Judge Yarborough Certain of Victory In Saturday Voting

AUSTIN—"By their votes Texans will show they believe it is time to change Governors in Texas," Judge Ralph Yarborough said Tuesday, in commenting on the upcoming election.

"After shaking hands with thousands upon thousands of Texans," Judge Yarborough said, "I'm absolutely certain of Saturday's outcome."

The candidate for governor has great faith in old-fashioned stump speaking and handshaking. In his stump speeches, Judge Yarborough outlines his plans for:

- (1) Dams to save the flood waters of Texas rivers for time of drought;
- (2) Cooperation with and aid for local districts in a soil conservation program;
- (3) Improving and extending the farm-to-market roads program;
- (4) Granting cost of living salary increases to school teachers and improving the public school program;
- (5) Removing the constitutional limit on old age pensions;
- (6) Prohibiting a state income tax and any increased sales tax;
- (7) Re-establishing the narcotics division of the Department of Public Safety;
- (8) Improving the state public health program, which is 44th in the nation;
- (9) Regaining the Texas tidelands;
- (10) Eliminating waste and corruption from state government;
- (11) Restoring honor and dignity to public office.

Judge Yarborough's tours have taken him over 10,000 miles of Texas highways. He has been accompanied on most trips by his 20-year-old son, young Marine Lieutenant, back from Korea. The judge set a rapid campaign pace, pausing in six to eight days.

TEL Class Holds Monthly Session In Wilson Home

Members of the TEL Sunday school Class of the First Baptist Church held a regular monthly business session and a prayer meeting in the interest of the revival in progress now at the new mission, recently in the home of Mrs. Hulda Wilson with Mrs. Myrtle Crabb as assistant hostess.

The meeting was conducted by the class president, Mrs. R. H. Wherry. The meeting opened with Mrs. Fitzjarrald telling the history of the class song, "My Faith Looks Up To Thee," before leading the group in singing a stanza.

Mrs. Crabb presented the devotional, reading Psalm 24-1. She spoke on the subject, "This Is God's World," closing her remarks by quoting the poem "The Man Who Stubbed His Toe."

After a session of prayer, lovely refreshments were served to the following members: Mesdames R. H. Wherry, W. L. Crawford, T. L. Loard, Dick Watson, Frank Ellis, Myrtle Crabb, Hulda Wilson, J. W. Fitzjarrald, W. B. Scott and Miss Nettie Bardin.

Fort Worth & Denver Line Buys Equipment

Fort Worth and Denver Railway and associates have ordered \$6,500,000 worth of new equipment and roadway improvements, it was announced recently by R. Wright Armstrong, Vice President of FW&D, the Texas portion of Burlington Lines.

Locomotives, costing \$64,048.00 will include two of the latest type Diesel-electric 2250-HP Passenger service units, and eighteen 1500-HP special duty units for use in all types of train service.

More than 400 new steel 50-ton box cars and gondolas and hopper cars will be secured at a cost of \$2,300,000. This is in addition to 600 cars and 24-1500-HP Diesel freight locomotive units purchased last year.

The special duty Diesels, equipped for radio for end-to-end communication on freight trains, were ordered after tests this

month between Houston and Amarillo of a pilot model of a new locomotive which engineering experts claim has vast improvements over earlier models.

Nearly \$150,000 will be spent in lengthening eight sidings and passing tracks between Fort Worth and Wichita Falls for handling of longer trains.

Recent corporate and bond changes, approved by Railroad Commission of Texas and Interstate Commerce Commission, paved the way to continuation of modernization and improvement plans, Armstrong said. Delivery of the new locomotives will permit almost complete Dieselization of the line from ports of Galveston, Texas City and Houston to Billings, Montana. Diesels will replace steam power on the line between Childress and Lubbock and Plainview, he continued.

Lawyers' Duties To Persons Accused Of Crime Is Based on Common Law

People often misunderstand the reason a lawyer puts up the fight for a client who is accused of a crime. "It might be all right," they say, "if the man were innocent, but why put out so much effort defending him when everyone knows he is guilty?"

The obvious answer is that not everyone knows all the material facts. The accused is not a criminal in any legal sense until, by due process of law and under rules of evidence insuring equal justice, the court and jury arrive at the conclusion that he has committed a crime.

The Canons of Ethics governing the lawyers of Texas say: "It is the right of a member (of the State Bar of Texas) to undertake the defense of a person accused of crime, regardless of his personal opinion as to the guilt of the accused; having undertaken such defense, the member is bound by all fair and honorable means, to present every defense that the law of the land permits to the end that no person may be deprived of life or liberty but by due process of law."

If this were not the case, innocent persons, victims only of suspicious circumstances, might be denied proper defense. Such

legal defense is a basic principle of American justice. The rights of the accused to defend himself are nowhere as well guarded as in the British Commonwealth and the United States where government is based on the common law.

In France and other European countries a person accused of a crime is presumed to be guilty. If he is to escape the penalties of the law, he is obliged to prove that he is innocent. But in common law countries an accused person is presumed to be innocent until the state presents enough properly admissible evidence to convince an impartial jury that he is guilty beyond a reasonable doubt.

In serious cases, if the accused cannot afford to hire his own attorney, the court is required to appoint a lawyer to defend him without charge. The Canons of Ethics require the lawyer to defend such a man with the same vigor and skill as he would an ordinary client.

Corresponding to the Canon governing lawyers who defend the accused, there is one for the prosecuting attorney—the attorney retained by the government to present its case against the accused. The Canons of Ethics on this point

say: It should be the primary duty of a member engaged in public prosecution not too convict, but to see that justice is done."

How seriously the public, as well as lawyers, considers the rights of defendants accused of crime is found not only in indignation against government officers who violate these rights but also against mobs which try to take the law into their own hands. If either officers or mobs can take over the law, then no one is safe and the basis of our type of civilization is gone. The laws pertaining to criminal trials were made, not only to protect the rights of the accused, but to protect the rights of all persons.

(This column, based on Texas law, is written to inform—not to advise. No person should ever apply or interpret any law without

SPORTS AFIELD

By Ted Kesting

There are few Americans who know the story of George Catlin. Catlin did for the American exactly what Audubon did for our native birds. He painted their pictures on the spot and left us written records of the Indian way of life.

He was born in Wilkes-Barre, Pennsylvania, on July 26, 1796. He was a child of the wilderness until the day he died. He never kept his hold on him. He was nine he was a painter with the single-barrel gun. His family wanted him to be a lawyer and he did pass his examinations but might have spared himself the trouble, according to biographer T. S. Tudy.

SALSBUURY'S

From 1819 to 1823 he was supposed to be practicing law. Actually, most of his time was spent drawing pictures of courtroom characters. Finally he gave up law and enrolled in the Philadelphia Academy of Fine Arts. One day he visited Rembrandt Peale's Museum and discovered several portraits of Indians that were part of the exhibition. From that time on until his death in 1872 his life was to be devoted to one purpose alone. It was to live among the Indians and to make a pictorial record of their way of life before they vanished from the American scene.

