

THOUSANDS TO WITNESS PROGRAM CELEBRATING OPENING OF PAVEMENT

Mayor R. E. Thomason And H. L. Birney of El Paso On the Program

PROMINENT SPEAKERS Colorado Municipal Band To Furnish Music, Aided By Visitors

Thousands of people are expected to hear the program for the celebration of the opening of the new paved road through Iatan Flat Monday evening at 7 o'clock.

Chief speakers for the celebration are R. E. Thomason, mayor of El Paso, and H. L. Birney, president of the Broadway of America.

Many other prominent men, including Hon. W. R. Ely, E. S. Sterling, and Cone Johnson, members of the State Highway Commission, Gib Gilchrist, State highway engineer, have been invited.

The prize song on the Iatan Flats will be sung at the celebration, if plans can be carried out, according to W. L. Doss, the instigator of this plan.

Following the speaking, an old fiddlers' contest will be held, then a square dance by old timers, followed by dancing on the pavement until a late hour.

CONSTRUCTION BEGUN ON NEW HUMBLE OIL CO. FILLING STATION HERE

New Station on Corner Of Second and Chestnut Entirely Modern

Construction was begun Monday morning on the new Humble Oil and Refining Co. filling station on the corner of Second and Chestnut streets, where implements owned by Price Bros. hardware were formerly parked or stored.

Murphy & Murphy, contractors of Mineral Wells, have the contract for the new station, which will be one of the most modern and attractive in this section.

The station is to be of red brick and buff-colored stucco, with a copper roof. It is to be corner drive-in style, and there will be 4,500 square feet of concrete in the driveways.

TWO ARRESTED HERE ON NARCOTIC CHARGE

Two persons, a negro and a white man, were taken up here last week by Dick Hickman, chief of police, on a charge of forging narcotic prescriptions. Both were turned over to Federal authorities.

The white man was charged with being a peddler of dope. Many Coloradans may recall the negro, by reason of the fact that he danced around on the streets on Saturday afternoons.

Rev. Ashford To Be Home Monday From Plainview

Rev. W. C. Ashford, who has been in a meeting at Plainview, Texas, for the past two weeks, is expected home Monday. John W. Cobb, who has been assisting Rev. Mr. Ashford in the Plainview meeting, will fill the pulpit here Sunday morning and evening.

On Monday evening at the church, Mr. Cobb will begin teaching the book, "Winning to Christ," by Burroughs. Lessons will continue one week.

T. & P. OFFICIAL SAYS COURTHOUSE LAWN IS GREAT INSPIRATION

Assistant to President Says Its Beauty Led to Making Railroad Lawns

Praise was given the Mitchell county commissioners' court for inspiring the beautiful green park spots along the Texas & Pacific by Ollie Webb, assistant to the president of the Texas & Pacific railroad, who was in Colorado Monday and talked to a group of business men Monday night.

Mr. Webb stated that the beauty of the lawn around the Mitchell county courthouse caught his eye some time ago, and impressed him until he was easily influenced to beautify spots along the railroad.

The talk also dwelt on the subject of taking our jobs seriously, and many of his statements were heartily endorsed by the business men who heard him.

Mr. Webb and Mr. A. E. Pistole, superintendent of the Rio Grande division of the railroad, were here to play golf with Tom Stonerod. Both praised the links on our club grounds.

Former Colorado Man Welcomes Air Derby in Midland

Lee Jones, Jr., son of Mr. and Mrs. Lee Jones of Colorado and formerly resident of Colorado, was official scorer for the Women's Air Derby, which arrived in Midland Wednesday afternoon. Jones is now a member of an oil company in Midland.

Methodist Young People Attended Sweetwater Meet

Attending a young people's district meeting of the Methodist church Monday in Sweetwater were Mrs. C. C. Thompson, Mrs. J. G. Merritt, Misses Ruthel McKinney, Nelda Garrett and La Vada Baze.

Miss Julia Lake Stevens, council superintendent of Young People, had been spending a week in the girls' camp at Palo Duro Canyon and offered to give one day in Sweetwater and one in Abilene. She spoke in the morning on the scope of young people's work, and in the afternoon on her experiences as a music teacher in Hiroshima, Japan.

CERTIFICATE TO BE GIVEN MOST USEFUL CITIZEN FRIDAY EVE

Name Being Withheld From Publication Until Time Of Program

The most useful citizen in Colorado during the past year will be presented a certificate of Distinguished Citizenship by the Oran C. Hooker Post, American Legion, at a public meeting Friday evening at the band shell in Ruddick Park, about 8:15 o'clock.

The name of the citizen winning in the contest is being withheld from publication until after the presentation of the certificate, in accordance with the rules of the contest, which is sponsored by the American Legion. Music by the Colorado Municipal Band will be one of the main features of the program.

The program in full for the occasion follows: Music by band. "America" by the audience. Address, "Meaning of the Award"—Joe Y. Franer.

Acceptance by Colorado's Outstanding Citizen of the year. "Star Spangled Banner"—Band.

Colorado School District Given Additional Aid

Approximately \$1637.00 additional State aid will be given independent school districts of Mitchell county as a result of transfers of rural pupils whose tuition will be paid by the State, according to Miss Ruby McGill, county superintendent.

A recent ruling by S. M. N. Marrs, state superintendent of public instruction, authorized the transfer by county school boards of those pupils in rural schools who could no longer get their required work in their own district. Pupils transferred under this ruling would have their tuition paid by the State.

Mrs. Thompson Honored By T. W. C. Exes

Mrs. C. C. Thompson, who was made president of the student alumni of T. W. C. in June, was called to Fort Worth last week on business of the organization.

While there she was given a luncheon and shown other courtesies, spending a delightful four days.

Ashford And Cobb Meeting Successful

Reports from Plainview, Texas, are that the revival being conducted there by Rev. W. C. Ashford, pastor of the First Baptist church here, and John W. Cobb, is proving one of the greatest revival successes in several years in that place.

Donation For Improvements In Park Begun

Erection of terraces, setting out grass and shade trees, and other improvements are among those suggested for Ruddick Park by a group of citizens who started a donation fund for this purpose this week.

Oscar Price heads the group, being the first to donate to the fund. Others who have donated are Dr. C. L. Root, Dr. P. C. Coleman, and J. A. Buchanan. The aim is to get one hundred people to subscribe to the fund. The money thus acquired will be spent under the supervision of the parks committee.

LIVESTOCK ASSOCIATION OF COUNTY SHIPPED ITS FIRST CAR WEDNESDAY

Twenty-Nine Head of Hogs And Twenty-Four Cows And Calves In Shipment

The Mitchell County Cooperative Livestock Shipping Association, organized some months back, shipped its first car Wednesday afternoon. There were twenty-nine head of hogs and 24 cows and calves in the load. Most of the cows were "boarder" dairy cows that farmers had culled out of their herds but the hogs were of high quality and are expected to top the market.

Credit for the work of making up the car and seeing that all stock was marked and loaded on time goes to U. G. Hardison who worked untiringly to put the shipment over. Every animal listed was delivered at the stock pens on time.

All details of shipping, marking, etc., were looked after by a shipping committee appointed by C. C. Thompson, president of the association, composed of S. O. Wulfsen, C. O. Powell and C. L. Grable. C. O. Powell accompanied the shipment to Ft. Worth.

Those who shipped stock in the car are: C. L. Grable, N. A. Tankersley, C. O. Powell, Clay Smith, Bryant Powell, W. W. Anderson, C. C. Tate, T. R. Koen, Jess Thomas, U. G. Hardison, Conway Iglehart.

Women Fliers Due To Pass Over Today

Fliers in the Women's Air Derby from Santa Monica, California, to Cleveland, Ohio, are supposed to pass over or near Colorado this afternoon.

A heavy rain and electrical storm extending west from Pecos to El Paso, held up the women aviators Wednesday and forced the air derby. Wednesday night in El Paso instead of Midland as scheduled. Therefore, the cross-country flight is several hours late. The planes are expected to pass over Colorado this (Thursday) afternoon at about 4 o'clock, stopping at Abilene at 5 o'clock and going on to Fort Worth for a night stop.

Ashford And Cobb Meeting Successful

Reports from Plainview, Texas, are that the revival being conducted there by Rev. W. C. Ashford, pastor of the First Baptist church here, and John W. Cobb, is proving one of the greatest revival successes in several years in that place.

TWO MEN CHARGED WITH HOLDING UP A CRAP GAME SATURDAY ARE CAUGHT

Woman Is Under Surveillance And Another Man Still At Large

Two men are in the Mitchell county jail, a woman is under surveillance and another man is being sought as the result of the robbery with firearms of a dice or "crap" game in South Colorado last Saturday night about 10 o'clock.

Seven people were in the game, negroes and whites, according to statement of Chief of Police Dick Hickman. Three men and one woman forced them to stand up and face the wall while their money and some other articles—such as knives—were taken from them. The robbers fired one shot when the gaming group did not rise fast enough, and one man received a slight wound through the hand and another man was wounded in the foot. The hold-up group made their get-away before officers were notified.

Two men and a woman were caught seven miles south of town Tuesday about daylight by Dick Hickman, chief of police, with Allen Kuykendall and Jack Delaney. Some members of the group of alleged robbers had been camped for some time in South Colorado, and were seen to return to the camp, presumably for some clothing, early Tuesday morning.

Chief Hickman was tipped off about their presence and immediately gave chase. The two men arrested and placed in jail charged with the robbery were identified by members of the robbed group. The men gave their names as Butler Carter of Colorado and L. D. York. The man still at large, against whom papers have been issued, is thought to be one commonly known as "Curly."

Mrs. Ragan Is Home From The Dallas Market

Mrs. Harry Ragan, who has charge of the ready-to-wear department of the C. E. Stone Co. store here, returned last week from Dallas, where she spent several days selecting new fall dresses, coats and accessories for her many customers. She also attended the style show while in Dallas.

Mrs. Ragan has the confidence of a large number of Colorado and Mitchell county women when she selects dresses and other articles for their approval, having been in this line of work here for several years.

COLORADO MEN ATTEND LORRAINE LUNCH CLUB

Two Colorado men, J. W. Randle, president of the Lions club, and J. H. Greene, secretary of the chamber of commerce, were guests at the Lorraine Luncheon Club Wednesday.

Randle took greetings to the club from the Colorado Lions' club, and Greene addressed the club on the subject of "Building a Community Spirit." Greene also took advantage of the occasion to invite Lorraine to participate in the celebration of the completion of the Iatan pavement.

J. C. Hall, vice president of the First State Bank in Lorraine, was selected by the club to represent Lorraine at the celebration. Tom Bennett stated that Lorraine will have at least 100 cars in the motorcade to the program Monday evening.

DISTRICT MANAGER OF HICKS CO. HERE TUESDAY

John Hill, manager of the West Texas district of Hicks Rubber Co., was in Colorado from Abilene Tuesday on business. He was accompanied by his wife.

Twenty Planes Roared Over Here Tuesday

Twenty planes, carrying more than two score crack navy fliers enroute from San Diego, Calif., to the National Air races which will be staged this month at Cleveland, Ohio, roared over Colorado Tuesday afternoon enroute to Dallas, where they spent Tuesday night.

Included in the group were six of the giant amphibian planes, capable of landing on either land or water, and carrying six passengers each. Every type of plane used by the navy was included in the group.

THREE THOUSAND CARS EXPECTED TO ATTEND IATAN FLATS OPENING

Completion of Paving Excites High Interest in Cities Along Broadway

A single goal will draw motorcades from towns all along the Broadway of America in West Texas next Monday evening when the celebration formally opening the stretch of paving in the once hazardous Iatan Flats is held.

Among downtown business folks alone of Colorado some one hundred and fifty cars have been signed up by their owners to join the motorcade from Colorado, moving from Second street at six o'clock for the scene of the celebration. Hundreds of other cars belonging to citizens living in and near Colorado will surely join this number.

Some three thousand cars are expected to be parked near the highway about the Dupree store in Iatan for the program. A motorcade is to start from Abilene and from Midland to converge at Iatan. Sweetwater, Roscoe, Lorraine, Colorado and Westbrook will join the Abilene motorcade and Stanton, Big Spring, and Coahoma will join the Midland delegation. The opening is exciting high interest in towns all along the highway in West Texas, as is evidenced in these notes from other cities:

Baird has announced that a motorcade from there will attend the celebration. The Fort Worth Association of Commerce wires that the best news yet is the completion of Iatan Flats paving.

H. L. Birney, president of Broadway of America and secretary of the El Paso Chamber, says: "I will be there. This is the greatest achievement on the Broadway."

Hon. R. E. Thomason, mayor of El Paso, Texas: "Sure, I'll be there."

T. N. Carswell, Abilene: "You bet, Judge Stinson and I will be with you."

Monte Owen, Sweetwater: "Yep, sure I'll be there."

C. T. Watson, Big Spring: "Ninety per cent of Big Spring will be there."

Paul Vickers, in person, Midland: "Yes-sir-ee, we'll be there."

Grading Began Tuesday Morning On Hickory St.

Grading preliminary to the paving of Hickory street began Tuesday morning.

Work of laying the curb and gutter along the street will probably be completed this week. Laying of the storm sewer was completed some time ago. West Texas Construction company has the contract for the paving, and Vedder Construction Co. laid the storm sewer.

ABOUT SEVENTY-FIVE STRAY DOGS KILLED

Some 75 stray dogs have been killed on the streets of Colorado in the past two weeks, states Dick Hickman, chief of police, in issuing another warning to Coloradans about letting their dogs roam the streets without licenses when rabies is so prevalent as it is now.

MUSICAL NUMBERS WERE PROMINENT IN TUESDAY LUNCHEON CLUB PROGRAM

One of Best Meetings So Far; Fund Started for Ruddick Park Improvements

Musical numbers figured prominently in the program of the Chamber of Commerce Luncheon Club Tuesday noon. The meeting was held one of the best in the club's history. J. Lee Jones presided and J. A. Pickens, Wash Whitaker, Rev. Alex Hanson, Hughwood Smartt, Harry Rattliff, Miss Beatrice Logan, J. A. Buchanan and Roy Dozier were Colorado guests, and R. B. Laker of Sweetwater was also a guest.

Hughwood Smartt with string music, and Roy Hester, band director, rendered a cornet solo, with Miss Beatrice Logan at the piano.

Miss Beatrice Logan was elected to honorary membership in the club. Roy Dozier, chairman of publicity, announced the Iatan Flat celebration which he requested J. H. Greene to tell about in detail.

Chairman Jones announced that Mrs. R. R. Harryman, Mrs. J. A. Buchanan, and Mrs. D. H. Snyder had won the yard beautification contest. None of the three ladies was present to accept the prize, but Mr. Buchanan accepted the check awarded his wife in her behalf, making a short talk of thanks as he did so.

It was also announced that O. B. Price has thrown out a challenge to the citizens to make up a fund to beautify Ruddick Park. He has begun the fund with a ten dollar donation. The chairman insisted that others contribute to the fund, and several have already answered the call.

The club adopted the proposed plan of having the one doing a stunt each Tuesday to announce the person and name the stunt for the following Tuesday. Roy Hester, who did the stunt this Tuesday, named Clyde Ney to fill that place on the program next Tuesday. His task is to give a three minutes talk on the school system of China.

"Education" is to be the subject of the meeting next Tuesday. Dr. P. C. Coleman is to be presiding officer at that time. Roy Dozier is to preside on Tuesday, September 3rd. J. B. Mills, chairman of the entertainment committee, announced an interesting program for next Tuesday.

CHORAL CLUB WILL START TWENTY-FIRST YEARS WORK SEPT 9

Club Will Give Customary Two Programs During Coming Year

Launching on its twenty-first year's work, the Colorado Choral Club, with Thos. Dawes directing, will hold its first meeting of the year on the second Monday in September, which will be Sept. 9, according to Prof. Dawes.

Prof. Dawes also directs choral clubs in Sweetwater and Snyder, besides teaching piano and voice in his studio here. The clubs of the three towns often join in programs during the year, it being a practice of the director to prepare and present at least two programs during each year, one near or during the Christmas season and the other in the spring.

Water System Of City Is Now Being Extended

Extensions of the city water system are being laid this week along several streets in the north and east sections of the city, according to L. A. Costin, city manager.

The mains are being extended along Locust, Hickory, Vine, Cedar, Fifth, Seventh, Eighth, Ninth, and Tenth streets. Two-inch mains on Vine street are being replaced by four-inch mains.

PHONE 144

Missionary Society Studies Minutes

The Methodist Missionary Society met Monday with Mrs. Garrett for the study of the Conference minutes. Mrs. D. N. Arnett conducted the devotional and Mrs. Garrett and Mrs. Looney led in prayer.

The president, Mrs. J. G. Merritt, explained the great delay in receiving the minutes and outlined some of the interesting things of the Conference. Mrs. Garrett gave extracts from the president's address. Mrs. Looney told of Mission study; Mrs. Hobbs of Children's work; Mrs. Van King of corresponding secretary's work.

The committee reports were discussed and things the Auxiliary needs to know were brought out. Mrs. Merritt presented the conference histories and several were sold.

The regular monthly business meeting will be held next Monday.

