BOB GROSS---Doing a good job running the Junior High and Grade School Athletic program.

In 121st Court Ward Murder Trial Put Off Court Is 18th

Several changes in the upcoming sessions of 121st District Court were made known earlier this week.

There were to have been two sessions of criminal court held, one on Monday and the second on Wednesday of next week. These have been done away with due to the fact that three of the four defendants to be tried have, through their attorneys, asked for continuances, and thereby will not be tried until the June session of court.

Those being granted the extra time are Donald Lawrence Roberts and Fred J. Shockley who are being tried for attempted burglary in the near break-in of Curry Edwards Pharmacy here last November. The other continuance was granted to T. M. Ward, who is, at present, in the Lubbock County Jail, who is the defendant in the charge of first degree murder in connection with the death of Tiny Hulms of Denver City.

The only other criminal case set to be heard here is

No. 308, State of Texas vs. Jimmy Burke who is charged with indecent exposure to child. Court has appointed Plains Attorney, Don Hancock as counsel for Burke.

The Burke case will be heard at the same time as the civil cases set for March 18, are to be heard. It will be a non-jury trial while the other cases are set for jury.

Jury panels have been selected but the names of jurors will not be available until next week for publication.

Civil cases set on the docket are as follows:

The following cases are set for trial at 10:00 o'clock A. M. Monday, March 18, 1963, in Plains, Texas. Announcements will be called for at 10:00 A. M. on March 18th; all motions exceptions, etc., will be heard at that time. The jury will report at 1:30 o'clock P. M. on said date.

The Court should be notified immediately of any case herein set, being settled, or for any reason why the same is not ready for trial by jury on March 18, 1963.

Commissioner Court

In two sessions of Court, Yoakum County Commissioners attended to a great deal of business.

On February 27, the court okayed the transfer of the sum of \$10,000 from the general fund to the hospital fund. In other business it was decided to pay Lowell Trout a total of \$277.75 for 505 posts.

The Court also officially went on record as opposing a legislative bill before the Texas House which would tend to limit the right of various governmental bodies to meet in executive session, and to also go on record as approving House Bill No. 536.

In the meeting held on March 4, four contracts that were requesting work to be done in compliance with the new operating procedure in the use of County Road Equipment.

Kinder and Bennett Construction Co. was paid \$38,538.90 after they submitted their estimate No. 4. This makes a total paid to date of \$115,901.10 and a balance still owing on the hospital annex construction in Denver City of \$184,279.90.

Revise Veteran Land Program

A letter has been received from Mr. Jerry Sadler, State Land Commissioner at Austin, Texas. He advises that there has been a drastic change in the Veteran's Land Program. The Board has committed all the funds presently available for purchasing land and is unable at the present time to process any new applications however applications can still be made and they will be held until new funds become available.

Until recently, it was possible for the Board to issue a number to a veteran and at the same time give him an immediate opportunity to purchase a tract of land without delay.

There is pending in the present session of the Texas Legislature a measure which if adopted, will give the people of Texas an early opportunity to decide whether to authorize the Veterans' Land Board to issue additional Bonds and there by obtain funds for purchasing more land. The veteran's name will be made a part of the permanent records of the permanent records of the Veteran's Land Board so that he

can participate in the Program at a future date in the event that additional funds become available.

Mr. Sadler states in his letter that he pledges the same rapid efficient service for the veterans of Texas just as soon as the Board issues additional bonds.

Veterans in the Plains area may contact the Veteran's County Service Officer in the new court house. Or if you will leave your name with Mrs. Chambliss in the Sheriff's office he will contact you as soon as he comes to Plains. When he is in Yoakum County, Mr. Gillis will be at the courthouse in Plains every Monday and Thursday.

LATE NOTICE

Word was received late today that the Blackwood Bros. Quartet of Nashville, Tennessee will be in the Lovington High School Auditorium on March 13 at 8 p. m. (MST).

Advance tickets are selling for \$1.25 and they will be priced at \$1.50 at the door.

For advance tickets and information on the program, Mr. Reese Graves of Lovington may be contacted.

Important Announcement

In order for faculty members to complete individual and committee work on Courses of Study the Plains schools will dismiss at 3 p. m. each day next week (March 11-15), it was announced today by Mr. G. D. Denny.

G. D. Kennedy, Superintendent of Plains Schools.

One For Judge Many Names For City Alderman

With the date, April 2, for the Plains City Election fast approaching, the names of 10 local citizens have been listed as candidates for the three alderman posts that are being vacated this year by E. O. Winkles, Buford Duff, and Joe Curry.

Duff and Curry, incumbents, are among the 10 whose names appear on the slate for this year.

Most of the names which appear on the slate this year were put on by someone other than the candidate himself.

Other names on the slate include Roy Edwards, Kenneth

Hale, D. N. Taylor, Tommy McDonnell, Ralph McClellan, Morris Lowe, Robert Young, and C. M. Thompson.

In the item of City Judge, which also is to be filled next month, and is being vacated by Judge Beane, the only one announcing is Mr. E. B. Teague.

How About A Livestock Golf Course? Association Meet Friday

Due to the great amount of interest which has been and is being expressed in the possible construction of a nine-hole golf course here, the following coupon is being run in The Record this week to find out, if possible, just how many would definitely be interested in such a possibility.

If you are interested in seeing the possibilities explored, fill in the coupon below and mail it to Box 1006, Plains, Texas. There is nothing, of course binding about your relationship to the golf course if you fill in the coupon, as this is being used only as a means of determining your interest.

Yes, I would like to see a golf course built in or near Plains, and I might possibly be interested in becoming a member of such a venture.

PHONE NO. _____
(Mail to Box 1006, Plains, Texas)

The 1963 membership meeting of the Yoakum County Livestock and Agriculture Improvement Association will be held Friday evening, March 8, at 8:00 p. m. in the District Court Room.

All members are urged to attend this meeting and the general public is invited. An election will be held to fill the vacancies on the board of directors. Directors who serve terms will expire are: G. W. Cleveland, Ty Fiebert, Johnnie Fitzgerald, Pat Henard, H. G. Sprawls and W. M. Taylor.

The movie film taken at the 11th Annual Junior Livestock Show will be shown. At

this meeting the chairman will ask for volunteers to make donations of animals and showmanship awards and gain contest awards for the 1964 show.

