

THREE FIRES IN KINNEY COUNTY

There were three fires this past week starting with Friday morning approximately at 10:30 a.m. A station wagon that belonged to Chuck Porter caught on fire. It was probably started by a light that was left on and was touching some of the items stored in the back of the wagon.

Friday night, the fire department was called to Spofford to put out a fire in a travel trailer that belonged to a Houston man visiting at a residence there. The arson inspector from Del Rio stated that there was inconclusive evidence as to the cause of the fire. **CONT. ON PAGE 4**

JUNETEENTH PARADE

Winners of the Juneteenth Parade held Saturday, June 17th were as follows: To the left, top picture, First Place Winner, The Brackettville Catholic Church, middle picture, Second Place Winner, "Miss Black Texas", Veronica Warrior Byrd, and bottom picture, Third Place Winner was the Seminole Indian Scout Cemetery Association, Brackettville. All the entries were appreciated by the Association.

SEMINOLE INDIAN SCOUT CEMETARY ASSOCIATION

The Seminole Indian Scout Cemetery Association wishes to say a BIG THANK YOU to the citizens and organizations of Brackettville, Ft. Clark, Laughlin A.F.B., Del Rio and adjoining counties who participated in our Juneteenth Celebration to "Keep Freedom Alive."

Trophies won for Parade participation were as follows:

- 1st place--The Catholic Church, Brackettville
- 2nd place--"Miss Black Texas" Veronica Warrior Byrd, Fort Worth, Tx. (originally of Brackettville and Del Rio.)
- 3rd place--The Seminole Indian Scout Cemetery Association, Brackettville,

Father's Day Awards were given to Fathers as follows:

- 1. The oldest father present - Moses Warrior of Uvalde/San Antonio.
- 2. The father who came the farthest in miles -- Billy Ward, San Dimas, California.
- 3. The youngest father present - Marvin flowers, Del Rio, Tx.

The celebration ended Monday June 20th with a Sing -a-long and prayers for a safe

journey home and looking forward to meeting in September for our Organizations Anniversary.

Special Guests present:

- 1. Mr. Doug Sivad - preacher/ writer from the University of Texas & Tillotson College of Austin, Tx.
- 2. Mr. Mason - Chicago, Ill., a preacher at present an Instructor at St. Phillips College in San Antonio.
- 3. Rev. Marshall Benson of Lancaster, California visiting his mother Ophelia Benson of Del Rio.

To win a bet for \$40, Thomas Garson of Chicago ate 22 hamburgers and two quarts of ice cream in 25 minutes back in 1938.

FORT CLARK SPRINGS ASSOCIATION

June 9, 1989

Dear Judge Seargeant and Commissioners:

On behalf of the Board of Directors and Fort Clark Springs Association, I want to thank you for all your help following the tornado of May 16, 1989.

The equipment and man power you so generously provided were a tremendous boost to our clean-up efforts. Without the able assistance of your employees, Lee Lawson and Jerry Guidry, we would still be trying to get trees and debris removed from the Tour Road and creek areas.

Although we suffered a great loss in trees, we fully realize how fortunate we were to have lives and property spared. For this we are eternally grateful. We feel fortunate also, to have county officials who, when the need arises, are devoted to assisting with the maintenance and improvements of our club grounds.

Sincerely yours,

RALPH E. BEARD
President
Board of Directors

BRACKETT DROP-OFF AT NASH-JEAN'S

COUNTY EXTENSION AGENT-AGRICULTURE

BY ALAN L. MCWILLIAM

Many ranchers are beginning to ship lambs around the county. Lamb prices have shown a decline in the past few weeks. Let's hope we see a little leveling off for the future. It is my understanding that at this time Kinney County has been reapproved for the emergency feed program. If you need more details, contact the ASCS office in Del Rio.

With the current hot, dry weather, homeowners must give a little extra attention to watering their yards and gardens. Here are a few tips to keep plants and lawns healthy while keeping water costs down and conserving this valuable resource.

1. Practice slow, deep watering to allow roots to penetrate deeper so that plants become more stress-resistant
2. Soaker hoses and drip irrigation systems work well on trees and shrubs. It's much more efficient to water at night or early in the morning because evaporation is less. Night time watering can promote more disease problems, and should be watched.
3. Too much water can be as detrimental or even worse than not enough. The rate at which water is applied should be no more rapid than the rate at which the soil can absorb it. Never fertilize plants when the soil is dry. It's best to water the area one day, apply fertilizer the next day and then water it in. Fertilizer has no effect on your plants unless it is dissolved and moved into the soil to the plant's root zone.
4. If you have a plant or shrub next to a foundation, under eaves or on the southern exposure of the house, it may require more frequent watering because these benefit less from rainfall and have to cope with the heat reflected from walls.
5. Water plants on mounds more frequently as they suffer from drought stress more easily.
6. The use of organic mulch made of pine bark, chopped straw, hay or similar material to reduce irrigation needs, will also keep weeds out of plant and garden beds.
7. Treat water as a valuable resource. Use it to water plants when needed but do not waste water. Although considered a renewable resource, good water supplies are becoming scarce in Texas.

Have you had trouble with your garden plants blooming and then not setting any fruit? There are many homeowners around town, myself included, having this problem. Although tomatoes, cucumbers, and several other fruits will drop their blooms due to several causes, the most common is high temperature. Generally speaking, nighttime temperatures above about 72f in combination with daytime temperatures above 90 f often will cause blossom drop. Unfortunately, there is not a whole lot we can do about

blossom drop due to high temperatures. Planting early maturing varieties and partially shading your tomato plants may be a couple of ways to help this problem.