Everywhere he traveled he found the strange details of a form of life unique on this earth. He was revolted by the Indian practice of scalping—but this revulsion didn't prevent him from investigating it. So far as the Indian was concerned, he was told, it was never wanted. A scalp was evidence that you had killed an enemy—proof, like a buck's antlers for the hunter that you had conquered. To be genuine, a scalp had to show the crown of the head. This prevented a deceitful warrior from taking two scalps from the same head.

The Indian horses and Comanche horsemanship thrilled Catlin. By gifts of plug tobacco he persuaded one young warrior to demonstrate. Although armed with bow and arrow, this Comanche was able to hang securely on the side of his horse while going at breakneck speed. Completely screened from the enemy, he fired arrow after arrow under the horse's neck. The secret of this eye-filling feat was due to two things. A short halter went around the horse's neck, both ends of which were braided into the animal's mane near the withers. This formed a loop which hung down under the horse's neck. It was a kind of sling into which the rider's elbow rested, half-supporting his body. Then the Indian threw one leg over the horse's back and clung to it with his heel.

These and many more were the things that George Catlin saw—and that he set down in words and paint. He left us a living picture of the American Indian and the thunderous western scene.

MAYOR McGUP By John Jarvis

Action was taken on the strict traffic ruling after many local motorists and through truckers had made complaints about the stop-signs and resulting inconvenience of travel on the street. The signs were originally put up to alleviate the dusty condition caused by speeding traffic. City police had investigated in

thur Gidden. William J. "Bill" Bragg, incumbent county attorney, is running against William B. Teague, and Sybil Gurley is running for re-election to the office of county clerk. Her opponent is Mrs. Ruby Collins.

Sheriff E. S. "Peck" Morrison, Tax Assessor-Collector Olin Cooper and County Treasurer, Hester Bownds are running unopposed. Three of the four precincts have contested races. Only Clinton Richburg in Precinct No. 3 is running unopposed.

Candidates in the other precincts are: Precinct No. 1, Roy Patton and Edwin Hutcherson; Precinct No. 2, George Blewer, Z. C.

Hamilton of the firm's Amarillo office, was present at the meeting. He brought along complete legal forms for calling and handling the election. The company will take care of all legal work in the election procedure—up to and including the election and canvassing of returns.

A date for the election was slated to have been set at the meeting, but that decision was delayed due to the absence of city secretary, D. L. C. Kinard. The secretary whose signature must be affixed to the election orders prepared by the bonding company, is on vacation in Colorado.

The Council decided to call another meeting for Monday night to officially order the election and officially set the date it is to be held. To meet all legal requirements, the earliest date possible to hold the election would be Aug. 16.

Jack Peabody is running for re-election to constable of Precinct No. 1 against Lee Chitwood. Three candidates are in the race for constable of Precinct No. 4. They are: Roy Edwards, Albert Erwin and C. L. Goodwin.

Precinct chairmen in all but two of the 12 Hall County pre-

cinets will act as election judges in Saturday's balloting. Algie Turner will act as election judge in Precinct No. 8 at Turkey, and Tom Luttrell will be judge in Precinct No. 9 at Lakeview.

Polls will open at 8 a.m. and close at 7 p.m., according to Allen Dunbar, secretary of the Hall County Democratic executive committee. In Memphis Precinct No. 1 voters will cast their ballots in the county judge's office. For Precinct No. 13 voters it will be in the tax collector's office.

Democratic precinct conventions will be held at 2 p.m. at the regular precinct meeting places. Delegates and alternates to the county convention will be elected. The county meeting is scheduled for the following Saturday, Aug. 2, at 2:30 p.m. in the county courthouse. There delegates and alternates will be chosen for the State Democratic convention which will be held Sept. 9.

All Hall Countians are invited to attend The Democrat's Election Party which will be held Saturday night in front of the newspaper building at 617 Main St.

Returns from all Hall County boxes will be posted as soon as the votes have been counted and reported.

Ranch To Be Host at Big Rodeo

Famous Kansas City Riding Club

The Boys' Ranch Eighth Annual Rodeo will be held in Amarillo to accommodate the expected crowd and the boys are looking forward to seeing all their friends in the Tri-State area.

CANCER GRANTS SENT OUT TO 15 TEXAS CITIES

AUSTIN—Twenty-seven grants of funds for cancer projects throughout the state were made here recently by the American Cancer Society, Texas Division, according to Dr. G. V. Brindley, vice-president and chairman of the Division's executive committee.

The awards, totaling \$137,068, went to cancer diagnostic clinics, information and service centers and other cancer-fighting institutions in 15 Texas cities.

Medically-approved cancer programs in Abilene, Amarillo, Austin, Corpus Christi, Dallas, El Paso, Fort Worth, Galveston, Houston, Midland, San Angelo, San Antonio, Waco, Wichita Falls and Texarkana received the community grants.

Two new projects of statewide importance were also undertaken, Dr. Brindley said.

"A large, room-size cancer educational exhibit at the Dallas Health Museum was authorized. It will be seen by an estimated 200,000 Texans annually who tour

the Museum on the State Fair grounds," he said.

"A grant of \$6,000 to the new M. D. Anderson state cancer hospital at Houston will support the production of four cancer training films for professional nurses," he added.

In a two-day series of meetings, lay and professional committees of the Society met here to allocate funds contributed by the public during the 1952 Texas Cancer Crusade.

Dr. Brindley stated, "Final results of this year's Cancer Crusade will be about \$525,000. This much less than the \$600,000 state goal. Several worthwhile cancer con-

trol projects went without support due to lack of funds."

In addition of the 27 Texas community projects, financial support totaling \$131,250 was granted to the huge nationwide research program which is seeking a final cure for cancer. Also, the sum of \$78,750 was appropriated to the national public and medical education work of the American Cancer Society.

Statewide activities planned for the coming year, including increased cancer education for the public, more volunteer services for cancer patients and purchase of additional literature and films, were granted \$75,249.

Educational grants for the medical and allied professions, including cancer teaching conferences, professional literature and films, to keep family doctors up-to-date on new cancer knowledge, totaled \$22,621.

Commenting on the program outlined, Dr. Brindley said, "Al-

Major Changes Are Listed For Social Security

Many inquiries are being received in the Amarillo Social Security Office regarding the Social Security Amendments which President Truman signed into law last Friday.

John R. Sanderson, manager of the Amarillo Office, states that the following are the major changes:

One: Automatic increases will be made to retired workers already receiving payments. Proportionate increases will be made where several members of a fam-

ily are receiving payments. These increases, which will average about \$5.00 per family, will be noted in the checks received early in October for the month of September. They are automatic and no one now receiving payments need to apply for the increase.

