Yoakum farmers receive \$52,457 in ASC Program

It was announced this week that 178 Yoakum County farmers earned \$52,457.66 under the ACP program during 1959. W. M. Overton, local ASC office manager, said the farmers received payments by carrying out 1959 ACP program approved by the local ASC committee.

ACP practice payments equal approximately one-half of the total cost to farmers for carrying out the approved practice. The farmer himself paid one-half of the cost of practice.

Payments were given for the following:

- Deep plowing — 12,410 acres
- Increased rotation cover crop — 31 acres
- Deferred grazing — 1377 acres
- Stubble mulching — 100 acres
- Applications of cotton burrs — 509 acres
- Installation of irrigation pipe — 1,160 feet
- Summer legumes — 80 acres
- Winter cover non-legumes — 257 acres

Three file for city posts

The Plains city election will be held April 5th at the City Hall beginning at 8:00 a.m. to 7:00 p.m. The positions filed for include the mayor's post and two aldermen.

Mr. Johnnie Fitzgerald will be the election judge, and will be assisted by Mrs. John Camp and Mrs. John Robertson, clerks. Those eligible to vote are the eligible county voters.

Mr. Roger Curry has filed for mayor, the job he has held for four years. Vacancies occurring in the alderman's council are those now held by Kenneth Hale and Pete Sampson. Filed for these positions are Kenneth Hale and R. D. Romans.

The remaining three alderman's terms will expire in April, 1961. The aldermen are Jack Hayes, Russell Faulkenberry, and Amos Smith.

The other vacancy occurring was that of city marshal now held by Billy Kennedy. No one filed for this post and according to Bob Loe, city secretary, a write-in candidate can fill the post.

The aldermen are paid \$5 a meeting with a maximum of two paid meetings a month. The mayor receives \$25 a month and city marshal receives \$135.

Other news from the city hall was the laying of new 3-inch gas pipe to the main tie-on 9 1/4 miles southwest of Plains. Loe explained that the 2-inch pipe being used was not giving the people satisfactory service.

Also a new high pressure line was laid directly to the Plains High School in order to better serve the east part of town and to insure the school sufficient gas to operate.

The 2-inch pipes taken up will be used to connect the pipes in the city ending in cut-offs into loops. This will insure steady pressure throughout the city. Approximately 57,000 feet of 3 and 4 inch pipe has been used.

High Plains area has second best cotton crop year

Despite delayed plantings and other obstacles, Texas High Plains cotton producers harvested their second biggest cotton crop in history for 1959. This report was released by the U. S. Department of agriculture and the census bureau.

Yoakum County produced 32,030 bales of cotton out of the total of 1,869,353 bales produced in the 23 member counties of the Plains Cotton Growers, Inc.

This record for the 23 counties is second only to the all-time record crop of 1958 when 2,025,433 bales were produced.

Thus 1959 becomes the fifth time in the last 10 years when Texas High Plains cotton production topped the 1 1/2 million-bale mark. Other top years were 1957 with 1,572,389 bales; 1956 with 1,654,904; 1954 with 1,581,148. Also 1949 saw 1,760,840 bales produced on the Plains.

As to top ranging counties in cotton production, Lubbock County in 1959 ranked eighth in the nation with 209,790 bales. Other Plains counties included Hale with 180,274, tenth in the nation; Hockley with 178,398, eleventh in the country; and Lamb, 174,397, twelfth.

Kern County California was number one in the nation with 543,875 bales while Fresno County California was second with 483,878 and Tulare County California was third with 329,264. Maricopa County Arizona was fourth with 254,579. Another California County, Kings was fifth with 253,842 while Mississippi County in Arkansas was sixth with 242,293. Pinal County Arizona was seventh with 229,648. Hidalgo County in the Rio Grande Valley was ninth with 200,422 bales.

While these ginning figures are not final for 1959, they represent about 99 percent of the cotton harvested. Final figures will be available at the end of March.

A total of 32,030 bales were produced in Yoakum County in 1959, PCG figures show.

Big measles outbreak reported in Plains

This year is shaping already up as a bad one for measles not only in Plains but throughout the state. In Plains there is reported 17 cases of measles striking in the age group of 5 to 6 years. This has made the second week of the outbreak of measles in the area.

State health officials say they are not worried over the statewide outbreak as a survey of the state's measles pattern for the past 20 years shows the disease usually is up one year and down the next.

This is slated to be the "up"

ACROSS THE Cattle Guard

by LEO W. WHITE
County Agent

During the last 30 to 40 days there has been some added interest in hog production. This probably stems from the fact the hog market is beginning to come out of the slump that everyone expected it to take sometime in late 1959 or early 1960. The low was in November and December and since that time the price has moved up only slightly. There is no assurance that it will continue to rise but an eight year average for the Forst Worth market shows that prices are highest during June, July and August. Weaner pigs put in the feed lot between now and April 25th should be ready for market during this seasonal high.