The Plains State Bank is making contributions to all 4-H and FFA members who exhibited animals in the show last month. Checks will be handed out at this meeting by a representative of the Bank.

Members who are not on the board of directors will be asked to make any suggestion or recommendation which they feel would stimulate interest in the 4-H and FFA livestock feeding program.

Refreshments will be served.

Two Fires Cause Heavy Damage Reports Say

Two different house fires, that have taken place near Plains within the past week, have accounted for a great amount of property loss and for at least one realtively serious injury.

On Wednesday of last week the old Box home place located southwest of Plains burned, completely destroying the house. However, some of the furniture was rescued before flames, whipped by high winds completely engulfed the house. The home belonged to and was being resided in by Mrs. Adell Box and her

son, Robert. In the second fire, on Monday of this week, the house which was being lived in by Mr. and Mrs. Manual DeLeon and their two children. The fire, caused from an undetermined source, completely destroyed the house and all the family's belongings.

The injury was to the DeLeon's eight months old son, who received rather severe burns on his face, neck and chest. Reports are, however, that most of the burns are of the first and second degree, and that the baby is recovering rapidly.

Good Jr. Hi Program

In what has been described by many as "the best junior high school athletic program that Plains has ever had," the junior high school boys are receiving at the capable hands of Mr. Bob Gross, some of the finest instruction in the basic fundamentals of various sports that can be found.

Gross has the responsibility of teaching boys in grades four through eight, all the savvy, and know-how he can give them before they enter high school and are confronted with some real rough competition.

This program is being carried out, with suggestions and help from the high school coaching staff, in an effort to get the most possible out of the planned athletics program.

In each of the applicable seasons, the basics and fundamentals of football, basketball, and track are covered.

Between seasons, in all the grades Gross instructs, such sports as tumbling, wrestling, trampoline, boxing and soccer are covered, to make for a completely well-rounded program.

A part of the program has included such things as the fifth and sixth graders playing short exhibition matches at half times of varsity and B squad games.

Gross graduated from high school at Pyote, Texas, in

1950 after which he served a hitch in the Air Force. After his discharge, he entered New Mexico A & M where he played freshman football. While there, however, he sustained a shoulder injury and was unable to pursue college football. After one year at Texas Western in El Paso, Cross transferred to Texas Tech in Lubbock where he finished his degree work and graduated in January 1962.

As for statistics in his first year of coaching, in the basketball season just ended, the eighth graders under Gross' coaching had a season of 16 wins and seven losses, and were barely beaten out of first place in the Seagraves Invitational Tournament. They had to play two overtimes, to decide the game and were beaten by only two points.

The seventh grade had as perfect a record as it is possible to have. They wound up the season with 16 wins and no losses.

Gross has stated about both these fine teams, that there is evident some fine potential in many of the boys, and that if they work hard, they will play some fine ball when they advance on in high school.

Track and field events are on the agenda now and Gross (See Page 4)

NEW LOCATION-----Macco Irrigation Sales & Service is now located right next door to Glover's Cleaners. They have moved to the new location so that a larger and more complete stock of your irrigation needs can be readily supplied to you. Complete well-drilling and pump service as well as sales are their business.

Phone Rates Hiked

Several changes are taking place in regards to telephone service in Plains as has been announced by Romain Telephone Co.

The new directories will be out and distributed around the first of April, and they will have a new designation where the prefix of Plains numbers is concerned. The prefix GL6 will be changed to 456.

Also the directory covers for this year will be personalized, using pictures from in and around Plains for the covers make-up.

Also, the following new rates will go into effect for local service as of April 1.

- Business one party--\$11.00
- Business two party--\$9.50
- Business Rural Multi-party--\$9.00
- Business extension--\$1.50
- Residence one party--\$6.00
- Residence two party--\$5.00
- Residence four party--\$4.50
- Residence Rural Multi-party \$7.00.
- Residence Extension--\$1.00

Saving Bond Sale Report

The Savings Bonds volunteers of Texas can be proud of the fine start made in sales of E and H Savings Bonds during January. Sales increased \$500,000 over January of 1962. This represents a 3.2% increase. January Bond sales for Texas were \$15,814,671.

Savings Bond sales in Yoakum county totaled \$4,350 according to Mr. D. P. Moorhead, Chairman of the county Savings Bonds Committee.

As a part of a nation-wide Freedom Bond Drive, every family in Texas is being asked to buy at least one U. S. Savings Bond, by June 30, 1963.

A housewarming for Mr. and Mrs. Russell Faulkenberry will be held in their new home on Friday night, March 8.

It has been announced that it is a come-and-go affair, and it is set to start at 7:30

work was about completed on the Tommy Holyfield place and E. H. Frith place both west of Denver City. W. C. Patman southwest of Plains and E. D. Apperson west of Denver City both were working on their systems.

New Great Plains contracts to help carry out a well rounded conservation plan on their farms were completed on the Robert Heath, W. O. Moore, Lomass Freeman, Paul Cobb Dick Hamm and D. H. Kirby places.

Maps were ordered to work out conservation plans on the T. J. Bearden, J. M. Deering, C. F. Payne, C. W. Payne and H. V. Stanford places. These will be new conservation plans with the local Soil Conservation District.

Maps were ordered and will be used in revising the conservation plans on the T. A. Elmore, Vance Brown, Rod Duff and W. M. Taylor farms.

Crop residue-use continues to show great value as a soil protector, a little extra fertilizer this spring will grow more residue to help protect our soil. Narrow rows reduce the amount of farming cost and the amount of soil loss.

Can you plant 20-28 or 30" rows by making a little adjustment in your farming equipment?

Now is the time to plan for a cover of residue on that sandy land to hold field.

There were seven dust storms in the last two months. The storms ranged in length from two to six hours. Due to the good job of crop residue management being done by land owners and operators, only about 1500 acres of land were damaged by blowing.

New conservation plans were mailed to the area office for typing on the Tom Lesh and Gene Maxwell, Thomas Freeman, Paul Cobb and Rod Duff plans this week. These are also Great Plains conservation program contracts.

