

THE SPANISH BOMBSHELL

Mrs. Carmen Beach Martin, better known about Washington as "The Spanish Bombshell," needed little of her limited English vocabulary to convince the jury she could shake a mean rumba, but ran into difficulty in defending herself against charges that she transported women for immoral purposes to expensive hotels and at least two Latin embassies on a "call house" business operated in Washington. FDR Refuses To Recognize Coal Deadline

Inflation Real Issue, President Declares, Attacking Congress

(By The Associated Press) RAF bombers in great force attacked the German chemical center of Wuppertal in the Ruhr before dawn today, while in the Mediterranean the Allies struck anew at Sicily, Sardinia and Greece.

STOCKHOLM, June 25—(AP)—Sea-going Greek guerrillas have given the invasion-conscious axis new cause for worry in the Balkans, it was disclosed today.

WASHINGTON, June 25 (AP)—President Roosevelt said today he would not recognize or accept an October 31 deadline set by the United Mine Workers for continued coal production in government-operated mines.

WASHINGTON, June 25 (AP)—President Roosevelt spoke out again today against the setting up of a so-called Food Czar and said that the question at issue is whether we are for inflation or against it.

He told press conference that congress could take the path toward inflation if it wanted to, but that if it did the responsibility would rest 100 percent on the legislators.

Suggestions that someone be given complete authority over all phases of the food program he characterized as close to a Red Herring. The real question, he said, is whether prices are to be kept down and whether we want to go into an inflationary spiral or not.

Some people on capitol hill, the President asserted, think the easiest way to use up surplus buying power is to let prices go sky high. And, speaking in a sarcastic manner, he said he had heard some one on the radio suggest the same thing.

This letter person, Mr. Roosevelt said, asserted the "richer" people would be able to pay higher prices and the poor would suffer but that surplus buying power would be eliminated.

Mr. Roosevelt agreed that the poorer people certainly would suffer under such conditions.

Describing what he meant by an inflationary spiral in response to a question, the chief executive said that the cost of food is about a third of a family's income and with higher wages, everybody is eating more now at greatly increased prices.

People with the largest financial gains, he said, still have a surplus of funds even after buying their war bond quotas, and if prices keep going up a lot of people, most of them relatively small wage earners, will have to spend a great deal more for food.

Then they will demand more pay and probably get it, he said, which would mean production costs and that costs to farmers would go up. That costs to farmers would go up. That costs to farmers would go up.

See FOOD CZAR Page 8

Stores Vote To Close July 5; Shorter Saturdays Discussed

A suggestion made by Travis Lively, hardware dealer, that Pampa stores close at 6 p. m. on Saturdays was a bombshell that upset the quiet procedure of what was to have been a routine meeting of the retail trade committee of the chamber of commerce, held this forenoon in the BOD committee room at the city hall.

Purpose of the meeting was to discuss the question of stores closing on Monday, July 5, this year, in lieu of Independence Day, which comes on Sunday.

Merchants attending the meeting voted in favor of closing on Monday, July 5, and also set up a permanent schedule of closing on five specified holidays of the coming year.

The suggestion on the 6 p. m. closing was a by-product of the meeting. No action was taken, however. Some compromise with a suggestion of a 9 a. m. to 9 p. m. closing. The man who made the original suggestion said Pampa wasn't a "cotton picking" town.

It was brought out that Pampa's principal retail trade is from the oil fields, and that most workers have an entire day off Saturday and could do their trading just as well during the day-time as to wait until late at night.

Holidays are to be observed on New Year's, Independence Day, Labor Day, Thanksgiving and Christmas.

In case a holiday comes on Sunday, it was agreed to close on the following Monday; if on Saturday, to close that day.

Nothing was said about what would be done if there were two Thanksgiving days to be observed. Armistice and Memorial days were discussed. While the importance of Armistice day was noted, the holiday was not included in the permanent list, but will be observed this year.

Into the discard went observance of Memorial day. Also omitted was any reference to Texas Independence day or San Jacinto day.

Action of the committee at today's meeting is to be made known to other merchants by the chamber of commerce, and representatives of all Pampa businesses are invited to join the committee in a meeting to discuss store hours schedule to be held at 10 a. m. Tuesday in the committee room.

Attending today's session were Frank Smith, chairman of the retail trade committee, and the following: Hollis Keys, J. C. Penney company; L. N. Atchison, Pampa Office Supply company; Verl Hagaman, Ideal Food stores; Leon Glickman's, Levine's; F. E. Imel, Citizens Bank & Trust company; Del Hartman, F. W. Woodworth & Co.; Paul V. Gebart, Montgomery Ward & Co.; R. E. Hamm, C. R. Anthony company; Malcolm Denson, Furr Food stores; J. J. Calhoun, M. E. Moses company; Travis Lively, Pampa Hardware & Supply company; Frank Leder, Diamond Shop, and Morris Goldfine, Zale's.

Navy Oil Policy To Be Probed

WASHINGTON, June 25—(AP)—With Navy Secretary Knox signifying complete agreement with the procedure, the house naval committee decided today to order a full investigation into the navy's oil policy in general and that department's now proposed Elk Hills contract in particular.

The house public lands committee already is investigating the Elk Hills matter.

Allies Pound Two Italian Isles, Greece

(By The Associated Press) RAF bombers in great force attacked the German chemical center of Wuppertal in the Ruhr before dawn today, while in the Mediterranean the Allies struck anew at Sicily, Sardinia and Greece.

The British air ministry has defined a "great force" as sufficient to wipe out a city of 200,000 population in a single night.

Blasting their way through stiff Nazi aerial defenses and anti-aircraft fire, the big RAF block-buster raiders unloaded hundreds of tons of bombs on such targets in Wuppertal as the I. G. Farben Industries Chemical works, the Jaeger roller bearing plants and textile factories. It was the sixth consecutive night attack on the continent.

Meanwhile, a Berlin broadcast quoted Nazi Propaganda Minister Goebbels as asserting that the Axis was keeping vigil "day and night" to meet an Allied invasion of Europe.

Goebbels, boasted, however, that there was "no comparison between fighting in North Africa or for Pantelleria and fighting for Europe."

The German high command, admitting the havoc inflicted by Allied airplanes, said the RAF heaped destruction on Wuppertal and nearby Renscheid, site of important railway shops, and added:

"Lessons among the populations of towns attacked are heavy."

Wuppertal is the name for the twin industrial cities of Elberfeld and Barmen on the Wupper river. Wuppertal has 400,000 population.

Upwards of 1,500 tons of explosives were dropped on Barmen in an RAF raid on May 29 which virtually destroyed that sector.

Last night the attack was concentrated on Elberfeld, and an RAF communiqué announced that "from preliminary reports great damage appears to have been done."

Thirty-three RAF bombers were missing from the night's operations, making a six-day total of 135 Allied bombers lost in the tempestuous campaign to pulverize Adolf Hitler's Ruhr war foundries.

Parents Whose Son Was Killed Here June 1 Arrive To Attend Graduation Of His Buddies

Mr. and Mrs. George W. Monroe, St. Louis, Mo., parents of the late Aviation Cadet Frank Robert Monroe, who lost his life in an accident near Pampa Army Air field June 1, arrived yesterday. They are guests of Dr. and Mrs. Roy A. Webb.

Cadet Monroe would have completed his training this week and would have graduated with the 43-F class Saturday if he had lived; and his parents are here to meet some of his friends and to attend the graduation they have looked forward to since he began his cadet training.

Among other guests assigned to Pampa homes by the army hospitality committee of the Pampa Chamber of Commerce are Mrs. C. E. Haynes and Miss Marjorie Haynes, Jamestown, N. Y., guests of Mr. and Mrs. Bob Robinson, and Samuel L. Lawrence, manager of the Arkansas Power and Light company, Harrisburg, Ark., guest of Mr. and Mrs. Bob Curry.

Negro Charged With Burglary

Pampa police have recovered \$80 of \$100 allegedly stolen in a hotel room burglary, and a negro porter, J. D. Ruffin, 29, has been arrested, charged with the act, and transferred to county jail, Police Chief Ray Dudley said today.

Entrance to the room was gained by the intruder removing the transom window above the hotel room door, then hanging down on the inside and opening the door lock. The transom window is in possession of police and is being checked for fingerprints.

The alleged theft occurred Wednesday night. Ruffin, an employee of the hotel, was transferred to the custody of county officers yesterday afternoon. Arrest of Ruffin was made by Patrolman Joe Mullins.

The man from whom the money was allegedly stolen was T. A. Samuels, an official of the synthetic rubber plant near Borger.

King Returns From Africa

By HENRY B. JAMESON

AN RAF BASE IN BRITAIN, June 25 (AP)—King George VI returned to his homeland today from an extraordinary tour of the North African battlefields, his big four-engine bomber landing at this base just after 6 a. m.

The king, deeply tanned and smiling, was the first to step from the plane. An RAF guard of honor presented arms and Air Marshal Sir Charles Portal, chief of the British air staff, stepped forward to greet the monarch.

After inspecting the honor guard, King George was driven to the RAF mess.

Luncheon, Business Meeting Is Held By W. S. C. S. Wednesday

The Women's Society of Christian Service of the First Methodist church met in general session in Fellowship Hall Wednesday for a luncheon and business meeting. Members of circle one were hostesses.

Following the luncheon Mrs. W. Purviance, president, called the meeting to order and presented Mrs. H. H. Boynton, who gave the devotional, "Ruth and Naomi." This was followed by a song by Mrs. W. G. Crawford, "For the Beauty of the Earth."

The program was presented by circle five, with Mrs. Fred Radcliff in charge. Subject for the program was "Across the Nation, With Our Rural Workers."

Mrs. R. W. Lane spoke on "Cul-de-sac and Mexico!" Mrs. Luther Pierson on "Highland Boy Community House."

Those present were: Misses Joe Shelton, J. A. Knox, Tom G. Wieser, A. G. Averitt, John Hodie, W. D. Waters, M. E. Cooper, H. R. VanSickle, Mark Denison, W. R. Ewing, B. S. Via, H. B. Carson, Luther Pierson, John Hessey, Sherman White, Kermit Lawson, Bon Leetch, H. R. Thompson, H. H. Boynton, W. Purviance, E. B. Bowen, V. N. Osborn, Ed Weiss, Henry Jordan, H. F. Dyson, W. G. Crawford, Sam B. Cook, E. L. Emerson, J. B. Massa, Fred Radcliff, R. W. Lane, W. R. Campbell and one guest, Miss Bessie Roberts.

Shamrock Auxiliary Meets Monday With Mrs. Tom Brown

Special to THE NEWS: The Shamrock Auxiliary of the First Presbyterian church met in the home of Mrs. Tom Brown Monday with Mrs. Thurman Adkins in charge of the program, giving the devotional. The theme for the afternoon was "Colleagues in Christian Concern."

Mrs. W. R. Doty sang, "Open My Eyes" accompanied by Mrs. T. H. Sonnenburg. Mrs. Merlin Wiemers gave an interesting discussion on "The Need of War Nurses and Medicine."

Mrs. Sam Wilborn read a war story concerning Porto Rico after which the meeting was dismissed with a prayer in unison. Following the program Mrs. Sonnenburg played a number of piano selections and an offering was taken for "Emergency War Relief."

