War Plants Are Needing Workers

"Need for manpower in the Nation's war plants makes it necessary that this community divide its manpower resources among its own essential activities with our war plants that are turning out the ammunition, guns, ships, air craft, trucks, synthetic rubber, and high octane aviation gasoline that are so urgently needed by our fighting forces," stated F. A. Wells, area director for the War Manpower Commission in this area, today.

In a fast recruitment program designed to secure male workers for our own Panhandle war plants in and near Border, hiring representatives of the L. O. Stocker construction company, who are engaged in the construction of high octane aviation gasoline refinery, the Phillips High Octane Aviation Gasoline refinery, and the Phillips Butadiene plant will be at the county court room in this city, on Monday, Sept. 11.

A representative of the U. S. Employment Service will also be with these hiring representatives to insure workers engaged in an essential activity is hired away from them.

She is survived by one daughter, Mrs. Hartwell of Estelline, and four grandchildren.

Need Song Books? Get Them Free

This is the time of year that salesmen from out of town and county get busy trying to sell the business men on advertising in song books and such like.

It has been found that song books can be bought cheaply, and if they are bought through the advertising plan, they cost the merchants many times over the initial cost. For this reason the Memphis Chamber of Commerce advises that books will be bought and given to any community rather than have them selling advertising through a stranger who takes the profits and hits to some other town to work the same game.

Directors of the chamber of commerce state that a reasonable number of "100 Best Songs" or "Every Day Song Book" will be given free to any school in rural community in need of books of this kind.

Wounded in France

Pvt. Otis M. Smith was seriously wounded in France on August 9, according to a message received by his parents, Mr. and Mrs. W. Z. Smith of this county.

Pvt. Smith, 35, was with the infantry in France when he was wounded. He had been overseas since April 1 this year, and had been in service two years this coming November.

The message did not state the nature of the wounds, nor how received.

Mr. and Mrs. J. D. Roden of Dallas visited the first of this week with his brother, Grover Roden, and family.

MOOS OF THE MOMENT BY UNCLE BOB of the Kraft Dairy Farm Service

There have been many cases of good bulls being sacrificed at too early an age, because some dairymen dislike to use an older animal, due to hazards involved in handling. Proper housing, proper management and exercise are the answers to this problem, says the University of Illinois Extension Service, in Circular 460.

It recommends housing the bull separately from the herd, and gives a floor plan for a bull shed. Plenty of space for exercise is needed, with a strong fence around the yard. Careful feeding, to keep the bull in top condition, without being fat, is an essential. When feeding legume hay, a grain mixture of three parts ground oats and one part wheat bran is preferred. Other feeding mixtures, when other roughage is used, are suggested in the circular.

Young bulls should be kept in service until their true worth can be determined, by the milk production records of the progeny. Handling the bull is more important as the age increases and this Illinois circular can serve as a good guide book.

Even trade is fair exchange, so they say, but a man could get into a lot of trouble trying to swap a 40-year old wife for two twenties.

One of the interesting things about being a dairy farmer is the fact that you don't have much chance to get into a rut. Every changing season brings changes in the things a dairy farmer should be doing.

The annual change over from supplementary feeding for cows on pasture to barn feeding will be taking place shortly. It is time to start checking your feed supplies, to determine whether you have sufficient roughage, silage and grain to carry your cows through the winter, in top condition and at top production.

As in the case of feeding supplementary to pasturing, the amount of grain to feed your own herd is determined by (1) kind of roughage; (2) breed of cows; (3) rate of production and (4) protein content of feed mixture.

If you need a table which will show the correct mixture to feed, based on those four points, I suggest you write the Extension Service, University of Illinois, Urbana, Ill., and ask for a copy of Circular 502. It has a section on barn feeding which will be a valuable aid in keeping your herd's milk volume at a peak.

