

Dirt Gardeners

The Plains Dirt Gardeners are diligently working on designs to advertise to our local people, and to all out of town people who may pass our way, that the Plains Rodeo, Old Settlers Reunion and Bar-B-Que will be held August 5, 6, & 7.

The Garden Club is taking this means as a project to finance the necessary expenses to maintain their club as a Standard Garden Club. They hope to paint designs on store windows for local merchants. Previously it has been customary for an out of town artist to do this advertising. They hope to keep these dollars at home and have the work done locally. They hope to contact merchants soon for selection of designs.

Also the Garden Club would like to announce that one of their Members Mrs. Foy Cogburn has completed all requirements and is now a Nationally Accredited Flower Show Judge.

Mrs. Cogburn has received her credentials signed by Mrs. Lucile Mauntel, President, of

the National Council of State Garden Clubs, Incorporated. Considerable study must go into this honor, you must complete 5 Flower Show Schools, take a reading examination, assist as a Junior Judge at least 3 shows, and win at least 5 blue ribbons in Horticulture and Design while completing the courses. There are approximately 20 books that are required reading.

We also have two Junior Judges in our Club, Mrs. Leon Lewis needs only to take her reading examination and Mrs. W. M. Overton should complete all her requirements next Year.

Come out to see some of the work of these judges, along with the work of the entire membership when we present our Eighth Annual Flower Show this fall. Date for the flower show will be October 16, 1965 in the Activity Room, Plains Elementary School Building. We are planning on a summer of collecting items for "The Greatest Show on Earth", which will be the theme this year.

By Mrs. Sudie M. Thompson
County Home Demonstration Agent

Yoakum County 4-H'ers were again invited by Southwestern Public Service Company to attend the District 2 Electric Camp at Scott-Able, July 9-13, 1965. Four girls and four boys and two adults make the quota from our county. Food and housing are provided by the Southwestern Public Service Company.

Those attending the camp will go by chartered buses which will leave Lubbock at 8:00 a. m. on Friday, July 9th. The

FHA

Rita Snodgrass, Charlene Upton, and Dene McDonald attended the officers workshop at Texas Tech, June 15th and 16th. The girls were accompanied by their advisor, Mrs. Carroll Lockett. The girls gained ideas for programs, yearbooks, and moneymaking projects, as well as what their duties as officers were to be.

Robert T. Davis, Director Attorney General's Texas Youth Conference, gave a talk on Leadership in Action to the group.

Josephine Pazdral, State FHA Advisor, Texas Association, gave a report on Accomplishments of FHA in Texas. Dr. Berlie Fallon, professor in the education department, Texas Tech, gave a talk entitled, Designs for Action.

Yoakum County group will board the bus in Plains about 9:30 a. m.

Since the camp is 9,000 feet elevation each person will need a jacket. The craft this year will be a pin-up lamp.

Summer days are here again and so is time for vacations. Along with many vacations poison ivy is a problem. It is a perennial, native plant that grows during the warm season and belongs to the sumac family. Three varieties of the plant grow in Texas. It can exist as a vine, shrub, or small tree and always has its leaves divided into three leaflets.

These leaflets are usually glossy and have one of three types of margins—smoothed, toothed or lobed. The lobed or toothed leaf resembles oak leaves, thus the name poison oak.

Clusters of white flowers arise from the axis of these leaves. When fruits develop, the berries are waxy with distinct lines marking the outer surface which resemble segments in a peeled orange.

All parts of poison ivy plants are toxic, particularly the sap. It can be carried by pets, gardening tools or from the soot of burning plants. If contacted, clothing should be washed thoroughly and separately before wearing and the contaminated parts of the body should be washed with soap and water. A doctor should be contacted if irritation becomes serious.

The Assembly of God Church in Plains has received a new organ. The young people of the Church made arrangements to purchase the organ for their church, said Rev. Tarkington, minister.

Rev. Tarkington said that arrangements were made at the bank for the young people of The Assembly of God Church to pay for the organ.

Rev. Tarkington's daughter, Sharon will play the organ during church services. Besides the organ, the church has an almost new piano.

The local minister expressed his appreciation to the young people for working so hard to get the organ for the church.