The Social Calendar

TODAY: Varnes Club will have their weekly meeting at 8 o'clock. SATURDAY: Calcevo H. D. Club will meet at the Community Hall. MONDAY: V. F. W. will meet at City Club room at 8 o'clock.

Here's How To Make Housecleaning Easy

Most women miss a great many of the joys of summer because they are so busy indoors. They are getting clothes ready for the whole family to wear in the new season, and putting away some of the winter things. And then, of course, there is spring cleaning.

Before hot weather is here to stay, the homemaker wants to make her house clean and attractive—even where it doesn't show. Every nook and cranny must be aired, heavy upholstery must be covered with fresh slip covers, heavy curtains stored until another season.

Two Texas Firms Receive E Awards: CORSIANA, June 25 (AP)—The first plant to produce semi-piercing bombs, the American Well and Prospecting Co. today held the army-navy E production award.

Peace-time producers of oil well machinery, the Corsicana firm was the first plant in the nine-state St. Louis ordinance district to receive the award for this type of shell, said Col. Merl H. Davis of St. Louis chief of the district, at ceremonies marking the presentation.

11:00 a. m.—Preaching hour.
7:30 p. m.—P. H. Y. S.
8:30 p. m.—Evangelistic service.

First Baptist To Hear Two Speakers

The First Baptist congregation will hear Pastor E. Douglas Carver at the morning worship hour and a guest minister will occupy the pulpit at the evening service, it was announced. At the morning service the Rev. Carver will speak on the topic, "A Kiss That Didn't Count."

A native son will return to his home church Sunday night when the Rev. Lawrence Barrett, son of Mr. and Mrs. Ernest C. Barrett, pioneer residents of Gray county and long-time members of the First Baptist church speaks at 8 p. m. Rev. Barrett is the successful pastor of the First Baptist church, Edna, Texas, and is one of Texas' most promising young ministers, Rev. Carver stated.

Special Services Are Held At St. Mathews

The order of services at St. Mathew's Episcopal church has been changed for next Sunday only. This particular day, the First Sunday after Trinity, has been set aside as family Communion Day. It is expected that every member of every Episcopalian family in Pampa will be present at the eight o'clock Communion Service, which will be the only service for the day. Immediately following the service the ladies of the Auxiliary will serve breakfast to all members of the congregation. It is requested that those who desire to attend the breakfast get in touch with some member of the Auxiliary, or that they telephone the Rectory 1744 not later than Friday noon. Visitors to Pampa and members of the armed forces are especially invited to both the service and the breakfast to follow.

The Rev. Edgar W. Henshaw, minister will celebrate the Communion and will bring a very brief message on the subject "Excuse or Reason." The entire service will not occupy more than fifty minutes.

Zion Lutheran Church Program

Rev. Wolter, pastor of Zion Lutheran church, will preach the sermon in the Pampa Army Air Field chapel at the regular 10 a. m. service of worship this Sunday.

This will not conflict with the regular 11 a. m. service which will be conducted as usual at Zion Lutheran church in Pampa. With the Word of God Acts 4, 32-35 as a guide he will in this second sermon of the day speak on the topic "A Visit With The First Century Christians." This discussion will serve as an introduction to the second half of the church year which is usually devoted to the task of applying God's plan of salvation to the individual Christian life, in contrast to the first half of the church year which is dedicated to the purpose of revealing the promises which God has made a Savior for man to come, and telling how that Savior came, lived, suffered, died and rose again for the redemption of all mankind, how He ascended on high, and on the great day of Pentecost poured out His spirit upon His apostles.

At 7:45 p. m. the first in a series of three evening sermons on "Marriage and the Home" will be presented. Each address has been carefully prepared by Rev. Wolter and will bring the vacation absence, by reading by a communicant member of the congregation. Both the morning and evening service will continue as usual during the pastor's absence.

Christian Scientist Lesson

Text: II John 4-11; III John 5-12.
By WILLIAM E. GILROY, D. D.
ALAS for noble idealism and the beautiful Christian life; how far even those who profess the Christian way fall short in the realities of life.
Between the First Epistle of John and some things in the Second and Third Epistles, as revealed in our lesson, there seems to be a great cleavage. In the early church, where Christians suffered for their faith, and where we might have expected to find the Christian virtues manifest in all their strength and purity, human passions and human weakness overcame the higher motives, and those who might have been partners of the divine nature and who might have been made perfect in love shared instead how earth-bound and human they were. Deceivers and false teachers early began their nefarious business of corrupting disciples from the simplicity of Christian faith, and substituting their own schemes of authority and lust for the power of loyalty to Jesus.

But John's plan in this situation accords with what he has said concerning the Christian life and its privilege. His apostle is that those who are subject to other influences should not depart from the way of love and he commands those who have been steadfast in the midst of subverting influences.

The Second Epistle is addressed to the "elect lady." Who was this elect lady? Was it some individual in the church, whose faithfulness gave John hope of encouraging and strengthening his church? Or was the elect lady the church itself?

The latter seems probable, but in either case the appeal is to the members of the Christian church. Division and strife, which rent the church in later ages, were already beginning. False leaders and false teachers were already perverting the truth.

What does John say in the face of the situation. Only what the Spirit would say to the church in every age, that love is the supreme test, that when men advocate unlovely doctrines and give the example of unlovely ways, they show how unworthy they are to be believed or followed. Of the church, as of the individual Christian, it is true that love is the supreme and ultimate test. If a church says "I love God" and fail to incarnate and practice love among its members, it is not the church of Christ but a lying church.

Self-love is as warping from Christian truth and from the Christian way as downward selfishness. It is love to God and love to man that is the practical test of the right to be called "Christian."

Central Baptist Plan Full Program Sunday

"God's Cure for Troubled Hearts" will be the sermon theme at 11 o'clock Sunday by the Rev. T. D. Sumrall, Pastor of Central Baptist church. We devote this hour, both in songs and sermon to those who are lonely heavy-hearted and sad. There are many sorrows all over the world today and the church people are no exception. Christianity is not a shield from earthly sorrows, standing and consolation to those who must suffer in sorrow.

As the evening hour an evangelistic service will be rendered when Rev. Sumrall will speak on the subject, "When Jesus Comes." Surely there is no brighter nor greater hour described in the Bible than the time when Jesus will appear. Himself will come with His saints to earth.

Mr. James E. Frost will arrange appropriate music for both services which you will enjoy. We most cordially invite all those who may be heavily laden to attend both of our services.

Christian Scientist To Have Guest At Lecture, June 28

William D. Kilpatrick, C. S. B. of Detroit, Michigan, will give a lecture on Christian Science, entitled, "Christian Science, the Truth About God and Man," in the Junior High school auditorium Monday evening, June 28, at 8 o'clock.

The lecture is free and under the auspices of First Church of Christ, Scientist, Pampa.

The public is lovingly invited to attend.

Rev. Wolter Leaves For Chicago June 27

On June 27 Rev. Wolter, pastor of Zion Lutheran church, will leave on a two weeks vacation to visit his home in Chicago. Arrangements have been made so that Lutheran services of worship will continue to be held at 11 a. m. and 7:45 p. m. each Sunday during his absence.

Rev. Wolter will return on July 11 in time to travel with a group of Panhandle pastors to Austin, Texas, where an all-Texas conference of Lutheran ministers will be held, July 12-15 inclusive. Rev. Wolter will be back in the pulpit on July 18.

Robert Fink To Speak Sunday At Presbyterian Church

The service of morning worship at the First Presbyterian church will be conducted on Sunday by The Rev. Fink, associate minister of the First Christian church.

The subject of Mr. Fink's sermon will be, "The God Planned Life." Services begin at eleven o'clock. The chimes and organ preludes begin at 10:45.

The minister of the First Presbyterian church, Rev. Robert Boshes, is attending the Summer School of the Southwest at the Allison-James school in Santa Fe, N. M.

Mexico Shoe Strike

MEXICO CITY, June 25.—(AP)—The Shoe Workers Union has called a general strike against shoe manufacturers for July 5. The workers asked 50 per cent pay increases.

Congratulations—

Mr. and Mrs. E. M. Barker are the parents of a daughter weighing 6 pounds 11 ounces born Sunday at a local hospital. The baby has been named Shariyn Louise Barker. Mrs. Barker is the former June DeWitt.

Pvt. and Mrs. Odell Partin are the parents of a son weighing 8 pounds 10 1/2 ounces born here recently. The baby has been named Larry Odell Partin. Father of the infant is home on furlough from Camp Howe, Galveston, where he is with a military police detachment. Mrs. Partin is the former Phyllis Followell.

Capt. and Mrs. Arthur T. Ousley are the parents of a daughter born Wednesday at a local hospital. The infant has been named Judith Rochelle. Captain Ousley is stationed at Pampa Field.

3rd Bombing Olympics Is Due At San Angelo

SAN ANGELO, June 25 (AP)—The third all-American bombing olympics will be held July 4 at San Angelo army air field, Colonel officer, said today.

The olympics will bring together the pick of the bombardiers from the eight bombardier training schools for a test to select the most accurate bombardier from among the senior classes of the schools.

The schools themselves compete for the pickle barrel trophy which is awarded following each contest. The competing schools are the following in Texas: San Angelo, Big Spring, Childress, and Midland. From New Mexico will come representative from Kirtland and Albuquerque. Roswell Field and Deming Field, Victorville Field will send a team from California.

The first olympics was held at Childress, May 23. The second took place at Roswell, N. M., June 13. Bombardiers from Deming won at Childress and at Roswell the team from Midland was victorious by a slight margin over Roswell.

INS-18 HANGARS
KANSAS CITY, June 25 (AP)—To the fighting fronts American transport planes now can haul knocked-down, pre-fabricated hangars—which inexperienced soldiers can erect in a jiffy, says Glenn C. Speakman, sales manager for the Butler Manufacturing Company.

The 92 tons of each hangar is packed in sections so compact that planes can deliver them to any front within hours, not days, after an order is placed, Speakman said.

A crew of 90 inexperienced soldiers on any of the fronts should

Wilkerson Brings In Miami's First Load of '43 Wheat

MIAMI, June 25.—The first load of new wheat brought to Miami arrived in town Monday afternoon and was raised by Vivian Wilkerson and sold to the Barnett Grain company, and was harvested 6 miles south of Miami. It tested 57 and is thought to be averaging about 14 bushels per acre. Harvesting is beginning in the south and Miami is near Miami.

About 30 loads of new wheat arrived in Miami Tuesday and were Wednesday. Many farmers report less than half crop this year.

Thousands Say TAKE SWAMP ROOT TO AVOID GETTING UP AT NIGHT

Kidney suffers first fast relief with Swamp Root's tonic that helps wash away painful acid sediment. Feel better... sleep like a top!

Thousands get fast, wonderful relief from backache or getting up nights due to sluggish kidneys with the remarkable stomachic and intestinal liquid tonic called Swamp Root. For Swamp Root acts to flush out acid sediment from your kidneys. Thus soothing irritated bladder membranes.

