## Allies Cross Parallel 38 At Two Points

TOKYO — (AP) — Allied tanks and troops today slashed across the 38th parallel at two more points in their officially designated all-out offensive to hunt down the battered and retreating Communists.

The new crossings kept up the pressure on the Reds, who already were battling an Allied spearhead now thrust four miles into North Korea on the East-Central front.

Dispatches said the new crossings were made on the Western Front north of Seoul and on the Central Front northeast of Chunchon. Both these tank-infantry teams withdrew to South Korea by nightfall.

"The 38th parallel means nothing to me," said Lt. Gen. James A. Van Fleet, commander of the U. S. 8th Army.

He showed he meant it by crossing into North Korea himself. Van Fleet visited a tank and infantry task force. It was sitting solidly as a huge road block north of the border astride the Reds' escape route from the East-Central front. He said his army's tactics of pursuing the Reds into their own territory was a gamble but is paying off.

"The Eighth Army is in an all-out offensive," Van Fleet said. "Considerable progress" has been made.

Field dispatches told of open flight of Chinese toward the 38th parallel from some fronts, while they fought stubbornly on others. The pursuing Eighth Army, Van Fleet said, will "not be limited by such barriers as the 38th parallel in chasing them down."

On a tour of the front Van Fleet pinned distinguished service crosses on Lt. Gen. Edward M. Almond, 10th corps commander, and Maj. Gen. Clark L. Ruffner, second division commander, for their part in smashing the Reds' second spring offensive.

"It looks like the pursuit tactics are working well," Van Fleet said. There will be no technical limit on running down the Reds. He puts it this way: "The 38th parallel has no significance in the present tactical situation. It means nothing to me. The Eighth Army will go wherever the situation dictates in hot pursuit of the enemy."

"We intend to exploit every advantage in carrying out our objective to find and kill the enemy."

## John M. Culpepper Dies This Morning; Funeral Is Pending

John Marshall Culpepper, 64, died early this morning at the home of his son, B. T. Culpepper, 325 Miami.

Mr. Culpepper had been in Pampa about two months. He came here from Texas. His survivors are his wife, Beulah Mae; four sons, B. T., Pampa, C. E. and W. M., both of Grand Prairie, and J. E. of Texas; one daughter, Mrs. W. E. Odam, Texas.

The body will be sent tonight by rail to Texas, where funeral arrangements are pending. Duengel-Carmichael is in charge of arrangements.

## Mrs. J. N. Wilkinson Dies In Canadian

WHEELER — (Special) — Mrs. J. N. Wilkinson, 75, died Thursday afternoon at her home in Canadian after an illness of several weeks.

She had lived in Canadian for three years, moving there from Allison, where she had lived for 20 years.

The funeral will be held in Allison at the Church of Christ with C. M. Walkup, minister from Norman, Okla., officiating. No time has been set. Interment will be in the Zybach Cemetery in Allison with Kirk-Mason Funeral Home, Wheeler, in charge.

Alice Wilkinson is survived by her husband, three daughters, Mrs. Mary Stevenson and Mrs. Opal Beck, both of Canadian and Mrs. Ruth Delino, Caw City, Okla.; three sons, Cecil and Alec of Mack, Colo., and Carl of Hanford, Calif.; 28 grandchildren and 15 great-grandchildren.

The body will lie in state at her home in Canadian until the funeral.

Come in and see our complete stock of air conditioners from \$39.50. A size for every need. Bert A. Howell & Co., 119 N. Ward, P. 152.

# Phillips Sets Deep Test In North Gray County

## County Votes Saturday To Decide Airport Issue

### Heavy Vote Forecast By All Factions

The battle over issuance of \$288,500 airport improvement bonds is about over.

Starting at 8 a. m. tomorrow the county's property owning taxpayers will go to the 18 precinct polling places to voice their opinion where it will count—in the ballot boxes.

Since the campaign started early this month, the county has been sharply divided into three camps; those who support the present E. Browning site, those who favor the northwest field, and those who do not want an airport regardless of where it is located.

Those who belong to the northwest field camp declare Gray (See COUNTY, Page 2)

## Election Boxes

Following is a list of the county's 18 election boxes, their location and election judges:

1. Lefors school, Lefors; W. R. Combs.
2. Baker school, Pampa; Dick Walker.
3. Grandview school, Jim McCracken.
4. Ball residence, Alanreed; W. J. Ball.
5. City hall, McLean; W. E. Bogan.
6. Laketon school, Laketon; Ennis Jones.
7. Farrington school, C. C. Stockstill.
8. Hopkins school, Hopkins; John Mackie.
9. Woodrow Wilson school, Pampa; Gus Green.
10. Court house, Pampa; Haskell Maguire.
11. Store building, Kingsmill; Mrs. Rex McKay.
12. Oddfellows hall, Pampa; N. P. Brown.
13. Community hall, Phillips Camp; J. Gotcher.
14. Horace Mann school, Pampa; N. M. Kite.
15. Carpenters' Union hall, Pampa; Mrs. Jess Clay.
16. Tom Rose Ford Co., Pampa; Ed Anderson.
17. Cubine building, McLean; J. E. Kirby.
18. Webb residence, Mrs. Charlie Webb.

Only those who have rendered their property to the county for taxation and also have a poll tax receipt, or exemption, are (See ELECTION, Page 2)

## Airport Bond Issue Debate Highlights League Luncheon

A spirited discussion of the airport bond election which will take Gray county property owners to the polls Saturday, highlighted the luncheon given in the Country Club Thursday by the Provisional League of Women Voters of Pampa.

This was the first actual participation of the league, a new governmental organization, in governmental affairs.

The luncheon was presided by a board meeting at which Mrs. J. D. Perryman of Dallas explained the League of Women Voters, telling of its purpose, past accomplishments and future plans. She explained the qualifications to be met by members and answered questions concerning the league.

During the afternoon Mrs. Perryman again discussed the inner workings of the league and presided at a question and answer period. The league, which had been in a period of organiza-

ATOMIC SHELLS? — "Little David" the 36 inch mortar design for use in World War II is now believed being readied for Atomic artillery use. Rep. Overton Brooks (D-La.) stated the U. S. has perfected atomic artillery and called for its use against the Reds in Korea. (NEA Telephoto)

## High School Cancels Graduation Trips

All future overnight trips for Pampa High School graduating classes have been permanently cancelled.

"That announcement was made this morning during class hours by High School Principal Frank Wilson.

Wilson, in drawing out the announcement, said: "This does not mean there will not be any activities for future seniors, but it means there will be no more overnight trips with large groups of students."

The action was taken officially this week by the school administration, Wilson said. Discontinuance of the weekend school trips came after four seniors were caught stealing relics and other items from the curio shop at the Carlsbad Cavern Park, N. M., during the 1951 class trip two weeks ago.

It was reported then, unofficially, that the incident would result in cancellation of future overnight trips for Pampa High School seniors. The official action came this week.

"Of course," Wilson added, "we will have activities such as parties, dances and other social events for the future graduating classes. But, the overnight trips to any place, Carlsbad Caverns or what have you are definitely and permanently out."

Although school authorities succeeded in talking New Mexico park authorities out of arresting the four Pampa boys for the thefts, the boys were disciplined. Their names were removed from all printed programs and they were denied participation in all other graduating activities.

However, they were awarded their diplomas, but had to go to the principal's office to receive them instead of receiving them with the rest of the class.

Recognition was given the decorating committee: Mrs. Raymond Harrah, Mrs. J. W. Garman and Mrs. Ralph Sidwell.

Dr. Douglas Nelson gave the invocation and also served as time-keeper for the debate on the bond issue. George Vineyard defended the issue, upholding the present site of the airport, and W. A. Nolan spoke against it.

"The question is — what kind of town do we want?" Vineyard asked. He said the city has long looked at this problem as if it would solve itself, and added, "It will not solve itself. Any city must spend money to be a good city. A higher tax rate gives more to a town. It is merely a matter of deciding what kind of town we want."

"We would not like to wake (See AIRPORT, Page 2)

## Guns Or Books Tests Slated For Collegians

PRINCETON, N. J. — (AP) — A three-hour test tomorrow may determine whether 175,000 students throughout the nation will stay in college or shoulder a gun.

Deferments until Aug. 30 have been authorized for an estimated 500,000 draft age collegians to permit them to take the examination either tomorrow, June 16, June 30 or July 12.

Midnight tonight is the deadline to apply for the test on the last three dates.

The tests will be given in more than 1,000 centers across the country. Scores will be sent to local draft boards within a month after the exams to use along with college grades in deciding who will serve best in the classroom or in uniform during the present emergency.

Students will have to ask their local draft boards for their marks.

The Education Testing Service of Princeton will administer the exams for Selective Service. A spokesman for the ETS said the test was designed solely to check on ability to tackle college work.

Questions will be on the multiple choice type which the student asked to pick the best answer to a given problem.

Although selective service has left final decisions up to the local boards, it has suggested these standards to guide them on deferments:

1. Seniors should be permitted to finish their college education.
2. Seniors who wish to go to graduate school should be in the upper half of their class or score 75 in the test.
3. Freshmen should be in the upper half of their class or score 75 in the test.
4. Sophomores should be in the upper two-thirds of their class or score 70.
5. Juniors should be in the upper three-fourths of their class or score 70.

## Fanny Brice Reported Ill

HOLLYWOOD — (AP) — Fanny Brice, radio and stage comedienne who once said she had gotten everything out of life, is critically ill.

The creator of the radio character, "Baby Snooks," suffered a cerebral hemorrhage yesterday at her Beverly Hills home. She was taken to Cedars of Lebanon hospital and placed in an oxygen tent.

Miss Brice, 59, has been in show business since she was 15. She said she planned to retire some time this year "because it's too much work."

## Pumping Engine School For Pampa Is Scheduled By API

Care and operation of pumping engines and pumping units is scheduled for study by Pampa's oil field production men beginning late in June.

Panhandle Chapter of the American Petroleum Institute completed arrangements last night to sponsor two ten-day courses in Pampa and one in Borger.

The vocational training courses, the first of which begins here June 25 and runs through July 6, are projects carried out by the University of Texas' Division of Extension.

The extension service is sending instructors and mobile laboratory equipment to Pampa and Borger.

Pampa's second course will begin July 9 and continue through July 20. Borger's classes will be held from July 23 through Aug. 3.

The course, one of a series applying to the petroleum industry, covers engine trouble-shooting, fuel systems, regulators and carburetors, magnetos and igni-

## Wildcat Well About 6 Miles From Pampa

By BUD ANDERSON

Phillips Petroleum Co. has staked location on a 10,000-foot wildcat in Gray county, four miles north and five miles east of Pampa.

The deep test, widely rumored in the area for several weeks, was verified this morning by Phillips officials in Bartlesville.

The well is the No. 1 Hobart Ranch and is located 660 feet from north and east lines of section 26, block 3, I&GN Survey, one-half mile west of Hoover.

It is on an 88,500-acre block leased by Phillips in Gray and Roberts counties.

According to Phillips, the well is to test the Arbuckle lime formation, believed to be in the 10,000-foot zone.

This is the first wildcat location in this area since the company plugged the No. 1 Jenkie in Roberts County. The new test is approximately one and one-half miles south of the Jenkie, drilled in 1947.

Phillips plugged the Roberts County test, 10 miles northeast of Pampa, in October after encountering numerous oil and gas shows. The Jenkie was drilled to 11,730 feet.

The new location has been selected after additional seismic work following plugging of the Jenkie.

Phillips said this morning operations were scheduled to begin immediately.

Meanwhile, The Texas Co. is preparing formation for tests to be run on its No. 1 C S. McGarrough "B" in southern Ochiltree county. Operators are loosening the formation from 8475 to 8490 feet after carrying out a similar operation in a lower zone Thursday. The well will be swabbed today.

Earlier this week the well produced 5 barrels per hour from perforations 8475 to 8490 feet. After perforating from 8513 (See WILDCAT, Page 2)

FIRST POPPY — Mrs. M. F. Roche, American Legion Auxiliary Poppy Day chairman, sells the first poppy to Harry A. Nelson of Miami who lost a son in Korea. Poppy Day as proclaimed by Mayor C. A. Huff is designed to honor the war dead of two world wars and the Korean war. Auxiliary volunteers will be on the streets of Pampa selling poppies all day Saturday. (News Photo)

## New A-Bomb Tests Made At Eniwetok

WASHINGTON — (AP) — The United States announced today it had "successfully" carried out atomic tests at Eniwetok including some experiments that may lead to H-bombs.

The tests were announced jointly by the Atomic Energy commission and Defense Department. They included the blast and heat effects on "structures, aircraft and various other items" as well as measurement of radiation from the weapons.

The announcement said: "The Atomic Energy commission and the Department of Defense today notified President Truman that a program of atomic weapons tests has been successfully carried out by joint Task Force 3 at the commission's proving ground at Eniwetok atoll."

