## DENNIS JOINS ENGINEERING FIRM

**STEVE A. DENNIS**

Steve A. Dennis has joined the staff of the Midland civil engineering firm Parkhill, Smith & Cooper, Inc. Dennis is a registered professional engineer in Texas with 18 years of experience in the planning and design of public works projects.

As a Project Manager with Parkhill, Smith & Cooper, Inc., Dennis will be working primarily on airport, water and wastewater, water resource development and drainage projects. Parkhill, Smith & Cooper, Inc., presently has a staff of nine in its Midland Office.

Dennis joins the firm

after eight years with an Odessa consulting firm and six years with a Houston consulting firm. Prior to that time, he served two years with the Peace Corps in Panama and two years in the U.S. Army, including a tour of duty in Vietnam. Dennis earned both master's and bachelor's degrees in agricultural engineering from Texas Tech University.

Dennis is a member of the Texas Society of Professional Engineers as well as a number of national professional and technical organizations. He is a licensed pilot and holds membership in the Aircraft Owners and Pilot Association as well as other aviation groups. Active in many Permian Basin community groups, Dennis was named Odessa's outstanding volunteer for 1987.

In addition to its Midland office, Parkhill Smith & Cooper, Inc., has engineering offices in Lubbock, El Paso and Austin. The firm is listed among the top 500 design firms in the United States by the leading industry publication Engineering News-Record.

## TEXAS TRAUMA AWARENESS WEEK

### MAY 22-29

Trauma - preventable injuries - is the leading killer of people under 44 in Texas and across the nation. Texas Department of Health reports that in 1986 there were 4,440 accidental deaths of people ages 1 to 44 in Texas. May 22 through 29 is Texas Trauma Awareness Week and Gene Weatherall Chief of the health department's Bureau of Emergency Management, has urged local emergency medical services to bring attention to the fact that trauma is preventable. "Motor vehicle accidents, burns, drownings, gunshot injuries - none of these has to happen", says Weatherall "EMS and ambulance firms provide important public service when they help to educate families and children about preventing accidents and trauma."

Here are some specific trauma prevention suggestions:

**Motor vehicle accidents:** Use seat belts, do not drink and drive, maintain safe driving speeds, buckle up your baby.

**Drowning:** Swimproof yourself and your kids - make sure they can swim and discourage swimming alone. Do not let small children be unattended near water.

Do not go into a rapidly flowing creek or river.

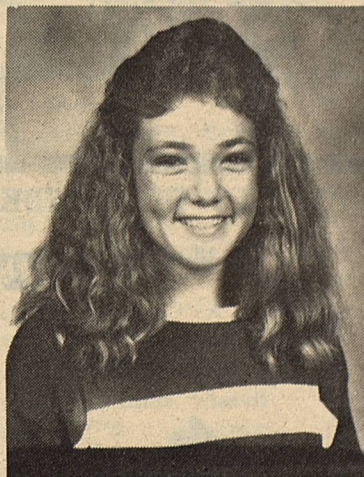

**Burns:** Install smoke alarms at home and have an evacuation plan in case your home catches fire. Teach children how to "Stop, Drop, and Roll" if their clothes catch fire.

**Choking:** Children most often choke on small pieces of food or candy; adults most often choke on food

when partying and drinking accompanies eating. Gunshot injuries: Keep guns locked up, and lock ammunition separate from weapons. Horseplay with weapons is deadly. When hunting, be sure of your target! Enroll your children as soon as they are old enough in a gun safety course.

Nelva Jones, EMS president of the Borden cont. to pg. 4

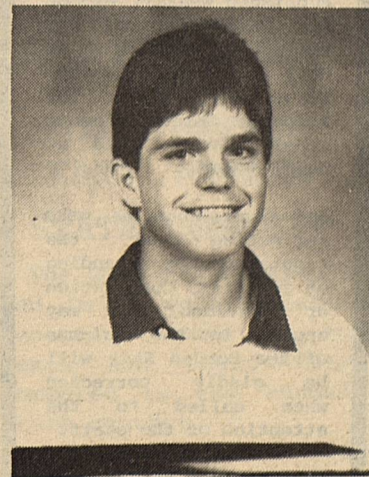

## JUNIOR HIGH HONOR STUDENTS

**SHARA DEE WOODWARD**

Shara Dee Woodward, daughter of Mr. and Mrs. Craig Woodward has been named valedictorian of Borden Junior High School. Shara Dee maintained a grade average of 96.3 to achieve this honor.