Originally created by a well-known physician, Dr. Kilmer, Swamp Root is a combination of 16 herbs, roots, vegetables, balsams and other natural ingredients. No harsh chemicals or habit-forming drugs. Just good ingredients that quickly relieve bladder pain, backache, run-down feeling due to tired kidneys. And you can't miss the velvety tonic effect!

Try Swamp Root today! Thousands have found relief with only one bottle. Take directed on package. All druggists sell Dr. Kilmer's Swamp Root.

U. S., Mexico Group Ends Work

MEXICO CITY, June 25.—(AP)—The U. S.-Mexico economic commission has "covered" the principal economic problems troubling Mexico, Foreign Minister Ezequiel Padilla said last night.

The commission, which concluded its sessions here yesterday, now will return to Washington.

—BUY VICTORY BONDS

North Carolina's Indian population of 22,600 is the greatest of any state east of the Mississippi river.

YOUNG MEN ONLY

WHEREVER you see this lapel badge—silver wings and propeller, with the letters AC on a blue center—you know the wearer has been accepted for future training as an Aviation Cadet and is a member of the Air Corps Enlisted Reserve.

If you have passed your 17th birthday—if you are a healthy and mentally competent young American with a desire to serve your country in the Army Air Forces as a Bombardier, Navigator or Pilot—

YOU CAN NOW APPLY FOR AVIATION CADET TRAINING

At the nearest Aviation Cadet Examining Board you can take your physical and mental examinations. No school or college credits are required. If you pass the examinations and are found acceptable, you may volunteer immediately for enlistment in the Air Corps Enlisted Reserve, provided you have the written consent of your parents.

As an Air Corps Enlisted Reservist you will be entitled to wear the silver and blue wing badge which is the insignia of a future Army flier. When you reach the age of 18, or, if you choose, at the end of the first school semester after that date, you will be called to active duty for pre-flight training.

Aviation Cadet training is also available to men 18 to 26, inclusive, married or single, whether they are already in the U. S. Army or have not yet been called for induction under Selective Service.

The free booklet, "Aviation Cadet Training for the Army Air Forces," tells how men in any of these three groups can become flying fighters. You may obtain a copy from your nearest Aviation Cadet Examining Board or U. S. Army Recruiting Station. Or mail the coupon below.

THIS ANNOUNCEMENT IS MADE WITH THE APPROVAL OF THE JOINT ARMY-NAVY PERSONNEL BOARD

U. S. ARMY "KEEP 'EM FLYING!"

Apply: Aviation Cadet Examining Board
HQ. A. A. F. ADVANCED FLYING SCHOOL, PAMPA, TEX.
OR CONSULT ANY U. S. ARMY RECRUITING STATION.

The Adjutant General of the U. S. Army, Washington, D. C. Please send me a FREE copy of booklet, "Aviation Cadet Training for the Army Air Forces," and leaflet, "Silver Wings."

PLEDGE OF ALLEGIANCE—"I pledge allegiance to the Flag of the United States of America and to the Republic for which it stands, one nation indivisible, with liberty and justice for all."

No Food Czar It must be nice to be President. One would meet so many interesting people—and useful, too.

There was, for example, the unnamed chap who urged Mr. Roosevelt to appoint a food czar.

"And what would a food czar do?" the President inquired.

"Well," his visitor suggested, "he could order a car of perishable fruit or vegetables given precedence over everything else."

"But," protested the President (all this, of course, is in paraphrase, because the President is not permitted to speak in quotation marks)

The visitor must have been squelched. He never had thought of that. But the President did, and he isn't going to fall for the "absurd" suggestion of Congressional leaders that one man be given complete supervision over all food problems.

It's too bad that the President had to pick this particular visitor to quote. There must have been others the same day—maybe Senator George of Georgia (Democrat) or Senator McNary of Oregon (Republican)—who would have suggested that a "Food Czar" at least could have funneled the conflicting directives of nine unintegrated agencies into a common pool so that final policy, wise or foolish, at least would be coordinated and comprehensible.

Over-simplification of many abstruse governmental problems is a very effective political device, until it has been done so often that everybody begins looking in the woodpile for an Ethiopian. The dumb visitor got over the first two or three times he called at the White House and stuck out his glass chin for Mr. Roosevelt's forensic knockout.

Now we're getting tired of watching sitting ducks shot. We'd like to see more substantial straw men capable of giving the Champ a better battle for the diamond-studded belt.

Thus we would get better money's worth of amusement, even if we couldn't get an end to the utter confusion in which so many major way programs are permitted to languish.

ICKES GIVES INTO ICKES Petroleum Administrator Harold L. Ickes has won a soul-trying victory over Secretary Harold L. Ickes of the Department of Interior.

Responding patriotically to the request of Petroleum Administrator Ickes, Secretary Ickes is asking the public to stay away from the national parks to save gasoline and tires.

One devout Christian, John Scotus Erigena, took exception to this method of controlling people, by stating "reason and authority come alike from one source of Divine wisdom".

For making this statement, his writings were banned and placed on the Index.

Yes, real authority comes from reason, from order, from sequence, from impersonal rules. These all come from God.

All these stories are part of the news report of a single 24 hours. The only pattern they follow, if it may be called such, is the pattern of chaos. If, as Sen. O'Daniel suspects, the administration planners really have an objective, that objective must be the total disruption of our domestic economy.

Congress has done something to save the country from this savage incompetence, but what it has done until now has not been enough to prevent ruin. Unless the west assumes leadership on Capitol hill the future of the nation is desperate.

BYRD ON INFLATION (The New York Sun) Senator Byrd of Virginia is on solid ground in his opposition to the payment of subsidies to farm producers, processors of agricultural products and handlers of food.

He argues not only that it would be impossible to distribute these payments equitably but also that it would ultimately mean regimentation under bureaucratic control, the addition of billions of dollars to the public debt for future generations to pay and that instead of operating to curb inflation it would be found to have encouraged it.

In a statement he gave out the other day he took the Administration sharply to task for going in at a "back door" to seek funds from governmental lending agencies instead of going honestly before Congress to ask for appropriations which it probably would not get.

A NEW LOW IN INTEREST YIELD (The Wall Street Journal) Last week a small block of Connecticut State 1 1/2 per cent bonds due in 1967 (\$25,000) changed hands at a price representing a yield of 1.10 per cent to maturity.

The dealer who purchased them reoffered them at a price to yield 1 per cent. So far as this newspaper is aware, the transaction marks the highest price at which any bond with similar maturity has ever sold in this country. The bonds are free of all taxation, state or federal.

WINNING WAR OR FOURTH TERM (Denver Post) If some people were as interested in winning this war quickly as they are in a fourth term, the country would not be in its present tragic plight, and we would not be debating this (anti-strike) bill today.

Figures show twice as many women as men live to be 100. That kicks around the old theory about talking yourself to death.

Finland made another payment on its war debt to the U. S. We're all anxiously waiting for U. S. to pay Japan what we owe that country.

Tennessee derived its name from the Indian name for the chief town of the Cherokees, located on the Little Tennessee river.

Common Ground

"I speak the plain-word principle. I give the odds of democracy. By God I will accept nothing which all cannot have their counterpart on the same terms." -WALT WHITMAN.

LABOR UNIONS AND SUBSIDIES The demands of the A. F. of L. and CIO union leaders that food prices be reduced and subsidies given the producers, is simply evidence that when anyone becomes "princes of privilege" as union labor has, he demands more and more special privilege.

It will be noted that it is not the underpaid workers who are striking and protesting the increased cost of living due to the wastefulness of the government and the war, but it is the workers who are already getting much more than the average, much more than they produce, measured by a free market, or the American way of life.

But these are the workers who are foolishly demanding that the government either permit them to further raise their wages beyond what other workers are able to raise theirs, or that the government borrow the money and subsidize the food they use.

After they subsidize food, they will want clothing subsidized. They have already had rents subsidized by freezing controls.

This move is just squirting gasoline on the fire of inflation. It only fools the people and delays and adds to the inflation that is bound to follow subsidy.

Cannot Explain Of course, the labor leaders never explain how the union workers who had previously consumed all their wages, would be paying for any part of the war if they had their wages increased so that they could retain the same standard of living they had before the war started.

But these "princes of privilege" think of no one but themselves. They do not believe that they are the brothers of other men. They have lost their souls. They have lost the American way of life. They think they can have the benefits of a government but must not be required to pay their share of the cost of government.

They are not even willing to pay the cost of the food and clothing and shelter that they consume.

No Legislation Needed What we need to do is not to have legislation to restrict strikes. All we need to do is to repeal every law that gives labor leaders and labor unions any privilege or advantage not accorded to men who do not believe in collective bargaining.

If employers and employees were free either to join a union or not to join a union and there were no laws permitting labor unions to do things that laborers who are employers are not permitted to do, then competition between workers and employers would rid labor unions of their un-American, undemocratic methods. They would then have to be of use to society as a whole in order to secure members.

But as it is, they can perform any tyranny to their members and to other people and still workers and employers are forced into union contracts due to discriminatory laws favoring workers who belong to unions and employers who have exclusive union contracts.

BY WHAT AUTHORITY? The question, by what authority, has stood in the way of progress for ages. Ecclesiastics, when their contentions are questioned, invariably ask the questioner by what authority he makes statements. Their final argument is that they are ex cathedra; that they need not be in harmony with impersonal rules, with reason.

One devout Christian, John Scotus Erigena, took exception to this method of controlling people, by stating "reason and authority come alike from one source of Divine wisdom".

He contended that the fathers, great as their authority is, often contradict each other; and that, in last resort, reason must be called in to decide between them.

For making this statement, his writings were banned and placed on the Index.

Yes, real authority comes from reason, from order, from sequence, from impersonal rules. These all come from God.

All these stories are part of the news report of a single 24 hours. The only pattern they follow, if it may be called such, is the pattern of chaos. If, as Sen. O'Daniel suspects, the administration planners really have an objective, that objective must be the total disruption of our domestic economy.

Congress has done something to save the country from this savage incompetence, but what it has done until now has not been enough to prevent ruin. Unless the west assumes leadership on Capitol hill the future of the nation is desperate.

BYRD ON INFLATION (The New York Sun) Senator Byrd of Virginia is on solid ground in his opposition to the payment of subsidies to farm producers, processors of agricultural products and handlers of food.

He argues not only that it would be impossible to distribute these payments equitably but also that it would ultimately mean regimentation under bureaucratic control, the addition of billions of dollars to the public debt for future generations to pay and that instead of operating to curb inflation it would be found to have encouraged it.

In a statement he gave out the other day he took the Administration sharply to task for going in at a "back door" to seek funds from governmental lending agencies instead of going honestly before Congress to ask for appropriations which it probably would not get.

A NEW LOW IN INTEREST YIELD (The Wall Street Journal) Last week a small block of Connecticut State 1 1/2 per cent bonds due in 1967 (\$25,000) changed hands at a price representing a yield of 1.10 per cent to maturity.

The dealer who purchased them reoffered them at a price to yield 1 per cent. So far as this newspaper is aware, the transaction marks the highest price at which any bond with similar maturity has ever sold in this country. The bonds are free of all taxation, state or federal.

WINNING WAR OR FOURTH TERM (Denver Post) If some people were as interested in winning this war quickly as they are in a fourth term, the country would not be in its present tragic plight, and we would not be debating this (anti-strike) bill today.

