OUR 34th YEAR

Combined With The Yoakum County Review March 1, 1961

THURSDAY, AUGUST 6, 1964

NUMBER 32

## Count Rodeo Big Success

### Tell Total Take \$4275.30

The 11th Annual edition of the Plains Rodeo and Old Settlers Reunion which was held here last weekend, was counted as a high success by the three clubs which jointly make up the Yoakum County Rodeo Association. They are Plains Chamber of Commerce, Plains Lions Club, and Yoakum County Roping Club.

It had not yet been fully tabulated, exactly what the concession stand netted, but it was determined by estimating that figure, that the total take for the entire Rodeo, not counting the cowboy dance each evening, profits from which are kept in their entirety by the Roping Club, totaled \$4,275.30.

Figures were broken down in that a total of \$1,642.00 was the figure totaled by the three queen contestants in the Queen's Ticket sales.

Paid attendance amounted to \$615 for Thursday, \$398 for Friday and for the rodeo and the barbecue combined, the total take for Saturday was \$1210.30. These add to a total of \$2,223.30 in gate receipts for the entire rodeo.

The concession stand was estimated to have taken in about \$400.

Miss Pam Parrott was named 1964 Rodeo Queen. It was stated that Pam sold a total of 840 out of the 1,642 sold. She is the daughter of Mr. and Mrs. E. B. "Tex" Parrott of Plains. Runner-up was Miss Pam Long, daughter of Mr. and Mrs. Robert Long and Miss Dianna Marchman was in third place. She is the daughter of Mr. and Mrs. L. A. Marchman.

The trophy saddle, drawing for which was held Saturday evening at the final performance of the rodeo, was won by Mr. C. F. Spencer of Plains.

Winners in the parade, held Thursday afternoon at 5 p. m. were: first place, Tsa Mo Ga; second place Plains Chapter of FHA; third place Cochran County Riding Club; and an honorable mention was given to the float entered by Viva's Beauty Shop.

Two electric razors were given in the beard-growing contest, one for the ugliest, and one for the most handsome beard. Ugliest title and one razor went to Bob Alberding and most handsome and the second razor was awarded to John Dale Curtis.

SHE MOWED HIM DOWN---This year's rodeo clown is shown in a dead faint after he had planted a congratulatory kiss on Miss Pam Parrott just as she was awarded the crown as this year's Plains Rodeo Queen.

WINNERS---in the beard-growing contest in connection with last week's rodeo here were awarded electric razors. Above Mr. Bob Alberding was winner in "Ugliest Beard" category and below Mr. John Dale Curtis was winner with "Most Handsome Beard."

## Kids And Kayus Round Up August 14 And 15

The 1964 Kids and Kayuses and girls under ten years of children and adults and the 4-H Round-Up will be held on Friday and Saturday nights, August 14 and 15, in Plains Rodeo Arena. Performances will begin each evening at 8 p. m. and all are invited to come out each evening and watch the 4-H Club members as they participate in the various races on horseback.

4-H members and adult leaders planned a much shorter show for this year because of the large number of contestants. By Wednesday of this week, the County Agents office had received entries from ten senior boys, ten junior boys, three senior girls, and eight junior girls.

Pole bending and ring spearing will be events for all the contestants. There will be a barrel race for junior and for senior girls, and a flag race for junior and senior boys. Some senior members will participate in an exhibition, rescue race, and there will be a goat sacking for the boys.

## CHEERLEADERS PLAN CAR WASH

It was announced today by the Plains Cheerleaders that a car wash will be held at Chap's Gulf Service this Friday.

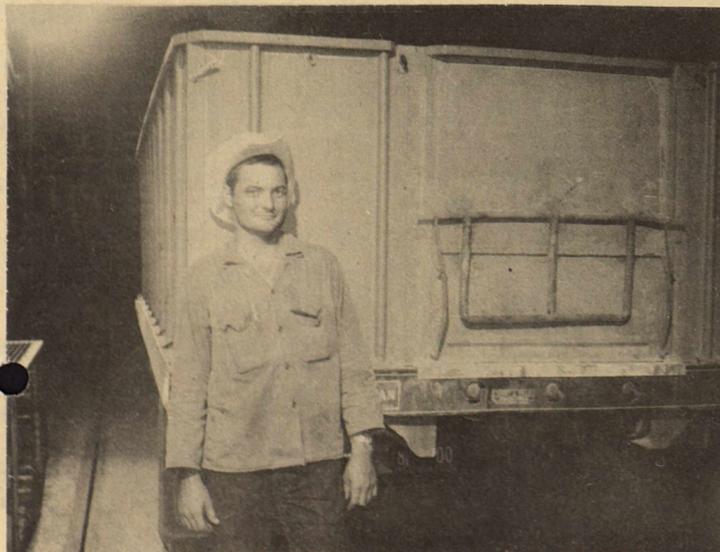

The car wash will begin at 7 a. m. and continue until there are no more cars to wash. It was also explained that the car wash will continue until noon Saturday if the cars keep coming. The girls had more cars than time at the last wash. Therefore more time will be

spent this time.

The money made will be used to carry the girls to SMU Cheerleading School the third week in August and to furnish uniforms.

The fee for the wash is \$1.75. The cheerleaders stated, "We will really appreciate the help and cooperation of the local people."

Cheerleaders helping with the car wash are Jerri Clem, Brenda Hickman, Pam Parrott and Nancy Tippett.

FIRST LOAD OF MILO---was brought in Wednesday night at about 8:30 p. m. It is reportedly the earliest grain harvested in this area, anywhere around the Plains vicinity. It was brought in the Plains Chemical Co., here, an elevator owned out of Lovington, and managed locally by Mr. Clyde Waldrop. The grain was raised by Mr. Richard Meil, who stated, it was reported, that the yield seemed to be pretty good.

## Move Toward Area Water District Told

It was learned today that a definite step forward was made last week in a meeting in Seminole of the Gaines County Water Association, toward the formation of an area Water District.

It was announced at the same time that a temporary order had been issued by the state water commission to halt salt water pollution of irrigation wells in Gaines County. Such an order has been the goal of the county water association since it was organized several years ago.

This is something of the same nature as the stop-order which was issued about one year ago by the Texas Water Pollution Control Board prohibiting the disposing of brine water wastes in open, unlined pits in Yoakum County.

It was pointed out at the Gaines meeting that oil companies will contest the stop order on pollution of fresh water wells at a hearing of the state water commission in September. Validity of the stop order and the right of the commission to issue it will be questioned at the hearing, according to Bob Ellis, one of the Gaines County Association's directors.

Ed Reed, hydrologist, and George McCleskey, attorney

for the group, as they also were for the Yoakum County Water Conservation Association, were present at the meeting, which, it was reported, was attended by 105 people, many of them from Yoakum, Terry and Dawson counties.

Ellis stated that tentative boundaries for an area water district have been set up covering most of Gaines, Yo-

akum, Terry and Dawson counties.

It was further reported that the Gaines county group voted overwhelmingly to request an election to create the water district, if and when the boundaries are approved by the state water commission. It was felt that such an election could possibly be held as early as the general election this November.

## New Names Go On Honor Roll

As the work is very rapidly coming to its conclusion on the new Scout Hut-Lions Den, the finance committee for the project is really getting into high gear trying to gather up as much money as they possibly can to pay for the new building.

Outside construction of the new structure has been finished and carpenters are at present working on the inside of the building putting up the paneling and the partitions to divide the building into four patrol rooms, one office, two

rest rooms, a kitchen, a store room, and a large meeting area for both the Lions and the various scouting units of Plains, including, Cubs, Boy Scouts, Explorers, and Girl Scouts.

The building, it is expected will be finished within the next very few weeks, and will probably be ready for occupancy at about the beginning of school.

Several additions are being made to the Honor Roll of (SEE PAGE 2)

## Proposed CONSTITUTIONAL AMENDMENT NUMBER THREE ON THE BALLOT

### PROPOSED CONSTITUTIONAL AMENDMENT TO BE VOTED ON AT AN ELECTION TO BE HELD ON NOVEMBER 3, 1964.

SENATE JOINT RESOLUTION NO. 10 proposing an Amendment to Section 51a of Article III of the Constitution of the State of Texas by adding a new Subsection to be known as 51a-2; giving the Legislature the power to provide, under such limitations and restrictions as may be deemed by the Legislature expedient, for direct or vendor payments for medical care on behalf of individuals sixty-five (65) years of age or over who are not recipients of Old Age Assistance and who are unable to pay for needed medical services; providing for the acceptance of financial aid from the Government of the United States for such medical payments; providing that the amounts paid out of state funds shall never exceed the amount that is matchable out of Federal funds for such purposes; providing that certain means relating to the correction or remedying of abnormalities of vision shall be included within such medical care service or assistance; providing for the necessary election, form of ballot, proclamation, and publication.

### BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS:

Section 1. That Section 51a of Article III of the Constitution of the State of Texas be amended by adding thereto a new Subsection to be known as Subsection 51a-2, which shall read as follows:

"Subsection 51a-2. The Legislature shall have the power to provide by General Laws and to make payment for same, under such limitations and restrictions as may be deemed by the Legislature expedient, for direct or vendor payments for medical care on behalf of needy individuals sixty-five (65) years of age or over who are not recipients of Old Age Assistance, and who are unable to pay for

needed medical services. The payments for such medical assistance on behalf of such needy individuals shall be in such amounts as provided by the Legislature; provided, however, that the amounts paid out of state funds for such purposes shall never exceed the amount that is matchable out of Federal funds for such purposes; provided further, however, that such medical care, services or assistance shall also include the employment of objective or subjective means, without the use of drugs, for the purpose of ascertaining and measuring the powers of vision of the human eye, and fitting lenses or prisms to correct or remedy any defect or abnormal condition of vision.

"The Legislature shall have the authority to accept from the Government of the United States, such financial aid in the form of medical assistance on behalf of the needy individuals sixty-five (65) years of age or over who are not recipients of Old Age Assistance, and who are unable to pay for needed medical services, as such Government may offer not inconsistent with restrictions herein set forth."

Section 2. The foregoing Constitutional Amendment shall be submitted to a vote of the qualified electors of this state at the General Election to be held on the first Tuesday after the first Monday in November, 1964, at which election all ballots shall have printed thereon the following:

"FOR the Amendment to the Constitution giving the Legislature the power to authorize vendor payments for medical care on behalf of needy individuals sixty-five (65) years of age and over who are not recipients of Old Age Assistance, and who are unable to pay for needed medical services; providing for the acceptance of funds from the Federal Government for the purpose of paying such medical assistance; and, providing that the amounts paid out of state funds for such purposes shall never exceed the amount that is matchable out of Federal funds; provided further, however, that such medical care, services or assistance shall also include the employment of objective or subjective means, without the use of drugs, for the purpose of ascertaining and measuring the powers of vision of the human eye, and fitting lenses or prisms to correct or remedy any defect or abnormal condition of vision."

viding that the amounts paid out of state funds for such purposes shall never exceed the amount that is matchable out of Federal funds; provided further, however, that such medical care, services or assistance shall also include the employment of objective or subjective means, without the use of drugs, for the purpose of ascertaining and measuring the powers of vision of the human eye, and fitting lenses or prisms to correct or remedy any defect or abnormal condition of vision.

"AGAINST the Amendment to the Constitution giving the Legislature the power to authorize vendor payments for medical care on behalf of needy individuals sixty-five (65) years of age and over who are not recipients of Old Age Assistance, and who are unable to pay for needed medical services; providing for the acceptance of funds from the Federal Government for the purpose of paying such medical assistance; and, providing that the amounts paid out of state funds for such purposes shall never exceed the amount that is matchable out of Federal funds; provided further, however, that such medical care, services or assistance shall also include the employment of objective or subjective means, without the use of drugs, for the purpose of ascertaining and measuring the powers of vision of the human eye, and fitting lenses or prisms to correct or remedy any defect or abnormal condition of vision."

Section 3. The Governor of the State of Texas is hereby directed to issue the necessary proclamation for said election and have the same published and held as required by the Constitution and the laws of the State of Texas.

## CHURCH SETS BIBLE SCHOOL

First Christian Church of Plains announced this week that they are holding their annual vacation Bible School beginning next Monday. The sessions will begin at 3 p. m. each afternoon and are set to last until 5:30. The school is scheduled to last from Monday through Friday next week, and all area youngsters are invited to attend.

Parade Magazine that 27 new plants were announced in Texas in May. Map used to illustrate the new industry points out quite prominently the fact that while the Dallas-Fort Worth area gained 12 of these new plants, seven were located in Panhandle towns and six others were in other small towns.

Commission announced Patrick J. Ryan of the Land Chamber of Commerce and Edwin R. Lange of Greater Mars Industries have been approved for the first year class at the Industrial Development Institute in Norman, Okla.

Veterans' commission State Auditor C. H. Cavness reports that the Veterans' Affairs Commission helped Texas Veterans and their dependents survivors obtain \$93,591,000 benefits during the year which ended Aug. 31, 1963.

Commissioners are John E. Kelsey of Electra; Justin M. Morrow, Rotan; J. Walter Jan Somerville; Joe F. Ramsey of Houston; and Charles C. Fox Longview.

that many Brooks County producers want to organize a program but the King Ranch which has 3,991 of the 16,000 head of cattle on county tax rolls does not approval of the owners of 75 percent of the cattle in a county necessary so the proponents want to organize a program in just soil conservation district which covers all of the county except King Ranch property.

Commission said it lacked sufficient information for a decision at this time.

Animal Health head change due Texas Animal Health Commission will decide on July 27 on a new commission director to replace Dr. R. G. Garrett of Taylor who plans to resign.

Decision will be made at meeting to be hosted by Chairman Ed Knolle of Sandia at his Knoll Jersey Farm in Jim Wells County. Knolle said there have been several "well-qualified" applicants for the post, but declined to list them. However, it has been rumored that a staff veterinarian with the commission, Dr. S. B. Walker, will be favored.

West Texas school West Texas cities that want to be home to a new West Texas School for the mentally retarded will have to wait until at least Sept. 14 to learn which will be chosen.

Chairman of the Board of State Hospitals and Special Schools' site selections committee, C. E. Bentley of Abilene, said his committee will report to the board on that date. However, Bentley did not say that the committee will make a definite recommendation on a single site at the time.

Industrial development Texas Industrial Commission is boasting in the July issue of Texas

## 214 CONSTRUCTION TO BEGIN

The Texas Highway Department has announced the beginning date for a construction project on State Highway 214 in Yoakum County. The project extends from Plains South to the Gaines County Line. The construction consists of a complete rebuilding of the present facility. The Texas Highway Department and the Contractor, Mr. J. O. Boswell of Lubbock, stated that the construction will begin on or about August 6, 1964. The Contractor stated that he plans to begin work at the North edge of Denver City and progress toward Plains, with the work in Denver City to be done

near the end of the project. Mr. Carl R. Hart, Senior, Resident Engineer of the Texas Highway Department at Brownfield will be in charge of the construction inspection. Mr. Hart explained that the roadway would be open to traffic, and that the inconvenience to the travelling public will be held to a minimum. Since heavy trucks and machinery will be working during the construction, extreme caution should be exercised at all times by those traveling through the projects. Cooperation of the public is requested in obeying all traffic signals, warnings signs and speed limits.

It's smart to be on the lookout for danger signs to your health. That's why it's a good idea to have a periodical checkup for you and your family. Often your doctor may detect trouble early enough by reading the "danger signs" to save you from serious illness. When your doctor prescribes medicine have him phone prescriptions here and we'll have them ready for you to pick up when you pass by.

THE DRUGSTORE WHERE YOUR BUSINESS IS APPRECIATED.

ORDINANCE NUMBER 46

AN ORDINANCE GOVERNING THE USE OF AND MANNER OF MAKING CONNECTION TO THE SANITARY SEWER AND WATER SYSTEMS OF THE CITY OF PLAINS, TEXAS; GOVERNING THE INSTALLATION OF PLUMBING WORK TO BE DONE BY LICENSED PLUMBERS...

of One Dollar (\$1.00) shall be charged and such fees shall be deposited to the general fund of the City. Permits to make connection with the sewer system shall be issued only when the plumbing in the house or building to be connected is in accordance with the rules for plumbing herein...

The Plumbing Inspector will designate the position of the "Y" branch in the streets or alleys, as shown by the records in the City Hall. All connections made with the sanitary sewers or drains and all plumbing connected therewith shall be made under the direction of the Plumbing Inspector...

Section 5. PLAN OF PLUMBING. Before a permit will be issued for doing plumbing work in a building, or before any additions are made excepting necessary repairs, a description of the work to be done signed by a licensed plumber on blanks furnished for the purpose shall be filed in the office of the Plumbing Inspector...