Two: A change in benefit formula, also effective in September, will effect an increase in most claims filed in the future.

Three: Beginning September 1, the new law increases to \$75 a month instead of \$50 the amount of money a beneficiary may earn and still receive the monthly benefits. Self-employed people entitled to payments may receive

them each month of the year if their net earnings during the year are not over \$900.

Four: Social Security wage credits of \$160 for each month of active military or naval service after July 24, 1947 to January 1, 1954 are authorized. This applies even though the serviceman may never have had a Social Security Card, just as was the case in World War II.

In conclusion, Sanderson urged persons already receiving payments not to worry about filling applications for the increased payments. "The increase," he repeated, "is automatic and requires no action at all on the part of those who are receiving payments."

Leslie Attends Convention of State Florists

Will E. Leslie, Leslie's Greenhouse, attended the annual convention of the Texas State Florists Association last week in San Antonio.

Leslie left Sunday, July 13, and returned last Friday. His daughter, Kay, accompanied him as far as Llano and returned with him.

More than 1500 florists throughout of state were in San Antonio for the four-day meeting July 14-17 which is the largest state of regional convention held in the nation, according to Johnny Goldt, chairman of the convention.

The convention sponsors two schools of floral designing where the newest methods, materials and flowers are introduced to the visiting florists and visual instruction is given in their use.

Estelline Student Makes High Grades At Oklahoma A & M

Roy Smith of Estelline has earned a place on the Oklahoma A&M college Dean's List of Distinguished Students for the 1952 spring semester.

Majoring in Agriculture, Smith was among the top 15 percent of A&M's students who made grades averaging "B" or higher in a minimum of 15 college semester hours. Distinguished students must also have records unmarred by "D", incomplete, conditional or failing grades.

Of the 1,400 students who made the Dean's Honor Roll, 56 maintained "A" averages for the semester. Students in the School of Agriculture led all other schools with 374 on the honor roll, 18 with straight "A's."

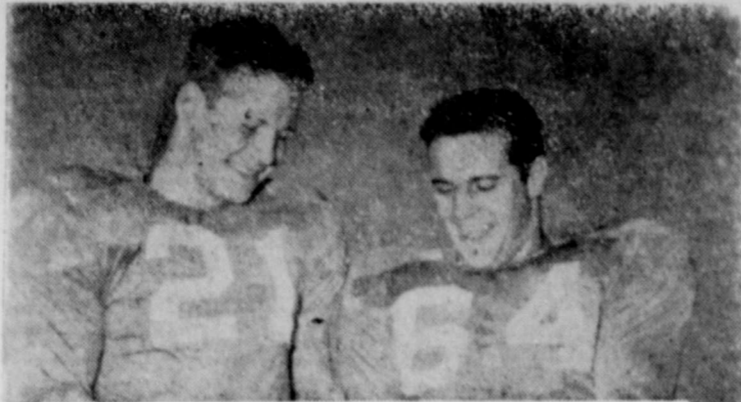

Other honor roll listings by schools and the number of "A" students were: Engineering 276 and 8; Arts and Sciences 266 and 15; Commerce 199 and 5; Home Economics 172 and 8; Education 85 and 0; and Veterinary Medicine 28 and 2.

Cash Farm Income Below 1951 Level

AUSTIN—Texas farmers' cash income for the first five months of 1952 was 5 per cent below that of the same 1951 period, the University of Texas Bureau of Business Research reports.

The fact that marketings of many grain and livestock products fell behind last year's schedules is the main cause of the drop, researchers say. Not equalling 1951 results were oats, corn, grain sorghum, peanuts, cattle, calves, hogs, sheep and lambs, wool, mohair, and eggs.

Balancing those declines were increased sales of cotton (214 per cent), cottonseed (153 per cent), wheat (748 per cent), poultry (19 per cent), milk and milk pro-

YOUR VOTE FOR EDWIN HUTCHERSON

For Commissioner of Precinct No. 1

Will Be Appreciated

When I announced my candidacy for Commissioner of Precinct I in Hall County last February, I did so believing that I was fully qualified to serve. During the months I have campaigned for this important office, I have received much support for which I am thankful.

To review again the reasons I am qualified to handle the affairs of this county: I was born and reared on the farm south of Memphis where I reside today. In 1928 I graduated from Memphis High School, then attended college at Midwestern University and at Texas Tech where I majored in agriculture and minored in business administration. I believe I know first-hand the problems which confront this area. If I am elected as your Commissioner, I promise that I will devote my full efforts to this job. It shall be my intent to make the upkeep of the dirt roads in my precinct my No. 1 job. I recognize that county affairs are big and complex. For this reason, I promise to do all in my power to give Hall County a BUSINESS-LIKE and honest administration. I shall watch where the taxpayer's dollars go, and intend to get a dollar's worth for every dollar spent. No waste of county funds will be tolerated.

It will be my intention, if I am elected, to cooperate with the other members of the Commissioners Court, and I shall welcome the chance to discuss problems with any person at any time.

I RESPECTFULLY SOLICIT YOUR CONSIDERATION OF ME WHEN YOU CAST YOUR BALLOT NEXT SATURDAY

PLEGGED TO LAW ENFORCEMENT

I will continue to serve you as County Attorney, trying at all times to carry out the duties imposed by law under the oath of this office; and to merit the honor, privilege and confidence placed in me in the past. Record for year 1951: Disposed of over 600 cases, less than 10 acquittals or mistrials, returned to county over \$2500.00 in excess fees.

I am making an effort to contact each voter but should I fail to have the opportunity to talk with you personally, I am asking you at this time to consider my candidacy for a SECOND TERM.

are going forward this according to J. A. Odom, Jr., who presented the hospital proposition to the Turkey group.

"Turkey seems vitally interested in the hospital plan," Odom said, "which calls for establishment of branches in both Memphis and Turkey. They have a splendid plan that can be converted into an excellent little hospital of about 10-bed capacity at a very reasonable cost."

J. W. Coppedge, Clifford Farmer Invited to Meet

J. W. Coppedge, president, and Clifford Farmer, manager of the Memphis Chamber of Commerce, have been invited to attend a meeting of the Community Services committee of the West Texas Chamber of Commerce July 30 at its Abilene headquarters, according to Bill Collyns of Midland, chairman of the committee.

Committee members include the presidents and managers of the local chamber of commerce of the 132-county WTCC territory, and several dozen others.

Ralph E. Duncan is manager of the Community Services department, for which the committee is the policy-making body.

Collyns said purposes of the meeting are to report the department's activities, to plan its work, to announce tentative plans and dates for a Short Course for Chamber of Commerce managers and office secretaries, and to inform the local presidents and managers of services available from the department.

For every 50-caliber machine-gun bullet fire at the enemy in Korea by the U. S. Air Force, the oil industry has had to supply almost two gallons of fuel. The Air Force consumed more than 150 million gallons of fuel from the start of the conflict to April 1951.