News Behind The News

By ALBERT LEMAN WATCH Now that Tojo himself is warning the Japanese Diet that Nipponese territories are likely to be attacked, editors should keep their eyes on three places: Rabaul in New Britain, Timor northwest of Australia, and the great island of Mindanao in the Philippines.

General MacArthur may strike at Rabaul to give complete protection to his supply lines and to acquire a new airplane base. A blow may be aimed at Timor in order to present long ranged bombers with jumping off fields. Eventually, Hirohito may be awakened some night and told that the Americans are back in the Philippines, fulfilling the General's promise when Corregidor fell.

Once powerful establishments are set up in the three mentioned islands, our bombardiers and submarines can harass enemy shipping in the China Sea and in all surrounding waters. Sailing vessels are Tokyo's weak spot as they were Britain's Achilles' heel in the last war. Our foe cannot maintain an achiplago or its home industries without them.

Our men could be supplied in part by aerial transport. We would bypass most of the Japanese outposts and either blockade them into starvation or later mop them up when their garrisons had become weakened.

Most people are talking about Burma as the gateway, but shrewd strategists will watch Rabaul and Timor.

RIOT—The appointment of Field Marshal Sir Archibald Percival Wavell to the exalted post of Viceroy of India is being hailed as a sign that new blows are being planned against the Japanese. Undoubtedly this is true, although the rainy season precludes any immediate flare-up. But diplomatic observers believe the distinguished soldier's real job, for which he will receive sixty thousand dollars a year salary, is to keep India under the military heel while great martial events are taking place elsewhere in Asia and the Pacific.

In America, Hindus with grapevine contacts relate that their home land is still sullenly non-cooperative with the British Raj. Although what the English call Gandhi's blackmail fast failed to budge New Delhi, sporadic violence still breaks out in the industrial districts. Troops club the yelling mobs, arrest the ring-leaders and restore order. Then a few days later the district blows up again.

CHALLENGE—Topnotch lawyers in the District of Columbia have organized a boycott against the system which allows Aliens Property Custodian Leo T. Crowley to charge a fifty dollar fee for the use of a patent seized by the United States from Axis nationals. The movement threatens to end a handsome Federal revenue and to toss this highly controversial question into the laps of the peace-makers.

Objectors argue that the Constitution does not authorize Uncle Sam to own patents, but merely to grant them. According to their view, the acquired rights belong to the people, and there should be no bar to general usage. The attorneys are advising their clients to write the U. S. Patent Office, obtain the blue prints of any gadgets they desire to manufacture upon payment of ten cents, and then if they force a market, to go ahead with production.

Several scandals arose from the handling of this problem after the last World War, and one official possessor of the confiscated holdings went to jail. A number of persons close to the Wilson Administration emerged with Midas-like fortunes as a result of having cut in on several German industrial secrets.

Mr. Crowley, however, has pursued a forthright policy, even though it has been challenged. Unhappily the authority to utilize the inventions which he controls upon payment of the fifty dollars fee and upon deposit of five dollars for all subsequent licenses.

Around Hollywood

By ERSKINE JOHNSON

Worthwhile words from Hollywood which rarely get credit for saying anything significant:

Anne Baxter as Marina, the peasant girl who flees her burning Russian village in Samuel Goldwyn's "The North Star"—

"Wars do not leave people as they were. All people will learn that, and come to see that wars do not have to be. We will make this last war; we will make a free world for all men. The earth belongs to us, the people, if we fight for it—and we will fight for it."

Charles Bickford of the Dean of Lourdes in "The Song of Bernadette"— "Bernadette believed, with her very life, in her vision. We too have a vision—a vision of a world free from greed, oppression and hatred. Let us never submit to maniacal false doctrines which plunge the human spirit into bloody madness. Let us remain steadfast against the forces of evil. If we do, the right will triumph and our vision will become a reality."

ERY FOR CIVILIZATION Mary Nash as Miss Hicks, the school teacher, in "The Human Comedy"—

"What my children appear to be on the surface is no matter to me. I am not fooled by gracious manners or bad manners. You will learn that every man in the world is better than somebody else and not as good as somebody else. In a democratic state every man is equal to every other man to the point of exertion and then every man is free to exert himself to do good or not, to grow nobly or foolishly. I am eager for my boys and girls to exert themselves to do good and grow nobly. I want you to understand that each of you will begin to be real men and truly human when, in spite of your difficulties with one another, you still respect one another. That is what it means to be civilized."

Andrews as Martin the innocent cowboy about to be lynched in the "Ox-Bow Incident"—

"A man just naturally can't take the law into his own hands and hang people without hurting everybody in the world, because then he's not making one law but making laws. Law is a lot more than words you put in a book, or judges or lawyers or sheriffs you hire to carry it out. It's everything people have ever found out about justice and what's right and wrong. It's the very conscience of humanity."

PLEDGE OF PEACE Walter Huston as Ambassador Joseph E. Davies in "Mission to Moscow"—

"To you the unborn generation yet to come, we pledge to work for a new world with justice and equality."

organized a boycott against the system which allows Aliens Property Custodian Leo T. Crowley to charge a fifty dollar fee for the use of a patent seized by the United States from Axis nationals. The movement threatens to end a handsome Federal revenue and to toss this highly controversial question into the laps of the peace-makers.

Education On The Production Front

By PETER EDSON Pampa News Washington Correspondent

A CONSTRUCTIVE suggestion for industry to conduct a campaign of education on the war production front, aimed at the war production worker, has been made by Lawrence A. Appley, War Manpower Commission executive director, following a manpower survey trip to war production centers throughout the country.

Basis for the suggestion is the finding that the average worker in a war plant today still has no idea of what he's participating in—an industrial production revolution that cannot fail to have its effects on postwar life.

"Industry made a mistake in the 20's," says Mr. Appley, "in not telling the country what it was doing. The result was that it caught hell in the 30's."

It is to avoid a repetition of this mistake that the suggestion is now made for taking the working force of the country into the confidences of industry and educating or selling manpower survey trip to war production centers throughout the country.

At the outset, it should be made clear that this is no fanciful suggestion from a government brain-truster or world planner, nor is it a disguised version of labor's oft-repeated demand for a larger voice and participation in management.

BACKGROUND OF APPELY LAWRENCE A. APPELY has "big business" written all over his open, friendly face, for easy manner, his self-confidence, his quiet efficiency. He was for 11 years educational director for Socony Vacuum. He is now vice president of the American Management Association and a V. P. of Vick Chemical. He came to the War Manpower Commission in December, and in the six months that he has been WMPCC's executive director or business manager, he has decentralized it, whipped it into far better shape as a functioning field organization that has the confidence of industry, in place of a loose-jointed thinking society which issued directives and then sat back to wait for miracles to happen.

It is Appley's belief today that when the average worker gets a job in a war plant, he is first of all, a number is hung on him, he is trained for a specific job, and then pretty largely forgotten. He has no idea of what is happening in the industrial war. The news of that war isn't as thrilling as the fighting war, though it may be just as important in the long run. When a crew on one operation in a shipyard reduces the time of its job from 14 days to four hours, that is industrial progress, and the problem is to make the crew realize the importance of what it has done.

With many new workers now in the labor force, millions of whom have never had industrial jobs before and have taken war jobs as only a temporary thing, this industrial morale building may not have much meaning. But it is an answer to a lot of manpower problems, a possible remedy for some of the evils of absenteeism, the newer problem of labor migration, the obtaining of maximum manpower utilization.

LABOR AND MORALE APPELY was at one time director of civilian personnel for the War Department, and he points to the constant campaign of morale building which the Army conducts as proof of the benefits of this type of work. The Army keeps hammering at its educational program, explaining the war, as one means of

ity for all. To restore the dignity of man as an individual and not as a slave to the state or master, so that you, to whom the great future belongs, shall be able to reply as we have not, to the old angry cry of Cain 'Am I my brother's keeper?' with the answer, 'Yes, you are.'

Henry Wilcoxson as the Vicar in "Mrs. Miniver"—

"This is not only a war of soldiers in uniform, it is a war of the people—of all the people—and it must be fought, not only at the battlefield, but in the cities and in the villages, in the factories and on the farms, in the homes and in the heart of every man, woman and child who loves freedom. This is the people's war. It is our war. We are the fighters."

Today's War Analysis

By MAX HILL Associated Press Writer

Japan's military masters are too realistic to make the same foolish pledges to their people that the Germans once made about devastating air raids. Once Hitler's satellites boldly promised that German cities never would be bombed. They know better now.

But Tomokazu Hori, a rough and tumble Japanese who was educated in California and knows the fallacy of duping the common people, recently told Japan in a broadcast specially prepared for domestic consumption to be ready for such attacks. Hori is spokesman for the Japanese board of information.

He saw in the Allied victory in Africa an opportunity for us to drop our "holding" war against Japan instead wage one which was definitely offensive in character.

Despite the fact that he included the Aleutians there isn't much doubt that Burma is our logical route for attack. That means China in the long run, just as Hori pointed out to the home folk. He said:

"We can think of the possibility of an opening of an offensive from the Burma area about the time of the close of the Monsoon season, which comes some time in October."

Until then, we can only strengthen our air forces, keep hammering at the defensive outposts which circle Honshu, the main Japanese island, and seek to recapture Kiska.

By October, the Japanese will have had 20 months to exploit the resources of Malaya, the East Indies and the Philippines. I am sure no one is sanguine enough to believe we can retake this territory in the short time the Japanese found necessary to drive us out.

Hori's statements merely echo the sentiment expressed in the recent session of the diet. About the only tangible development—at least the only one disclosed by the short-wave radio—was that the Japanese could expect air raids on the mainland of Japan.

Since Tokyo seems to have sensed the timing of the promised Allied offensive against Japan, there can be no harm in saying that the guess is logical.

China most certainly can hold out until Autumn—perhaps longer—but after that our policy in the Pacific will be the determining factor. We cannot go on indefinitely fighting a "holding" war in that area, whether or not the war in Europe is over.

SPOTTERS OF POISON GAS ARE RECRUITED WASHINGTON, June 25 (AP)—A staff of poison gas spotters has been recruited, it was disclosed today, to collect samples in the event of an enemy air attack and speed them to laboratories for quick identification. The counter remedies can be applied to the civilian population.

They will turn over the samples—which could be objects contaminated by the gas—to army unit gas officers. Six laboratories have been set up at strategic points for quick analysis.

KEEPING THE SOLDIERS SOLD ON WHAT they're doing.

It can't be done just by pep talks or rallies. Strangely enough, it has been found that when a war hero is brought around to make a pep talk to a factory force, it sometimes does more harm than good. It makes the workman discontented, makes him feel that the soldier's job is more important than the work of the man behind the man behind the gun. If good work identifies selves could be recognized as the heroes, that would be part of the trick.

Anything done in this direction must be of course be done by industry itself, either on a plant by plant or a community basis. It isn't put forward as an idea for a government publicity campaign that would cost a lot of the taxpayers' money.