"Lieut. Gen. Elwood R. Quessada, USAF, commands JTF-3, composed of personnel from the AEC, army, navy, air force and from educational and industrial organizations. Dr. Alvin C. Graves of the Los Alamos scientific laboratory is scientific deputy commander of JTF-3."

"As previously announced, test activities at Eniwetok are under security restrictions including those of the atomic energy act. Information obtained from research on nuclear detonations, the major purpose of the tests, is secret. In furtherance of the President's announcement of Jan. 31, 1950, the test program included experiments contributing to thermonuclear weapons research."

"Information on several projects in fields of biology, medicine and radiology will be declassified and provided to appropriate agencies of the government when results have been analyzed and evaluated. The program also included comprehensive measurement of blast and thermal effects on structures, aircraft and various other items. Much of this data will be declassified for use by both the Department of Defense and the Federal Civil Defense agency. The data obtained include additional information of primary military value in the field of weapons effects."

"Gen. Quessada and Dr. Graves will return to Washington in a few weeks to report to the Department of Defense and AEC. The commission will continue to use the Eniwetok proving ground and the area will remain closed to unauthorized persons."

## Collins Claims Russ Pilots Flying Planes In Korea War

WASHINGTON — (AP) — Gen. J. Lawton Collins said today "we are quite convinced" that Russians are flying some of the Communist planes in Korea.

Collins, army chief of staff, also said that equipment captured from the Chinese Reds is "mostly Russian."

Collins was testifying at the Senate inquiry into foreign policy and the dismissal of Gen. MacArthur.

In a general discussion of the situation as to air war, Collins said "The Russian air has never come down below this river up here in any strength."

He was using a map and the (See COLLINS, Page 2)

## Saturday Is Poppy Day

Veterans of two world wars will set the pace Saturday in observance of Poppy Day in Pampa, as proclaimed by Mayor C. A. Huff.

Bill Davis, Commander of Pampa Post of the American Legion, in issuing his Poppy Day message, called on all veterans to put a poppy on early Saturday and wear it all day to honor the war dead.

Mrs. J. M. Turner, president of the Pampa Auxiliary Unit, said that volunteers will be on the streets of Pampa all day Saturday offering poppies for sale.

Sponsored by the American Legion Auxiliary the observance is being directed by Mrs. Mike Roche, who said that the poppies to be distributed here were made in Kerrville, Texas, by patients in the hospital there.

"It is hoped that contributions given in exchange for the poppies will reach a total of \$3,500,000 throughout the country," Mrs. Roche said.

Poppy posters appearing in the windows of Pampa stores were made by eighth grade art students under the direction of Miss Roy Riley.

Miss Ruth Huff, assisted by Mrs. E. M. Behrman, arranged a central display in a local store that displays a battle cemetery in miniature with its crosses "row on row." Between the crosses are red poppies as they grew in the cemeteries in France and Belgium.

 to 8520, the well flowed seven barrels an hour.  
 Another well, eight miles east of the Wheeler County line in Beckham County, Okla., was reported flowing 200 barrels in three hours from perforations from 10,271 to 10,295 feet.  
 The well is Carter Oil Co.'s No. 1 Garrett near Sweetwater. Operators gun perforated the zone late yesterday and acidized.

## TV Star Weds Movie Actor

NEW YORK — (AP) — Dagmar, busy blonde television star, has married a movie actor in Las Vegas, Nev.  
 The actress announced last night that she married film actor Danny Dayton Monday in the Flamingo Hotel at the Nevada resort city.  
 She said she arrived back in New York yesterday by plane, while her husband returned to the West Coast to work in a picture.  
 On their marriage license, the bride gave her name as Virginia Ruth Egnor and the bridegroom Daniel D. Segall.  
 In previous stage appearances, Egnor has used the name of "Bonny Lewis."  
 The tall, curvaceous actress said she had known Dayton for two years and that they had planned for some time to be married.

## AIRPORT

(Continued from Page 1)  
 up some morning without air mail or air passenger service. An airport is a part of any good city.  
 The speaker discussed the proposed plans for moving the runways to the east side of the field and paving them, which he said would eliminate the hazards of the present site. He said the arguments advanced by him were not entirely his, but had been arrived at by a group of men "far more intelligent than I" after much deliberation and "burning of midnight oil."  
 In rebuttal, Vineyard attacked the proposed alternative site, known as the northwest field, for several reasons. He said: (1) the road leading to the site would have to be paved, (2) the CAA authorities have refused to support it financially, and should they retract that decision the contract includes a clause which would permit the government to take it as an Army airfield.  
 "Safety" was the keynote struck by Noland in his opposition of the bond issue. He said the present airport, situated so near the residential district, is a detriment to the safety of the homes and schools in that vicinity. He said statistics prove that most plane accidents occur in takeoffs and landings, and in the event of such accidents at the local port, some of the houses nearest the runway would certainly suffer.  
 Noland asserted the present airport would not adequately handle large planes or jet propelled planes, and that both are coming more into use all the time.  
 "Why spend a lot of money to build something that is of a temporary nature and would have to be done over in a few years anyway?" he asked.  
 Noland said in his opinion any funds used should go toward developing the northwest field, which already has paved runways and has facilities for expansion and is far enough from town to guarantee safety to the residents.  
 "And as for having to pave a road to it, I think we need to pave a road to this one," he said.  
 As a further argument Noland said he believed the land the airport now occupies would be much more valuable as residential property when the town expands than it is as an airport site. He concluded "I hope you will go to the polls Saturday and vote this issue as you see it."  
 Mrs. H. H. Hahn, vice president of the league, introduced the speakers.

The orange-colored lenses of the prairie dog's eyes act as filters permitting it to withstand the sun's intense glare.

## Two Hurt In Accident

An accident Thursday noon at Harvester and Duncan resulted in injury to two local women, but caused no injury to two small children riding in the car.  
 Driver of one car was Mrs. Bobbye Humphries who was traveling east on Harvester when her car collided with one driven by Mrs. May Elizabeth Thomas, 114 N. Gillespie, who was going south on Duncan.  
 Mrs. M. L. Gray, 2007 N. Hamilton, who was riding in the Humphries car, was taken to a local doctor immediately following the accident and was treated for lacerations on the forehead. Mrs. Humphries was treated for lacerations around her left eye, contusions and shock.  
 Mrs. Thomas and two small children who were riding in the Humphries car, were uninjured. No arrests were made, police said.

## COLLINS

(Continued from Page 1)  
 river was not immediately identified in the stenographic transcript. Presumably it was the Yalu, forming the boundary between Korea and Manchuria.  
 The Collins said his use of the word "Russian" was a slip of the tongue "because they have not been in at all."  
 He added:  
 "But the Chinese air, some of which we are quite convinced is flown by Russians is what I am talking about."  
 Briefing the senators generally on troop heat in Salsiao of this time, Collins said the Allies have moved to the counter-offensive and the Red Chinese "are in pretty complete retreat along the front."  
 He also said the Red Chinese suffered tremendous casualties in the opening of their spring offensive.

At the outset Chairman Russell (D-Ga.) suggested that Collins bring the committee members up to date on the fighting in Korea, briefing them on the latest front line reports.  
 What Collins said in response was heavily censored.  
 Noted that the army chief of staff "has the heavy responsibility of directing the ground forces activity of our ground forces" and that "it is the army ground forces which have borne the brunt of the fighting in Korea."  
 Russell commented that despite the development of new military techniques, "it is still the old footslogger who has to go up front and take a piece of ground away from the enemy before a battle can be won."  
 Collins was the first head of one of the nation's three military branches to appear before the Armed Services and Foreign Relations committees. They closed their doors to receive his testimony at 8:05 a. m. (CST).  
 He was preceded on the witness stand by MacArthur, defense Secretary George Marshall, and Gen. Omar Bradley, chairman of the joint chiefs of staff.  
 The hearings entered their 18th day with Collins' appearance.

## COUNTY

(Continued from Page 1)  
 County needs an airport, but contend it should be located on the old Pampa auxiliary landing field, five and one-half miles north and west of the midtown section. The other opposition camp is simply against the county voting bonds to improve any airport.  
 Proponents of the measure claim the E. Browning site is the only hope for Pampa's aviation development, and declare it is a vital need if Pampa is to grow and prosper.  
 Much time and effort has been spent during the short campaign for propaganda, meetings, advertising and just plain coffee-cup arguments by both major camps.  
 The result has been that the issue has turned not to a matter of money as much as it has turned into a matter of location. Since both sides of the fence have appeared pretty evenly divided each camp has been working overtime in an effort to get out the voters. Leaders of both sides predict voting will be heavy in one of the most spirited campaigns ever to come before Gray county voters.  
 It is estimated that 20 percent of the nation's steel and 30 percent of its pig iron are made in Pennsylvania, mostly in the industrialized western section of the state.

## Browning Airport Site Held Inadequate By LGCT Chairman

"If the county spends \$288,500 to improve the E. Browning Pampa Municipal Airport, another bond election will have to be called within five years to move to a larger site," W. A. Noland, chairman of the League of Gray County Taxpayers, told a county-wide mass meeting in 21st District Court Room last night.  
 Noland told the group the proposed change would put the present site within a 136-acre area "which in time would not be adequate to handle large two-engine ships and the jet jobs that are sure to come five years from now."  
 "Although jets don't need long landing strips for takeoffs they do need long ones for landing because of the high speed with

which they come in," he added.  
 The chairman said if the bond issue is passed Saturday and the county proceeds to spend \$288,500 to improve the present site "we will again be faced with a larger site — in all probability the northwest field."  
 He added that private planes and other snips "would not bypass Pampa simply because the northwest field is a few minutes more away from town."  
 On the safety side of the picture, Noland declared Woodrow Wilson School to be "with-in conking out distance" of airplane motors during takeoffs when the wind is out of the west and the east-west runway is used.  
 In closing, Noland said:

"We need an airport — a good port that can adequately and safely take care of increased aviation activity that is coming to Pampa; an airport that will adequately and safely take care of ships used by private industry, the airlines, and private flyers."  
 Frank Carter, one of the E. Browning opponents' leaders told the group in a short talk:  
 "The decision on this issue will be a lasting one. It is our future, the future assurance of safety from possible falling planes for east Pampa residents. I would be ashamed of myself if I didn't voice my opinion by casting my vote against Saturday's bond issue."  
 During the open forum portion of the meeting Noland said the task force seized the Choctawhatchee river crossing near Inje and dug in on both sides after a dramatic 13-mile drive. The bridgehead was reported firmly established at 8 a. m. Friday. Allied tanks patrolled the Hongchun - Inje highway and battled with Reds in the Hills.

## ALLIES

(Continued from Page 1)  
 was moving forward at the beginning of the 12th month of the Korean war. Solid gains of two to six miles were punched out Thursday.  
 The Reds backed up fast. But they left rear guards who fought bitterly to slow the Allied advance. Communist artillery forced one Allied tank patrol to return to the main body of troops.  
 The Chinese retreat route in the east was blocked by a huge U.N. armored force astride the main highway, nearly four miles north of 38.  
 Infantry and artillery with the task force seized the Choctawhatchee river crossing near Inje and dug in on both sides after a dramatic 13-mile drive. The bridgehead was reported firmly established at 8 a. m. Friday. Allied tanks patrolled the Hongchun - Inje highway and battled with Reds in the Hills.

## Two Injured In Wreck At Wheeler

WHEELER — (Special) — A light rain about 8:30 last night caused an accident about 4 miles west of here, when Doyle Brown, son of Ed Brown, hit the shoulder of the road and turned his car over about four times.  
 Young Brown was uninjured, but Ray Cole Johnson received a broken shoulder and Betty Lou Kidwell was bruised and is in the hospital suffering minor abrasions.  
 The car is a total loss, officials said.  
 The National Geographic Society says large-scale diamond mining was not known until discovery of diamonds in South Africa.  
 It is estimated that about 24 percent of all coal mined in America comes from Pennsylvania.

### Plane Goes On As Crew Bails Out

TOKYO — (AP) — A C-119 Flying Boxcar loaded with supplies for Korea, developed mechanical trouble.

The crew and passengers — six in all — bailed out safely near Yokohama.

Put the huge aircraft roared on, climbing all the while.

It crossed Honshu Island and headed over the Sea of Japan in the general direction of Siberia.

American fighter pilots trailing the big ship reluctantly carried out their orders: shoot it down where a crash would injure no one. The plane plunged into the sea.

### Quick Thinking Saves Baby From Drowning

KILGORE — (AP) — Gary Mike Johnson, 28 months old, escaped drowning in an abandoned well because of his mother's quick thinking.

The youngster fell through some boards covering the well yesterday and plunged 15 feet into ten-foot water. Mrs. Leon Johnson quickly threw a board in the well for Gary Mike to hang on, then climbed down after him.

She reached the boy just as he began to lose his grip on the board.

