A BALANCE OF VALUES

Recently Kinney County and Brackettville have received thousands of dollars in Federal Grants. And in addition they have spent taxpayers money in the following manner:

1. A new jail was constructed that fails to meet State standards on 125 mandatory count and 63 recommended counts..... Now I ask you, If you had a house built and it did not meet building code specifications wouldn't you file suit on the contractor? I don't know if it is the fault of the contractor or whether our Commissioner's Court just goofed in not supplying the proper specifications.....BUT! somebody blew a bunch of money and they are keeping it quite.

2. We are getting a multi-thousand dollar second floor on our Fire Station. WHAT WE REALLY NEED IS SOME NEW FIRE EQUIPMENT!

3. Spofford just received a grant for a new water tower.. fifty some thousand bucks!

NOW ALL THESE PROGRAMS ARE JUST PEACHY DANDY!!!! BUT, ARE THEY REALLY IN THE ORDER OF IMPORTANCE OF WHAT OUR COMMUNITY NEEDS????

When are YOU, I, AND OUR LOCAL ELECTED OFFICIALS going to have the "GUTS" to stand up to the federal elected officials and say:

1. Our new jail don't work who's fault is it.

2. Yes Sir! We would like an addition to our Fire Department....But give us half the money for a new fire truck!

3. "Sir, We know that Spofford's water system is in bad shape, but, we need a doctor in this county that may save many lives, including people from Spofford."

There was a recent request before the Commissioner's Court that "a 'back-up' ambulance was needed to serve our community... This motion was tabled...Within a very close proximity of time they voted to buy a parking lot,

and a new vehicle for the County Agent...now both of these things were needed but which was the most important?

The Federal Government reneged and broke their contract and agreement on supplying us a doctor after the community fulfilled their part of the agreement.. many hours and dollars were spent by our citizens to receive a doctor.....

Who's responsible for this chaos? Our elected officials Or, YOU AND I?

The time has come for all of us to speak up for our true needs rather than accept "the standard bureaucratic handouts."

State Board of Insurance

AUSTIN--State Board of Insurance Chairman Joe Christie announced today a study of the board staff shows annual savings of almost \$1 million a year resulting from increased productivity. The study results were presented to the board by Carl Blonkvist from the management consultant from of Booz, Allen and Hamilton in Dallas. "While the number of state employees grew by 13.9 percent during the last three years, the State Board of Insurance staff actually decreased in size by 2.6 percent," Christie said.

"This reduction resulted in a staff size this spring of 584, compared to the 701 initially projected. The reduction has been accomplished according to our consultant, with no loss in service." Further reductions this year, Christie said, have lowered the agency staff size to 568, the lowest it has been since 1972. The workforce reduction, Christie said, was not accomplished without resentment from division heads. "The consultant found, as we had expected, that the division heads were upset at the loss of total control over their

employees. However, I am optimistic that the tremendous savings provided by this program will convince the agency's staff management that the end result is worth the sacrifices they had to make to accommodate the program," Christie said. State Board of Insurance cont The program utilized two approaches: one to equalize the volume of work with the manpower needed to complete the work, and the other to evaluate these skills and talents of employees to match those attributes to individual jobs.

CB BREAK

BY THE SKY PILOT

So Uncle Charley has begun to crack the whip. Every conscientious CB'er will be glad for that. His big complaint as he made simultaneous raids across the U.S. including San Antonio, Dallas, El Paso, et.al. was those who operated illegally with too much power or frequency interference in T.V.-Stereo, etc.

His next move is slated to be those who misuse their sets by using obscenity playing music, etc. We can feel grateful that illegal power is seldom used in Brackettville. With one major exception too much power, is seldom heard in town itself. This is as it should be, only it should be that not one operates illegally. We do have the problem of two who persist in playing music just to heckle and upset people. It's a sick minded individual who will purposely violate federal regulations just to be sorry. Sometimes maybe Uncle Charley will come to Brackettville and confiscate a radio or two or three and things will be great. Better it would be if all could be kind and considerate and act as a gentleman should act.

The VFW and Ladies Auxiliary made a pledge of \$35.00 to the Jerry Lewis Muscular Dystrophy Telethon at their Labor Day Bar-B-Que.

TIPS FOR GREEN THUMBS

by: JOE TOWNSEND

Now is the time to fertilize trees and lawns. If your trees have had trouble this summer and had a tendency to have mostly yellow leaves now could be a good time to give them a heavy dose of iron. This can be done by working copperas into the soil out as far as the drip line of the trees. Another and quicker method is to use a root feeder and use liquid iron. The soil here is iron poor and almost all vegetation needs more iron and give than is soil available. This is true of grass also -- particularly carpet grass. Feed it good now with added iron--you'll see the difference in the Spring and all next summer.

Between Us

by: JOE TOWNSEND

I saw an interesting happening this morning. A squirrel had just cut a pecan off the tree with the green hull still intact. He was carrying it in his mouth which seemed to be stretched beyond an ability to ever close again. As he ran with tail high at full speed on the ground a scissor tail fly catcher attacked. The bird was flying along above the squirrel occasionally diving on the squirrel. Never was the bird more than six inches above the red tail squirrel. Finally the running animal reached the sanctuary of a tree and scurried up it and escaped the bird.

