## STEVE REGION RESIDENCE IS DESTROYED IN FRIDAY FIRE

The home of Mr. and Mrs. Steve Region was destroyed by fire around noon last Friday. The blaze which started in the ceiling, quickly spread to the entire house, destroying practically all its contents.

The Carbon Fire Department responded immediately to the call, but due to the strong wind the blaze had gained too much headway to be brought under control.

The Eastland Fire Department was called as a precaution to the fire spreading to nearby residences. The home of Mr. and Mrs. Nick Duggan caught from flying sparks, but was extinguished without spreading. However, considerable damage was done to the roof and extensive

water damage inside. The garage at the home of Mrs. Will Lovell across the street and a chicken house caught fire but was quickly extinguished with very little damage.

Mrs. Lovell and Mrs. J. L. Black who lives with her, also Mr. and Mrs. Duggan have expressed special thanks to the volunteer workers of Carbon who worked so faithfully to save their buildings as well as the fire departments.

Mr. and Mrs. Region also expressed their appreciation to those who donated clothing, furniture and money in their time of need.

The Region home is better known as the M. C. Tucker place.

## Rush Creek Flood Control Planning Is Approved

The Soil Conservation Service of the Department of Agriculture has been authorized to assist all sponsoring local organizations in preparing a watershed work plan for the Rush Creek Watershed, under authority of the Watershed Protection and Flood Prevention Act, according to an announcement by Cong. Omar Burleson this week.

C. M. McCain of Eastland, chairman of the Upper Leon Soil Conservation District, was advised by letter by Cong. Burleson that final approval for planning has been okayed.

Irvin Poff, Area Conservationist of Stephenville, contacted late this week in the Eastland Soil Conservation, stated that most of the work involved in this project would be in Comanche County. He pointed out that Rush Creek headquarters are in the Rising Star Area, flow toward the De Leon area when Rush Creek joins and enters the new Proctor Reservoir.

Mr. Poff and E. E. McAllister, Eastland SCS manager, explained that the project involves small water shed reservoirs and might possible include some 15 or 20 small

Miss Betty Greer of Dallas spent the weekend with her mother, Mrs. Mae Greer. Another daughter, Mrs. Esther Lovier, of Dallas visited her earlier in the week.

E. R. Yarbrough who had been a patient in the Gorman Hospital for some time, was transferred to Hendrick Memorial Hospital, Abilene, over the weekend. He underwent surgery Wednesday morning and is reported doing nicely.

dams for flood protection. The Rising Star area is level, they pointed out, and there probably wouldn't be any need for basins there.

The present authorization is for planning, it was stated.

Cong. Burleson's letter further stated:

"As you know, of course, the Watershed Protection and Flood Prevention Act authorizes the Department of Agriculture to give technical and financial assistance to organized groups of farmers living in small watersheds where floods, droughts and soil erosion are causing serious damage. Of course, the application has been approved by the Texas State Soil Conservation Board, which was necessary before the Soil Conservation Service could take this action"

## Chilli Supper

A Chilli supper sponsored by the Business Men's Club, will be held in the Fire Hall at Gorman June 2, at 7 p. m. A program will follow dealing with Soil Conservation practices and Flood Control on the Sabanno Valley Watershed.

Mr. Crenshaw of the Soil Conservation office at De Leon and Mr. Lee of the SCO at Rising Star, will give reports of progress being made in their areas. E. E. McAlister of the SCO at Eastland, will be the speaker for the evening.

To all who are interested in this kind of work, we invite and solicit your presence at this meeting. Arrangements are being made for a large crowd.

**Browsing With Bev**

How were your tulips and hyacinths this year? If you didn't get as many large blooms as usual, they probably need replanting. A few small flowers are a sign of overcrowding.

Wait until the leaves turn yellow before digging the bulbs. To be sure they are ready, uncover a few without disturbing them. The bulb coat should be light brown.

Keep the bulbs out of direct sunlight, particularly just after digging. Spread them in shallow trays and dry them in an airy, shaded spot.

When the outer scales are dry, move the bulbs to a cool, dry, dimly lit area - your garage or cellar. Be sure not to leave any soil on the bulbs during storage. Check them at least once a week and remove any bulbs that are rotted or diseased.

In early fall - when the bulbs are dry - separate those that have formed clumps. But don't forcibly tear apart any that are not dry.

Plant the bulbs no later than September in the North and late October in the South. You can plant tulips and hyacinths until January in areas where the ground is not frozen, but you get better results from an earlier planting.

If you have fretted about the storage problem created by tall cereal packages, here's some welcome news. Look for changes by the major manufacturers of ready-to-eat cereal in the coming months. They'll be re-designed for storage convenience.

Consumers and grocers have found the tall packages difficult to shelve efficiently. In fact, they have stored the packages flat in many instances.

Forty-one per cent of the ready-to-eat cereal volume of one billion pounds sold annually by major processors is in packages more than 10 1/2 inches high. These packages

**Pecan School Is Good Success, Cooper Reports**

The eighth annual Eastland County Pecan Budding and Grafting School, at Cisco Junior College, was the most successful in the history of the event, County Agent J. M. Cooper reported. More than 150 persons registered for the school, and others took part.

Mr. Cooper covered all phases of pecan orchard development, including budding and grafting, in lectures during the morning. After lunch in the college cafeteria, the group went to the Ken Word orchard south of town for practice and demonstration.

Mr. Cooper said the biggest demand for budwood was for the Comanche type that was developed in recent years at the Brownwood Pecan Experiment Station.

The outlook for this year's crop is especially good at this time, Mr. Cooper told the visitors. Some fruit orchards suffered freeze damage but, as a whole, the fruit prospects are good, he added.

Guests registered from throughout West Texas.