I have also been noticing many iron chlorosis problems around town. If your lawn has a yellow, dull appearance with green veins and yellow leaf, it is a sure sign it needs iron. Lack of iron not only makes your lawn yellow, but also allows weeds to come through a turf that is not as thick as it could be. Try applying iron every 50 days at the rate of one pound to every 1000 square feet to promote a healthy green color to St. Augustine, bermuda grass lawns. Many of our landscape shrubs and plants need iron in these alkaline soils in Kinney County. Iron is available in several formulations. I prefer the standard chelated iron powder. Be careful not to get the iron on sidewalks and driveways as it will create a stain that will not come off. FeSO₄ is copperas - most common for lawns to be used at a rate of 2 tablespoons per gallon of water. Remember to read and follow all label instructions and if you have any questions, I will be glad to answer them.

SARA MORSE

Following weeks of intensive testing, evaluation and interview board procedures based on especially stringent qualifying criteria, the Commanding General U.S. Army ROTC Cadet Headquarters Fort Monroe, Virginia, has announced the selection of Sara Morse as winner in competition for the coveted 4 year ROTC Dedicated Nurse Scholarship. This Generous Program offers these benefits to the recipient scholar;

- 1) up to \$7000.00 annual tuition payments.
- 2) coverage of on campus educational and lab fees.
- 3) allowance for books, supplies and equipment.
- 4) a \$100.00 per month personal spending stipend.
- 5) upon graduation commissioning as 2nd Lieutenant.
- 6) four year commitment of service in medical corps.
- 7) opportunity for unlimited personal & income growth during tours at stateside and

oversees military medical center assignments. World Travel!

While emphasizing science and math mastery, the scholarship selection process identifies the exceptionally versatile achiever who has demonstrated consistent excellence in academic, leadership, athletic and extracurricular disciplines.

Sara's distinguished resume includes:

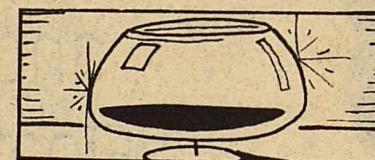

- a) Four year high school grade point average of 93.
- b) Varsity letters in Volleyball, Basketball and Track.
- c) High Point FHA Chapter Member 1988
- d) Four year member State Finalist Marching Band.
- e) Member crew/cast 1989 Regional UIL one-act play.
- f) Medalist State Solo Frenchhorn for four years.
- g) National Honor Society Member for four years.
- h) Recipient Robert Culp Memorial Scholarship 1989
- i) Completion of Data processing and English 131 summer session and off-campus night courses during her Junior and Senior High School Years.
- j) Age group trophies at bowling and running events as well as horseshoes, washers and ping-pong.
- k) Outstanding Band Musician 1986, 1987, 1988 .
- l) District Champion Jr. High 2 mile run 1985.

ACCEPTING BIDS

SEALED BIDS ARE BEING ACCEPTED FOR A 1 TON - 4 DOOR PICKUP TO BE USED AS PERSONNEL CARRIER FOR THE KINNEY COUNTY ROAD CREW. SPECIFICATIONS AVAILABLE AT THE COUNTY JUDGES OFFICE. BIDS TO BE OPENED AT THE NEXT REGULAR COMMISSIONERS COURT MEETING, JULY 10, 1989, AT 2 P.M.

PUBLIC HEARING

Public Hearing on Federal Funds Expenditures

The Brackett Independent School District Board of Trustees will hold a public meeting to allow input from interested parties into the expenditure of Chapter I Regular, Chapter I Migrant, and Chapter II federal money.

The hearing will be held at 6:00 p.m. in the Central Office Board Room on Monday, June 26, 1989.

NOTICE TO ALL WATER USERS

The City of Brackettville needs your cooperation in conserving water as much as possible. We are pumping water from the Edwards Aquifer and the water level has been dropping due to usage. We have not had enough rainfall to recharge the Aquifer.

Please check for leaks at your water faucets, toilets, and etc... Avoid watering lawns at the hottest part of the day. Try and cut down on everyday use of water. Now is a good time to get into the habit. Please help us, help you.

INVITATION TO BID

Brackett Independent School District is accepting cost estimates for general construction and repair work. Projects include, but may not be limited to the following:

1. Removal of ceiling tiles in Jones Elementary School hallway and replace with a suspended ceiling.
 2. Removal of ceiling tiles in auditorium and replace with a suspended ceiling.
 3. Removal of shelving in Band Hall and replace with lockable cabinets.
 4. Construction of three non-load bearing walls for classroom partitions.
 5. General repair and painting of superintendent's residence.
- Prospective bidders may come by the Central Office for more information. Contact person is:

Brackett Independent School District
Bobby D. McCall, Superintendent
300 Ann Street
P.O. Box 586
Brackettville, Tx. 78832
Telephone: 512-563-2491

Estimates are due on Thursday, July 6, 1989, at 3:30 p.m. and may be mailed or presented in person in a sealed envelope clearly marked **GENERAL REPAIR PROJECTS.**

Brackett Independent School District reserves the right to refuse any and all estimates, and may revise the above specifications at their discretion. Brackett Independent School District is an equal opportunity employer.

INVITATION TO SUBMIT A PROPOSAL

Brackett Independent School District is accepting bids on proposals for the patching and seal coating of the front parking lot at 300 Ann Street. Successful contractors must be able to complete the work prior to August 15, 1989.

The parking lot can be inspected at any time. Further information may be obtained by contacting:

Brackett Independent School District
Bob D. McCall, Superintendent
P.O. Box 586
Brackettville, Tx. 78832
Telephone: 512-563-2491

Proposals must be received in a sealed envelope clearly marked **PARKING LOT PROPOSAL** by Monday, July 10, 1989, at 3:30 p.m.

Brackett Independent School District reserves the right to reject any and all proposals. Brackett Independent School District is an equal opportunity employer.

"Yes. There is a catch to our retirement plan. First you have to get hired."

LIONS CLUB

Brackettville's Lions Club held its installation meeting last Thursday night, June 15 at Fort Clark Springs', Las Moras Inn Restaurant.

