Volume 52

Carbon, Eastland County, Texas, Thursday, August 8, 1963

Number 12

Local News In Brief

Mr. and Mrs. Leonard Bledsoe are the proud parents of a son born in the Eastland Hospital Sunday morning weighing 6 pounds 12 ounces. Grandparents are Mr. and Mrs. Byron Rone of Gorman and Mrs. Bledsoe of Ranger.

Mr. and Mrs. Wade White returned home Sunday after a month's absence from home due to Mr. White's illness. He spent several weeks in Eastland Hospital and several days with Mr. and Mrs. Bud Clack of Cisco. Friends are glad to learn that Mr. White is much improved. Their son, Basil White, and family of Abilene spent Sunday with them.

Clyde Campbell was taken to Ranger General Hospital in Ranger on Monday of last week where he is in critical condition. His daughters, Mrs. Norris Shrey of Morenci, Ariz. and Mrs. Arlis Pierce of Cisco and their husbands have been at his bedside. His sister, Mr. and Mrs. Victor Kubica, of Lubbock visited him also.

David Hall Claborn July graduate of N.T.S.U. with BBA degree, visited his grandmother, Mrs. Harry Hall, Wednesday enroute to Dallas, where he was enlisted with the U. S. Naval Air Reserve serving 6 months active duty. Leaving Dallas he will attend Electronics Technician School in Memphis Tenn. He was accompanied by his parents, Mr. and Mrs. A. M. Claborn of Trent who will visit Mr. and Mrs. Morris Wayne Claborn and Six Flags Over Texas before returning home.

Mrs. Henry Himes spent Friday night with her granddaughter, Mrs. D. D. Thompson, in Dallas while Mr. Thompson was on maneuvers with the 49th Division at Fort Hood.

Mr. Lois Cowen, Mr. and Mrs. G. L. Robertson and son, James Robertson, wife and baby of Waco visited Mrs. Will Lovell Sunday.

Mr. and Mrs. Donald Sevarance and daughter and Mrs. Jerry May of Lubbock visited their parents, Mr. and Mrs. Coda McDaniel, last weekend.

Mrs. Wade Clark was called to Brownwood last week due to the serious illness of her niece, Mrs. Bessie Faye Hamlett, who is a patient in Medical Arts Hospital.

Mrs. J. A. Clement of Moran and daughter, Miss Opal Clement of Dallas, Mrs. Sidney Roff of Eastland visited Mrs. J. T. Clement and Mrs. W. M. Durrn Saturday and all visited the A. N. Mahans of Gorman.

There will be a working at Bear Springs Cemetery Thursday, August 15. Everyone who has loved ones buried there is urged to come and bring your power mower and other working tools. Bring your luncheon and spend the day.

Mr. and Mrs. A. L. Denton and daughter, Ann of Big Lake visited her sister, Mrs. Travis Spence, and family last week.

Bewel Rhine and family of Corpus Christi visited his parents, Mr. and Mrs. Clayton Rhine, this week.

Mr. and Mrs. C. C. Gilbert visited their son, Calvin Gilbert and family of Denton Sunday.

Miss Jackson, daughter of Mr. and Mrs. Lloyd Jackson left Saturday for Austin where she will enter the State University.

Rev. T. D. Whitehorn and son of Booker visited his mother-in-law, Mrs. Ruth Craighead, last weekend and she accompanied them home for a visit.

Mr. and Mrs. Jack Butler and son of Abilene visited his parents, Mr. and Mrs. E. R. Butler, during the weekend.

Mr. and Mrs. A. E. Lanham of Odessa visited her sister, Mrs. Lloyd Jackson, and Mr. Jackson last weekend.

J. T. Clark and family have spent the past two weeks with his mother, Mrs. Wade Clark, while in the process of moving to Brownwood.

Mr. and Mrs. Willie Liles of La Porte visited his mother, Mrs. Jim Liles, and sister, Mrs. Delbert Hughes, last week.

De Leon Peach & Melon Festival In Progress

Merchants and patrons of De Leon are inviting the people of the Carbon area to their 49th Annual Peach and Melon Festival which got underway on Wednesday and runs through Saturday.

Don Franklins Big State Shows are open nightly. Community Exhibits, Commercial Exhibits plus Queen Coronation, Gospel Singing, Old time Fiddlers Contest, Watermelon Slicing and as an added attraction, Sky Diving Show nightly. Freq ice water too!

Value Of Farm, Ranch Products Second To Oil

The value of Texas' farm and ranch production is exceeded by only one other raw material, oil. The value of the state's total yearly agricultural production exceeds the payroll for manufacturing, or the total of construction awards or the payroll for retail trades, points out John McHaney, extension economist.