Purdue University recently issued a new leaflet, No. 260, on cleaning and sterilizing facilities. It is well illustrated and a prominent place in your dairy. It takes you through rinsing with cold water, rinsing with hot water and rinsing with a chlorine solution is devoted to water sterilizing the milking machine can get a copy by writing Extension Service at Lafayette, Ind.

If you really want to "go out", you'll do well to visit U.S.D.A., Washington, D.C. It is a complete discussion of resistant and hardy oats in our states. The bulletin stresses the importance of increasing the quantity of oats in the South and west in order to improve in those regions. It mends early enough fall so that the young plants sufficient growth to withstand freezing. The publication declares sown oats greatly outyield sown varieties in most sections south. The Arkansas Experiment Station reported a 42% gain of fall-sown over best spring-sown oats. There are specific varieties recommended for each state. South and Southwest. Varieties proved may be different in parts of certain states and let gives this information. Costs is a penny postcard and request a copy.

A fellow I know says he's tracing back his family to decided to quit when it seemed to get in grafting. If good rope has become a problem on your farm, you to get some good out of U.S.D.A. publication, Pamphlet No. 1931. It tells you take care of rope, to make longer and better service. This book shows how broken strands, a problem occurs frequently these days, how to make several different and how to tie various knots. There are plenty of pamphlets around any dairy farm should be able to get some help from the information booklet. NOTE: There usually is a pamphlet mailed to you in your state; but possibly by your free pamphlet on the same county agent. Uncle KRAFT CHEESE COMPANY

County Men in the Armed Forces

Private Russell A. Norton, wife, children and mother Josie Norton, reside in Memphis. He has graduated from the Army Air Forces aviation school at Training Camp Pendleton, California. Graduates of this school are assigned to Marine units. Their training is for amphibious operations and establishing and beach heads.

Jack E. Hightower, 17, son of Mr. and Mrs. Walter Hightower, has enlisted at the Amarillo recruiting station for service in the U. S. Navy. He is a graduate of Memphis high school with the '44 class and attended Baylor University the past summer.

Wesley M. Wright, grandson of Mrs. D. N. Beaver of Memphis has been promoted to the grade of corporal, it has been announced. His parents, Mr. and Mrs. Obe Wright, reside at Blossom, Okla. Wright left for foreign service in Feb. this year and is stationed with a maintenance unit of the Bomber Command, AAF in India. He is serving with the armament section and recently aided his outfit in preparing plans for B-29 raid on Imperial iron and steel works at Yawata, Japan. He was making his home here with his grandmother at the time he entered military service January 28, 1943.

S. Grimes of 7th and Memphis, who has been since October 27, has been promoted from first class to corporal at the California Army Air Corps Fourth Air Force.

E. Sanders, seaman in the U. S. Navy, and Mrs. Elmer Sanders, has recently sailed for the Pacific coast. He has been since April 20.

Leon Duncan, son of Mrs. C. C. Duncan of Van Dyke, former residents of Memphis, has written his parents from prison camp in the Philippines that he is well and is doing fine, and that he hopes to be home soon. He also stated that he had received a telegram. This was the first word the parents had heard from him since Christmas.

BRONZE STAR MEDAL IS AWARDED TO MEMPHIAN

The following letter was received here by Mrs. Julia J. Hammond from the Army Air Forces headquarters regarding her son John Hammond being awarded a medal:

Your son John has just completed 18 months overseas duty. During this time his record has been outstanding in an organization made up of outstanding soldiers. John is a modest young man and perhaps he has not told you that he was awarded the Bronze Star Medal for his faithful performance of duty while stationed at Guadalcanal. Your son's courageous actions and cool conduct during enemy bombing raids were largely responsible for the AACCS combat success in the battle.

The Bronze Star Medal is one of the few who have succeeded in

A Switch in Time saved Mine...

My wife wasn't all joking.