JUDGE JOE S. MOSS

Law Can Be In Plain Language

A document signed by a county citizen may sometimes be interpreted by a court of Civil Appeals at Dallas. In over 41 years the law has existed, it has decided six thousand civil cases. It is to the interest of the people of Hall county that the men of the people at high court. Judge Moss of Graza county says that legal papers and filings should be in the hands of the people, rather than in the hands of lawyers. Judge Moss will help simplify and speed up the machinery of the law for the people who know the law. A Civil Court. Paid by (Joe S. Moss.)

There also seems to be the impression, Odom said, that the doctors of Memphis will support only the plan suggested by them. He pointed out that the doctors advanced what they considered to be the most feasible plan from an economical standpoint, but would favor any plan that would give the people of Hall County adequate hospital facilities.

The owners of the hospitals in Memphis had suggested that the county purchase the Odom Clinic Hospital and the furniture and equipment of the Goodall Hospital and enlarge these facilities to meet the needs of the community. The Turkey hospital was included in the plan in order to provide hospital facilities in both medical centers within the county.

Odom said that the precinct committees are being organized this week and that a county-wide meeting will be called in the near future, possibly next week.

Turkey citizens who attended the meeting there included R. B. Meacham, Lewis Eudy, G. O. Coker, J. B. Bush, Cole Boswell, Byron Young and Harry Barnhill.

Mr. and Mrs. Zeno Lemons and children of Memphis joined his relatives in the Clarendon City Park Wednesday night of last week for a picnic. Others enjoying the affair were Mr. and Mrs. E. F. Lemons, Mr. and Mrs. M. H. Lemons and girls, all of Clarendon; Mr. and Mrs. Herman Cross and Annette of Goodnight; and Mr. and Mrs. J. R. Reed and family of Cleveland.

Dr. and Mrs. Alfred Freeman and family of Wichita Falls spent Sunday night with their mother, Mrs. M. McNelly. They were on their way to vacation in Montana.

Gov. Shivers Answers Opponent's Charge On Scuttling Rural Roads

Governor Allan Shivers this week accused his opposition of making "fantastic" charges in a last-minute effort to minimize the greatest farm-to-market road building program in Texas' history.

"The record shows that during my administration, there have been more miles of paved roads completed in Texas than at any time in history," Governor Shivers said. "And this is just the beginning—the program is just getting started."

"Yet in a desperate effort to confuse the people, this Washington-picked candidate for governor has plucked a lot of figures out of thin air, pieced them with some utterly ridiculous conclusions and passed them out as true facts."

Governor Shivers said that a tabulation of the distribution of state highway use tax money to counties revealed that \$837,755

had been channeled to Hall county for road building purposes in the county during the Shivers administration.

The figures show that since Shivers became the state's chief executive, a total of \$289,820 had been spent or is being spent in Hall county for the construction of 23 miles of farm-to-market roads. In addition, the expenditure of \$173,200 for 12 more miles of paved rural roads has been authorized for this county and construction will begin in the immediate future.

These figures prove conclusively that the Shivers administration has consistently supported local governments in their efforts to give rural areas paved roads it was stated.

Governor Shivers has repeatedly said that he favors a paved road within sight of every farm and ranch house in Texas. The fact that the state already has plans to build 12 more miles of farm-to-market roads in this county alone is proof enough that there is going to be no let-up in the road building program in this county, it said.

A breakdown of benefits received during Governor Shivers' administration by this county from highway tax money further shows that the county has received \$181,308 in license fees, \$56,768 has been paid this county in road bond funds, and \$136,658 paid by the state to retire bonds for this county.

The figures above do not include money spent by the state to build primary or main highways in this county.

State-wide since Governor Shivers took office, the state has spent \$102,797,972 for the construction of 7,832 miles of farm-to-market roads. Still to be built for which \$45,385,900 has been authorized are 3,654 miles of additional rural highways.

The figures released and quoted here confirm the fact that Governor Shivers has fought for and will continue to fight for more paved rural roads for every county in the state, it stated.

The figures were compiled and statement issued before Governor Shivers left for Chicago to attend the National Democratic Convention.

product by three and four cents a pound. He said members of the commission told him that America would have to reduce its protective tariff on imports before other nations could trade on an equal basis with American merchants and producers.

Morris said that all the cotton merchants in Europe were well informed on the American economic situation.

In concluding his highly interesting account of the trip, Morris said that the experience was interesting, although "I found some things that rocked me back on my heels."

"If you were to make the trip, he told the Rotarians, "you would undoubtedly come home thinking a good deal more of the U.S.A."

before pressure from the Roman Catholic forced them to cease those activities.

He reported that an orphanage for boys at Frascati near Rome was still operating despite three attempts by the Catholic Church to close it.

"Two great powers were on our side to prevent the closing of the orphanage—God and the American Consulate," he said.

Min. Paden said that the Catholics called the missionaries "Communists," and that the Communists accused them of being American spies.

He said that the Christian Democratic government is not democratic in any sense of the word.

The Church of Christ has established 18 congregations in Italy, and a training school for native preachers has been set up in Milan.

There are only seven other Protestants in Italy. These include Waldensians, Baptist, Methodist, Seventh Day Adventists, Pentecostal, Christian Science and the Church of the Fratelli. The latter is a sect peculiar to that country.

The Padens plan to return to their mission in Milan in October. Both are native Texans and were reared at Idalou. Two of their three sons were born in Italy.

examined by a local doctor before giving blood. The unit personnel will make an examination, she said. Persons with jaundiced blood or in poor health will not be permitted to give blood.

H. J. Howell, chairman of the Red Cross county chapter, said that donors signing pledges should specify the time they will be available to be present at the unit headquarters. Doors will open at 8:30 a.m.

Red Cross officials here urged all Hall Countians to participate in the blood program. Persons desiring to give blood can contact any of the above mentioned officials or get pledge cards at the Chamber of Commerce office, banks, or from any of the B&PW Club members.

Mrs. Seale said that she still needs volunteers to help at the blood unit. Women will be needed that day to serve as hostesses, etc., at the Bloodmobile.

Clubs and organizations participating as a group in the drive will receive a citation if at least 35 per cent of their membership gives blood. Names of donors will be inscribed.

Every donor will receive a small red pin resembling a drop of blood inscribed with the words: "I Gave."

each. Ed Mathes, Jim Fowler, Scotty Grundy and Bill Hickey also got hits. Mathes was winning pitcher.

In a high scoring game here Tuesday night, the local nine again had to come from behind to win with three runs in the ninth inning, 13 to 11. The first inning gave a clue as to the sort of game that was to unfold before the last ball was pitched. Clarendon batted first and tallied four runs off a walk and three Memphis errors. The Owls made a race track of the diamond when they came to bat, pushing across six runs off two hits, a walk and three errors.

