

# Governor appoints committee

By FRANK BASS  
University Daily News Reporter

Gov. Mark White's office released the names of 16 persons to serve on the state's Select Committee on Higher Education late Tuesday afternoon.

The announcement followed weeks of speculation concerning the 13 appointments to be made by White, Lt. Gov. William P. Hobby and Speaker of the House Gib Lewis, D-Fort Worth.

White, Hobby and Lewis each appointed four members to the committee, which will study all aspects of higher education in Texas during the next 15 months.

In addition to his four appointments, White also tabbed a chairman to head the committee, choosing

Larry Temple, an Austin attorney and director of the state college coordinating board.

White also appointed Arthur Temple Jr., chairman of the board of Temple-Inland Inc., to the committee.

White also selected Judge Reynaldo Garza, a judge for the 5th U.S. Circuit Court of Appeals in Brownsville, and Deborah C. Kastrin, owner and president of Southwest Industrial Resources, an El Paso-based general construction firm.

Earl McKinley Lewis of San Antonio, chairman of the department of urban studies at Trinity University, and Bobby Ray Inman, president and chief executive officer of MCT, an Austin-based electronics firm, also were chosen by White.

One of Hobby's appointments,

George P. Mitchell, was mentioned as a possible chairman by the AP. Mitchell is chairman of the board and president of Mitchell Energy and Development Corp.

The AP also mentioned two other Hobby appointees as potential committee chairmen. They are Dallas investor Peter O'Donnell and Norman Hackerman, chairman of the scientific advisory board at the Robert A. Welch Foundation in Austin and former president of both the University of Texas and Rice University.

Hobby looked to the Panhandle for another choice, selecting Amarillo attorney Wales Madden for the committee.

Lewis also looked west in choosing two candidates, naming Lubbock attorney Bill Parsley, a former state

legislator and director of public affairs at Texas Tech, to serve on the committee.

Lewis' other choice from West Texas was William B. Blakemore II of Midland. Blakemore is president of the Alpha 21 Corp.

Lewis chose the vice president of Interfirst Bank in San Antonio, Glen Biggs of El Dorado, and Joe McCormick of Round Rock, executive director of the Texas Guaranteed Student Loan Corp., to complete his appointments.

Four ex-officio members also were appointed to serve. Sen. Grant Jones, D-Abilene, Sen. Ray Farabee, D-Wichita Falls, Rep. Jim Rudd, D-Brownfield, and Rep. Al Luna, D-Houston, will serve on the committee.

# Lubbock attorney to serve on committee

By FRANK BASS  
University Daily News Reporter

State officials announced Tuesday that Lubbock attorney Bill Parsley will serve on the state's Select Committee on Higher Education, which will examine all aspects of Texas higher education over the next 15 months.

Parsley, a former state legislator and Texas Tech official, was appointed by Speaker of the House Gib

Lewis, D-Fort Worth.

Lewis, Gov. Mark White and Lt. Gov. William P. Hobby each selected four members to the committee. White also appointed a chairman, selecting Larry Temple of Austin.

Parsley, a 1952 Tech graduate, was born in Jones County, north of Abilene. Before entering Tech in 1948, he worked as an announcer for KSEL radio in Lubbock.

Parsley served as an ensign aboard the USS Helena during the Korean

War. He attended law school at the University of Texas and was elected to the Legislature in 1962.

While a member of the Legislature, Parsley served as vice chairman of the House Investigating Committee, vice chairman of the Congressional and Legislative Committee.

Parsley resigned from the Legislature in December 1964 to accept a position as vice president for development at Tech.

In 1966, Parsley worked for a \$2

million appropriation from the Legislature to be used to fund construction of the state school for the mentally ill. Later in the year, he helped in obtaining funding for the new Tech School of Law.

Parsley also worked for funding for the construction of a medical school to accompany the law school appropriation, but the medical school funding was vetoed by former Gov. John Connally.

# Plane crashes in Virginia

By The Associated Press

WEYERS CAVE, Va. — A commuter airplane carrying 14 people crashed into a cloud-shrouded mountain in Shenandoah National Park Monday, and there were no signs of survivors, state police said.

The crew of a Marine helicopter sighted the downed Henson Airlines Beech 99 around 7 p.m. about five miles east of the Shenandoah Valley Airport, which the plane was approaching on an instrument landing, officials said.

The twin-engine propeller-driven craft, which had left Baltimore-Washington International Airport as Flight 1517, was last contacted by radar at 10:20 a.m., said Dick Stafford, a Federal Aviation Administration spokesman.

# Fear of sickness leads thousands to flee Mexico City

By The Associated Press

MEXICO CITY — Thousands fled the city Tuesday, fearing disease from polluted water and decaying bodies. Others watched rescuers pull survivors from earthquake debris that had imprisoned them for days, praying to see relatives.

Workers dug and listened on ultrasound equipment, specially trained dogs sniffed and pawed in the desperate effort to find the estimated 1,500 people still buried before it is too late.

Cheers are raised for every victory, when someone who thought his trap was his grave is pulled to safety.

Not even disaster can change fundamental human behavior: Teams digging through the rubble of an apartment building reached a 70-year-old woman, but she refused at first to come out "because I am naked and people are going to think I have

no shame." The latest official count put the death toll at 3,000 from the two major earthquakes that struck the heart of

See related stories, page 4

the city last Thursday and Friday.

The city government said 7,100 people were injured and that 600 remained in hospitals.

An estimated 300,000 were homeless, and only about half have found temporary shelter. The others huddle in parks and streets, or have left the city to seek help from friends and relatives outside the capital.

Health officials said there was no severe threat of epidemic from contaminated water and decaying bodies that either are caught in the rubble or awaiting burial. They advised residents of the city to boil drinking water.

Health workers fumigated badly damaged buildings and devastated areas to stop any spread of disease from the corpses underneath.

Survivors visited Roman Catholic churches, lighting votive candles for the dead, many of whom are being buried in mass graves.

Detours and blocked streets tied up the normally heavy traffic until it approached gridlock in this huge urban sprawl of 18 million people. The city attorney's office said bodies could not be taken outside the city for burial, and told families to take them to one of three public cemeteries.

An intern was rescued from the wreckage of the Juarez Hospital on Monday morning. Four doctors and a patient were dug out later in the day.

French and Swiss teams still were trying on Tuesday to reach Dr. Gilberto Lozano Saldivar, chief of the hospital teaching staff, and other staff members. He was believed to be trapped with a class of medical

residents that was in session when the first quake destroyed the 12-story building Thursday.

A team member said there was voice contact with Lozano and others trapped in the ruins, hopes of reaching them were strong, and "everything is going well."

Famous tenor Placido Domingo, looking haggard, continued his vigil at the remains of a building in which four of his relatives had lived.

To reporters who asked whether he was worried about damage to his voice from dust and germs in the air, Domingo replied: "I don't think about the voice. It's the last thing."

There were few reports of looting or price gouging immediately after the quake, but they are becoming more frequent.

In Texas, the task force coordinating the state's Mexican relief efforts Tuesday declared a goal of "a dollar a Texan" to raise more than \$15 million for earthquake aid.

More than \$1 million already has been donated, said Mayor Henry Cisneros of San Antonio, co-chairman of the relief drive.

"This isn't a government effort. This is a neighborly effort, a people-to-people effort, a citizens' effort on the part of a state that shares a large border ... with Mexico," Cisneros said after the first meeting of The Texas Response — Citizens for Mexican Relief.

Cisneros and task force co-chairman Bob Krueger, former U.S. ambassador-at-large to Mexico, said a \$15.5 million goal was set for fundraising.

"A dollar a Texan. It's not that much. It's a possible goal," Krueger said.