All work done under such descriptions shall be subject to the inspection of the Plumbing Inspector, and no alterations shall be made in any work without a permit in writing from the City.

Section 6. Bad faith or unreasonable delay in the performance of plumbing work shall be deemed a sufficient reason for subjecting the plumber so offending to a suspension of the permit, and every plumber shall be held responsible for the violation of these regulations and of laborers and helpers employed by him.

Section 7. INSPECTION. The Plumbing Inspector shall be given notice when any work must be left uncovered and convenient for examination until inspected and approved. Such inspection shall be made within twenty-four hours after such notification. The plumber shall apply either the water or smoke test, in the presence of the City Plumbing Inspector and the plumber shall remove and repair any defective material or labor when so ordered by the Plumbing Inspector.

Section 8. RIGHT OF ENTRY. The Plumbing Inspector or his assistant shall have the right and privilege to enter any building within reasonable hours, in the City of Plains, Texas, for the purpose of making inspections of the plumbing, drainage or ventilation system constructed or under construction in such building. Each and every system of plumbing, drainage or ventilation shall be inspected and approved by the Plumbing Inspector or his assistant, before said building in which work is being done or has been done shall be occupied.

Section 9. STATEMENT OF WORK DONE. The plumber shall on the completion of the work file in the office of the Plumbing Inspector a correct statement of the work done under the permit.

Section 10. CESS POOLS AND OVERFLOWS. No open gutter, cess pool or privy vault shall be connected with any sewer or drain.

Section 11. No person, firms or corporations shall injure, break, or remove any section of any manhole, lamp hole, flush tank, catch basin, or any part of the sewer system, or throw or deposit or cause to be thrown or deposited in any sewer openings or receptacle connecting with the sewer system, any garbage, offal, dead animals, vegetables, paring, ashes, cinders, rags, or other matter of thing whatsoever, except faeces, urine and the necessary waste toilet paper, liquid house and mill slops.

Section 12. Any person, firm or corporation desiring to lay pipes for water, gas, steam or any purpose in any street or alley upon which sewers are laid, shall give at least twenty-four hours notice to the Plumbing Inspector before opening the street or alley and the manner of excavating for the laying and backfilling over such pipe shall be subject to the approval of the Plumbing Inspector.

Section 13. OBSTRUCTIONS. The City acting through the Plumbing Inspector or other authorized officers, shall have the power to stop and prevent from discharging into the sewer system and private sewer or drain through which substances are discharged which are liable to injure the sewers or obstruct the flow of the sewerage, or interfere with the operation of the disposal plant.

Section 14. CONNECTIONS OF OLD DRAINS. Before any old private drains shall be connected with the sewer system the owner of the private drain shall prove to the satisfaction of the Plumbing Inspector that it is clean and conforms in every

respect with these rules and regulations.

Section 15. The house sewer trench shall be dug so as to meet the public sewer at the position of the "Y" branch, if there be one, so located by the City Inspector. The material thrown from the trench shall be placed so as not to obstruct and so as to cause the least inconvenience to the public. Proper barriers and lights must be maintained on the banks of the trench which shall be dug so as to avoid accidents during the progress of the work. In back filling the earth shall be carefully rammed or flooded so as to keep the pipe in proper position and avoid settling and no stone shall be used in filling until there has been a depth of two feet of fine earth placed over the pipe.

Section 16. MATERIAL FOR SEWERS AND DRAINS. The house sewers from a point two feet outside the house to the street or alley sewers, shall be of first quality salt glazed, vitrified earthen pipe, not less than four inches in diameter, unless laid less than six inches deep, when it shall be of cast iron not less than four inches in diameter. Each house must have independent drain to sewer unless more than one house is located on a single lot and a permit is granted by the Inspector of Plumbing.

Section 17. PIPE LAYING. The covering of the "Y" branch of the sewer shall be carefully removed, so as not to injure the socket. The first length of pipe attached shall be curved so as to give a good fall into the sewer. The pipe shall be laid on an even grade of not less than one-tenth (1/10) of an inch to the foot unless by special permission of the Plumbing Inspector, in which case provisions may be made for regular and efficient flushing.

Curved pipe shall be used for every deflection from a straight line of more than six inches in two feet.

The joints of earthenware pipe shall be made with portland cement of first quality, the joints of iron pipe shall be of oakum and lead if cast iron is used, or white lead if screwed joints are used.

The end of all private sewers not immediately connected with the plumbing fixtures shall be securely closed by water tight impervious material. If lead pipe, the end must be soldered, if cast iron pipe a cast iron plug must be calked with lead.

No connection for basement drain or cellar shall be allowed until owner of the building has executed and signed a written release to the City of Plains, Texas releasing it from all damage that may result from said basement or cellar flooded by the stoppage of sewers, which release and agreement shall be filed with the City Secretary and when such connection is allowed it shall be done by means directly with any drain pipe carrying foul sewage, or with sewer or cess pool unless properly tapped to prevent back gases.

Section 22. JOINTS. All joints in iron drain pipes, soil pipes and waste pipes, except where screw joints are used, must be filled with oakum and lead and hand calked so as to make them gas tight.

All connections of lead pipes with iron pipes must be with a brass or lead sleeve or ferrule of the same size as the lead pipe, put in the hub or the branch of the iron pipe and calked with lead. The lead pipe must be attached to the ferrule by a wiped joint.

Section 23. INSPECTION. Before fixtures are placed in connection with the plumbing of any house or building and before the soil pipe is connected with the sewer, the outlet of the soil pipe and openings into it below the top shall be hermetically sealed; the pipe shall be filled with water to its top and every joint be carefully examined for leaks. Defective pipes discovered must be replaced with sound ones and all defective joints made tight and every part of the work made to conform to these rules and regulations, and subject to the approval of the inspector.

In cases where plumbing work has been completed in a building before these rules and regulations came in force, if the plumbing has been done in accordance with these rules and regulations, permits will be granted for making connections with the sewer as in new work but in case such plumbing work does not meet with these requirements alterations shall be made as the plumbing inspector may direct to make the plumbing safe to the persons in the house, and such as to be no source of injury or stoppage to the sewer.

Section 19. House Drains within and to a distance of two feet outside of the exterior wall of the building shall be standard weight cast iron soil pipe, except in buildings two or more stories in which case all soil pipe shall be extra heavy cast iron up to the water level of the highest fixture after which same may be standard weight soil pipe, extending up through roof, said pipe to be calked with oakum and molten lead, and to have a uniform fall of not less than one quarter inch per foot.

All fittings used in connection with such pipes shall correspond with it in weight and quality. Where lead pipe is used to connect fixtures with vertical vent pipes, it must not be lighter than "light pipe".

The arrangement of soil and waste pipes must be as direct as possible, the drain, soil and waste pipes and trap should be practicable, be exposed to view at all times ready for inspection and for convenience or repairing

When necessarily placed with in partitions or within recess of walls, soil and waste pipe should be covered with wood-work so fastened with screws as to be easily removed.

Section 20. All stacks or vertical pipes must be tied or anchored at every other floor by means of cast iron floor rests. When they run parallel or against the wall they shall be supported by clamps of 1/8 x 1 inch iron horizontal runs of waste or vent lines must be supported with permanent hangers, placed at intervals not less than five feet for cast iron pipes and ten feet for wrought iron pipes. Lead pipes must be supported the entire length with a bridge of sufficient thickness to prevent sagging. Pipe hanger made of wood or sheet iron, or that do not meet the requirements of this ordinance and the approval of the Plumbing Inspector, will be rejected.

Section 21. MAIN SOIL AND WASTE PIPES. A main waste pipe into which wash basins, bath tubs or kitchen sinks discharge must be of soil pipe at least two inches in diameter with one and one-half inch branches.

The main line from the sewer connections to the house tap must be at least four inches in interior diameter at every point. No trap or any manner of obstruction to the free flow of air through the whole course of the house sewer will be allowed, when the closer sets more than four feet from the main stack or two of the closets are on the same stack, on different floors, this shall be secured by an untrapped main house sewer and soil pipe by a ventilating pipe leading to the roof from the lower side of the trap and a fresh air inlet connecting the floor of the floor of the main soil pipe just above the trap. Every vertical soil and waste pipe must be extended at least ten inches above the roof or coping. It must be of an undiminished size without return bend. It must not open near a window or an air shaft which ventilates living rooms.

Soil, waste and vent pipes in an extension must be extended above the roof of the main buildings, when otherwise they would open within sixteen feet of the windows of the main house or adjoining houses.