Both teams played sloppy ball most of the game. Clarendon regained the lead in the third inning, but relinquished it again in the sixth. Memphis was leading going into the eighth inning, but Clarendon pushed across two scores in that inning to lead, 11 to 10. Memphis got three runs in the last inning to take the victory.

Business manager, Claude Hickey announced that the Owls are entered in a tournament at Tur-

Let's Vote For The Best Qualified Man

Hall county and surrounding citizens never go wrong voting for the best qualified man in any race. In the recent poll taken among the lawyers of the 46 county district by the State Bar of Texas, to ascertain their views as to the qualifications of the various candidates for Associate Justice of the Amarillo Court of Civil Appeals, Judge Joe S. Moss of Post, received 176 votes to 161 for all three of his opponents, a clear majority over all of them.

Judge Moss has devoted his twenty years of civil practice to the simplification of the law so the average citizen can understand it. Even the lawyers themselves have endorsed his program.

Let's vote for the best qualified man. Vote for Joe S. Moss. A civil judge for a civil court.

Yes, we'll agree it's a dull chore. It's boring.

But every home owner ought to take time to make an inventory of his household furniture, clothes, books, etc. Now, tonight.

The average home owner guesses only a fraction of the real value of his things. The reason is, he acquired them one at a time over a period of years.

You should KNOW the worth of your possessions and increase your fire insurance on them to cover replacement at today's prices.

Don't guess. Make a list.

MISS ZADY BELLE WALKER—Stephen F. Austin Elementary School principal of Memphis, puts the finishing touches on a papier mache giraffe created in an art course at West Texas State College.

Miss Zady Belle Walker Creates Papier Mache Giraffe At WTSC

CANYON (WTNS) — Doing "What comes naturally" in art, the way children would do, can be a lot of fun and brings out artistic ability previously non-existent, a group of elementary teachers have discovered this summer at West Texas State College.

Learning art from a child's viewpoint will help teachers guide activities in class which will bring out freedom in creativity among their pupils, said Alfred G. Kieselbach, assistant professor of art, who has been showing about two dozen teachers how to help children grow through art experiences.

Among those who have found satisfaction in such media as papier mache, finger-painting, clay modeling, crayolas, and water color, is Miss Zady Belle Walker, Memphis, principal of Stephen F. Austin Elementary School. She is working toward her masters degree in elementary education.

Miss Walker has just completed a life-like spindly-legged giraffe, which despite its papier mache

body, looks as though it ought to be in a zoo. She is proud of her creation, and will probably devote all her spare time molding delightful figures from old newspapers and paste.

The "Public School Art" course, primarily for non-art students, is designed to teach the teacher to teach children how they may attain independence and security in their own thinking through art processes adapted to special age groups, Kieselbach said.

"Art to a child is different than to an adult. The general growth of the child, the art process, and the end product are bound into the whole picture of creativity," Mr. Kieselbach said. "Self-expression is that mode of expression in regard to age of the child."

Nolan Baker of Fort Worth, a former Hall County resident, visited here last week with friends and also checked on his farming interests in the Deep Lake community.

Truth Seekers Meets in Home of Mrs. Wm. Gerlach

The Truth Seekers Sunday School Class of the First Methodist Church met Thursday, July 10, in the home of Mrs. Wm. Gerlach with Mrs. C. Gerlach as co-hostess for the regular monthly meeting.

The meeting opened with the class song, "What a Friend we Have in Jesus." Mrs. Pearl Massey brought the devotional using for her text the 100th Psalm. Mrs. C. Gerlach gave a reading, "How a DP Looks at America." Mrs. C. E. Hankins conducted the Bible lesson. Mrs. A. B. Jones, secretary, read the minutes of the last meeting. The meeting closed with the Lord's prayer in unison.

Refreshments were served to the following members: Mmes. J. B. Wren, L. G. Yarbrough, C. E. Gowen, Anna Dickson, J. R. Cannon, A. B. Jones, Pearl Massey, C. E. Hankins, Henry McCann and the hostesses.

Former Memphians Get Together For Reunion in Calif.

On Sunday, June 29, several families from Memphis, now residing in California, had a picnic in Roxbury Park, Beverly Hills, according to a letter received this week from Mary Winston Hirdler.

Mrs. Hirdler stated the hours passed rapidly as friendships were renewed and introductions made to "spouses," children and grandchildren.

Mrs. Hirdler, who resides at 1219 1/2 Ocean Park Boulevard, Los Angeles 64, was hostess for the affair and she stated that she would like to hear from other families interested in joining the group at the next reunion.

Attending the June reunion were Mr. and Mrs. Jett R. Fore and family, Mr. and Mrs. Frank K. Fore and son, Mrs. W. W. Clower, A. J. Clower, G. H. Hall Co. Farmers Supply Features Nash and M-M Sales and Service

Hall County Farmers Supply, gasoline powered tractor, as well as other M-M tractors and complete line of Minneapolis-Moline farm equipment including combines, drills, and plows of all kinds.

The Nash Motor Company is celebrating its 50th anniversary with some of the best-performing and smartest-looking cars on the market. Hall County Farmers Supply, as the exclusive Nash dealer here, has all the models on hand as well as Nash parts and repair service.

The two economical aristocrats of the highways, the Nash Ambassador and the Nash Statesman, feature the ingenious convertible beds. The popular little Nash Rambler has at last given America a bargain in the small-car field being devoted to the supply business.

Owned jointly by Dick Shelton and Jim Anthony, who started the fast-growing firm in June of 1951, Hall County Farmers Supply started out with only Minneapolis-Moline equipment. The partners acquired the Nash dealership last December.

Most popular of the M-M tractors sold by the supply company is the versatile Butane U. Another popular tractor with farmers in this vicinity is the Butane Z. Hall County Farmers Supply also handles the dependable model B-F, a

For appearance, economy and versatility, it outdistances the others in its field. An extra feature, reclining seat are optional in the Rambler.

Co-owner Jim Anthony, 42 years old and high school here in 1929, finished Georgia Tech for two years. He farmed in Hall County from 1931 until 1946. For the next five years he lived in California, working in the giant Shasta Dam on the Sacramento River.

Anthony returned to Hall County in January of 1945 and went back to farming in the Plasko community. He is still farming the same land, although most of his time since June of last year has been devoted to the supply business.

Agriculture

Released by
The Texas Department of Agriculture

One thing is certain this season. Due to mild winter, Texas may face one of the worst insect infestations in the last 20 years. And, of course, we must constantly practice those conservation measures which will keep our soil in top notch shape.

A heavy volume of pesticides and fertilizers are expected to be needed this year to support the high-level farm out-put. Farmers are urged to order their supplies well ahead of time for applying these essential production materials. A last minute rush would tax industry's ability to fill orders and the channels of transportation from factory to farm.

Total requirements this year for pesticides, including insecticides, fungicides and herbicides are expected to run about nine per cent higher than in 1950-51. On the whole, supplies should be equal to the demand and prices generally are not greatly different from those of a year ago.