Krueger said cash is a big need of the Mexican government in the wake of the two deadly quakes.

# Hobby claims Tech needs more research

By FRANK BASS  
University Daily News Reporter

While Texas Tech officials welcomed Lt. Gov. William P. Hobby's suggestion that the state do more to promote international research at state universities, the officials also said Tech already is a worldwide center of international research.

"I'd like to see Tech and the University of Houston become as aggressive as Texas and A&M in attracting private endowments," Hobby told a reporter for Harte-Hanks on Monday.

Hobby said he hoped the state's new Select Committee on Higher Education would consider granting additional funding to Texas universities to bring the state universities' research levels up to those of universities in California and Massachusetts.

Hobby said of the 37 state-supported universities in Texas, the University of Texas, Texas A&M and Rice University received more than \$10 million in federal funds during 1983.

Oliver Hensley, director for research services at Tech, said Tuesday the Select Committee on Higher Education should look at

Tech's reputation as a worldwide research center.

"I think they're going to go along with it," he said. "Lt. Gov. Hobby recognizes that UH and especially Tech are doing large amounts of research and the quality of students is such that legislators recognize Tech as being a research center."

Hensley also said Tech has been recognized as a research leader by members of the industrial community.

"There's a lot of industry that comes to Lubbock which uses Tech engineering and business majors as consultants," he said. "Tech being a worldwide research center isn't something that's being thought about, it's a statement of fact."

Hensley said Tech could use additional funding for maintenance and improvements in research programs.

Hensley cited costs involved with bringing new professors into the research program, keeping up with new technology and maintenance of existing equipment as being major elements of Tech's research budget.

"Tech can always use more research money," he said.

# Lubbock police add computers

By DAVID CORTES  
University Daily News Reporter

To keep pace with increasing technology, the Lubbock police and fire departments are incorporating a new computer display terminal capable of dispatching calls and managing records more efficiently than the current system.

After two years of city planning, both departments will share a \$500,000 expandable system that will bring greater speed and more efficiency in storing information, according to LPD Lt. Frank Treadway.

Under the current system, the LPD houses almost 600,000 index cards containing police information on crime and traffic accidents. In addition, police records contain files on anyone who has ever been arrested within the last three years and microfilm on arrests dating to 1937.

Treadway said the system is cumbersome and will be eliminated with the computer system, which will allow deletion of unnecessary information after a certain period.

"All types of police departments and government agencies across the country have been keeping hard copy records since day one and they've all run out of space," Treadway said. "This is probably the best reason to go to some type of automated system."

Concerning storage of information, Treadway said if there has been no apprehension or prosecution on a particular criminal offense after the

period of limitations becomes outdated, the information is then useless, other than a historical document. He said by computerizing, those reports can be deleted.

"We'll have a record of what happened, but as far as the actual description, it's not that necessary."

Treadway said if an offense is committed from which statistical information can be drawn, after three years it usually is no longer valid.

"When you're trying to predict crime patterns with increases and decreases in specific areas, generally it's immediate information you draw from," Treadway said.

The police and fire departments will be receiving a computer system separate from the city's.

One of the reasons for a separate system is because of the legal requirements of privacy on criminal records, Treadway said. Anyone needing access to those records must be a police officer or an employee of the department.

He said different parts of the computer system will be housed in sections of the city enabling the fire and police departments and municipal courts to draw information as their professions interrelate.

Treadway said 85 percent of the computer hardware has been delivered to the LPD and is being tested. Employee training on the computer system will begin in October.

"We'll keep all of our employees. They'll be transitioned into the new

system," he said. "I'm sure they're a little apprehensive about this.

"Anytime you convert, it's going to be a difficult and painful process, but I think services to officers where they can have the most up-to-date equipment and services to the public will be well worth it."

With the expandable computer system and as technology develops, the LPD may later add mobile box units in squad cars that can receive any type of information from the central system.

"I feel there will be a constant phase-in with newer equipment, because many parts become obsolete," Treadway said. "But our department can only begin to operate with what's economically feasible."

As far as general operation, Treadway called the overhaul "probably the biggest the department has ever seen."

Treadway said that in addition to the computer system, Lubbock citizens will have an opportunity to vote next year on whether to install an emergency 911 number.

If passed, a person could dial 911, and the call possibly would be transferred by LPD to a specific emergency department.

With the new number, a telephone charge would increase from 10 to 14 cents a month, Treadway said.

WEDNESDAY

## In today's UD

The earthquakes in Mexico have caused a rumble of activity across the nation and even in Lubbock.

National, regional and local organizations are pooling their resources to help those in the devastated areas of Mexico.

The American Red Cross, in direct communication with the Mexican Red Cross, has provided basic aid and supplies. The South Plains Regional Chapter of the American Red Cross also has contributed to the effort.

Also helping in relief efforts are the Radio Amateurs of Texas Tech. The club is aiding in the transmission of radio messages from Lubbockites to relatives in Mexico City and the surrounding area.

Read more about the earthquake situation and Tech's efforts to help in a special report on page 4.

## Weather

Today's weather will be sunny and cool with high temperatures in the mid to high 70s. Lows will be in the high 60s. A slight chance for rain is expected. Winds will be from the south at 10-15 mph.

## Church and state issue cleared by U.S. heritage

University Daily Associate Sports Editor

**Kent Best**

It's been said many times that religion and politics don't mix.

We've heard it from our teachers, we've heard it from our parents, and we've heard it from our friends.

"Separation of church and state," they proclaim proudly. "Forever and always."

All I can say is, yeah, but ...

Sure, church and state should be separated; that's what our forefathers wanted when they made the big move over here.

They wanted, among other things, no more state-run churches. They wanted to worship, or not worship, as they pleased. In short, they wanted freedom.

This is not a history lesson, but those individuals who are crying the loudest about separation of church and state undoubtedly could use one. Our distant ancestors did not want to limit religious thinking; they wanted to guarantee free access to it. Hence we as Americans have "freedom of religion." Amen.

But somewhere over the past 200-plus years, some people have lost touch with the meaning of the words. These people believe that government is what must be left free, and religion should be limited to quaint churches on quaint streets in semi-quiet places like Lubbock.

"Leave politics to us," they say with much sanctimonious bravado. "Keep all that religious stuff to

yourself."

I'm not one to point fingers, but I'd like to point a great big fat one at people who label everything done politically by certain religious leaders as "unconstitutional."

These are the same people who spend money every day emblazoned with the very religious, "In God We Trust."

And they are the same unenlightened folks who bow their collective heads so reverently at Texas Tech football games as the pre-game prayer is spoken.

What these people are too ignorant to understand is that our beloved country was built upon a foundation of religion, and whether we like it or not, most of its laws and regulations were brought about because of certain religious doctrines.

Laws concerning crime closely parallel the Bible's Ten Commandments. An even more glaring example of religion interceding in statutory law can be found in our marriage laws. I mean, just how religious can you get?

The point of this tirade is not to praise people like Jerry Falwell, or Billy Graham or anybody else who uses their religious backing to affect government policy. The point is much simpler.

We as American citizens can either accept our heritage as a religious nation founded on religious ideals, or we can abandon the Constitution as being contradictory and write a new one.

We can either believe in freedom of religion or semi-freedom of religion. The point is that you can't have both.

## What's in my wine?

University Daily Staff Reporter

**Felicia Booth**

fate of a lawsuit. The lawsuit was filed by the Center for Science in the Public Interest.

I realize this may be new to some of you. I also realize the majority of you do not care one way or another what goes into the alcohol you drink, just as long as it pickles your tongue, makes you drool and eventually makes you do unmentionably degrading things to yourself in public.