The changeable mole, chrysochloric, has fur that appears different in color as the light in which it is viewed is changed. Sometimes it appears a golden or bronze-green, then a bronzed red.

### Burro Helps Atomic Work

OAK RIDGE, Tenn. — (AP) — Few animals top the Mexican burro in carrying man's burdens. Now man has assigned the champion burden of all time to the docile little donkeys.

Two hundred and forty-two burros were imported from south of the border about a year ago to help scientists find out how much atomic radiation a man's body can stand. Two colts were born here.

They will be exposed to deadly gamma rays like those given off in atomic explosions.

Dr. John H. Rust, one of three scientists who will conduct the experiments, says the burro was picked because he is gentle, easily trained and not much heavier than man. A full-grown burro weighs about 30 pounds. Its life span is about 20 years.

"This is a long-range program and it may take years before we are able to draw any conclusions from our work," Dr. Rust says. The experiments are being carried out by the University of Tennessee under a contract with the Atomic Energy Commission.

### Man Bilks Women For Racing Funds

LOS ANGELES — (AP) — "I can't understand how women can be so gullible," the judge asserted, "but we've got to do something to protect them."

Whereupon he sentenced Elton Howard, a 38-year-old roofer, to one year in the county jail for bilking Miss Myrtle Minor out of \$700 and losing the money on the horse races.

## KILLER'S PACE

BY JULIUS LONG

COPYRIGHT 1951 BY NEA SERVICE, INC.]

THE STORY: In order to save Renee Bladest from the electric chair, Star Williams, her lawyer and my (Jim Marshall's) boss, did some sleight of hand. She was exposed. He now must prove Renee innocent. He has taken me to the La Jolla club and I'm talking to Louise, girl friend of Al Nansbarro, who runs the place.

XIX  
 LOUISE'S smile went well with her fluffy brown hair and it wasn't spoiled by a ton of theatrical make-up. But it did hide fear. I guessed her age about 22. She finished her drink and climbed down from her stool.

"Please excuse me. I have to get ready for the show now."

She vanished beyond the drapes concealing Nansbarro's office door. About a quarter till 11 the other girls left the bar and went to their dressing room. It was only five till 11 when Louise emerged from Nansbarro's office and crossed to the main door. She didn't look so good. She looked as if she might have been crying.

Then Madam Sonya Sareeta excused herself and left Stone alone. At 11 sharp the show started. Larry Stone moved to a ringside table and, as a matter of ceremony, he crossed over and sat down at the table with Stone.

He glared a split-second; then he put on a patronizing grin.

"Oh, hello, Marshall. I didn't know the place was this crowded."

"It isn't. I wanted a ring-side view of the feature attraction, Madam Sareeta. She's quite a lady magician to get you to a dump like this."

Stone glared again but turned his attention to the floor show as the lovely ladies of the line appeared. The girl Louise was indeed lovely, and I envied Nansbarro in spite of myself.

The dance routine was followed by a skating act, then by a char-

acter who made things out of balloons. Next came a female vocalist and as a reward for staying through it, the customers were again treated to a view of the line. This time the ladies were bewitchingly attired in scanty yellow bathing suits, and right out of a clear blue sky it hit me that the bathing suits were copies of the one I'd seen on Miss Mayhew, the charming receptionist at the Prater office.

The girls had probably been costumed for economy's sake in some popular line of bathing suits, and quite by coincidence one had been bought for Miss Mayhew's special show for visiting morticians. After all, Carl Prater was quite a customer here—he had probably seen the bathing suits on the girls and shopped for one just like them for Miss Mayhew.

I QUIT thinking about the matter as Madam Sonya appeared. Even Larry Stone straightened in his chair. His girl friend was attired in another creation about as revealing as the gown she'd worn into the place, and I had an idea that if she couldn't even do a trick she would still be a sensation.

Sonya's first few tricks were routine; she drew a polite round of applause. By then she had had plenty of time to spot both Stone and me at the table.

She asked for a volunteer from the audience, and finally she lured a round-haircut from the second row of tables. She let him take six 32 caliber cartridges out of a box and load them into a nickel-plated pistol. The round-haircut was so nervous that he dropped two of the cartridges, but he finally got the gun loaded. Sonya asked him to show it around for inspection.

One Joe at a table nearby insisted on breaking the gun, but he seemed satisfied that the gun was

loaded with real live ammunition and passed it back to round-haircut.

He carried the revolver triumphantly back to Sonya, who apparently without a second's hesitation lifted it and started shooting.

Everybody started diving under tables. Everybody excepting Stone and me. I gathered that Stone had either heard about the act or Sonya had wised him up so that he wouldn't behave like the other customers. I think it was her fifth shot that she fired pointblank at me.

I may be forgiven for being just a little jumpy. I had had people shooting guns at me, it seemed, all day. Even when I knew it was a gag with blanks, I wanted no part of it. Though I didn't dive under the table when I saw the muzzle aimed at a spot between my eyes, I did duck and duck fast and low.

THAT'S all that saved me. It wasn't a wad, I knew, that zipped over my head. It was the real thing. When I heard that, I went clear down on the floor. Not until Sonya had fired her final shot did I come up again.

Stone was laughing fit to kill. "That's only a trick, you dope! Do you think she'd use real bullets?"

I turned slowly and looked behind me, hoping nobody else had caught the slug intended for me. The next row of tables was elevated on a terrace; the tables were staggered, and apparently the slug had gone between the two tables behind me and buried itself in the terrace beyond. Nobody appeared to have been hit. I turned back in time to see Sonya retiring with a terrific round of applause.

She was carefully avoiding my eyes, and well she should have, for she had expected them to be glassy by now. She had hardly expected me to duck. She had counted on my behaving like a normal human being who wants to show everybody that he is in on a gag. By rights I should have sat rigidly in my chair and taken that slug between the eyes. It was Sonya's hard luck that I had a bad case of jitters from being dry-gulched twice in one day.

(To Be Continued)

### Briton Puts Glasses On Fighting Chickens

CROWLAND, Eng. — (AP) — Three hundred hens who hate each other's looks got rose colored plastic glasses today in an attempt to establish some amicable barnyard relations.

Farmer Thomas Atkinson said he had clip-on spectacles built with plastic lenses to prevent the hens from looking each other straight in the face.

"The effect is to stop feather pecking and cannibalism," Atkinson said. "That cost me 30 birds in two weeks."

Things in the hen world, Atkinson added, ought to look better now. He explained his experiments had shown hens get along best when they can see only to the side, or up and down.

Apparently Atkinson has no plans for asking the government to pay for the spectacles under its health program.

In ancient times cannauses were the basis for taxation and conscription.

### Truman Says Policy Is Nation's Hope

DENVER — (AP) — President Truman contended today that the nation's foreign policy offers the best hope of avoiding war in the world.

"If we try to find security by going it alone in the world or by withdrawing and isolating ourselves from the rest of the world, we would be headed toward disaster," he said in a letter to William M. Boyle, national Democratic chairman.

"We might very well bring about the world conflict we are trying to prevent."

Boyle read the letter to the open-

ing session of the western and mid-western regional Democratic conferences Wednesday. The conferences continue through tomorrow and will be followed Friday by a meeting of the Democratic national committee.

"In spite of the confusions, in spite of little faith, our country has never been engaged in a more important struggle than the present conflict in Korea," the President said in his letter.

Mr. Truman said the Democratic party "has the responsibility of helping to guide this great nation through one of the most dangerous crises in history," but he insisted foreign policy "is not a political matter. It is a matter of life and death for our country and our way of life."

A talk on foreign relations is slated tomorrow by W. A. Averell Harriman, special presidential assistant.

Burton Rascoe, author and critic, usually has two books under way at the same time.

### Three-Way Affair At Dalhart Today

DALHART — (AP) — The famed XIX reunion today will be a three-in-one celebration "here this year."

The 18th annual celebration of the great days of the once vast ranch will be held in conjunction with the golden jubilee of Dalhart and a Panhandle-wide homecoming.

A parade at 11 a. m. opens the celebration. Before it is over, a round of luncheons, picnics, rodeos and fireworks displays will be held.

The XIX Assn. will hold a brief business meeting and elect new officers Friday afternoon.

The reunion is an annual occasion for area pioneers and a get-together of former cowhands of the ranch, once one of the biggest ranches in the old West.

Requests Made On The Airport Issue

Since the local political pot began to boil over the E. Browning airport improvement issue, this newspaper has been "asked" by several members of the legislature to measure in order that the bonds might have a better chance to pass. This has been our answer to every one of them:

This newspaper is not against an improved airport for Pampa. However, we feel that the issue must be looked squarely in the face. If selfish interests had been put aside long enough to compare the E. Browning site against the northwest field in an objective, unbiased manner, the E. Browning airport bond issue would have never been brought to vote and we would have enthusiastically backed an airport improvement program based on common sense and sound business principles.

Our better judgment tells us that what benefits Pampa benefits all Pampans... and that a town cannot be made to grow by being constricted.

We also believe that taxpayers should not vote to buy half an airport for twice the money when they can have double the airport for half the money.

Let me emphasize again that the issue is not one of hidden motives. That's just a popular method of concealing the real issues by choosing certain ostensible salient features and making so much noise about them that the real issue is hidden.

Certainly a community our size needs an airport — a good one. No question about it. Every one acquainted with the situation is in accord with that. Opponents should locate to the west of an improved airport but they feel there might be a better way than the presently proposed one.

Perhaps the best single rule by which to judge the integrity of newspaper editorials is to see if the editorials vacillate under pressures from selfish interests in doing a disservice, not only to itself, but to that community.

During the campaign over the airport bond election, many individuals have reversed their stand and have come out in favor of the measure. Had there been new facts introduced to show that the E. Browning site was the best possible for the community, we would have supported it. No new facts were presented.

Those who "asked" us to soft pedal the bond issue were questioning more than they realized. Perhaps they thought they were asking only that we let this one issue slip by, but in our eyes, they wanted far more than that.

Two bitter rivals were playing in the finals of their country club golf championship. One of them talked constantly as they played their match, much to the annoyance of his opponent. Finally, the latter burst out:

First—Look here, friend, if you don't stop your infernal chatter, I'm going to hit you over the head with my masher.

Second—Go ahead, but if you do, it'll cost you a stroke.

An angry woman, with a marriage license, called on license clerk and asked: Woman—Did you or did you not issue this marriage license? Clerk—I issued it. Woman—Well, what are you going to do about it? The man has escaped.

Attention to matters of this kind toward responsibility on their own accounts.

Clearing House

Articles for this column are preferred to be 300 words or less in length. However, longer articles may be printed.

To the editor, Pampa Daily News: I've just read in one of the News editorial columns where congressmen have been complaining with each other to pass legislation relating to their own interests and the interests of their constituents, regardless of the effect on the country. They seem to be oblivious to the fact that they are elected to look out for the good of the country first and then special interests of their constituents. (Personal interests with respect to legislation is not Constitutional).

The sequence being followed as related above is a fairly reversed. Congressmen seem to think they should grab all they can for their district and themselves, to heck with the rest of the country. These politicians are no doubt responsible for a good part of our degeneration due to their lack of integrity, individualism and backbone.

Be that as it may, we're to blame in many ways. We elect our congressmen! Least we're supposed to. Too many refrain from voting to despair over the situation. What can one vote do to turn the tide and besides what difference does it make who we elect? They'll all turn crooked sooner or later!

In any case that's a poor attitude to have. There is something we can do. This very week we can do something toward protesting against slipshod legislation. I'm talking about the bond issue which comes up this Saturday. Surely there is a decision to be made as to whether we should allot money for improving our airport facilities. Most of the issues have already been aptly presented in The News. However, more recently much discussion has centered around issues which are remotely opposite to the bond issue.

For instance, much has been said in recent advertisements as to why we need an airport (for local mail service to continue, daily airline passenger service, continued industrial development, etc.) and then it's concluded that we should vote yes in the bond election.

Let me emphasize again that the issue is not one of hidden motives. That's just a popular method of concealing the real issues by choosing certain ostensible salient features and making so much noise about them that the real issue is hidden.

Certainly a community our size needs an airport — a good one. No question about it. Every one acquainted with the situation is in accord with that. Opponents should locate to the west of an improved airport but they feel there might be a better way than the presently proposed one.

Better Jobs

By R. C. HOILES

"Outlook For Freedom" This is the fifth installment of "Outlook for Freedom" written by Leonard E. Read, president of the Foundation for Economic Education.

Each Discovery is Made by One Person "In his efforts to find a cure for this social cancer whereby force is used as a means to attain social performance he considered the problem of physical cancer. No doctor today apparently knows the cure. How absurd it would be if all medical scientists, in panic over the devastations of the disease, suddenly, quiet their research and 'look to the road to prevent the evils of cancer' to everyone in America! Only the quacks would do this.