The Story Of Radar

By JOHN M. HIGHTOWER
(Copyright, 1943, by
The Associated Press)

WASHINGTON, June 25 (AP)—Page and Guthrie started their work with the basic principles of radar, including Leo C. Young's pulse application and Louis A. Gebhard's early pulse experiments, and with a wealth of detail on how high-frequency waves and pulses behave when bouncing off of ships and airplanes.

They were like men with lead, gunpowder, iron and wood and an idea that if you got them together in the right combination, you could hit a bull's-eye at 500 yards.

Their purpose was to make a radar detection machine which would collect, automatically record, and correlate data about a distant plane or ship, and come up quickly with the answer, showing position, angle and speed.

It was all well and good in the old days to pick up an airplane on a fixed radar beam and by figuring the angle of reflection determine the distance of the plane from the transmitter. Page had to transform that lead pencil into an adding machine calculation that could be performed at split-second speed.

Moreover, fixed antennae of the kind experimented with were no good on ship; they had to move as well as be compact, since a ship is

subject to attack from any quarter. During the time he was working on these radar problems, Page also was compelled by urgent navy requests for emergency research to work on 10 other experiments which had nothing to do with radar. "But I would always steal him off those other projects and tell him to put all the time he could on radar," says Dr. Albert Hoyt Taylor, now chief navy physicist.

These complications and Page's thorough-going work stretched out radar development considerably. But his perseverance resulted in the production of one set, a sort of haywire rig of wood and metal, wires and coils and tubes—a typical experimental job—and while it got limited results, he did not consider it successful.

It was a step forward, however, and one which Taylor had impelled Page to take. The older scientist figured the time had come for more definite results. So one day he told Page: "Produce something in six months or we'll drop the project."

The mere thought chilled Page to the heart. All his work would be lost. He got busy and made the first set in five months.

When Taylor told about the incident recently in Page's presence, he grinned and said, "Of course, I never really meant to drop it."

But it still was very funny to Page. "I certainly thought you meant it," he said.

It was plain to see that the mere thought of not completing radar still was frightening. And that, in a broad sense, is and was true not only of Page but of every other scientist at the Naval Research Laboratory who for 10 to 20 years had realized the critical importance of the instrument.

When Page's second set, his first conclusive radar production, was finished and put into operation, it gave "satisfactory results at long range," which is to say that it detected random airplanes to a maximum distance of five miles.

It was a great moment, a peak in science for all of them at the laboratory when the first pulse came

flashing back from that machine. Some time later Page and Guthrie completed a third set—their second successful one—and when it was shooting pulses down the Potomac river, they could detect planes above the naval proving ground at Dahlgren, Va., 40 miles from Washington.

Radar by this time was acquiring some powerful champions within the navy itself. One who later became director of the laboratory after a tour of duty as chief of the bureau of engineering was Rear Admiral Harold G. Bowen. Another, who preceded Bowen at the laboratory by several years was Captain H. R. Greenlee.

In 1935 radar work was badly short of funds. Captain Greenlee and Dr. Taylor went to work on Rep. (now senator) Scrugham, Nevada Democrat, who then was the dominant figure and later chairman of the House Naval Appropriations Subcommittee.

They first discussed the matter briefly and informally with Scrugham at a dinner party, and he appeared not deeply concerned. "The following Sunday, Greenlee, Taylor and another scientist from the laboratory cornered the Nevada in his capitol office and discussed their needs in as much detail as they dared and without in any way disclosing even that they were working on radio detection. Jim Scrugham listened impassively and bade them goodbye without committing himself.

"We thought we had failed in our mission," Taylor recalls. "But next morning Jim called and said we would get the money."

Scrugham was a trained engineer and a man accustomed to deal with technicians and scientists. Even without getting more than a superficial look at NRL's work, he sensed that something of considerable importance was afoot. Through Scrugham's work primarily, the laboratory got its first \$100,000 from congress for long-range research.

Greenlee's success at the laboratory was Captain Hollis N. Cooley, a naval officer with outstanding ability to communicate his ideas and enthusiasms to others. Cooley worked under Bowen, who then was chief of the Bureau of engineering, and was powerfully aided and abetted by him in the high pressure salesmanship in which he engaged soon after taking office.

As fleet admirals, including on one occasion the commander-in-chief showed up at the navy department, Greenlee would nab them and talk them into visiting the laboratory where they got their first look at radar in operation. "It put a missionary's zeal in his work, and his converts began cropping up all through the navy. For many of these ranking officers, seeing was believing so far as radar was concerned and Cooley made sure that they saw.

While this energetic captain still

Spend a Day With Army Air Field Private

New York youths stationed in Texas have written their folks hundreds of letters on the quality and quantity of the Texas sun, but Private Robert Marino, of 12 Boone Street, Yonkers, N. Y., will be able to offer them "in-the-flesh" proof of a dyed-in-the-sun Texas tan when next he hops a train for a furlough visit home.

Bob's had plenty of opportunity to absorb Sol's rays at Pampa Army Air Field, for he spends most of his waking hours out on the athletic field, putting his buddies through their calisthenic paces.

One of a staff of 10 athletic instructors, it is his duty to mount a platform to direct or help supervise seven hour-long classes per day. Starting at 6:30 a. m. and ending at 5:30 p. m., he's out in the sun—usually in athletic shorts—doing the sort of work he likes, helping Pampa's soldiers condition their bodies for whatever tests lie ahead of them in the war tasks.

Like so many of Pampa Field's enlisted personnel, the Yonkers youth is a former aviation cadet, eliminated for "flying deficiency," the reason given by the air forces when a man doesn't appear to have the perfect flying ability that the air forces demand.

Assigned first to the infantry when he entered the army a year ago last February, Bob was sent to Fort McClellan, Ala., and thence to El Paso, before being accepted as a cadet. After a short stay at San Antonio's classification center, he went to pre-flight school in the same city, primary school at Corsicana and finally to Pampa.

When he first arrived here, he was assigned to work on the flight line—but "line mechanics" wasn't what he wanted, so he asked for

was in charge of the laboratory. Bowen decided the time had arrived to deal frankly with the congressional committee members who had been stringing-along for three years furnishing money for projects they had no real facts about. Great expansion of the research center was in prospect, the admiral foresaw, and that he had accomplished only with the support of the navy.

Bowen slashed through the numerous layers of red tape that then swathed radar in the navy, and he invited members of the House Naval Appropriations Subcommittee to see for themselves what great things were in the making. They were committed to secrecy and the admiral is most proud of the fact that the confidences were never violated. The committee was so sold on radar that after that the laboratory got just about any money it asked for.

By the end of 1936 plans had been well advanced to give radar its first try-out at sea—something that Taylor had proposed in essence in 1922. The 1936 set was vastly different from the simple tactical instrument he had in mind at that time, before, and its ability to pick up airplanes, miles off in cloud, fog, or darkness—or high in a clear blue sky, for that matter—was what gave it sharply focused significance undreamed of in 1922.

In April, 1937, radar worked over salt water on the old four-stack destroyer Leary. Page took out a crew of NRL scientists to operate the outfit. In appearance it was another haywire rig, but in results, while it was not all that was desired, it proved to be a successful outfit, detecting planes at considerable distances.

"We felt that although it was flimsy and hard to work, we were getting somewhere," Page says of it now. Characteristics of radar's progress at this stage, as real funds began to come available, was that while development along proved workable lines was pressed forward as rapidly as possible, new experiments were simultaneously being made into the unknown. Thus in the years that the first crude instrument was taken to sea, Dr. Claude Cleeton, who had done some work on extremely short radio waves at the University of Michigan, L. R. Philpott from the University of Idaho and John P. Hagen from Connecticut, Wesleyan undertook pioneer work on frequencies previously almost undreamed of for radio detection purposes.

One development by this group was the pulse altimeter, a miniature radar for airplanes which receives echoes from the earth's surface and thus gives a pilot constant information on his altitude regardless of weather. Philpott, Hagen and Cleeton all did work on this and all three men had important positions at the laboratory now.

After their adventures and experiments on the destroyer Leary, the NRL scientists returned to their benches and made several additional inventions which gave the detection equipment greatly improved performance.

By February, 1938, high-powered pulse radar equipment was in operation at the laboratory—and planes were detected at range of 50 miles.

The following month Dr. Taylor directed the formation of a task group under Gebhard, then head of the laboratory's development section and creator of the original pulse transmitting equipment, a dozen years before. The purpose of this group, largest yet assigned to a single radar project simultaneously, was to develop and perfect a prototype for commercial manufacture.

The force included Page, Guthrie, H. E. Reppert, A. A. Varela, J. H. Page, and Lt. E. L. Luke. During that year they built radar model XAP and were ready for a full-scale test at sea.

This set, which is in working order at the laboratory and probably will go into the Smithsonian Institution Museum some day, was installed on the battleship New York in December, 1938, and for the next three months underwent extensive tests during battle maneuvers.

a transfer to the physical education department.

Always interested and active in athletics, Bob felt that he could make his weight felt in that sort of endeavor, so he was re-classified and given a chance at doing the job for which he felt he was qualified.

You see, back at Roosevelt High school at Yonkers, Bob played quarterback on the football squad, third base on the baseball nine, forward on the basketball team and ran the 100 and 220-yard sprints on the track squad. In addition, he likes to play golf, badminton and just about any sport you care to mention, including swimming, in which he now engages on his free time at the Pampa pool or at Lake McClellan. And so it's no wonder that he likes his job at Pampa Field—athletics is his dish.

Instructing in athletics isn't the only task that falls to men of the athletic department at PAAF. Working under the jurisdiction of Lt. James Livingston, instructors have laid out football fields, baseball and volleyball courts, built a running track on the cadet "P. T." area and recently constructed an obstacle course.

That obstacle course, says Bob, is the thing that is currently causing the most groaning and moaning among the men at the field, for they have to run, jump, climb and pull themselves over the various objects along the route.

"A lot of the boys moan a bit when we announce that after their training period they have to run the obstacle course, but after they run it a few days, they find that it gets easier," the 24-year-old New Yorker reports. "And, as time goes by, they'll see that it is helping to round them into shape. I know from my own experience that concentrated physical exercises I've received since I've been in the army have helped put me in the best physical shape of my life."

As for the future, Bob would like to go to officer's candidate school, but fears that the small quotas currently allotted to such schools may eliminate that sort of advancement.

"What I am really looking forward to, though," he says, "is being assigned to the non-commissioned officers physical education school at Miami, Florida, for which I have already qualified. When and if I graduate, I'll be a full-fledged 'PT' man, and I'll be ready to go anywhere Uncle Sam wants to send me."

Brown as a berry, with a ready smile on his lips, Private Marino is one of the best-liked instructors on the athletic field at PAAF. The reason he is that way is because he's doing his bit in the war effort, and, almost as important, doing something he likes.

Widder With Six Chillun Wants Book

DALLAS, June 25 (AP)—Volunteer book readers have problems decoding applications. With the aid of a magnifying

glass one made out this from what he termed the worst handwriting he ever saw.

"I am a widder with six chillun." But it was the names of the "chillun" that really put him to the test. They were recorded as "Arli-ly," "Weelie" and "Loosyloo."

America cannot feed the world alone. Satisfaction of the wants of the millions of suffering men, women and children can be accomplished only by the concerted action of all the nations. —Herbert H. Lehman, Foreign Relief director.

