As for party loyalty, at the last election he made it clear that he was the "people's man." He was just too big, you know, to have a strictly Republican label on him or to get down to specific principles of government. you can keep your feet in good condition, your disposition will stay sweet in spite of sweltering summer days. Even minor foot discomforts can put wrinkles in a little girl's brow So if you haven't attended to callous, corns or other foo miseries, do so promptly, for your own sake.

A simple treatment to refresh your feet after an active day of standing or walking as suggest ed by a foot expert is this: Soak feet in a basin of very warm soapy water for ten of fifteen minutes. Then plunge them into ice cold water. Dry well and massage with rubbing alcohol. Lie down with the legs elevated on pillows and relax for You'll find this buy hard to beat! Famous Moto-Mower, fifteen minutes or so.

There are some very good foot soaps and ointments which can be used to ease tired feet. Your doctor or druggest should be glad to advise you about them.

The pedicure procedure is al most the same as that followed for a manicure. Remove the old lacquer, then trim your toebut make sure you trim them straight across. (This helps avoid ingrown toenails.) you leave your nails long enough to protect the end of the toe from pressure and ir ritation, nails will still serve their purpose, and look and feel attractive as well. Dip a cottontipped stick into cuticle remover and oil around your nails to help soften dead cuticle. Then scrub the nails with a little

brush, soap and water. The professional manicurist dips a cotton - wrapped stick in peroxide to clean and bleach inder the nail. Another trick is to put tufts of cotton between toes to keep them apart while the lacquer dries. A base top coat is applied before the polish. Summer polishes are gay and festive in seashell, sun red and other glamor shades.

After the first coat of lacquer has been applied, let it dry thoroughly, then apply another coat. A coat of sealing base coat, is now applied on top of the two coats of lacquer. If a manicure and pedicure are properly given, it should stay in shape until the week is up. And the ten or fifteen minutes spent on keeping fingernails and toenails in pretty is well worth the effort.