But let's pretend you finally meet Mr. (Miss) Right. You invite him to your modest home for a private "cocktail hour." You plan to serve your favorite drink, made expressly with Jack Daniels. Jack Daniels, though, is made expressly with FD&C No. 5 dye. Mr. Right is allergic to FD&C No. 5. You will not have made a good good impression on him if he breaks out in a grotesque rash. Or, perhaps you serve him a chilled glass of Blue Nun, and you spend the rest of your cocktail hour with him, a nurse and a doctor at the local hospital emergency room.

I believe it should be mandatory for the Bureau of Alcohol, Tobacco and Firearms to issue and enforce rules concerning the labeling of alcoholic beverages. Makers of alcohol should have to list all beverage ingredients. It may not help, but the consumer will have had fair warning.

Well, this problem may not have a solution. I think once proper legislation has been passed concerning alcohol labeling, somebody is going to have to figure out a way to read the label when in a slightly intoxicated state — a massively intoxicated state in some Tech student cases.

## Supreme Court justices maintain low turnover

Syndicated Columnist

**James Reston**

Like all members of the human race, members of the Supreme Court of the United States have birthdays. This is usually noted around here at the opening of the court's autumn term, especially this week, on the 198th birthday of the Constitution, when Chief Justice Warren Burger of Minnesota and Associate Justice Lewis F. Powell of Virginia both turn 78.

It's not quite clear how the chief justice arranged to be born on the anniversary of the signing of the Constitution, but the coincidence has given him a special and useful interest in the document. And while a few years ago he liked to talk vaguely about mandatory retirement for members of the Court at age 75, it would be surprising if he didn't want to say a few words from the bench on the 200th anniversary of the Constitution in 1987.

The other members seem in no

hurry to get out either. Though on average the present members of the court are older than the Nine Old Men President Franklin D. Roosevelt tried and failed to get rid of, they are holding on as usual.

The Supreme Court has not become the conservative bastion the Democratic leaders feared when Ronald Reagan was elected and re-elected. He has been able to appoint only one member, the conservative Sandra Day O'Connor, to replace liberal Potter Stewart. And with the tendency of Associate Justice Harry A. Blackmun to vote more often than expected with the "liberal wing," the balance today is not all that different.

In the lower federal courts, however, there are many changes. Since he entered the White House in 1981, Reagan has appointed more than 200 district and appeals court judges, most of them carefully chosen to respect his conservative philosophy.

Justice Department officials concede not only that they take care to inquire into a prospective candidate's background and judicial philosophy before recommending nomination, but that this practice will probably be followed more carefully under At-

torney General Ed Meese.

They are particularly interested in how a candidate approaches questions of abortion, affirmative action and First Amendment rights, and they insist that these are merely established procedures.

Former Carter administration officials concede that while they often discussed such concerns before appointing judges, they never did so to the extent now practiced by the Reagan White House and Justice Department.

One of the various private conservative organizations that are active in "screening" judicial applicants is the Center for Judicial Studies, headed by James McClellan, former aide to Sen. Jesse Helms of North Carolina. The center is said to have the cooperation and financial support of the Moral Majority Foundation, and other right-wing groups interested in perpetuating their conservative agenda through the courts.

Liberals meanwhile are establishing their own organizations to combat the efforts of right-wing factions and are seeking funds through prominent national publica-

tions to do so. One of these is People of the American Way, founded by the television producer Norman Lear and based in Washington.

Sheldon Goldman, a professor at the University of Massachusetts at Amherst, has published a study of the first-term judicial appointments of Reagan and concluded that 98 percent of them are Republican, 93 percent white, 92 percent men and over 20 percent of them millionaires.

At the same time, the American Bar Association, which has evaluated judicial appointments for many years, rated more than half of Reagan's appointees as "exceptionally well qualified" or "well qualified."

Nevertheless, while nobody, not even the president or Attorney General Meese, can foresee how their judicial appointments will vote in the future — any more than FDR could — the fact remains that a most intense campaign is being waged to assure that, as Reagan's power slips in his second term, he will leave behind a federal judiciary he hopes will be faithful to his views.

© New York Times News Service

## Term amendment repeal idea no benefit to Reagan

Syndicated Columnist

**Tom Wicker**

Amendment specifically exempted President Truman, who was in office when it was approved but would have been allowed to seek another term in 1952 had he so chosen.

Reagan's experience in his second term, so far, may be another reason he favors an end to the two-term limitation. Many students of government and politics believe that restriction tends to make a second-term president a "lame duck" since he cannot run a third time and may, therefore, suffer a decline in his ability to promise political rewards and/or punishment while leading his party.

Only President Dwight D. Eisenhower has served a full second term since the 22nd Amendment was passed, and the extent to which he may have had "lame duck" problems still is being disputed. But Reagan, whose landslide victory in 1984 led to perhaps exaggerated expectations for his second term, clearly has been struggling this year.

On the budget, on tax reform, farm legislation, defense appropriations, the MX missile and aid to the anti-Sandinista "contras" in Nicaragua, Reagan has been considerably less successful than he was in dealing with Congress in his first term. Now, his hand is being forced on sanctions against South Africa and trade policy; and the Senate Republican majority leader, Bob Dole, and other erstwhile followers have openly differed with him on Social Security,

voting rights and affirmative action.

One reason for these conflicts and the president's more frequent setbacks clearly is the difference in election prospects; Republican senators face a tough fight to retain their nar-

row majority, with 22 of them up for re-election next year, while Reagan is constitutionally prevented from running again.

## Eloping couple arrested after two-state chase

By The Associated Press

DAINGERFIELD — Two South Carolina teenagers who ran away to get married and allegedly stole two cars — including a sheriff's patrol car — were being held Tuesday.

The pair led police on a wild chase across northeast Texas and southern Arkansas earlier this week before their capture.

The escapade began when the 17-year-old boy and 14-year-old girl from Spartanburg, S.C., ran away to get married in a car South Carolina officials say was stolen.

It ended in Arkansas after the pair was first stopped by a sheriff's deputy in Texas, drove off in his patrol car and finally ran into a roadblock.

Officials say they don't know if the couple ever got married or not.

Brian Keith Lindsey, 17, of Spartanburg, S.C., is charged with escape and unauthorized use of a motor vehicle in Texas and with auto theft in South Carolina. He was being held Tuesday in Morris County Jail on bonds totalling \$75,000, a sheriff's office spokeswoman said.

The 14-year-old girl, who was not identified because she is a juvenile, is in the custody of juvenile authorities, the spokeswoman said.

Early Monday, Morris County authorities in Daingerfield, received a teletype from South Carolina police saying they had a warrant for Lindsey accusing him of car theft.

## STATE

### Bandidos drug supplier gets prison term

HOUSTON (AP) — A Houston man convicted of conspiring to sell methamphetamines and marijuana to a former national vice president of the Bandidos motorcycle gang has been sentenced to eight years in prison.

Warren Curtis James Jr., 43, was sentenced Monday by U.S. District Judge Carl O. Bue. He faced a maximum of 33 years in prison.

James was convicted by a jury in August of seven counts of conspiracy, possession with intent to distribute drugs and using a telephone to commit a felony.

Assistant U.S. Attorney Larry Finder, who sought a substantial prison term, said he was satisfied with the eight-year sentence.

### Garland man gets five years in scam

DALLAS (AP) — A Garland man is facing five years in prison after relatives testified that he kept foil-wrapped bundles of money hidden in a deep freeze, and a federal judge says he will spend more time in jail unless he reveals where other stolen assets are hidden.

Donald Stines, 50, was found guilty of one charge of contempt and was sentenced to five years in prison Monday by U.S. District Judge Jerry Buchmeyer.