"How necessary it is that the skilled men continue their search until some one or a few individuals find the answer. And only one need find it. Nor need the discovery itself be clearly understood by all men if it is on any subject. How many, for instance, understand the science of hybrid corn, or the workings of penicillin, or how to make an automobile? Yet the benefits rebound to vast numbers all over the earth.

"What then of this cancerous belief in the use of force as a means to attain social performance? Who knows how to cure it? He had no convincing evidence of any such person. It is true that there were many pretenses for the honor. In fact, most of the people at the banquet had thought it was this simple: merely cast everyone else in one's own intellectual image. But now we realized that all who believed this were, unknowingly, infected with the very beliefs that they allegedly were bent on destroying. To make matters worse, the same individuals who were bent on spreading this belief in force for an ever greater number of purposes.

Negation is of Little Value "He had observed numerous techniques to rid the country of socialism like attempts to expose the fallacy in some aspect of the legislative force techniques like the repetition of slogans, the use of comic-strip, name-calling, and even dignified and scholarly efforts at negation—and he found that they were no panacea for our ills. They served in some instances to set people to thinking, like the speaker at the banquet had set him to thinking. A few of them performed, in a limited way, what of a trigger function. These techniques had about the same value as proving that the world can't possibly be flat. Get that done and you must still prove that it isn't a prism, a cube, a cylinder, a rhombus, a dodecahedron, or any other of infinite possibilities that shape can take. Unless such proofs set men to thinking what is the shape of the world, they are valueless.

Affirmation Required "Similar, as to procedure in finding a cure, is this social cancer, he thought. If a person proves only that one form of coercion is antagonistic to the spirit of inquiry—the essence of the educational process—there still remains the endless task of proving that each of the manifold forms and combinations of coercion are antagonistic to any and all creative performances. These techniques are not enough. The problem requires affirmation more than negation. It can have that a positive solution: the rehabilitation of the individual, social performance, whether in medicine, electricity, housing education, or any other creative activity, can be best attained by men acting in response to their own volition. As this faith develops, the beliefs in the use of force, as a principle, are rejected, discarded, forgotten — by the individual and the nation as a whole. The negative approach (the world is not flat) can and often does drive away the single fallacy under attack by causing a person to reject it. But this accomplishes little more than to create a vacuum into which the next plausible myth (maybe, then, the world is a cube) naturally finds its place. Affirmation and proof of a right principle or a fact, on the other hand, creates a solid round leaves no room for any of the numerous errors.

The Law of Probabilities "One of these days, perhaps, some one may arrive at such a high stage of understanding as to what man can accomplish by voluntary action, and develop so skillfully his explanations of what he has learned, and convey impressively the deep meaning of his insight and its implications to others, that people may accept the conclusions and abide thereby. This thought gave him hope. And he knew enough about the law of probabilities to realize that if ten thousand or a million men were striving for this attainment, then the chances of some one person finally achieving it were greater than if only he and a few others made the attempt. The social cancer threat warrants every person potentially able to understand the meaning of liberty to lend a hand. An emergency exists! He saw in this line of thought the justification for making available his own findings to such others as could be interested in knowing about them voluntarily. He saw the need for all helping each other in a necessary intellectual leveling-up process. And, further, he realized that his role was to search for understanding himself. Otherwise, what right had he to expect or even hope that others would or could assist in this grave situation?" (To be continued)

We are paying for similar projects right now and they continue will pay more. That's what I meant when I said we have an opportunity to protest such abuse of government funds. By using sound judgment we can build a better airport at less cost without any help from our "rich uncle." The location would be many times safer, and would avoid residential expansion in a natural milieu for residential growth.

Let's give this bond election the serious consideration it deserves, and the civic-minded men who have promulgated it a pat on the back for their efforts and then vote NO in the election on Saturday.

John F. Campbell

The Hit Parade

Washington... by Peter Edson

WASHINGTON — (NEA)—While statesmen quarrel and scientists seem to concentrate on devising more horrible ways of destroying mankind, it is coming to think of a few agricultural researchers — aimed at increasing and bettering man's food supply — goes on unabated. And it is now at the beginning of a new crop year, it is a relief to turn away from man-made political headaches to see what is being done to make the world a better place in which to live.

It is a little-realized fact that the science of farming has made more progress in the United States in the last 75 years than had been recorded in the previous 75 centuries.

The first American colonists brought with them seeds and cuttings of food crops they had known in the old world. They found other new crops like corn and potatoes and tobacco in the new world.

Founding fathers like Benjamin Franklin and Thomas Jefferson did as much for the country by bringing new plant varieties from abroad as they did in planting the seeds of democracy.

But the real start on organized farm research goes back to 1886 when Congress established the first plant propagating garden. Three years later the government supported the first Italian honeybees. And in 1882 the U. S. Department of Agriculture was established.

Today the state experiment stations, Department of Agriculture research centers and private laboratories conduct farm research on thousands of projects. It is no exaggeration to say that the scientists can even redesign new plant varieties and animal strains to fit almost any requirements for greater yield, different climatic conditions, resistance to disease or even a machine that will make harvesting easier.

This last is literally true. A mechanical cotton picking and flame-throwing weed control have been increased as labor-savers, the U. S.

Dollar-wise, hybrid corn alone has more than paid for all the agricultural research done in this country. What is not commonly recognized is that all this increased wealth stemmed from 1886 experiments of Gregor Mendel, an Austrian monk who cross-pollinated garden peas. It was he, however, before practical benefits began to be reaped at a Connecticut experiment station.

HYBRID CORN The job on hybrid corn is by no means done. New varieties are being developed to withstand the hot summers of the South. Seventy-seven percent of U. S. corn acreage is now planted to hybrid seed. The increased yield of 750 million bushels a year is worth approximately \$750 million a year.

As with corn, so with cereal grains. Only here the big rub has been to fight stem rust. Progress began to be made in this battle when a young Minnesota scientist discovered there were many varieties of stem rust. It was found that the rust organism spent part of its life on barberry bushes. And the fight began to eradicate barberries. At the present time, man is now ahead in this long battle.

Of the new crops imported into the U. S., the soybean in its original form would never have amounted to much. But scientists developed new varieties with a 25 percent higher yield and a 30 percent higher oil content. Today soybeans are America's fifth crop.

In the vegetable patch, the scientists have developed tomatoes that resist wilt, cabbages that resist the yellowing.

Since housewives showed a preference for potatoes with shallow eyes, and strawberries that were tart, scientists developed varieties with those characteristics. And any new vegetable or fruit variety that doesn't have a high vitamin C content is scrapped.

As synthetic fibers like rayon, nylon and orlon have been developed in the laboratories, they have cut into the cotton market. Undaunted by this competition, the agricultural research scientists set to work to develop a new cotton plant. The required means was to develop a natural fiber that would be stronger than rayon.

And they've got it. It is a triple-hybrid. It is a cross between Asiatic, American upland and Arizona mountain cottons. It is not yet ready for commercial release. But the fiber on the first plants grown is double the strength of the old varieties.

Hybrid corn is undoubtedly the food production miracle of the 20th Century. It is now an old story, increasing yields by about 30 percent, hybridization has been estimated to have provided an extra 35 pounds of pork for every man, woman and child in the U. S.

Dollar-wise, hybrid corn alone has more than paid for all the agricultural research done in this country. What is not commonly recognized is that all this increased wealth stemmed from 1886 experiments of Gregor Mendel, an Austrian monk who cross-pollinated garden peas. It was he, however, before practical benefits began to be reaped at a Connecticut experiment station.

HYBRID CORN The job on hybrid corn is by no means done. New varieties are being developed to withstand the hot summers of the South. Seventy-seven percent of U. S. corn acreage is now planted to hybrid seed. The increased yield of 750 million bushels a year is worth approximately \$750 million a year.

As with corn, so with cereal grains. Only here the big rub has been to fight stem rust. Progress began to be made in this battle when a young Minnesota scientist discovered there were many varieties of stem rust. In the vegetable patch, the scientists have developed tomatoes that resist wilt, cabbages that resist the yellowing.

Since housewives showed a preference for potatoes with shallow eyes, and strawberries that were tart, scientists developed varieties with those characteristics. And any new vegetable or fruit variety that doesn't have a high vitamin C content is scrapped.

The result of all this is that whereas in 1900 one farmer produced enough for seven people, he now produces enough for 14. Farm efficiency has doubled in 50 years. And the end is not in sight.

Administrator Ewing and Secretary Tobin will have to economize to the extent of \$100,000 between them. Until Acheson improves Voice of America's propagandizing job overseas, he will have to get along with \$10,000,000 instead of the \$97,000,000 he asked.

Administrative costs for the program were cut by \$50,000,000, with a proviso that Secretary Chapman may build new news lines in areas now served by private power. Mr. Truman's request for money for 75,000 housing units was sliced to the financing of only 5,000.

National Whirligig

By RAY TUCKER

WASHINGTON — A partial explanation for the sharp Congressional cuts in the administration's multi-billion tax and appropriation requests is a determined, bipartisan attempt to prevent the White House from spending more on foreign aid funds to further its practice program of social and economic change.

"We will give them all the money we decide they need for national defense," says Representative Daniel A. Reed of New York, a veteran and the ranking Republican man on House Ways and Means committee. "But not a cent for trills or backdoor reforms."

As a result of this dollars-and-cents attack on Mr. Truman's "fair deal" platform, the 1951 Revenue Bill will fall short almost \$4,000,000,000 of White House figures. The 1952 fiscal year's money total will be reduced by about \$5,000,000, according to present estimates. It is possible that the eventual savings may reach \$10,000,000,000.

FACTORS — Several factors give special significance to this economy drive. It differs in many respects from earlier efforts in this field. It is directed not so much toward the mere saving of money as to preventing its use for purposes not specifically approved by the legislative branch.

In the first place, it was initiated by the two House committees which are top-heavy with experienced and trusted Democrats supposedly immune to an emotional stampede — Ways and Means and Appropriations.

The full floor membership has supported or increased committee cuts by overwhelming votes. Hardly an anti-Truman amendment in the House has been

defeated, even though sponsored by ultra-conservative Republicans. REVERSAL — Even more significantly, Capitol Hill is indulging in the penny-pinching spree with respect to money that will be spent in a year when every member of the House and one-third of the Senate must face the voters.

Since the handling of these billions will be under Democratic management, the willingness of so many majority members to economize suggests a cold disregard for the fate of the national ticket.

It is almost impossible to over-emphasize the importance of these pre-election slippings of the federal pocketbook. In such periods, no matter which party is in control, it is axiomatic for both sides to shell out the political maxima with a free and generous hand.

This reversal of form, it seems, reflects Congressional recognition that, besides MacArthur — Truman differences on foreign policy and despite the Kefauver — Fulbright scandal, heavy taxes and high prices — in effect, money troubles will be a major issue in next year's campaign.

BELIEVERS — A careful analysis of the reductions already approved by the lower chamber reveals that they were aimed at specific administration targets. These targets are President Truman, Interior Secretary Oscar Chapman, Labor Secretary Maurice J. Tobin, Federal Security Administrator Oscar Ewing — and, of course, Dean Acheson.

With the exception of the secretary of state, whose department suffered pocketbook-wise largely because of his general and growing unpopularity at the eastern end of Pennsylvania Ave., the five were singled out because they are regarded as the only working and sincere believers of the New Deal-Fair Deal philosophy of government at Washington.

Almost every other key figure in the administration, in the opinion of the legislators, feels that Uncle Sam should spend his time and money in winning the "cold war," especially the Korean phase, and in preparing for possibly a hotter version of our conflict with Russia.

WITHHOLDINGS — President Truman suffered so severely from these withholdings that might wings of remorse may afflict the legislative money man before the final measure is hammered through the Senate and conference committees. As against the \$300,000,000 emergency fund given Franklin D. Roosevelt to be spent without any accounting, Mr. Truman's request for \$15,500,000 was shaved to a mere million.

Almost a round billion dollars was refused him for staffing executive units and independent agencies which he contended would be needed to fight the war with the Jensen rider, which has been attached from the floor to almost all appropriation bills, this reduction is designed to block the employment of patriotic Democrats between now and the 1952 election.

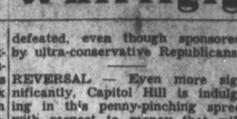

The Jensen rider's general acceptance by the House furnishes the best evidence of the Congressional temper. It provides that no more than 25 percent of all vacancies may be filled in downtown departments. It is expected to save a billion dollars, and to get rid of from 300,000 to 800,000 federal workers, if retained by future Congresses.

VICTIMS — Public power, federal housing, Social Security and labor expansion were other economy victims. Funds for government power projects were cut by \$50,000,000, with a proviso that Secretary Chapman may build new news lines in areas now served by private power. Mr. Truman's request for money for 75,000 housing units was sliced to the financing of only 5,000.