Section 22. JOINTS. All joints in iron drain pipes, soil pipes and waste pipes, except where screw joints are used, must be filled with oakum and lead and hand calked so as to make them gas tight.

All connections of lead pipes with iron pipes must be with a brass or lead sleeve or ferrule of the same size as the lead pipe, put in the hub or the branch of the iron pipe and calked with lead. The lead pipe must be attached to the ferrule by a wiped joint.

All connections of lead, waste and vent pipes shall be made by means of wiped joints, all fixtures to be lead stubbed for waste.

Section 23. INSPECTION. Before fixtures are placed in connection with the plumbing of any house or building and before the soil pipe is connected with the sewer, the outlet of the soil pipe and openings into it below the top shall be hermetically sealed; the pipe shall be filled with water to its top and every joint be carefully examined for leaks. Defective pipes discovered must be replaced with sound ones and all defective joints made tight and every part of the work made to conform to these rules and regulations, and subject to the approval of the inspector.

In cases where plumbing work has been completed in a building before these rules and regulations came in force, if the plumbing has been done in accordance with these rules and regulations, permits will be granted for making connections with the sewer as in new work but in case such plumbing work does not meet with these requirements alterations shall be made as the plumbing inspector may direct to make the plumbing safe to the persons in the house, and such as to be no source of injury or stoppage to the sewer.

Section 19. House Drains within and to a distance of two feet outside of the exterior wall of the building shall be standard weight cast iron soil pipe, except in buildings two or more stories in which case all soil pipe shall be extra heavy cast iron up to the water level of the highest fixture after which same may be standard weight soil pipe, extending up through roof, said pipe to be calked with oakum and molten lead, and to have a uniform fall of not less than one quarter inch per foot.

All fittings used in connection with such pipes shall correspond with it in weight and quality. Where lead pipe is used to connect fixtures with vertical vent pipes, it must not be lighter than "light pipe".

The arrangement of soil and waste pipes must be as direct as possible, the drain, soil and waste pipes and trap should be practicable, be exposed to view at all times ready for inspection and for convenience or repairing

the main trap. All shower compartments, except those built directly on the earth, or those having cast iron enameled receptors, shall have a lead shower pan not less than four (4) pounds per square foot, well protected with asphaltum paint and tar paper, and said pan shall be turned up on all sides at least two inches above finished floor level. All shower traps shall have not less than two (2) inch trap seal and be so constructed that the lead pan may be securely fastened to the trap at the seepage entrance making a water-tight joint where pan and trap are connected together.

Fixtures with earthenware traps connected directly with soil or waste pipe shall have a cast brass floor plate weighing not less than sixteen (16) ounces soldered to the lead bend.

All sinks in packing houses, butcher shops, lard rendering establishments, hotels, restaurants, boarding houses and laundries, shall be provided with suitable cast iron, brick, or vitrified grease trap, not less than twenty-four (24) inches from the place above named; the size, kind and number of which will be required according to the circumstances of the case, before any waste from any such sinks or receptacles of waste containing grease shall be discharged into the house (rain or sewer). When placed above the floor or ground, they shall be of cast iron, brass or six (6) pound lead, size of which shall be at least twelve (12) inches by twelve (12) inches, or larger as necessary. When placed in ground they shall be of any approved material and constructed according to specifications furnished by the City Engineer or Plumbing Inspector.

For ordinary dwellings or residences, these traps are not compulsory. When there are no grease traps, the waste must be connected with a pipe not less than two (2) inches in diameter for horizontal runs or vertical runs over eight (8) feet in length with a clean out plug in all horizontal changes of direction placed in an accessible location.

Public garages washing automobiles and motor trucks, shall install proper catch basins or sand traps constructed of any approved material, made water tight and the discharge of same shall be taken off in a manner that will provide a water seal of not less than twenty-four (24) inches. Such trap shall be protected against syphonage or back pressure, by proper venting made continuous when possible, and accessible cleanouts for discharge line shall be provided.

Section 25. A portable water supply distributing system shall not be connected to or with any water-closet tank flush valve, combination or other faucet, or any other plumbing fixture or receptacle for waste or surplus water, which is connected directly or indirectly with any sewer, soil or waste of a plumbing system except (1) by discharging over and not less than 3/4 inch above the level at which the fixture would overflow on the floor unless the supply pipe thereto be provided with a complete air break of the full area of the supply pipe and located at least 6 inches above the highest water containing part of the fixture. (2) Provided that in lieu of a full area inlet there may be a combination of check and air inlet so disposed and arranged in location and size that the air inlet shall be sufficient to supply full relief for any leakage that might occur past a defectively sealed check should the washer or other means of sealing be installed which will provide a cross connection between a distributing system of water for drinking and domestic purposes and a drainage system soil, or waste pipe so as to permit or make possible the back flow of sewage or waste into the water supply system. No pipe or fittings that have been used for other purposes shall be used for distributing water.

Section 26. VENT TRAPS. Traps must be protected from syphonage, or the waste leading from them ventilated by a special air pipe taken out of the crown of the trap, in no case less than four inches in diameter for the water closet traps, and one inch and a quarter or other traps, except when more than fifteen feet in length, the pipe shall not be less than one and one-half inches in diameter. All floor traps must be dry vented. All sinks shall have cleanouts accessible from the outside. The vertical vent pipes for traps of water closets in buildings more than four stories in height must be at least three (3) inches in diameter, with two (2) inch branches to each trap and for traps of other fixtures not less than two (2) inches in diameter.

Section 27. Batteries of water closets or urinals in toilets rooms on same floor three to twenty in number may be installed by system of loop venting by extending the horizontal line of soil pipe up and return full size to main vent

stack at a point one foot above highest fixture or continue separate through roof full size, thus forming a circuit vent system. When more than ten closets are urinals in a battery are vented in this manner, there will be an additional connecting line between waste and vent full size in center of such battery for the purpose of relieving air pockets.

Section 28. Where two water closets are located on the same floor and discharge into double "Y", "TY" are sanitary cross, and they are three feet or less from the stack said water closet will be considered the same as top fixture and it will not be necessary to back vent either water closet. No trap or vent pipe shall be used as waste or soil pipe. No brick, sheet metal, earthenware or chimney flue shall be used as sewer ventilator, nor to ventilate any trap, drain, soil or waste pipes.

Section 29. OVERFLOWS FROM FIXTURES. Water closets must be of the approved pattern, in all cases the tank must discharge into the open air of the basin of the closet, and not into the soil pipe directly. A direct service water closet is prohibited. All interior water closet compartments shall be ventilated into air shafts where possible. All outside water closets must be vented and trapped with running "P" trap.

Section 30. All vent pipes passing through roof shall be flashed with two and one-half pound sheet lead.

Section 31. STRAINERS. Exit pipes to all fixtures except closets shall be furnished with suitable permanently attached strainers.

No steam exhausts, blow-off or drain pipes shall be connected with house drains, soil drains or vent pipes within any building, but shall discharge into an open tank or condenser, from which a safe connection to the sewer outside the building may be made.

Waste pipes from refrigerators or other receptacles shall not be connected direct with the drain pipe system, but can be run into open sink or basin, from which place drain pipes must be trapped.

Section 32. All charges shall be payable monthly on the first day of each month at the office of the City of Plains at the City Hall. Any person, persons firm, or corporation who shall fail to pay the sewer charges on or before the 10th day of the month the same is due, shall be subject to have his sewer discontinued from the City system, and if discontinued no connections will be made there after with the City sewer system until such party shall have paid all amounts due, and all costs of disconnecting and reconnecting with said system.

Section 33. INSPECTION FEES. All plumbers doing work under this ordinance shall pay inspection fees as follows:

(a) For inspection of any one single fixture issued under one permit, five dollars (\$5).

(b) Where there is more than one fixture, the inspection fee shall be twenty - five cents, (25¢) for each additional fixture roughed in.

(c) Where Plumbing Inspector is required to go to the same job more than once for the same inspection, he shall charge an extra fee of One Dollar and Fifty Cents (\$1.50) for each and every inspection thereafter, if construction is contrary to this ordinance, the work is defective, the wrong address is given or the work is not ready for inspection.

All fees shall be paid to the City Secretary and by him paid into the General Fund of the City.

Section 34. It shall be the duty of the Plumbing Inspector when granting permits for connection with the sewer system to issue with said permits a copy of these rules and regulations in printed form, and it shall be the duty of the plumber making said connections to deliver said rules and regulations to the party having the work done for his guidance and instructions in the use of sewer and maintenance of the public health.