W. C. Patman, D. H. Kirby and Claude Freeman received their approved conservation

STUBBLE MULCHING-----pays off. Without any doubt, the business of keeping the dirt on the ground this time of year become something of a problem in this part of the County. One of the best answers to this problem is being found by Yoakum farmers in the use of their previous year's crop residue as a soil holder and wind deterrent. The above field on the LeRoy McCravey farm west of Plains has been held very good by using crop residue and also by planting rye between rows on on turnrows.

plan and Great Plains contract this week.

Work on conservation programs was progressing on the E. H. Frith, W. C. Patman, Tommy Holyfield and Wilbur Hayse plans in the form of installing underground pipe to reorganize their irrigation system.

New interest in conservation work was shown this week in work with C. E. Ross two plans, C. R. Sellers place east of Denver City, Tommy Billings of Bronce and Johnny L. Grace of Denver City. Sellers and Grace both made application for assistance in the Great Plains program to carry out their conservation plan. Each week additional land owners

and operators enter into a program of soil and water conservation with their local soil conservation district and receive help from the soil conservation service.

The Yoakum County Young Farmers will hold their regular monthly meeting Monday night, March 11, at 7:30 in the High School cafeteria.

The main topic to be discussed will be "Fertilizers". We wish to invite everyone interested in this subject to be present at this meeting.

Refreshments will be served following the meeting.

Farmers Union Plan Meeting

Yoakum County Farmers will meet in regular session on Thursday, March 14, at 8 p. m.

The meeting is set to be held in the clubroom in the old Courthouse here and all members are urged to be present.

Mrs. Marion McGinty returned home this week after visiting friends and relatives for a few days.

Mrs. Nora McKee is now at home recovering, after a brief stay in the Seagraves Hospital, from a respiratory illness.

Interplanting In Skip-Rows

Interplanting of other crops in skip-row cotton operations could well prove to be another way to increase individual farm income. This fact is shown by an analysis of skip-row planting tests conducted in 1962 by the High Plains Research Foundation of Plainview Texas. Of eleven different skip-row systems tested, six involved interplanting of grain sorghums, soybeans and castor beans on skipped rows, and results generally show a higher gross income from these interplanted plots.

The tests were conducted in an effort to determine who best to take advantage of the Dept. of Agriculture's 1962 ruling which permitted farmers to count against acreage allotments only land actually devoted to cotton in any skiprow system. A similar policy has been announced for the year of 1963, but could be changed in any future year at the discretion of the Department. Prior to 1963, any system, which skipped less than four rows was considered to be solid cotton for acreage allotment and marketing quota purposes.

In eight of the eleven High Plains tests, both cotton and the interplanted crop showed yield increases over solid planting. Cotton production was increased in all of the tests, as was production of castorbeans. Soybeans showed an increase in all but two of the tests, while grain sorghum yield was improved in all except one. In each test, the skip-row system was followed until a maximum of one acre of cotton was planted. The remaining land in the three acre plots was planted solid to the interplanted crops or left fallow on those plots where interplanting was not utilized. Obviously such tests do not reflect returns on a total land use basis, but can be used in a general way for adaptation to an individual farm.

The two tests showing high-

est returns each involved interplanting, with no land left fallow. The greatest money yield was shown on a plot where two rows of cotton were interplanted with four rows of grain sorghum. In this test cotton produced 950 pounds per acre, which was an increase of 45, 9% over solid planted yield. The plot produced 5683 pounds

of grain sorghum for an increase of 6.7% over solid planting.

The second highest return came from a system using two rows of cotton interplanted with two rows of castorbeans. Cotton in this test yielded 716 pounds of lint, showing a 10% increase over solid planted plots, and castorbeans yielded 2481 pounds per acre, which was 76.7% greater than solid planting yield. It should be noted that insufficient water was available for solid planted castorbeans used for comparison, which should account for at least a part of the large increase shown.

Lowest gross return for any of the interplanted tests was received on a plot where four rows of cotton were interplanted with two rows of other crops. While the High Plains tests cover only one year, similar results have been obtained by other tests at Texas Agricultural Experiment Stations at Lubbock, and Big Spring and Spur. Farmers who wish to consider interplanting should contact any of these experiment stations or Plains Cotton Growers, Inc. of Lubbock for additional details.

Production and harvest costs were not taken into consideration in comparing the various systems in these tests. Costs, grain sorghum base, cotton allotment, irrigation water available, and diverted acreage payments are among the factors that must be considered in choosing the system best suited to a given farm.

NOW YOU CAN TAKE YOUR INCOME TAX REFUND IN U.S. SAVINGS BONDS

For the first time, you can take your income tax refund in Series E United States Savings Bonds. All you have to do is check a box on your 1962 tax return. This is an easy convenient way to hold on to money you have already saved. You won't get any cash which you'd be tempted to spend. Your refund comes as Bonds which will return you 4 dollars for every 3 at maturity. Tens of millions of Americans

build their financial strength through U.S. Savings Bonds. And their strength is the strength of the nation—so important in these crucial times to us and to free people everywhere. If you have a refund coming on your '62 tax, think it over before deciding how to take it. And when you decide to take it in Savings Bonds, see if you don't feel pretty good about it.

- Quick facts about U. S. Savings Bonds
- You get 3% interest to maturity
 - You get your money anytime
 - Your Bonds are replaced free if lost, destroyed, or stolen
 - You can save automatically on Payroll Savings

The 1962 Tax Return gives you a choice of taking your refund in cash or U.S. Savings Bonds. Full details are in the instruction form.

Keep freedom in your future with **U.S. SAVINGS BONDS**

U. N. 'Peace Force' Would Rule World

Agency Pushes Disarmament Scheme

Ban Possible In 10 Years

A U.S. government agency, now in operation, is promoting a plan to strip America and other nations of their defenses, and transfer all military power to the U.N. Peace Force.

It is called the U.S. Arms Control and Disarmament Agency. Its director is William C. Foster.

Its address is 2201 "C" NW, Washington 25, D.C.

It is financed by a minimum annual appropriation of \$10 million.

It was created by act of Congress in September, 1961, and signed into law as Public Law 87-297.

In its 16 months of operation this agency has supported and promoted the "U.S. Program for General and Complete Disarmament in a Peaceful World."

Under this program the United States could be disarmed in less than 10 years!

This goal is stated in a report by the U.S. disarmament agency, "Blueprint for the Peace Race".