She said that a real new car improvement would be to go easing sideways, right into a cramped parking space at the curb. I said yes—maybe in 1960. There's one swell improvement though, that's here *already!*—an OIL-PLATED engine! You get that immediately by switching to Conoco Nth motor oil. I don't say it's the *only* oil; they're not hiring me. But I had this engine OIL-PLATED around 1941. It's still running like a darby, using Conoco Nth oil all the while, to cut down damage from engine acids. If I know what I've read all through this War, the acids made by every engine are liable to cause corrosion inside. That's bad. But acids don't like OIL-PLATING—can't gnaw right through it. It's fastened real close or sort of plated onto working parts that you've got to protect till your new car comes. And even then you'll want the engine OIL-PLATED with Conoco Nth oil, the same as in the car you've got right now.

NEWS about boys in the Service

Marine Staff Sgt. George W. Zint, 23, son of Mr. T. Z. Zint of Estelline, has been promoted to that rank at the Naval Auxiliary Air Station, Camp Kearney, Calif., where he is an aviation machinist. He served in the South Pacific from January, 1943, to January, 1944. Formerly employed by Amarillo Transfer Co., he enlisted in May, 1942.

Sgt. Earl R. Scott, MP, of Fort Ord, Calif., visited his parents, Mr. and Mrs. B. N. Scott, here from Thursday to Monday. He was on the return trip to Fort Ord from delivering some German prisoners to Oklahoma.

Crockett N. Ward of Edmond, Okla., formerly of Hall County, writes that his son, Lt. John Ward is home on a 30-day furlough from the "European hell"

and that he is home, "but I am saddened to learn of three of our old neighbors' losing their sons, Marion Wiley, Mitchell and Dorra Stephens. I take this means of conveying deepest sympathy to their parents and other loved ones." Mr. Ward enclosed the following clipping which was taken from the Edmond paper:

Fresh on the heels of his receiving his third Oak Leaf Cluster for his feats as a pilot of a four-motor Liberator, comes Lt. John Ward in person to visit his parents, Mr. and Mrs. C. N. Ward of this city. With the 1st lieutenant is his wife, who will spend

every possible hour with her husband. He has been overseas since last December and has completed 50 missions in his Liberator.

The fact that he has done a little toward winning the war at least, is disclosed by the very obvious fact that the War Department has decorated him with the Air Medal and THREE Oak Leaf

clusters, which just do not grow on trees. The words of his most recent citation by the War Department tell some of the things accomplished on those fifty missions: "for meritorious achievement while participating in sustained operational activities against the enemy." 1st Lt. Ward has been stationed in Italy with a Liberator bombardment group of the 15th Army Air Force which has been bombing German-held targets over Europe.

LIFE'S Little TROUBLES

-CAN'T SLEEP-

No need to lie in bed—toss and fret because CONSTIPATION or GAS PRESSION won't let you sleep. Be sensible—get up—take a dash of ADLER-I-KA as directed, to relieve the pressure of large intestines on nerves and organs of the digestive tract. Adlerika assists old food wastes and gas through a comfortable bowel movement so that bowels return to normal size and the discomforts of pressure stop. Before you know it, you are asleep. Morning finds you feeling clean—refreshed and ready for a good day's work or fun. Get Adlerika from your druggist today.

Snappy Sleepers

Suitable for sleep as well as burning the midnight oil are these pajamas made of part arachne material. Fabric pattern for these Highland Tommies was taken from an old British tweed.

Relief At Last For Your Cough

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back. Kidneys Must Work Well-

For You To Feel Well

24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood.

If more people were aware of how the kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of why the whole system is upset when kidneys fail to function properly.

Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at night, swelling.

Why not try Doan's Pills? You will be using a medicine recommended the country over. Doan's stimulate the function of the kidneys and help them to flush out poisonous waste from the blood. They contain nothing harmful. Get Doan's today. Use with confidence. At all drug stores.

SCHOOL DAYS AND CITIZENSHIP

The classrooms of our schools buzz with activity as the young people dust off their desks and shake out their notebooks to take again in hand pens and pencils to write another page in the history of American education. September and with it the opening of schoolhouses, the attaining of citizenship through a public system of enlightenment. There follows the equipping of children with principles of self-government that only could be learned in attendance of a free school program.