In addition, Stines was ordered held indefinitely for civil contempt for his continued refusal to uncover outstanding assets from a silver scam in which his wife bilked about 1,000 investors nationwide out of more than \$10 million.

### New twist develops in extortion killing

SAN ANTONIO (AP) — A banker's wife believed killed by an extortionist may have been expecting a florist to deliver flowers the afternoon she was shot to death at her home, the FBI says.

Rebecca Jo Patton, 42, wife of Castle Hills National Bank President Frank Patton Jr., was called about two hours before she was found slain and told to expect flowers, according to FBI special agent-in-charge Bill Dalseg.

Dalseg said Mrs. Patton was talking to an acquaintance on the telephone when she put the acquaintance on hold to take another call.

He said when Mrs. Patton returned to the line to talk to the acquaintance, she indicated the other call had been from a florist informing her he would deliver flowers.

Investigators believe the supposed florist may have been the killer, Dalseg said.

## Higher cost of colleges leads to new questions about programs

By The Associated Press

AUSTIN (AP) — There was a time in Texas when the Legislature couldn't say no to higher education.

The treasury was flush with petrodollars. High schools were bursting with Baby Boomers. If higher education was good, then a lot of higher education was better.

In 1971, lawmakers created five new campuses. Max Sherman, then a senator from Amarillo, voted against every one of them. He still thinks he was right.

"It seemed to me that the state couldn't afford them all," he said.

With 99 tax-supported community college and state university campuses and four state technical institutes, Texas' system of higher education is perhaps the most diverse and accessible in the nation. Vast and empty as parts of Texas are, almost no one has to drive more than 50 miles to school.

Even after tuition tripled this year, only two states charged less for attending their state universities than Texas.

But as the higher education budget tripled in 10 years, as the cost of educating each student doubled, as the cost of system administration

quintupled and as the product deteriorated in quality, Texans began wondering whether they were getting their money's worth.

In May, the Legislature created a select committee to examine higher education.

"Now that we have completed a total review of public education, I believe it is time we gave higher education the same scrutiny," said Rep. Larry Don Shaw, D-Big Spring, sponsor of the resolution establishing the panel.

"It is a logical next step to take a look at how we are spending our money on higher education."

Higher education costs nearly \$3 billion a year. Only Alaska's expenditures on higher education escalated more than Texas' during the last decade.

Gov. John Connally worried about the cost in 1964 and created a coordinating board to curb expansion. Gov. Dolph Briscoe worried about it in 1975 and asked that duplication be eliminated. Gov. Bill Clements was concerned enough in 1981 to create a Task Force on Higher Education.

Gov. Mark White echoed their distress this year:

"The time when institution after institution was permitted to have program upon program with little regard

for additional costs or proven necessity ended long ago," White said.

"The hard fact is that it is neither possible nor desirable for all universities to offer programs in all fields. This is an unrealistic goal under the best of circumstances and is irresponsible under present conditions."

Texas support two prestigious, nationally recognized research institutions, the University of Texas at Austin and Texas A&M. They pay for a second tier of research institutions, the University of Houston and Texas Tech, and for 33 other senior universities — some upper-level schools, some one-time teacher colleges.

They also pay for such anachronisms as two separate state-funded campuses a mile apart in Denton and another pair of colleges across the street from each other in Houston.

They pay for universities that have persistently failed to attract a viable number of students, like the University of Texas of the Permian Basin, Laredo State University and the University of Houston at Victoria.

They helped finance a \$629 million building boom that left campuses with so much space that at peak use, only 70 percent of classrooms were occupied. On Friday afternoons, occupancy is less than 40 percent.

Savoy Condominiums Presents

## "The Typical Pre-Med Major"

There are a lot of Stereotypes at Tech—Candice Kildare, Missy Ozone, Moose Letterman, Jonathan Hawthorne Billingsley III ("Chip" Frat Rat) . . . and now the distinctive Savoy Homebuyers.

They're exceptionally smart . . . recognizing a premier location and a condominium with the tax and investment opportunities of homeownership. Just across the street from campus at Jones Stadium, Savoy homeowners are minutes away from choice entertainment, the best shopping or a late-night bite. Their favorite sorority and fraternity houses are also nearby! Not to mention a complete array of fantastic features

at home: a sparkling pool and cool fountains with inviting tanning area, refreshing spa, off-street parking, satellite television dish system, cozy fireplace, time-saving microwave oven. And full-size washer and dryer package. And, of course, enough space to share with good friends! Shake the label put on you—join the truly exceptional types at Savoy Condominiums.

# Red Cross heads local Mexico City relief effort

By NATALIE BOYLE  
University Daily News Reporter

The South Plains Regional Chapter of the American Red Cross has begun making disaster welfare inquiries for friends or families of people living in areas of Mexico struck by last week's earthquakes.

The Red Cross also is looking for volunteers to help man telephones for the inquiries. Anyone interested in volunteering time can contact the Red Cross at 765-8534.

"We would greatly appreciate anyone who could volunteer time to help answer phones," said Carl Hill,

South Plains Regional Chapter public relations director.

The national American Red Cross already has contributed \$250,000 to the Mexican Red Cross for the purchase of medical supplies, clothing and food for disaster victims.

"We are supplying disaster equipment such as tents, cots and water purification equipment," Hill said. "Clothes and medicine will be bought locally. We are trying to help by providing supplies and support for the economy."

Disaster welfare inquiries will be made through the Amateur Radio Emergency Service, Mexican ham

operators and the Mexican Red Cross.

The South Plains chapter had received about \$2,000 in contributions from area residents as of Monday afternoon.

"People have been extremely generous in offering monetary contributions in addition to food and clothing," Hill said. "Agencies will not be sending food or clothing; it will be purchased locally to help the local (Mexican) economy."

Nationally, the American Red Cross has sent a team of specialists

into Mexico to assess the damage and what they can do, Hill said. Members of the team include a communications specialist, a damage assessment specialist and a medical specialist.

"The team will confer with the Mexican Red Cross and the Mexican government to see what type of assistance they need," he said.

Anyone wishing to make contributions should send checks to the local chapter of the American Red Cross at 2201 Ave. X, Lubbock 79411. The local agency will forward it to the Mexican Red Cross.

## Media's earthquake coverage exaggerated

By CHIP MAY  
University Daily News Reporter

Media coverage of the two Mexico earthquakes has been exaggerated, but the earthquakes have left much damage, according to Robert Bravo,

a Texas Tech professor of Spanish. Bravo, originally from Guadalajara, said he is familiar with Mexico City. None of his relatives were in-

jured, but he said some of them visited sites in Mexico City where buildings were demolished.

"Yes, I think media coverage was exaggerated, but in the beginning there was no appraisal of damages," Bravo said. "It was a major disaster because many buildings were demolished, but not as many as was thought in the beginning."

Bravo said the crumbled buildings are located in the inner section of Mexico City. A Texas Tech student tour program visits the inner section every summer, he said.

Although the epicenter of both earthquakes was located in the Pacific Ocean, many buildings were destroyed in Mexico City because the city is built on top of dry lakebeds, according to Mexican officials. The lakebeds increased the severity of the

earthquake, the officials said.

Some cities located closer to the epicenter appear to have little or no damage, Bravo said.

"Acapulco is much closer to the ocean and didn't seem to suffer any damage," he said. "Some cities located near the ocean did have a lot of damage, but you don't hear much about them. Maybe the press is focusing too much on Mexico City."

Bravo said some of the media reports of the earthquakes are exaggerated when a person takes into account the size of Mexico City. Out of a city of about 18 million people, the inner section is a very small part of Mexico City, he said.

"In Tlateloco, a complex of many huge buildings in the inner section, only one building collapsed," Bravo said. "The Hospital Juarez also col-

lapsed, which is the best publicly supported hospital in Mexico City. Other well-known buildings that collapsed are the Hotel Regis and the Nuevo Leon building.