David Buchanan, son of Mr. and Mrs. Bob

**DAVID BUCHANAN**

Buchanan has been named salutatorian of Borden Junior High School with a grade point average 96.2.

Graduation exercises for the Junior High will be held Friday, May 27 at 8:00 p.m. in the school auditorium.

OF 1992!

### FFA MEMBERS DO WELL AT AREA CONVENTION

Five members of the Gail FFA traveled to San Angelo this past Saturday to attend and compete in the Annual Area II FFA convention. Randell Hollis, Will Phinizy, James Smith, Kerry Fryar, and Gerry Smith attended and did well in their events.

Will Phinizy placed among the top ten finalists chosen to attend Austin on June 9th to compete on the

State level for an \$8,000.00 Livestock Show and Rodeo Scholarship. There were 27 students competing from Area II.

Randell Hollis who had previously won the district competition for State Lone Star Farmer, competed on the Area Level but was unable to win first. However, Randell did receive his Lone Star Farmer Degree which

requires a student to be at least a third year Ag student and must have earned and have on hand a invested \$500.00 from the students SOEP projects.

Kerry Fryar also received his Lone Star farmer degree from his projects at Swine and Market Steers.

James Smith competed for the Star Chapter farmer award on the Area Level but was

unable to secure first. However James won the district level previously which enabled him to compete at the Area Level. The Star Chapters farmer degree goes to the student who has the most outstanding record books for his or her first two years in vocational agriculture.

Gerry Smith, a freshman at Texas A&M University, travelled to the Area Convention and competed for his American Farmer Degree. The American Farmer Degree is the highest Degree that can be obtained by FFA students. To achieve this honor a student must have earned and have on hand a minimum of \$5,000.00 from his SOEP projects. A student is allowed to compete for this honor until he received it or he competes his Junior year in college.

Gerry received this degree and also won the Area II outstanding American Farmer Degree Award. This will allow him to travel to the State Competition on

June 9th. Gerry's 5 year projects have consisted of mkt. lambs, mkt. steers, mkt. heifers, and commercial steers.

The degrees received at the area level come only from hours of paper work and record book work.

### FFA LIVESTOCK AND DAIRY CATTLE TEAMS ATTEND STATE CONTEST

The Gail FFA Livestock and Dairy Cattle teams recently traveled to Texas A&M where they competed in the annual State contest.

The Livestock team consisting of Will Phinizy, Kerry Fryar, Randell Hollis and James Smith placed 28th from a field of 52 teams.

The Dairy Cattle teams coonsisting of Cody Stone, James Lewis, Harold Barnes and Chad Conner, placed 24th from a field of 42 teams.

2.	Jason Sharp	Tuba	I Medal	Superior
<b>10th. Grade</b>				
1.	Lance Telchik	Cornet	II Certi.	Excellent

## TEXAS TRAUMA

cont. from pg. 1  
 County EMS service says that if accidental injuries do occur you still have time to prevent death in 95% of the accidents. "Make sure an injury victim can breathe, stop any bleeding, and make sure there is a pulse. Direct pressure over a wound is the best way to stop bleeding and CPR may help someone who is not breathing. Using the Heimlich Maneuver, simple abdominal thrusts, can dislodge what may be causing a child or adult to choke. These simple skills-CPR, controlling bleeding, and preventing choking are the basic skills anyone can use to help a trauma victim." For more information on these lifesaving skills, contact any of the following Borden County EMS, Frances Burkett, Lisa Ludecke, Pat Ray, Tom Rowe, Buster Taylor, Joan Trussel, Buddy Wallace, James Aaron, Kent Holmes, Randy Hensley, Carol Lewis, Barbara Miller or Patrick Toombs.  
 "Trauma does not have to kill our young" says Nelva Jones, EMS president "we just need to work at preventing accidents."

## RECEIVES DEGREE

Patrick Toombs of Fluvanna, received the Associate in Applied Science degree from Western Texas College in commencement exercises held May 13. Toombs majored in Criminal Justice and was a member of Phi Theta Kappa, a national honor fraternity for students in junior/community colleges.