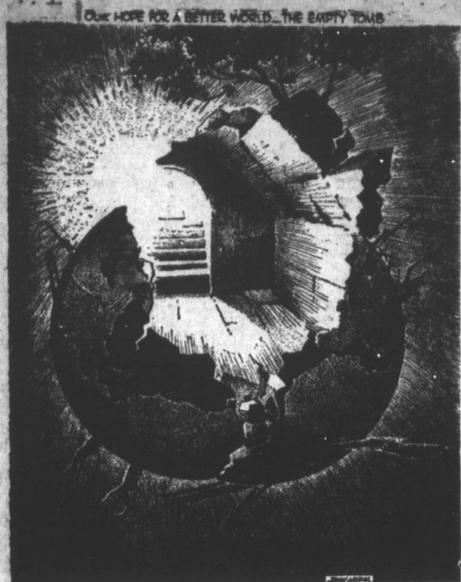

Administrator Ewing and Secretary Tobin will have to economize to the extent of \$100,000 between them. Until Acheson improves Voice of America's propagandizing job overseas, he will have to get along with \$10,000,000 instead of the \$97,000,000 he asked.

Administrative costs for the program were cut by \$50,000,000, with a proviso that Secretary Chapman may build new news lines in areas now served by private power. Mr. Truman's request for money for 75,000 housing units was sliced to the financing of only 5,000.

### Wheeler Girl Receives Posts On TCU Campus

WHEELER —(Special)— Miss Eille V. Brown, daughter of Mr. and Mrs. R. W. Brown of Wheeler, will serve as president of two organizations on the TCU campus next year. She has been elected president of the Women's Sports Association and the United Religion Council. She was on the honor roll throughout her sophomore year this year and will enter school next year as a Junior. She is active in several other organizations on campus. Her major is English with a physical education minor.

She lettered in physical education this year with enough hours in swimming, tennis, basketball and volley ball. She also took modern dance.

The United Religion Council has charge of all religious services held on the campus.

Dr. Earl Brown, dean of Bible studies at the John Brown University at Siloam Springs, Ark., was guest speaker at the Kiwanis Club at their meeting on Monday. Dr. Smith is in the Panhandle to give a series of Bible lessons at the Union Church at Gageby. He is also discussing the chapter of Daniel in private homes in Wheeler this week. He is the house guest of Dr. C. C. Merritt of Wheeler during his stay.

### Wayside HD Club Asks For Recipes For New Cook Book

The Wayside Home Demonstration Club is compiling a cook book and the readers of the Pampa Daily News have been asked to contribute their favorite recipes before June 4. All kinds of recipes will be used, including main dishes, meats, salads, and desserts. Those sending in recipes have been asked to include name and address.

The recipes are to be mailed to Mrs. J. T. Rogers, Rural Route 1, Box 38, Pampa, Texas. The book will be on sale later in the year.

### Charm Necessary To Career Girl

By ALICIA HART  
NEA Staff Writer

Many women who decide to match swords with men in the world of business leave one of their most formidable weapons—their charm—at home.

Business-hours charm doesn't have to be coquetry; it can be simply courtesy, fairness and efficiency.

Women who go into a "big executive" act each time they find themselves behind a desk are losing ground not only as careerists but as people as well.

No matter how busy you are, you can find time for a "please" here, or an "I'm sorry" there. Particularly should you guard against any effort—conscious or unconscious—to humble your male associates. These tactics will never impress them with your superiority.

On the other hand, the clinging-vine techniques—which may work perfectly well in your social relationships with men—are also taboo. Never should you use the helpless little woman routine in an attempt to get someone else to do your thinking for you.

It's best to strike a happy medium—performing your job to your utmost without trading up on the frailties of your sex and without wearing your gender like a chip upon your shoulder.

Prof. Armand E. Singer of West Virginia has made an acceptable dentrifice from an old Roman recipe using barley, flour, vinegar mixed with honey, salt and spikenard root.

Although it owns only eight percent of the world's commercial forest area, the United States produces 44 percent of the world's lumber, 68 percent of its plywood and 43 percent of its wood pulp.

## A Hymn Is Born

BY CLINT BONNER

# I Love Thy Kingdom, Lord

The oldest surviving American hymn

There were two Timothy Dights, both clergymen, both New Englanders, both Yale presidents. The hymn writer headed the institution from 1795 to 1817. The second changed the college to a university and was its president from 1816 to 1859.

Just as Stonewall Jackson held prayer meetings in his classrooms at Virginia Military Institute, so did Timothy Dwight hold revivals in the chapel of Yale. And for good reason. It was an age when everybody was reading Tom Paine's "Age of Reason" and interviews with students revealed only five professed Christians. So President Dwight took to the chapel pulpit and put the fear of God into his pupils.

Like Benjamin Franklin, Timothy Dwight was one of those sturdy early Americans who could do almost anything. He was farmer, clergyman, editor, post, legislator, orator, business man and teacher. As one of his pupils put it, he was interested in "everything" and his knowledge was "boundless." But his chief love was

*I love Thy Kingdom, Lord,  
The house of Thine abode,  
The Church our best Redeemer saved  
With His own precious blood.*

*I love Thy Church, O God!  
Her walls before Thee stand,  
Dear as the apple of Thine eye,  
And grown on Thy hand.*

*For her my tears shall fall;  
For her my prayers ascend;*

*To her my care and toil be given,  
Till toil and care shall end.*

*Beyond my highest joy  
I prize her heavenly ways,  
Her sweet communion, solemn wait,  
Her hymns of love and praise.*

*Sure as Thy truth shall last,  
To Thee shall be given  
The brightest glories earth can yield,  
And brighter bliss of heaven.*

He who is afraid of being too generous has lost the power of being magnanimous. The best man or woman is the most unselfish. —Mary Baker Eddy

We should be as generous with a man as we are with a picture which we are always willing to give the benefit of the light. —Ralph Waldo Emerson

To pity distress is but human; to relieve it is Godlike. —Horace Mann

## The Pampa Daily News

### Women's Activities

PAMPA NEWS, FRIDAY, MAY 25, 1951 PAGE 1

### CHRISTIAN SCIENCE

Absolute trust in God, Soul reveals the beauty of eternal life and lifts mortals out of the desolation of the belief of life in matter, declares the Lesson-Sermon titled "Soul and Body" to read in all Christian Science churches on Sunday, May 27.

The Golden Text shows the first step—desire for the things of Soul, Spirit. It is taken the way of Thy judgment, O Lord, have we waited for thee; the desire of our soul is to thy name, and to the remembrance of thee. From the Bible will be read this citation, "The Lord redeemeth the soul of his servants; and none of them that trust in Him shall be desolate."

Also included in the Lesson-Sermon will be this statement from page 247 of the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, "The recipe for beauty is to

have less illusion and more Soul, to retreat from the bell of pain, or pleasure in the boomerang of the unchanging calm or glorious freedom of spirit harmony."

I was an hungred, and you gave me meat; I was thirsty, and you gave me drink; I was a stranger, and you took me in. —St. Matthew

## THIS TEXAS LADY LOSES 25 POUNDS

"I am past 71 and never had any medicine do me so much good as Barcontrate. Before taking Barcontrate, I weighed over 200 pounds. I now weigh 175, thanks to Barcontrate. It keeps me feeling good all the time and am never constipated any more. I am able to do all my housework and work my flower garden." Signed: Mrs. J. A. Bearden, 688 S. Davis, Sulphur Springs, Texas.

It's simple. It's amazing how quickly you can lose pounds of bulky fat right in your own home. It's easy—no trouble at all and costs little. Barcontrate contains nothing harmful. No starvation diet. No diet list to buy. No vitamin pills to fortify you, while on a starvation diet.

Just ask your druggist for 4 ounces of liquid Barcontrate. Add 12 ounces of grapefruit juice and take two tablespoonful twice a day. If the very first bottle doesn't show you the way to take off bulky fat, return the empty bottle for your money back.

**LOST 22 POUNDS**

"I am glad to endorse Barcontrate food. I have had excellent results from the use of it," writes Mrs. Ebyl S. Smith, 1506 Samuels Ave., Fort Worth, Texas. "I lost 22 pounds. I have lost all the weight I care to, but like to keep on taking Barcontrate, because I feel better and it helps keep me from gaining back any weight."

Give for the joy of giving and singing hymns of thankfulness that you have it to give.

—Herbert Hoover

Musk, used commercially in perfumes, is obtained from the musk-deer, although the odor is also emitted by the musk-ox, musk-rat, musk-duck, musk-shrew, musk beetle, and the alligator of Central America.

The word "musk" originally signified the male sparrowhawk and is believed to have been used for a firearm because of a European habit of jamming weapons after birds and animals.

About 50 important U. S. crops require pollination by honey bees or other insects.

## Officer Says Communists Aim Heaviest Blows At ROK Forces

U.S. 8TH ARMY HEADQUARTERS, Korea — (AP) — The chief of staff of the South Korean Army says the Chinese Reds have aimed their heaviest blows at his troops in an effort to destroy American faith in their fighting ability.

Li. Gen. Chung Il Kwon said the Communists hope the Americans will withdraw their support of the Korean Republic once they are convinced it is hopeless to try to build an effective South Korean army.

Chung in a statement attributed recent South Korean defeats to lack of firepower, inexperienced leadership and insufficient training.

He expressed faith, however, in continued U.S. support.

A South Korean military court today sentenced two colonels to one month's confinement after convicting them of partial responsibility for collapse of the Korean Sixth Division during a Red attack last month.

Last week, six other Korean officers were sentenced to two to 15 years in prison for the same offense.

Chung's statement said: "In U.S. Army sectors, the enemy is pounded before his attacks reach the main battle position. Artillery, tanks and automatic weapons all combine to produce unprecedented slaughter.

"As the foe reaches the American line of resistance, the weakened survivors are fairly easily

## Missouri Hunts Missing Plane

ST. JOSEPH, Mo. — (AP) — The State Highway Patrol got this report late yesterday: an airplane had lost a wing and crashed near Albany northeast of St. Joseph.

The dispatcher radioed cruising troopers to the area. Three planes, including an Air Force bomber, took off promptly from Rosecrans Field to get a look before dark.

The Civil Aeronautics Authority radioed other planes to sweep over Albany and try to spot the victim.

Ground parties were organized to comb the hills.

Two hours later — in the midst of about the biggest plane hunt in northwest Missouri history — two Albany youths heard of the fuss. Marvin Miller and Richard Dale said "maybe it was our plane."

It was — a model plane, powered by a gasoline motor and controlled by the youths with a radio hookup. Two unidentified persons saw the plane's nine foot wing fall and turned in the alarm.

## U.S. Casualties Total 66,186

WASHINGTON — (AP) — Announced U. S. casualties in Korea now total 66,816, up 1,293 over a week ago.

The latest figures, released yesterday, cover casualties whose families were notified through May 18. They include 10,038 killed, 45,567 wounded and 11,211 missing.

Of the wounded, 1,174 have since died, and of the missing, 101 are known dead, making the combat death toll 11,313. The missing total included 1,199 who have since returned and 115 known prisoners of war, leaving 9,796 currently missing.

The first electric power station was built by Edison in 1882.

## Injuries Fatal As Tractor, Auto Collide

TYLER — (AP) — J. L. Shaw, 23, of Alba, Tex., was fatally injured yesterday when he was thrown from his car after the vehicle and a tractor-truck collided. Shaw was towing the truck when it broke loose and smashed into his automobile.

Christopher Morley's home on Long Island is named "Green Escape."

# WE RECOMMEND

## The Gray County Airport Improvement Program

# BECAUSE...

1. We know the sponsors of this program are successful, competent, unselfish citizens whose only interest is the continued development and expansion of industry for this area.
2. We accept their report that the East Browning site is the most economical of the CAA approved sites.
3. We believe the site to be desirable from the standpoint of profitable operations.
4. CAA demands a strict code of safety regulations. They do not approve hazardous locations.

## We Are A Part Of The Communities Where We Operate

We want good schools and adequate educational facilities for our employees.

We support good highways, churches, hospital and all other worthwhile community development programs.

We recognize the importance of aviation in our modern day transportation.

An industrial area such as we have must have adequate airport facilities, since most industrial concerns depend largely upon air transportation in routine operations.

According to CAA records, Pampa is now the only town in Texas being served by scheduled airlines that does not have paved runways.

Therefore, we endorse this program as an essential community improvement. We consider it well-planned and adequate. Vote YES Saturday, May 26.

We are willing to invest in the future of Gray County by paying our share of this program.

## Lefors School Commended

Lefors — (Special) — Evaluation committee which recently examined Lefors High School for the Southern Assn. of Secondary Schools and Colleges, commended the system highly. Dr. J. L. Russell, co-ordinator of the group, has written a report which summarizes the evaluation given the high school.

"The Lefors High School is a good example of a small high school that is doing a better than average job," the report said. "It is well known that the very small high school may do a very poor job of educating its youth. Or it is doing a fair to good job at the expense of robbing the elementary school of needed personnel and facilities. This is not true in the Lefors School District. Their per capita cost is not top-heavy in the high school," it added.