Installed by Past District Governor (PDG) of District 2-A2, James Long of Del Rio were New President - Charles Olsen, 1st VP - Cliff Lewis, 2nd VP - Quincy Roller, 3rd VP - Thomas Faulkenberry, Secretary/treasurer - Peter Pohl, Tale Twister - Sammy Trollinger, and Lion Tamer - Jerry O'Brien. Newly installed member was Harlan Hunter. These offices will be held from July 1 to June 30, 1990. There are now 38 members.

Louis Sofaly, the outgoing president, was considered an outstanding president by his fellow lions as he never missed a meeting, went to most of the district conventions and board meetings and was involved with each of the projects that the Lions held.

Some of the more known projects that the Lions are responsible for are:

- * Peace Poster Contest at the School
- * Annual rummage sale in the fall
- * Broom and mop sale in front of the bank
- * Selling sno-cones at Little League games
- * Gave the Kindergarten class a presentation of the McGruff program, which teaches children not to talk to strangers and bicycle safety. The teachers receive a plan book to teach a 15 minute class once a week to reinforce the program.
- * A scholarship to one of the high school students. Out of 9 that applied, this years winner was Tammy Frerich.
- * A donation to the Santa Rosa Hospital telethon.
- * The Lions help needy children get glasses.
- * Christmas Baskets.
- * Two of the most important projects is the Crippled Children's Camp and the Sight and Tissue Program. These projects will be coming up soon.

CENTRAL POWER AND LIGHT COMPANY

Central Power and Light Co. today asked the Public Utility Commission to approve an interim rate settlement. The settlement, agreed on by CPL and intervenors in its rate case, provides for a \$39 million increase in base rates, and a \$32 million decrease in the fuel factor portion of the bill. The net increase in billings under interim rates would be less than one percent.

The interim rate, which is expected to appear on bills rendered beginning with the first billing cycle in September, would increase bills in that month for residential customers using 1,000 kilowatt-hours of

electricity from \$66.69 to \$67.52. On an average annual basis, the monthly bill for those same customers would increase from \$65.31 to \$65.53.

"Although an increase of less than one percent should not greatly impact our customers, this interim rate will allow CPL to improve its cash flow and earnings while we wait for a decision on our permanent rate request," said Mark Roberson, Director of Rates and Regulatory Affairs.

"Since August 25, 1988, when the first unit of the South Texas Project began commercial operation, CPL has seen its earnings decline," noted Roberson. "Earnings at the end of 1988 fell to \$135 million, compared to CPL's earnings (net income for common) of \$176 million for 1987. When earnings fall, the company has a harder time attracting investors."

Interim rates provide the company an opportunity for a reasonable return during the lengthy regulatory process.

"Also," noted Roberson, "since commercial operation CPL has been paying its share of the operating costs of STP. While our customers have been using STP's electricity, they have not paid for these costs. The money recovered from the interim base rates will be applied to running STP and will help CPL avert a cash crunch."

"Ultimately interim rates will save our customers money. By paying a portion of STP costs now, they reduce the dollar amount that must be deferred and collected later after interest has accrued."

The settlement, if approved by the commission, will avert the need for interim rate hearings which were scheduled to begin June 26. Hearings in CPL's permanent rate request are expected to continue through the fall. After the hearings end and the commission renders a decision, the interim rates would be replaced with permanent rates. If the increase granted in permanent rates is less than the interim increase, the difference must be refunded to customers.

SEPTIC SYSTEM FACTS

by Mark Essary

The growth of cities after World War II pushed government into regulating wastewater. The information on how to build septic systems and what design worked best was skimpy. When engineers were called on to determine the cheapest way to handle waste water, the only recorded information on septic systems was on the bad side. The many that did work well were not documented. The economic decision to build large sewer plants to process wastewater for a large area did not work well in all cases. The studies now conducted in the past twenty years show that smaller plants to serve a known discharge from the area it serves is far more economical than a single large plant. Most engineers are returning to designing smaller plants that fit a specific area and doing it more economically using new ideas. Some of these designs use ponds as a closed ecological okefenokee swamp complete with reeds, water lillies and fish. In our area

with 102 inches of evaporation would benefit from the economical construction of evaporation ponds.

The soil has a limit to absorbing water and letting it slowly go down to the water table. It is found through scientific study that germs migrate through the soil with the water as it finds the water table to continue in the endless cycle water travels. In this study it has been determined that by retaining the liquid with its germs in a water tight environment for a short period, like in a water tight septic tank, the germs can be killed before entering the soil. This evolved the septic tank with several compartments to accomplish this task.

The renewed interest in septic systems seem to bring up similar questions about how they work. One of the most frequent is:

"What is the purpose of a percolation test in constructing a septic system?"

A percolation test is one of many tools to determine how fast the soil will accept water. The sun, wind, and condition of the subsoil below the drainfield are others. Boring a hole for a percolation test allows a person to see what type of soil is below the surface. Many times experts are surprised to find a layer of water or a solid layer of rock just below the surface that would keep a drain field from working. A percolation test is an inexact scientific method that will only aid in the decision of how large the drainfield should be and should not be used by itself to make a determination of the size and design of a septic system.

"Why is my septic tank full of water when I am not using it?"

The old seepage pits that were outlawed recently, drained into the soil slowly through the walls of the hole while a sealed septic tank will retain the level of water where the drainfield outlet pipe is positioned in the tank wall and will keep this water level whether you use it or not.

RODEO

The Edwards County Fair Association, Inc. announces that it will again sponsor its annual open rodeo in Rocksprings, Texas on Friday June 30th, and Saturday July 1st. Three rodeo performances are scheduled; one on Friday the 30th at 8:00 p.m. with two performances on Saturday the 1st at 2:00 p.m. and 8:00 p.m.