Honoring Miss Elizabeth Looney

Thursday afternoon Mrs. R. H. Looney very delightfully entertained at the Country Club in honor of Judge Looney's granddaughter, Miss Elizabeth Looney. There were twenty-four couples of the younger set who gathered at 7 o'clock for a swim.

At sundown a delicious fried chicken supper with salad, pickles, rolls, lemonade, Dixie cups, and cake was served.

After the supper, dancing was enjoyed until a late hour. This certainly was one of the very nicest affairs this group has enjoyed this summer.

Baptist Missionary Meeting

The monthly Missionary meeting of the Baptist W. M. U. was held Monday at the church, with Mrs. Greene Delaney and Mrs. Minnie Mannering as leaders. The meeting opened with singing "Take My Life." Mrs. Mannering read the scripture, and Mrs. Lasky led in prayer, followed by the song "Where He Leads Me."

The topic for study was "The Frontier." Mrs. W. R. Morgan told "Where Lies the Frontier." Miss McKell, Mrs. Farris, Mrs. Bennett and Mrs. Rose gave interesting talks on the need of missions in New Mexico. This was followed with a prayer by Mrs. Smoot.

Mrs. Lasky, Mrs. DeLaney, Mrs. Terrell, Mrs. Mannering, Mrs. Ash-

ford, Mrs. Smoot, Mrs. Jack Smith, and Mrs. Thompson told in a very helpful way what the missionaries have accomplished and what the Baptist are doing in New Mexico.

Mrs. Ashford led in prayer, and "Close to Thee" was sung. The meeting was dismissed by Mrs. Jack Smith.

The hostess for the afternoon served lovely cake and brick ice cream.

Farewell Party for Miss Mary Bean

Saturday evening at the Hicks home, Misses Mattie Hicks, Irene Powell, Nine Lee Rogers and Wanna Wade gave a farewell party for Miss Mary Bean, who has moved to her new home in San Angelo.

A large crowd of the younger boys and girls were present and the time was very happily spent in playing games of various kinds. Cold soda pop was served during the evening.

The group dislike very much to lose Mary Bean, but are glad she is going no farther away than San Angelo, as visits can be exchanged.

Merry Wives Club Have Chicken Barbecue

Tuesday evening at the Country Club the Merry Wives members and their husbands enjoyed a delightful outing. They gathered at 6:30 and after a swim played games on the lawn and in the reception room. An orchestra composed of Messrs. Pidgeon, Ed and Lee Jones, and Mrs. O. B. Price furnished music that was enjoyed and appreciated.

The delicious supper of barbecued chicken salad, pickles, rolls, pie, coffee and iced tea was served to about fifty.

It was voted to make this an annual affair, since everyone enjoyed it so much.

League Picnic

The Epworth League of the Methodist church had a picnic and swimming party at Seven Wells Friday evening after the refreshing swim in the Boy Scout pool they listened in on the Scout Campfire program for a while, then had their picnic supper and returned to town.

Sunday evening the League gave a program at Buford. Five cars filled with Leaguers, chaperoned by Mrs. Hinds, went out and presented a very interesting and helpful program under the leadership of Colorado president, Miss Mattie Dorn.

Presbyterian Circles Meet

The three circles of the Presbyterian Auxiliary met Monday with Mrs. Reese Jones. In the absence of Mrs. Peek the meeting was presided over by Mrs. Maddin. The devotional was conducted by Mrs. Jerold Riordan, who used the 15th chapter of Luke as the lesson. Mrs. Maddin

conducted the Home Missions lesson which was about the Indian. Mrs. Colman told of the work in Texas among the Alabama Indians. Miss Nell Riordan of the Oklahoma Presbyterian College for Indians; Mrs. Dougherty of the Oklahoma Indian girls who won honors in debating; Miss Mamie Riordan of the work in Oklahoma; Mrs. Jerold Riordan of Father Lloyd's prayer. Mrs. Andrews was a guest.

At the social hour ice cream and angel cake were served.

Monday the Inspirational meeting of the Auxiliary will be held.

Mrs. A. E. Maddin Entertains
Wednesday at noon Mrs. A. E. Maddin very delightfully entertained with a luncheon which was really an old-fashioned midday dinner, with the table filled with good things to eat. The guests of honor were Mrs. Samuel Gustine, one of Colorado's best loved elderly ladies; Mrs. Coper, mother of Mrs. Ben Plaster, who is visiting her daughter, and Mrs. Nail of Fort Worth, a long-time and much-loved friend of Mrs. Maddin. The other guests were Mrs. Ben Plaster, Mrs. W. B. Dunn, Mrs. S. H. Millwee, Mrs. Lucian Maddin, and Alfred Edgar Maddin.

After enjoying the sumptuous repast, the ladies got out their sewing and were joined by Mrs. G. B. Cole and Mrs. Holt. The three honor guests did most of the talking and did it in such an interesting way that the others were delighted to listen. Their conversation varied from conditions during the war between the States to the present day styles. It was a liberal education to hear these ladies heard the things they had themselves heard and seen.

During the afternoon an immense watermelon from the ranch was served. This was indeed a much enjoyed day by Mrs. Maddin's guests.

Bridgettes

The Bridgettes met Friday evening with Mrs. Arlie Taylor. There were six tables of players and a very delightful evening was spent.

The color scheme of yellow and white was carried out with luncheon cloths of yellow and white, two napkins being yellow and two white, and white cake with yellow icing, and yellow and white brick ice cream was served.

THE TEXAS WEEKLY INDUSTRIAL REVIEW

Sherman.—New Theatre opened to public recently in remodeled building at East Houston and Walnut streets. Public patronizing only the talkies here.

El Paso.—Plans under way for remodeling City Hall at expenditure of \$20,000.

Lampasas.—Ground broken for a 40-room fire-resistant hotel building.

El Paso.—City council approved expenditure of approximately \$108,500 for improvements to city waterworks system. The new \$100,000-000 Husman Apartments, 3325 Pershing Drive, opened to public. Contract is awarded for construction of office building at Texas and Stanton streets at cost of \$500,000. The Newman Investment company is moving into their new building, N. Stanton street. Construction of the Nichols Copper Co. is progressing rapidly.

San Marcos is extending water mains to render better service to the people.

Georgetown.—Plans under way for immediate erection of a cheese factory at this place.

Wink.—Several streets in this city have been oiled.

Brady.—Plans under way for establishment of an airport here.

El Paso.—Nichols Copper Company refinery will make an increase of approximately \$40,000,000 a year in El Paso bank clearings.

Yoakum.—Swift & Company will erect cold storage plant here in the near future.

Yoakum.—Plans under way for the construction of \$12,000 brick laundry building.

Itasca.—Construction under way on Presbyterian church edifice.

Gainesville.—Third oil gusher is being brought in on the Bulcher field recently. Drilling was carried on in the Cooke county field for 15 years before a heavy producer brought in.

Teague.—Construction under way on new building, adjacent to water plant on city's property, for new municipal power plant.

Port Arthur.—Plans proposed for erection of sea wall here at cost of approximately \$1,400,000.

SING SUNDAY EVENING AT FIRST CHRISTIAN

Miss Nancy Dawes and Mr. Willie Dawes of Big Spring, niece and nephew of Thos. Dawes, gave a musical number at the First Christian church open-air services on Sunday night. Mr. Dawes sang and was accompanied on the piano by Miss Nancy. The two have been visiting their uncle.

CHURCHES

METHODIST CHURCH

A nice increase in attendance at Sunday school last Sunday. Remember the time is 9:45 a. m. We are expecting you Sunday again and others who have been away on their vacations.

Themes for sermons are as follows:

11 a. m., "The True Ideal of the Church."

8:00 p. m., "Four Qualities of Real Christians."

Epworth League at 7 p. m.

You are invited to come and worship with us.

W. C. HINDS, Minister.

FIRST BAPTIST CHURCH

Sunday school at 9:45 a. m., G. B. Slaton, superintendent.

Morning services at 10:50, John W. Cobb preaching.

Sunday evening services with John W. Cobb preaching.

W. M. C. ASHFORD, Pastor.

FIRST CHRISTIAN CHURCH

Bible School at 9:45 a. m., W. W. Porter, superintendent. A special call is issued for each member of the Bible school to be present this coming Sunday. The hot weather has not diminished the enthusiasm of the members of the Bible school as the attendance is greater than ever before for this time of the year.

Preaching services 11 a. m. and 8:15 p. m. The subject of the morning sermon will be, "Tithing, Mint and Cummin." The evening sermon will be on the subject, "The Old-Time Religion." Dr. Root will sing at the morning hour and the evening service will again be on the lawn. The people poured out to the service last Sunday night from all over the county and have expressed themselves as greatly enjoying the services. Among the ones who will take part on the musical program will be: Sam Smith, Sam Scott, Ed Jones, Mrs. Berryhill, Dr. Root, Miss Broadus, and Clyde Haney. There will be one violin solo, two vocal solos, two duets, two quartets, and a sing-song led by Sam Smith, in which all old songs will be sung by the congregation. A baptismal service will be held in the church when the evening service is over.

A. E. EWELL, Pastor.

PRIMITIVE BAPTIST MEETING HERE FRIDAY

Elder L. B. Easterling of Richton, Miss., and Elder J. C. Morgan of Texas, able ministers of the Gospel, will preach at the Primitive Baptist church in East Colorado on Friday, August 30, at 11 a. m., with dinner on the ground, and at 2:30 p. m. the same day.

Everybody invited to come, bring your lunch and enjoy the day with us.

MRS. C. H. THOMAS.

THREE ESCAPE FROM STERLING CITY JAIL

(San Angelo Standard)

All efforts to locate three persons, two negroes and a Mexican, who escaped from the Sterling county jail Sunday night, had failed up to Tuesday noon. Sheriff Bob Hewitt advised after a long distance conversation with Sheriff Vern Davis of the neighboring county. The men either had keys and unlocked the doors to the jail or were assisted by some one on the outside, Sheriff Davis believes.

The three had previously escaped jail, but were retaken in the brush near the North Concho.

Those breaking away from the jail were Curtis Wilson and Alex Ellis, negroes, and a one-armed Mexican, whose name is not known.

The men drank one bottle of tequila at the jail and took four other bottles with them, Sheriff Davis said.

Wilson is described as a black negro of heavy build, about 20 years old. Ellis is a yellow negro about 19, with thin lips, long hair, and of slender build.

BAPTIST SUNDAY SCHOOL CONTEST GETS INTEREST

The contest between the Dorcas class of the Baptist Sunday school and the Men's Bible class, which has been in progress for the past four weeks, is exciting not a little interest. The contest ends in two weeks, and the losing class will be forced to do some honor to the winners. At present the ladies are ahead.

Visitation hours at the church on Tuesday morning were well attended, according to W. A. Rose. Every department of the Sunday school was represented, and practically every class was also represented.

ONE MILLION SIX-CYLINDER CHEVROLETS

DETROIT, Aug. 22.—One million six-cylinder Chevrolets have been placed on the road since the first of the year.

This sensational announcement, indicating as it does the great popular appeal of the new six-cylinder car, was made at the central offices of the company here today as assembly plants in various parts of the country were operating on the biggest summer production schedule in the history of Chevrolet.

Never in the history of the industry has any other manufacturer equaled the achievement of placing a million six-cylinder cars on the road in less than eight months. In fact, according to observers, this is more than three times as many six-cylinder cars as were ever produced by a manufacturer during a like period.

The record-making model, probably the most famous of all Chevrolet record cars, rolled off the assembly line at the huge Flint, Mich., plant on August 5. It happened to be a sedan—the new Imperial Sedan, introduced a few weeks ago. The gleaming record-breaker was welcomed at the end of the assembly line by W. S. Knudsen, president, and other high Chevrolet officials.

Without any ceremony the car left the plant for Detroit where it will be presented as one of the interesting exhibits that are to be a part of the mammoth Chevrolet sales convention in Detroit, August 14-15-16. The entire Chevrolet sales supervisory force of nearly 2,000 men will be on hand for the biggest convention of its kind ever held by the company.

N. T. A. C. ANNOUNCES PLAN TO HELP GIRLS

A plan whereby high school girls of ambition with limited economic means may attend North Texas Agricultural College is announced in the following letter, which explains how girls who are interested may learn about the plan:

"For a long time the North Texas Agricultural College has desired to give assistance to girls of high ambitions and limited economic means. It has recently completed arrangements whereby a group of 32 girls will be enabled to earn a considerable portion of their expenses while attending school. These girls must

have the equivalent of at least a ninth grade education and must furnish the best of recommendations. They will be received upon application. If you know of any girls who would likely be interested in this plan, please have them write the Registrar of the North Texas Agricultural College for an application blank and for further information. The college will appreciate any assistance you may give in getting this information to those who might profit by it."

GRAHAM Chamber of Commerce has started issuing a bulletin every month carrying details of the work done by the body. Civic improvements, service library, the fair, the stock law, advertising, airways, airport opening, highways, the membership drive and paving were topics covered this month.

REG ROBBINS SPENDS NIGHT IN COLORADO

Reg Robbins, one of the fliers who established the endurance record of the Fort Worth airplane some time ago, landed with a party at the Colorado airport Wednesday night and spent the night in Colorado. The party put up at the Colorado Hotel. They were enroute to meet the women air derbyists.

WEST TEXAS DRUGGISTS TO HAVE PICNIC AT ANGELO

Entertainment for the 400 druggists who are expected to attend the day and a half meeting of the West Texas Retail Druggists' association, which meets in San Angelo Aug. 20 and 21, will take the form of a picnic to the City Park as the guests of the Snowwhite Creameries Company, a banquet and a dance.

Special entertainment for the ladies who will attend the convention are being arranged under the supervision of Mrs. W. L. James. The sporting events will be in charge of H. E. McCullough, manager of the Angelus Pharmacy. These will include a trap shooting contest at the Country Club and a golf tournament at the club.

A. J. Buttery, who is connected with the Buttery Drug Company, has been named as chairman of the convention committee by the Board of City Development.

Headquarters for the convention will be at Hilton Hotel.—San Angelo Standard.

Poem Written By Westbrook Woman On Iatan Flat

There's as much truth as poetry in this poem on Iatan Flat which has been contributed by Mrs. T. E. Ellett of new Westbrook:

Like all you travelling strangers For I've a story to tell Of a road that runs through Iatan I know you all remember well.

Iatan Flat you all remember Was the name that's so well known As a dread to all the tourists, Especially if they'd started home.

If a cloud be passing over Just the size of a man's hat, And it happened to remember It was passing Iatan Flat,

If there fell ten drops of water, "Look," one of the travelers said, "We can never expect to get there, Iatan Flat is just ahead!"

A man named Jones from Mississippi Bought a home in Mexico, "But," said John, "you'll never get there, Iatan Flat's to cross you know."

Then a man in California Wanted a home out in the West, Then he thought of Colorado, For he knew that was the best.

Then he said, "Dear wife, remember, We'll have to go through Iatan Flat. If we ever reach Colorado We'll never be able to come back."

Now, the people of Mitchell county Were ashamed of such of that, So they voted on a road bond To build a road through Iatan Flat.

So the road is most completed On the twenty-sixth of July We'll step up in old Iatan, Through Iatan Flat we'll simply fly.

Come on, you folks from Mississippi, California or Mexico, You can pass through Mitchell county Iatan Flat you'll never know.

Old Mitchell was like a terrapin, Traveled way behind, But when you search for good roads In Mitchell now you'll find.

The very best road in Texas; Her people are the same, So, if you want a good home, Come to Mitchell—now be game!

—Mrs. T. E. Ellett, Rt. 1, Box 32, Westbrook, Texas.

PLYMOUTH ENGINE HAS FOOLPROOF OILING SYSTEM

"Automobile owners who have burned out engine bearings because of low oil supply can appreciate the fuel and lubrication systems in the Plymouth engine—an engine in which it is practically impossible for this accident to occur," according to H. E. Heath, service manager of the Plymouth Motor Corporation at Detroit, in writing to Harris Toler, Colorado dealer.

"The principle on which the Plymouth engine operates," said Mr. Heath, "is the control of the vacuum in the vacuum tank by means of the pump which circulates the lubricating oil to all moving parts of the engine. The fuel feeding system and the lubrication system thus work together and each acts as a check upon the other."

"This system of feeding fuel to the engine," he continued, "is quite simple, yet it has many advantages. A suction line running from the oil pump to the vacuum tank creates a vacuum in this tank supplying gasoline to the carburetor. In actual operation, if the supply of oil becomes so low that it no longer circulates to the bearings and other wearing parts of the engine, the suction line does not produce a vacuum in the tank and the engine stops running for want of gasoline.

"Another advantage of the system is the fact that the vacuum in the tank is at all times in harmony with the speed of the engine. As the engine is speeded up there is a consequent greater demand for gasoline. The speeding of the engine, by causing the oil pump to operate faster, causes a greater vacuum in the tank with the result that an increasing supply of gasoline is actually delivered to the engine. This differs from the inlet manifold type of vacuum control in that the greatest vacuum is produced when it is needed the most, while in the older systems the greatest vacuum is available when the throttle is closed and the engine should be burning a minimum of gasoline.

"This is but one of the many features of the Plymouth car, being a Chrysler Motors product, is built to certain standards of quality that are insisted upon for all Chrysler products.