Farm and ranch production each year has a total value of just under 2.5 billion dollars, but, explains McHaney, agriculture adds much more to our total economy than just income from the sale of products. Business firms which assemble, process, distribute, transport wholesale and retail the products of Texas' farms and ranches employ about 20 percent of the labor force of the state and add about 3.9 billion dollars to the agribusiness economy. Their primary concern is to get the agricultural products to the final consumer in the desired form and at the right place and time.

Simple addition, says McHaney, shows that the sale of agricultural products plus the costs of processing and distributing them annually adds to the state's economy about \$6.3 billion. The economic destiny of most Texas counties, the economist adds, hinges primarily on the agribusiness economy.

And commenting upon the future of the Texas agricultural industry, McHaney emphasizes the future will belong to those people and states which work to keep the agricultural economy competitive with other areas of the nation and world. Agriculture adds, he says, to the state's economy but rather a big competitive business. He's strong for keeping the industry in Texas in a strong competitive position.

H. V. O'Brien, editor of the Eastland Telegram and a former Carbon citizen, and his wife, Geynell, are the proud parents of their first born, a son, who arrived at Eastland Memorial Hospital at 8:30 a. m. Saturday, Aug. 3. In H. V.'s words, "he checked in hungry and weighing 6 pounds, 9 1/2 ounces"

He has been named Houston Vance, III. Grandparents are Mrs. Mable Ratliff and Mrs. Fannie O'Brien, both of Eastland.

Mr. and Mrs. John Henderson and son of Lubbock visited the Charles Morgan family Sunday.

The State Softball Tournament is being held at Brownwood this week starting Thursday. The best men's teams in the state will be playing in this tournament to decide who will represent Texas in the National Tournament later this month.

Regular Spraying Prevents Further Worm Infestations

To protect their \$3 million investment in the screwworm eradication program, stockmen are encouraged to prevent further worm infestations by spraying their animals on a regular basis, says L-603, a new leaflet of the Texas Agricultural Extension Service.

"Spray and Protect Your Investment" explains that the success of the eradication program in the Southwest depends greatly on the cooperation and assistance of the live-

stock producers and others who contributed mightily to it. It further says that producers can also help their own cause by avoiding the movement of infested animals and by reporting all suspected infestations immediately.

Sprays recommended by the publication are Co-Ral and Korlan. Wetting the animal thoroughly, with from one to four quarts depending on their size, will prevent the development of screwworm cases. Screwworm flies must have fresh or bloody wounds in which to lay their eggs and untreated scratches or wounds of any type are open invitations to the pests.

The cost of a single application of insecticide is about 10 to 40 cents per animal, depending on size. But the producer gets more than screwworm protection by the use of these sprays, says the leaflet. They will control horn flies, ticks and lice, and decrease the numbers of stable flies, house flies and other external pests. A regular spray program will also reduce anaplasmosis and pinkeye problems by eliminating the insects which spread and irritate the conditions.

As most producers agree, spraying livestock pays dividends, not to mention the protection it gives their large investment in the screwworm program. For a copy of L-603 see your county agricultural agent or write the Agricultural Information Office, College Station, Texas.

Local Girl Chosen As Farm Bureau Queen

SUSAN GRIFFIN

Congratulations are in order for Miss Susan Griffin, 16, upon being selected Queen of Eastland County Farm Bureau last Saturday night in the Eastland High School Auditorium. She is the daughter of Mr. and Mrs. J. D. Griffin, Jr., of Route One, Carbon.

Joy Love, 16, daughter of Mr. and Mrs. Melva Love of Route 1, Ranger, was runner-up. She is a Junior in Gorman High School.

Susan, a junior in Carbon High School, is a member of the pep squad and of the Future Homemakers of America. She was a 1962 contestant in the Eastland Peanut Bowl queen contest. Susan was crowned by Kay Morton, 1962 runner-up Farm Bureau Queen. James Wright of Eastland was Master of Cerecories.

Other girls in the contest were Paula Norris, daughter of Mr. and Mrs. Paul Norris of Rt. 2, Gorman; Betty Easter, daughter of Mr. and Mrs. Aubry Easter of Rt. 2, Cisco; and Leannah Leveridge, daughter of Mr. and Mrs. John Leveridge of Route 2, Cisco.

Date And Time Set For County's Sheep, Goat Day

County agent J. M. Cooper, has announced the date and program for Eastland County's second annual Sheep and Goat Field Day.

It will be held three miles north of Ranger at the old Sinclair Pump House on Tiffin Road, September 20.

The Ranger Chamber of Commerce will host a barbecue dinner for those attending. During the day, several speakers including some sheep and goats specialist of A&M College Extension service and Dr. J. B. Henderson, Coleman veterinarian of the Texas animal Health Commission, will discuss the problems and status of such subjects of today.

A squab is a pigeon about four weeks old.

A hookah is a Turkish, water-cooled pipe.

The flying squirrel can leap and glide, but cannot really fly.