"Disarmament would be accomplished in three stages — the first to be carried out in 3 years; the second, also in 3 years; and the third as promptly as possible within an agreed period of time. Stage I would be initiated by the United States, the Soviet Union, and other agreed states."

After describing the necessary steps in the first two stages of disarmament, the plan reaches its zenith in Stage III:

States would retain only those forces, non-nuclear armaments, and establishments required for the purpose of maintaining internal order; they would also support and provide agreed manpower for a U.N. Peace Force.

The U.N. Peace Force, equipped with agreed types and quantities of armaments, would be fully functioning.

The manufacture of armaments would be prohibited except for those of agreed types and quantities to be used by the U.N. Peace Force and those required to maintain internal order. All other armaments would be destroyed or converted to peaceful purposes.

Thus American bureaucrats and diplomats are working for disarmament and a permanent U.N. Peace Force in two areas:

First, in the executive department of the U.S. Government. The Director of the U.S. Arms Control and Disarmament Agency has the status of an assistant Secretary of State, but is responsible directly to the President as well as the Secretary. He has vast special powers and almost unlimited funds.

Second, in the United Nations and at the Geneva Disarmament Conference. Two days following passage by Congress of the disarmament agency act, President Kennedy laid before the General Assembly "The United States Program for General and Complete Disarmament in a Peaceful World." This plan became the basis for the Geneva negotiations. It is set forth in State Department Publication 7277—a booklet titled "Freedom From War."

Fears that the proposed "peace force" would come under Communist domination are not imaginary. The Soviet Union has always kept a firm hand on United Nations military affairs.

There are eight department, or "cabinet", positions in the United Nations. Most important is that of Assistant Secretary-General for Security Council Affairs. This office involves political and military activities.

Its holder is commander-in-chief of U.N. military forces.

An unofficial agreement was made by the Big Five members, including the United States, at the time the U.N. was first organized. A Russian was to have this all-important post. The deal was engineered by the cunning Andrei Vishinski, and agreed to by U.S. delegate Edward Stettinius. The idea seems to have been to keep the Bear happy "for the sake of world peace."

No time limit was set for this arrangement. But apparently the Soviet Union assumes it is permanent, because the Assistant Secretary-General for Security Council Affairs has always been a Russian.

(A discussion of this deal can be found in the book, "In the Cause of Peace," by the late Trygve Lie, first secretary-general of the U.N., The MacMillan Company, 1954, pp 45-46.)

Here is the roster of Assistant Secretaries-General for Security Council Affairs since the beginning:

1946-49—Arkady S. Sobolev, USSR.
1950-53—Konstantine Zinchenko, USSR.
1954-57—Ilya Tchernyshev, USSR.
1957-60—A. Dobrynin, USSR.
1960-62—George P. Arkadev, USSR.
1962—Eugeny D. Kiselev, USSR.

It is naive to the point of childishness to believe that the Soviet Union would agree to disarm itself unless it were certain it could control the international force.

Nikita Khrushchev, himself, has told us as much. Our great weakness is refusing to believe the Communists when they tell us what they are going to do. Said Khrushchev:

"Even if all the countries of the world adopted a decision which did not accord with the interests of the Soviet Union and threatened its security, the Soviet Union would not recognize such a decision, but would uphold its rights, relying on force..."

How did it all begin — and when and where? Let's go back. Actually, we suppose, the world planners talked about it at the Dumbarton Oaks meetings which preceded the organization of the United Nations. The internationalists who would set up a world parliament, world court, world army, and world money, have been around a long time.

Alger Hiss was at Dumbarton Oaks, and took part in organizing the U.N. He was a member of the U.S. delegation when the deal giving the Russians permanent hold on the Security Council secretaryship was made.

The State Department then launched a campaign to create an image of the United States, not as a powerful bulwark of freedom in the world, but as a seeker of a negotiated and compromised peace.

The Office of United Nations Affairs was set up in

THE UNITED STATES PROGRAM FOR GENERAL AND COMPLETE DISARMAMENT IN A PEACEFUL WORLD

U.S. Blueprint

Above is cover of Department of State Publication No. 7277 detailing the American plan for stripping nations of arms and setting up a U.N. Peace Force to police the world. The booklet was first distributed at the U.N. two days after Congress passed the bill setting up a U.S. Arms Control and Disarmament Agency. At the right is a reproduction of a random page—Page 9 — describing steps to be taken in second and third stages of disarmament.

So the People May Know

The State Department in 1946. The old League of Nations Association was renamed the American Association for the United Nations, and given a new lease on life. In 1955, Harold Stassen was appointed as a sort of Secretary of Peace to go about shining up our image as a peace-seeker. Then came the "open skies" inspection program proposed by President Eisenhower at Geneva.

Thus we strained to create the image of a hation ready to go to almost any lengths to mollify the Russian bear.

But the seed for the current program, "for general and complete disarmament in a peaceful world," was planted early in 1961 when President Kennedy asked John J. McCloy, his adviser on disarmament matters, to conduct "an extensive study of the governmental effort and organization necessary to give effect to our national purpose in this field."

McCloy, incidentally, is a high ranking member of the Council on Foreign Relations and is credited with unofficial chairmanship of the executive committee of that shadowy, policy-making group known as The Establishment.

In a long letter, which the President transmitted to Congress along with the draft of recommended legislation, McCloy outlined in detail the sort of agency that was eventually set up.

The McCloy plan for an arms control and disarmament agency was introduced in separate bills in both Senate and House. Senate Bill 2180 provided that the agency be placed in the State Department under an assistant secretary, and authorized blanket appropriations to cover necessary expenditures.

House Bill 9118 provided that the agency be set up independently in the Executive Department, with a director responsible to the President. It also called for a definite appropriation of \$10 million.

The Senate passed its bill Sept. 8, 1961, and the House passed its own measure 11 days later.

The issues were compromised by a conference committee, and the conference report was adopted by both houses Sept. 23. It was signed into Public Law 87-297 on Sept. 26.

The "short title" of the law is "Arms Control and Disarmament Act." The House insisted on writing this safeguard into the bill:

"... That no action shall be taken under this or any other law that will obligate the United States to disarm or to reduce or to limit the armed forces or armaments of the United States, except pursuant to the treaty making power of the President under the Constitution or unless authorized by further affirmative legislation by the Congress of the United States."