WHAT HAPPENED TO FLETCHER'S CASTORIA

AFTER SEVEN WEEKS of intensive work, laboratory researchers have discovered the reason why certain batches of Fletcher's Castoria caused nausea.

Methods of preventing a recurrence of the trouble are now known and manufacture is being resumed.

No Fletcher's Castoria has been made during this seven-week period, and at its beginning the makers issued a nationwide warning to consumers and retailers not to use or sell the product and to return all stocks for destruction.

The U. S. Food and Drug Administration has been kept informed of all these developments.

Q. What caused the trouble?

A. The sugar content of Fletcher's Castoria was reduced to conserve sugar under wartime conditions. A year ago, Castoria was made with this reduced sugar content and was up to standard in every respect. This year, in March, we again started production with reduced sugar.

However, at time a chemical change—harmless in itself—occurred in the characteristics of the water used in making Castoria. But this change, in combination with the reduced sugar, increased the degree and rate of normal fermentation. The more rapid fermentation retarded normal re-oxidation during the ageing process, resulting in a product which caused nausea.

Q. Why didn't normal tests show that something was wrong?

A. The changes which occurred were so elusive that they could not be detected by the regular testing procedures—procedures which had kept Castoria a respected product for more than seventy-five years. In fact, even after the nauseating effect was discovered in actual use, it took weeks of laboratory research to identify the factors that were causing the trouble.

Q. What are the makers doing to prevent a recurrence of the trouble?

A. Now that the cause is known, procedures have been put in effect which will assure normal re-oxidation of the product. Additional safeguards have been set up. New laboratory controls have been installed. New biological and chemical tests will be applied to every batch of Fletcher's Castoria. Each bottle will be stamped with a plainly visible control number, in verification of these tests.

Q. Is Fletcher's Castoria now on sale?

A. No. Manufacture has been resumed, but because of the time required for manufacture and distribution it may be about two months before Castoria will again be on sale at your retailer's. When it is, you will be notified in your local newspaper.

Q. Will the package be the same?

A. No. The Fletcher's Castoria now being made will bear a distinctive green band. This green band is for your protection in case any old Castoria has not been returned.

The Manufacturer Of Fletcher's Castoria

'Rip' Sewell May Capture Mound Title

By JUDSON BAILEY
Associated Press Sports Writer
Truett Banks Sewell, a strawberry blond from the Deep South, led the National League in defeats last year, but this season has a chance to lead it in victories.
To date "Rip" has won nine games, going the route in one eye, and has been beaten twice—once by one run and another time when his Pittsburgh Pirates were shut out.
This is a record matched by no other pitcher in the senior circuit and seems to prove that at the age of 35, when most pitchers have gone over the hill, Sewell is still climbing.

THE GENERAL KNOWS HOW TO KNOCK 'EM OUT

Besides going to bat against the Japanese for China, Major Gen. Clare L. Chenault, Comdr. Gen. 14th Air Force, regularly plays baseball with American airmen based in China and he's shown at bat during one of these games, wearing shorts and cap. He can last nine full innings, too, according to correspondents and his opponents. (Official Army Air Force Photo from NEA Telephoto.)

SPORTS ROUNDUP

By HUGH FULLERTON, JR.
NEW YORK, June 25 (AP)—Milo Candini, the American League's leading pitcher (won 7 lost 0), has not much chance of being picked for the all star game at Philly July 13 than Hank Borowy had last year when he had the same sort of record. . . . Story is that not even Candini's manager, Ossie Blugie, named him in his ballot. . . . And speaking of all-stars, the Washington Redskins may be in for a surprise when they play the college all-star footballers at Chicago, August 25. . . . So far Arch Ward has announced only real college players, but the team likely will include such prominent ex-pros as Steve Lach, Stony Canadeo, Frank Maznicki and Rudy Mucha. . . . Add Under Confusion Dept.: Alorner, winner of the Arlington Park primary stakes at Washington Park yesterday, also won the Lincoln Fields Jockey club stakes at Hawthorne. And pretty soon it will be Empire City at Jamaica and Saratoga at Belmont.

ONE-MINUTE SPORTS PAGE

Every time he plays a game with the Cardinals, the Cardinals are losing ground in his "feud" with Johnny Mize that began when they both were Cardinals. Mize caught up with Joe at the home run mark before he started slugging 'em for the navy. . . . Figure this one out—on the same day that Babe Ruth proclaimed the major leagues won't finish the season because the club owners are losing too much dough, the Giants and Dodgers finished their first round with a total paid of 65,643 for five games.

TODAY'S GUEST STAR

Al Del Greco, Hackensack (N. J.) Bergen Record: "Now that Abe Greene has decided that Tony Gantio is an 'entertainer' and not a fighter, any group planning to run a county fair can book T. G. for a week or so. . . . An obliging fellow when the dough is on the line, T. G. will pose with the prize heifers and may even go thirty fast seconds with the prize bull."

CASUAL WATER

When the Battleship California was raised from the bottom of Pearl Harbor, one of the salvaged items was a set of golf clubs found in the cabin of Lieut. Comdr. Elvin Hahn. . . . They were sent to Hahn's mother in Newark, N. J., and she shipped them off to the factory for much needed repairs. . . . Officers of the company promptly wrote to Hahn, asking if he'd trade the clubs for the finest set in the plant, and recently this note came back: "Thank you very much. I now have an added incentive to bring the war to a speedy, successful conclusion." And the 864 question is what will the commander say the first time he flubs a shot with those new clubs?

SERVICE DEPT.

Dartmouth, which expects to get a better than fair football team from the navy this fall, seems to be getting a basketball team from the marines. Frank Plantamura and Lionel Baxter, who helped St. John's win the Garden Invitation tournament, will report at Hanover July 1 to start their training. . . . Nineteen of the 32 enlisted men on the second air force "bombers" grid team last fall have gone through OCS and earned commissions. . . . When the Cubs played at Fort Sheridan, Ill., recently, plenty of private had good seats but Erig. Gen. Olin H. Longino had to stand in the outfield all through the game.

Ship Movements Reported At Rock

MADRID, June 23 (Delayed)—(AP)—Dispatches from La Linea today reported the new British battleship Howard and four destroyers had left Gibraltar for the Mediterranean. . . . (The dispatches used the name of Howard but it is possible the Howe was meant, there being no British battleship Howard.) . . . Some 70 merchantmen now are in Gibraltar, along with a number of warships including the battleship George V, the dispatch said.

England To Give Stalingrad Sword

LONDON, June 25 (AP)—Tom Beasley, 83, England's oldest sword-maker, has been commissioned to forge the two-handed, four-foot blade which King George VI will present to Stalingrad as a token of the British people's admiration for that Volga city's resistance to the German siege.

TEXAS Ump Goes Into Service

SAN ANTONIO, June 25 (AP)—Mike Williamson, former Texas League umpire, enters the service next month and is casually wondering where he will be stationed after Dodd Field here. . . . "Trouble is," he grinned, "practically every army camp in this section is probably waiting for me with open arms—or rather, open guardhouses. I've umpired at practically all of them."

New Guinea Turf Club Opens Season

AN ADVANCED ALLIED BASE, Somewhere In New Guinea.—(AP)—The Bobodura Turf club has opened its racing season on battlefields where the Japanese were driven out of Papua six months before. . . . The turf club uses equipment made in Japan, and British horses from Malaya. . . . Australians conducted the first trotting program recently, using sulkes made of wheels from Japanese bicycles captured in the battle of Buna, and seats from wrecked Japanese planes. . . . Their horses are fine British ponies which the Japanese captured in Malaya and brought to New Guinea for use in the Buna area.

Western Loop To Offer All Sports

CHICAGO, June 25 (AP)—Stepping up its program of fitting men for service in the armed forces, the western conference has lifted its rigid athletic eligibility barriers for the duration, assuring sports participation for every student—whether he be a freshman, sailor, soldier, marine or a holder of a 4-F card. . . . China and India furnished the world with 55 percent of all goat and kid skins.

Bear Suggested For Absenteeism

CLEVELAND, June 25 (AP)—Free beer and pretzels for foundry workers as a means of reducing absenteeism in the industry was advocated today by Dr. William F. Edmunds, Cleveland area director of the war manpower commission. . . . Explaining he spoke as a physician, Dr. Edmunds declared every foundry and smelting works should provide employees with a mug of beer and pretzels at mid-morning and mid-afternoon to relieve fatigue and offset perspiration and raise morale.

Jap Sub Sunk 40 Miles From U. S.

TACOMA, Wash., June 25 (AP)—How a United States patrol bomber sank an enemy submarine 40 miles off the mouth of the Columbia River just 17 days after Pearl Harbor was related today by the pilot, Major Everett Holstrom of Eugene, Ore. . . . Major Holstrom, one of General Jimmy Doolittle's Tokyo raiders, told interviewers that his plane sank the underwater craft near dawn as it surfaced ahead of a rain squall.

England To Give Stalingrad Sword

LONDON, June 25 (AP)—Tom Beasley, 83, England's oldest sword-maker, has been commissioned to forge the two-handed, four-foot blade which King George VI will present to Stalingrad as a token of the British people's admiration for that Volga city's resistance to the German siege.

Flyers Practice Hitting For Game Sunday With Borger Hubers Here

The Pampa Army Air Field Flyers, at full strength for the first time this season and with "blood in their eyes," will meet the Borger Hubers at the Pampa Field diamond Sunday afternoon at 3 o'clock in what should be one of the hardest-fought games of the season in this region. . . . The Flyers dropped a close 6 to 5 decision to the Hubers at Borger earlier in the season and will be out to even the score, but in a more decisive manner. . . . S-Sgt. W. R. McInturf, player-manager of the soldier team, has been working his men two hours a day this week with the heaviest concentration being placed on hitting. . . . "We have some good hitters," McInturf says, "but we intend to have more and better ones, especially for this game. If a lot of practice and hard work will turn the trick, then Borger is in for the surprise of his life." . . . The starting PAAP pitcher will not be announced, McInturf says, until game time, but the initial effort probably will be Sgt. Sams, who hurled such a masterful one-hit game last week against Amarillo's Dodgers. In reserve will be two very capable flingers, Minyard and Greek. . . . The probable starting lineup for the Flyers is as follows: Guillouffe, shortstop; Aldridge, left field; McInturf, right field; Gutierrez, first base; Berry, third base; Henry, center field; Knell, second base; Heckins, catcher; and Sams, Minyard or Greek, pitcher. . . . Parachutes require about 150 yards of cloth. . . . BUY VICTORY STAMPS . . . The reversible snake-lizard travels backward or forward with equal facility.