## GRADUATES FROM LAW SCHOOL

Troyce Wolf, son of Mr. and Mrs. Vernon Wolf, was among the two hundred twenty candidates hooded for the degree of Juris Doctor in the Law School Quadrangle at Southern Methodist University. The School of Law's graduation ceremony was held Saturday, May 21, 1988.

Troyce, who will be practicing in Big Spring, received his

## A VERY SPECIAL THANK YOU!

We would like to thank everyone for their concern, prayers, flowers, cards, and food during my bout with the heart attack I had in April. It made my hospital stay and my recovery time most endurable. A special thanks to Buster Taylor, Kent Holmes, and Pat Ray for the quick response with the ambulance and the professional care I received until I arrived at the hospital.

Thank you all from the bottom of our hearts.

Joe Cooley and Family

BIG SPRING, TEXAS

LET ME GET MY HAT

by Dennis Poole

**DRY WEATHER LIMITING  
MESQUITE CONTROL**

Dry conditions over Texas are not only limiting forage growth but are also putting the damper on mesquite control with foliar applied herbicides.

With below normal rainfall over most of the state since last fall, trying to control mesquite with foliar herbicides may be a questionable practice this spring.

"Soil moisture is essential for acceptable control of mesquite. Ranchers should look at their situation to determine if mesquite plants have sufficient foliage and are not severely stressed for moisture before using foliar applied herbicides.

Soil moisture is only one factor influencing the degree of mesquite control with foliar herbicides. For optimum control, a rancher should select one or a mixture of herbicides and apply it when mesquite foliage is ready for spraying, soil temperature is optimum, and plants are not severely moisture stressed.

Foliar herbicides should be applied when mesquite leaves are fully extended and have changed from light green to dark green in color--about 40 days after budbreak. Control is poor when seed pods are elongating.

Regarding soil temperature, mesquite control is best when soil temperature at 12-18 inches of depth at the time of spraying is 75 degrees F. or above.

Conditions that affect mesquite foliage just prior to and during the spray season will affect control results. Frequent rains during the spray season may result in the development of new leaves. For optimum control, new leaves

should be allowed to mature before spraying. Foliage damaged by insects, disease, hail or a late frost must have time to mature or control will be poor. This means delaying spraying of herbicides in some areas.

Several choices of herbicides and mixtures of herbicides are available for mesquite control. This provides an opportunity to better match ranch objectives and economics with the herbicide or herbicide mixture. Also, the need to control undesirable brush and weed species associated with mesquite may influence the herbicide choice.

Herbicides currently registered and effective for controlling mesquite by foliar application are Grazon ET (triclopyr), Banvel (dicamba), Reclaim (clopyralid) and Grazon PC (picloram). Grazon ET, Banvel and Reclaim may be used alone.

Research information indicates the highest degree of control with Reclaim. Grazon ET and Banvel may be mixed with Grazon PC in a 1:1 mixture (on an active ingredient basis) for greater control than when these herbicides are used alone, Grazon PC may be mixed with Reclaim in a 1:1 (active

ingredient) mixture to provide control equivalent to or slightly better than when using Reclaim alone. Reclaim does not provide good control of brush species other than mesquite. Thus, for control of mesquite and associated species, the Reclaim-Grazon PC mixture should be used.

Grazon PC and Reclaim are now labeled for use with the carpeted roller for mesquite control. Both herbicides applied alone or mixed have provided excellent mesquite control when applied with the carpeted roller.

To obtain the maximum benefit from money spent on mesquite control, herbicides should be applied at the proper time with the proper method and followed with good range management.

**BUCKLING  
UP  
PRO-TEX-US!**

As Texans, we have a lot to be proud of. However, one thing we should not be so pleased with is that fewer Texans are buckling up while driving. Texas Buckle Up Week, under the theme "BUCKLING UP PRO-TEX-US!", is scheduled for May 23-30, the week preceding the Memorial Day Weekend. The promotion is designed to increase safety belt usage by encouraging motorists to get into the buckling habit.

In 1986, Texas boasted one of the highest rates in the country with 66% usage. Now, only three years after the safety belt law

went into effect, usage is at a disheartening 56%. The usage rate of child safety seats is even more alarming with only 50% of children under four properly restrained. Subsequent to the decrease in safety belt usage, increased injuries and fatalities have been noted.