IN DEFENSE OF W. E. REID

(An Editorial)

Something supposed to be a reply to the editorials The Record ran last week concerning the closing of the highway near Sweetwater during the opening of the Sweetwater Airport appeared in the Sweetwater Reporter last Sunday.

But it answered nothing. It gave Sweetwater's reasons for closing the highway—we knew those—but did not say where she got the authority to do so. Instead the article made of itself a personal attack on W. E. Reid, editor of the Colorado Record.

Mr. Reid has been too ill since last Friday to defend himself. Such being the case, some of the facts on his side of the matter should be given this week, and here they are:

The editorials in last week's Record were not personal attacks. They were merely the "voice of the people." Mr. Reid wrote them after scores of Mitchell county folk had visited The Record office asking that some kind of protest over their treatment by the officials of the Sweetwater Airport opening be made.

He knew before Sunday that he was to be flayed in Sunday's Sweetwater Reporter—a friend phoned him and warned him that such was to take place.

The editorial mainly attacks Mr. Reid's service as legislator at Austin, and in that the writer made a false step if he thought to materially harm Mr. Reid. The latter has never pretended to have political ambitions, and the fact that he lost money instead of making it at Austin says something for his integrity while on the job.

The Record knows, or believes it knows, that most of Sweetwater's citizens did not endorse the action in closing the highway and forcing tourists to detour eight miles or pay 50 cents per person to get through. Or they would not have endorsed it had they known the real facts and the things that would result from such an action.

But it was wrong and unjust to travelers along the highway to take such a step—it was wrong legally and from the viewpoint of fairness. Most Colorado folks thought it was, and demanded to be heard. Wed Reid, as editor of The Record, voiced their protest in the only possible way. He ignored personalities as much as possible, except to name those who should have been responsible whether they were or not.

As a result he has become the objective of a personal tirade. Telegrams reprinted in The Record last week from the State Highway Commission put him in the right as far as authority is concerned.

The voice of people not only in Colorado but all over this section who had to go over those eight miles of rocky detour put him in the right as far as justice and fairness is concerned.

SHORT WEIGHT IN SELLING COTTON IS TO BE FOUGHT

AUSTIN, Aug. 15—Although handicapped by having only six inspectors available, the weights and measures division of the State Department of agriculture will make a very strenuous effort to reduce short weights on cotton at gins, yards and compresses as the crop season moves northward, V. A. Stovall, chief of the division, announced today.

Two additional inspectors sought by the weights and measures head were refused by the Legislature during its session this year, Stovall said. As one of the six men available will be engaged in checking cotton grown on State prison farms from his headquarters at Houston.

An investigation by the division in

the Rio Grande Valley revealed that one-half of the scales tested had loaded poises, resulting in an average loss of between five and 10 lbs. to farmers on each bale. Other short weights, reported as the crop matures in counties further north, are being investigated.

An amendment to the weights and measures law passed by the Forty-first Legislature provides a fine of not less than \$20 or more than \$100 on first conviction and a penalty ranging from \$50 to \$200 for conviction on second offense.

T. C. Watson left Wednesday for Artesia, New Mexico, on business.

Mr. and Mrs. W. E. Dickenson, Mr. and Mrs. D. K. Nelson left Tuesday morning for Barksdale, Uvalde and Austin on a two weeks' visit.

Mounted by Doyle Williams, teacher of vocational agriculture here, specimens of the true moth of the leaf worm on display at bank here

Doyle Williams, Agriculture Teacher, Says Some Moths Not Harmful

There seems to be a mistaken idea among the farmers as to the true identity of the cotton leaf worm. Most farmers are under the impression that the small, yellow miller, so abundant in the cotton fields, is the cotton leaf worm moth. Fortunately this is the moth of a non-injurious insect. If the leaf worm moth were as numerous as this miller, it would be impossible to control them.

The adult moth lays eggs singly on the under surface of the leaves, near the top of the plant, and about 500 are laid by each moth. The egg is a flattened convex shaped, bluish green in color and with prominent ridges converging to the apex. The eggs hatch in about three or four days. The colors and feeding habits of the young caterpillars are well known to the cotton grower. When food becomes scarce the worms become cannibalistic, the stronger ones feeding on the weaker. The caterpillars become full grown in from one to three weeks during which time they molt some five times.

There are numerous insect enemies as well as insectivorous birds which feed on the young caterpillars. This is rather fortunate for the farmer because of the insect's rapid reproductive habits. The most common insect enemy is a small wasp-like parasite known as Pimple Conqueror which lays its eggs on the body of the caterpillar, and the maggots bore into the worm's body and feeds upon its juices.

Colorado has all kinds of weather prophets, and most of them have been working overtime trying to produce a little moisture. H. C. Mann, who had built up an excellent reputation as a forecaster, recently returned from his vacation and started immediately predicting rain, but he evidently lost his rabbit's foot while away, as not a single one of his predictions came true. The hopefuls then turned to Tom Goss, who builds his hopes and forecasting on the shape of the moon. Tom said it would rain Tuesday, August 20, and the writer had so much faith in the prediction he bought a sticker to wear during the downpour. Tuesday was the driest day we have had, and Tom Goss lost his reputation as a weather prognosticator. What Colorado needs is a weather prophet who can get results.

Methodist near quota in McMurry fund

Having worked to within \$400 of their quota, Colorado Methodists will come in for their share of praise if a prediction confidently made by Dr. J. W. Hunt, president of McMurry College, in Abilene last week concerning the \$250,000 endowment fund for that college comes true.

Dr. Hunt predicted that within one year the fund, pledged by the Northwest Texas Conference of the Methodist church, would be "all but in hand." The quota of the Methodist church here is \$4600, and \$4200 of this amount has been raised.

Dr. Hunt returned to Abilene last week from Wichita Falls and Henrietta. The week before he was in the Snyder district, which is in the Northwest Texas Conference territory, and in a day raised \$3,100 of that church's \$4,000 pledge for the college. "With about sixty days' work behind us to this date," said Dr. Hunt, "we can show about \$125,000 pledged. That sort of response tells us that the campaign is going to succeed—we feel that we can make that announcement stand up."

"All this means that for the first time in the history of West Texas Methodism, this section will have an endowed college—and with the largest endowment of any Methodist college in the State, except of course, Southern Methodist university, which draws from five states. The ready and cheerful response which we are receiving shows that the conference has taken McMurry to its heart."

Mr. and Mrs. Ben S. Peek are visiting in Waco and other East Texas towns.

RAIN NEEDED ON STREETS

The streets of the city are getting in pretty bad shape in some sections of Colorado, but until it rains very little can be done to remedy them. The new streets in North Colorado are so sandy it is almost impossible to get over them, and cars are sticking every day. However, these will be given a good coat of clay in the very near future, according to those in a position to know, and those thoroughfares will be put in excellent condition. The main thing needed right at this time is a little "aquapura" and it is needed badly.

Colorado has all kinds of weather prophets, and most of them have been working overtime trying to produce a little moisture. H. C. Mann, who had built up an excellent reputation as a forecaster, recently returned from his vacation and started immediately predicting rain, but he evidently lost his rabbit's foot while away, as not a single one of his predictions came true. The hopefuls then turned to Tom Goss, who builds his hopes and forecasting on the shape of the moon. Tom said it would rain Tuesday, August 20, and the writer had so much faith in the prediction he bought a sticker to wear during the downpour. Tuesday was the driest day we have had, and Tom Goss lost his reputation as a weather prognosticator. What Colorado needs is a weather prophet who can get results.

BROOKOVERS IN UNUSUAL ACCIDENT IN LORAINNE

Mr. and Mrs. Frank Brookover of Colorado, driving a Buick coupe, were run into simultaneously by two other cars last Sunday night, August 11, about 8:30 o'clock, in Lorainne, about four blocks east of Main street on the Bankhead highway.

A car driven by a Mexican and another from Abilene were about to collide and in avoiding each other both struck the Brookover car so hard that it had to be hauled back to Colorado. The Mexican's car was slightly damaged but the Abilene car escaped without injury. No one was hurt.

GONE-OVER USED CARS

WANTS TO GO FROM HOUSE TO HOUSE TO TELL ABOUT ARGOTONE

"If I Was Not So Busy With My Farm Work I Would Go Out And Tell Everybody About This Medicine," Says Clyde, Texas, Farmer

"If I was not so busy with my farm work I would just like to go from house to house and tell everybody about this medicine Orगतone," said R. L. Britton, a well known Texas farmer who resides on rural route 2, Clyde, Texas, while in Abilene for more Orगतone.

"I had stomach and rheumatic trouble and suffered torment with my back and side, the doctors could do nothing for me so a friend advised me to try Orगतone saying he had heard so many favorable reports about it, and I got a bottle.

"After taking the first bottle I felt so much better and the result is I am feeling like a different man. I have not had any more of those terrible rheumatic pains since I started on the treatment and those pains have left my sides and back also. I can eat anything I want and it don't hurt me, and I sleep like a log.

"To tell the truth I just simply feel like a new man and have more strength and energy than I have had in years. It is simply the greatest medicine in the world. I would like to see all of my friends and get those who are suffering to try it, and I hope you will reach them through this testimonial, which I have gladly given."

Genuine Orगतone may be obtained in Colorado from the Colorado Drug and the City Drug stores.—Adv

School

Needs Supplied Here Inexpensively

Helping Mother Prepare

For the Opening of School

Back to School! That glorious adventure of childhood! And what an important part pretty, stylish clothes play in helping your child enjoy school hours. Ten million Mothers will tell you that when you buy your school outfits here, they are not only stylish and serviceable, but actually *save you money*.

Why School Outfits Cost Less In Our Store

Probably you have wondered why things cost so much less here. The answer is that we plan and economize when buying, exactly as Mother does when selecting the school wardrobes for her family. But where Mother only buys for two or three youngsters, we buy for millions of them, and Mother's savings of a penny here and a dollar there, amount to a very large sum when you are buying for millions of families at once.

School Days will soon be here! We extend an invitation to Thrifty Mothers to pay us a visit of inspection.

CHRYSLER MOTORS PRODUCT

THE FULL-SIZE 4-DOOR SEDAN, \$655. Special equipment extra. \$655 and upwards, f. o. b. factory.

Plymouth excels in motor car Essentials

THE four things to consider most in selecting a motor car, are: The body, wherein you ride; the engine, which makes the car go; the brakes, on which your safety depends; the first cost and the economy of operation and maintenance affecting your purse.

ROOMIEST BODIES
Plymouth bodies are full-size—out-measuring the entire low-priced field in leg-room, elbow-room and head-room.

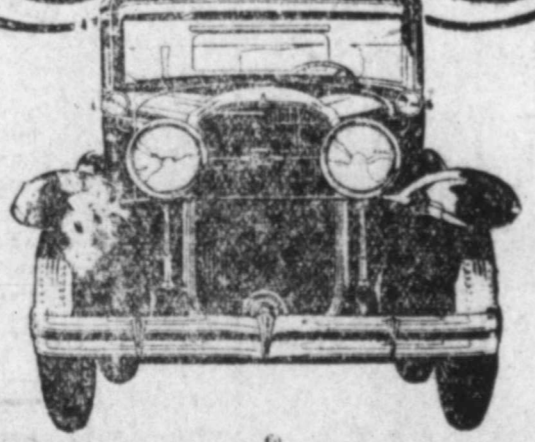

SMOOTH, QUIET ENGINE
The Plymouth power plant follows throughout the basic principles of Chrysler engineering—with Chrysler-like results. SUREST, SAFEST BRAKES
The full-size Plymouth is by far the safest low-priced car. It is the only low-priced car with equalized Chrysler weatherproof four-wheel hydraulic brakes.

LOW UPKEEP COST
The Plymouth is America's lowest-priced full-size car. Its simple, rugged and efficient engine uses gasoline sparingly.

THE New BUICK

The Greatest success in all Buick history

More people have purchased New Buicks during the past two weeks than in any similar period of any previous year

The New Buick with Body by Fisher has met with a veritable landslide of public demand. Many purchased before ever seeing the car—many thousands of others placed their orders the first few days it was on display—other thousands have been taking demonstrations and then making Buick their choice.

More Buick owners have entered orders—more men and women who owned other cars have turned to Buick—more people who formerly paid from \$1000 to \$2000 higher for their automobiles have purchased Buicks—than ever before during a similar period in Buick's twenty-six year history.

The total demand during these two weeks is from three to five times as great as that for any other automobile priced above \$1200.

Popularity so overwhelming carries an unmistakable message to every prospective motor car buyer: See the new Buick—drive it—compare it—and you'll quickly discover that it's the greatest dollar-for-dollar value in the entire quality field.

MONUMENT ON COLORADO-ANGELO HIGHWAY MARKS TRAIL BLAZED BY MULE TEAM DURING GOLD RUSH

Specding along the highway between Colorado and San Angelo, many Coloradans have no doubt wondered about the significance of the solitary monument standing to one side of the highway about a mile east of Carlsbad. Some have stopped and read the inscription, others have said to themselves that they are going to do so when they are not in such a hurry.

These who bother to stop or slow down at the marker read: "The Butterfield or California Trail, established in 1848, crossed at this point." Few of those who read this are polished enough on incidents of the country's early history to know of the romance and thrill attached to the blazing of that trail. In several

State papers recently appeared the following article about the boat-mule race that led to the establishment of the trail:

Down the Atlantic goes the Great Eastern, 7,000 yards of sail swings it around Cape Horn and eight engines with 1,100 horsepower speed it to the Golden Gate. Over the Butterfield Trail at a point near San Angelo sped the little Texas mules, racing to win a \$100,000 bet made by a sea captain and a mule driver, at a New York dinner.

The hurry to California for gold necessitated the opening of new trails over which the covered wagon slowly moved westward.

The trail to the California gold beds over which prairie schooners

were slowly pulled by oxen, today stands but a memory in the minds of the oldest settlers, and in the future would be forgotten but for the laudable undertaking of the Daughters of the American Revolution in marking and preserving historical spots, one of which is this historical Butterfield Trail.

Marked Near Carlsbad

A mile east of Carlsbad on State highway at a point where the old trail to California crossed the Concho river, is erected a marker about four feet high and is made of stone from the ford crossing of the Concho. This large stone is smoothed off for the inscription, "The Butterfield or California Trail, established in 1848, crossed at this point."

The Pochontas chapter, Daughters of the American Revolution, paid its debt to posterity in unveiling a monument at a point on which the old trail once passed.

At the dedication, about a year ago, Herbert Marshall, a distant relative of John Butterfield, in honor of whom the trail was named, attended the unveiling. Mrs. Lee Gentry was also present. Mrs. Gentry's mother, the late Mrs. M. B. Oliver, traveled over this trail in an ox cart enroute to California.

At the dedication the story was told of the exciting and famous race between the largest steamship afloat, the Great Eastern, and the overland stage, supervised by John Butterfield.

Blazed by Navy Captain

The blazing of the trail under Federal Government appropriation of \$150,000 for surveying this Southern route to California, a distance of 2,700 miles, was completed by a navy captain in 1848. Contracts for operating the line were given John Butterfield and Sam Fargo with the provision that the Government would pay \$600,000 yearly toward operating expenses and furnish safe protection for the stage. Forts were placed every 40 miles and there were stations every 10 miles.

Butterfield's and Fargo's contracts called for carrying express, mail and passengers (Fargo long after became a partner in establishing the Wells-Fargo Express Co.).

The race was the outcome of a wager made by Captain Harrison, commander of the Great Eastern, at that time the largest ship afloat, and John Butterfield, who met at a dinner in New York City.

Jesting, the two were comparing the merits of their route. A wager was suggested on the outcome of a race between the Great Eastern going by water around the Horn and a stage coach over the trail. Friends encouraged the bet and each is said to have put up \$100,000 that he could beat the other to California.

And the Mules Won

"I'm tired of hearing of your mule team speed," the commander of the ship is said to have told the trail blazer. This irritated the mule team owner and preparations were made for the race.

Over the Butterfield trail sped the mules. Down the Atlantic sailed the Great Eastern, swinging around Cape Horn, speeding to the Golden Gate.

The mule teams galloped from one frontier outpost to another, pulling the Concord coach. Mules were unhooked at each station and the fresh team hooked on without scarcely stopping the stage. The Great Eastern had extra men shoveling coal into her boilers, crowding the steam to the limit, with engines wide open.

The trail was 2,750 miles long, starting at St. Louis and Memphis, joining at Ft. Smith, Ark. From there the line of travel moved southward across the Red river at Preston, then to Fort Belknap and on to Ft. Chadbourne. From Fort Chadbourne the trail passed the spot on which the Butterfield marker was dedicated, enroute to Horsehead crossing on the Pecos, then to El Paso, through the south part of New Mexico, Fort Yucca on to Los Angeles and up the Pacific Coast to San Francisco.

San Francisco made a gala day of it when the coach rolled in 36 hours before the Great Eastern sailed into port.

Today the Butterfield marker stands out as a historic monument of the old dusty trail. Twenty feet to one side is a macadamized highway and 20 feet to the other side are the steel rails over which the locomotives speed, indicators of civilization to make the monument more impressive.