Occupation Runs In Chicago Race

CHICAGO, June 25 (AP)—John Marsch's Occupation, leading money winning juvenile of 1942 and one of the nation's few 3-year-olds conceded a chance of challenging Count Fleet, goes to the post today in a seven furlong dash—a leg in his tune-up races for the \$50,000 Arlington Classic on July 14. . . . BUY VICTORY BONDS

Stiedle To Defend Abilene Crown

ABILENE, June 25 (AP)—Corporal Frank Stiedle, the long-driver from Camp Bowie, will defend his Abilene Invitation Golf Tournament championship July 2-5. . . . Professional Morgan Hampton of the Abilene Country Club said Stiedle had informed him he would be permitted to play in the tournament. . . . BUY VICTORY BONDS

1,000 Jap Troops Reported Drowned

CHUNGKING, June 25 (AP)—More than 1,000 Japanese troops drowned June 1 in the sinking of a large enemy warship by a Chinese mine in the Yangtze river near Tunglu, Anhwei province, a Central News agency dispatch said today. . . . BUY VICTORY BONDS

Advertisement for Grand Prize Beer, featuring a bottle of beer and the text 'Cultivate the Good Things... Two choice after-dinner smokes... one to honor the host's birthday... the other to celebrate the janitor's service record. It's the kind of a deed that takes but a moment to perform but because it is the heart of a fellow-man is filled with a warm, pleasant feeling that lasts throughout the day. That's the interesting thing about appreciation—a little goes so far. A moment's thoughtfulness brings hours of mutual pleasure. A small investment in kindness pays big dividends in deep, rich satisfaction. Cultivate the good things. Enjoy and treasure them... and be sure to include among them the friendly cheer and cool refreshment of grand-tastin' Grand Prize. A beverage of moderation... Grand Prize is one of the pleasures that add much to the joy of living.'

Mexican Deplores U. S. Discrimination

HOUSTON, June 25.—(AP)—Widespread discrimination throughout Texas against Americans of Mexican descent amounts to the "practice of Nazi principles," says Mexican Consul Adolfo G. Dominguez.

HOLD EVERYTHING

In a statement to the Houston Post yesterday, Dominguez said in part: "We are witnessing a deplorable and unjustified practice of Nazi principles and tactics, without realizing that we are playing into the hands of our common enemies, and in some cases Mexican citizens and Anglo-Americans, have all the earmarks of systematic and well-planned fifth-column activities."

Zoot Suits Are Fine For Elderly Thief

NEW YORK, June 25 (AP)—The zoot-suit craze spread above and beyond its normal circles of teen-age enthusiasts today with the police lineup appearance of a 78-year-old man—dazzling repete in receipt. The elderly zootist, wearing dark green trousers with garter-tight cuffs and a super-drape brown jacket, was David Hauser, charged with grand larceny. Hauser told acting Captain Edward Dillon his dress was utilitarian rather than an attempt to be stylish. He was accused of stuffing four silver fox furs into his baggy breeches while posing as a prospective client of a fur store.

They Call It Pacific

by CLARK LEE

The Hope That Was Never Realized

Chapter 23 RIGHT up to the day that Bataan surrendered, thousands of our troops clung to the hope that help was on the way. Even when the Japs broke through on the east coast and their airplanes and artillery were pounding the main road and the airfields, and General King was going forward under a white flag to surrender, most of our troops didn't give up. They walked back along the dusty road to Mariveles, now jammed with wrecked or fuelless trucks and jeeps and artillery mounts.

They still hoped that by some miracle our planes would give out of the sky and check the advancing Japs and give us a chance to reorganize at the last minute and start to win. Failing that, they hoped to get to Corregidor and hold there until help came. For most of them Mariveles was the end of the road.

On Corregidor, too, they held on to their hope to the last day. All they knew, when the end came, was that help had not reached them. They did not know, and would not have believed, that no help was going to come. Someone thought it couldn't be done.

Sometimes shortly after December 8, perhaps immediately, the decision was reached in Washington that the Philippines could not be reinforced, even with airplanes, and that MacArthur and his men would have to do the best they could with whatever they had on hand.

Some time in January it was decided that even though the Philippines were lost some effort should be made to send medicine, supplies and ammunition to the forces holding out in Bataan. Maybe if we had been in Washington we would have seen the reasons for that decision was made and Brigadier General Patrick J. Hurley, former Secretary of War, was called to Washington. The President told Hurley he had a job for him.

Pat took the job and also the funds that the President gave him and got in an airplane and flew across the Pacific. He went to Australia and flew north to Port Darwin and then over to Java.

Hurley chartered five ships and loaded them with 50-caliber anti-aircraft guns, 3-inch anti-aircraft shells, aspirin, bandages, quinine and sulfanilamide, and some canned goods. Two of the ships were lost near Darwin Harbor when the Japs staged their first big raid on the war there, catching us by surprise and inflicting heavy damage on a big convoy.

The other three all got through to the Philippines. That meant that all three ships that started, made it. There may have been other ships too, because Secretary Stimson, on the basis of information given to him, announced after the fall of Bataan that for every ship that got through two ships were sunk.

Hurley mounted some .50-caliber guns on his three ships for protection against dive bombers and got American soldiers to man the guns. The ships were given bonuses, but it would be unfair to believe that they made the trip in order to make money. Nobody who saw the ships sail northward thought the crews would live to spend their bonuses. Those ships made the trip just at the time when huge Japanese expeditionary forces in transports and warships were coming south through Macassar and Molucca Straits. While those ships were on their way running north to the Philippines, MacArthur had already set up a "blockade-running" organization of his own. That organization functioned because in the first three months of the war there was not an American ship blockaded in the Philippines. Occasionally the Japs sent a warship into Philippine waters. MacArthur had about a dozen ships which had been engaged in inter-island trade before the war and which had survived the bombings. None of them was armed. The largest was the Legaspi, a modern 3,000-ton passenger and freight ship. The senger was ranged in size down to 70- and 80-foot motor launches, but most of them were fairly roomy with three or four decks. MacArthur sent one of the ships out through Corregidor's mine fields one night late in January. It was the Don Esteban,

Hunters To Get Shells, But Gas Is Up To Them

WASHINGTON, June 25 (AP)—There will be ammunition for the hunters who can show a need for it this year, government officials said today but the gasoline shortage may yet save many a bounding buck. Officials who said plans were under way to provide ammunition for civilian sportsmen, and "see that it goes to those who need it," declined to say how distribution would be controlled. It was indicated, however, that such hunters' present supplies would be considered in fixing his allotment.

Total stocks in the hands of sportsmen are believed to be fairly large, but distributed so unevenly that some are stocked for the season while others haven't a thing. The war production board said production of shotgun shells and other ammunition useful to sportsmen was "huge," with steel being substituted for brass and copper, but reported that almost all of it had to be channeled to the military services.

The limitation order set up quotas of 25 shotgun shells each quarter, for instance—for "essential civilian users," including defense plant guards, other law enforcement officers, farmers and ranchers, who get authorizations automatically. All others seeking authorizations are required to show essential need, and WPB hasn't considered recreational hunting in that category.

Meanwhile, Ira N. Gabrielson, the wildlife division director, said sportsmen who can solve the gasoline as well as the ammunition problem can expect good hunting when the season rolls around. "Generally speaking," he told an interviewer, "the game situation is good. With exceptions in some scattered places, the game population the country over looks as good this year—if not better—than last year."

Simplified Price Controls Sought

CHICAGO, June 25 (AP)—Recommendations by its executive board for changes in the existing price ceiling regulations will be the basis for an immediate legislative program by the National Association of Retail Grocers, an association spokesman said today. The board has adopted an 11-point program urging, among other things, simplified price controls and abolishment of what it described as "un-American" enforcement measures.

P. M. Brinker, of Dallas, Texas, re-elected association president, said one of the group's major objectives "is to protect the consumer from inflation and to guarantee him an adequate food supply at a reasonable price." The board expressed opposition to government subsidies at any level of production or distribution; urged elimination of dollars and cents ceilings on a long list of commodities, and proposed that maximum price controls be confined to "cost of living commodities."

Brinker advocated that the Office of Price Administration (OPA) establish and publish one ceiling price for each commodity in an average "cost of living" budget. Brinker termed "unfair, unsound and un-American" any classification of stores by business volume or ownership for price regulation purposes. Other points in the program:

WOMAN JOURNALIST DIES

PAWLING, N. J., June 25 (AP)—Mrs. William Brown Meloney, one of the leading women journalists in the nation and editorial director of the New York Herald Tribune and of other newspapers, died Wednesday at her home.

GERMAN

(Continued From Page 1)

four-engined bombers from the Middle East raided the historic Greek port of Salonika for the first time, blasting the Sedan airbase and leaving three hangars in flames. Salonika, a major port on the Aegean Sea, has figured in Balkan speculation as a potential target for Allied invasion forces. It has a peace-time population of 236,000.

Other war headlines:

ITALY—Premier Mussolini orders sweeping purge, demands "religious fervor" to defend invasion-threatened kingdom; Bern hears 7,000 anti-Fascists arrested by Italian police.

RUSSIA—Soviet troops break into German defense lines west of Belgorod, on Kharkov front.

SOUTHWEST PACIFIC—Gen. MacArthur's bombers set huge fires in attack on Japanese base at Salamaua, New Guinea; Australian jungle fighters kill 200 Japanese in week-long fighting 12 miles below Salamaua.

BURMA—British troops inflict heavy casualties on Japanese in

three clashes on Chindwin river front.

While American fliers from Middle East bases hammered the Nazi-occupied Greek mainland, Allied bombers from North Africa pounded Catania, Sicily, and raided the Sardinian towns of Chiviviana, Venafiora, Golfo Aranci and Capoterra.

Twenty Axis planes were shot out of the skies over Sardinia, and nine Allied planes failed to return.

An Italian communique admitted damage and casualties "of some size" in Sardinia, but asserted that 33 Allied planes were shot down. The Fascist command also declared that Italian torpedo planes sank three steamers totaling 31,000 out of Allied convoys of North Africa and said Axis bombers attacked Bizerte.

On the Russian front, the strange lull of many weeks' duration continues to prevail, with the Soviet command mentioning only a single notable action—a break into German lines "west of Belgorod."

Red army headquarters said Russian troops stormed into Nazi defenses, destroyed three large block-house nests, and left 180 German dead on the battlefield.

Belgorod lies 35 miles northeast of Kharkov.

Mainly About Pampa And Her Neighbor Towns

Visiting their grandparents, Mr. and Mrs. Luther Bratton, of Brownwood, are Mary Joyce and Gerald Mobley, children of Mr. and Mrs. John Mobley of Pampa.

WANTED—Experienced cashier. See Mr. Glickman at Levine's Dept. Store. Permanent work.

A recruiting desk for Waves, Spars, women Marines and men Seabees will be in operation from 2:30 to 9 p. m. Saturday at the Pampa Hardware store, Mrs. E. E. McNutt announced today. Mrs. Tommy Stone will be in charge of the desk from 2:30 until 5:30, and Mrs. McNutt will take over then until 9 p. m.

LOST—Male, black and white Toy Fox terrier, answers to name "Friskey" has short tail. Reward for information leading to recovery. Frank Morris, Bus Station, phone 871.

Mr. and Mrs. J. L. Stowell left today to attend the funeral of Mr. Stowell's mother, Mrs. C. W. Stowell, formerly of Pampa, who died yesterday. Funeral services will be held in Chelsea, Okla., tomorrow.

Dance every night, Belvedere Cafe.

Two Top O' Texas students were on the list of 92 who rated the honor roll last semester at the University of Texas, Austin, according to a list released by the university today. They were Evert R. Duncan of Pampa and James W. Martin of Kellerville. To be listed among honor students, each student must make over a B average.