Texas Buckle Up Week is being held in conjunction with the 1988 Buckle Up America! week, sponsored by the National Highway Traffic Safety Administration, National Safety Council, Operation C.A.R.E., National Association of Governor's Highway Safety Representatives, and the Entertainment Industries Council.

The Entertainment Industries Council is the newest member of this coalition. This group has been successful in getting actors, producers and writers to highlight safety belt and child safety seat use on television and in the movies.

The State Department of Highways and Public Transportation, along with other traffic safety proponents, encourages all Texans to adopt the habit of buckling up while traveling.

FACTS ON SAFETY BELT AND CHILD SAFETY SEAT

USE

- Close to 49,000 Americans (3,261 Texans) died in traffic accidents in 1987.

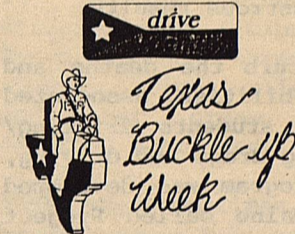

- The use of safety belts decreases the chance for injury in an automobile accident by 40%.

- The chances of being killed in an accident are more than fourteen times greater for persons not wearing safety belts.

- Motor vehicle crashes are the number one killer of children. About 600 children under the age of five died in traffic accidents across the country in 1987 (over 60 children in Texas).

- Correctly used child safety seats are 70% effective in preventing fatalities and 67% effective in reducing the need for hospitalization.

- With 100% correct use, child safety seats could save about 500 lives nationwide.

## TEXAS HIGH SCHOOLS PARTICIPATE IN DRUG-FREE CELEBRATIONS

Graduating from high school is a time for growth, decision-making, and celebration for young people. Unfortunately, many students decide to celebrate by drinking alcohol or using other drugs. Many times it leads to disastrous results.

To curb the deaths and disabilities associated with students drinking/using drugs and driving, a program was developed in Maine called Project Graduation. The program offers students the opportunity to have chemical-free celebrations in lieu of the "traditional" drinking parties.

Texas began its own chemical free party program in 1984 called Project Celebration. Two high schools participated that year. Now, just four years later, over 400 Texas high schools are sponsoring their own Project Celebrations.

The largest Celebration was at Six Flags Over Texas in Dallas on May 6, 1988. The amusement park hosted more than 18,000 students from over 100 schools in the Metroplex area. In the Houston area approximately 40 high schools are estimated to parti-

cipate.

The support for each celebration comes from many sources including the community level with donations given by businesses, civic groups, parents, teachers and the media. The H.E.B. grocery chain has offered money grants to eligible schools to help fund the celebration. But, the main responsibility falls to the students to plan, organize, and implement their own celebration.

Project Celebration is considered by all to be a great success. And it is more than just conducting chemical-free parties. Project Celebration promotes a way of life that respects individuals who don't need chemicals to have a good time.

### DID YOU KNOW ?

Here are three statistics in which you might take a healthy interest:

- Life expectancy at birth is rising. It's now about 70 years for men and almost 80 for women.

- Cancer is being conquered. Medicine can now save the lives of half of all those who get any form of cancer—much more than that for some forms—and are constantly coming up with new ways to deal with the disease.

- Heart disease, America's major killer, is also showing a decline.

Among the reasons for this good news are the many machines and other diagnostic and health care tools and the often almost as vital communication and computer equipment that comes here from Europe. Mindful of that, many Americans are taking a healthy interest in what Congress plans to do about free trade. Anyone can write Congress on either side of this or any issue at the U.S. Senate, Washington, D.C. 20510 and the House of Representatives, Washington, D.C. 20515.

## NOTES FROM HOME

By Debra Pollard  
Home Demonstration/CEA

### BEEF IS A MICROWAVE FAVORITE

Microwaves are here to stay. In fact, trend-setters predict that in the 1990's, microwave ovens will become as indispensable to U.S. households as television sets. Today 64% of the homes in the country have a microwave. Some families have purchased their second oven for the den or playroom, and microwaves are frequently found at the workplace as well.

Can microwaves be used to prepare your favorite stew, meatloaf, or even steak? You bet. Microwaves are convenient and time-saving for popular beef cuts, but more importantly, the results are just as tender and flavorful as conventional beef cookery. The major point to remember about cooking most beef cuts in the microwave is to use a lower power setting such as MEDIUM or MEDIUM-LOW. The exceptions to the rule are ground beef and reheating cooked meat which are cooked on HIGH. (See chart for standard power levels.) The best cuts of beef for the microwave are cuts without a bone and symmetrical in shape to insure a uniform degree of doneness. Lean cubed steaks, top round, tip roast, eye-of-round, top sirloin, flank steak, or ground beef are all good choices.