The United States Department of Agriculture reveals that supplies of pesticides copper and sulfur may be sufficient to fill all demands but alternate materials will be generally available. Lead arsenate supplies, critically short earlier in the year, are improved. Farmers should be able to get sufficient quantities of weed killers such as 2,4-D and 2,4-5-T.

A generally strong demand for fertilizers has put pressure on the nation's soil building supplies. Fertilizers on the whole are slightly more plentiful although a little less phosphate is expected to be available than last year. Because of a high demand for ammonium nitrate and phosphates, those supplies will be somewhat tight. Potash will be fairly plentiful.

Mr. and Mrs. J. E. Norman and daughter Janet visited here Sunday night with Mrs. Norman's sister, Mrs. Herschel Combs and family they were enroute to their home in Spur after spending the week end in Wellington with relatives.

Shivers Agin Auto Inspection Law; "Shall Change It or Repeal It" He Says

By Ben Kaplan, Press Staff Writer

Governor Allan Shivers today said that the new auto inspection law should either be modified or repealed.

The Governor told the Press before he left Austin for Houston to make a campaign appearance that he had some ideas for changing the controversial law.

His idea is to take the red tape and confusion out of the law.

"The law was intended to bring about real safety and not inconvenience," said Governor Shivers.

"We need to stop killings on the highways. Texas has become the number one State in the United States for murder on the highways.

"The Legislature passed this inspection law by a vote of 117 to 12 in the House of Representatives and 19 to 9 in the State Senate, with the thought that it would save more than 200 Texas lives each year. If the law fails to do this and instead causes confusion and inconvenience, it ought to be changed or repealed."

The Governor said that he would recommend to the next session of the Legislature that it re-study and examine this law in view of the experience and either modify or repeal it.

(Several months ago, when it became apparent that the new law was causing inconvenience and confusion, Governor Shivers ordered it suspended until it can be reviewed by the Legislature.)

Locals and Personals

Mr. and Mrs. Gerald Garrison and family visited with Mr. and Mrs. John Lindsey of the Lesley community over the week end. The Garrisons were en route to their home in Pampa after visiting in Paris.

Mrs. Ted Trulove and children visited in Quanaah over the week end with their husband and father.

THEN and NOW

On the first day I served you as County Judge the county debt, including school debts, was, as follows:

| | | |
|----------------|-------------|--------------------|
| \$1,791,000.00 | \$98,050.00 | Interest: \$306.85 |
| 653,000.00 | 23,085.00 | 105.38 |

This \$1,138,000.00 is now paid in full as of January 1, 1952

The \$105.38 interest rate per business day on the first day of this year, \$98.19 per day is paid through the State Road Indentment out of the so called "1-cent gas tax" fund, leaving \$7.00 per day to be paid out of taxes on local people and property which includes the courthouse bonds.

The relief we have had come from the Bond Assumption Act passed by the Legislature. It may be said that I was the first County Judge in the State who openly supported the bond assumption principle as one just, fair and merited on its principles. The burden on people "down at the grass roots" was lifted. I was after. They are the people who have the fewest responsibilities in legislative work.

It has been my whole work in the past and will be as long as I live. I want burdens made lighter rather than heavier. Numerous like items on a smaller scale have been supported by me with no exceptions.

The above lifts the veil so you can see how I work and the things that drive me on. I do not vary from this policy.

In soliciting your support in the primary, I am

Respectfully yours,

M. O. Goodpasture

In any way of explanation, I will state that my public service takes up all my time. Therefore, I am not canvassing or soliciting except through the press. Electioneering is a full time job within itself. I simply cannot carry two loads at once. Hope you will excuse me.

Re-Elect ALLEN HARP District Attorney Second Term

REPORT FROM WASHINGTON

Congressman, 18th District
By Walter Rogers

COMMUNIST PARTY MEMBERSHIP: Here are some facts and figures concerning Communist Party membership in several countries. It must be remembered that all communists and communist sympathizers do not enroll themselves in the party records. Therefore these figures probably represent a minimum of the "pinks" in those countries.

Belgium: Before 1939 known communists in Belgium were estimated to number about 9,000. Increases during World War II lifted the estimated total to 95,000 in early 1947. In the first postwar general elections held in February 1946, the communists received 300,000 votes, which probably represents the combined strength of the communists and their sympathizers. Since 1947 there seems to have been a decline in Belgian strength.

France: In 1936 communist party membership in France showed only 100,000 enrolled, but in the elections, held in April of that year, communist candidates receive about 1,500,000 votes, which is indicative of the fact that many voters are sympathizers and supporters of the movement even though they refuse to be identified as communists. Early in 1937 party membership increased to some 300,000, but in 1939 the government outlawed the party. It went underground, and probably lost initially in membership as well as in sympathizers.

In the first postwar elections, held in November 1946, communist candidates received 5,004,121 votes of a total 19,661,515 cast (or better than 25 percent), and the party elected 173 members to the National Assembly, the largest single group among the 619 deputies. In the 1951 elections, however, communists lost considerably in the National Assembly (they secured 97 seats out of 427) and the also lost in the popular vote, receiving about 4,800,000. Present party membership figures are not known, but the total is probably somewhat (or perhaps considerably) less than the 1,300,000 figure given for the year 1947.

Italy: In the early 1930's the illegal communist party in Italy was literally smothered by the government and its leader, Palmiro Togliatti, fled to Moscow. Subsequently, several attempts were made by other underground communist leaders to form a "united front" with the socialists against Fascism. Such a front was established and was very active during the war. After the fall of Mussolini (late in 1943) committees for national liberation were set up in many parts of the country; communists formed the spearheads of these committees. After the war membership in the communist party multiplied rapidly until today there are more than 2,000,000 Italian citizens enrolled.

Turkey: Communists have never obtained a foothold in Turkey, whose government has exercised the strictest measures of control over them. Before the war they were suppressed, even though Turkey was on friendly terms with the Soviet Union. In 1946 there was some relaxation of control and the Turkish Proletarian and Peasant party was formed. It is estimated that the party's membership then totalled about 35,000. But late in that year this party, as well as other newly organized opposition and labor groups were again suppressed. Today there is no communist movement in Turkey; at least none that is allowed to function openly.

Yugoslavia: In Yugoslavia, communists govern the country with

absolute and unquestioned power. During the last quarter century they have not been numerous, and even today their number is estimated at only about 150,000 or somewhat less than one percent of Yugoslavia's population. Before the war the communist party was banned by the government, but communists had an underground organization. This organization was active during the war years, and before war's end communists were in practical control of the country.

In the first postwar elections the Peoples' Front party (a combination of communists, several socialists, peasant, and other left-wing parties) received 6,725,047 votes, or 88.6 percent of the total votes cast. This is the group which, under communist leadership, has obtained absolute political power in the country. In the last general elections, held in March 1950, the government claimed 9,059,193 votes or more than 93 percent of the total votes cast. But these figures do not give any indication of the number of persons enrolled in the communist party. As stated previously the total may not be much in excess of the estimated 150,000.