Some constitutional lawyers hold that the phrase, "pursuant to the treaty-making power of the President under the Constitution," can be interpreted to mean that the matter is removed from the area of further Congressional action. The U.N. Charter is a treaty and has already been ratified.

Broadly viewed, however, what validity there is in this safeguard can be useful only to the extent the people are alert to the danger and exert the power of public opinion on the administration through their elected representatives in Congress. A Congress that could pass the arms control and disarmament act overwhelmingly could also pass a law shifting our dependence from our own armed forces to a U.N. peace force — unless the people should rise against it.

The new law set up the disarmament agency in the State Department, but provided that the director report to both the President and the Secretary of State. It retained the \$10 million appropriation, and stipulated that transfer of funds to the director by other government agencies for the purposes of the act might be made for expenditure "without limitation" in certain areas of activity.

William C. Foster, director of the agency, is a 64-year-old corporation executive, who has served the

- Further development of methods for the peaceful settlement of disputes under the United Nations;
- Establishment of a permanent international peace force within the United Nations;
- Depending on the findings of an Experts Commission, a halt in the production of chemical, bacteriological, and radiological weapons and a reduction of existing stocks or their conversion to peaceful uses;
- On the basis of the findings of an Experts Commission, a reduction of stocks of nuclear weapons;
- The dismantling or the conversion to peaceful uses of certain military bases and facilities wherever located; and
- The strengthening and enlargement of the International Disarmament Organization to enable it to verify the steps taken in Stage II and to determine the transition to Stage III.

THIRD STAGE

During the third stage of the program, the states of the world, building on the experience and confidence gained in successfully implementing the measures of the first two stages, would take final steps toward the goal of a world in which:

- States would retain only those forces, non-nuclear armaments, and establishments required for the purpose of maintaining internal order; they would also support and provide agreed manpower for a U.N. Peace Force.

Legion Probers Find Jokers

The Chas. M. DeBremont Post No. 28 of the American Legion, Roswell, N.M., last year created a Committee to Examine the Arms Control and Disarmament Act — Public Law 87-297. Its chairman is James P. Risley, Lt. Gen. USMC (Ret).

The committee was set up at the time the United States made its disarmament proposals at Geneva, based on the State Department plan as submitted to the United Nations by President Kennedy and outlined in State Department publication No. 7277—"Freedom From War." Its report states:

"The objectives of the Geneva proposals, to which the U.S.S.R. must subscribe to put this law into effect, is not disarmament but rather the arming of the United Nations and the disarming of the member nations. From the Communist point of view, this is of supreme importance. They know their superiority in political warfare, just as they are fully aware of their irremedial inferiority in military strength and capacity. Therefore, the Communists are interested in seeing the United States disarm, as much as possible, as soon as possible, and as unilaterally as possible. We have gone a long way to accommodate them.

"Actually, under the provisions of the law, we could be disarmed completely before the U.S.S.R. had a single reduction in unit strength, according to State Department publication No. 7277."

The Roswell Legion Post committee analyzes the act setting up the U.S. Arms Control and Disarmament Agency this way:

'Deal' Bared By Lie

A deal, which has resulted in only Russians being appointed to the vital post of Assistant Secretary - General for Security Council Affairs in the United Nations, was discussed by the late Trygve Lie, first Secretary-General, in his book, "In the Cause of Peace."

The arrangement was agreed to at a 1946 meeting in London of the Big Five. The Russian who obtained the concession was wily old Andrei Vishinski. The American delegate who agreed to it was the late Edward Stettinius.

It is known that Alger Hiss was a member of the U.S. delegation at the time. It isn't clear whether he took part in the deal, although it has been suggested that he may have argued for it.

Apparently it was a loose sort of deal, with no time element mentioned. However, the Russians, as always, proceeded on the premise that it was a permanent right; and so it has been. Lie thought it was for five years. There is no record that it has been challenged. As a result, six successive Assistant Secretaries-General for Security Council Affairs have been Russians.

This is one of the most important posts in the U.N. Secretary-General Lie calls it "the premier assistant secretaryship." It has to do with political and military matters, and the secretary reports directly to the Security Council. He is, in effect, commander-in-chief of U.N. military forces.

Obviously this was another of those American moves to keep the Russians happy "for the sake of peace." It was cut from the same pattern as the decision not to spell out western rights of access to Berlin in the Potsdam Agreement. "We mustn't hurt their feelings," was the explanation.

Here is the passage from Secretary-General Lie's book, "In the Cause of Peace," (The Macmillan Company, 1954, pp 45-46), in which the deal is discussed:

THE CHOICE of the Assistant Secretaries-General, who would constitute my "cabinet," was, of course, my first concern. It soon appeared that it was equally the concern of some of the great, and a number of the lesser, powers.

Mr. Vishinsky did not delay his approach. He was the first to inform me of an understanding which the Big Five had reached in London on the appointment of a Soviet national as Assistant Secretary-General for Political and Security Council Affairs. Mr. Vishinsky simply spoke of an "agreement" — he said nothing of its binding quality or of the right of the Big Five to arrive at it, or of the length of time it was meant to apply. Now, by the terms of the Charter, the Secretary-General has full authority in the disposition of the Assistant Secretary-Generals, with respect both to their nationality and to their personality. The authority, in fact, was the point of a hard-won decision at San Francisco which rejected an attempt to prescribe that there should be four Deputy Secretaries-General, appointed by the General Assembly upon the recommendation of the Security Council in the same manner as the Secretary - General. Strictly speaking, therefore, the Big Five had no right to arrive at any understanding regarding the distribution of the offices of Assistant Secretary-General which was binding upon the Secretary-General.

THIS IS NOT to say, however, that it would have been politic of me to resist the great-power accord. Moreover, I welcomed

Section 35 — Gives the President the power to "assure cooperation." The law is worded so broadly, it may be interpreted to "assure" your and my cooperation. The President is also given the power to "resolve" differences of opinion between the Disarmament Agency Director and the heads of other government agencies. This interplay of the Director and the President, forcing, legally, all other agencies and officials to bow to their decisions runs riot throughout the law.