Section 35. Every owner of a building or part thereof occupied by people for any purpose, any part of the day or night, situated on any city block in the City, where a public sewer is laid and maintained within 150 feet of such building, or any building on acreage tracts where buildings are within 150 feet of a public sewer and having no water closet or privy connected with said sewer, shall, within thirty days after the enactment and legal publication of this ordinance, put up within said building or part of building used as aforesaid or upon the premises where the same is situated, a water closet or closet and have same connected with the sewer. The work done in connection therewith, and all material used, shall comply strictly with the requirements of this ordinance. In all cases where a privy or water closet is now or may hereafter be connected with the public sewer, the owner controlling the same or his

agent shall cause such privy or closets to be supplied with water for flushing, which shall be delivered from a tank. Said tank shall hold not less

than four (4) gallons of water at each flushing and to refill with water at a pressure of not less than fifteen pounds to the square inch. The water shall shall be conducted from the tank to the bowl of the privy or closet through a circular metallic pipe not less than one and one-fourth inches in diameter.

Section 36. It shall be unlawful for the owner or occupant of any building or premises within this City to use, or anyone else to use, any privy or water closet on such premises that is connected with the sewer system of the City, unless the same shall be

used in connection with sufficient water flowing into the sewer to keep the pipes connecting such privies or water closets with the sewers free from obstruction.

Section 37. It shall be unlawful for the owner of any building where people reside or are regularly employed within reach of the sewer system as provided by this ordinance, to fail to have at least one water closet connected with the City sewer system; except, where two adjoining buildings are owned and operated by the same person, require but one connection.

Section 38. If, on account of the distance from the sewer system, any owner is not required to connect with the sewer system as provided in this ordinance, then privies shall be made to conform with City ordinances now in effect or that hereafter may be enacted governing sanitation and outdoor privies.

Section 39. It shall be unlawful for any person to throw or allow to be thrown or deposited upon the surface of the ground where such premises or within the distance herein prescribed to be connected with the sewer, any water which has been used for domestic or manufacturing purposes or any liquid or solid filth, faeces or urine, after the said thirty day period following the enactment and legal publication of this ordinance.

Section 40. It shall be unlawful for any person or persons to make or have made any connection with the sanitary sewer of the City of Plains Texas, that will permit any surface or drain water from the ground or roof of houses or the overflowing of cisterns or cess pools to enter said sewers directly or indirectly; provided, however, that the drainage of cellars may be connected with said systems when made in accordance with the regulations herein and by plans and specifications of the Plumbing Inspector and under his direct supervision.

Section 41. Every person, firm or corporation who shall omit or refuse to comply with or who violates any of the provisions of this ordinance and upon conviction thereof shall be fined in any sum not more than \$100.00 for each offense.

Section 42. All ordinances or parts of ordinances in conflict herewith are hereby repealed and declared of no further force and effect.

Passed and approved this 20th day of July A. D. 1964. /s/ J. D. Brown J. D. BROWN Mayor

(Seal) Robert Long /s/ City Secretary

PUBLIC NOTICE

Proposed CONSTITUTIONAL AMENDMENT NUMBER TWO ON THE BALLOT

PROPOSED CONSTITUTIONAL AMENDMENT TO BE VOTED ON AT AN ELECTION TO BE HELD ON NOVEMBER 3, 1964. HOUSE JOINT RESOLUTION NO. 8 proposing an amendment to Section 59 of Article XVI of the Constitution of the State of Texas establishing certain requirements relative to the enactment of laws affecting particular conservation and reclamation districts; providing for an election and the issuance of a proclamation therefor.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS:

Section 1. That Section 59 of Article XVI of the Constitution of the State of Texas be amended by adding thereto a new subsection which reads as follows:

"(d) No law creating a conservation and reclamation district shall be passed unless notice of the intention to introduce such a bill setting forth the general substance of the contemplated law shall have been published at least thirty (30) days and not more than ninety (90) days prior to the introduction thereof in a newspaper or newspapers having general circulation in the county or counties in which said district or any part thereof is or will be located and by delivering a copy of such notice and such bill to the Governor who shall submit such notice and bill to the Texas Water Commission, or its successor, which shall file its recommendation as to such bill with the Governor, Lieutenant Governor and Speaker

of the House of Representatives within thirty (30) days from date notice was received by the Texas Water Commission. Such notice and copy of bill shall also be given of the introduction of any bill amending a law creating or governing a particular conservation and reclamation district if such bill (1) adds additional land to the district, (2) alters the taxing authority of the district, (3) alters the authority of the district with respect to the issuance of bonds, or (4) alters the qualifications or terms of office of the members of the governing body of the district."

Section 2. The foregoing Constitutional Amendment shall be submitted to a vote of the qualified electors of this State at an election to be held on the first Tuesday after the first Monday in November, 1964, at which election all ballots shall have printed thereon the following:

"FOR the Constitutional Amendment establishing certain requirements relative to the enactment of laws affecting particular conservation and reclamation districts."

"AGAINST the Constitutional Amendment establishing certain requirements relative to the enactment of laws affecting particular conservation and reclamation districts."

Section 3. The Governor of Texas shall issue the necessary proclamation for the election and this Amendment shall be published in the manner and for the length of time as required by the Constitution and laws of this State.

Section 4. The Governor of Texas shall issue the necessary proclamation for the election and this Amendment shall be published in the manner and for the length of time as required by the Constitution and laws of this State.

Section 5. The Governor of Texas shall issue the necessary proclamation for the election and this Amendment shall be published in the manner and for the length of time as required by the Constitution and laws of this State.

Section 6. The Governor of Texas shall issue the necessary proclamation for the election and this Amendment shall be published in the manner and for the length of time as required by the Constitution and laws of this State.

Section 7. The Governor of Texas shall issue the necessary proclamation for the election and this Amendment shall be published in the manner and for the length of time as required by the Constitution and laws of this State.

Section 8. The Governor of Texas shall issue the necessary proclamation for the election and this Amendment shall be published in the manner and for the length of time as required by the Constitution and laws of this State.

Section 9. The Governor of Texas shall issue the necessary proclamation for the election and this Amendment shall be published in the manner and for the length of time as required by the Constitution and laws of this State.

Section 10. The Governor of Texas shall issue the necessary proclamation for the election and this Amendment shall be published in the manner and for the length of time as required by the Constitution and laws of this State.

Section 11. The Governor of Texas shall issue the necessary proclamation for the election and this Amendment shall be published in the manner and for the length of time as required by the Constitution and laws of this State.

of the House of Representatives within thirty (30) days from date notice was received by the Texas Water Commission. Such notice and copy of bill shall also be given of the introduction of any bill amending a law creating or governing a particular conservation and reclamation district if such bill (1) adds additional land to the district, (2) alters the taxing authority of the district, (3) alters the authority of the district with respect to the issuance of bonds, or (4) alters the qualifications or terms of office of the members of the governing body of the district."

Section 2. The foregoing Constitutional Amendment shall be submitted to a vote of the qualified electors of this State at an election to be held on the first Tuesday after the first Monday in November, 1964, at which election all ballots shall have printed thereon the following:

"FOR the Constitutional Amendment establishing certain requirements relative to the enactment of laws affecting particular conservation and reclamation districts."

"AGAINST the Constitutional Amendment establishing certain requirements relative to the enactment of laws affecting particular conservation and reclamation districts."

Section 3. The Governor of Texas shall issue the necessary proclamation for the election and this Amendment shall be published in the manner and for the length of time as required by the Constitution and laws of this State.

June Accident Report Told

The Highway Patrol investigated one rural traffic accident in Yoakum County during the month of June, according to Sergeant A. E. Roberts, Patrol Supervisor of this area.

This wreck accounted for one person injured, and an estimated property damage of \$1,500.00.

The rural traffic accident summary in Yoakum County for the first six months of 1964 shows a total of 12 crashes resulting in one person killed and 11 persons injured, and an estimated property damage of \$16,175.00.

As of July 3, there had been a total of 1,060 fatal

crashes in Texas taking the lives of 1,288 persons," the Sergeant stated. This is 174 more traffic deaths than for the same period of 1963. If traffic deaths continue at the present rate, 1964 will become the most deadly year in Texas history for traffic fatalities, not only exceeding the 1963 all time high of 2,729 deaths but going over the 3,000 fatality mark.

