8 Schools Get \$245,000 in Federal Funds

Some \$245,000 in funds have come to the eight high schools of Eastland County during the current school year through federal programs that the county superintendent's office has administered, according to R. B. Golemon in a talk Wednesday at the weekly Cisco Lions Club luncheon.

In addition, the sum of \$45,000 has been approved for the summer. Most of this goes to students in pay for

work under the student employment program. Some 160 students earn some \$15 per week in jobs created by the schools for equipment maintenance and improvements, Mr. Golemon said.

The county superintendent's office handles the paper work for all eight of the high schools. In these programs, the government puts up 90 percent of the money and the district the balance. In addition to the student work program, other projects benefit the school libraries and help with equipment purchases and installation.

This program for the public schools is in addition to benefit received by Cisco and Ranger Junior Colleges, Mr. Golemon said.

Mr. Golemon reported that application has been made for participation in a new program — the head start project — that benefits five and six years old children. This program will be available only in Cisco and it is expected that three classes will be set up. In addition to pre-school orientation, the youngsters will receive physical examinations and immunization shots. An announcement concerning this program is expected to be made in the near future, Mr. Golemon added.

Lion Bob Hammett was named chairman of the nominating committee to submit a slate of officers for the new year that will begin July 1.

Guests included Joe Dennis of Ranger and Victor Childers of Cisco.

Mildew thrives in hot, humid weather. High moisture causes the mold spores, which are always present in the air, to settle and grow on shoes, clothing, furniture and books.

The best protection against mildew is its prevention. To remove dampness, the use of air conditioners, dehumidifiers, heat and chemicals is recommended.

Air conditioners are good dehumidifiers because cool air contains less moisture than warm air. You can also fight off dampness by heating the house for a short time. Then open the doors and windows to let the moist air out. An exhaust fan will help force it