"I guess the design of the buildings in some places, you can see buildings that are standing next to demolished buildings."

Bravo said a Tech student group toured in the summer some of the buildings that were destroyed by the earthquakes.

"We go to Mexico City for 4½ days during the tour and visit historical and archaeological sites," he said. "Many of the sites we tour are located in the inner section. I guess part of our tour next year will be pointing out places where buildings were destroyed by the earthquake."

### Asking for relief

KLFB-AM personnel Joe Davila, left, and Mickey Renteria, right, urge listeners to contribute to the Mexico City relief effort. KLFB is broadcasting live from the local Red Cross office on Avenue X.

## Tech team registers Mexican earthquake

By LINDA BURKE  
University Daily News Reporter

Texas Tech got its own seismographic reading last week of the earthquake that extensively damaged several cities in Mexico. Geosciences professor Deskin Shurbet said seismograph equipment on campus picks up earthquakes every day.

"There are about one million earthquakes per year, but usually not more than one or two the size of the Mexico earthquake," he said.

Shurbet said the Texas Tech University main campus and the Junction Center satellite campus each have a seismograph. The Junction Center seismograph also picked up the Mexico earthquake, he said.

"The one here on campus is in a small building between the chemistry and science building," he said.

The seismograph, Shurbet said, has been on campus since 1948.

"We get earthquakes every day worldwide," Deskin said. "We're not interested in the earthquakes themselves, but we use the waves to study the inside of the earth."

He said the machine also is equip-

ped to pick up nuclear explosions. "An earthquake and a nuclear explosion make similar vibrations in the earth," Deskin said.

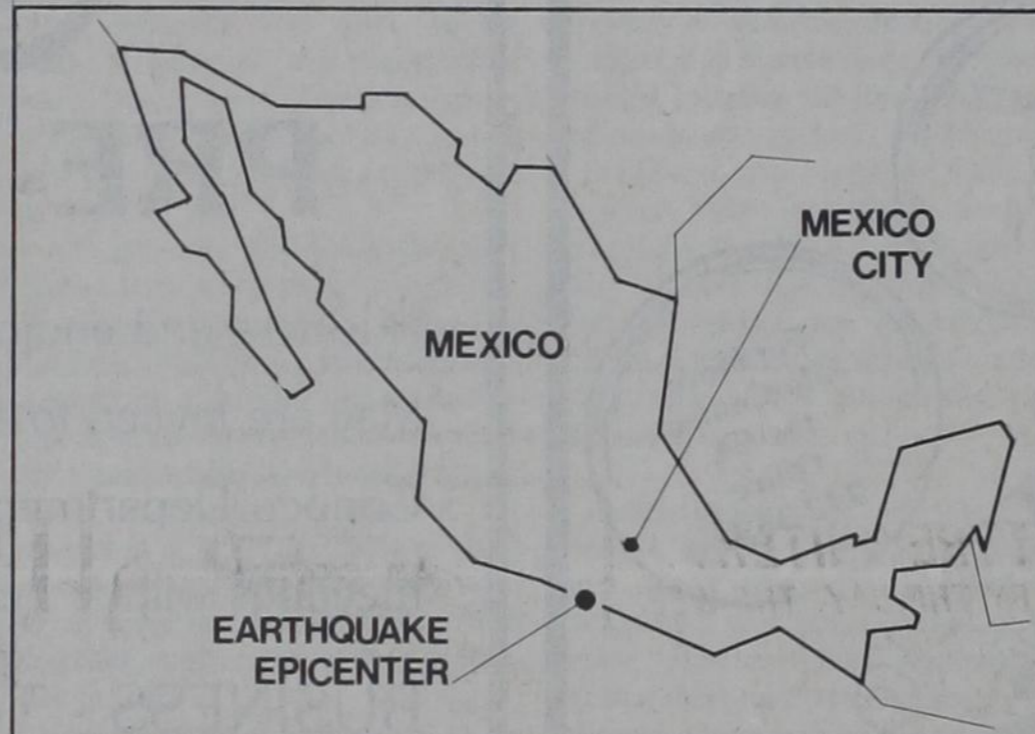

He said the seismograph equipment on both campuses is used by professors and students as a training and research tool.

"We take readings 24 hours a day and record the waves on photographic paper and develop them every day."

Deskin said the seismograph equipment on the main and Junction Center campuses are two of 125 in a worldwide network.

"The purpose of the network is to record and locate as many of the earthquakes as we can," he said. "Other seismologists are researching the results to learn to predict earthquakes. My main purpose is to research the internal structure of the earth."

Cleanup efforts are continuing in Mexico City and in several other Mexican towns leveled by last week's earthquake, which originated in the Pacific Ocean. Searchers still are hoping to find survivors under rubble, but the projected death toll will be well into the thousands, reports indicated.

## Air traffic continues

By DAVID CORTES  
University Daily News Reporter

Airline flights departing from Lubbock to Mexico City have been on regular schedule since Saturday, according to Bob Smith, a representative of American Airlines.

American Airlines, the only airline to fly direct from Lubbock to Mexico City via Dallas, flies three daily flights to Mexico City out of Lubbock. All flights were canceled Thursday but resumed with one flight Friday, Smith said.

"Last Friday we flew a DC-10 from Lubbock to Mexico City (via Dallas)

and returned without refueling. Their airport has had problems refueling planes," he said.

Travel agencies, however, are recommending that people postpone travel plans to Mexico City because of the disruption in public services such as inadequate water supplies.

"Reservations can be made to get in and out of the city, but we're not encouraging imminent vacations," said Diane Mitchell, manager of Envoye Travel at 1500 Broadway.

Mitchell said other cities in Mexico approved for travel include Cancun, Cozumel and Puerto Vallarta.

## Relatives in Mexico get news to students

By FRANK BASS  
University Daily News Reporter

The devastating earthquakes and aftershocks that shook Mexico last week disturbed not only swimming pools as far away as Houston, but affected lives as near as Texas Tech.

While the earthquake's death toll is not as high as originally believed, two Texas Tech students with relatives in Mexico experienced some disquieting moments last week as they waited for word from loved ones.

Michael Galbreath, a Tech senior from California majoring in economics and advertising, said despite having a sister visiting Ixtapa, he was not worried by the earthquake.

"Even though Ixtapa was very near the epicenter of the quake, the city's built on rocks," he said. "That's the main reason why Ixtapa didn't get hit as hard as Mexico City, which is built on a dry lake bed."

Galbreath's family in Amarillo received a phone call from his sister Saturday night from the San Diego airport.

"We really weren't all that worried," he said. "She was staying in a

two-story hotel, which was a good thing, after seeing what happened to all the high-rises in Mexico City."

"Besides," he added, "I grew up in Southern California, so I'm a little more used to quakes."

Another Tech student with relatives in Mexico City is Doug Pincu, a senior theater arts major from Dallas.

Although Pincu's great-aunt, who lives in Mexico City, has been unable to reach Pincu's family directly, he said relatives living in Vancouver, Canada, received a telex from Mexico reading, "Todos bien," or "All well." "At first, I wasn't too worried," Pincu said Monday. "I thought I would give it some time and see what developed."

But he said that as details slowly filtered in from the damaged areas, he became more concerned.

"The first reports were sketchy," he said. "The more details I heard, the more worried I got. We'd heard the city had been leveled, and that really was my first impression, one of total destruction."

"They made it sound like the entire city of Mexico had collapsed."

Mark C. Mamawal/The University Daily

### Hamming it up

Tech ham radio operators Gerald Spillman, foreground, Tim Wetzell and Ron Cole attempt to make contact with operators in Mexico to relay messages from the Red Cross. The Tech radio operation is located at the Antenna Farm west of the Health Sciences Center.

