Where were you on the night of August 1, 1929?

Could you remember, if you were squirming on the witness stand? Probably not. Fifteen years is a long time.

Maybe, being August first, you were writing checks to pay the monthly bills. Do you remember how much you paid for electricity?

That's a tough one, too, isn't it? Actually, if yours is an average household, your electric bill may have been a little less than that is now.

But today you're getting twice as much electricity for your money!

How come? Well, while the price of electricity was coming down, your use of electricity was going up. You have a lot more electric appliances in 1944 than you had in 1929. But you enjoy all these added comforts at little, if any, added cost!

Even if you're hazy about everything else that's happened in the last 15 years, remember this wartime bargain. It's due to hard work by all our people — and sound business management.

THE REVOLT WITHIN THE DEMOCRATIC PARTY CONTINUES DESPITE TRUMN'S SELECTION

Nomination of Senator Truman for vice president was heralded by some observers at the time as a defeat for the Roosevelt faction of the party. Upon their return home, however, and after time for "thinking things over," Southern Democrats realize that the net result of the convention was just the opposite; the anti-Southern forces dominated every move of the convention, aided and abetted by the CIO, the communists, the machine bosses of the big cities, the Negro organizations and others who have no regard for the Constitution or orderly processes of government, but who are guided solely by a desire for power.

Southern Democrats, who seek a return to states rights and a democratic form of government, and who went to Chicago with demands that the convention recognize their claims, were left completely out in the cold. The Texas "regular" delegation, which had been instructed to refrain from endorsing the party's nominees unless some of their demands were granted, were not only ignored but one half of their legal and rightful voting power was arbitrarily taken from them and given to the other group of Texans which had no legal status as a party delegation.

The ditching of Vice President Wallace in favor of Senator Truman was a move to placate the Southern Democrats, but it was an empty gesture; not one of the demands of the Southern leaders as to home-rule government on such issues as the Negro question, restoration of the two-thirds rule in party conventions, the right of the party to prescribe the qualifications of its own members or a return of the party to the principles of Thomas Jefferson, was even so much as considered at Chicago. The convention was one of power politics, pure and simple.

Dominating personality of the convention was Sidney Hillman, representing the Political Action Committee of the CIO, who boasted that a \$10,000,000 slush fund, gathered from millions of workers in this nation, is to be used to name the next occupant of the White House.

Considering such activities as these, which came to light at Chicago, then there is little wonder that the people of the South are more aroused and alarmed than ever at the growing threat to democracy in America. First outburst of this resentment so far in Texas was the mass meeting in Montague County last Saturday, when life-long Democrats openly defied the CIO, the communists, the machine bosses of the big cities and the racial organizations to "take the Democratic party away from us." These same spokesmen also said just as defiantly that they didn't propose to be driven into the Republican party.

The Montague mass meeting was spontaneous but it was indicative of a growing fear in the South that America is about to lose its democratic form of government; it was but a spark in a flame which before November 7 may spread as a prairie fire throughout the land.