4th of July bead at Belvedere.

Mrs. Minnie D. Belote and son Malcolm of Wheeler left here Wednesday after a visit in Pampa with Mrs. Belote's sister, Mrs. C. W. Hill. Wanted to buy—electric mixer. Phone 2183.

A marriage license was issued here Thursday to Leighton L. London, of Endicott, N. Y., and Alice M. Hellrich.

Beer by the case at Belvedere.

Arriving in Pampa today for a visit with his sister, Mrs. G. L. Craddock, was Second Lieut. Geo. L. White, of Randolph Field.

WANTED—Woman for general housework and cooking. Day only. Good salary. 1003 Christine, phone 1909.

Mr. and Mrs. Charles I. Hughes have as their guests Mrs. J. F. Hughes and Mrs. Regis F. Jones of Castella, Calif. Mrs. Hughes, mother, and Mrs. Jones, wife of A. C. Regus Floyd Jones arrived last Tuesday to be here for the 43-F graduation tomorrow.

Mr. and Mrs. T. C. Narron have as their graduation guests Mr. and Mrs. Joseph Crane, Wichita, Kas., parents of Av-C Lawrence Richard Crane, and others, Lt. Edward Crane and Jack Crane.

Mr. and Mrs. George Briggs have as their graduation guests, Miss Ruth Crane, Wichita, Kas., sister of Av-C Lawrence Richard Crane, and Miss Dorothy Harlin, Fort Smith, Ark.

Rotary Extension Speaker Addresses Club At Canadian

Special To The News.

CANADIAN, June 25.—D. D. Munroe, Clayton, N. M., member of Rotary International extension committee for the U. S. A., of Clayton, New Mexico, was guest speaker at a banquet held by the Canadian Rotary club Tuesday evening. Attendance was 140.

The WCTU building, used for the Rotary club's weekly luncheons, was the meeting place. Bassett Bryant, president of the local club, was master of ceremonies.

Deane Fletcher led the group singing, Jane Stovall at the piano. Lewis Chamberlain favored with music, a medley of old-time popular songs and another of sacred hymns.

No flowers were on the tables, the explanation given that the \$10 which would have purchased them was given to the Rotary relief fund.

President Bryant introduced Mrs. Helen Munroe who accompanied her husband on this speaking trip, then D. D. Munroe, speaker for the evening.

The speaker discussed the principles of Rotary as related to the present world conflict. He stated that he is a member of a small Rotary club in a small town. It is one of the oldest groups organized, being No. 439. He believes in the small town folks and their ability to do things to make their influence felt in national and international affairs.

He said one of the saddest things about the present world war is the disintegration of the American home.

The speaker stressed the principles of Rotary as those which must prevail at the peace table at the close of the current war if a lasting peace is to be secured. He said that 12 men some two thousand years ago changed the history of the world. He considers Rotary principles the most powerful force in the world today.

Munroe's closing thought was that youth should give youth something to "live by," cease giving them something to live down.

Out of town guests were D. D. Munroe, Mrs. D. D. Munroe, Clayton, New Mexico; Mr. and Mrs. Clayton Hearse and Mr. and Mrs. Winifred Lewis, Shamrock, Mr. and Mrs. Jack Woodard, Mr. and Mrs. Jinks Breashears, and Mr. and Mrs. Dan Archer, all of Perryton.

KING RETURNS

(Continued From Page 1)

lister jokingly that he had "missed all the fun."

Unlike Churchill, who spends considerable time in the pilot's cockpit on his many plane trips, occasionally taking the controls himself, the king visited the cockpit of his plane only once, and that was early on the outgoing trip.

While luggage was being unloaded from the plane, the king chatted with Churchill about his experiences. Then the two were driven off.

The king's pilot, who flew the plane on the entire 5,800-mile journey, said the trip home was completely uneventful and that the monarch spent most of the night sleeping.

The king's only comment when he alighted was: "A very good trip indeed."

The royal plane left North Africa last night and flew nonstop to England. An escort of four American Alracobras accompanied it over the African coast and the Spitfires picked it up this morning.

The pilot said that during the trip "we didn't see a single German plane the entire time except on the ground."

Sir Alexander Barding, the king's private secretary; Col. Sir Piers Legh, master of the royal household, and his equerry flew home with him.

Before leaving this base, the king sent Air Chief Marshal Sir Fred K. Bowhill to convey his congratulations to each member of the plane's crew.

Pampa Soldiers Get Lesson In Geography

Members of the 454th base headquarters and air base squadron at Pampa Field attended the first of a series of war orientation lectures in their day room Wednesday.

Lt. Benjamin Bock, pool librarian, a former professor at Texas Tech, Lubbock, is the lecturer. Two talks will be given each Wednesday, one at 10 a. m. and the other at 2 p. m. All squadron personnel must attend one of the sessions.

This week, Lt. Bock spoke on the historic, military and strategic importance of the Mediterranean area. He pointed out the various islands that lie along the important water route of the Mediterranean, traced their history and ownership and explained the importance of each in the present war.

It is the purpose of the orientation talks to acquaint military personnel with facts on war activity and geographical background of the war theaters.

Apply At Pampa Field For Cadet Enlisted Reserve

Any young man who has not reached his 18th birthday and who wants to be an aviation cadet may qualify to wear the new reserve corps wings with civilian dress by making application for aviation cadet training and being accepted by a cadet examining board, such as the one at Pampa Field.

As a member of the air corps enlisted reserve, a potential cadet may remain on an inactive status until he is 18 years old. In the meantime, he may continue his education or civilian occupation. When he becomes 18, he is eligible for pre-flight training. In the case of a college or high school student, the call to active duty may be postponed until the end of the current semester, providing it is completed not later than six months after his 18th birthday. Pre-flight training consists of a five-month preparatory course at a college or university which has been specially selected to conduct academic courses for aviation cadets of the army air forces.

Men who have already reached their 18th birthday and who are not yet 27, may also apply for cadet training to the cadet examining board at Pampa Field. Upon passing mental and physical examinations, they will be given the opportunity to volunteer for induction under the selective service and be assigned to the air forces.

Enlisted men already in the army may also qualify for cadet training, and they may get complete details from their squadron's first sergeant.

Lt. E. K. Shelby is aviation cadet recruiting officer at Pampa Field.

(Continued From Page 1)

fighting the Japs in Burma and Thailand, I'd stack your group against any heavy bomber group in the world any time—and be confident of the result."

The group to which he referred stems back to World War I days, when it won citations for outstanding performances in the Lorraine, St. Mihiel and Meuse-Argonne battles.

A few days ago, the group learned of another citation issued in the name of the President of the United States—"for outstanding performance of duty in action during the period Jan. 14 to March 1, 1942."

"Opposing the full force of the numerically superior Japanese with all available aircraft," the citation said, "the bombardment group participated daily in attacking the enemy wherever they found him during his prolonged drive through the Philippines and Netherland Indies to Java. Long-range bombing attacks were executed in the face of heavy anti-aircraft fire, and large concentrations of enemy fighter airplanes over the target areas. Despite extremely adverse weather and dangerous field conditions, hampered by lack of adequate personnel to maintain aircraft in continuous combat condition, many successful missions were performed by crews fatigued from daily flights against the numerically dominant enemy. The superior courage and devotion of duty shown by this bombardment group will always be worthy of emulation."

This year, the group has been bettering its records month by month. During the first 22 days of May, for example, the heavy bombers dropped 1,400,000 pounds of high explosive on more than 40 targets. In a single day, they poured more than 100 tons of bombs on the Japs.

FOOD CZAR

(Continued From Page 1)

would lead to requests for higher wages, he said, and then cost to farmers would rise again, and so on.

The president entered a denial when asked about reports that food administrator Chester Davis had submitted his resignation because he felt he has inadequate powers.

Mr. Roosevelt said the last he had heard from Davis was when he asked the administration if the latter would like to run the office of price administration and Davis replied: "God forbid."

"It has been said he wants to control farm prices," a reporter said. "Is there any decision on that?"

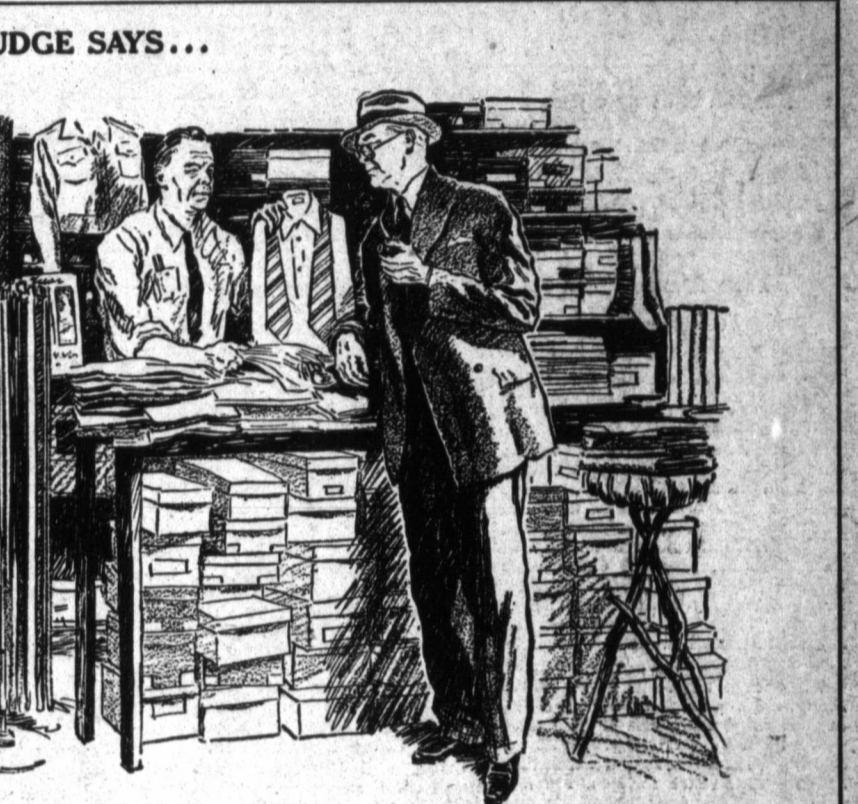

No, the chief executive responded, but suppose he did control them, or a czar controlled them, what would happen to the cost of food to consumers? Would he keep the cost down to present levels or let the cost go higher? "Somebody has to answer that question," he declared.

THE OLD JUDGE SAYS...

"Just dropped by to tell you, Frank, I had a fine letter from your son, Joe, this morning. Mighty nice of him to take the time to write me... I know how busy they keep the boys. That's a fine camp he's been transferred to up in New England."

"Yes, Catherine and I had a letter this morning, too. Said he was writing you... he's very fond of you, Judge. Catherine is certainly proud of Joe and proud of the great Army he's a part of."

"She has good reason to be, Frank."

Joe is one fine fellow and the Army he's in is the best disciplined, best behaved in our history. Just last night I was reading an article that quoted a report signed by five chaplains in the very camp where Joe is now training. I remember their exact words which were "there is no liquor problem at this Post." And I understand that's true in camp after camp all over the country. And if I understand you would like to see that report, I'll drop it off at the house tomorrow."