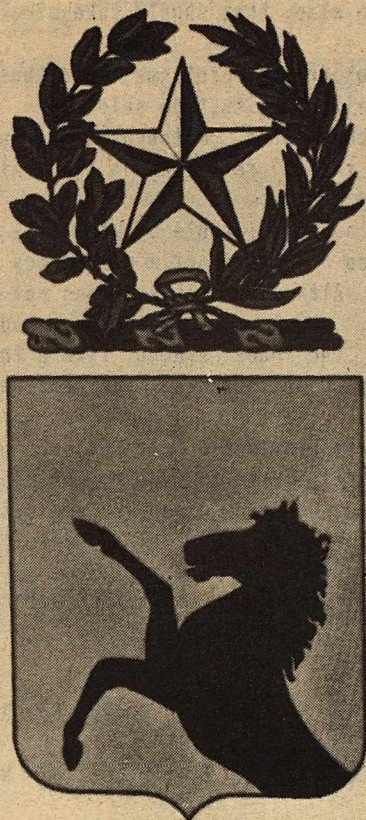

There will be a dance on the open pavillion each night starting at 10:00 p.m. and lasting until 2:00 a.m. Carolyn Steele and Southern Fever will perform on Friday night with The Bobby Jenkins Band playing on Saturday night.

Other attractions will be a County Team Roping and a Businessman's Steer Saddling, both to be held during the rodeo performances. Bar-B-Que will be served daily along with other various concession stands. For more information call 512-683-3185.

"Nobody ever listened himself out of a job."

Calvin Coolidge

FORT CLARK ARMY DAYS

BY WALLACE MORGAN

The 112th Cavalry, Texas National Guard was inducted into Federal Service on 18, Nov. 1940 at Home Stations. They were inactivated from Federal Service on 20, September 1945, at Camp Rucker, Alabama.

After this unit was called to active duty, with their horses, they were sent to Fort Clark, Texas, where they trained as part of the 1st Cavalry Division. They went to Fort Bliss, Texas, then to overseas duty in the Pacific operations area. Their Campaign participation credit was in New Guinea, Bismarck, Archipelago, Leyte, and Luzon. They received the Phillipine Presidential Unit Citation, streamer embroidered 17 October, 1944 to 4 July, 1945.

Prior to being activated into Federal Service, this National Guard Unit was part of the Texas 56th Cavalry Brigade, which later became the 56th Cavalry Brigade mechanized. The 112th was primarily from the Dallas-Ft. Worth & areas near there.

This Unit is still an active National Guard Unit. Only it is now mechanized, with no horses. Their motto is as always "Raring to go."

A LETTER OF THANKS

THIS IS A COPY OF A LETTER SENT TO THE KINNEY CAVALRYMAN FOR MISS COOKIE HOUGH.

Dear Cookie:

Your mother recently forwarded two copies of the article you wrote for the Kinney Cavalryman on June 1 regarding the TSD visit to Brackettville. It was a very good article and you must be proud that your local newspaper printed it for everyone in your community to read.

We are delighted you and our TSD students had a good time and hopefully this can become an annual trip to your community.

Your mother also requested the titles of sign books which would be helpful to you in learning more sign language. I have spoken with our Sign Language and Interpretation Services Department here at TSD and they inform me that any bookstore in your community would have the types of beginning signing books you could use. Two texts entitled JOY OF SIGNING by Lottie L. Riekehof and SIGNING: HOW TO TALK WITH YOUR HAND by Elaine Costello are especially recommended.

In addition, the TEXAS PREFERRED SIGNS BOOK may be purchased from the Publications Department, Texas Education Agency, Second Floor, 1701 N. Congress, Austin, Tx. 78710-1494. The price is \$12.84.

We hope this has been helpful to you. Congratulations on your reporting debut and for your interest in learning to sign. If we can be of further assistance, do not hesitate to write or call me at (512) 440-5479.

Sincerely,
S/S Patricia L. Beard
Public Information Officer
TEXAS SCHOOL FOR THE DEAF

PRAYER TO ST. JUDE

May the Sacred Heart of Jesus, be adored, glorified, loved and preserved throughout the world now and forever. Sacred Heart of Jesus, pray for us.

St. Jude, worker of miracles, pray for us.

St. Jude, help the helpless situations, pray for us.

Say this prayer 9 times a day for 8 days and then publish. Your prayer will be answered. It has never been known to fail. Publication must be promised.

REFLECTIONS FIRST BAPTIST CHURCH BY PRESTON TAYLOR

Once upon a time Ira Yates and his wife Ann, (hence, Iraan), traded their store for a wind-swept cactus-and-mesquite infested sheep and goat ranch.

Six months later an oil company "punched holes" in the land. The first well produced 80,000 barrels of crude oil a day and the second one flowed with 150,000. We would all be glad to have riches like that, wouldn't we?

The story of "overnight wealth" that came to a west Texas rancher introduces the first chapter of my book on Revelation.