The task that lies before the instructors is a tremendous one, but since standards of education have advanced through the past years, the teacher as well as the student is ready to take advantage of this opportunity to cast out bigotry, ignorance, selfishness. The attitude of both should be to insure the future by stressing unity and peace.

Well have the history books drilled in the forming of the states, the Boston Tea Party, Dred Scott Decision, the Revolutionary War, carpet-baggers, assassination of Lincoln and so on through the background that brings us to the present. Do the history books point, as well, to the lessons to be learned for a tomorrow of problems in tactics, politics, organization, cultural and physical differences of the international members of our family, of peacemaking and government, in understanding among neighbors through hard lessons taught through actual experiences in other history books?

This is a task for education in the schoolhouse of today in America.—The Wheeler Times.

PROPOSED CONSTITUTIONAL AMENDMENTS

At the November election there will be two State Amendments to be voted on. These amendments have been published in The Post for the past four weeks and people generally should have acquainted themselves with them that an intelligent vote might be cast.

It is too often that people automatically decided to vote against an amendment—simply because it is changing the constitution to some extent. This should not be so. Our state laws should be changed in keeping with the times in which we are living, but there should be a good cause for making such a change before the constitution is monkeyed with.

Proposed changes in state amendments are never "ballyhooed" like that of political candidates. They are published in every county, but if the voter don't read them he seldom ever hears anything for or against the change of constitutional power they propose to give. There is never enough information on the ballot to give a voter anything like a clear conception of the proposition, hence many vote "for" or "against"

according to their feelings, and not because they have made a careful study of them.

There will be two amendments to be voted on in November. One would give commissioner's courts authority to raise or lower county tax levies, but only after the proposed change has been voted on by the people of that county. The other would give cities and towns the right to pension retired employees, but this only after an election has been held and carried by a majority of the qualified voters.

In some counties perhaps the first amendment would be beneficial, where the rate does not supply enough funds to maintain operating expenses, but it would be dangerous to have it on the statute books.

The second amendment is pure "bunk." We now have so many pensions in existence it has become a tax-paying burden. After the war is over the soldiers will receive, and rightly so, an allotment of some kind, either in the form of a bonus or outright pension. Either way, they will deserve all they get.

Each voter should, and will, cast a vote either for or against these amendments, but it behooves everyone to read them carefully and know what they propose to do and the power that will be extended to authorities.—Paducah Post.

Press Paragraphs

SELECTED FROM THE DEMOCRAT'S EXCHANGE

Apparently the subject of compulsory military training for all youths after the war is over is going to be tossed in the lap of congress by the committee on military affairs. This is a "ticklish" subject the committee and congress have been trying to dodge for a long time. Politics has entered into it from every angle and it is likely that nothing will be done about it until after the election. No one wants to take the responsibility.

The people are going to be completely fed up on war by the time this one is over. We will dislike to think of anything connected with a gun or military affairs, which is going to make it hard on politicians to enact laws of this nature.

The failure to be prepared and have a trained army came near getting us whipped in the present war. After World War I we began tearing down and destroying fighting equipment while Germany and Japan were building it up. Had the Allied Nations been as well prepared five years ago as they are now, chances are there would never have been a war.

Compulsory military training is something Americans dislike to think about. It seems that it is the only way we can possibly live in security in the future, but the chances are we will go on hoping for the best and forget to keep prepared after this war is over.—Paducah Post.

Did you ever stop to think that most of the things we have been asked to do to aid in the war effort are things we should do even though a war was not in progress? We are asked to save our money by investing it in bonds, obvious-

ly a sensible and a wise thing to do at any time. We are asked to save waste fats, waste paper, gasoline and automobile tires. We are asked to use up and wear out the things we have before buying new things. All wise and sensible things to do. There is no reason for regarding the saving program as a hardship or a sacrifice. It is the thing common sense teaches should always be done.—Foard County News.