## Tech radio buffs relay messages to Mexico

By LINDA BURKE  
University Daily News Reporter

Members of the Radio Amateurs of Texas Tech, in a consolidated effort with ham radio operators in Lubbock and the Red Cross, have been transmitting messages to earthquake-stricken Mexico City.

Gerald Spillman, a graduate student and president of the radio club, said members have been handling radio traffic for relatives in the local area to get messages to relatives in Mexico City.

"We put messages in the

system, and they travel through to Mexico City, where the operators there take the message and phone us if they have power or send the reply back through the system until it gets back to us," he said.

"Monday night we sent eight messages, and it took an hour to get the replies."

The operators also monitored some European transmissions from people wanting to know about relatives in Mexico City, he said.

"This is the first time I've ever been involved with anything like this," Spillman said. "Last night

(Monday), we were talking to a person in a town near Mexico City. The town had power, and he was able to relay the messages we transmitted to people in Mexico City via hand-held, walkie-talkie type radios."

Spillman said the 12-member Tech group has been monitoring radio traffic since the first earthquake occurred Thursday. "When we first started, it took two hours just to get on the system because of all the people on it," he said.

The operators have a facility at

the antenna farm, a building owned by the electrical engineering department. The building is located west of the Texas Tech University Health Sciences Center.

Spillman said some supply requests still were coming over the radio waves from Mexico, but most of the transmissions now are inquiries about relatives in Mexico.

"There are about 30 or 40 ham radio operators in Mexico City now relaying messages," he said.

## Ham operators gather news for Red Cross

By FRANK BASS  
University Daily News Reporter

Members of the Amateur Radio Emergency Service (ARES) began last week to coordinate efforts with the South Plains Regional Chapter of the American Red Cross in Lubbock to find missing relatives as Mexico slowly began to recover from two earthquakes.

Shortly after reports of the first earthquake reached Lubbock

Thursday, members of the group took to their radios to monitor messages coming out of Mexico.

"All of the messages were coming from Mexico for the first 24 or 48 hours after the quake," ARES Lubbock County Emergency Coordinator Denny Garrett said Tuesday. "There were mostly requests for food, money, medical supplies and heavy equipment."

Garrett said efforts to find lost and missing relatives of persons in Lubbock began only in the past two

days.

"Right now, we're accepting only requests on immediate next-of-kin," he said. "We should be hearing a lot more over the next 72 hours from people in Mexico City."

Garrett said members of ARES have been helped by Radio Amateurs of Texas Tech in reaching persons in Mexico City.

"We have about 15 or 20 radio operators in Lubbock working on it right now," he said. "Nationwide,

I'd be frightened to give an estimate of how many radio operators are working on this, but I'd guess about 20,000 or 25,000."

Carl Hill, director of public information at the South Plains Regional Chapter of the American Red Cross, said members of ARES and Radio Amateurs of Texas Tech have been helpful.

"As far as I know, we're the only group in Lubbock helping people to find Mexican nationals," he said.

# Hall association lists cable, coed living as goals

By JAN DILLEY  
University Daily News Reporter

Coed living, cable television and improved parking conditions are three issues the Texas Tech Residence Halls Association will consider this year, said Cathy Peterson, RHA president.

Each of the 19 residence halls on campus is a member of RHA, a student organization composed of representatives elected by each dorm. "RHA's purpose is to help hall councils to communicate together," Peterson said. "They usually face similar problems, such as changes from renovation and officer conflicts, and we try to help them pool their

resources.

"One of our major goals this year is to develop some new programs and to change a few of our old ones. We've started a new programs development committee to try to get some variety. We'd also like to establish better relations with other student organizations, especially the Student Association," she said.

In addition to determining the feasibility of suggestions from individual dorms, the RHA studies problems shared by every hall. "Parking is one problem all the halls have," Peterson said. "The way things are now, after 5:30, anyone can park in the dorm lots — not just residents with dorm stickers on their cars.

"Some people with dorm stickers will go out at night, and when they return, there aren't any spaces because there are commuters and others who don't have to move until 7 a.m. Students are asking for 24-hour parking, something like 24-hour reserved."

Peterson said the RHA and the housing office are considering the possibility of introducing coed living to the Tech residence hall system. "From what we know, all the other big state schools have some form of coed halls," she said. "I think UT (University of Texas at Austin) has it every other door. Here, we'd be looking for every other floor."

On-campus cable television access

is another area the RHA plans to research. Starting such a system would require the approval of the users, however. "When it gets right down to it, the question is, 'Would you be willing to pay more for it?'" Peterson said.

"This is not something I think you could put in one room and not in the others; I don't think the cable companies would go for that. It would have to be put in every room."

Continuing to improve communications between residents and the RHA via each dorm's hall council is another goal Peterson said she would like to achieve.

"This semester, I think residents maybe have a better knowledge of

what RHA does," she said. "I think students are beginning to realize what it is. We provide a lot of services to them. We deal with not just social activities, but also with issues like visitation."

Last fall, a new visitation policy went into effect after several years of work by the RHA. Under the new rules, visitors are allowed in the dorms nine hours, five additional hours each day. "The RHA worked on the changes for two or three years before it finally went through," Peterson said. "They had to submit proposals, meet with the Board of Regents and compromise before they came up with a reasonable visitation policy."

Within the past few months, several changes have taken place in halls around the campus.

"Probably one of the major things students are noticing is the renovation of all the cafeterias," Peterson said. "They look really nice with new carpet and ceiling fans."

In addition to the physical improvements, there have been changes in the food available in the dining halls. Along with the regular menu, some of the dorms now offer special foods during the school week. Visitors to Hulén-Clement's dining hall may get their meal from the deli line, while Stangel-Murdough serves Italian food and Horn-Knapp has an Oriental line, Peterson said.

## MOMENT'S NOTICE

### FASHION BOARD

The Fashion Board will host a meeting at 5:30 p.m. today for pledges, 6 p.m. for executive board and 6:30 p.m. for members in 75 Holden Hall.

### PASS

Programs for Academic Support Services will host the workshop "Overcoming Math Anxiety" and the study skills group "Setting and Achieving Study Goals" at 4:30 p.m. and 7 p.m. respectively today in the basement of the administration building.

### AREA 10 TOASTMASTERS

The Area 10 Toastmasters will host a humorous and evaluation competition at 7 p.m. Thursday in the UC Senate Room.

### RECREATION AND PARK SOCIETY

The Student Texas Recreation and Park Society will host a meeting to discuss business at 6:45 p.m. today in 113 plant science building.

### CHESS CLUB

The Chess Club will host its meeting at 7 p.m. today in the UC snack bar.

### STUDENT COUNCIL

The College of Education Student Council will host a rush party for interested new

members at 5:30 p.m. Thursday in 151 student room education building.

### PUBLIC RELATIONS

The Public Relations Student Society of America will host its first meeting at 6:30 p.m. today in 111 mass communications building.

### OMICRON DELTA KAPPA

Omicron Delta Kappa applications are due between now and Oct. 11. These may be obtained in 103 Holden Hall between 8 a.m. and 4 p.m.

### WELFARE ASSOCIATION

The Social Welfare Association will host a meeting at 7 p.m. Monday in 154 Holden Hall.

### CATHOLIC STUDENT ASSOCIATION

The Catholic Student Association will host a fellowship at 8 p.m. Thursday at the Catholic Student Center at Broadway and Ave. W.

### RUGBY CLUB

The Texas Tech Rugby Club will watch the highlights of the Odessa game at 8 p.m. today at Mr. Gatti's on University Avenue.