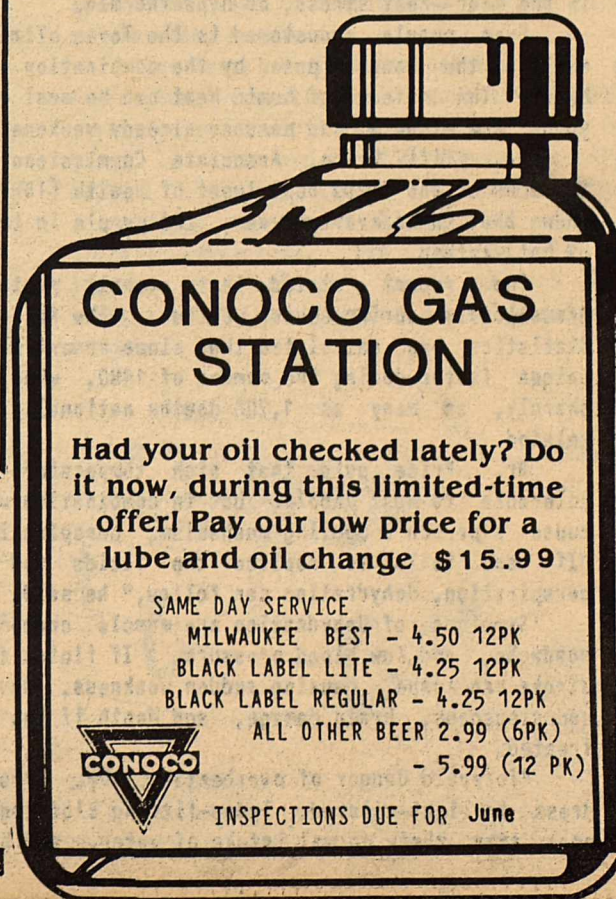

In fact, hundreds of heart-warming stories in this new book make it sparkle like a thousand springs of water in a dry, parched desert.

I have tried to make the normally hard-to-understand symbols and complicated plot easy to understand for every reader. Those who have read the manuscript say that anyone may go through the "jungle of difficulties" in Revelation with this book and not get lost.

On Sunday, June 25 (this coming Sunday), an "autograph party" is scheduled for all who want to buy a copy of Revelation: Past . Present . Future.—or for those who simply want to come by for coke, punch, and a visit.

The event is from 5:00 to 7:00 p.m. in the Fellowship Hall of the First Baptist Church. Sixty percent (60%) of all Brackettville sales go to the scholarship fund for Melissa Meyer and Lee Floyd. The price of the 290 page, 36 chapter book is \$10.00.

Join us, please. Ask a friend to come with you. You'll find the book easy to read and your investment in the lives of two College-bound young people will be greatly appreciated.

For information about Medicare claims, call Toll-free 1-800-442-2620.

Toll-free telephone service is available at the Department of Human Resources at Carrizo Springs and Crystal City. In Uvalde, toll-free calls can be made from Super "S" Food Store.

If you need to see a Social Security representative in person, always phone before you go to the Eagle Pass office or meet the representative in the towns shown below. When you call, you may find that your claim or other business can be handled entirely by phone, or we can tell you what documents you need to bring when you visit.

SCHEDULE OF VISITS JULY 1, 1989 THROUGH SEPTEMBER, 1989

TOWN	PLACE	TIME	JULY	AUGUST	SEPT.
CARRIZO SPRINGS	Dept. of Human Resources	9:00-2:00 Wednesday	19		
UVALDE	Civic Center	9:00-2:30 Wednesday		16	
CRYSTAL CITY	Dept. of Human Resources	9:00-2:00 Wednesday			20

NATIONAL HOLIDAYS: July 4, Independence Day
September 4, Labor Day

ACCENTS ON HEALTH HEAT STRESS INCREASES WITH HUMIDITY

Recent sporadic rains, coupled with the early onset of hot weather in Texas, have created a weather hazard usually expected later in the year--heat stress, or hyperthermia.

Even people accustomed to the Texas climate sometimes fail to realize the dangers posed by the combination of high humidity and heat. The affect of humid heat can be most dangerous for the very young, the elderly, and persons already weakened by illness.

Dr. Clift Price, Associate Commissioner for Personal Health Services at the Texas Department of Health (TDH) said a recent report shows that in an average year, 200 people in the U.S. die as a result of hot weather.

The report stated that overall mortality rates increase dramatically during severe weather. The National Center for Health Statistics has calculated that since an extreme heat wave was the unique factor during the summer of 1980, when mortality rates jumped sharply, as many as 1,700 deaths nationally may have been heat related.

Dr. Price said that high temperature alone is physically tolerable to most people, but in combination with humidity, it can cause a person's cooling mechanism, perspiration, to work overtime. "If one fails to replace the fluids and salts lost through perspiration, dehydration can follow," he said.

Symptoms of dehydration are muscle cramps, nausea, dizziness, headache, and low blood pressure. If fluids are not replaced, heat stroke can ensue, causing sudden weakness, severe headache, loss of consciousness, brain damage, and death if the victim is not quickly treated.

"To avoid danger of overheating," Dr. Price said, "people should dress in light-colored, loose-fitting clothing. They should drink more than their normal intake of water, and be sure to have water

available if they need it. They also need good ventilation, and perhaps as important as anything else, they should take stock of their own physical conditions."

"Persons with heart or respiratory problems, and those taking certain medications, are especially at risk," he said.

Dr. Price said that in recent years, meteorologists have begun using the term, "heat stress index," referring to the relationship between temperature and humidity.

The heat stress index is a numerical table by which the National Weather Service rates the degree of discomfort a person may feel at a given temperature and humidity. Although the table does not allow for the variables of wind and shade, which can influence an individual's tolerance of heat and humidity, the index reading, like a thermometer reading, is useful in helping persons take needed precautions against hyperthermia.

A heat stress index of 105 is considered very dangerous.

To determine the current heat stress rating, using the National Weather Service index chart, find the index number in the column below the current humidity (horizontal line on top) that is directly to the right of the current temperature (vertical line at left).

NEWS RELEASE

The Fort Clark Springs Association, Inc. Board of Directors on Saturday, June 17, 1989, took action to curtail guest privileges for Fort Clark Springs members.

Due to abuse of the guest privileges by a few members, the Board felt it necessary to take this action. Specifically, on some days there were four (4) times as many guests using the swimming pool as there were members. This is unfair to those members paying to support the Association and who do not abuse the system.

Guests who live within 20 miles of Fort Clark Springs are no longer authorized use of it's recreational facilities, unless they are physically accompanied by the member.

**TRACKS
ALONG THE
TRAIL
BY DORTHY PAYNE**

Back before World War I, Alonzo "Zo" Elliot wrote a song with his classmate Stoddard King for a musical production at Yale University. It was originally a March, but was shelved soon after it was published.