EL PASO Herald is obtaining material for the special West Texas Chamber of Commerce edition which will be published shortly before the eleventh annual convention there on October 24, 25 and 26.

COTTON BODIES TO GET LOANS FROM U. S.

WASHINGTON, Aug. 19.—The Federal Farm Board announced Monday it had agreed to make financial advances to cotton co-operative associations of the South to assist in the movement of this year's cotton crop. The Board said the cotton co-operatives were now able to obtain loans from Federal Intermediate Credit banks to the amount of 65 per cent of the value of cotton and the Board proposes to loan an additional 25 per cent.

90 Per Cent Credit

Commissioner Williams said the additional loans would enable cotton growers to obtain 90 per cent credit from the two government agencies on cotton, on which a definite value has been fixed by hedging in the future market.

The total volume of advances of this character to be made by the Board will be limited only by the actual requirements of the cotton associations. Williams said he expected this year's marketing would require between \$5,000,000 and \$10,000,000.

Not Forced on Market

"The effect of the secondary loans by the Federal Farm Board will be to permit the cooperative associations to make final settlement with the member growers when they desire to sell their cotton without forcing that cotton onto the market at a time when buyers may already be oversupplied," Williams said. The cotton associations, he pointed out, can add to the loans from their own capital reserve to pay in full the grower who is in distress and must have money, "and will at the same time be able to merchandise the cotton in an orderly fashion as the spinning mills of the world require it."

Texas Cotton Body Not to Need Farm Board Aid

DALLAS, Aug. 19.—While the Texas Farm Bureau Cotton association has made arrangements for financing movement and marketing of that part of the 1929 Texas cotton crop it controls, the Farmers Marketing Association of America planned immediately to ask the Federal Farm Board to advance \$10,000,000 for the marketing of the cotton held by the farm market association membership, it was announced here Monday.

Harry Williams, secretary-treasurer of the Texas Farm Bureau Cotton Association, said his group was entitled to a material loan from the farm board due to the fact that the farm bureau association owns and operates numerous cotton gins and warehouses, and has physical properties that would warrant a large loan. "We have already arranged to finance this year's crop, and for that reason do not find it necessary to ask federal aid at this time," he said.

CROSS-FLOW COOLING PROVES VALUE UNDER SUMMER CONDITIONS

With the advent of the dog days bringing the peak of summer heat and the peak of summer touring, the warm weather operating advantages of the Cross-Flow radiator become increasingly evident, it is pointed out by B. H. Anibal, vice president in charge of engineering for the Oakland Motor Car Co., in a letter addressed to A. J. Herrington, Oakland-Pontiac dealer for Colorado. An exclusive feature of the Oakland All-American Six and the Pontiac Big Six, this new radiator embodies patented features of design which enables it to reduce loss of water vapor to a point far below that of any other system, Mr. Anibal asserts.

"The Cross-Flow radiator," he continued, "differs from the conventional design in that the water passes horizontally through the core instead of vertically from top to bottom. Hot water returning from the engine enters a closed vertical tank at one side of the honeycomb core and about one-third of the distance from the top of the tank. This side tank does not connect with the upper tank. The only possible course that the water can follow is across through the horizontal core passages. After cross-flowing through the core the water enters a vertical return or cool water tank at the opposite side of the honeycomb. A top extension of this cool water tank connects the cooling system with the filler neck.

"In the conventional radiator the hot water and the accompanying hot water vapor flow directly into a top radiator tank connected with the filler neck and the overflow pipe, from which at least the vapor may escape. But in the cross-flow system the wa-

ter and vapor, first being sent thru the radiator passages, are chilled and the vapor condensed back into liquid form before reaching any possible contact with the outside air. Even under the most severe conditions of heat and sustained driving the new principle employed in the Cross-Flow system proves so efficient that loss of radiator water is negligible.

MR. AND MRS. ED SNOWDEN ENTERTAIN FRIENDS SUNDAY

Friends of Mr. and Mrs. Ed Snowden enjoyed a delightful picnic supper on the H. S. Ranch last Sunday evening. Several from Colorado have read \$15, \$10 and \$5, as per the were among those present. About following paragraph taken from the executive meeting minutes of May, which follows: "Motion of C. M. Adams prevailed authorizing an abundance of punch, lemonade, given to the people keeping the best ice cream and home-made cake. After supper the group played kidyard in Colorado during 1929 sum-

games, and those fortunate enough to attend the gathering report one of the most enjoyable occasions of their recent lives. Cards being made by Mrs. Abbie Sevier, home demonstration agent."

BUSINESS HOUSES TO CLOSE AT FIVE P. M. MONDAY FOR PROGRAM

Motorcade to the Iatan Flat Program To Leave At Six P. M.

A majority of the places of business in Colorado have agreed to close at 5 o'clock next Monday afternoon so that owners and employees may attend the celebration of the completion of the pavement in the Iatan Flats.

The motorcade is to form on Second street, facing west, and beginning at the Colorado river bridge and extending eastward. It is to leave Colorado at 6 o'clock for Iatan, where the program will be rendered near the Dupree store.

The following are among those who have agreed to close at 5 o'clock: West Texas Dry Goods Co., Griswolds, J. A. Pickens, Jones Dry Goods, Sam L. Majors, H. L. Hutchinson & Co., G. W. Whitaker, Jones Barber Shop, Ted Garrett, Colorado Music Co., Colorado Wholesale House, the Dockrey Whipkey Co., Tom Hughes, M. System, Hope Herrington, R. L. M. Murry, Huron Dorn, Hely-Selly, The Model Shop, J. P. Majors, Pick and Pay Store, J. Riordan Co., W. L. Doss, Alceve Drug Co., Boyd Dozier, A. J. Herrington, the Elaine Shoppe, Berman Variety Store, Britton Dry Goods, J. L. Doss, Blackard Hardware Co.

Penney Co., Piggly Wiggly, Auto Laundry, Colorado Motor Co., Burton-Lingo Co.

TOTAL STATE TAX LEVY BE SETTLED THIS WEEK

AUSTIN, Aug. 19.—Another series of meetings this week will be necessary before the State tax rate for the year can be made known to tax collectors of the 252 counties. The tax collecting period opens October 1.

The automatic tax board after fixing the ad valorem and Confederate pension levies Saturday failed to take action on the school allotment. The board of education will meet and fix the scholastic apportionment before the tax board decides on school rate.

The ad valorem rate was fixed at 30 cents, an increase of eight cents over the past year's 22 cents and the pension levy was left at seven cents, the constitutional limit.

The board has under consideration reduction of the 35 cent constitutional limit for school purposes. The school fund levy has been 35 cents ever since the constitutional limit was raised from 20 cents in 1918.

BIG SPRING TO OPEN AIRPORT SEPT. 11-12

On September 11-12, the city of Big Spring will dedicate its 230-acre airport which is equipped with two steel hangars 80x100 feet, 60x80 feet, machine shop 40x60 feet, five-room administration building built of tile and stucco, telephone, telegraph and restaurant accommodations and is lighted with border, flood and beacon lights.

A program that will be an aid in furthering aviation in Texas has been planned by the general arrangement committee, representing the American Legion, Chamber of Commerce, city commission, county commissioners, Kiwanis club, Business Men's club, Rotary club, Lions club, and Retail Merchants' association, represented by E. E. Fahrenkamp, R. V. Middleton, C. S. Blomshield, H. O. Timmons, F. R. King, McCall Gary, and Joye Fisher.

One of the unique features of entertainment will be a parade to be staged on the morning of the second day illustrating the evolution of transportation showing primitive modes of travel to the present day, the parade to be entered with decorated floats and automobiles of practically every business man of the city. The Pathe News Service has signified its desire to be present and produce a movie production of the event.

ROCK SPRING will have a new high line in the next three months according to the results of a survey of the Central Power and Light Company. A sub-station is expected to be erected at a point somewhere near the property just acquired by the promoters of the fair grounds.

Word Comes That H. Bosse Very Seriously Ill

Word has been received here that H. Bosse, cotton buyer here for the past four years, was taken seriously ill aboard ship returning to America from Germany, where he had spent the summer.

The letter telling of Mr. Bosse's illness is not clear concerning his condition, as it leaves the impression that he was fatally ill or otherwise incapacitated, without directly saying which. He was returned to Germany when taken ill, the letter states. He was buyer for a Dallas firm, and left the latter part of April for a visit in his home country.

We carry a complete line of office supplies. Carpenters Pencils at the Record.

MITCHELL COUNTY WOMEN MAY WIN PRIZE CANNING

Mitchell county women who are interested in trying their skill at canning fruit, vegetables or meat will have an opportunity to do so in the National Canning Contest, sponsored by the Sears-Roebuck Agricultural Foundation. The purpose of the contest is to acquaint more housewives with the economy and healthfulness of home-canned foods.

Miss Abbie M. Sevier, county home demonstration agent, states that she is ready to assist any women of the county who wish to compete in the contest, although she is not actively sponsoring the contest, since it does not come under the heading of her work for the Extension Department at A. & M.

Two hundred and twenty-two cash prizes, totalling \$5,825, will be disbursed to the winners in the contest, which has three major divisions: Fruit, vegetables and meat. The best entry in each division will be awarded \$250, and one of these will also

receive the thousand dollar sweepstakes prize, thus bringing the total cash prize for the best jar of canned food in the contest to \$1,250. Second prize in each of the three divisions will be \$200, third prize \$100, and fourth prize \$50. There will also be five prizes of \$25 each, ten prizes of \$10 each and fifty prizes of \$5 each. In addition, a thousand dollars in cash will be awarded to the home demonstration agent whose county sends in the greatest number of entries, \$500 to the agent whose county has the next largest number, and \$100 to the agent whose county sends in the third largest number of entries. A number of lesser merchandise prizes are also offered.

According to the rules, the contest is open to every woman and girl in the United States. There are no restrictions as to the nature of the food sent; any fruit, vegetable or meat, whether home grown or purchased, is acceptable. Contestants may enter one, two or all three divisions. Entries, regardless of when

canned, must not be sent in prior to August 15 nor later than October 1, which is the closing date of the contest. No entries will be returned, but instead they will be sent, with the name and address of the contestant, to the orphanage, hospital, infirmary or other charitable institution to be selected by the Foundation.

Specimens of canned fruits and vegetables in the contest will be judged on the basis of clearness, color, pack, neatness, flavor and texture. Meat specimens will be judged in their relation to pack, neatness, texture and flavor. There will be three judges, and their decision will be made known just as soon as possible after October 1.

Gives Hints on Canning
"Any method of canning may be used for this contest," announces Anne Williams, director of the contest. "The use of a steam pressure cooker, however, is highly recommended by canning experts and by the U. S. Department of Agriculture, especially in canning meats. Not

only does this method of canning save time and fuel and assure absolutely sterility and preservation, but food canned under pressure retains all its natural flavor and texture, which are vital points in any canning contest."

That the judging may be thoroughly impartial and the display of canned samples absolutely uniform, contestants are required to submit their entries in standard glass jars of the quart size. Miss Sevier states that this jar is not the same as the Standard glass jar in Texas. She has a sample in her office. All contestants will be furnished with one Ball Mason jar and carton for sending in a canned article, but those making entries in more than one division are expected to supply their own jars and shipping cartons.

The sample jar and prize entry labels for use in submitting entries may be secured without cost by communicating with the headquarters of the National Canning Contest, 925 S. Homan Ave., Chicago, Illinois.

Carpenters Pencils at the Record.

MISS DAVIS AND MR. COKER WED

Performing his first wedding ceremony, Rev. A. A. Watson of Colorado married Miss Mildred Davis and Mr. Lee Coker, both of Colorado, here on Tuesday.

Mrs. Coker is employed at the telephone office here, and Mr. Coker is a painter. They will make their home in Colorado.

BAPTIST TEACHERS' MEETING

The Amoma class of the young people's department served luncheon at the regular weekly meeting of the teachers and officers of the Baptist Sunday school Wednesday evening.

The lesson outline was given in angle method style, ten different people giving their version of it from ten different angles.

The Amoma class had the largest number present, the Dorcas class had the greatest number of visits to report as a class, and the Junior department reported the largest number of visits as a department.

Trade with Sam Bedford Grocery this month and save money. Free Delivery. Phone 129.

Mrs. J. G. Merritt and Mrs. Pansy Harrison went to Christoval Thursday with a group of Boy Scouts.

Why pay a high price for a Radio when we can sell you an APEX for half. Guaranteed to get any station any other radio will get, comes with seven or nine tubes and in as fine a cabinet as there is made.

Misses Gertrude Sailors and Katherine Gage spent the week-end in Christoval.

Mrs. C. L. Root and Herbert Carlock went to Lufkin Thursday.

Come to see us about that One-Ton 6-speed International Truck. Terms to farmers. One and two falls. PRICE BROS.

Mr. and Mrs. J. B. Crockett and children of Amarillo are visiting relatives this week.

PHONE 333 FOR TEXACO KER-OSENE. Prompt Deliveries. J. BROWN, Agent.

Mr. and Mrs. Oscar Majors are home from a very pleasant vacation.

Mrs. Gilbert of Abilene and Mr. and Mrs. Hollis Gilbert of Beaumont were in Colorado Monday visiting Mr. and Mrs. Walter Stoneham.

Mrs. W. J. Stueckler of Wichita Falls, and Mrs. T. A. Andrews of Vernon spent Tuesday in Colorado, the guests of Mrs. J. A. Ferguson.

Mr. and Mrs. T. B. Russell, their guests Mr. and Mrs. Moore from Austin, and Jesse Jones visited Carlsbad Cavern this week.

Call and see our New Fall Hats, just arrived, at THE ELAINE SHOPPE

Mr. and Mrs. Dan Murrell and Mr. Murrell's brother from Athens, left Wednesday for a trip to Carlsbad Cavern.

Call Bedford's Grocery for groceries and quick service. Phone 129.

Miss Sybil Dobbs is arranging to teach a kindergarten this school year. Miss Dobbs has had one year in McMurry and one in Sul Ross. She has studied expression and will no doubt prove a successful teacher.

Look your old Binders over and come get your repairs while the stock is complete. PRICE BROS.

Frank Pidgeon, Jack and John Helton of Ft. Stockton spent the week-end with home folks.

Fresh Vegetables, if they are in the city, can be had at Bedford's Grocery. Phone 129.

Mr. Ramsey of Abilene visited his brother-in-law, W. H. Garrett, this week.

Jimmie Lowry, formerly of Austin and now of Abilene, spent the week-end with James Logan. Mr. Lowry was formerly here with the Community Natural Gas Co.

UNCLE FRED RAMBLES INTO THE YELLOWSTONE AND GIVES FIRST HAND ACCOUNT OF ITS WONDERS

Our last letter left us at the end of the Cody road and at the east gateway to the Yellowstone National Park. Of course, you all know (except Rube) that one could write a whole volume about the park and not exhaust the subject. We paid our "three bucks" and entered, spending three days and nights in the park, and here is a condensed account of it.

First, be it remembered that 4000 cars pass through the four gates each day with an average of four to the car, makes 16,000 people in the park every day. That is why the government has thirty Rangers in there to take care of the people. At the gate they give you a permit. They ask if you have a gun or dog. If you have a gun, they chain him to your car and seal the lock on the chain and when you pass out the park, if either these seals are broken—well, it's too bad.

Yonder is the great appeal of Yellowstone Park. It brings hundreds of thousands of travelers from the world over. Wonder geysers, hot water volcanoes, boiling pools, uncanny caverns that hiss and roar, terraces richly colored, knotted trees and petrified woods, a mountain of glass, lakes of green and blue, and innumerable other miracles of Nature crowd a journey through Yellowstone with amazement and overwhelming interest.

Yet Yellowstone has much more—it is beautiful as well as astonishing. Its dense forests, its lofty mountains, its meadows of flowers, its swift, clear streams with their wonderful waterfalls are quite enough for the endowment of any park. Then there is the climax, the Grand Canyon of the Yellowstone River, that sublime gulf which has baffled pen and brush to describe. Many tourists cross the continent year after year for the inspiration of the Grand Canyon. It is a dazzling and unbelievably beautiful picture.

Yellowstone Lake is another great attraction. It is more than 7,700 feet above sea level, yet it is 20 miles long and 15 miles wide, cool, clear, deep and filled with fighting trout.

Animals and birds—what a paradise for them! Elk, deer, antelope, buffalo, moose, beaver, big-horn sheep, bear roam at will. There are scores of species of birds. They have been zealously protected for years.

The geysers, which here abound in greater numbers and magnificence than elsewhere in all the world, the sculptured Yellowstone Canyon, painted in all the shades of the spectrum save blue, the great falls themselves, leaping from ledges of igneous rock, are eloquent of the tempestuous age when all this region was torn with violent eruptions of volcanoes. Even the mountain profiles and the soft rolling surfaces are shapings of lava by many waters.

Every mile of Yellowstone is a wild flower garden, and over 80 per cent of its area is heavily timbered with great forests of spruce, pine, fir, and other varieties of trees. There are hundreds of lakes and streams of pure mountain water. It is our greatest game preserve.

Two great spectacles are essential. One is the hot water phenomena, the geysers, the hot springs with their attendant terraces, and the paint pots. The other is the exquisite canyon of the Yellowstone. Two views of this, famous the world over, will suffice if time is short. One is from Inspiration Point, on the left or west rim; the other is from Artist Point, reached by crossing Chittenden Bridge

See the new Fall Dresses in latest colors and styles at THE ELAINE SHOPPE.