Mrs. George Cleveland has just returned from a visit to Houston and Los Angeles. While in Houston she toured the Dome Stadium and the Humble Building, which is the tallest building west of the Mississippi. She attended the graduation of a granddaughter while in Los Angeles. She was one of 502 graduates from North Hollywood High. She finished with high honors.

Mr. & Mrs. Frank Sudduth had the following guests in their home for fathers day: Mr. & Mrs. Claude Montgomery of Brownfield, Mr. & Mrs. Delbert Bert and boys of Plains, Mr. & Mrs. Lee Miller of Brownfield, Mr. & Mrs. Earl Robertson of Lubbock, Mr. & Mrs. Willard Sudduth of Ho-

bbs, New Mexico, Mrs. Belle Burns of Hobbs, New Mexico, and Mr. & Mrs. R. G. Sudduth and family of Hobbs.

Wayne Cockerhams of Georgetown La. is spending a few weeks with his uncle Herman Cockerham.

Mr. & Mrs. Lynwood King of Mira Loma California visited Mrs. W. L. McClellan, Mr. & Mrs. John Anderson and Mr. & Mrs. Sherm Henard last week.

Mrs. M. McGinty is spending a few days with relatives in Lubbock this week.

Mrs. Joe Kennedy spent a few days last week in Yoakum County Hospital.

Mr. & Mrs. Bob Alberding and son left Saturday to visit relatives in California.

Mr. & Mrs. Ray Strickland & children spent the weekend

in Amarillo with her Mother Mrs. Ruth Lambert and sister Mrs. Marie Phillips.

Mr. E. S. Bandy celebrated his Birthday last Tuesday June 22, with Mr. & Mrs. Autie Bandy and family of Meadow. Visiting with them Saturday was J. B. Pruitt of McKinney, a nephew of Mr. Bandy.

Mrs. Sophia Hinson of Sacramento California is spending several weeks with Mr. & Mrs. Foy Flood and children. She is a Greataunt.

Mr. & Mrs. Keith Green & children of Turkey, Texas, spent the weekend with her parents Mr. & Mrs. Robert Chables and Robbie and Kindra Hale went home with them for a visit.

Mr. & Mrs. Jessie Hale, Beth Ann and Karen Hale, their nieces, are on a three weeks vacation. They will tour California, Washington, and Organ.

Mrs. J. V. Been and Mrs. Alma Lynn McGinty were in

Lubbock one day last week. They visited Mr. & Mrs. Pete Bryson and D'Lynn McGinty.

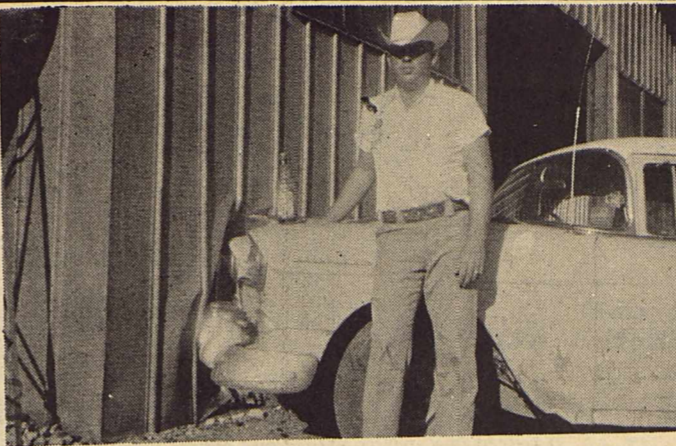

Rev. & Mrs. James Bozeman are in Mexia this week for a family reunion of his family.

Mr. & Mrs. Harry Cayce and children were called out of church Sunday. His father was worse and was moved to Methodist Hospital in Lubbock.

Mr. & Mrs. Roy Edwards and Latrice, Mr. & Mrs. Hoss Newson and children, Mr. & Mrs. Harry Lusk and children of Midland, and David Lusk left Saturday for a camping trip to New Mexico and Arizona.

Mr. & Mrs. Larry Lehmborg moved to Mason this week where he is going into business with his uncle in the Butane business.

Sue Robertson and Mrs. Lillian Williams were guests in the Frank Sudduth home this past week.