### AMERICAN ADVERTISING FEDERATION

The American Advertising Federation will host its first meeting at 6 p.m. Thursday in 111 mass communications building. New members are welcome.

# Farm/ranch crisis conference begins today

By MARLENE ELLIS  
University Daily News Reporter

Issues concerning the farm and ranch crisis will be addressed in a conference beginning at noon today in the senate room of the University Center.

"It is a specific conference to address the plight of farmers in today's world and the whole question of hunger in the world," said Ulrich Goebel, chairman of the department of Germanic and Slavic languages and faculty sponsor for the conference.

Speakers at the conference are the Rev. Arthur Simon, Charles Kanten, Ann Friemel and the Rev. Stephen Byrne. The conference will be from noon to 9 p.m. today and from 9 a.m. to 2 p.m. Thursday. The registration fee of \$20 includes dinner today and lunch Thursday.

Simon is the founding executive director of Bread for the World, a Christian citizens' movement on world hunger. He won the 1976 National Religious Book Award for his book "Bread for the World," which Nobel prize economist Gunnar Myrdal described as a "clear and convin-

cing" analysis of world hunger.

Kanten is director of rural ministries in the Division for Life and Mission in the Congregation of the American Lutheran Church and teaches at Luther-Northwestern Seminary in St. Paul, Minn.

A Texas Tech alumni, Friemel works with children of divorced parents and has done court-ordered social studies in the Texas Panhandle.

Byrne, pastor of St. John Lutheran Church in Winters, is interested in the problems of rural family and community stress as well as the quality of

rural life.

American entertainers not only have worked to reduce world hunger with benefit concerts and albums but are taking interest in the declining numbers of farmers in the United States.

According to Associated Press, the \$50 million promoters hoped to reap from the FarmAid concert, organized by Willie Nelson, was far from harvested Tuesday, fueling speculation that some viewers may have been offended that politics were injected into the benefit concert.

PLENTY OF GOOD SEATS AVAILABLE

# O'Toole unable to save movie

By ERIC STEELE  
University Daily Lifestyles Reporter

It's amazing that Peter O'Toole can manage to turn a movie with a bad script, misguided plot and mediocre acting support into a movie that's, well, almost worthwhile. Then again, O'Toole is an amazing actor — one of the few capable of salvaging a movie this poor.

In "Creator," O'Toole plays Dr. Harry Wolper, an eccentric faculty biologist who attempts to bring his dead wife back to life through experiments conducted in a backyard shed. He is a scientist who still believes in, as he puts it, "the big picture." He rejects the pragmatic trappings of the science world, focusing instead on humanity, love and religion. It makes for the type of bizarre character O'Toole excels in portraying.

Dr. Sidney Kuhlbeck (David Ogden Stiers) is a faculty nemesis who represents all that Wolper doesn't. He resents Wolper's attitude and wishes to force his transfer to a different university.

In between it all (and this is where the film loses itself) is Wolper's

graduate student, Boris (Vincent Spano), and his girlfriend Barbara (Virginia Madsen). They become involved in a romance that eventually destroys the film's interesting beginnings. The first half of "Creator" stands as a pleasant, light-hearted comedy that at least was headed in the right direction. This makes the grossly predictable and, worse yet, overdramatic ending unfortunate.

Barbara lapses into a coma and is given little hope to live. In fact, her parents consent to having the plug pulled on her. So instead of watching a nice ending to a nice comedy, the audience must sit through scenes that feature Boris talking, reading and sobbing at his lover's bedside. The notion of Barbara being on the verge of death is shoved down the viewer's throat with not one, but two occasions when she is seconds away from have the plug pulled on her life-support systems. So much for light-hearted comedy.

Marcel Hemingway is respectable in her portrayal of Meli, Wolper's essential helper in his wife-back-to-life experiment, but the relationship they develop seems out of place. Meli isn't

a Hemingway-type role yet, she seems relatively comfortable in the part, which is a credit to her versatility.

The relationship between the philosophizing Wolper and his graduate student develops into some of the better moments in the movie. Boris discusses struggling questions about religion, love and the "big picture." Wolper always speaks with elegance: "Some day when science peers its head over the mountains, it will find religion ... sitting alone."

But "Creator" could have (and should have) been a much better film. O'Toole's character is humorous and well-delivered, David Ogden Stiers is excellent and the premise of the cold world of science versus the freedom of spirit is engaging. The sub-plot relationship between Boris and Barbara is terribly misplaced as the focus of "Creator."

"Creator" may be worth your money if you appreciate O'Toole's talents as an actor or enjoy tear-jerking, verge-of-death scenes. Otherwise, steer clear of this one.

## Hitchcock double feature

"Dial M for Murder," starring Ray Milland and Grace Kelly, will be the first half of tonight's Alfred Hitchcock double feature. "The Birds," starring Rod Taylor and Suzanne Pleshette, will complete the double dose. The first feature begins at 7 p.m. at the Allen Theater. Admission is \$2 with Tech ID.

# Superstition can be bad

By The Associated Press

Superstition is like an insurance policy. It is comforting to have but — knock wood — may never be needed, while for others it becomes compulsive and destructive.

A survey conducted by the National Institute of Mental Health and reported in the October issue of *Cosmopolitan* finds that between 2,270,000 and 4,540,000 Americans suffered a compulsive disorder within the past year.

For many people, superstition is harmless indulgence in magic such as rabbit's feet and four leaf clovers. Others invent their own superstitions.

"If wearing a lucky bracelet to an interview makes you feel confident, do it," said Barbara Powell, a psychologist. "The danger point is reached when that innocent superstition begins to control you. Suppose you lost the bracelet. If you were unable to go to the interview as a result, your superstition would be harmful."

# Red Raiders gird for Baylor's tough 4-4 defense

Kevin Brinkley/Student Publications

### Over the edge

Texas Tech halfback Gerald Bean hurdles North Texas State cornerback Jerry Pickens Saturday in the Red Raiders' 28-7 victory at Jones

Stadium. Bean gained 20 yards and scored a touchdown. Tech, now 3-0, plays Baylor in Waco Saturday on regional television.

By MICHAEL CORBETT  
University Daily Sports Reporter

One of the major tasks Baylor coach Grant Teaff faced Saturday against USC was finding a way to stop the Trojans' famed sweep pitch. Teaff's answer was a 4-4 defense, which allowed him to use four linebackers at the same time.

It worked well enough for Baylor to upset then-No. 3-ranked USC, 20-13.

Texas Tech coach Jerry Moore believes the Bears will use the same strategy Saturday when Tech faces the Bears in Waco in the Southwest Conference opener for each.

"I think we'll see it (the 4-4) this week. It's really not something new. They used it against Georgia and Wyoming, too," Moore said.

USC had success passing against the 4-4 defense, and Moore said Tech might attempt to do the same.

"It all depends on how they play their man-to-man coverage," Moore said. "We'll pass more if their coverage isn't that tight. But with single coverage, they won't have good run support behind the line. We'll just have to wait and see what it looks

like."

On the offensive side of the field, Baylor will present one of the biggest offensive lines Tech will face this season. Tech defensive coordinator Spike Dykes admits his players will be challenged.

"Baylor's line is big and tough. They have some talented people, so we will have to be ready," Dykes said.

Moore said freshman quarterback Travis Price probably will get more playing time after his strong performance against North Texas State.

"We have more confidence in him now after his performance, and he has more confidence," Moore said. "We're going to play it by ear and see how it goes. It will depend on the situation."

Moore said junior halfback Timmy Smith also should see more playing time against Baylor.

"Timmy will play more this week. He didn't play that much Saturday night because he wasn't ready," the coach said. "Timmy somehow reinjured his knee when he stepped in a hole while walking across campus (last week). He missed practice on Tuesday and Wednesday and just wasn't prepared to play."