Section 41 (c)—The Director may pre-empt the services of officers or employees of ANY OTHER agency, including the Army. For this, he must have the agreement of the Secretary of Defense, but Section 35 allows the President to "assure cooperation" of the heads of the other agencies. Could the Director utilize the Army to "maintain peace and security" of the American People if they object to continued disarmament? (Section 31-k) It appears so!

Section 41 (h)—The Director may exercise LEGISLATIVE powers! The Director has unlimited "rule-making" power which has the effect, in practice, of setting him up as a one-man legislature!

Section 41 (g)—The Director can delegate ANY AUTHORITY he has by this law (and he has virtually unlimited authority) TO ANY OTHER OFFICERS OF THE AGENCY!

Section 43—The President can EXEMPT the Director FROM THE PROVISIONS OF LAW relating to the letting of contracts or expenditures of GOVERNMENT FUNDS!

Section 45—The last sentence of this section shows that the Director can require the Atomic Energy Commission and NASA to share our atomic secrets and space secrets with anyone connected with the Agency. He can employ ANYONE, (security risk or not). The Director establishes his own security and loyalty requirements, notwithstanding the results of FBI investigations. Indeed, the FBI may not be asked to investigate the employee if the Director so desires!

Section 46—The last sentence of this section shows that the Director may require any contractor's FINANCIAL RECORDS BE DESTROYED BEFORE THE GENERAL ACCOUNTING OFFICE HAS AUDITED THEM. This flagrant denial of the taxpayer's right to know where his money is going MUST NOT BE ALLOWED TO HAPPEN. Greed and Corruption on an unheard-of scale can be legal if there is opposition, then Sec. 35 applies.

Section 49—This provision provides for an initial appropriation of ten million dollars. It is our understanding that Congress actually appropriated many millions more, but even this is "petty cash" when you consider that the Agency can UTILIZE FUNDS of virtually any other government agency WITHOUT REIMBURSEMENT! Who could possibly know just how much the Agency might actually be spending at any given time? (If cooperation is lacking, see Sec. 35 & Sec. 48.)

The understanding as a sign of good will and confidence between East and West. That the Soviet Union wanted one of its nationals to fulfill the premier Assistant Secretaryship could be taken as another indication of serious Soviet interest in the United Nations, and that the United States was willing to agree to accord this key post to a national of the U.S.S.R. was evidence of an American desire to encourage world peace.

MR. STETTINIUS confirmed to me that he had agreed with the Soviet Delegation in the matter. My understanding of the arrangement, accordingly, was that it was meant to apply for the five years.

ECONOMICS

Q. Why is the present federal tax system held responsible for blocking a faster rate of economic growth?

A. Because the rates of income tax which take up to 91% from individuals and as much as 52% from corporations impede the steady flow of capital vital to economic progress.

Q. Just how do they do that?

A. Capital has but one source—the savings of individuals and businesses. If the rates of tax make it impossible to retain enough of their respective incomes they will be unable to enter into investments they otherwise would make.

Q. Does the inability to invest more of those in the, say, middle to top income brackets have any effect on the number of jobs?

A. Very definitely. Since it costs \$22,000—on the average—to provide a single job in industry the heavy demand for capital is ob-

vious. Thus, when the tax system slows the flow of investment funds needed for research, new products, new plants and equipment it puts roadblocks in the path of economic growth; adversely affects the well-being of all Americans.

Q. Do the present rates of tax have other ill effects?

A. Yes. Among other things they stifle incentive by denying just rewards for success as the harder people work and the more they earn the bigger the share that must be paid in taxes.

mates prospects are looking pretty good in some quarters.

The Junior High boys will travel to Sundown later this season to take part in the district competition.

Also, the possibility of a grade school track meet here this year is in the offing.

3♥	pass	4♦	pass
4NT	pass	5♥	pass
5NT	pass	6♥	pass
7NT	pass	pass	pass

Opening lead: Queen of diamonds.

The opening lead was taken on board with the ace. South then ran the spades, sluffing four hearts. South then led the king of diamonds from the board and sluffed the jack of hearts. This left South holding the ace and king of hearts and the three top clubs, and the contract was made easily.

COMMENT: Since the spades were evenly divided, this hand was actually a "lay-down." South was justified in the bidding since she knew she needed only a break in hearts or spades.

Tsa Mo Ga Announce Meeting

Tsa Mo Ga club will hold its regular meeting March 11, at the Clubhouse with Mrs. Jack Hayes acting as program director. This program will feature a review of the life and some poems of Robert Frost. Robert Frost was a Pulitzer prize winner four times, and is one of America's most distinguished poets. This review of Robert Frost and his poems will be done by Mrs. Glenn Cleveland.

Mrs. George Cleveland will also read "Now Is The Time For All Good Men", and Mrs. Dorman Scott will sing. She will be accompanied on the piano by Mrs. Eugene Payne.

Hostesses for this meeting will be Mrs. Raymond Bookout, and Mrs. I. P. Robertson.

Tsa Mo Ga club met Feb. 25th, at the Clubhouse, and heard a program on the economics of the home. They also viewed slides of model rooms, and contemporary celanese fabrics. Mrs. Tom Warren showed the slides on Home Decorations and did a commentary of the film she showed.

Mrs. Garland Swann was program director and gave several definitions of Home. To some it was a place where our emotional and physical wants were supplied. To some it was a place where we await our turn for the family car. Mrs. Swann introduced Mrs. Raymond Bookout, who talked on "Your Teen-age Daughter.... Are You Pre-

paring Her To Be A Home Maker?" Mrs. Bookout stated there were seven changes a teen-age girl must be prepared to make and meet. They were Physical changes, emotional, occupational, domestic, household duties, intellectual, and religious changes and problems.

Mrs. Robert Chambliss spoke on "Managing The Family Income". She said, Getting and Spending is as the poet Wordsworth said, "Too much with us", but like it or not, money is here to stay; and managing money is one of life's greatest problems. Over emphasis on money is harmful to the individual and to society as a whole. Yet, everyone needs to learn how to "get and spend wisely. Mrs. Chambliss said, the family should take invoice of itself the first of every year and make plans on how to be richer a year from then.

Mrs. Swann gave several reasons a man gave for a woman buying something. They were: It comes from an exclusive store in a far away place, the neighbor can't afford it, Nobody has it, Every one has it, and just because. Mrs. Swann also read a poem on Home by an anonymous author which listed the ingredients for making a good

home. Mrs. Kenneth Hale and Mrs. Robert Chambliss served pie and coffee during the social hour to sixteen members.