Rev. and Mrs. W. M. Elliott moved into their beautiful new home Tuesday and the Presbyterian manse has been rented.

Mr. and Mrs. O. B. Price went to Big Spring Wednesday.

W. P. Bodine and family of Midland were visiting with relatives and friends in Colorado and Loraine this week end.

Heavy rain and electrical storm was reported Wednesday night west from Pecos to El Paso.

Sterling Keathley spent several days in Abilene this week helping his grandfather, J. J. Robertson, around his home.

Mr. and Mrs. G. D. Mize will move to the Alamo hotel and occupy the rooms vacated by Mr. and Mrs. Ernest Keathley. Sterling F. Keathley will board with them and be manager of the hotel. Mrs. Mize is very familiar with the hotel, having worked for the Keathleys at intervals for eight years.

Miss Frieda Merie Reid returned home Wednesday morning from Commerce, where she had been attending the summer session of East Texas State Teachers' College. She was accompanied home by her grandfather, J. A. Thurman, and her aunt, Miss Gladys Thurman, who is to teach school at Dinn this year.

just above the Upper Falls. See the Grand Canyon which inspired Moran to make his celebrated painting that hangs in the Capitol at Washington. Five miles of driving will take you within a few steps of both.

The Grand Canyon Before the glacial epoch there was no Grand Canyon of the Yellowstone and its place was occupied by a great rolling country. But the melting ice poured so much water in the Yellowstone Lake that it overflowed to the north, possibly finding a shallow depression where the Canyon is now. The rock at this point had been decomposed and softened by hot steam and gases, and the new river found it easy to dig a deep passage for itself.

And the Canyon deepened and widened, and the water flowed faster and Yellowstone Lake drained out to its present condition. This would have continued until the lake disappeared entirely had not there been hard ledges of rock at the sites of Upper (109 feet high) and the Lower Falls (308 feet high). The colors of the Canyon are due to uneven action of the hot steam and gases. In places all the white was removed, leaving the reds and yellows; in other places the reds, as well, were removed and only the yellow left; finally in some places all the reds and yellows disappeared and the white remained.

Mammoth Hot Springs—The Great Terraces

Hot springs are common enough in various parts of the world; but in many ways the terraces at Mammoth Hot Springs are the most wonderful of all. The springs, themselves, are deep blue pools of great beauty; they are not actually boiling, although the discharge of large quantities of colorless gas gives them that appearance. When the water overflows, lime is deposited in a great variety of beautiful, rounded, sculptured terraces one below the other down the slope of the hill. Soon, algae (primitive microscopic plants) make their appearance in a great variety of colors, and the terraces become a living mosaic of vivid reds, pinks, yellows, and greens with all possible gradations between. In many places, beautiful crystals are formed, and a leaf or an insect, falling in, is quickly coated with a pure white covering. The terraces are intensely interesting and well repay a close, careful study.

The oldest terraces are on Terrace Mountain, southwest of the present activity. Although the deposit is now hundreds of feet thick, we find tons of glacial boulders on top, and it seems quite certain that the ancient glacier plowed away considerable of such a soft material. Such a deposit would require thousands of years to form, and since it began forming before the ice age, the hot springs must be a hundred thousand years old at least, perhaps much more. All data goes to show that there is a vast bed of still hot lava down below us. It heats the water and then forces it up through beds of limestone where much material is dissolved and then brought to the surface to be redeposited by the hot springs. This redeposited material is "formation," a variety of limestone known to scientists as travertine. It is deposited at the rate of as high as an inch in two weeks.

Lake Yellowstone

Now, again, about the Yellowstone Lake. It covers 139 square miles and is one of the largest lakes in the world at so great an altitude. It was once, however, very much larger. It is a child of the ice age. At the glacial epoch, as stated before, when the ice streams melted back toward their sources, a huge volume of water accumulated to fill the great basin of Yellowstone Lake and Hayden Valley. At that time the lake covered 510 square miles and was 160 feet deeper than now.

Yellowstone Lake is in the heart of the game country. Bears, deer, and elk are all about it, especially in the higher valleys. Around the southern end of it is the home of the Yellowstone Moose, and in its waters are large numbers of otter, while many Ospreys nest along shore and seek their fish food in the lake itself.

Molly Island, at the southern end of the Southeast Arm, is the most eastern breeding ground of the White Pelican. From 60 to 100 pairs are nesting there, and also about a thousand California gulls. Because it is possible to collect, hatch, and protect trout eggs better under artificial conditions, a fish hatchery has been established near the hotel by the Bureau of Fisheries in cooperation with the National Park Service. Each year several million fish are hatched, reared, and distributed in the park waters for benefit of future fishermen.

The bears of Yellowstone have made it famous, as has its Painted Canyon. Its vast elk herds—the last hope of that species in America—have no like anywhere in our country now. The bighorn sheep, rarest and wildest of our big game animals, still lives its old life there. The wise and busy beaver builds its dams as it always did. The antelope still may be seen—shadowy, fleet. The two specimens of American deer still thrive.

The old saying "Its Little Things That Counts" is being proved by the new money TRY OUR SERVICE—IT'S NOT SO SMALL, BUT IT COUNTS LIKE NEW MONEY

Lastly, there still are to be seen some hundreds of the noblest of all our wild animals, the bison; a herd larger now than it was when, in the winter of 1894.

Yellowstone has more geysers than all the rest of the world. Some are literal volcanoes of water. To translate this into volume, we will use Old Faithful as an example. According to observations made by the United States Geological Survey, this most famous of all geysers hurls in the air every 60 to 80 minutes a million and a half gallons of water, or 33,225,000 gallons a day. This would supply all Mitchell county with water—estimated it would supply a city of 30,000 inhabitants.

The cornerstone of the great stone archway at Gardiner, which bears the inscription "For the Benefit and Enjoyment of the People," was laid by President Roosevelt, who visited the park in 1903. Three other executive parties have entered Yellowstone via Gardiner. In August 1883, President Arthur and his pack train party, the largest of its kind ever visiting Yellowstone, came in this way. In 1923 President and Mrs. Harding, accompanied by Cabinet officials, toured the park. And in 1927 came President and Mrs. Coolidge to visit America's Wonderland, and then in 1929, them to go mad. Dogs should be Rubie, the writer and party made do entrance through Gardiner Gateway, no damage until the hot weather is as stated before, many distinguished people have passed this way.

F. B. WHIPKEY (To be Continued)

BIG SPRING TO GET THE T. & P. WORK

BIG SPRING, Aug. 15.—A statement disclosing plans that far outstrip expectations and obtain for Big Spring the position of a leading West Texas rail center was made here on Wednesday morning following a meeting Tuesday night by J. A. Somerville, vice president of the Texas & Pacific Railway company.

Mr. Somerville enumerated the improvements to be made at once on the Texas & Pacific reservation. Bids will be received and a contract let within ten days for grading preparatory of beginning construction. The specifications call for 150,000 cubic yards of grading, marking it as one of the largest dirt jobs ever projected in West Texas. Completing his enumeration of improvements for which have been or soon are to be finished, Mr. Somerville declared.

Mad dogs are more numerous this summer than ever before known, and parents should exercise great care in seeing that their children do not play with strange dogs or cats. It is believed that dogs are more or less afflicted with rabies this summer, and in 1927 came President and Mrs. Coolidge to visit America's Wonderland, and then in 1929, them to go mad. Dogs should be Rubie, the writer and party made do entrance through Gardiner Gateway, no damage until the hot weather is as stated before, many distinguished people have passed this way.

HOME FOLKS LOG

Published in the interest of the people of Colorado and vicinity by The

GRAY LUMBER CO. Dick Gray, Mgr. Weldon Skinner, Ed.

Although most of the feed is burned up from lack of rain, quite a few of the progressive farmers say that they will make a good crop.

The flapper reminds us of a bungalow. Painted in front, shingled behind and nothing in the attic.

Did you ever hear that one about the old-time farmer who used to exhibit his calves at all the county fairs? Now he has a daughter who does the same thing.

The contract has been let to Murphy & Murphy for the Humble oil station. Work has already begun.

The office building previously occupied by California Co. is being repaired by Jones, Russell Co., its new owners.

Van King is doing a repair job for J. C. Penney & Co.

Plans for the new Church of Christ are here. Excavation has been completed and ground is now in waiting for the structure to go on it.

Call in and see our new Plan Books.

Don't be like the Irishman on your roof repairing. If it needs it, do it now because we are going to get rain sometime.

Phone 579-J for any repair job you want done right.

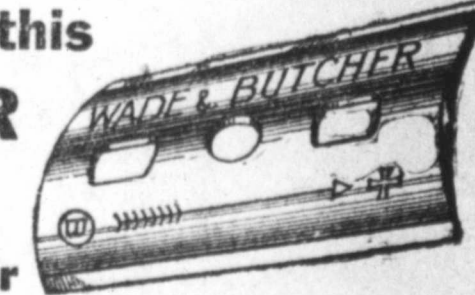

Weather Report: Still no rain, but we got some ordered.

Don't forget opening of Iatan Flats.

COLORADOANS PLAY PROMINENT PARTS AT I. O. O. F. MEET

Mrs. Doss And Hulet Williams Elected To District Offices

Rebekahs and Odd Fellows of Colorado played a prominent part in the annual convention of the West Texas District of I. O. O. F. and Rebekah Association in Big Spring last Wednesday and Thursday.

Mrs. Kate Doss was re-elected chaplain of the association, Hulet Williams was elected first vice president, and W. L. Doss, Sr., assisted J. H. Burnham of Stanton in installing the officers.

Mrs. Nova Ballard of Big Spring was elected president of the association, and Mrs. Bessie Moore of the same city was chosen treasurer. Other officers elected were: A. H. Balch of Abilene, first vice president; Mrs. Etta Hazelwood of Blackwell, secretary; June Ellen Fields was made mascot.

Mrs. Doss was on the program of the convention, delivering one of the responses to the welcome addresses Wednesday.

Sweetwater was named the 1930 convention city with the convention date changed from the second Wednesday and Thursday in August to the first Wednesday and Thursday of that month.

The following prizes were awarded Thursday afternoon: Mrs. Emma Gill, prize in unwritten work; Mrs. Bona Hargrave, past noble grand work, and Miss Effie Copeland, chaplain work.

Entertainment numbers during the afternoon sessions were a vocal duet by Mrs. Nova Ballard of Big Spring and Mrs. Henderson of Coahoma, and a group of readings by Mrs. Lee Weathers of Big Spring.

Among the addresses given were those of E. Q. Vestal of Dallas and Ray Rector of Stamford, worthy wardens.

The following were those attending from Colorado: Mr. and Mrs. W. L. Doss, Sr., Mrs. Green Delaney, Mrs. Dick Delaney, Mrs. Lute Wilson, Hulet Williams, Ruthie Williams, Arline Tunnell, Ruby Green, and Mrs. Fields.

TO SEE SISTER FOR FIRST TIME IN TWENTY-NINE YEARS

For the first time in twenty-nine years, W. D. Baker saw his sister in Van Zandt county Sunday, having left Colorado for that point Saturday.

Mr. Baker, who is one of Mitchell county's first-class farmers, plans to be gone about ten or fifteen days.

Son of Chester Jones Bitten By Mad Dog Friday

Apparently playful, a small stray puppy bit Dick Low Jones, seven-year-old son of Mr. and Mrs. Chester Jones, on the hand Friday morning, and the child is now taking Pasteur treatment, since the head of the dog was found to be full of rabies germs, according to a report from Austin.

The dog was, to all appearances, normal, but the prevalence of hydrophobia here now caused Mrs. Jones to take precautionary measures. The head was sent to Austin and found to be rabies-infected.

The daughter of Mr. and Mrs. Glenn Lewis is also taking treatment for a dog bite.

FARMERS INVITED TO VISIT LOCAL DAIRIES NEXT MONDAY EVENING

Visits To Be Made To Various Places Just At Milking Time

Farmers and dairymen of the county have been invited to inspect some of the dairy farms of the county with County Agent W. S. Foster and Doyle Williams, vocational agricultural instructor, next Monday afternoon, starting from the court house at 4 o'clock, at which time it will be possible to see the cows being milked and study methods of feeding.

Present plans are to visit the I. K. Galey farm from 4 to 5 o'clock, and the D. P. Smith farm from 5 to 6 o'clock. If time permits other farms will be visited. At these farms will be seen registered cows, registered bulls, grades sired by registered sires as well as the offspring of these animals. Other things of interest to be discussed will be cooling of milk, separation of milk and methods of marketing the product.

D. P. Smith is a member of one of the Scurry county bull circles and has heifers from three generations of registered bulls. These heifers are proving to be higher producers than their dams, proving that registered sires pay big dividends.

Calves at the I. K. Galey farm are all sired by two registered bulls whose dams have official tests of more than 500 pounds of butterfat. All bulls owned by Mr. Smith have had official tests of 500 pounds of butterfat or better.

Mrs. Hickman of San Angelo who has been visiting her sister, Mrs. Merrell, returned home Tuesday.

F. P. RONEY FINDS PURE LINE SEED PAY IN DRY YEAR

Merits of Best Maize Seed Apparent Even Without Rain

Pure line maize seed will pay even in a dry year, says F. P. Roney, who lives about five miles south of Colorado on the Robert Lee road. Last week he weighed the maize from four acres in the demonstration "he has been carrying on in cooperation with the county agent. Half of it was grown from pure line seed grown by one of Mitchell county maize seed breeders and the other two acres was seed that had been bred up here in the county for a number of years.

The pure maize seed weighed out 2925 pounds of maize on the two acres, while two acres of the other seed weighed only 2800 pounds, an increase of 62½ pounds per acre.

Mr. Roney planted one pound of seed per acre, the pure seed costing ten cents a pound and the other one cent a pound, so nine cents invested in pure seed made him 62½ pounds of maize worth at least 62 cents. In other words, for every dollar invested in pure seed he received \$6.99 worth of maize. Both plots were cared for in the same manner, so there was no additional cultivation expense to make the increase in yield.

Tennis Champion Is Son of Rev. A. E. Ewell of Colorado

A photograph of Charles Ewell, son of Rev. and Mrs. A. E. Ewell of Colorado, appeared one day last week on the sports page of the Fort Worth Star-Telegram as the winner of the Men's A singles championship in tennis.

Ewell defeated Tom Becket in the finals for the place of champion. He is a student in T. C. U.

NARROW ESCAPE FROM MAD DOG

A narrow escape from a mad dog was reported Tuesday by J. S. Curry, farmer north of Colorado.

The family dog went suddenly mad about ten o'clock and tried to break in through the screen to the family. By a lucky chance the family were all in the house, or someone would surely have been bitten. Mr. Curry shot the dog before any damage was done.

Three Colorado Boys Escorts At San Angelo Fair

Although Colorado will have only one young lady representative in the Queen's Court at West Texas Exposition in San Angelo on Sept. 20, at least three young men of the town will play the part of escorts in the court.

Miss Jo Key, who will be duchess from Colorado at the exposition will have as her escort Joe Farr of this city. Miss Mayne Howell, named duchess from Loraine, will be escorted by Lee Dorn of Colorado, while Miss Faye Coon, her maid of honor, will be escorted by Ell May of Colorado.

FIRST GRID PRACTICE TO BE HELD ON MONDAY MORNING, SEPTEMBER 2

Coach Cantrill Will Be In Coaching School Until August 31

Colorado Wolves will come out for their first fall practice Monday morning, September 2, at 9 o'clock, according to Coach R. H. Cantrill, who will be attending the Warner-Rackne coaching school at Dallas until August 31.

This date will fall on Labor Day, and little real practice is likely to be done that day, but Coach Cantrill states that the boys can at least get their uniforms so they can get started in real practice the next day. The meeting will, of course, be held at the high school.

Ex-Rangers Choose Eastland As 1930 Convention Place

Headed by Major W. M. Green of Colorado, the executive board of the Texas Ex-Rangers' Association has chosen Eastland as the meeting place for the association in 1930. The date has been set for some time in August.

The Ex-Rangers met this year in San Saba on July 3, 4 and 5. At the meeting last year in Colorado, Major Green was elected president of the association for life.

Miss Caroline Chambers of Abilene came over Monday and spent the week with her sister, Mrs. R. H. Looney.

SCOUTS HOLD CAMP FIRE AND PROGRAM AT SEVEN WELLS

Parents And Friends Guests At Gathering Friday Evening

A camp fire was held on the rocks of Seven Wells Friday evening by the Boy Scouts of Colorado, with parents and friends as guests.

Materials for the fire had been gathered and arranged in wigwam style. Many parents went out early and had a swim and supper, and at the bugle call seated themselves for the program which had been arranged by Assistant Scoutmaster Weldon Skinner. The rocks gleaming in the moonlight, the circle of Boy Scouts, most of them in uniform and nearly 50 in all, made a picture not to be forgotten.

The fire was lighted by flint and steel, some of the boys having gone prepared with their tinder cans. The group was seated in a semi-circle about the fire and began their program with a sing-song led by the scoutmasters and assistant. The songs were "The Landlady's Daughter," "Old McDonald Had a Farm," "Hike Along," and "Row, Row Your Boat."