One day during the war the publisher heard some Canadians singing the song coming down the Thames River in London. It was taken off the shelf and put on the market. Eventually, it was to sell five million copies. The name of the song was "There's a long, long trail a-winding."

Zo Elliot was also a classmate of Cole Porter and studied with Nadia Boulanger and Leonard Bernstein.

Elliot was drawn to Lincoln, New Mexico, because of the "Lincoln County War." He came to Lincoln to do research and write an opera. He called his opera "El Chivito" and he naturally starred the boy in the news, "Billy the Kid". He hoped to interest a Santa Fe tenor to play the part of "Billy" and hoped to persuade the conductor of the San Antonio Symphony Orchestra as a guest conductor. But something happened and the production never came about and was almost forgotten.

When Elliot left Lincoln, he suffered a stroke and died soon afterward. Somehow the opera was lost and no one knew what happened to it, it could be gathering dust somewhere in Lincoln, maybe in an old attic.

At the same time another American composed a piece of music called "Billy the Kid Ballet." The composer's name was Aaron Copeland, who was living in Paris, France.

To this day, the opera has never turned up. "Zo" Elliot's "There's a long, long trail a-winding" is still remembered by old timers all over the world, long after "Zo" Elliot is forgotten.

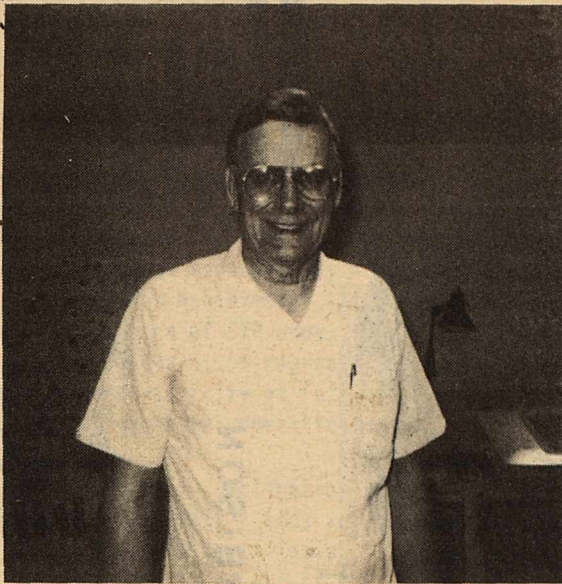

**THE MONKEY'S
DISGRACE**

Three monkeys sat in a coconut tree
Discussing things as they are said to be
Said one to the others, "now listen, you two,
"There's a rumor around that can't be true
"That man descended from our noble race
"The very idea is a great disgrace.

"No monkey has ever deserted his wife
"Starved her babies and ruined her life
"And you've never known a mother monk
"To leave her babies with others to bunk
"Or pass from one on to another
"Till they scarcely know who is their mother.

"Here's another thing a monkey won't do
"Go out at night and get on a stew
"Or use a gun or club or knife
"To take some other monkey's life
"Yes, man descended, the ornery cuss
"But, brother, he didn't descend from us."

**REV. TAYLOR BOOK
SIGNING ON SUNDAY**

A local pastor has published a book on the difficult, yet exciting themes on the Bible's Book of Revelation. Preston Taylor of Brackettville's First Baptist Church will have an autograph party at the church's Fellowship Hall on Sunday, June 25, from 5 to 7 p.m.

Opening with the theme "A Book That Blesses" and closing with "Captivating Conclusions," this pastor deals with some of the most difficult yet most exciting themes in the Bible. The book of Revelation comes alive under the agile pen of one of the down-to-earth authors in our day," said Dr. Rudy A. Hernandez of the Metro Park Baptist Church of San Antonio in the Book's forward. "His use of illustration both from history and personal experience is superb," Dr. Hernandez continued. "I believe this writing will bless thousands even as his previous writings have done. God's hand has been upon the author in the preparation of this book."

Other books by Rev. Taylor are Phillippians: Joy in Jesus, A Letter From Peter, Exodus: Escape From Evil, and 111 Bible Messages. Make plans to join Rev. Taylor and the congregation of the First Baptist Church from 5 to 7 p.m. on Sunday, June 25 to celebrate the joyous occasion of a local writer's work.

60% of the proceeds of the party will go to the Melissa Meyer and Lee Floyd Scholarship fund.

**TEXAS - MEXICO
BORDER HEALTH CRISIS**

Industrial "booms" often mean rapid population growth and unregulated economic development. Along the Texas-Mexico border, where factories employing cheap labor have sprung up, serious health problems threaten the well-being of a population of Texans often referred to as the "working poor," says the Texas Medical Association.

Dr. Laurance Nickey, chairman of the Texas Medical Association's Council on Public Health and director of the El Paso/County Health District, calls the border region and its health problems the "slowly ticking time bomb of Texas."

Situated outside Texas border cities, such as El Paso and Laredo, are colonias, or subdivisions with limited water and sewer services. These poor, unincorporated settlements are similar to the colonias that surround many Latin American cities, such as Mexico City. Colonias have existed on the Texas border for many years, but as housing in the cities became scarce and the low-income population grew in the 1970s and 1980s, their existence has become more pronounced.

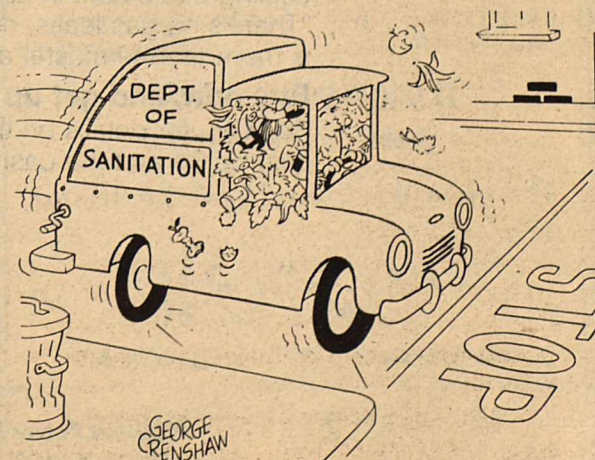

A national study requested by Sen. Lloyd M. Bentsen, D-Texas, states that as a result of many problems, including inadequate water and sewer services, Texans living in colonias along the Mexican border have, by far, more diseases linked to poor hygiene and unsanitary conditions than other residents of the state or nation.