The veteran Patrol Supervisor stated, "This is not just a probability, but a possible reality, unless the motoring public becomes more thoughtful in regard to complying with traffic laws which would break the rising trend."

PLANNING A MEETING?

ALL CLUBS, CHURCHS, CIVIC AND SOCIAL ORGANIZATIONS ARE INVITED TO INFORM THE CHAMBER OF COMMERCE OF THEIR MEETING DATES AND PLACES FOR PURPOSES OF COMPILING A COMMUNITY ACTIVITIES CALENDAR.

RIDING OUT OF ARENA---The three Queen Candidates. First Miss Dianna Marchman, third place; second, the new Rodeo Queen, Miss Pam Parrott; and last Miss Pam Long, second place winner.

## Dunking Tank Source Of Fun

A great deal of fun and horse-plays was enjoyed by most of Plains last week in connection with the dunking tank which was installed and used on the court house lawn. Practically every man in town was dunked at one time or another, as the appointed Rodeo Marshal, Johnny James, and his deputies, Dick Hamm, Frank Whitlock, Charles Roseberry and Roy McGeehee, went from place to place and from door to door rousting out everyone and throwing them into the tank. James stated that he wanted to express his sincere thanks to everyone in Plains for the splendid spirit of fun and of cooperation which was shown by just about everyone around Plains. He also pointed out that several wild stories got started in regard to people getting hurt while in the process of being taken to or thrown into the tank. He stated that as far as he knew no one, other than the marshal and deputies got hurt and that they kind of expected it and that none of their injuries was more serious than sore muscles and skinned shins.

## TAX ASSESSOR-COLLECTOR HERE COMMENDED

The following letter was received this week from D. C. Greer, Texas State Highway Engineer, by our local, and very efficient, Tax Assessor-Collector, Mr. E. W. Craif. Certificate of Title which your office has established during the period January 1 through June 30, 1964. As previously announced, the state average for this period is only 3.4%. The percentage for your particular county is only 2.0% of 1,252 title applications received. You and your staff personnel are to be commended for your continued efforts and the continued service being rendered to the citizens of your county.

## INSECT CONTROL SHORT COURSE SCHEDULED

Mr. Larry Lehmborg, the Plains Schools Vo-Ag teacher, received word last week that the Insect Control Short Course which had been planned here for August 17-20 will be held as was originally planned. The Texas Education Agency had previously stated that there was some doubt as to their being able to send a man here to do the teaching because of a vacancy in that department. Last week's correspondence, however, stated that Mr. Pat M. Henry has now joined the staff as Insect Control Specialist and that he will be here to teach the course in Plains as was originally planned. Persons in the Plains area who are interested in enrolling in the course this month should contact Mr. Lehmborg about doing so.

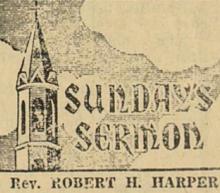

## PCG Elects Officers

More often than not, the success or failure of any group undertaking can be traced to the competence, or incompetence, of its leadership. In this respect, Plains Cotton Growers, Inc., has been and continues to be extremely fortunate. When the organization was born in 1956 there were those who predicted for it a short and fruitless life. But under the guidance of W. O. (Mr. Bill) Fortenberry, one of the most dedicated leaders anywhere in the cotton industry, PCG grew into a virtual giant among producer organizations and earned the respect -- even the envy -- of the entire cotton belt. Assisting Fortenberry in bringing about such a rise was his able Vice President, Wilmer Smith, who became President when "Mr. Bill" retired at the beginning of 1963, and PCG's record of solid accomplishments since that time is no less impressive than that of the years before. Now, at his own insistence, Smith has stepped down and has been succeeded by his Vice President, Roy Forkner of Lubbock. Smith automatically becomes Chairman of the Board and the immediate past President and, like Fortenberry, becomes a permanent member of the PCG Executive Committee. The new President, Forkner, helped to form Plains Cotton Growers in 1956 and has given it strong support since that time. He served as Secretary-Treasurer from 1958 to 1963 when he was elected Vice President. He is a ginner, owning and operating the Canyon Gin located east of Lubbock; a cotton producer, farming land in the same vicinity as his gin; a member and director of the National Cotton Ginners Association; a past president and director of the Texas Cotton Ginners Association; a director of the National Cotton Council, and a former trustee of Cotton Producer's Institute. This broad experience gives him excellent qualifications for leading PCG on a continued course of progress. Elected Vice President for the coming year was John D. Smith, of Littlefield, a farmer who occupied the post of Secretary-Treasurer during the 1963-64 year. Smith has been the active Chairman of the PCG Labor Committee and a director to PCG for the past several years. L. D. (Don) Anderson of Crosbyton became both a director and an officer of PCG for the first time this year when he was elected Secretary-Treasurer. He is a well known Crosby County farmer and seedsman, Chairman of the newly-formed but all-important Boll Weevil Steering Committee and Vice President of the Texas Tech-Exchange Students Association. Any assessment of PCG leadership would be far from complete without mention of the original and current Executive Vice President, George Pfeifferberger. Pfeifferberger was already an internationally known and respected cotton technologist when he came to PCG in 1956, and his stature in the cotton world has grown along with that of PCG. His untiring efforts are widely acclaimed as being responsible for much of PCG's success. Which brings us back to our opening statement -- success depends on the quality of leadership, which at Plains Cotton Growers has been, and is, among the best.

## FORMER LEA MAN WITH LUBBOCK BANK

Clyde Fort, son of Mr. and Mrs. Troy Fort, Lovington ranch family, has been employed as Agricultural Representative by the First National Bank, Lubbock, Texas, according to Charles Verner, President. He is a grandson of C. A. Fort who with Troy Fort owned and lease ranches in Southwest Yoakum County, commonly known as the Tannehill and Knight land. Fort, who is married to the former Nathalee Britton of Captian, was graduated from Texas Technological College, Lubbock, in June, 1962, and received a Bachelor of Science in agriculture degree with major in agronomy and range management. In June, 1964, he received from the same school a Master of Science in agriculture degree with major in agricultural economics. According to Verner, Fort will assist the bank in its servicing of range cattle and feed lot loans, general farm loans and in public relations with farmers and ranchers, 4-H and FFA Club groups. He began work with the Lubbock bank on August 1.

Mr. Emerson has written that bolts and "bars are not the best of our institutions, nor is shrewdness in trade a mark of wisdom." Of the statement we may constantly be reminded, though we may be careful to lock our homes. But the fact to be noted is that time works against the effort of the offender and that he leaves his fingerprints on everything he touches. Life is such that a man cannot escape from the eyes of his fellows without leaving traces of himself behind him. How, then, can he escape from the eyes of God? When we consider that the rays of a distant world striking our eyes tonight have been traveling here, at the rate of 186,000 miles a second, for a hundred years, we get a faint impression of the vastness of the universe that God has created. And in all the universe there is not a place where a man can hide from God! And, if perchance, a man might hide himself somewhere apart from man, God, a minister of conscience would hurry him to the bar a thousand voices within him cry, "Thou art the man!" But there is a brighter side to the law of reciprocity. For it also applies to good deeds. Men are urged to cast their bread upon the waters, as knowing they shall find it after many days. Great as the assurance that the good will be returned upon your head, you are to be good, first of all, because God is good, and wills that you to be good.

ARTHROSIS-RHEUMATISM Do claims and double talk make you doubt you can get any relief from arthritic and rheumatic pains? Get 100 STANBACK tablets or 50 STANBACK powders, use as directed. If you do not get relief, return the unused part and your purchase price will be refunded. Stanback Company, Salisbury, N. C.

THIS WOULD BE A BETTER PAPER WITH YOUR NEWS IN IT!