The senior scoutmaster, Mr. Ferguson, made a splendid talk on cooperation of parents with the scoutmaster. He showed that if a boy was to get the best out of scouting he must have the fullest cooperation of his parents, and in case of a slackening of interest their help to keep the boy on the job.

Eight boys gave a knot-tying demonstration, tying a number of sailors' knots. Eagle Scout Russell Soper named the twelve Scout laws, while the same number of boys explained just what they meant. Scoutmaster Bill Scott made a very interesting talk on Indian life. He began with the Indians of the Atlantic coast, describing their methods of securing food and clothing, their habits and mentality. In his address he carried his audience across the continent and gave much useful information.

With Weldon Skinner as the magician and John Tom Merritt as the harassed human, a clever little force was enacted. The secret finally divulged was that there "ain't no Santa Claus." John Elliott and Charles Cook conducted a telephone conversation from New York to San Francisco by the aid of a group of "poor fish" on the line to relay for them.

Mrs. Porter suggested that a rising vote of thanks be given the Scoutmasters, which was done. Taps were sung by the group, with all standing, and the camp fire which by now was only a glowing bed of coals was deserted, though a number of Scouts spent the night at Seven Wells.

FORTY-EIGHT MADE POULTRY TOUR OF COUNTY ON MONDAY

Tour Sponsored By County Agents And Agriculture Teacher

Forty-eight farmers, poultrymen and members of the Home Demonstration clubs visited five of the commercial poultry farms here Monday on a poultry tour of the county sponsored by Miss Abbie Sevier, county home demonstration agent; W. S. Foster, county agent, and Doyle Williams, vocational agricultural instructor in Colorado High school.

Flocks visited varied in size from those of only a few hundred hens up to flocks of a thousand or more birds. Importance of sanitation and the advantages of different types houses and equipment were discussed by those in charge of the tour.

All the flocks were being fed commercial growing and egg laying mash and several of them were being fed a cool wet mash during the middle of the day. Similar methods of feeding and housing were used at all farms.

Much comment was heard about the artificial shade used at the Metzger and Morrison farm. This arbor which was built of a light wooden framework, covered with cedar branches provided an excellent shade for the growing pullets. The ground under the arbor was kept damp and the birds appeared to be cooler there than in the poultry houses. Oats were planted under the arbor to provide green feed.

Farms visited on the tour are as follows: Franklin Poultry farm; the Beezley Poultry farm; Metzger and Morrison Poultry farm; Sam Hale farm and Morton R. I. Red farm.

Mr. and Mrs. D. J. Matthews and daughter, Mildred, passed through Colorado Saturday afternoon enroute

from their home in Chandler, Arizona, to Merkel, their former home, where many of their relatives live. Miss Matthews spent Saturday night and Sunday with Miss Jewel Collier, going on to Merkel Sunday. The family plans to be in Texas about two weeks, and Miss Matthews will spend the last week of her visit in Colorado.

**CLUB GIRLS TELL OF TRIPS
THEY WON TO SHORT COURSE**

The following accounts of their trips to the Short Course at A. & M. College have been written by Misses Geneva Halbert and Lena Ohlenbusch, who won the trips because of their winning first place in the two classes of the 4-H Club girls' clothing contest:

My Trip to A. & M. Short Course
By GENEVA HALBERT

On the morning of July 27, 1929, Miss Sevier, Lena Ohlenbusch and I left Colorado for Fort Worth. Lena and I had won trips to the Short Course at A. & M. College and our home demonstration agent was taking us there in her car. I am not sure whether the other girls felt the thrill that I did, but that was my first time to attend Short Course and it was also my first time to see so much of Texas, so naturally I felt that exquisite sensation deeply.

We had unusually good luck with our car and with stops in Abilene, for breakfast, and Mineral Wells for lunch, we reached Fort Worth at 2 o'clock feeling fine.

We stayed in Fort Worth until 6 o'clock Sunday morning and while there we saw the Worth and Majestic theatres, Forest Park and the Texas Christian University. The Egyptian architecture of the Worth theatre was especially interesting.

We left Fort Worth at 6 o'clock Sunday morning for Bryan. We went by way of Hillsboro and Waco. In Waco we saw the beautiful Cameron park. We arrived in College Station at 1 o'clock, rather tired, but highly interested in our surroundings.

Our meals were served regularly at Shisa Hall throughout the week of Short Course. We had supper at the mess hall Sunday night, and then we were entertained from 7 to 9 p. m. in the Assembly hall by Judge Davis, who is a district judge of the Bryan district.

Monday morning we secured our meal tickets, were organized into groups, attended a general meeting in the gymnasium and then we placed our Contest Dresses on exhibit.

During the whole week our days were spent in listening to lectures and seeing the following demonstrations:

1. Nest Eggs—A lecture on finance by Mrs. Lily Pearl Chamberlain of North Texas Agricultural College.
2. Knowing Ourselves—A lecture

on self improvement by Miss Cora May Walton of the Dallas schools.

3. Lunch Box and Hamper—On picnic and school lunches, by Dr. Jessie Whitaker of the Texas Experiment Station at College Station.

4. Saving Time and Energy in Housework—On kitchen equipment by Miss Lucile Wilroy of Western Electric Company.

5. The Club Girl's Bedroom—On interior decorating, by Miss Mary Starr Taylor of the College of Industrial Arts of Denton.

6. Beautifying the Farm Home Yard, by Mr. T. B. Foster, landscape artist.

7. Clothes Lines—A demonstration of lines and types of clothing suitable for different types of people by Miss Mary Anna Grimes of the Texas Experiment Station at College Station.

8. When We Entertain—Demonstrating the making and serving of refreshments, by Miss Eleanor How of the McCormick Manufacturing Co. of Baltimore, Maryland.

9. Planning a Community Party—On methods of entertaining, by Miss Sylvia Weckesser of the Houston recreation department.

10. Summer Salads—A demonstration on the making of salads, by Miss Otis Neighbors of Houston.

11. Production Demonstration—A lecture on sanitation and cleanliness in caring for dairy products in the farm home, by Miss Sadie Lee Oliver of the College of Industrial Arts.

12. A Well Conducted Club Meeting—Which taught us how to conduct our clubs under parliamentary rules, by Miss Eula McFarland of McMurry College.

13. Team demonstrations given by girls from various counties of Texas. The subjects of these demonstrations were, "Planting Our Garden," "Butter Making," "Coloring and Recoloring Materials," and "Judging Towels."

The final judging of the Contest Dresses was done Wednesday evening. There were two classes of dresses in the contest, the first class consisting of school dresses and the second class afternoon dresses. There were between two hundred and 250 girls in the contest, and there were three prizes given in each class, these being: First, a sewing machine; second, a chest of silver, and third, a wrist watch.

During the week of Short Course there were joint pep meetings held by the boys and girls almost every morning and free picture shows arranged for us every evening in the Assembly hall.

We left Bryan at 11 o'clock Saturday morning and enjoyed a pleasant drive over many miles of pretty country to Austin. We reached there at about 5 o'clock and went to an aunt of Miss Sevier's, where we stayed all the time we were in Austin. That afternoon we visited the State cemetery, where we saw the graves and monuments of such famous Texas heroes as Albert Sydney Johnson, Stephen F. Austin, Edmund J. Davis, Major General Wharton, Francis Richard Lubbock and John Ireland, three of whom were governors of Texas. We also saw a monument there in memory of Joanna Trout, the woman who made the flag of Texas. We saw the home of Miss Lillie Robinson, old French embassy, which is the only building erected and owned by a foreign government in Texas; the home of Elizabeth Ney, the famous sculptress; the State University buildings, which included the spacious Longhorn stadium, it being Texas' memorial to her boys who were killed in France.

The building that interested me most in Austin was the Capitol. We went in about 9 o'clock, while it was cool and pleasant. The capitol is shaped like a Greek cross, fronting south. The cornerstone was laid on March 2, 1885, and the completed building dedicated May 16, 1888. It was built at a cost of three million acres of land of the State of Texas. The building is five hundred sixty-six feet long, 228 feet wide and 311 feet from the grade line to the top of the statue on the dome, this being seven feet taller than the dome of the National Capitol. We climbed up as far as it is possible to go, and we could get a splendid view of the City of Austin. The building contains 258 rooms, 900 windows, and 500 doors. The exterior walls are built of Texas red granite from the quarries of Burnett county. Seventy-five miles of railroad lines were built to haul the material of granite and stone. The building proper covers three acres of ground and has about 18 acres of floor space. The work of construction was begun February 1, 1882, and it is second, only in size to the Capitol at Washington, and is the seventh largest building in the world. On the right side of the broad pavement leading to the main entrance to the capitol have been erected the Confederate and Alamo monuments, and on the left are the Firemen's and Terry's Rangers monuments. The John B. Hood Brigade monument is on the east side of the capitol, while the Texas Cowboy statue is located southwest of the capitol building. I especially enjoyed

seeing the House of Representatives, the Senate gallery, and the Governor's reception room.

We left Austin at 3 o'clock Sunday afternoon and arrived in San Antonio at 6 o'clock. We went by way of San Marcos, where the South-west Texas State Teachers' College is located and on entering San Antonio we went through Fort Sam Houston.

On Monday morning we made the drive around the South Loop, which took up by the State Inmate asylum, Brooks Aviation field, the old mission, the State Crematory, and the old dam that helped to carry on the first irrigation in the United States. In the afternoon we saw Brackenridge Park with its zoo, museum, its sunken gardens and beautiful drives and in the evening the Majestic, Aztec and Texas theatres.

We left San Antonio at 6 o'clock Monday morning for home, and we came through beautiful country almost all the way. We made several long stops, one of these being between Kerrville and Junction at the State Fish hatchery. We spent an hour and a half there watching the feeding of the fish and learning some things about the way they are cared for. This is the largest fish hatchery in the United States, there are one hundred forty thousand baby fish shipped out each year and this is only its fourth year in operation.

With the hindrance of several flats we reached Colorado at 8 o'clock, a tired but felicitous three, and we are just beginning to realize the real value of our trip.

My Trip to A. & M. College
By LENA OHLENBUSCH
On Saturday morning, July 27, 1929, Miss Sevier, Geneva Halbert

WHEN CHILDREN Need a Laxative

"We have used Theodor's Black-Draught in our family for nineteen years. I have found it of great help in raising my family. I have given it to all six of my children. Whenever they complain of upset stomach, or begin to look pale and sickly, I make a tea of Black-Draught and begin giving it to them. In a day or two they are all right. I give it to them for constipation, and my husband and I both take it. I always give it for colds in winter, for I believe a way to prevent them is to keep the system clean."

—Mrs. Doshie Terry, 1205 Fourth Avenue, Decatur, Ala.

Black-Draught
for CONSTIPATION, INDIGESTION, BILIOUSNESS

WOMEN who need a tonic should take CARDUL. In use over 50 years.

and I found ourselves on our way to College Station, Texas. We left Lorena about 6 o'clock, and we could already tell by our beginning that our trip would be interesting. We had breakfast in Abilene, and by noon we were in Mineral Wells. By 3 o'clock Saturday afternoon we had registered at the Texas, and had rested a while, so we went with one of Miss Sevier's friends and saw Richard Barthelmess in "Brag." Saturday night we saw another good picture and radio broadcaster's WLI's "Show Boat." I found that Show Boat was educational. One man taught me why the new Chevrolets have radios on them—so they can get out of town! Anyway Chevrolets are pretty good cars, but I hope Henry never has to put radios on his new Ford.

We left Fort Worth at 6 o'clock Sunday morning and got to College Station at 1 o'clock in the afternoon. Our rooms were assigned to us, and soon two girls from Montague county came to share our room with us. We watched girls and boys come in all afternoon, got acquainted with the girls in our part of the building, and looked over the campus. After supper, which was served in the mess hall, we went to the assembly hall.

CLUB GIRLS TELL OF TRIPS THEY WON TO A. & M. SHORT COURSE

(Continued from Page 2) and heard Mr. Davis, a lawyer in the criminal courts of Fort Worth, talk. We had to be in our rooms at 10 o'clock each night, and had to have our lights out at 10:30.

Monday morning, after breakfast, all of the girls and boys met in Guion Hall. We sang songs, yelled, and after electing chairman and secretary, several boys and girls from different counties of Texas talked, on

"What Our Country is Doing." Until noon we had time to take our dresses down to the main building to enter into the State contest. After noon we heard a very interesting talk on "Nest Eggs" in the Y chapel. Each afternoon from 4:30 until 6:00 we had time to go swimming. After supper, which was served at 7:00, we went to the Assembly hall to see a picture show. We saw a picture every evening at this hour, and were in our rooms at 10 o'clock, and had our lights out at 10:30.

On Tuesday morning all the boys and girls seemed to be acquainted with each other. We all gathered at the Stadium to have our picture taken. Three pictures were made—one picture of the girls in a group; one of the boys, and one in a 4-11 formation. We went to two lectures in the afternoon, and after supper again went to the Assembly hall and saw another educational picture.

After breakfast and a joint meeting of the boys and girls in Guion Hall, Wednesday, we heard a very interesting and educational talk on "Beautifying the Farm Home Yard," by Mr. T. B. Foster. Another talk I certainly was interested in was the "Clothes Line," by Miss Mary Anna Grimes. By this title, we see a picture of a line in some back yard with a washing on it, but Miss Grimes' talk was on the line of clothes to wear. In the afternoon those in the dress contests met in the Y chapel to have the dresses judged, so we did not hear Mrs. T. A. Record's lecture on "Beauty Hints." That night we had supper at the usual hour, and the picture afterwards.

Thursday's program was to me the most interesting. Our first lecture was by Miss Eleanor Howe on "When We Entertain." She not only told us what games to play, but she also showed us how to play some of them. Until noon we went to see team demonstration by several teams on "Dyeing," "Towels," and several others. In the afternoon our group went over the campus. We went to the museum, and to the science building. This was very interesting and we saw bones, skeletons, teeth of animals, and many other things the science classes work with. Then we went through a factory and saw how cloth is made from cotton. We also visited the kitchen where our meals were all cooked. This was a very nice place, where all the cooking, baking and washing is done by electricity. After supper, while others went to the picture show, the girls in the clothing contest marched upon the stage in the Assembly hall, then in Guion Hall. Winners were announced and the prizes given to them.

On Friday morning after breakfast all the boys and girls met again in Guion Hall. This was rather a sad meeting, for it was the last meeting of the boys and girls. During the day everyone felt more or less sad, realizing that by the next morning almost everyone would be on their homeward way. After the meeting at Guion Hall, Miss Ottis Neighbors demonstrated and lectured on "Summer Salads," and Miss Sadie Lee Oliver spoke on "Productive Demonstrations." In the afternoon Miss Enla McFarland, who is connected with McMurry College in Abilene, taught us the principles of "A Well Conducted Club Meeting." That night announcements were made as to winners of the stock judging contest.

We left College Station on Saturday at 12 o'clock, and arrived in Austin at 6 in the afternoon. While in Austin we visited the State cemetery and saw the tombs and monuments in memory of many Texas heroes. In the evening we went to a picture show on the University campus. On Sunday we walked to the top of the capitol. In this beautiful building we saw pictures of Smith, Burnett, Houston, Jones, P. Henderson, Wood, Bell, Rannels, Clarke, Lubbock and Murrish. There are large bronze statues of Johnson, Lee, Woodrow Wilson, Governor Hogg, Jefferson Davis, John H. Hagen, and a small white granite one of Mrs. Jim Ferguson. On the grounds are monuments in memory of the Alamo; a memorial to Texas Rangers in commemoration of the valor of the 8th Texas cavalry, better known as Terry's Texas Rangers, erected by the surviving comrades; a cowboy monument; a monument in memory of Eugene T. Deats, Sr., who lost his life in service at Blind Institute fire on Nov. 9, 1877, and Fred J. Ferris Joseph J. Turpin, Ernest J. Busby, Floyd William Agebo, and Tom E. Guinn. We went into the Governor's reception room and saw very beautiful curtains, which were sent to Texas from Persia. These curtains are already worn out in some places by much handling. In this room is one of the seven perfect mirrors of the world. Just outside the door of the building are large statues of Sam Houston and Stephen F. Austin.

We drove over the city of Austin and saw the Governor's mansion, the old French embassy, Mrs. Ferguson's home, Camp Mabry, the home for blind and aged negroes, the State Institute for feeble-minded, Barton Springs which belongs to the public schools of Austin, and the State Institute for the deaf and dumb.

While going from Austin to San Antonio, we went through San Marcos and drove through the grounds of S. W. T. C. As we went into San Antonio we saw Fort Sam Houston, Winburn Field, and the Muni-

pal air port. On Monday, August 5, we went to four of the five missions. The first one we went to was Fort San Juan, which is now used as a church and place of worship. While going from this mission to Mission San Jose, we stopped at the Mission burial ground. Here we saw where the first irrigation system of the United States was put into use, built in 1718, and it has some of the best architecture in the world. We climbed to the tower of this mission, going up a flight of stairs which were built by placing blocks of wood together. From here we went to the Mission Concepcion, built in 1730, and is known as the first mission. We wanted to go to the top of this building, but because it had fallen, we were not allowed to go more than one flight of stairs. I wish I could tell in detail all about these missions as we saw them.