A few additions to your kitchen can make a microwave owner's life much easier. Microwave-safe cookware is easy to find, and items such as a rack or colander (elevates meat for even cooking and keeps the meat separated from its drippings), browning dishes (to sear meat for a more pleasing appearance), and probes or thermometers are

helpful in producing an ideal meal. If you are unsure if a container is safe to use with your microwave oven, perform the simple dish test. Fill a 1-cup glass measuring cup with water and place it in the oven along with the container to be tested. Heat 2 minutes at HIGH. If the container is microwave-safe, it should remain cool and the water should be hot. If the container is warm, it has absorbed some microwave energy and should not be used.

Some people are hesitant about trying their favorite beef recipe in the microwave because there's a chance that it may not look as good. Meat with a liberal amount of fat will brown just as well in a microwave as it does in a conventional oven. Thin steaks or other cuts that require a shorter cooking time may need a little help to promote browning. Use a brown sauce like soy or Worcestershire or a gravy mix for even color. Butter will facilitate a "grilled" look.

Here are some hints for microwave beef cooking:

\*\* In preparing beef strips for appetizers, snacks, or main dishes, partially freeze the fresh beef 30 minutes for easier slicing.

\*\*Arrange uniform meat shapes like hamburgers or meatballs in a circle on the plate for cooking; leave the center empty.

\*\*Small pieces of beef cook faster than large pieces; strips faster than cubes.

\*\*Shield irregularly-shaped edges of roasts with small pieces of foil to avoid overcooking.

\*\* For microwave hamburgers, shape one pound ground beef into four ½ inch thick patties. make a ¾ inch hole in the center of each patty, then season to taste.

\*\* Place ground beef in colander over a microwave-safe bowl so drippings will collect underneath.

\*\*Use sauces to keep meat moist and enhance color.

Try an Herb Seasoning Mix to spice up roasts and burgers. Herb Seasoning Mix: 2 tablespoons flour, 1 table spoon dried Italian dressing (crushed), 1 tablespoon salt, 1½ teaspoons paprika and ¾ teaspoon pepper. Combine thoroughly and store in a shaker. Yield: seasoning for 14 pounds of beef roasts or burgers.

When cooking a roast in liquid, use an oven cooking bag (loosely tied with a nylon string) or a covered casserole dish. Place the more tender cuts directly on a rack in a microwave-safe dish, and insert a special microwave meat thermometer horizontally into the roast. Remember, the roast will continue to cook after it is removed from the oven, so allow 10-15 minutes standing time. The internal temperature will rise 5 to 15 degrees Fahrenheit during this time.

A delicious and almost effortless microwave dish to cook is "Tracy's Microwave Chili." the main ingredient, ground beef, can be purchased in vary degrees of leanness—from 70-95%. Use the technique to remove drippings by placing the beef on a small sieve or colander with a microwave-safe dish underneath. Stir the ground beef at least once midway through the cooking period to separate it into individual pieces.

### TRACY'S MICROWAVE CHILI

1 pound ground beef in 2-quart microwave safe dish; sprinkle ½ cup chopped onion chili powder, cumin, ½ t. garlic powder salt and hot pepper 1 tablespoon chili sauce, if desired, over 1 T. chili powder beef, stirring to 1 t. ground cumin combine. Stir in toma- ½ teaspoon salt toes and kidney beans. 1 dash liquid hot Cover with waxed paper pepper sauce, if and microwave at HIGH 12 to 14 minutes, 1 can (8 oz.) kidney stirring every 4 minutes beans, brained Serve with shredded 1 can 28oz. whole cheese, ripe olives, tomatoes coarsely and sour cream, as chopped desired. 4 servings.

Condiments: Shredded cheese, ripe olives and dairy sour cream. Combine ground beef, onion and garlic powder; arrange in a ring in an all-plastic sieve or small colander. Place sieve in bowl; microwave at HIGH 3 minutes. Stir to break up beef. Continue cooking at HIGH 3 minutes; stir after removing from microwave. Pour out drippings. Place beef

NOTE: Cooking times are based upon a full power output of approximately 650 watts.