"The visiting committee saw much evidence which led us to think that the high school faculty was making excellent use of the low pupil-teacher ratio. The great need, as we see it, is to secure the united support of the community in working together for an excellent school system. They possess the resources to have a real 'fine school system,'" it said.

The grade point ratio, which was given to Lefors High School as an average grade, is approximately 3.8, which is considered a high rating.

## White Deer Girl Is Award Winner

BELTON — Nancy Evans, daughter of Mr. and Mrs. Frank E. Evans of White Deer, has been awarded the Mary Hardin-Baylor Loyalty Cup at the 106th Commencement program of the historic college. The cup is presented each year to the graduating senior considered most representative of the ideals, tra-

ditions and spirit of the college.

Miss Evans took a Bachelor of Science in Home Economics.

Miss Elaine Battles, daughter of Mr. and Mrs. E. M. Battles of Overton was the recipient of the Stella P. Ross Memorial Medal to the outstanding Christian girl of the student body. Stella P. Ross Memorial Medals were also presented to Miss Ola Joyce Springer, daughter of Mr. and Mrs. C. B. Springer of Round Rock, the outstanding girl in Ely Pepper Hall; Miss Norma Turner, daughter of Mr. and Mrs. O. L. Turner of London, the daughter of a preacher or missionary whose life and influence most nearly measure up to the college standards and ideals; and Miss Rosalind Kinard, daughter of Mr. and Mrs. Charles Kinard of Reagan, the girl who has made the most progress in English during the college year.

Degrees were conferred upon forty-four candidates by the president, Dr. Gordon G. Singleton, following an address by Dr. Carlyle Marney of Austin.

Although the lion is called the "king of the beasts" he is not the largest, strongest or even the bravest member of the animal world. When Canada, then New France, took its first census in 1686 the country had 3,215 inhabitants.

## JACOBY ON CANASTA

### An Expert Freezes Pack

By OSWALD JACOBY  
Written for NEA Service  
In our last article we watched a Canasta expert begin the play of a hand. Now we look again to see how the play has developed. The player to the right has just made the initial meld from his hand. He has melded:

Joker-K-K-K, 8-8-2.  
Both sides need 120 points, the discard pile has grown to a hefty size, and our hero holds the following cards after he has drawn a card:

A-A, K-K-K, Q-Q, 8, 4-4, 3-2.  
Our expert can make the count of 120 points if he wishes to do so. He would have to meld:

A-A-2, K-K-K, Q-Q-2.  
This would leave him with an eight and a pair of fours, with a discard still to be made.

Does he do so?  
No. He is unlikely to make a canasta in kings considering the fact that the other side has already melded three kings. The aces and queens are a sheer gamble, so it doesn't seem likely that a canasta can be made very quickly.

In the absence of a good play for a fast out, our expert doesn't want to reduce his hand so sharply.

He doesn't meld the must, of course, discard. What should he throw?  
Kings and eights are out of the question. Anything else, may give the pile away to the next player if that worthy has a matching pair or even just one matching card and a wild card.

The only possible course is to discard a deuce, thus freezing the pack. This gives up the count, of course, but it is better to give up the count temporarily (or even permanently) than to give up a large pack.

Now our expert can probably discard kings safely. He should be safe for the next three rounds at least, after which the play will probably indicate additional safe plays.

It is unlikely that the other side can make a canasta and go out because their kings are hopeless and the eights are none too promising. There is a very good chance that our expert can keep discarding safely until his side wins the discard pile. That will probably win the whole game, considering the size of the pack and the fact that both sides are in the 120-point range.

## Seniors Win "School Daze" Awards

Sammie Frierson receives her Bulova Watch from Paul Brown, Culberson Chevrolet Inc., for submitting the best "School Daze" booklet in the girls division.

Above is a drawing of the front cover of "School Daze."

Charles Pipes, winner in the boys division for having the best "School Daze" booklet receives his Bulova Watch from Paul Brown, Culberson Chevrolet Inc.

At the beginning of the school year, Culberson Chevrolet, Inc. gave to every senior a unique-calendar-scrapbook, "School Daze."

"School Daze" is a diary in which to keep treasured memories of the last year of high school. There are places to record parties, dances, big pep meetings, sports events, pictures of fellow-students, etc. It is a folder for the seniors to make a complete record of activities for the full school year. For the two best kept "School Daze" (one for the boys and one for the girls) a Bulova Wrist Watch was awarded by Culberson Chevrolet, Inc.

So, with this "School Daze" booklet, Culberson Chevrolet, Inc. wishes to congratulate each and every senior of the Class of Fifty-one of Pampa High School.

## Texas League Attendance Down

DALLAS — (AP) — Texas League attendance averaged 2,121 per game in the first quarter of the race, league secretary Milton Price reported today.

This is 800 fewer per contest than for the period last year. Attendance for 140 games played the first quarter totaled 296,952, which was 97,882 less than last year when 394,835 turned out for 135 games.

There were 17 postponements each year but Price said the weather generally was worse this season. "Many games were played under threatening conditions or in cold weather that cut the crowds materially," he pointed out.

He also said that 55,000 fewer fans saw opening games this year than last because Dallas in 1950 held its opener in a football stadium and drew 63,578 fans. This year all games were played in the regular fields.

"Dallas this year drew 4,922 for its opener," he said. "If you take away the difference in the two years the decrease is only 42,847 — a loss of 10.8 percent from last year. And in the past two weeks attendance has picked up greatly throughout the league."

## Battle Today For City Junior Title

The dangers of a girl winning the city junior golf championship played yesterday afternoon as the youngsters fought it out in their semifinal rounds. Dib Stovell eliminated straight-shooting Lila Austin, 7-6, to make the finals an all-boy affair.

Stovell's opponent will be Bob Frigmore, cousin of last year's champion, Richard Frigmore. Frigmore yesterday had to fight to the final green to take a 1-up decision from Bob Tillson.

This afternoon the two finalists were scheduled to battle it out for the beautiful trophies awarded by Ham Luna. Tee time was to be 1 p. m. Luna has donated awards to the first two winners in each of the three flights.

## Arizona Evens Playoff Series

TUCSON, Ariz. — (AP) — The University of Arizona defeated Texas A&M 2-1 last night to draw even in the three-game series to decide the district six representative in the NCAA baseball tourney in Omaha. The Aggies took a 5-4 decision yesterday.

Wild pitching and seven errors killed the Texans. Arizona pushed across seven runs in the first inning and it was a rout from then on.

In the hectic initial frame Arizona sent 13 batters to the plate. Starter Bob Tankersley, No. 2 Aggie hurler, hit lead off batter Roger Johnson and walked the next two to load the sacks. Catcher Lloyd Jenney cleared the bases with a double off the leftfield wall. Two errors added to the Aggies' troubles in the first inning. Arizona scored its seven runs on two hits.

More errors, walks and timely hitting kept Arizona scoring in every inning except the seventh. It capped off the game with a five-run spurge in the bottom of the eighth.

Arizona collected 13 hits, the Aggies eight.

## Chapman, Coe Carry Hopes

PORTHAWL, Wales — (AP) — Lean Charlie Coe of Oklahoma City and Veteran Dick Chapman of Pinehurst, N. C., carried the American challenge into the semifinals of the British Amateur golf championship today against a Welshman and an Irishman.

Coe, who won the U.S. Amateur title two years ago, shot a brilliant sub-par golf in the morning round over the Royal Porthcawl course to tie the ambitions of Sammy Yarnall of Rochester, the present American champion, 3 and 2.

Chapman was almost equally sharp as he turned back squad leader Cecil Beamish of Northern Ireland, 4 and 3. He was four under par for the 18 holes, and at one point on the back nine shot three consecutive birdies.

Coe's opponent in the afternoon semifinals was Albert Evans, a Welsh farmer, who defeated J. E. Gent of England, 4 and 5, in his quarterfinal match.

Chapman found himself facing Joe Carr of Ireland, who yesterday trounced defending champion Frank Stranahan and today eliminated Johnny Bendern of England, 3 and 2. The winners will clash in tomorrow's 36-hole final.

## Kramer Stops Hubbers, 4-2

CLOVIS — (AP) — Veteran Mel Kramer stopped Lubbock's big bats last night as the Clovis Pioneers squeaked out a narrow 4-2 series opening victory.

Kramer outduelled Ray Machado and Royce Mills to rack up his second victory as against no losses. He yielded eight hits but only was reached for one solid safety, Machado's triple in the third. It was the only extra base blow of the conflict.

Four consecutive singles in the sixth inning broke a 1-1 deadlock and produced the two runs which gave Clovis the verdict.

Wally Rodriguez and Chuck Novofney led the assault on the Lubbock hurlers with three hits apiece.

Lubbock..... 001 000 100-2 8 1  
Clovis..... 000 102 100-4 13 2  
Machado, Mills and Moore; Kramer and Calo.

## Lobos Topple Gassers Again

BORGER — (AP) — The Borger Gassers pushed closer to the cellar last night, dropping a 7-3 decision to the Lamesa Lobos in the first of a two-day series here in Huber Park.

The game started out as a pitching duel between Borger's Rene Vega and Ed Arthur, Lobo hurler, but a wild seventh inning that saw passed balls, errors and disputed plays cost the Gassers the win.

Manager Eddie Carnett was bounced from the game in the hectic seventh over a decision that involved leftfielder Nim Free who failed to make a catch which umpire Hoyn ruled fair.

Lamesa..... 200 000 000-7 19 1  
Borger..... 002 001 000-3 7 1  
Arthur and Marti; Vega and Secret.

Broadway has become a synonym for the New York theatrical district, and yet there is not a legitimate theatre on the street today. They all are on side streets. The only theatres on Broadway are movie houses.

# Hogan Takes Colonial Lead

FORT WORTH — (AP) — The little giant of the fairways — methodical Ben Hogan — was in a different role today: he was leading the \$15,000 Colonial National Invitation tournament's first round.

Seldom does Hogan top the field in the opening 18 holes; he usually sits back for the finish.

Wes Ben shot a two-under-par 68 yesterday to capture the lead by one stroke while some of the highest scores in the tournament's history were made by others.

The Hershey, Pa., veteran said he had a better round so far as doing what he wanted to do with the ball of any round in the Masters at Augusta, Ga., where he took the title in April.

Little Ben was in the groove and it's watch his smoke as the field of 42 moves into the tournament's second round.

A stroke back were Cary Dilleoff of Memphis, Tenn., Bill Naylor of Prairie View, Ill., and Tony Penna, of Cincinnati.

Only those four players could better par in the 7,035-yard par 35-35-70 Colonial Country Club course. Part of the round was played in a drizzle but no one complained of it except to say it made the greens a little slow.

Tree trouble cost Dick Mayer of Old Greenwich, Conn., nine strokes on No. 7 — the tournament record. Marty Furgol, Akey, then the Colonial professional, had the high round record until yesterday. Akey shot an 84 in 1946 but Segura had an 88.

At even par 70 was Tommy Bolt of Durham, N.C., while shooting 71 were Johnny Palmer of Badin, N.C.; Julius Boros of Mid Pine, N.C.; Byron Nelson of Roanoke, Tex.; E. J. Harrison of St. Andrews, Ill.; and Sam Snead of White Sulphur Springs, W.Va.

# 'Poor' Deals Of Last Winter Making Chisox Contenders

By the Associated Press

Frank Lane, the man who isn't afraid to scorch his fingers in a deal, can take a bow for the amazing success story of the Chicago White Sox.

Last by 13-2 games with a sorry 8-21 record a year ago, the surprising Sox now are a driving second with 19-9 and an unprecedented clean sweep on their first eastern tour.

Paul Richards, the new manager Lane brought in from Seattle, rates the big cheer. But the man behind the scenes — Lane, the Chicago general manager.

Lane wanted Richards as his manager when he took the Chicago job in 1948. But Jack Inslow already was hired. Jack Inslow enough in '49 but a year ago tomorrow he got the boot.

Red Corriden finished out the year while Lane watched for Richards to get free.

Once Lane got his man he started to move. A series of successful deals have changed the complexion of the White Sox from a lackadaisical "do it tomorrow" second division gang to a rip snortin', "ummin' bunch of base bandits."

This is a "made" club, put together almost entirely with deals. The Sox had no farm system worthy of the name. Now they have a cozy little group, but nothing too ambitious.

Only Jim Busby of the Sox regulars can be called a farm product and this is his second year. The rest all came from some other club or somebody's minor league garden.

Lane tried shortstop Chico Carrasquel from the Brooklyn farm system. He got first baseman Eddie Robinson from Washington, second baseman Nelson Fex from the Philadelphia A's, and outfielders Al Zarilla from the Boston Red Sox and Ed Stewart from Washington. Those are just a few. And last month he got Orestes Minoso in part of a sick three-way swap with Cleveland and Philadelphia.