HUMBLE TIPS

We go to all extremes to give you the best service in town.

W.G. Lattimore

Thanks To Each Of You:

TO THE BUYERS-----

Without the buyers who take the time to come to our show each year and give support to our young people in their efforts, the show, the sale, nor the program would be impossible.

TO THE PRIZE AWARDERS-----

Thanks for your concern and your realization of the importance of our 4-H and FFA programs.

TO ASSOCIATION MEMBERS-----

Both old and new members of the Association for your support of the fine program and the fine job our young people are doing.

S. B. No. 102
By D. Roy Harrington
Dist. 4, Port Arthur

A BILL TO BE ENTITLED an act relating to the adjustment and settlement of industrial controversies; creating a State Mediation Service within the Bureau of Labor Statistics providing severability; declaring emergency.

PROponents of this legislation say the creation of a state labor-management mediation service would be good for management, good for labor, and most important of all, good for the public.

All three of these elements have a stake in the fair settlement of many labor-management controversies. A good mediation service could avert many potential breakdowns in labor-management negotiations—and shorten many costly long work stoppages or lockouts by providing a knowledgeable, but neutral, third party to the negotiations.

Experiences of the federal mediation service is proof of the good effect of such negotiations by a government agency. Here the state is given an opportunity to exercise its responsibilities in the labor-management arena—by acting as a neutral third party in quarrels which effect the public interest, instead of leaving such settlements to the federal mediation service or to pure chance.

It takes two to quarrel, and often an above-the-quarrel third party can help end arguments to the mutual satisfaction of both antagonists.

Creation of a state labor-management service would bring order to a long-neglected area of public business.

Therefore this legislation should be voted FOR.

OPponents of this measure say it seeks to do something which is not necessary. First there are very few controversies in the Texas labor-management field, and jurisdiction for those which do exist has been preempted by the National Labor Relations Board.

The very few problems which could exist outside this forum's jurisdiction already have adequate and speedy remedies in the State Courts, and the Courts have been recognized by Congress as appropriate forums for such matters.

Secondly, this bill seeks to build the Bureau of Labor Statistics in to something it was never intended to be. No satisfactory mediation service can operate when it is controlled by a single faction in disputes. The Commissioner of the Bureau of Labor Statistics is required by law to be a member of organized labor therefore he would undeniably be prejudiced in the consideration of any matter in which organized labor constituted one of the parties to a dispute.

Thirdly, the language "voluntary adjustment" continues throughout the legislation—creating the impression that this "service" would be available only as an aid to parties who wanted it.

Hales Golden Wedding Told

Mr. and Mrs. Tom Hale were honored on Sunday, March 3, 1963 with a Golden Anniversary celebration at the Fellowship Hall, First Methodist Church, Baswell, Oklahoma.

The table was covered with a white lace cloth and a center piece of yellow roses was used on the table. Also featured on the serving table were pictures of the couple when they first married, a recent picture of them and pictures of their children.

The three tiered white cake trimmed with gold and orange sherbert punch were served to approximately 100 friends and relatives. Serving the punch and cake were grandchildren of the couple, Mrs. Jimmy Key of Snyder, Texas, Miss Judy Stubbs, Clovis, N.M., Miss Pegge Barrick, of Colidge, Arizona, and Tommy Hale, of Lamesa, Texas.

Attending the register were grand-daughters of the couple, Miss Debby Hale, Lamesa, Tex. Miss Beth Ann Hale, Karen Hale, Plains, Texas.

In the receiving line with the couple were their children; Jesse, Kenneth, and Jerry Hale, of Plains, Texas, Charles Hale, of Oklahoma City, Okla. A. J. Hale, Lamesa, Texas, Donald Hale, Ft. Hood, Texas, Mrs. Joe Barrick, Colidge, Ariz.

Mrs. O. W. Stubbs, Clovis, New Mexico.

Set Drying & Storage Conference

Everything from cattle feeding to air conditioning will be discussed at the 9th Annual Grain Drying and Storage Conference, set for March 15 and 16, in the student Union Building at Texas Tech. The portion of the program dealing with cattle feeding is new this year and was added to help answer questions of the grain dealers as the livestock feeding industry develops on the South Plains. Speakers on this phase will be: Dr. Robert Schoeff, Formula Feed Specialist of Kansas State Extension Service who will be discussing the Mill and its Technical Services, Tom Simmons, Lubbock cattle feeder and elevator operator, will explain feedlot layout, investments, and materials.

Cattle turn-over, source of supply, types and qualities will be reviewed by Dr. Ralph Durham, Head of the Animal Husbandry Dept., Texas Tech and Dr. John McNeely, Agriculture Economics Dept., Texas A&M, will round out this morning session with a summary of the marketing of cattle in Texas.

Two panel discussions in the afternoon will fill the agenda for the first day. The first panel will be entitled, "Elevator Maintenance and Good Housekeeping" and it will cover such subjects as inspection and repair schedules on motors, belts, augers, bearings, legs, controls, scales, and other equipment. Maintenance records on equipment will also be aired. Price Hob-

good of the Agriculture Engineering Dept. at Texas A&M will lead the discussion with M.D. McKinney of the Garvey Elevators, Henry Flenner of Uhlmann Elevators, and John Odom of Millers Mutual Fire Insurance Co. assisting.

The second panel will have as its subject, "Quality Control" A close look will be given to grain storage, inspections, fumigations, blending procedures, use of aeration and protein level identification. Bill Allen of the Texas Agricultural Extension Service will lead the discussion and he will be joined by Bill Simons, Producers, Grain Corp. Dr. Don Ashdown, Texas Tech; Ray Anthis, Lubbock Grain Exchange; and David C. Weaver, Weaver Grain Company.

B.A. Burquest of the Frontier Chemical Co. will open the second day by reviewing a research paper on "The Distribution of Gas in Grain Masses." Following will be a panel discussion on the "Use of Conditioned Air for Maintaining Quality of Stored Grain."

(This ad prepared by Texas Tech Journalism Department)

"With the deadline for obtaining inspection stickers drawing near, only twenty-one percent of the vehicles in Yoakum County have been inspected," Captain Alan Johnson, Motor Vehicle Inspector Supervisor of the Texas Department of Public Safety, said this week.