Postal Service Likes To Keep Everything Neat

When people think of house cleaning, their minds turn instinctively to spring. Renewal of life and renewal of property go hand in hand.

"With the postal service, it's much the same," says the local Postmaster. "Though we like to keep people conscious all year round of the need for proper mail-receiving equipment, we put special emphasis on clean-up and fix-up projects in the spring when the public is especially in the mood."

Next to the people who live there, no one comes to anyone's home as often as the mailman. And few calls are more important than those the mailman makes. To the success of our business and social lives, his visits are indispensable.

If the container into which carriers put people's mail were related in looks, safety, adequacy, and otherwise to the value of their contents, only first-quality receptacles would be used. But unfortunately this is not so. People put up all sorts of odd things: cigar boxes, oil cans, cheese boxes, coffee tins, etc. And they put them in odd places where they are not immediately visible and easily ac-

cessible to the carrier.

The Postmaster is anxious always to give good service. You can assist him in that worthy ambition by making sure your mail box is

1. Adequate in size, of approved design, and in good repair.
2. Clearly visible and readily accessible.
3. Locked, if in an apartment house or otherwise unprotected.
4. Properly identified.

Don't wonder about your mail receptacle. inspect it now. And correct it now. If you have questions call the Postmaster.

Browsing with Dev

Cheese is an excellent meat alternate.

There are many different products at the dairy display case, but they generally fall into three classes. To refresh your memory, here they are.

The natural cheeses. These are sold just as they are produced, with no additional processing. You will find them labeled "natural cheddar" or "natural swiss" or other terms names. Natural cheeses are apt to be different each time you buy them. The sharpness may be more or less evident. If you plan to buy a large amount of natural cheese at one time, it's a good idea to sample the product to make sure you are getting just what you want.

Process cheeses, the second category, are cheeses made by combining one or more natural cheeses. The natural cheeses are heated, pasteurized and blended together. The same brand of process cheese will taste the same way every time you buy it. Process cheese also melts easier and blends with other foods easier than does natural cheese.

The third group is the process cheese foods or spreads. They

resemble the process cheeses, but have more moisture and may also have dry milk solids and seasonings added. As a rule, they are much softer than process and natural cheeses

Need some help in understanding or interpreting guarantees? Consumers may want to do some research and find answers to these questions about guarantees.

Who is to make good — the retailer or manufacturer?

Must the product be returned to the store, or is it to be repaired at home?

Does the guarantee cover only parts that rarely wear out or the entire produce?

Does it cover services for routine maintenance?

Is the guarantee based on "suggested" retail price or on the price paid?

Is the guarantee in writing?

Who pays the labor charge?

Golf balls in blenders are used by physicists at the Naval Ordnance Laboratory, Silver Spring, Md., to break up lumpy explosive mixtures. This method is faster and safer than the old method of de-lumping by brushing the explosive mixtures through a fine screen.

PAY BILLS BY CHECK

It's so much easier, faster, safer to pay bills by check! The mailman does your footwork. You waste no time standing in line. You avoid all arguments about whether you paid this or that bill because your cancelled check gives you proof of payment. You find it easier to budget, because your check stubs show you where every dollar goes. It makes sense, every way, to open a checking account here.

ROUGH FISH TOTALS 89 POUNDS IN TWO WEEKS

Outlook Is Good For Turkeys In Coming Months

The demand for turkeys is expected to again be good in 1963 but prospects for a crop only to the record breaker in 1961 could drop prices later in the year, says Marshall Miller, extension poultry marketing specialist at Texas A & M College.

Despite the 1962 reduction of 15 percent under 1961 production, total supplies of turkeys last year were down only 6 percent due to the record carryover of frozen birds from the year earlier. On the favorable side of the supply picture, Miller says cold storage holdings at the beginning of 1963 were substantially below those of a year ago. Per capita consumption of turkey meat is gaining more year-round acceptance by consumers and this has helped the demand situation, the specialist adds.

Miller says the first indication of a big jump in production for 1963 came in October when a 15-state report of growers' intentions was released. Too, increases in testing of breeder turkeys for pullorum became especially noticeable during August and September. But, Miller points out that it is still a bit early to forecast definite trends due to the uncertainty of the amount of storage; length of the hatching season; early demand for pullets and other seasonal influencing factors.

The specialist believes that prices for the first part of 1963 will average some higher than for the same months in 1962. However, the expected larger crop will cause prices to dip later in the year. Turkey meat, he points out, will continue to be a good meat buy for consumers.

As for the long-time outlook, he says the industry has undergone dynamic changes and

A total of 89 pounds of rough fish has been weighed in at Lake Leon in the first two weeks of the rough fish tournament.

Included in the catch was a 9-pound carp, caught on a trot line by Boone Yarbrough of Ranger, which tied for first place last week with a 9-pound carp caught by Randy Honea of Cisco.