One could not help but wonder what ever possessed the bird to attack the squirrel. Surely it did not want the nut the squirrel was carrying. It certainly didn't hope to kill and eat the squirrel. It seemed the scissor tail was just being mean for lack of something better to do. This is so like some people. The mercilessly attack others with nothing to gain. They flutter around and noisely make themselves to be seen while leveling assaults at others at every opportunity. In the end they gain nothing. The squirrel went merrily on his way and the attacking bird was made to be a fool. How much like the human who wastes his time attacking others.

Comptroller's Rep. to Visit

AUSTIN--Comptroller Bob Bullock alerted Texas business Monday to begin looking for a friendly visit from a Comptroller's enforcement officer sometime during the next nine months.

The Comptroller said that the enforcement officers from his 40 filed offices will fan out across the state with the goal of offering personal assistance to each and every Texas Business.

A testing of the canvassing program in July showed that 19 percent of taxpayers contacted required assistance or needed permits, he said.

"The theme of this project is Taxpayers assistance," Bullock said. "We have found that in many instances only personal contact can eliminate errors that eventually prove costly both to the taxpayer and the Comptroller's Office."

He said his employees, armed with smiles and packages of taxpayer information, will be knocking on doors with the hopes of:

- providing education to taxpayers;
- making sure business is properly permitted;
- establishing personal lines of communication between taxpayers and the individual enforcement officer responsible for this area;
- updating Comptroller's Office records
- making certain each taxpayer is filing and paying tax properly.

July's sample of 4,702 businesses showed that 97 were operating without needed permits, 766 had changed address or business name without notifying the Comptroller's Office and 37 were not paying tax properly, Bullock said.

"We hope to take care of every little problem on the spot, before it turns into a big problem," he said.

"Above all," Bullock added, "we want people to believe us when we say 'I'm from the Comptroller's Office and I'm here to help you.'"

Cottage or mansion, ranch style or colonial... The important thing to look for is the ENERGY EFFICIENCY AWARD.

Sure you've got a lot of pretty definite ideas about what you want in your next all-electric home: things like a certain architectural style, location and number of bedrooms.

But here's something else you ought to consider: whether the house will help you save money on energy. These days, in fact, that factor probably ought to go to the top of the list.

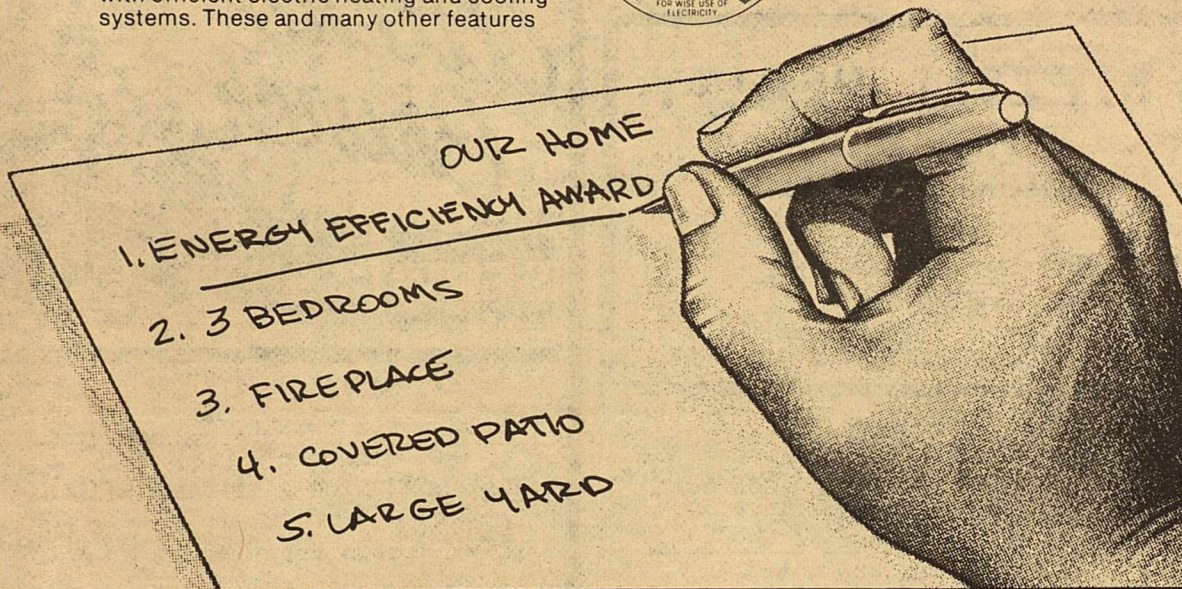

And it isn't easy for most people to determine just how well a house will function as an energy-saver.

Central Power and Light Company can help, though, with its Energy Efficiency Award program. When you buy or build an all-electric home that merits this award, you know it has been designed and built to assist you in making the most of every dollar you spend for electricity. It is well insulated, weather-stripped and equipped with efficient electric heating and cooling systems. These and many other features

that affect the home's energy efficiency have been checked and certified by a qualified technician from CPL.

You get maximum value for every kilowatt-hour of electricity you buy if you live in an Energy Efficiency Award home and make a habit of using electricity wisely.

Check into this program if you're planning to build or buy a new all-electric home or remodel your present one. Your builder, realtor, designer or architect can give you the details — or you may get more information from your CPL office.