Unless the number of inspections is increased appreciably soon, long waiting lines will be forming at inspection stations when the April 15th deadline approaches. "The authorized inspection stations are ready and capable of handling the inspection of Texas registered vehicles without delay, if owners will not wait until just a few days before the deadline," Johnson said.

"Any driver operating a vehicle registered in Texas, that is required to be inspected on public roads after April 15 will be operating in violation of the law," he said.

LEGAL NOTICE

Notice of Public Hearing by Texas Water Pollution Control Board to Consider the Matter of Discharge of Oil and Gas Field Wastes in Yoakum County, Texas

Notice is hereby given that the Texas Water Pollution Control Board will conduct a public hearing commencing at 1:30 o'clock p. m. on Wednesday March 20, 1963, in the offices of the Board at 1100 West 49th Street, Austin, Texas, to consider whether and to what extent surface discharges of oil and gas field wastes produced in Yoakum County, Tex. should be controlled or prohibited to prevent and control pollution of waters in the State. The Board will enter such rules and regulations and orders to prevent and control pollution as in its judgment the evidence may justify.

Interested parties may appear at the hearing for the purpose of presenting evidence to the Board relative to said matter. The hearing will be continued from time to time from place to place, if necessary, until a determination has been made relative to said matter as the Board may deem right, equitable and proper.

Issued this 28th day of January, 1963.
D.F. Smallhorst, Executive Secretary, Texas Water Pollution Control Board

LEGAL NOTICE

All interested persons are advised that the improvement of FM 769 in the town of Bronco is being planned by the Texas Highway Commission. Preliminary plans showing the proposed work are on file at the office of Carl R. Hart, Sr. Resident Engineer, Texas Highway Department, Brownfield, Texas. Any interested citizen may request that a public hearing be held concerning such proposed work and the economic effect of such improvement by delivering a written request to the Resident Engineer on or before March 12, 1963.

In the event such a request is received, a public hearing will be scheduled and adequate notice will be given as to its time and place.

Work for Peace

"Blessed are the peacemakers: for they shall be called the children of God." St. Matthew 5:9

IT is ironic that the Monroe Doctrine, which warned America's enemies to keep their distance, was jointly declared with announcement of a pact between the United States and Great Britain for complete disarmament of the boundary line separating Canada and our country.

That was in 1818. After all these years there remains a frontier of 3500 miles, along which there is not a single fort, great wall or barricade.

This is the type of peacemakers of which Jesus preached in His Sermon on the Mount.

Each of us can be a peacemaker. Each day we can work for that which is right; support that which is good; pray for peace.

Pray at the church of your choice this Sunday.

Rev. ROBERT H. HARPER
FINE FIGURE OF SPEECH

THE harp has always seemed a superb instrument, both for its appearance and the music it may produce under a skilled hand. My admiration for it goes back to days in college when in a lyceum course we had a reader who was supported by a harpist. And song and story have been woven about the harp. For in-

JUST A THOUGHT:

We cannot expect a life without some sorrow and unhappiness, yet we can always improve our lot by holding to the realization that trouble and discomfort are temporary and that tomorrow can be a bright and cheerful day.

stance "The Harp that Once through Tara's Hall the Soul of Music Shed," which I heard John McCormack sing in Portland, Oregon. But I submit that one of the

most beautiful figures of speech is to be found in Locksley Hall. It is as follows:

Love took up the harp of life and smote on all the chords with might,
Smote the chord of self that, trembling, passed in music out of sight.

There is a wondrous harmony and sympathy between identical tones of different instruments. Once while a college mate tuned his violin, I felt an answering string of the same note tremble under my finger, on my guitar.

As swiftly as the wings of the humming bird pass out of sight so do the swiftly-vibrating strings of the harp pass in music out of sight. When love reigns in the heart, selfishness has no place.

THANK YOU

Mrs. Adell Box and Robert and the Hayden, Tom, and Lee Roy Box families wish to say "Thankyou" and to express their appreciation for the Plains Volunteer Fire Department for helping put out the fire last Wednesday night amid a high wind that nearly destroyed the home. Because of their promptness and efficiency, much of the household things were saved. The home belonged to Mrs. Adell Box and Robert.

We also wish to say "Thank you" to the unknown person who called in the alarm. We do appreciate it.

We also appreciate the help from our neighbors and kindness in such a time of loss.

A big "Thanks" to each and everyone.

SALE SALE

REMEMBER We will have many items on SPECIAL SALE, every DAY throughout 1963.....

NOT JUST A FEW DAYS SET ASIDE TO cause extra trips hurry, and ulcers; BUT JUST ANY DAY; AND ITEMS YOU need, not just some junk that you won't ever need and will throw away.

DID YOU KNOW!!! that many of the sale promotions of today are just cheap merchandise especially made for that promotion.

"We PLEDGE to give you HIGHEST possible QUALITY for the LOWEST POSSIBLE PRICE.

Cogburn - Young

HARDWARE* FURNITURE* APPLIANCES
"where your \$\$\$ have more \$\$\$"

ITEM: Rural families should be interested in the fact engineers of the U.S. Department of Agriculture and State Land Grant Universities have developed plans for a new, easy-to-build fruit and storage cellar that will also serve as a fallout shelter. The office of civil defense says the structure—reinforced concrete, covered by 3 feet of earth—offers excellent fallout radiation protection.

ITEM: Meat tenderness in beef has been related mainly to aging and the amount of connective tissue and marbling across the meat. But the basic reasons why some beef is tough and some tender have not yet been determined. For the next three years, Oregon State University scientists, under a \$60,000 grant from the U.S. Department of Health, Education and Welfare, will investigate changes in mineral makeup in meat that appears to be linked to basis protein structure. Tender roasts and chops may one day be guaranteed!

ITEM: An electric iron gives best service when its sole plate is clean. Wipe the sole plate with a damp cloth after each use. Another suggestion is to rub it once a month with a good grade of paraffin or beeswax, and wipe off on paper or cloth.

ITEM: Bath and shower walls can now have the same durable beauty as kitchen counter tops. It's possible with attractive panels of decorative plastic laminates. The panels come in ten colors and patterns, have core of moisture-resistant polystyrene foam.