NEW GI BILL

Unheralded, but vitally important to the men who have gone into service since the outbreak of the Korean War, was the recent passage of the new GI Bill. Truman signed the bill last week. Now, the new vets will get similar benefits to those received by the veterans of World War II.

The new law provides five benefits, all designed to assist veterans in their return to civilian life. Included are education and training; guaranteed or insured loans for homes, farms and businesses; unemployment compensation; mustering-out pay, and job finding help.

One of the men in Congress responsible for this fair and just bill is Congressman Walter Rogers of this district. Another Texas Congressman who did much to make sure that the government and the ex-GI's will not be "taken in" by disreputable persons and fly-by-night schools is "Tiger" Teague of Bryan. Texans can be proud of the work done by these Representatives on the new GI Bill.

The government is not going to be as liberal to the new vets as it was to their older brothers of World War II vintage. But, it seems a fair piece of legislation that not only seeks to repay patriotic citizens for their service, but to make adequate compensation for the months and years gone forever out of their lives.

A lot of people begrudged the benefits reaped by the World War II veterans. And, perhaps, in the sobering aftermath of war, it did seem that many benefits were given in extravagant measure. Certainly it was going against all tradition for the government to pay unemployment compensation to ex-soldiers, to provide them with college educations, to care for their physical ailments, (incurred in service), and to guarantee loans on homes and businesses.

Many said that it was the patriotic duty of those taken from their families and jobs to serve without reward. They said that patriotism was a commodity that could not be bought. And they were right—these patriots of the "home front" who survived the rigors of sugar, gas, and meat rationing.

All of the money in the world is not important to a man who faces death—and every man who dons a uniform in time of war stares death in the face! If need be, he is on duty 24 hours a day—and there is no over-time pay on the battle field. It's a little rougher than working in a defense plant and going without tires.

Yet, it is true that patriotism cannot be bought. The men who "have been there" realize this better than anyone else.

But on a very pragmatic basis—and we Americans are renowned as the most practical people on earth—the men who give up their careers and jobs for low pay, hazardous duty, and possible death are due some sort of compensation. Their service pay—even when supplemented by blackmarket change—could not begin to equal the money made by war workers, war profiteers and cost-plus contractors.

How then could a civilian, safe and sound all during hostilities and without pockets bulging with money made because there was a war on, proclaim that patriotism is too sacred to be purchased!

The vets of the Korean War deserve every penny they will receive, and the vets of World War II will be the first to say so.

"KING FOR A DAY"

Press Paragraphs—

QUOTING OUR NEIGHBORS

Qualified to Serve

A candidate who can put the needs of the people on the South Plains before the interests of a selfish few is a candidate named Andy Rogers.

Andy, who lives in Childress, is a candidate for the office of State Senator for the newly created 30th district embracing a number of counties on the South Plains.

A young man, with experience as a law maker and owing allegiance to no group except to the voters of the 30th district, Andy is the most eminently qualified candidate in the race.

Calling for an awakening of faith in the ideals of American Democracy, Rogers like Price Daniel, seeks to put the government of the United States in the hands of the people of the United States through responsive representatives.

Andy is waging a clean campaign, using his record and the testimonials of those who know him for his honesty, integrity and character, he is seeking office, and will be elected to that office. —County-Wide News, Littlefield, Texas.

Droughts and Dances

The current drought has been compared to the one of 1934, but some folks say it is even drier than in those dust storm days. That we are not having the black blizzards of that year are not due to any greater rainfall than in those days, but perhaps is because of better grazing and farming

practices. Certainly the wind has been blowing just as strong the past month or so as it did during the dusty days.

Down at Wellington, where they plan a reunion of all high school graduates in the near future, they have hired none other than Harry James and his orchestra to play for the event. This is big city stuff and we wonder how they do it. Here in Perryton, we know that any organization bringing a name band would lose money on the deal, except perhaps at celebration time of fair time.

—Harold Hudson in The Ochiltree County Herald.

Plenty of Candidates

Candidates for the Democratic nomination are becoming as thick as fleas on the back of the proverbial dog.

Here comes Sam Rayburn who says that he is available. Sam has an opponent down at Bonham, and possibly his announcement will help him win.

A few days ago Veep Barkley announced that he was candidate. He is 74 years old.

There are a large number of minor candidates. The man who has made the longest campaign is Senator Kefauver. When the convention is held in Chicago they will probably pull the same gag on him as we pulled in Taft—"Harry was also a Senator."

We have plenty of candidates in the making, which is a better situation than the one confronting the Republicans with only two strong candidates who fought for the nomination.

Floydada Paving

Good Argument for paving are the mud holes which freely dot a good many important residential streets of the community. Heavy rains during the week have accentuated some of these holes the citizen drives his fine new automobile through in low while he saves his \$200 and a dime. Time is flying, the contractor is getting on the

job late and still has to deal with the weather, which can be cantankerous in this latitude. On Highway 70 the state highway department's plans have been made more ambitious, after study of the situation. The department wants to re-do the street through the length of its nearly two miles inside the corporate limits. The work can't possibly be done this year. But the property owners are offered a bargain by the city and state to join in with curb and gutter next spring. Floydada is a pretty hard looker to the man driving through for the first time. His impression doesn't improve as he views the other streets with many good looking homes completely surrounded by mud or dust.

Re-Elect Sybil Gurley TO THE OFFICE OF County Clerk

I want to use this means of asking the voters of Hall County to support me when they go to the polls on Saturday, July 26th. I have failed to see some of the citizens of this county, although I tried to. But, due to duties in my office and illness in my family, I have not been able to talk to as many persons as I wanted to. May I use this method of soliciting your support when you go to the polls?

I certainly appreciate the support of the people of Hall County in the past. You have made it possible for me to serve as your County Clerk. In turn, I have tried to do my work the way you wanted it done.

CAN you imagine parking a car as easily as you steer it on a straight-away?

You twirl the steering wheel with one hand—turn the front wheels until you get the last inch of advantage from Buick's short "turning radius"—spot the car in a tight spot at the curb—or swing out when the car parked in front of you seems impossibly close.

For this alone a lot of people—especially women—are saying that Buick's Power Steering is the biggest advance since Dynaflo Drive.*

But you're going to find out something more as you pile up the miles.

You're going to feel the same confident

and thrilling sense of command you have always felt in a Buick, because Power Steering only goes into action when extra effort is needed to turn the wheels.

You're going to find that your front wheels track just as they always have—that they automatically swing back on course, after you've made a turn, when you ease your grip on the steering wheel.

You're also going to find that Power Steering takes over when your front wheels hit loose dirt or sand—road irregularities and chuckholes—and smooths down their jerk or tug on the wheel in your hands.

