling me to come and get him." Lee related.

"I tried to arrest him. He attempted several times to take my gun away from me. I shot twice. The first time I missed Fatherstone, but two bystanders were hit. second time I got Fatherstone in the right chest."

The bystanders were Wondell Bell, about 27, hit in the arm. and Jamie Craig, about 40, hit in the leg. Lee said neither was seriously hurt. Lee said he called an ambulance and a doctor to treat Fatherstone but that the latter died enroute to a hospital. After the shooting. Lee said, he learned of threats against his life and called upon the Highway Patrol and the Ranger. He said **Red Press** they have been patrolling Center-ville since the shooting.

"No threats have been made to my face, but I have learned of Strikes Back m. I think the whole thing has about simmered down by now, though.'

State Health Officer George Cox says "the finger of polio is probing deeper and deeper into the corners of Texas."

The State Health Department reported yesterday the highest number of polio cases ever listed in a single week. The record total, 121, was for the week ending last Saturday. Eleven counties reported polio cases for the first time.

The Harris County chairman of the National Polio Foundation, W. Stewart Boyle, said at Houston the county's polio situation is "definitely getting worse."

"It has done so in the past 10 days," he said. "Since last Friday, we have had 16 new cases in Harris County.'

Four polio patients were admitted yesterday and the day before at San Angelo Hospitals. Nine were dismissed during the same period, but four were sent to the Gonzales Warm Springs Foundation for further treatment.

Fort Worth reported four new cases were brought there yesterday.

Two new cases were reported at Dallas and two at Wichita Falls.

Denton and Bryan each reported one new case. Both patients were sent to Fort Worth for treatment.

Last week was the second week in a row polio had set a new record in Texas. The week before the total was 118 new cases.

"Strict basic sanitation is the thing most needed to control this thing," said Dr. Cox.

He said the health department's figures on deaths go only through May. Through that month, 37 had died, compared with 36 during the same period last year.

The health department director said the most likely theory is that polio is a gastro-intestinal infection.

"This means that filth-fly and other loathsome insect breeding places in particular-must be cleaned up," he said.

Committee Cuta Appropriation

WASHINGTON-(AP)- Funds set up for the Southwestern Power Administration by the House were trimmed more than half by the Senate Appropriations Committee. The SPA's operations include Texas, Arkansas, Oklahoma and Missouri.

Reporting the Interior Depart-ment appropriations bill for the current fiscal year, the committee recommended only \$1,616,115 in cash and \$2,257,905 in contract authority for SPA.

The House in passing the in-terior bill had allowed four milion dollars cash and five million in contract authority for expan-sion of SPA's power distribution

system. In its report, the committee said that private utility companies operating in the area of the Southwestern Power Administration had agreed to make their transmission systems available to the government for carrying power from government owned transmission lines to preferred customers of the government.

Years of research pioneering guarantee **LUCKIES ARE A FINER CIGARETTE!**

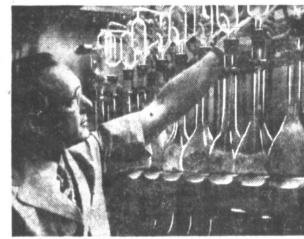

Constant research at Lucky Strike's famous cigarette laboratory-America's largest and most completely equipped—is devoted to giving you a finer cigarette!

THERE is no finer cigarette in the world today than Lucky Strike. Here's why: Lucky Strike means fine tobacco. And every step in the making of Luckiesfrom before this fine tobacco is bought until the finished cigarette reaches you-comes under the watchful eye of the largest and most completely equipped cigarette research laboratory in America.

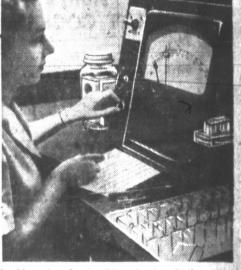

For many years, the famous Lucky Strike laboratory in Richmond, Virginia, has been a center of cigarette science and technology. In this remarkable building you can see a fascinating collection of scientific instruments - microscopes, spectrophotometers, balances, projectors, humidification chambers, and many other complicated and costly machines.

Working with this array of scientific equipment are more than 60 highly trained specialists-chemists, biologists, engineers, physicists. They work on tobacco, on finished cigarettes, on paper, foil, cellophane and even printing inks. For Lucky Strike scientists have for years delved into cigarette research on an extensive scale.

Today, because of the miracle of modern science, Lucky Strike is a finer cigarette.