Everybody laughed when they said the Boston-Chicago deal last winter was "even up" with no cash. Chicago got Joe Dobson and Zarilla and Dick Littlefield for Bill Wight and Ray Scarborough, two established regular pitchers. So Dobson is 3-0 and Wight and Scarborough have one win between them.

Harry Dorish, a Brownie and

Red Sox discard, was drafted from Toronto for \$10,000. On the eastern trip he came up with two wins.

Gumpert gave up 11 hits to Philadelphia yesterday but went all the way to a 5-2 win, Chicago's seventh straight.

But hot as they are the Sox can't gain on the New York Yankees who belted over Detroit, 11-1, for their 14th win in 18 Yankee Stadium starts.

Casey Stengel got an extra day's rest for his regulars by pitching Joe Ostrowski. It was Ostrowski's first complete game since June 1950.

Bobby Felier bounced back from his first loss at Boston to shut out Washington with two singles, 16-0, supported by a 19-hit barrage.

Bobby Avila with four hits and Larry Doby with a three-run homer and single were the stoutest sluggers for Cleveland.

The St. Louis at Boston game in the American was washed out.

Only action in the National League was a rousing 11-3 win over Cincinnati in a night game. Rookie Joe Presko, a Houston grad, had a not-hot game going for 6 1-3 innings. Johnny Wyrostek ended that with a double. He still had a one-hitter going to the ninth when the Reds got to him for four more hits and their three runs. It was

## SPORTS MIRROR

(By The Associated Press)

Today 10-year ago—Jack Onslow was dropped as manager of the Chicago White Sox and Coach John (Red) Corriden was named as his successor.

Five years ago — Navy won the 1-C-4-A track title for the third consecutive time.

Ten years ago — Bob Feller struck out 13 men as the Cleveland Indians defeated the St. Louis Browns, 6-0.

Twenty years ago — The Philadelphia Athletics stretched their winning streak to 17 straight games by taking a doubleheader from the New York Yankees, 4-2, and 16-4.

Russell Dooner of Eglantine Farms was at the wheel of the Ford F-1 during the Economy Run, got black-and-white proof that "the Ford costs less to run than any truck we ever owned."

"We haul feed for 1 1/2¢ a mile!"

Most power from the least gas is what you get with the Ford Truck Power Pilot. It's on all Ford's more than 180 models! Only Ford in the low-price field has the Power Pilot. Saves you money every mile! New 1951 Ford F-1 Pickup shows a new fingertip gearshift, new Fr-Turn valves, new high-lift camshaft. Grain-tight body. Big capacity. Choice of V-8 or Six!

"I am sold on the Power Pilot economy of Ford Trucks," says the manager of Eglantine Farms....

"The performance of our Ford F-1 Pickup far surpassed our expectations," reads the statement from Eglantine Farm & Feed Service. "The Power Pilot gives us more power from less gas." Eglantine Farms operate eight Ford Trucks, two trucks of another make.

Their Economy Run records show that in 12,964 miles of the Run, the F-1 Pickup hauled an average load of 1,039 lbs., had no repairs, cost them a total of \$223.65 for gas, oil and maintenance (they got regular service from their Ford Dealer). Result—a running cost of only 1 1/2¢ a mile!

# London Sees Home Of Sherlock Holmes

By DEWITT MACKENZIE  
AP Foreign Affairs Analyst

The opening of Sherlock Holmes' old lodgings in Baker Street, London, to public inspection as a feature of the festival of Britain, is an odd conception, involving as it does a personality who never existed.

Still, it's a happy idea, for to us old-timers Sherlock Holmes was as real as were the members of our own families. And to Sherlock Holmes enthusiasts of half a century ago (how time does fly) his Baker Street rooms were as familiar a rendezvous as the corner groceries in our home villages.

It was my good fortune to know the detective's creator, Sir Arthur Conan Doyle, very well. I spent many intensely interesting hours with him in London between the end of World War I and his death in 1930. To one who knew him only in these later years it was difficult to think of him in terms of a detective story writer, because his whole life and thought was centered in spiritualism.

Still, I did not hear him speak of the days when he sat in the back room of his doctor's office, writing his Sherlock Holmes stories while he waited for patients. These tales were first published in the Strand Magazine (London) and my understanding was that the idea of writing the stories came to him in a complete and complete mind of detectiveness.

serial publication. Avid Holmes fans didn't like to wait between issues of the magazine to find in itself — was adopted to avoid out what was happening to the

Incidentally, I also met Sir Arthur's famous brother-in-law, the late E. W. Hornung, who wrote the stories of Raffles, the amateur cracksmen. I often have wondered whether Hornung created his Raffles, the gentleman scoundrel, as the opposite of Holmes, the terror of evil doers. However, I didn't have a good opportunity to ask Hornung about this, and so don't know the answer.

Sir Arthur Conan Doyle was a fine-looking man, and for years was one of the lions of London

drawing rooms because of his literary fame. However, in his later years he became so wrapped up in spiritualism that he had little time for anything else, and his popularity as a drawing-room lion suffered. I heard him remark once that many old time friends had fallen away because of his views.

That grieved him greatly and he told me that he couldn't understand how anyone could refuse to believe in communication with those who had passed on. He was so wrapped up in the subject that he ran a bookshop under the shadow of Westminster Abbey and there he made available all sorts of publications on spiritualism and allied subjects.

Incidentally, Doyle and the late Houdini, the magician, had a running argument about spiritualism, and Sir Arthur maintained to me that Houdini performed his amazing feats through spiritualism but wouldn't admit it. Doyle said that Houdini, in making his escapes from padlocked iron chests dematerialized himself so that he could pass through a crack or keyhole and that once out he materialized himself again.

Doyle told me he had encountered spirit materialization himself, and that a materialized spirit had badly manhandled members of a spiritualist meeting which he was attending in southern England. He believed, by the way, in both good and evil spirits.

When Sir Arthur died he was buried in the lovely flower garden of his country home. And his charming and accomplished Lady Doyle, who also was a spiritualist, told me that the family had received communications from her husband after his death.

However, as the crowds pass through the Baker Street rooms this summer, most of them will think of Conan Doyle in terms of the creator of the immortal Sherlock Holmes, master detective. They are one and inseparable.

The potato chip industry uses about 20 million bushels of potatoes annually.

**LESSON IN FIRE BOMBING**—A Republic F-6E Thunderjet at Elgin Air Force Base, Fla., gives a demonstration of napalm (jelled gasoline) bombing—a technique which has proved highly successful in Korea. At top, the jet releases the bomb. Center, the jelled gasoline strikes its target, splashing in all directions to destroy everything in its reach. Below, the inferno roars into a boiling mass of orange flame and smoke. The devastating napalm bomb is said to be the one weapon most feared by the Reds in Korea.

## PELLEY-ACHE

(Continued from Page 4)

with one big blanket. That is like condemning ALL Catholics or ALL Protestants for wrongdoing on the part of SOME Catholic or Protestant organizations, or individuals. "Not much harm" indeed. I suppose the "big lie" of a Hitler or Stalin has not done much harm.

Regarding the Pinckney papers in which Benjamin Franklin was supposed to have blasted "the Jews" and the "original" of which was supposed to be in the Franklin Library in Philadelphia, I said no such papers were in the Franklin Library. That's a fact. Of this, Pelley says:

"A relative of Charles Pinckney in 1934 sent me a copy of the Diary as it was originally published and the observations of Franklin were in it precisely as I published. It was done in a public printing, you know, and our Jewish citizens have been assiduously hunting down and exterminating copies of it as they could."

Of course, this is throwing the whole matter of proof up in the air and practically blames the Jews because "the original" Pinckney "diary" with Franklin's speech cannot be found in the Franklin Library and, according to the library curator, never was to be found there, so far as he knows. I can't prove that Pelley fabricated that Pinckney "diary" or the speech supposed to have been given by "Franklin" but there isn't a scintilla of evidence that such an "original" ever existed in the Franklin Library. If such a diary ever existed or was in the library it's odd that no one noticed it or said anything about it until Pelley, whose chief stock in trade was "the Jews" supposedly came across it.

After a bit of admonishing me for holding my tongue in my chest, and being at least "good sport enough to give the other fellow the benefit of the doubt," plus a few words about "it isn't in my spirit to show animus toward critics who haven't apprised themselves fully of what they are doing," Pelley complains:

"Now go ahead and abuse me, Baxter. What you're gaining from it personally I don't know. But if it continues to give you morbid pleasure, my shoulders have been toughened to take it. After all, when they claimed Christ said He could knock over the temple and rebuild it in three days, they accused Him of blasphemy, too, you recall."

"But," he says, "please take my word for it, I have never knowingly in my life fabricated anything to advance or promote a point, and am striving as best I can to carry on at the present time with the best interests of America and the Christian religion at heart... The day I have to descend to fabricating and racketeering, that day I want the good God to pull me out of Life. Now go ahead and sneer."

"Perhaps Bill's right. Perhaps he just innocently published articles that someone else fabricated and put over on him for several years. Perhaps the Dies Committee of Congress should have known him better personally if it were going to accuse him of racketeering. I don't propose to 'abuse' or 'sneer' in this matter. I am simply interested in getting at the truth and in presenting factual information and personal comment of interest and if value to the public, which is the purpose of this column."

It will do Pelley no good to "sneer," as he did, that "it grieves me tremendously to see you join yourself with ranks of the detractors."

That's a sneer. I am strictly an independent individual and I have not "joined myself" to any rank of anybody. We'll take up a bit more of Pelley next time.

What is believed to have been the first natural gas well in the United States was drilled at Fredonia, N. Y.

**BRITAIN'S FIRST LADIES**—Dowager Queen Mary, who will be 84 this month, and Queen Elizabeth enjoy themselves at the Festival of Britain in London. The Queen mother, reported to have been ailing recently, toured the Festival in a wheel chair.

## Textile Ceiling Regulation Set

A new ceiling price regulation on textile makers and an amendment to the ceiling price regulation covering soybeans was today by the district Office of Price Stabilization.

The regulation on textile manufacturers becomes effective May 28.

The amendment on the regulation covering soybeans specifies that the farm level price is the elevator ceiling price, less transportation costs from farm to elevator.

If a producer delivers his own soybeans to the nearest country elevator, there is no transportation deduction.

Trucker allowance is three cents a mile per 100 pounds for the first five miles plus a cent per 100 pounds for each additional five miles up to 100 miles. Over 100 miles the transportation allowance is the lowest local carload rail rate for soybeans from origin to destination.

The industrial cities of Antung, Manchuria, and Suiju, Korea, face each other across the Yalu river 15 miles from its mouth.

## Oilmen Keep Close Eye On Manpower

By MAX B. SKELTON  
HOUSTON — (AP) — Oilmen are keeping close watch on a worrisome manpower problem while gearing the industry for possible full mobilization.

Drilling contractors began calling for relief weeks ago. Huge expansion programs now under way or proposed in other phases of operations are causing concern over future manpower supplies.

The Bureau of Labor Statistics says rising demand for petroleum products and increasing capacity indicate new employment record will be set in the industry in 1951 and 1952.

A National Petroleum Council committee on manpower last week made recommendations involving employees affected by selective service and reservist programs.

It suggested that the oil and gas division of the Interior Department urge the Petroleum Administration for Defense establish a unit to review requests for occupational deferments. It also said it would be exceedingly helpful if the Defense Department could establish a plan of rotation whereby employees drafted or called to active duty are returned to the industry after serving a specific period of time.

The PAD's review unit, upon request from employers in the industry, would study orders affecting key employees and make recommendations to draft boards and military authorities.

The manpower committee said oil and gas employees totaled 538,968 on December 31, compared to 515,471 two years earlier.

Male employees on December 31 were placed at 480,281. Of this number, only 177,703 were said to hold assignments which would require less than one year to train replacements. Males under 28 years of age totaled 49,288. Reservists and national guardians within the industry totaled 32,065.

PAD last week announced it has recommended \$7 petroleum refining projects to cost \$446,500,000 for accelerated tax amortization.

Numerous other refinery projects were under way before PAD made its February call for sharp increases in basic refining capacity within the next five years, with a goal of 700,000 barrels to be added by the end of next year.

Such new refining facilities will require months for construction but, upon completion, undoubtedly will boost plant employment sharply.

In January, United States refineries had 201,800 employees. Refinery capacity approximated 6,900,000 barrels daily.

In 1939, national plant capacity totaled 4,828,846 barrels. Refineries had 103,700 employees.

During World War II, employment jumped to 173,500 in 1945 and has kept climbing. Plant capacity in 1945 stood at 5,315,356 barrels daily.

PAD's call for 1,600,000 additional barrels of basic refining capacity by the end of 1956 would mean a total of about 8,500,000 barrels daily.