Colonia residents survive by piping in water for household use through makeshift plumbing from outdoor tanks and wells. Much groundwater under the colonias is contaminated from outhouses and septic systems. For survival purposes, drinking water is brought in from other communities and stored in all-purpose industrial vats supplemented by gallon jugs. Unfortunately, as a result of these and other unsanitary practices, many residents suffer a high rate of gastrointestinal diseases, hepatitis, tuberculosis, and syphilis.

In 350 colonias around El Paso, 28,000 residents live without running water, and 53,000 live without sewer service. In the Lower Rio Grande Valley of South Texas, more than 70,000 people live in 5,000 colonias in three counties with the same substandard living conditions.

The Texas Medical Association recognizes the serious health threats to border residents and supports Sen. Bentsen and others in their attempts to urge Congress to expand Medicaid, and the nutrition program for women, infants, and children, as well as use other ways to combat this health care crisis along our border.

The Texas Medical Association is a professional organization of more than 29,000 physician and medical student members. It is based in Austin and has 116 component county medical societies around the state. The Association represents 80 percent of the State's physicians, and its goal is to improve the health of Texans through the professional and personal development of members.

"WATCH THOSE SUDDEN STOPS, WILL YA, SIMPKINS?!"

BELLS ARE RINGING!

RANEA HARRISON

JOSEPH GRUNOW

ENGAGEMENT ANNOUNCED

Mr. & Mrs. George F. Harrison of Fort Clark Springs announce the engagement of their daughter, Miss Bernice Ranea Harrison, to Mr. Joseph Michael Grunow, son of Mrs. Helen F. Grunow of Norton Shores, Michigan.

Miss Harrison is a graduate of Alamo Heights High School, San Antonio, Texas, and attended Texas Military Institute and Schreiner College at Kerrville, Texas. Mr. Grunow is a graduate of the Community College of the Air Force and is stationed with the United States Air Force at Laughlin Air Force Base in Del Rio, Texas.

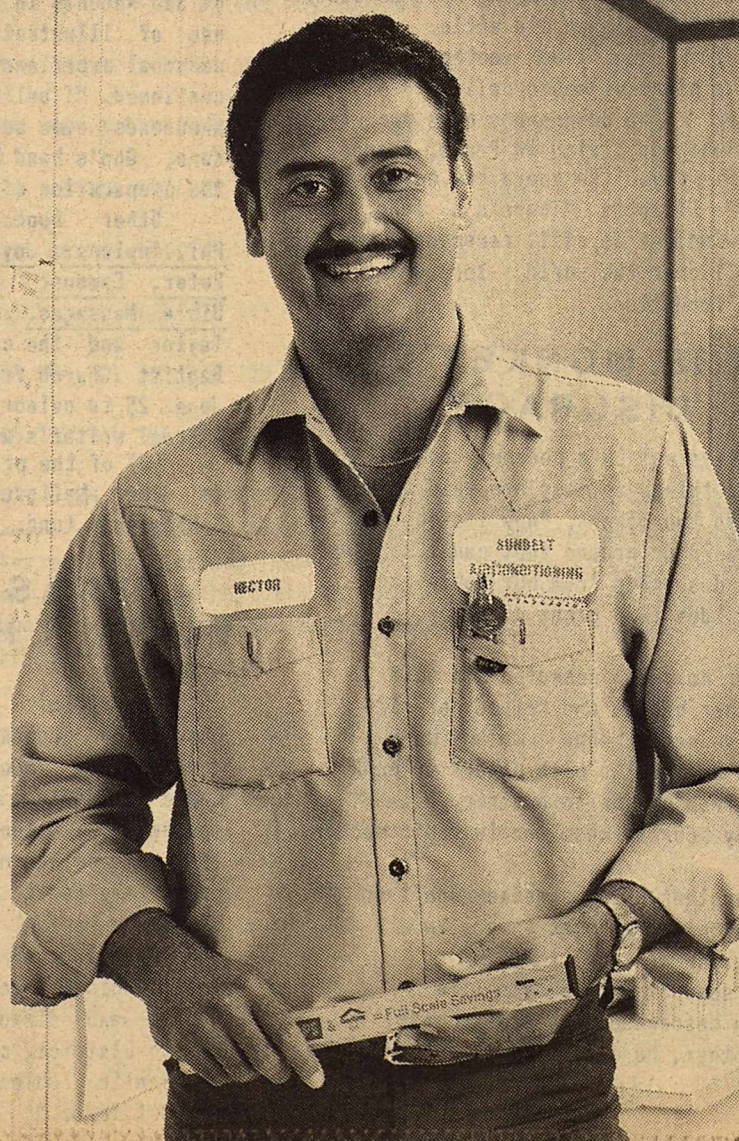

A July first wedding is planned at the First United Methodist Church in Brackettville, Tx.

"The electric heat pump is reliable, efficient and a lot safer than gas."

*Hector Rosas
Sun Belt Air Conditioning, Inc.*

The switch is on to the electric heat pump. Why switch to an electric heat pump? We asked Hector Rosas who sells and services heating and cooling equipment in Laredo. Hector says, "There's no gas leaks, no pilots to light, all you do is move the thermostat and let it go."

Buy now, and get up to \$400 cash back! Call CPL for details on the year-round electric heat pump and the cash rebate.