### WASHINGTON AND "SMALL BUSINESS" BY C. W. HARDER

On the tax payroll the Department of Agriculture has some 500 odd (no pun intended) press agents feverishly grinding out press releases assuring the American housewife she is buying goods at a great bargain. There is only one drawback to all this frenzied activity. The women just do not believe it. And in addition, the farmers are getting quite querulous. Perhaps the situation was best stated recently by Rep. Clarence Brown of Ohio. In 1947 the average hourly earnings of the American farmer was \$1.01. In 1963 it remained the same. The hourly earnings of food store employees in this period rose from \$1.03 per hour to \$2.17 per hour. The average price paid by the housewife for foodstuffs is up 9.7%; the price received by the farmer is down 5.3%. Obviously, something is badly askew. Continued concentration of the distribution of the nation's foodstuffs into fewer hands has been one factor. The other is that Hoffa, other labor leaders, have grabbed more and more control over the way that foodstuffs will be moved to market. Thus, one evil washes the hand of the other. The more there is concentration of distribution into few hands, the bigger the target for organized labor to shoot at. And in addition, the bigger the target, the more vulnerable it becomes. Actually, today, the loaf of bread that wholesales for 20 cents has only about four cents worth of grain, shortening and other material in it. The wrapper, material for which must come from a pretty closely knit group, costs around 2c. Plant labor, plant overhead, heat, et al, represent another four cents for a total of around 10c. So the question is where does the other dime go? This is approximately the cost, in these days of Hoffa domination, of putting a loaf of bread on a truck and taking it over to the food store. Out of this dime comes the wages, the contributions to the union welfare and pension plans. So while government press agents type madly to convince the American woman she is getting more food than ever for her dollar, she is not buying this idea. But this is the modus operandi of bureaucracy today. If a set of facts do not fit in with the image that it is sought to project, then disregard the facts as something that only stuffy old conservatives are concerned with, and blaze a new trail into the realm of fanciful imagination. For that is the higher level of statesmanship.

## Shrinks Hemorrhoids Without Surgery Stops Itch-Relieves Pain

For the first time science has found a new healing substance with the astonishing ability to shrink hemorrhoids and to relieve pain -- without surgery. In case after case, while gently relieving pain, actual reduction (shrinkage) took place. Most amazing of all -- results were so thorough that sufferers made astonishing statements like "Piles have ceased to be a problem!" The secret is a new healing substance (Bio-Dyne®) -- discovery of a world-famous research institute. This substance is now available in suppository or ointment form called Preparation H®. At all drug counters.

MISS RITA GOODPASTURE  
(Bride-Elect of Lt. Ken Muldrow)

Mr. and Mrs. Grady Goodpasture of 1011 East Tate, Brownfield, announce the engagement of their daughter, Miss Rita Goodpasture, to Ken Muldrow, Lieutenant, in the United States Army, son of Mr. and Mrs. A. M. Muldrow of 321 South Club, Brownfield.

Miss Goodpasture is a graduate of the University of Colorado and a member of Chi Omega Sorority.

Lt. Muldrow is a graduate of the University of Oklahoma and the University of Texas Law School. He is a member of Beta Theta Pi Fraternity and is currently stationed at Fort Benjamin Harrison, Indiana.

## Litterbugs Are Tax Liability

Litter thrown on streets and highways by pedestrians and motorists is more than paper, trash, cans and bottles. It is taxpayer's money, says Reagan Brown, sociologist for the Texas Agricultural Extension Service.

Where does the taxpayer come in? He has to foot the bill for the clean up job, explains Brown.

In addition, when trash is allowed to collect along streets and highways, gutters and sewers may be clogged and during heavy rains flooding may occur. The damage resulting from the overflow often means

## SOUR CREAM IS VERSATILE

The piquant flavor of sour cream gives a magic lift to a variety of foods, says Mrs. Gwen Clyatt, Extension Service consumer marketing specialist.

The name sour cream is almost a misnomer, for the commercially prepared sour cream available on today's market is not "soured," but is "cultured." Lactic acid is the magic ingredient for making sour cream. It is added to pasteurized and homogenized light sweet cream, and results in specially controlled, really tasty sour cream.

An excellent way to use sour

cream is an accent to new-crop vegetables. Dairy sour cream may be made a bit smoother and stiffer by whipping slightly. Don't overwhip or you may make butter. You may want to stir sour cream into sauces and gravies at the end of cooking, adding only a tablespoon at a time.

Heat sour cream gently, but do not boil, reminds the specialist. Cook sour cream hollandaise-type mixtures over warm, not boiling water, rather than direct heat. These mixtures are good as sauces with cooked vegetables such as broccoli and asparagus, and for garnishing fruit or vegetable salads.

further expense to the city, county and state governments and it can also be expensive to property owners, says Brown.

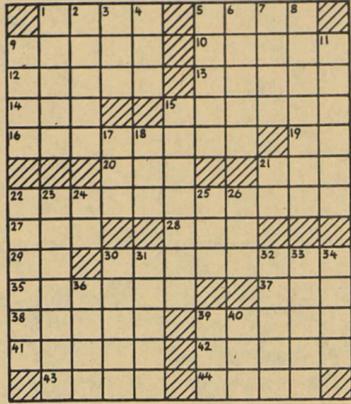

Texas is being judged every day in competition with other states for industrial location sites and the record can be improved, says the specialist. In some states, the state government is being asked to pass laws to prevent the marketing of any product in disposable containers or cartons and to increase the fines for "litterbugs."

Brown believes Texans can correct the situation without legislation. It will take teamwork, he says, and a real desire on the part of all citizens to make their state the cleanest and most beautiful in the nation.

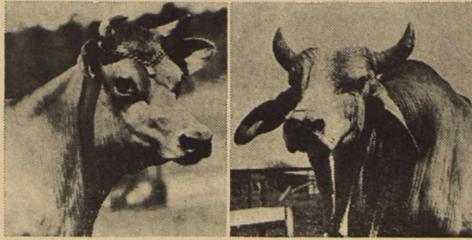

A litterbug in every car, pickup and truck is suggested as a starting point, and finally, says Brown, it may take some crusading by neighborhood leaders and others to make the public more conscious of the fact that it is their money they are wasting when they scatter litter everywhere they go.

## FEATURED BREEDS AT 1964 STATE FAIR

Purebred Jersey dairy and Brahman beef cattle from the nation's premier herds will star in two featured shows at the Pan-American Livestock Exposition in Dallas Oct. 10 through 18.

The Pan-American is the official livestock show of the State Fair of Texas. The State Fair's 1964 overall dates are Oct. 10 through 25.

The National Brahman Show will attract more than 300 entries by the foremost Brahman breeders in the United States. Shaping up as the largest exhibit of purebred Brahmans the world has ever seen, the National Brahman Show will offer \$8,000 in cash premiums, plus a score of valuable trophies. Judging is scheduled for 9 a.m. Thursday, Oct. 15, in the Livestock Pavilion.

A National Brahman Sale with consignments from leading breeders in Florida, Louisiana and Texas will follow at 3 p.m. on the same day.

Breeder-exhibitors are expected to enter more than 200 head in the State and Open Jersey Show, for which judging is scheduled to begin at 9 a.m. Monday, Oct. 12, in the Livestock Pavilion. Premiums for the Jerseys total \$5,000, Ray W. Wilson, Pan-American manager, has announced.

## Peggy Welch

## Shower Honoree

It was announced today that a Stork Shower honoring Mrs. Kent (Peggy) Welch of Plains has been scheduled for Saturday morning, August 8, from 10 to 12 a. m., in the home of Mrs. Dick Hamm.

It was further announced that all Kent's and Peggy's friends are invited to attend the shower, and that gift selections are available at Cogburn-Young Hardware and at Moore and Oden.

## Tell McGinty

## Bridal Shower

Miss D'Lois McGinty, bride-elect of Jay Earl Bryson, will be honored with a miscellaneous shower in the Community Club Room, Monday morning, August 10, from nine thirty until eleven o'clock.

All friends are cordially invited to attend.

Gift selections are at Cogburn-Young and Moore-Oden.

Hostesses for the occasion are Mesdames C. M. Thompson, W. L. Carnahan, G. W. Cleveland, Glenn Cleveland, Bo Stevens, Lanny Smith, O. G. Lewis, K. O. Hendrick, Gene Smith, C. Frank Spencer, E. D. Hunt, Bob Jones, Pat Henard, Odis Newberry, and L. O. Smith.

The Foy Flood's had as guests over the weekend her sister and family, the Lonnie Crosby's of Snyder.

Mr. and Mrs. Gene Young and Gena are home this week. Beverly Young is staying with them while Karen is recovering from a broken foot gotten from a fall while water skiing.

## LOCAL NEWS

Mr. and Mrs. Hoss Newsom and children are in San Antonio this week visiting her sister and family.

Visiting in the Gene Phillips home over the weekend were Gene's parents, the Vic Phillips, Irving Bridges of Big Spring and Ronnie Edwards of Lubbock.

Earl and Rocky, sons of Mr. and Mrs. A. J. McClellan of Albuquerque, N. M., are here visiting friends and relatives this week.

Enjoying a long weekend in Cloudcroft last week were the Dickie Green's, the Rip Sewell's, and the Donald Ray Lackey's.