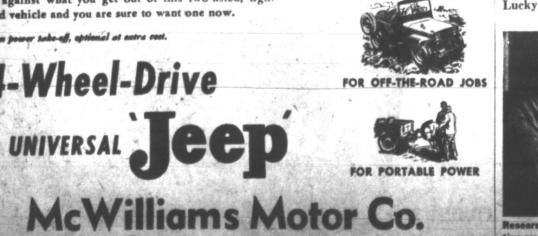

Testing tobacco. Samples from every tobacco-growing area are analyzed before and after purchase. These extensive scientific analyses, along with the expert judgment of Lucky Strike buyers, assure you that the tobacco in Luckies is fine, light and mild. No wonder Luckies are a finer cigarette

Luckies stay fresh. After Lucky Strike ciga rettes have been packaged, they must be tightly sealed to remain fresh. Here you see the cellophane seal being tested for air-tightness. Such instruments are in constant use at every plant.

For many a father knows from his own experience that having a newspaper route is a mighty good thing for a boy. It provides a popular way for an energetic lad to earn the extra cash he craves for clothes, sports. good times and savings—and thus learn the value of every dollar he handles! It teaches him modern business methods-supplements his schooling in a most practical, profitable manner! And it teams him up with the cream of the city's teen-agers-lads who aspire to be leaders in the years aheadl

Above all else, fathers and mothers are glad that newspaper route work helps their sons to become more manly, self-reliant and resourceful-develop habits and abilities which are sure stepping stones to success and good citizenship!

ents keep them under control. However, it is obviously a bad situation. We blame the trouble on television. Parents either want to see the shows themselves or want their children to see them." It IS a bad situation. And yet t isn't much worse than a design for a family living room recently touted by a leading decorator.

"Family life in the future," said the decorator, " will be centered around a bar and television set." And he decorated a room showing how "charmingly" that could be arranged, so that the Amarican liting many so that the American living room could com-pete with the nearest bar.

To my mind, it's no worse to take a child to a bar to see a television show than to turn a family living room into a replica of the commercial cocktail lounge. BARROOM MAY BE BETTER It may not even be quite as harmful, actually. For chances are, the youngster who is taken out to a bar to bee a television show isn't going to spend every evening in that kind of atmosphere.

But if his own living room is built around a bar and television set, then he's going to spend evening after evening before a tele-vision set while Papa acts as bartender for any grown - up friends who happen to drop in. Police forces may worry about children being taken into bars to view television shows.

But nobody seems to be worry-ing about the danger of the liv-ing room being turned into a private cocktail lounge.

Just watch your decorating magazines and you'll probably no-tice the increasing prominence of the bar and television set in the illustrations of family living

It's a murderous Mexican trail. I've discovered. Address them in English and they "no sabe." Speak to them with the best Spanish you can muster, and they come back at you in perfect English. Working all day for the Yankee dollah isn't just a line from a song here. The town is just a g village but it's overrun with American tourists and 1949 nodel taxicabs. Wandering mer chants are everywhere. Barefoot urchins sell chewing gum and old men peddle ice at two cents a chunk in burlap-sack-covered

It's the Americanos, not the fexicans, who are the lazy ones at Ensenada.

At the border town of Tiajuana things are different. I've never seen so many busy Americans rushing from one curio shop to another, betting on the horses, betting on the racing greyhounds and even betting on people at jai

alai. The enormous Fronton Palace features jai alai, one of Mexico's favorite sports. It's a sort of fourwall handball with wicker rackets. Individual players, like horses, are the objects of parimutuel bet-ting. It's billed as the "fastest game in 'the world'' and there's no doubt about it.

Last Boy Chimney

1

WINDLESHAM, England - (AP) - The last of the boy chimney sweeps of Charles Dickens' England is dead.

Josph Lawrence died in his surrey cottage yesterday. He was 104 and reportedly the second oldest man in the country. As a boy he climbed flues stark naked to clean them with a handbrush.

Government Lowers Wheat Estimate

WASHINGTON - (P) - The government reported a sharp re-WASHINGTON duction in wheat crop prospects due to unfavorable Jun weather and plant disease conditions.

But it forecast the second largest corn crop on record, ex-ceeded only by last year's alltime high of nearly 3,700,000,000

The new wheat estimate, how-ever, coupled with a surplus from last year, still would provide more than enough bread grain to meet prospective domestic and expert needs.

The crop outlook greatly reduced if it did not eliminate pos-littles of a return to rigid war production controls on the test crop

LOOK, MAW, NO WINGS-If you're like most people who all out for fried chicken, but leave the wings for the next guy here's good news for you. Peter Bauman shows one of the new breed of wingless chickens he's developed in the basement of his Des Moines, low's, home. More white meat, says Bauman, as he compares the new type, right, with the old-fashioned variety. In