Nutrition data per serving: 339 calories; 18 g fat; 21 g carbohydrate; protein 56% U.S. RDA; iron 31% U.S. RDA; 1,082 mg sodium; 77 mg cholesterol. (Complete nutrient analysis available upon request.)

### Re: All Steel Building Quotation Request

The Superintendent's Office, in behalf of the Board of Trustees of the Borden County Independent School District, will receive bids on an all steel building.

Proposals are requested to meet the following specifications:

- All Steel Building
- Engineer Certified
- 25' X 40' X 16'
- Gable Roof
- 1 - 3'0X6'8 Steel Door and jamb
- 1 - 12' X 10' 24 Gauge Overhead Steel Door
- 2' X 2' X 2' Concrete Footing Under Each Column with Re-Bar
- 4" Concrete Floor - 5 Sack Mix with Re-Mesh
- 12" X 12" Concrete Footing with Re-bar
- Main Frame Work Column - 6" X 10" Eye Beams, all bolted
- C-Channels sized to Building, all bolted
- U.S. Mfg. Steel Siding, 80,000 P.S.I. Rating, 26 Gauge
- 20 Year Guarantee on Paint Finish
- Roof Same as siding except galvanized- 26 Gauge, UL 90 Roof Installation
- Vinyl Back Insulation on Walls and Ceiling or spray on- Depending on Owners Insurance Rates for each
- All closure covers - installed and sealed.

The proposal shall be addressed to James McLeroy, Superintendent, Borden County Independent School District, Box 95 Gail, Texas and shall be delivered in a sealed envelope marked "Metal Building Bid". Proposals will be received up to but not later than June 20, 1988. Bids received after that time will not be considered.

### Re: Mower Quotation Request

The Superintendent's Office, in behalf of the Board of Trustees of the Borden County Independent School District, will receive bids on a commercial riding mower.

The proposal shall be addressed to James McLeroy, Superintendent, Borden County Independent School District, Box 95, Gail, Texas, and shall be delivered in a sealed envelope marked "Mower Bid". Proposals will be received up to but not later than June 20, 1988. Bids received after that time will not be considered.

Bids are requested for the following specifications:

H.P. Range	17 H.P. to 22 H.P.
Cutting Width	60" Minimum
Number of Blades	3
Cutting Height	1" to 4"
Gear Box	
Diesel or Gasoline	
Hydraulic Implement Lift	

Proposals may be submitted on any form you choose. The right is reserved by the Borden County Independent School District to accept or reject any or all bids and to waive all formalities.

## NOTICE

IF ANYONE LEFT DISHES AT THE CANON RANCH, YOU MAY PICK THEM UP AT THE COUNTY CLERK'S OFFICE.

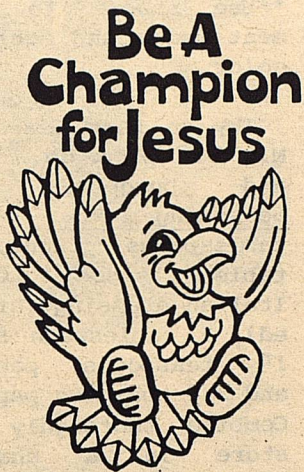

### SCRIPTURE

"So, if you think you are standing firm, be careful that you don't fall! No temptation has seized you except what is common to man. And God is faithful; he will not let you be tempted beyond what you can bear. But when you are tempted, he will also provide a way out so that you can stand up under it." 1 Corinthians 10:12,13

# VACATION BIBLE SCHOOL

## Kids Come Alive At Victory Village!

If things look a little different at First Baptist Church Gail, next week, there is a good reason. They are changing their building into a "Victory Village". They are not installing a running track or olympic pool, but they are geared up for five exciting days of singing, craft projects, puppet shows, lots of creative learning activities, and graded Scripture discovery lessons. Getting in shape spiritually takes some effort, but it's fun for the children. All children ages 3 through the completion of the 6th

grade are welcomed.

The "Victory Village" meets daily from 9:00 - 11:30 a.m. on June 2-3 and 6-8. The school begins on a Thursday morning. The commencement program will be on Wednesday, June 8, at 7:00 p.m. Cookies and Kool-Aid are needed for the five day school. For more information call 856-4363.