Mr. and Mrs. Harvey Lusk and family of Midland were guests of the J. A. McConnell's and other relatives.

## CHANGE-OF-LIFE... does it fill you with terror ...frighten you?

READ HOW COUNTLESS WOMEN HAVE FOUND THE WAY TO OVERCOME CHANGE-OF-LIFE FEARS

Have you reached that time of life when your body experiences strange new sensations—when one minute you feel enveloped in hot flushes and the next are clammy, cold, drained of energy, nervous, irritable? Are you in an agony of fear? Too troubled to be a good wife and mother? Don't just suffer from the suffocating hot flashes, the sudden waves of weakness, the nervous tension that all too frequently come with the change when relief can be had.

Find comforting relief the way countless women have, with gentle Lydia E. Pinkham Tablets. Especially developed to help women through this most trying period. In doctor's tests 3 out of 4 women who took them reported welcome effective relief. And all without expensive "shots."

Don't brood. Don't worry yourself sick. Get Lydia E. Pinkham Tablets at your druggists. Take them daily just like vitamins.

The gentle medicine with the gentle name LYDIA E. PINKHAM

# YOAKUM SCD NEWS

Several New Great Plains contracts have been delivered this week. A. N. Norman, W. L. Clananah, Ed Carlisle, T. E. Sellers, and Dick Hamm. New conservation plans were also delivered to Olan Cox, Loren Galye, Ty Field, Robert Rucker, Loren and Musselewhite, Woody Wilmeth, Wayne H. Williams, Travis Been, and Olan Edwards. Many of them are new plans but some are revisions of old plans.

Work is under way on conservation plans on the Roy Edwards, Elizabeth Edwards, G. A. Nrych, C. T. Hammons, T. A. Elmore, and John Freeman.

Irrigated pastures are doing well in spite of the dry weather where the operators are keeping their grass tall. Upon examination of all kinds of pasture we are finding the taller the grass the deeper the root

system and water is going further as there is evaporation. The more leaf surface we find on grass the more grass we are growing as the leaf is where the plant food is manufactured. Thus when you cut short and keep short any plant you cut off its food and in short starve the plant. Paul Cobb, Bob Jones, Leroy McCrary, C. A. Dalin, D. V. Phillips, H. M. Connor, Daniel Nelson, Kenneth Nelson, J. D. Jones, H. M. Edwards, E. H. Frith, and Wilbur Hayes are a few tall grass men who will tell you it surely does take grass to grow grass. If at all possible bermuda or any irrigated pasture should be given a 20 to 30 day rest between now and October 1 to get a good, deep new root system so the plant will have vigor next year. We don't grow scurb cows any more, why grow scurb grass?

Proper pasture use now means more grass now and next spring also. Soil Conservation District Cooperators and S. C. S. technicians are continuing to learn about the use of irrigated pasture. We know that tall grass has more leaf surface to manufacture food, hold down soil temperature by saving moisture and too the taller the grass the deeper the root system. Short bermuda like a short cotton plant has a short or shallow root system. With

shallow weak roots a plant cannot get all the plant food or water available in the soil and does not grow the abundance of forage it is capable of producing. A 20-30 day rest on irrigated pasture now could mean several dollars per acre next spring in increased plant vigor, early growth and total production. This growth could be harvested later this fall and winter or early next spring without any loss of value. Why not follow the good recommendations of the satisfied tall grass pasture operators, graze - rest - graze but keep the grass tall.

Now Conservation plans were ordered this week on Leon Cheatem, William Worsham, Edward Smith, D. V. French, E. D. Afferson and H. M. Edwards. These serial photos will be used in working out and writing a Soil and Water Conservation plan for these places with the owners and operators.

One New Great Plains contract was completed and mailed to the area office for typing this week on Ray C. Wells.

New Great Plains contracts delivered this week were T. E. Sellers and Ed Carlisle and regular S. C. D. plans delivered were Loran and Musselewhite, T. F. Fillingim and Woody Wilmeth.

Robert Chambliss and Bobby report a lot of water conservation from the use of red top cane grown on feed grain program land last year and returned as a mulch this spring. We will have the complete story later on this year and it promises to be real good.

Shown above are two S. C. D. Supervisors, R. M. the Jones farm. This kind of pasture last year paid off Jones and Emmitt Campbell in a tall bermuda pasture on then and is paying off in increased production this year.

## Card of Thanks

Mrs. Bill Loyd, President of the Tsa Mo Ga Club, and members of the different committees, would like to express their thanks to everyone who helped with the Western Dinner, which was served Thursday at the School Cafeteria.

Special thanks to Doc McCargo and Caryl Light, and to members who decorated the beautiful float.

If you helped in any way to make our club work successful, in helping our community and our members, it is deeply appreciated.

## Call ASC Election

According to W. M. Overton local ASC office Manager Yoakum county farmers-ranchers will elect a committee of 3 members and two alternates on September 10, 1964 to serve as their committeemen for the 1965 crop year.

The election will be by mail. Ballots will be mailed to all eligible voters on the ASC mailing list and ballots may be picked up at the ASC office after the ballot is printed and prior to 5:00 p. m., Sept 10.

Farmers names recommended to appear on the ballot are Roy McGehee, William Worsham, Earl Kiser, Henry May, Frank Long, J. M. Dearing, R. A. Long, T. J. Murphey, T. A. Elmore, Ray Bearden and J. B. Ashburn.

The names of those listed above will appear on the ballot unless found unwilling to serve. Other names may be placed on the ballot by petition if properly filed with the ASC office on or before Aug. 14, 1964.

Overton stated that the committee elected will take office October 1, 1964 and will serve until the 1966 commit-

tee is elected and take office. Elected one year ago for the 1964 crop year were Ray Bearden, T. A. Elmore, T. J. Murphey, Lee Roy McCravey, and R. A. Long.

Anyone wanting any information in regard to eligibility to vote, hold office or names that have been recommended to appear on the ballot are urged to contact the local ASC office.

In the past elections, according to Overton, several hundred voters almost 100 voters have cast their ballot in the ASC committee election.

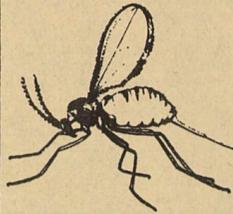

New! Gillette SLIM Adjustable Razor. You turn dial from 1 to 9 for the exact setting that matches your skin and beard. With new Stainless Steel Blades. LOW PRICE \$1.50.

## SORGHUM MIDGE CONTROL

Any sorghum producer who has suffered through a season of midge infestation is familiar with the stunted spikelets that result. In Texas alone, yield losses resulting from midge damage was estimated at 300 to 500 million pounds in 1963 by the School of Agriculture of Texas Technological College. A typical sorghum field planted to yield 4,500 pounds can lose as much as 1,500 pounds per acre to the midge.

Research work done at Texas A&M University and studies at Texas Technological College have both demonstrated that, when properly used, Diazinon insecticide provides effective control of the sorghum midge without danger of foliar burning of the plant. This work, together with residue data developed by Geigy Agricultural Chemicals, Division of Geigy Chemical Corporation, led to the recent label acceptance by the USDA for the use of Diazinon on sorghum.

Even when applied twice at the maximum recommended rate, Diazinon showed no tendency to "burn" the five most popular varieties of grain sorghum (Northrup-King 120, RS-501, RS-610, Producers Association Grain 665, and Lindsey 788). Because Diazinon does not burn the plant, as some organic phosphorus insecticides do, it can be applied twice with relative safety: first when 90% of the heads have emerged from the boot, followed by a second application four days later. As reported in Progress Report 2206 from the Texas Agricultural Experiment Station at Texas A&M, an 80% increase in sorghum yield was achieved by using a double treatment with Diazinon.

Another feature of Diazinon is that it can be applied to sorghum up to 14 days before harvest or feeding to livestock.

Diazinon is used on a wide variety of crops, including fruits and vegetables as well as feed and forage crops. It requires no protective equipment or special clothing during application.

For the control of sorghum midge, Diazinon is available in two formulations: Diazinon 50 W, which is 50% wettable powder, and Diazinon AG 500, which is an emulsifiable solution containing four pounds of technical Diazinon per gallon. Application should be made at the rate of 1/2 to 1 pound per acre of Diazinon 50W, or 1/2 to 1 pint of Diazinon AG 500, per acre. Sufficient water should be used to assure thorough and even coverage of all sorghum heads.