FARM TOPICS

YOAKUM S. C. D. NEWS
BY C. MURRELL THOMPSON

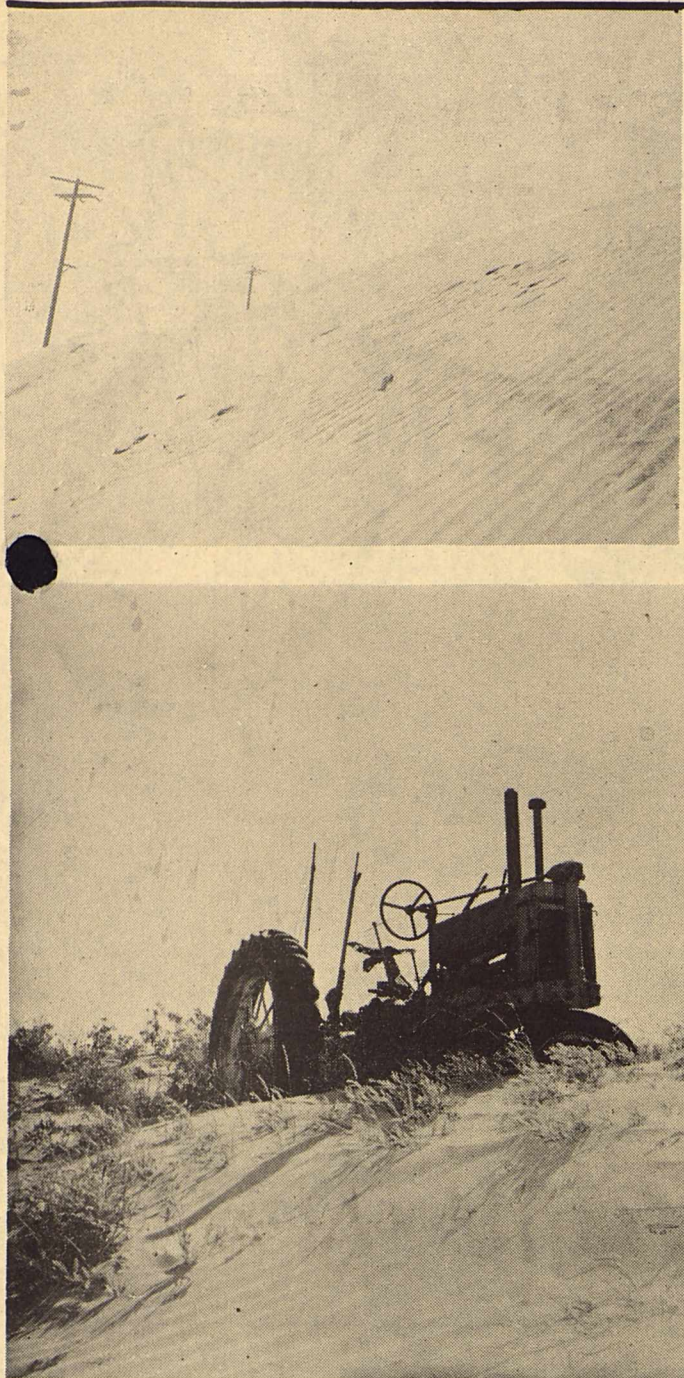

This week we wish to remind you that Soil and Moisture Conservation is important to everyone. The picture is to remind us that what happens to our land affects more people than just the man that operates the land. We are still able to see the results of misuse of the land in a few places.

This misuse is only made more noticeable by the drought and erosion. It is not completely caused by them. There are conservation farmers and ranchers doing an effective job while across the road their neighbor is not. Sand on the highway must be hauled away and this costs all of us tax money. Sand causes damage in equipment owned by the farmer or rancher. Sand can stack up and cause a problem for the utility company and if their cost goes up it is passed on to the consumer, you and I. All erosion can not be controlled but it can and is being controlled by thousands of farmers and ranchers who are cooperating with Soil Conservation Districts all over our country.

Needless waste of soil, moisture, tax money and other forms of cost such as beauty, can and are being stopped by local cooperators with the local S. C. D.

The waste in the pictures could have been avoided had a good job of crop residue management, cover crops, pasture grass planting or tillage been used. Planning ahead now can produce a cover or crop residue that will hold soil and moisture.