BRUSH

COLLEGE STATION—When plants develop full foliage in early summer, many farmers and ranchers notice an increasing density of brush in their fencerows and pastures. It's also a good time to do something about it, says Dr. Tommy Welch, Extension range brush and weed control specialist.

Left alone, brush eventually decreased forage production of a pasture and can destroy fences costing \$3,500 or more per mile to replace. It's usually easier, cheaper and more effective to treat brush when it's small and scattered -- before it grows into a bigger problem, Welch says.

For treating fencerows and scattered stands of brush, a method called "high volume foliar application is both handy and effective, the specialist says. With this method, a diluted solution of a herbicide is hand-sprayed directly on the leaves of the target plant until they're dripping wet. Only the targeted plant is sprayed.

Getting good control with this method requires spraying foliage when it's receptive, covering the plant thoroughly with enough herbicide solution, and using a herbicide that's effective on the targeted plants.

Brush plants are most susceptible when they're actively growing. For best results, spray after the leaves have matured, and turned from light green to dark green. The foliage should be healthy, not damaged by disease or insects. Spray before leaves develop a waxy layer as they will later in the summer, Welch recommends. In Texas, optimum conditions usually are in mid-May through late June.

Getting good coverage of the plant usually is easier with a handgun sprayer. Welch says pump-up and backpack sprayers may work well on small and scattered plants, but power sprayers are quicker and make it easier to cover larger, thicker brush.

The choice of foliar herbicides should depend on the brush species to control, Welch says. Combinations of active ingredients -- either in a commercial premixed product or in separate products you mix yourself -- generally will broaden the spectrum of control.

Selective range and pasture herbicides readily available for foliar use include Grazon*ET, Grazon PC, Grazon P+D, Banvel and Crossbow*. Used at recommended rates, these selective herbicides won't harm grasses. Susceptible species and directions to mix effective herbicide combinations with these products are on the individual product labels, Welch advises.

Be aware of any potential for drift, and avoid herbicide contact with any desirable plants in the area. Using a coarse spray and a drift control agent can help. Carefully read the herbicide label, and follow any recommended safety precautions.

After spraying, affected foliage should "brown out" without two weeks. Be prepared to go back and respray any brush that escaped control the first time, Welch suggests.

CENTRAL POWER & LIGHT

Early the morning of June 19, 1989, the South Texas Project Unit 2 became the second nuclear-powered generating unit in the state to be declared in commercial operation. The declaration was made shortly after midnight.

With this achievement, the construction and testing era of STP comes to an end. Both of the plant's 1,250-megawatt reactors are producing electricity at full capacity. Unit 1 began commercial operation on August, 25, 1988.

"With this declaration of commercial operation, STP Unit 2 adds a new dimension to energy independence in Texas. In the early '70s, as we faced one of the most severe energy crises in our nation's history, we made a commitment to diversify our fuel base. Today, we see the full realization of that goal. In the future, this achievement will help us better defend against fluctuations in our energy supply," said Tom Shockley, president and chief executive officer of Central Power and Light Company. CPL owns 25.2 percent of the plant.

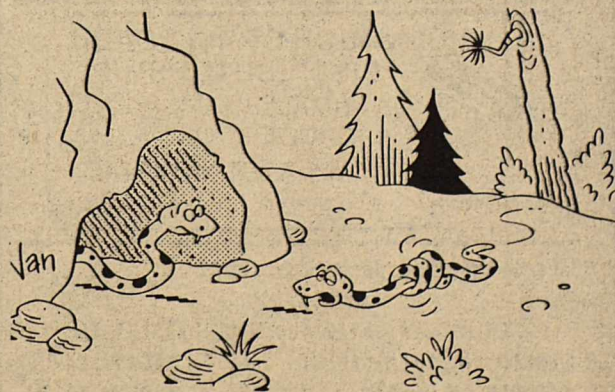

"About a quarter of our electric supply to our customers will be produced by low-cost nuclear fuel. Additionally with STP, South Texans can count on an ample, reliable supply of electric power which will help attract new business and industry and build jobs."

Start-up testing on Unit 2 began in March when it received a full-power license from the Nuclear Regulatory Commission. The unit must now be certified in commercial operation by the Public Utility Commission of Texas.

"Since Unit 1 began operation, it has had one of the highest performance records of new nuclear units in the nation," Shockley said. The unit has been "at power" for more than 100 consecutive days since it was returned to service March 5 following a maintenance outage. At full capacity, both units produce enough power for half a million homes.

The nuclear power plant in Matagorda County has attracted international attention as a state-of-the-art plant with recent visitors including engineers from the Soviet Union, Japan, and the Peoples Republic of China. A delegation from France is expected to arrive this week.

STP is owned by CPL, Houston Lighting & Power Company, and the cities of San Antonio and Austin.

"NEVER TRY TO BITE A BOY SCOUT!"

LETTER TO THE EDITOR

Dear Editor:

Beef is back. That's good news to those of us who enjoy eating beef, whether it's a lean, tender steak; a convenient, flavorful roast; or a burger with all the trimmings. It's also good news to those of us who are beef producers.

Beef is big business. The beef industry is the single largest segment of American agriculture with sales of cattle and calves accounting for about 22 percent of total receipts from farm marketing. In Texas, cash receipts from cattle and calves totaled \$4.9 billion in 1988. And every dollar of cattle sales directly generates an additional \$5 to \$6 of business activity in the farm supply and food businesses.

There's an important reason why beef is back. Beef producers became part of a new era in the beef industry on October 1, 1986, when the national beef checkoff program began. Through the checkoff, beef producers invest one dollar per head of cattle sales in a program which funds beef promotion, education and research at both the national and state levels.

June 27, 1989, marks the 1,000th day of the national beef checkoff program--1,000 days of solid progress for us in the beef industry. The result is a better, more nutritious and enjoyable product for consumers and improved profitability for the biggest single sector of the agricultural economy.

Sincerely,
S/S Bob Nunley