We could not leave San Antonio without seeing the famous Alamo, so immediately after lunch we went there. Here we saw a door which has swung on the same pivot since 1716. In cases we saw guns, arrows, pistols, rifles, hammers, axes, old swords and other weapons which were found after the battle of the Alamo.

We visited Brackenridge Park and saw many beautiful birds, strange animals, and many fish, but more interesting was the visit to the museum. Here we saw an old stage coach and an old covered wagon which were used many years ago. There were many old dresses, hats, bonnets, shoes and dishes which were used many years ago, and as is the Spanish custom, each article had a legend. One thing which attracted my attention was a glove which once belonged to the "Mad Empress" of Mexico. The story connected with this glove was most interesting.

While in San Antonio we visited Roosevelt Park, Fort Sam Houston, Brook Field, Insane Asylum, Japan-

ese Tea Garden, and Alamo Plaza. We saw the new Medical Arts building, Milam building, Scottish Rite Cathedral, and Municipal auditorium. We saw three picture shows in three different theatres. One of these, the Greater Majestic, is the second most beautiful theatre in the world. On the way home we stopped at the fish hatchery in Kerrville. This hatchery consists of 33 ponds, the largest of these containing 65,000 fish. The smaller ponds have from 10,000 to 60,000 fish each. Although we were tired from a day of driving, when we reached Colorado Tuesday night, we were ready to say that our trip was worth all the effort and work we put into it. All that we gained by our days at the Short Course and the trip to and from College Station we owe to the Colorado Chamber of Commerce and to our county and home demonstration agents. I wish every boy and girl in Mitchell county could have been with us at A. & M., and I will do my best to encourage others to go next year.

CITATION BY PUBLICATION

THE STATE OF TEXAS, To the Sheriff or any Constable of Mitchell County—Greeting: You are hereby commanded, that you summon, by making Publication of this Citation in some newspaper published in the County of Mitchell if there be a newspaper published therein, but if not, then in a newspaper published in the nearest County to said Mitchell County, for four consecutive weeks previous to the return day hereof, Mrs. W. A. White, a widow, and the unknown heirs of W. T. White, W. H. Avery and Mae Avery, A. F. Johnson and Julia Johnson, whose residence is unknown, to be and appear before the Hon. District Court, at the next regular term thereof, to be holden in the County

of Mitchell at the Court House thereof, in Colorado, Texas, on the Twenty-first day of October A. D. 1929, then and there to answer a petition filed in said Court, on the 24th day of April A. D. 1929, in a suit numbered on the Docket of said Court No. 5112, wherein W. L. Adams is plaintiff, and Mrs. W. A. White, a widow, and the unknown heirs of W. T. White, W. H. Avery and Mae Avery, A. F. Johnson and Julia Johnson are defendants. The nature of the plaintiffs demand being as follows, to-wit: A suit in trespass to try title, wherein plaintiff alleges that on or about the 1st day of April, 1929, he was lawfully seized and possessed of the herein described land and premises, holding and claiming the same in fee simple, to-wit:

All of lots 1, 3, and 3 and the south 50 feet of lot No. 4, all in block No. 7 of the White Subdivision of the town of Loraine, Mitchell County, Texas.

That on or about the day and the year aforesaid, the defendants, unlawfully entered upon said premises and ejected the plaintiff therefrom and unlawfully withheld possession thereof, from him, to his damage in the sum of \$700.00.

Wherefore, plaintiff prays judgment of the court for title to the land, that Citation issue, for damages, and costs of suit and for writ of restitution. Plaintiff further alleges that this action is brought to try title as well as for damages.

Herein fail not, and have you before said Court, on the said first day of the next term thereof, this writ, with your endorsement thereon, showing how you have executed the same.

Given under my hand and seal of said Court, at office in Colorado, Texas, this, the 12th day of August, A. D. 1929.

J. LEE JONES, Clerk County Court, Mitchell Co., Texas. Sept 6e

[THE NEW EMBLEM DEDICATED TO BETTER MOTORING]

What the MARLAND CONTINENTAL Merger MEANS TO MOTORISTS

THE consolidation of the resources and facilities of the Marland Companies and the Continental Oil Company, under the latter's name, is more than a corporate merger. It is a happy union of well balanced production, manufacturing and marketing operations from which will come a host of unusual advantages to the millions of customers and thousands of distributors.

Wide Field for Crude Selection
Out of a total area of more than two and one quarter million acres in eight states, Continental selects the crudes best suited for its manufactured products. Raw materials for oils, greases and petrolines may often come from widely separated regions. Continental controls its own crude supply and chooses the best for each refining operation and thus assures a standard uniform output from year to year.

Strategic Location of Eight Refineries
Economic and efficient operation of petroleum manufacture frequently depends upon the relative locations of the raw product, the refinery and the market. Continental is fortunate in that its eight modern manufacturing plants are well placed to afford prompt and economical delivery both before and after refinement. These properties are located at Baltimore, Maryland; Ponca City and Sapulpa, Oklahoma; Artesia and Farmington, New Mexico; Wichita Falls, Texas; Florence, Colorado; and Glenrock, Wyoming.

Exclusive Processes Insure High Quality
Continental refinery engineers enjoy a national reputation in the oil business. Not only have they adopted the newest and most efficient mechanical equipment for these big refineries but they have designed machinery and developed processes which are exclusive to this company. Under centralized control, these facilities now are made available in the manufacture of petroleum products of exceptional quality.

ConocoLand Covers Tremendous Area
More than forty years marketing experience has spread the distribution of Conoco products over an area which reaches from the western slope of the Rockies, far east to the Mississippi River. Practically half of the United States is dotted so closely with Conoco Stations that a motorist may drive anywhere in that tremendous area without introducing other than Conoco products to his car. The outposts of ConocoLand range from the Pacific Northwest to the shores of the Great Lakes and from the Atlantic Seaboard to the California boundary.

Prestige Established in Foreign Lands
The Continental coastwise and export fleet operate from terminals at Texas City, Texas; Newark, New Jersey; Baltimore, Maryland; and Norfolk, Virginia; to a dozen foreign countries. Petrol pumps deliver Conoco gasoline to automobilists in the shires of England and Conoco motor oils lubricate industrial plants in north Europe, South America and the Orient.

In brief, the joined forces of these two great companies afford greater, better service to the users of motor fuels and lubricants wherever the sign of the Red Triangle is displayed.

THE GREATER CONTINENTAL OIL COMPANY
PRODUCERS AND REFINERS OF CONOCO PETROLEUM PRODUCTS.

Now you regulate the freezing time with the FRIGIDAIRE "Cold Control"

With the Frigidaire Cold Control you can regulate freezing time, exactly as you regulate baking time in your oven.

THE new Frigidaire "Cold Control" gives you complete control of the temperatures in the patented self-sealing Frigidaire freezing trays. You never have to wait for desserts and ice cubes to freeze at average speeds. Just turn the "Cold Control" and you tap the surplus freezing power of the Frigidaire compressor. You get results quick. Call at our display room. Learn how easily Frigidaire can be bought on General Motors liberal terms. Come in today.

MOTOR CARS AND HEALTH
Did you ever think of the big part played by the automobile in getting America's urban population to fresh air?

Twenty-five years ago there were millions of people cooped up day after day in the stifling heat and the smoke-filled air of our large cities. Fresh air specials loaded with poor children were run into the country districts.

But now nearly every family is able to get the pure air of the country at least once a week. The automobile takes them there. Look at the greatly increased number of golf courses, most of which are crowded. The same applies to beaches, camps and other places where outdoor sports are available.

One of the greatest contributions of the motor car to modern civilization probably will be improved health resulting from more fresh air per capita.—Abilene Reporter-News.

NO MORE ALL ABOARD
Here is a development about which something really ought to be done: The Central Vermont railroad has announced that hereafter its passenger train conductors will not cry "All Aboard!" or wave lanterns to signal to the engineer. All signals will be passed mechanically from the cars, and the colorful shouts and lantern-wavings of railroad tradition will be no more.

Railroads being what they are, other lines no doubt will imitate this practice, until in all the United States there is not one that clings to the old custom.

Probably it's being done in the interest of efficiency and all that sort of thing, but it's hard to take. One of the chief thrills of childhood is boarding a train, snuggling into a seat, listening for the long-drawn, entrancing chant of the conductor—lengthened out with a sharp upward inflection at the very last—watch the red lantern swing high in the air, and settling down for the first gentle jerk of the moving train.—Midland Reporter.

It's a fact, Paul, most of the old thrills you got as a boy are passing, not because you are growing older but because science is stepping in with efficiency machines and doing most of the work.

When you were a boy the conductor called "All aboard!" at least a minute before the train started, and then called it again just as he was giving the engineer the "high ball" to get out of town. The engineer started the train off as slowly as possible and was looking back all the time to see the boys who were "riding the train out of town" hop off and take falls, stopping the train when one got seriously injured.

The law-makers stopped the boys from hopping on and off the trains, and the engineer very seldom sticks his head out of the window after leaving a station.

In the days before air brakes the conductor and porter both would have to stick their heads and arms out the windows in order to flag the engineer when they wanted him to stop, even after blowing the whistle for stations not regular stops. Now the conductor pulls the bell rope three times after leaving a station and the engineer knows that he is expected to stop at the next station.

In a few years "All aboard!" will be such out of place as a horse on a city avenue in New York, and the with resolute officials of the Tee-Pee likely to discard it most any day. Drivers and street car motormen use it, and with the air signal—beeps on a passenger train it is unnecessary there.

There is one old worn-out custom that T. & P. holds on to, however, that cannot be cut out too quick to suit the people of Colorado, and that is the deafening whistles that are turned loose by almost every engineer going through the town. The firemen, it seems, get up steam to the popping point just before they reach Colorado so the whistles will sound good and loud. The engineer pulls the throttle wide open, hooks the lever down in the corner, ties the whistle lever down, and goes through Colorado so fast and loud the train almost takes the town with it due to suction and noise. The laziest men in town are aroused from slumber for two hours or more at night when one of those loud-tootin' racing 600's pass through Colorado. It ought to be stopped!

AN ASTONISHING VETO
(From Fort Worth Star-Telegram)
The full effect of Gov. Moody's astonishing action in vetoing the appropriation for boll-worm zone reimbursements are not likely to be felt for some time. As indicating the uneasiness of those in charge of enforcement of the boll-worm regulatory measures, the press carries a statement by J. M. Del Curto, chief entomologist of the Department of Agriculture, seeking to reassure the farmers. Mr. Del Curto points out that the Governor's veto applied only to reimbursement for last year, and that regulatory and eradication work for this year is not affected. Farmers who are compelled to undergo added expense through sterilization at gins during 129 will be repaid by the State.

This is all very well, but it does not dispose of the fact that Mr. Moody's veto has produced a situation whereby the State of Texas appears as defaulting in its duty to those citizens who last year responded to the Governor's action in proclaiming non-cotton zones in certain Southwest Texas counties. This action carried with it the plain implication—even if it had not been expressly stated in other official ways—that losses of farmers would be repaid by the State. Cotton growing was abandoned on approximately 30,000 acres, the owners yielding to the demand of the State that they make this sacrifice in order to protect the State as a whole. The claims which these farmers sent into the State, amounting to \$300,000 altogether, were just and legal obligations of the State.

The Legislature recognized these claims in the only way possible for it to recognize them. It appropriated \$300,000 to pay them. Then, in the last days of the last special session under pressure from Governor Dan Moody to keep the total of appropriations down, the amount was cut to \$150,000, representing about \$5 an acre. Then the Governor, after the Legislature had adjourned, vetoed the \$150,000 appropriation, leaving the farmers of these ten West Texas counties whistling for their money, and, naturally, in a mood unfavorable to any further "co-operation" with the State which may call for sacrifices on their part on promise of reimbursement at some future date.

The reason which Mr. Moody gave for blue penciling the \$150,000 appropriation may be technically sufficient. It would appear that the Legislature has ample authority to make appropriations for paying claims against the State, whether those claims are current or one, ten or a hundred years old, and whether certain laws had been passed before or after the claims arose. In fact, we are sure that an examination of the claims appropriated for and paid by the Legislature and the State would show many such. But it may be, as Mr. Moody says, that the fact that the law establishing the board of claims—which is the method of paying these claims—was not enacted until after the claims arose, raises a technical barrier to the claims. But this fact, if it is a fact, does not alter the obligation of the State, which is to pay these claims, and pay them promptly.

Almost everyone took an interest in the presidential election, and many worked hard for the different candidates. It is really surprising to learn how quick they forget. Ask some of those fellows to tell you right quick who is vice president of the United States.

FAMILIAR NAMES APPEAR IN LORAINÉ HISTORY ITEM

Names familiar all over Mitchell county appear in this item of Lorainé history appearing in the Lorainé Leader last week:

"Yes," said B. D. Smith, the real estate man, "Lorainé will have a birthday anniversary next February. The town was born, if you want to call it that, in February, 1906; although there had been a railway station and postoffice here before that time, both housed later in a Texas & Pacific boxcar."

W. C. Brown, who came to Lorainé in 1905, about a year before the lot-drawing of 1906 that is called the beginning of the town, has roped many a cow on the site of what is now the business section. He and his brother, S. E. Brown, who died in 1925, came the same year, but their brother Eugene preceded them to this country in 1903 and was a farmer. He now lives at Brownfield.

W. C. Brown, at the solicitation of the Lorainé Leader, gives a list of the earliest arrivals in these parts who built homes as J. S. Fine, 1905; B. D. Smith, 1905; Frank Riden, 1903; Henry Zehner, 1903.

The first organized banking institution came in 1907 with S. E. Brown as president; D. C. McRea cashier. The directors were T. J. Coffee, Bob Coffee, S. E. Brown, W. C. Brown and J. M. Templeton. S. E. Brown was president until his death in 1925.

The Higginbotham-Harris Lumber Co. lumber yard was established the year of the opening, or lot drawing. It was the first business establishment and is the oldest surviving business, though the name is not quite the same.

"The first residence built after the opening," said W. C. Brown, "was by Daddy Gaines, a blacksmith. He was followed the same year by J. S. Fines who still lives in the house he then built. Hubert Toler was another builder in 1906, his old place being now occupied by B. A. Parker. Likewise the Jim Lightfoot home, built about the same time, is now occupied by Lee Walker. The old Daddy Gaines home is now owned and occupied by E. M. Armstrong, Dr. J. A. Copeland built the house in 1906 now owned and occupied by Aunt Joe Smith. In 1906 also Hiram Toler, father of Hubert Toler, built the residence now owned and occupied by Samuel C. Harris.

"In 1907 there were built a number of homes that are still standing. Among the builders were Wyle Altman, J. D. Howell, W. L. Edmondson, R. B. Pratt, Hall & Wimberly, lumbermen; Tom White and Jim White, Jim Gregg, Sid Altman, E. M. Thompson, R. S. Stell, Paul Freeman, Beach & House, D. E. Gunn, C. M. Black, and I believe L. W. Rhodes.

"The first churches were built by the Methodists and Baptists in 1907. Both houses still stand and are in use. The Christian church was erected in 1909. It has been replaced. The Lutherans and Catholics built much later.

"The first bank was a private bank and was established by W. L. Edmondson in 1906, and was absorbed by the First State in 1909.

"Most of the first merchants are gone; the Altmans (Sid and Wiley) are still interested here in mercantile affairs, but reside in Abilene and Arlington.

Among the early arrivals in the Lorainé country was L. T. Britton, who came in 1905 and settled on a farm now owned by Mrs. Steward, six miles north of town. He later purchased the T. J. Davis farm, which he still owns. He moved to Lorainé in 1915, clerked for W. L. Edmondson for a year in his store, and was in the real estate business for two years with J. J. Riden, and for seven

HE WANTED A PLACE ON THE U. S. FARM BOARD

WASHINGTON, July 23.—A request to President Hoover for a job on the farm board has just been received on a post card addressed to "The State Department, United States Government." The letter with its original spelling follows:

Anderson, S. C., July 12, 1929.

Dear Mr. Hoover:

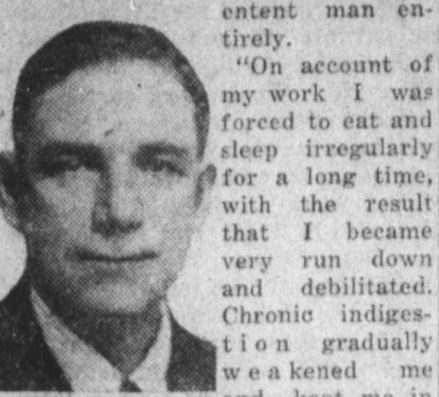

I wrote you a few days ago and asked you to name me on the farm relief board but have heard nothing from you? What's the matter? Is you sick? If there ain't no chance to get me on the cotton end of the board, how about naming me to represent the beet farmers of the South ansforth. I will be glad to take the pushish at 25¢ per month, provided I am allowed to peddle beef as I am now doing in connection with my job as Kurriner. Rite or Foam if I can depend on yora help, or will I hafta wait 4 more years hence on Al Smith or Owen D. Young?