## Jerome Pierson Is Degree Candidate

DENTON — (Special) — Jerome Sanders Pierson of Pampa is one of approximately 450 students at North Texas State College who have made application to receive the bachelor's degree at commencement exercises June 3.

Texas Secretary of State, John Ben Shepperd, will deliver the commencement address. Baccalaureate sermon will be given by the Rev. Clayton L. Potter, minister of the National Avenue Christian Church of Springfield, Mo.

Pierson, son of Mr. and Mrs. A. O. Pierson of 701 W. Foster, Pampa, is a senior student majoring in business administration. He is a member of the Management Club and the Panhandle Club.

WELL, WAKE UP, ALL TOMORROW, INSTEAD OF A DAY ON THE SANDS OF GAY BEA CITY. WE HAVE ALGERIA TWO WITH OLD LADY RITTY!

HOME AGAIN! THE TRIP ALL SEEMS LIKE A WONDERFUL DREAM, JAN!

**MEANWHILE**

DOES TOMMY WRITE TO A TWIN AND ISN'T SURE HE SENT IT TO THE RIGHT GAL?

HE SAYS ONE OF 'EM'S FULL OF RUN-A-REAR PARTY GAL - AND THE OTHER TWIN IS GAY JUST LIKE HE IS!

HE HOPES HE WROTE TO THE PRETTY ONE!

HEY, JILL! A LETTER FOR YOU!

NO WONDER! TH' FOOL TOLD HER TH' GEARS WERE STOCK AND WASH-LESS! SOME BRIGHT BOYS OF TODAY WOULD HAVE TH' WORKS WITH THAT CHANCE!

THAT WAS THE CLOSEST WE EVER CAME TO CARE OF THEM ROMANCES WHERE TH' HAND-SOME HAND SAVES THE PRESIDENT'S DAUGHTER. ANY GETS HER AND TH' SHOP- WELL, THAT'S HER, AND HE AIN'T GOT EITHER!

I REMEMBER THE DAY MY COAT CALGHT IN THE GEARS AND I SCREAMED AND YOU DASHED OVER AND TOLD ME THEY WERE JUST PILED UP STOCK GEARS!

**Blondie**

YOO-HOO! IT'S ME - I'M HOME!

WELL, THERE'S ONE SURE WAY TO FIND OUT IF ANYBODY'S AT HOME

DADDY, WILL YOU GIVE MY DOLLS HEAD BACK ON?

DAGWOOD, WILL YOU FIX THE SHIRK DRAIN FOR ME?

POP, MAY I HAVE A DOLLAR PLEASE?

AND THAT'S THE ONE WAY

WELL... HE HAD NO BUSINESS CALLING ME AN APE!

YES... I KNOW... BUT MY STARS, OOP HOW CAN WE DO ANYTHING ABOUT YOUR TROUBLE IF YOU KEEP QUARRELING WITH THE DOCTORS?

NOT ALWAYS, NO... BUT MOST OF THE TIME NOW TELL ME HONESTLY, DO YOU, OR DON'T YOU, HAVE A PAIN IN YOUR STOMACH?

WELL... THERE'S ONLY ONE THING TO DO... PUT YOU INTO A HOSPITAL FOR OBSERVATION!

AND SO SOME TIME LATER, WE FIND OOP IN ANICE WHITER ROOM.

'MEAN I GOTTA WEAR THIS?

SURE! IT'S JUST A LITTLE OLD COTTON GOWN. WHAT DO YOU CARE? YOU'RE NOT GOING ANYWHERE!

**Alley Oop**

WAIT A MINUTE, DOGGIE... I WANT TO SEE YOU, NICE DOGGIE...

I'VE GOT HIM. THIS IS THE MUTT THAT CHASED OUR COW AND GOT THE WHOLE ZOO LOCO...

GET HIS LICENSE AND WE'LL HAVE HIS OWNER...

DON'T WORRY ABOUT THAT, JUNIOR, LOOK!

BUT THEY'VE GOT BO...

MOO-OO

NO WONDER DOC CROSBY DIDN'T HANG UP HIS PHONE! SHOT THROUGH THE HEART!

IN BOSWELL THE BARD'S CABIN...

MA'AS IF ANY TWO MEN COULD BE A MATCH, FOR BOSWELL GET TO THE POLICE BEFORE THE ANGELPUS AND FIX COME BACK AND KILL ME!

EVER, SHERID, I SHALL DRIVE YOU IN!

FLAT, THE MINUTE YOU FOUND THE ACTS FEEL YOUR DUTY WAS TO HAND IT OVER TO THE POLICE.

AND THAT'S EXACTLY WHAT I DID, BROW!

WHAT! AM I NUTS, OR ARE YOU?

AND DON'T YOU DARE GET UP TILL YOU ARE GOOD

30 MINUTES LATER

THAT'S ENOUGH, DEAR... IT'S BEDTIME...

OH, NO-MOMMY! I'M NOT GOOD ENOUGH - YET!

**Bo**

OBVIOUSLY, THE BOY IS THRILLED OVER OUR OFFER, CARL! BUT HE HATES TO LEAVE YOU.

HE'S LIKE A SON TO ME, HARDWICK. I CAN'T LET HIM GO JUST TO SATISFY A WHIM!

BUT YOU'VE NO RIGHT TO STOP HIM, HIS FUTURE BECAUSE YOU NEED HIM... AND WISH TO EXPLOIT...

I'LL TALK WITH HIM AND GIVE HIM AN ANSWER WHEN WE SHOW IN MIDLEBURG SOON.

AMOS! YOU DON'T MEAN IT? THAT CIRCUS CLOWN!

YOU KNOW WHAT ELSE HE SAID, PHYLLIS? THAT HE MUST BE SURE WE ARE COMPETENT TO REAR DONNIE!

I THINK - NOW WAIT - DON'T TELL ME - IT WAS SAMUEL PEPE'S, RIGHT?

MA'AM, DORY, YOU WEREN'T PAYING ATTENTION! THAT BOOK YOU HAVE IS ON WHITTIER! GEE, KNZZ!

S-AY-AY! DORY, YOU KNOW THOSE SALADS I MENTIONED? "BARBARA FRETCHIE," "MARGUERITE," "SHIPPER IRESON'S SIDE" PEEZ WHITTIER WROTE 'EM!!! GEE, I DON'T KNOW THAT!

**Wash Tubbs**

WEEPEE WAS DOWN THERE! TAKING THE PHYSICAL?

THAT'S RIGHT, TOM! AND IF HE PASSED IT, HE'LL PROBABLY BE CALLED AT THE SAME TIME THAT RED IS!

CAN YOU BEAT THAT? THEY MAY EVEN WIND UP IN THE SAME OUTFIT!

THAT'S WHAT I'M AFRAID OF! IT COULD MEAN TROUBLE, TOM - A LOT OF TROUBLE!

RED WAS DOWN THERE, TOO, EN, WESPEY?

YEAH!

DID HE SAY ANYTHING TO YOU?

NO! AND I DON'T SAY ANYTHING TO HIM, EITHER! NOW SHUTUP! I DON'T WANTA TALK ABOUT IT!

**CARNIVAL** By DICK TURNED

"These cookies you brought home from school, Amy - did you say you made them in cooking or in chemistry?"

"We take a vacation to get away from it all! Why do I always wind up in a spot where all they have is a good beauty shop and a dance hall!"

What kind of card games do they play here anyway? I've already swept up nine aces.

Pocketbook May Benefit From Decision By Supreme Court

By JAMES MARLOW  
 WASHINGTON (AP) — Your pocketbook — the price you pay for things you buy — may benefit from a supreme court decision Monday.  
 It means a lot of shopkeepers can now charge you less than they've been charging. They'll be free to cut prices.  
 This court decision involves the fair trade laws of the 45 states which have them. Three states — Vermont, Missouri, Texas — and the District of Columbia don't have them.  
 This is what those fair trade laws meant, among other things:  
 1. The manufacturer of a brand-name product could go into a state and make an agreement with one or more retailers, handling his product, not to sell it below a certain minimum price. This was price fixing.  
 2. Once a manufacturer made such an agreement — if only with one retailer in that state — no other retailer there could sell below the price agreed upon by the manufacturer and that one dealer.  
 This meant that any dealer — or many dealers — who not only didn't sign the agreement but didn't want it at all, couldn't cut the price of that product.  
 That was the way it was until Monday, as the state laws were interpreted. But the Supreme Court changed that in part and in this way:  
 The court said that in states which have fair trade laws a manufacturer and a retailer can still make agreements not to sell below a certain price.  
 But, the court said, this applies in the future only to those making the agreement and, in the future, any retailer not a party to the agreement can cut the price as much as he wishes.  
 Here's a homely example of how that worked and can work now:  
 1. The manufacturer of a fishing reel wanted it to sell for \$15 if you bought it from a tackle shop.  
 If he sold it to a tackle dealer in the District of Columbia, which has no fair trade law, that dealer could re-sell it to you for any price he wished below \$15. He suited himself on that. That still stands. The Supreme Court decision doesn't change that.  
 2. But say the same manufacturer went into a state with a fair trade law. He made a deal with a tackle shop not to re-sell that reel for less than \$15.  
 Even though the manufacturer made that agreement with only one tackle shop, all the other dealers who handled that same reel had to sell it for no less than \$15, even though they took no part in the agreement.  
 Now, under the court decision, the manufacturer still can make an agreement in a fair trade state with as many dealers who are willing to go along with him that the reel shall not be sold for less than \$15.  
 But, from now on, any dealer handling that reel — if he didn't take part in the agreement — can sell the reel for any price he wishes below \$15.  
 This decision resulted from a case in Louisiana, which has a fair trade law.  
 Two distillery corporations, Schenley and Calvert, wanted a certain New Orleans liquor store — Schwegmann Bros. — not to sell below a certain price. The store insisted on selling at a lower price.  
 The distillery firms took the liquor store to court to make the owners abide by the state's fair trade law. The Schwegmann firm

Merit Award Given Lefors School Paper

LEFORS — (Special) — Rebecca Breining, editor of The Pirate, Lefors High School newspaper, received a certificate of

award of merit from the Inter-scholastic League Press Conference recently. This award was given to The Pirate in recognition of the "contributions which it has made to the school for which it is published."

The mothers and daughters played volleyball, badminton, and ping-pong.

Of course, a question arises here: what happens now? Won't firms refuse to sell to retailers who decline to take part in a price-fixing agreement?

In some cases, probably. Maybe not. One lawyer here, asked about it, said: "that won't work very well. Retailers can get their goods from a lot of sources, such as wholesalers, if a manufacturer doesn't want to deal with them."

fought this all the way up to the Supreme Court.

And Monday the court cut a big hole in the fair trade laws of all the states by ruling in Schwegmann's favor.

Guill Speaker For White Deer Services

WHITE DEER — (Special) — Ben Guill of Pampa will speak at the commencement exercises to be held at 8 p.m. today in the White Deer grade school auditorium.

At the baccalaureate services Sunday, Rev. M. O. Evans, pastor of the First Baptist church, Skellytown, delivered the message.

Betty Lou Cofer played the professional. Superintendent R. V. Vineyard introduced the speaker, and a group of girls, directed by Erling Hansen provided special music.

Two Pampans Due Sul Ross Degrees

Charles Boyles, son of Mr. and Mrs. W. L. Boyles, and Jimmie Wilson, son of Mr. and Mrs. Elmer Wilson, Sr., will be graduated Monday from Sul Ross State College.

They are among 155 seniors to receive degrees from the school. Boyles will receive a bachelor of science degree in animal husbandry and Wilson, a bachelor of business administration degree.

Picnic Is Held For FHA Club Mothers

LEFORS — (Special) — A picnic was held recently for mothers of members of the FHA Club. Because of bad weather, the affair was held in the school gymnasium.

The mothers and daughters played volleyball, badminton, and ping-pong.

award of merit from the Inter-scholastic League Press Conference recently. This award was given to The Pirate in recognition of the "contributions which it has made to the school for which it is published."

Don Bloch of Denver, Colo., has recently edited "Brand Book," a collection of essays on the west, and about the American author's history, places and people. Edgar Saltus in the country. Bloch written by "members and guests" of the Denver Press of the West. Read The News Classified Ads.

**no vent needed**  
 with an Electric water heater.

... because there's no fumes from an electric water heater. It's a clean, sanitary, economical way of heating you and your family of adequate hot water at the proper temperature. It's automatic too; you install it and dependable electric service does the rest.

**IT'S CLEAN**  
 There's no soot, no smell, no fumes 'cause there's no flame.

**IT'S AUTOMATIC**  
 You merely set the thermostat control for the desired temperature.

**IT'S LONG LASTING**  
 Automatic electric water heaters last for years. Many literally "breathe" and when they do they drop scales of water corrosion. These fall to the bottom to be removed at convenient times.

**IT'S ECONOMICAL**  
 A few cents a day gives you more hot water for ALL the hot water uses in your home. Never any waiting period... hot water NOW... when you want it.