Mr. Honea also had pulled in a 7 lb., 4 lb., and 3 lb. catch.

Other winners were Luther Kirkpatrick with an 8 lb. carp, June Trout of Eastland with a 6 1/2 lb and 4 lb. carp, and Z. O. Mehaffey of Eastland with a 6 lb buffalo.

The water board is conducting the tournament to try to decrease the rough fish population in Lake Leon, and during the second week of the tournament almost twice as many rough fish were weighed in as was weighed in the first week.

The tournament will continue indefinitely with a weekly prize of \$5 for the largest rough fish caught during the week and a \$10 prize for the largest one caught during the month. * No entry fee is charged.

A total of 56 1/2 pounds was weighed in last week, according to James Johnson, lake custodian.

These have created strong pressures toward increased production. They have also made output less responsive to price declines. With the advent of large and highly integrated production and marketing combines, with great financial resources, we can expect total turkey production to continue large.

Card Of Thanks

We are deeply grateful to our good friends and neighbors for the many kindnesses shown us during the long illness and death of our loved one. Especially do we thank Dr. Brogdon for his devoted care. May God bless you all. Mrs. H. R. Gilbert & Family

Peanut Growers Association Plans Annual Meet Aug. 16

The annual meeting of the Southwestern Peanut Growers' Association will be held August 16 at Stephenville. As has been the custom for several years, the meeting will be conducted in the Agriculture Auditorium on the campus of Tarleton State College.

This year's program will follow the theme of research which proved so popular last year with the capacity crowd which was present. Staff members from Texas A&M College and Oklahoma State University will present the very latest findings in important production phases such as

disease control, weed control, insect control, varieties and fertilization and harvesting and curing. In addition, the peanut outlook will be reviewed covering the whole realm of marketing.

Following the lunch hour a panel will be formed to answer growers' questions regarding production problems. It is felt that this type program gives the grower the rare opportunity to direct his questions to those in the best positions to provide answers. Better education of growers and handlers is one of the best ways of building a better peanut industry. Many express the belief that last year's meeting which stressed improved curing techniques made a major contribution to improved quality of our peanuts. Last year SWPGA worked closely with the Southwestern Peanut Shellers' Association and research and extension branches of Oklahoma State University and Texas A&M College in the effort to make known the latest recommended practices in harvesting and curing peanuts. A committee on harvesting and curing practices was selected from the staff members of the two colleges. This committee, through a series of meetings, prepared its recommendations which were presented as a part of the 1962 Annual Meeting. In addition, the report was distributed to all peanut buyers and handlers in the Southwest. The meeting this year, therefore, is a continuation of the effort to bring about better yields and quality of peanuts produced in the Southwest.

Lunch will be served at noon, compliments of Southwestern Peanut Growers' Association. Tarleton President, E. J. Howell, Dean, Paul A. Cunyus and Agriculture Department Head, Joe Sutrey have assured Association officials of the same courteous and efficient hospitality this year as has characterized the college in the past.

Card Of Thanks

I want to express my sincere thanks to our many friends and neighbors who visited, sent cards, and flowers to me while I was in the Hospital. We thank the nurses and Doctors and all the Hospital Staff for their kindness shown us while there. Especially would we mention our pastor, Bro. Rue, for his many visits and prayers, Mr. Jim Weaver and our Olden friends Mrs. Angie Everett, Mrs. Stella Jarrett and Mr. and Mrs. O. H. Dick for their many kind deeds.

May God bless you.
Wade White

IF YOU'RE BUILDING OR REMODELING,

CONSIDER THE ADVANTAGES OF MODERN ELECTRIC HOME HEATING

... AVAILABLE NOW AT LOW COST ON OUR MONEY-SAVING RATE FOR ELECTRIC HOME HEATING! In addition to the many other advantages of electric home heating and the clean, safe, wintertime comfort it provides, our low electric rate for residential heating makes it an outstanding value in better living. This low electric rate for heating is in effect during the months of November through April. Call our office for details on how this rate for electric home heating will apply to your home.

TEXAS ELECTRIC
SERVICE COMPANY
Z. J. HALLMARK, Manager

FLAMELESS.

Electric heat is as comfortably warm as radiant sunshine. No oxygen is burned, there are no by-products of combustion. And since no flue is needed, electric heat offers flexibility of room design and furniture arrangement.

SAFE

Flameless electric heating is the modern way to winter warmth. No pilot lights to go out, no flues, no fumes... safe around children, too.

CLEAN

Electric heat cleans walls, draperies and furnishings stay new looking. House cleaning is easier.

AUTO-MATIC

With efficient electric heat from wall or baseboard units, each room can have its own thermostat... its own temperature for maximum comfort. For instance keep bathroom at 75, bedrooms at 60, and living areas at 70 degrees.