Yores Trulle,
DIKE CLARK, RFD.

STRENGTHENING EFFECT REMARKABLE, HE STATES

more years was a partner with B. D. Smith. Mr. Britton has seen Lorainé in good times and bad, ever since the place has had a growing ambition.

"The Sargon treatment is simply wonderful for bringing back strength and energy for now, after a few weeks taking it. I feel like a different man entirely.

"On account of my work I was forced to eat and sleep irregularly for a long time, with the result that I became very run down and debilitated. Chronic indigestion gradually weakened me and kept me in bad health. I would suffer terrible pains after every meal, no matter how light it was. At night these pains robbed me of sleep and my condition finally got so bad I couldn't even eat an orange or a grape fruit without suffering afterwards. Naturally I was always tired and listless.

"Then I started Sargon—and commenced to feel better right from the beginning. I now enjoy my food and my digestion is fine. I'm never bothered with stomach trouble and get plenty of good, sound sleep. I feel better and stronger than I have in years—and I'll never be without Sargon again."—E. D. Frank, 1610 20th St., Galveston, Texas.

ANNOUNCING A VARIETY OF COLORS on the Chevrolet Six at no extra cost!

In keeping with the progressive policies that have carried Chevrolet to record-breaking heights of success—the new Chevrolet Six is now made available in a wide variety of colors at no extra cost.

Still further enhancing the beauty of the marvelous bodies by Fisher, these striking new colors give to the Chevrolet Six an order of smartness unapproached in any other low-priced car in the world.

And when you drive the Chevrolet Six, you will realize that its performance is equally as outstanding as its beauty. It flashes away at the traffic signal. It tops the steepest hills with an abundant reserve of power. The steering wheel responds to your slightest touch. And the quiet, non-locking, four-wheel brakes are unusually quick and positive in action.

But most impressive of all, this six-cylinder car is available in the price range of the four, with economy of better than 20 miles to the gallon of gasoline! Thus anyone who can afford any automobile can now enjoy smooth six-cylinder performance!

Come in today. See this sensational Chevrolet Six in its smart new colors.

The Roadster, \$525; The Phaeton, \$525; The Coach, \$595; The Coupe, \$595; The Sport Coupe, \$645; The Sedan, \$675; The Imperial Sedan, \$695. All prices f. o. b. factory, Flint, Mich.

COMPARE the delivered price as well as the list price in comparing automobile values. Chevrolet's delivered prices include only reasonable charges for delivery and financing.

Vocational Agriculture Teacher Travels Over County To Acquaint Farm Boys With New C. H. S. Course

Traveling as far as twenty-five miles at times to visit some farm boy who might become interested in the new vocational agriculture class at Colorado High school the coming year, Doyle Williams, who is to be in charge of this work, has spent the past two months in laying the foundation for his year's work by becoming acquainted with Mitchell county farmers and their sons, and learning of agricultural problems peculiar to this section of West Texas.

The aim of vocational agriculture in the public schools, according to Mr. Williams, is to train boys who are preparing to enter the business of farming. The course is always based on the particular farming problems encountered in each county. There is no extra charge for the course, and credit is given for work in it just as in any other subject taught in the high school.

In his rounds over the county Mr. Williams has enlisted some thirty or 35 boys for the class this year, with several more prospects. Of this number, he estimates that about 12 or 15 are going to enter Colorado High school this fall especially for the agricultural course, while others who have been attending school here previously, but are deeply interested in the new course, nevertheless.

"I have encountered the best spirit of cooperation and friendliness among the farmers of Mitchell county that I have found in my experience along this line," Mr. Williams says. "With scarcely an exception, every farmer I have visited seems seriously interested in my work and in the education of his children."

In explaining his work, Mr. Williams points out that the course beginning this year is to be widened each year until it includes three years' work. The work of the first year will deal with the productive side of farming, livestock, poultry, dairying, field crops, and farm mechanics.

The work of the second year will

center around the feeding of livestock, control of insects and diseases bothering livestock and crops and the managing of farm business.

Advance work in marketing agricultural products, farm management, and harvesting will occupy the third year of the course.

Instruction in the course, Mr. Williams says, will be made up partly of theory, partly of practice. The theoretical phase of the study will consist of class discussion, lectures and round table discussions. These will teach the student proved method of the best farming and will give him an opportunity to bring up in the class for discussion any and all of the special problems which he or his father encounter in their work on their particular farm.

The practical phase of the course will consist of work out in the fields in Mitchell county. The class will visit poultry farms, ranches and dairies. Mr. Williams asks the cooperation of owners of farms and other agricultural enterprises in the county in his work, for he will want to take his classes to several such places for demonstrations during the year. The class will also visit fairs and have contests with other schools who have similar classes. There will be field days and contests in livestock judging.

The new class, according to Mr. Williams, will have an excellent reference library, one of the most complete in the State. All the newer editions of agricultural books are being bought for the library.

day of July, 1929, and was duly returned by the Sheriff of Taylor County, Texas, belonging to said defendants, and

Whereas, thereafter alias execution was on the 31st day of July, 1929, duly dated and issued by the District Clerk of the 104th Judicial District Court of Texas in Taylor County, Texas, to the sheriff or any constable of Mitchell County, Texas, commanding me as sheriff of said county, that of the goods and chattels, lands and tenements of the said G. H. Crowner and W. T. Hamm, I make or cause to be made said sum of \$5627.40, with 10 per cent interest thereon from the date of the rendition of said judgment, and the further sum of \$28.45 costs of court, together with my legal fees and commissions for collecting the same, which said alias execution came to hand the 5 day of August, 1929, at 10 o'clock a. m., and was by me on said last above mentioned date and hour, levied upon the following property as the property of the defendant, W. T. Hamm:

Lots Nos. 7 and 8 in Block No. 16 of the Texas & Pacific Addition to the town of Loraine, Mitchell County, Texas.

Lots Nos. 3, 4 and 5 in Block No. 20 of the Texas & Pacific Addition to the town of Loraine, Mitchell County, Texas.

Lot No. 4 in Block No. 4 of White's Business Subdivision to Loraine, Mitchell County, Texas.

Now Therefore, Public Notice is hereby given that I, as Sheriff, aforesaid will sell said property to the highest bidder for cash in hand paid

at the court house door of Mitchell County, Texas, in Colorado, Texas, between the hours of 10 o'clock a. m. and 4 o'clock p. m., on the first Tuesday in September, 1929, the same being the 3rd day of September, 1929, the proceeds arising therefrom to be applied as required by law.

To evidence which, witness my hand this the 5th day of August, 1929.

R. E. GREGORY, Sheriff of Mitchell County, Texas.

By Allen D. Kuykendall, Deputy.

8-23c

NOTICE TO THE PUBLIC

Whereas, R. E. Gregory as sheriff of Mitchell County, Texas, has given notice by publication that on the 1st Tuesday in September, A. D. 1929, he will sell under an execution issued out of the 104th District Court of Taylor County, Texas, all of lots Nos. 7 and 8 in Block 16, T. & P. Addition to Loraine, Texas, and Lots Nos. 3, 4 and 5, in Block No. 20, T. & P. Addition to Loraine, Texas, and Lot No. 4 in Block No. 4, White's Business Subdivision to the town of Loraine, Texas, before the Court House door in Colorado, Texas, I, W. T. Mann, the person in the judgment to whom the execution is directed, hereby notifying the person or persons buying or intending to buy said above described property by virtue of said Sheriff's Sale, that same will be done at their own peril and risk. That said first above described tract is subject to a mortgage in favor of H. B. Wilson in the sum of \$1,000.00 and beside forms a part of my homestead. That the second tract described above is now occupied by me and has been for the past several months as a homestead. That the last above described tract is not my property but is the separate property of my wife, Amelia A. Hamm, and is not subject to my debts.

W. T. HAMM.

BYRNE SHORTHAND LEARNED IN LESS TIME THAN USUAL

WHY BYRNE SHORTHAND NOW LEARNED IN MUCH LESS TIME THAN OTHER SYSTEMS USED IN TEXAS SCHOOLS

Comparison of the Text Books:

The Other	Byrne
Pages	154 43
Rules	174 24
Word Signs	412 28
Phrases	542 0
Total	1282 95

This comparison shows other systems require thirteen and one-half times more study than Byrne.

Byrne Systems at the Top

A Byrne student made the highest grade on a shorthand Civil Service examination ever recorded up to that time by the United States government.

A Byrne student is secretary to one of our United States Foreign Ambassadors.

The highest paid lady secretary in Texas is a Byrne writer.

A number are reporters in United States Courts. Many are reporters in District Courts. Several are doing theological reporting.

Byrne Shorthand is the easiest to learn, the easiest to read and the most rapidly written shorthand in use.

Byrne Bookkeeping possesses similar advantages over other systems of bookkeeping.

Important

The Famous Byrne Shorthand and Bookkeeping cannot be had in any commercial college in Texas except the Byrne College. We have the exclusive teaching rights in Texas. Write for full particulars.

LAYERS IN FLOCK POINTED OUT FOR POULTRY MAN

A rec, large comb, prominent eyes, white thin shanks, a wide long back—these things indicate the layers in your flock and the ones that will make you money. In every flock there is the deadbeat, says the mid-summer number of the Purina Poul-

tryman in reminding the poultryman that he should cull his flock during August and September. "Separating the short time layers from the long time layers is easy if the flock has been properly fed," the magazine says in telling the poultryman of his obligation. The low egg producer can be very

easily detected by a few outward signs such as a pale, small shriveled comb; yellow, dry vent; dull sunken eyes; yellow, round shanks. Pelvic bones that are close together, hard and rigid also indicate the low egg producer. The hen's body that is shallow and tight from the pelvic bone to the breast-bone and that has a narrow short back in most cases is not a heavy layer.

Getting rid of those non layers will be one of the biggest steps you ever took toward getting more money from chickens. Your county agent will be glad to help you with your culling. Your local Purina dealer also will be glad to help you. August and September are the ideal months for culling the flock.

Normal human blood is too thick to be drawn through the mosquito's small piercing tube. They must first inject a thinning fluid. In that way disease germs are set afloat in the blood stream—bacteria of burning fever and crippling disease. There is also the danger of streptococcal infection (blood poisoning) from scratching the bite. Mosquitoes must be killed. Health authorities advocate FLY-TOX. Simple instructions on each bottle (blue label) for killing ALL household insects. INSIST on FLY-TOX. FLY-TOX has a perfume-like fragrance. It was developed at Mellon Institute of Industrial Research by Rex Research Fellowship. Safe, stainless, fragrant, sure.—Adv.

**Census-Takers Will 'Get Personal'
With Coloradoans Next April; Some
Warning Given on What They'll Want**

"Getting personal" is a privilege census takers will take with Colorado and Mitchell county folks, and people all over the nation next April. Soon after April 1, 1930, one of Uncle Sam's force of 100,000 doorbell ringers will certainly be at the doors of Colorado homes, quizzing the folks living therein about things they probably never dreamed of having to tell—especially to the government.

It is welcome news to those who have "skeletons in the closet" that Uncle Sam has taken great pains to see that the information given the census taker is held in strict confidence.

Here are the questions which the new force of census takers are to ask every person in the country:

His or her relationship to head of family; home owned or rented; if owned, free or mortgaged; does family live on a farm; sex; color or race; age at last birthday; single, married, widowed, or divorced; attended school any time since Sept. 1, 1929; able to read and write; place of birth of person being enumerated; also the place of birth of that person's father and mother; if not native of United States, year of immigration, naturalized or alien; does person being enumerated speak English; occupation veteran of U. S. military or naval forces in any war or expedition, and if so, what war or expedition.

This last question is a new one, added to the schedule this year by the Census Bureau.

By direct order of Congress, a census of unemployment is to be made, therefore enumerators have special instructions with regard to the occupation listing. The director of the census, W. M. Stewart, says it will be difficult to make the unemployment census absolutely accurate.

There are many old persons, and some who are invalided, who would like to return to work, he says, but who should not be listed as having occupations and temporarily out of work. No occupation should be given for persons in this condition, he declares, no matter whether they are living off their own incomes or being supported by the incomes of others. On the other hand, someone who is able to work and who has a trade or occupation normally may not be working when the census enumerator calls, and when he hears the question, "Occupation?" he may inadvertently reply, "None," regardless of the fact that he usually has one, or is capable of having one if opportunity presents itself. It is exactly such persons as these which the unemployment census should enumerate, therefore census takers are being very carefully instructed to get the correct answers to this question.

There is more than a little to be thankful for in the fact that the census enumerators will not ask all the questions which it has been suggested from time to time would be desirable from an informational standpoint. Some of the suggestions which have been made for census questions are: The number of radio sets in the United States, the number of men and women over 65 years of age who possess less than \$5000; religious affiliations, incomes, value of properties personally owned, racial descents, responses to literacy tests, the number of rooms occupied by each family, extent of schooling, number of children per mother, ability of citizens to read English with understanding.

It is at present the aim of the Census Bureau, however, to keep the schedule as simple and as compact as possible, and for the present at least, not to try to expand too much in connection with the population census.

In future years some method may be found whereby the Census Bureau statistical work will expand to answer the questions constantly being asked in connection with immigration, law enforcement, public health, and score of other subjects on which definite information is lacking. Whether such censuses will be undertaken in connection with the enumeration of the population, it is impossible to tell.

There have been attempts in the past to have the population enumerators get crime statistics. This was one of the duties of the census takers in 1890. They got their information from county and district court houses and in 1880 questions on individual health were part of the census takers schedule.

These facts about the census and the following appeared recently in a NEA Service article in various State papers:

It is believed that the 1930 census will list anywhere between 123,000,000 and 125,000,000 persons. And as huge a job as it will be for the Census Bureau's field force to gather data on all these people, it will be at least equally difficult for the bureau's augmented staff of clerks to handle all the answers.

About 5400 to 7500 extra population for Washington, D. C., may be in sight for the next one to three years. The clerical force at the Census Bureau must be increased from 600 to 6000 or 8000.

If the present rate of increase

in population should go on indefinitely, statisticians estimate that in 1970 there would be 200,000,000 persons in the United States. The birth rate, however, is declining and immigration is being held down, and further restrictions will have to be imposed in future years.

When names and answers get to Washington they are given a number. The number is entered on a card and the card is punched to indicate in code the information which is given. Various masses of governmental statistics are compiled by means of these cards, but the sheet containing one's name goes into a file, to which no one but the Census Bureau has access—not even another government bureau or department or even the president can consult this file.

The punch cards are run through electrical tabulating machines several times to correlate facts contained on them to compile various types of statistics.

It is stated that hundreds of thousands of Americans have no idea at all what their mother's maiden name was, and that knowing the names of parents gives but inaccurate information as to racial descent, as it is a common practice in this country to corrupt and change family names. The director of the census has finally decided that if it can be learned in what country each of the parents of an individual was born, that is as much detail as we can ever hope to get in regard to descent.

The age question on the census will probably interest many, not always pleasantly. The article under discussion states that it would be interesting to know how many persons out of the approximate 125,000,000 do not know how old they are and have no way of getting correct information about it.

The first census of the United States was little more than a count of the number of inhabitants in 1790. It was undertaken largely for the purpose of determining congressional representation, and the distribution of taxes. United States marshals were the census supervisors. Figures were added up by hand and the totals were sent to the office of Secretary of State in Philadelphia, where

the pencil arithmetic was continued in order to get the totals for each political division and for the whole United States.

By 1800 more details of age and sex were included; and in 1840 the government printed the schedules to be used and asked for still further details of ages of males, females and free colored inhabitants.

More tabulation than ever before is to be undertaken by the Census Bureau in connection with the 1930 census. There will be more detailed tables as to ages. These will be listed by 5's up to the age of 25, and by 10's from 25 up to 75 years of age. The next two or three years will be spent by the extra clerical force in the bureau by completing the tabulations. Twelve or more large quarto volumes will be issued by the bureau as a result of the census and the subsequent tabulations.

In order to be prepared for the census enumerator's call at your door, it is necessary only to read the list of questions which will be asked and make sure that you can answer all these questions relative to each member of the household—man, woman or child. Everybody in the country counts, and everybody is to be counted.

The Record will give a list of the questions to be asked at some later date, probably the early part of next year.

HOWARD COUNTY PLANS
HUGE ROAD PROGRAM

BIG SPRING, Aug. 17.—An election to determine whether Howard county will issue bonds for a million dollars or more for permanent improvements of State highways Nos. 1 and 9, will be held this fall, if action of the Big Spring Chamber of Commerce board of directors is ratified. The board Friday voted unanimously in favor of circulating petitions asking that the election be called during this autumn.

Heavy Traffic on Both Highway 9, a cardinal state route leading from Corpus Christi to Farwell via Fredericksburg, Brady, San Angelo, Big Spring and Lamesa, is being traveled almost as heavily as is No. 1, the Bankhead, according to a recent traffic survey by the State highway department. Aside from five miles of semi-permanent surfacing immediately south of here, this road is unpaved in Howard county. Its importance has increased rapidly between Big Spring and San Angelo. Although the Bankhead in Howard county has an asphalt surface which has been in use some years, the unusually heavy traffic on that road has led to the belief that it will soon have to be improved with heavier type of pavement.