Some new cooperators with the Soil Conservation District are Wendell H. Norman, Raymond Sherrin, Alton Billings, Clarence Hester, Johnnie Layton and Wayne Davis. These conservation farmers along with many others will be using conservation practices that will hold their soil and moisture and keep it off the highway.

When soil and moisture is lost to the farm it is sometimes expensive to Utility Companies and highway maintenance crews. Equipment can be damaged also.

FARM NOTES

YOAKUM COUNTY ASC
NEWS
BY W. M. OVERTON
OFFICE MANAGER

We at the ASC Office have many inquiries about what to expect for 1966 as a farm program; for cotton, feed grains, etc. Of course no one knows at this time what Congress will pass in the way of a farm bill for 1966 and later years. They (the Congress) are considering the farm problem at this time and due to the many different bills introduced and due to the many different opinions of farmers and people interested in farm programs it is hard to tell at this time what changes the present Congress may make in the farm programs administered by ASC. The president did, back in April, present to Congress a bill which carried the following recommendations:

1. Extension of the voluntary wheat diversion program for two years.
2. Extension of the voluntary feed grain program for two years.
3. Establishment of a price support mechanism for rice utilizing loans and marketing certificates.
4. Extension of the wool act for two years.
5. Provisions for a long term cropland adjustment program.
6. Provision for the lease and sale of acreage allotments.

Since April we understand that a number of cotton program bills have been introduced and there are some indications that Congress may consider letting cotton sell at the world market and the government paying farmers the difference between the selling price and what is considered a fair price; 29¢ a pound or near that price.

To extend the feed grain program using the same bases would not change the farming situation in this county any; however, should the provision for the lease and sale of allotments be approved, or if they ever made the cotton program a voluntary program the farming situation in this county might change considerably.

Feel sure that all members of Congress are glad to receive opinions from the voters.

SAFETY REPORT

The Plains Record urges people involved in accidents no matter how minor to report same to city police, sheriff's department, or the highway patrol because of insurance claims, possible litigation, and self protection. The following is a release from the Texas Department of Public Safety about accidents in Yoakum County.

Of the 70 rural traffic accidents reported in Yoakum County, 27 were reported not investigated. Sergeant A. E. Roberts, Highway Patrol Supervisor of this area said that his office investigates every accident that they become aware of or are notified about. The Sergeant stated, "The driver of a vehicle involved in an accident resulting in injury or death of any person shall immediately by the quickest means of communication give notice of such accident to the local police department, if such accident occurs within a municipality, otherwise to the office of the county sheriff or the nearest office of the Texas Highway Patrol."

The Sergeant also said, "The law requires the driver of a vehicle involved in an accident resulting in injury to, or death of any person, or total property damage to an apparent extent of \$25,00 or more, shall within 10 days after such accident forward a written report of such accident to the Department of Public Safety."

Views From County Agent

By Leo White

Yoakum County grain sorghum producers can well remember the damage occurring in 1963 to the late planted crop on account of the grain sorghum midge. The midge is a tiny gnat like insect which destroys the seed crop during the stage of blooming. The midge multiplies rapidly when host plants are available for it to thrive on. It over winters in fields and pastures and emerges in the Spring. When Johnson grass and other host plants begin to bloom, the midge begins its population explosion. Early planted crops which bloom before the midge population becomes too great will escape damage. It is believed that the grain sorghum midge does more damage on the years when conditions are favorable for early emergence.

Research entomologists began a study of the midge in 1964 at several points on the High Plains. They are finding that midge emergence is about two weeks earlier in 1965 than in 1964. They are also finding that host plants have reached the bloom stage this year two weeks earlier than last year. On one plot near Petersburg, there were nine midge found in head samples of Johnson grass on June 17 so the number of emerging midge is considerably higher this year than in 1964.

This earliness could indicate that 1965 will be a damaging year for grain sorghum producers. Past experience shows that infestations do not reach the damaging stage until after the first week in August.

The high winds and blowing sand have caused some difficulty in getting accurate information this year because blowing sand can damage the traps used at the experimental plots. Recent readings from some of the undamaged traps indicate increased movement of the midge as compared to the same period in 1964.