Several farmers that I have talked with in the past few weeks about hogs have repeatedly stated that hogs could not be profitable unless green pasture was available. It is true that green pasture will cut down on the amount of grain required for a feeder pig to grow from a 40 pound weaner to a 220 pound market hog. It is also true that pork can be produced at a profit without pasture. Some of the modern meat type hogs will put on gain with very little feed.

On Saturday, March 12, there will be an auction sale at Amarillo where 13 tested boars will be sold. These animals have been thoroughly tested for everything that is desirable in the red meat hog. They were fed in a pen along with two or three of their litter mates and an accurate account was kept of the amount of feed consumed. Two of the litter mates were slaughtered and the carcasses were measured for length, back fat thickness, loin eye muscle and percentage of lean cuts. Each boar in the sale is also probed for back fat thickness to they were well tested.

The high ranking animal in the sale is a Hampshire boar that put on a hundred pounds of gain with 279 pounds of feed. The second high ranking boar was his littermate and since there were four pigs in the pen they all had the same feed efficiency.

Mrs. Earl Bryson host to Turner HD

The Turner Home Demonstration Club met Wednesday with Mrs. Earl Bryson. Mrs. I. R. Smith, president, presided at the meeting.

The recreation program was led by Mrs. Allon Rollins. Mrs. Johnny Curtis gave a talk on hair care which was followed by a question-answer period.

Refreshments were served to 11 members and one visitor.

Those present were: Mesdames Johnny Curtis, Homer Sudderth, Allen Rollin, I. R. Smith, Howard Mauk, Ped Martin, Carl Lowery, Alton Elmore, Will Wershend, Jessies Snodgrass and Weldon Spencer.

There was a Poland China boar that was almost as good. He used only 280 pounds of feed to put on a hundred pounds of grain.

A pig that can put on a pound of grain with 2.8 pounds of feed will grow from a 40 pound weaner to a 220 pound market hog with 504 pounds of feed. About 100 pounds of this feed would be a protein supplement and the remaining 404 pounds would be grain. The protein feed would cost about \$6.00 and the grain at \$1.55 cwt. would cost \$7.82. This would make a total feed cost of \$13.82. If the pig cost \$10.00 to start with the total investment would be just under \$24.00 so if the animal sold for 11c a pound things would be on a break even deal. All it would lack being a break even deal is that the feeder would lose his labor, plus the interest on his investment including equipment. All over 11c that the animal brought would be labor and investment profit.

The eight year period beginning in 1951 and going through 1958 shows that the average price of hogs weighing 200 to 220 pounds at Fort Worth is 21c during July. Chances are good that hogs marketed in July of this year will demand 16c up to possibly 18c. Our hind sight is always better than our fore sight but it looks like right now is the time to put some pigs in the pen and start feeding some of last year's grain.

New bulletin says cotton is biggest Texas money crop

Cotton is the most valuable cash crop in Texas, although it now ranks second in acreage to sorghum for grain. For the five years, 1952-56, the Texas cotton crop, including lint and seed, had an average yearly value of more than \$720,000,000. This was more than three times the combined value of wheat, sorghum grain and rice during the same period.

"Cotton Production in Texas," a new bulletin released jointly by the Texas Agricultural Experiment Station and Texas Agricultural Extension Service, discusses in detail virtually everything cotton producers should know about this important crop. Production practices, varieties, soil and climatic adaptation, preparation of land and seedbed, planting, cultivation, weed and insect control, and irrigation are a few of the many topics covered.

Trends in cotton production in the State is one of the most interesting features. The bulletin points out that since 1933 cotton production in Texas has been shifting from certain areas to others. A remarkable shift has been made to the extreme west-ern, northwestern and southern portion, or to the Trans-Pecos, High Plains and Rio Grande Plain of Texas. These areas accounted for about 12 per cent of the acreage at the start of governmental control programs in 1933, but now have more than one-third of the acreage and more than half the total production. During the same period, the Blackland, Grand and Coast Prairies, and the East Texas Timberlands experienced the greatest decline in percentage of planted acreage.

Hilburns building two new gins for '60 cotton season

Two new cotton gins will be in operation in the Yoakum County area for the 1960 ginning season, according to an announcement made by the operator of a local gin, today.

Verlon and C. E. Hilburn, owners of the Wayside Gin on Denver City-Hobbs highway, announced that a new gin is now under construction four miles west of Plains on the Lovington Highway, and another will be started immediately between Denver City and Seagraves.

Hilburn said the two new gins, costing an aggregate total estimated at \$350,000, should be ready for operation around August 1 in adequate time for the 1960 picking season.

The gin at Plains will be named the Plains Gin, Hilburn said, while the one midway between Denver City and Seagraves has not as yet been named.

Gin at Plains will be equipped with Harwick Etter and Moss equipment, according to Hilburn, while the one near Denver City will have Moss and Murray equipment. Both gins will be five 90 saw gins with triple lint cleaning.

Hilburn said that it is the intent of the owners of the two new gins to provide the same friendly and complete service at the new operations as has been the policy at Wayside Gin.