All this adds to the ease and pleasure of driving. But it adds to the safety, too,

because, in the rare event of a blowout, Power Steering helps you keep control. There's no sudden and violent jerk ever when this helping hand's on the job.

Add to this the level-gaited serenity of Buick's Million Dollar Ride—the "rarin' to go" exuberance of its Fireball 8 Engine—the spread-out room, the luxurious fabrics—the way this great performer can turn up its nose at gas stations—and there's only one smart thing for you to do:

Drop in — or pick up your phone — and arrange to give this marvel a tryout. Even the price says, Better buy Buick now.

Bones of Human Body Have Variety Of Essential Duties To Perform

Action of the body ultimately lies in the power of the bones of the body to move and create locomotion. The bones may be considered the tail end of a chain reaction, a chain set off by the cranial nerves, carried to the spinal nerves, carried to the muscles, and then carried to the bones, which act.

When they're not acting, the bones have plenty of other work to do. They are the framework of the body, the girders and cross beams and such that keep the structure together and intact. The bones are the armor for parts of the body, the brain, the spinal cord, the heart, the lungs, the liver and the bladder all having bony shields which protect them. The bones are part of the blood manufacturing system of the body, with their insides, the marrow, the factory for blood cells. And the bones are the storehouses for calcium and phosphorus.

Bones can be described in many different manners but for the most part the ones that make up the main frame are called axial bones and those that are stuck on to the frame are called appendicular bones.

The axial bones are the skull and face bones, the spinal bones, the ribs and the breast bone. They are usually flat bones of irregular shape.

The appendicular bones of the arms and hands, legs and feet are usually called either long or short bones. Long bones are tubular shafts which are mainly used as levers for the muscles. Short bones look more like a disc, having six

sides and being cube-shaped. Flat bones are sandwiched-shaped, two layers of solid bone with spongy bone and marrow in between.

Bones are not like pillars of cement stuck around to hold up a building if you can visualize the pillars of cement as growing things and the building as a constantly changing structure, then the similarity between cement and bone is a bit close.

Thus, bones are living things, constantly undergoing change, constantly receiving food from the body and depositing waste to be eliminated from the body. Bones have blood vessels, lymph vessels and nerves. They grow. They are subject to disease and injury. When they break they heal themselves.

When the part that a bone supports becomes paralyzed or fails to function properly, the bone undergoes change, too, becoming smaller. When the part that a bone supports becomes heavier bones become thicker and stronger.

About two-thirds of a bone is a fiber, a dense elastic sort of thread and cell which makes this bone flexible and tough; this is called organic matter. The other third of a bone is made up of inorganic salts, calcium, which makes bones hard and rigid. That calcium can be removed from the bone by placing the bone in a mineral acid, leaving only the organic material; without the inorganic salts the bone can be tied in a knot, springing back into bone-shape when it is untied.

On the other hand, the organic

material (elasticity) of the bone is removed from buried bones, leaving only the salts; this leaves brittle bones that will break unless carefully handled, the kind that archeologists study. Bones that have been buried a long time in rich mineral soils usually retain some of their firmness, not becoming as brittle as those buried in common earth.

For A Second Term ALLAN SHIVERS FOR GOVERNOR

THE TRUTH ABOUT OLD AGE ASSISTANCE

Governor Allan Shivers wrote and helped pass the first Old-Age Assistance Law in Texas.

He stands for equitable distribution of funds for the needy.

Two years ago he was one of the leaders who tried to get more money for the aged, a cause that failed because the voters disapproved a constitutional amendment.

Governor Shivers has, in the past and will in the future, advocate making available to our deserving aged citizens not merely enough for a meager existence, but sufficient funds to carry them through the evening years of life as proud, dignified citizens.

An increase of \$5 in each pension check is due next October.

THE TRUTH ABOUT COUNTY ROAD FUNDS

Farm-to-market road building has been the greatest in history during the Shivers administration.

During Governor Shivers' administration, Hall county has received \$837,755 rural road benefits from state highway user taxes as follows:

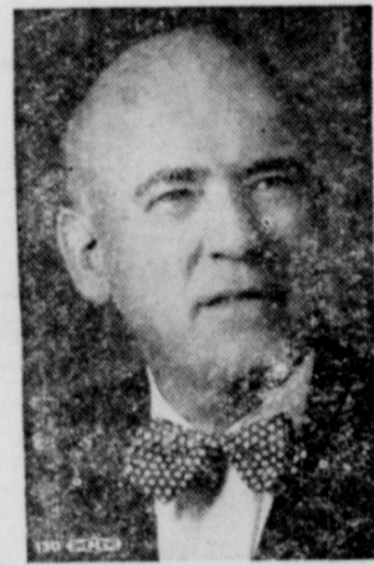

License fees \$181,308, road bond surplus \$56,768, bonds paid \$136,658, construction of farm-to-market roads \$289,820, authorized but not under construction \$173,200.

In this county, 24 miles of farm-to-market roads have been built, and an additional 12 miles have been authorized for construction, for a total of 36 miles.

Governor Shivers' administration has consistently supported the Hall county road building program and will continue to do so in the future.

Together we will continue to build a greater Texas Allan Shivers

RE-ELECT

Olin Culberson RAILROAD COMMISSIONER

Since the Railroad Commission of Texas is YOUR business, and since such BIG business—we want you to know more about it.

Besides its regulation of Texas railroads, did you know that the Railroad Commission supervises the vast oil and gas industries which pay \$122,000,000 in taxes to the State? More than 136,000 oil wells, producing BILLION barrels of crude oil last year, and 85,000 wells, producing TRILLION cubic feet of gas, are regulated by the Railroad Commission. Did you know that 23,611 motor trucks and buses, operated by hundreds of owners, get their authority to operate as public carriers from the Railroad Company which regulate them?

Did you know that the tremendously expanding butane and propane industry with more than 423,000 installations in small towns and on farms, is regulated by and under rules prescribed by the Railroad Commission, and for YOUR protection all butane tanks must meet safety specifications down by this Commission?

The regulation of companies serving natural gas to Texas homes is also under the Railroad Commission. The 1,330,516 meters serving millions of citizens, represent investments of hundreds of millions of dollars in a multi-million dollar business.

Did you know that in the past ten years there has reverted to the State Treasury \$8,000,000 SAVED by the present Railroad Commission administration of this office and these industries?

Noy you see that the Railroad Commission is BIG business, and thorough working knowledge of ALL the problems which confront the industries, is VITAL to you as a voter, and to all Texas. Since THERE IS NO SUBSTITUTE FOR EXPERIENCE, and OLIN CULBERSON has the experience you and Texas honestly and efficiently, I urge that you give him your endorsement on July 26th.

Re-Elect OLIN CULBERSON, Railroad Commissioner.

WE RECOMMEND HIM TO THE PEOPLE OF OUR COUNTY