Moore said Robert Grimes will be the Raiders' punter against Baylor after the junior started against New Mexico and North Texas State. Kevyn Williams punted at Tulsa but has had knee problems.

"We'll use Grimes this week," Moore said. "Kevyn's knee is still sore, and we don't want to aggravate it any more. Kevyn will probably get to punt later in the year."

**MOORE NOTES:** Defensive tackle Artis Jackson sprained an ankle Tuesday in practice, but trainer Ken Murray said the injury was not serious and that he expects Jackson to be at full strength by Saturday for the Baylor game. Moore said there were no other injuries.

## TCU suspends player for violations

By The Associated Press

FORT WORTH — Ron Zell Brewer, a senior on the Texas Christian University football team, was suspended Tuesday after saying he had been receiving cash payments in violation of NCAA rules, coach Jim Wacker said.

The reserve tight end from Dallas was ruled immediately ineligible

after coming forward to TCU coaches with the information, Wacker said.

Brewer was the seventh player to be suspended since Thursday amid allegations of recruitment practices that violated National Collegiate Athletic Association rules.

Brewer was recruited in 1981 under the school's previous football coaching staff and spent the 1984 season as a redshirt.

Former Texas Christian quarter-

back Anthony Gulley said cash payments by boosters to TCU football players were common knowledge among team members under former coach F.A. Dry, and another player said the payments were widespread.

TCU officials called for an investigation Thursday after Wacker dismissed six players from the squad, including star running back Kenneth Davis, for taking illegal cash payments from boosters.

PRESENTS

## "Pick-a-Winner"

Pick The Winners and win up to

**\$25<sup>00</sup> Cash**  
or food prizes  
Here's how to play.

1. Circle the team name you pick to win. Then pick an actual score for the tie-breaker game.
2. Take the entry form by any Lubbock Taco Bell. See addresses below. No purchase necessary to enter and you may enter as many times as you like. Your ballot must be at Taco Bell before 6:00 p.m. on the Friday preceding the games listed on the ballot.
3. Winner will be determined by number of winning teams correctly picked. In case of a tie, the person who picks closest to the actual score on the tie-breaker will be the winner. If a tie still exists, the money will be divided equally.
4. Print name, address and phone on entry form. Winner's name will be printed in the following weeks' entry form. Entry forms will be available in every Wednesday edition of the University Daily.

**LAST WEEKS WINNER: TODD DENTON**

Ambush the Aggies Fun Run		Oct. 4

## New activities update

### Rugby

The Texas Tech Rugby team battled to a 4-4 tie last Saturday against a much more experienced Odessa Maddog squad. Tech scored on an outstanding run by Scott Clary. According to coach Nick Mongero, Tech was able to stay in the game because of the excellent kicking by Steve Mitchell.

A crowd of about 150 people weathered the dreary conditions to watch the game. For those interested, the game will be shown on video at 8:30 p.m. at Mr. Gatti's. Members of the Tech club will be on hand to discuss the game.

Tech's next action will be Saturday, Sept. 28 against Southwest Texas in San Marcos.

### Soccer

The Tech Soccer trip completed a successful road trip to Colorado last weekend coming home with one win and a tie against nationally ranked varsity squads.

On Friday, Tech outplayed the University of Colorado 3-0. On Saturday, the Tech squad had powerful Regis College down 2-0, but Regis rallied to tie 2-2 at the end of regulation. After a scoreless first overtime, Tech went up 3-2 in the second overtime before allowing a goal with 20 seconds remaining to end the game 3-all.

Worn out from the travel and competition, Tech dropped a 1-0 decision to the University of Denver on Sunday. Both Regis and Denver are varsity teams whose coaches said that Tech's club gave them as good as competition as they have played this year.

Tech returns to action at home this Saturday on the Sports Club Field south of the Rec Center.

## Women's cycling scheduled

Women who ride bicycles or are interested in riding should join the women who ride on Mondays at 5:15 p.m. in front of the Aquatic Center for 15-20 mile rides. For more information call 742-3351.

## Pool will temporary close

The Recreational Aquatic Center will close Thursday, Sept. 26 for approximately eight days so that work may begin on erecting the air supported roof. Weather permitting, the pool should reopen for open swim and physical education classes on the weekend of October 4 and 5.

The roof structure, once inflated, allows the 30 meter outdoor pool to be an enclosed indoor facility suitable for year around swimming. Students interested in working this weekend on the pool top erection should contact Christy Cotton at 742-3897

## Injured clinic planned

The sports medicine injury clinic with Dr. Robert Yost of the Texas Tech Medical School will begin tonight. The clinic schedule is from September 25 to December 11. It begins at 7 p.m. every Wednesday in Student Rec Center, Room 201.

Dr. Robert Yost, orthopedic surgeon and leading authority in sports medicine, is offering his services free of charge to students, faculty, and staff. The purpose of this clinic is to educate students concerning athletic type injuries that could have occurred while participating in some form of recreational or athletic activity. Dr. Yost will examine a limited number of persons with these types of injuries each week. In addition, he will conduct a seminar four times during the semester dealing with different sport related topics.

All injury clinics are free and open to anyone eligible to enter the Rec Center. It is a unique opportunity to have Dr. Yost available to students on a regular basis. For further information, contact the Rec Sports Office at 742-3351.

## IM BRIEFS

### Tennis leagues begin

Registration is being held in the Rec Sports office, Room 202 in the Student Rec Center. Leagues will play on Tuesday, Wednesday and Thursday evenings. Times are 4:30, 6:00 and 7:30 p.m. There are leagues in the following divisions: men's and women's A and B, and men's campus community. Persons are guaranteed three matches in four weeks and the top two from each league advance to the finals Sunday, Oct. 27.

### Women's canoeing scheduled

From 5:30-7:00 p.m. on Thursday, women's canoeing will be conducted at Maxey Park Lake (look for the canoes) on 24th and Quaker (behind St. Mary's Hospital). Canoes, paddles, and life jackets are provided. Wear shoes that can get wet. Please register by calling 742-2949.

### Golf tournament slated

Men's and women's golf singles tournament will be held September 28, at Meadowbrook Golf Course or MacKenzie State Park. Tee off times will begin at 1 p.m. sharp.

This will be an eighteen hole low gross stroke tournament played by USGA rules. No pick-up holes allowed. Tee-off time will be given at the time of entry.

Equipment may be checked out of the SRC Equipment Room. Please bring your I.D. You must provide your own golf balls. A \$7 fee must be paid to Meadowbrook at check-in. Entry dates are Sept. 17-19, in the Rec Sports Office from 8-5.

Results will be available Wed., Oct. 2, in the Rec Sports Office.

### Physically Fit Techsans register

Registration continues for the physically fit program. The purpose of this program is to encourage Techsans to exercise regularly and practice healthful living habits. Cumulative points totals are kept by Rec Sports and if your goal is reached, receive a T-shirt for your merits at the end of the semester. Registration concludes October 4, in the Rec Sports office, Room 202. There is a \$4.00 fee.

## Outdoor Photography

Tuesday, October 1

Room 205, Student Rec Center

7:00 p.m.

## Recreational Sports Sponsors Runs

The "Ambush the Aggies" Run is Friday, Oct. 4. There will be no registration the day of the race.

The race will begin at the north entrance to the student Rec Center, circle the recreation area to Flint and continue to the coliseum. At this point, two mile runners will go to the Tech Freeway and return to the Rec Center. Four milers will to east at the coliseum until they past Jones Stadium. Runners will then go south to Memorial Circle, past the University Center, and continue to the Rec Center for the completion. Maps will be available.

A long sleeve T-shirt will be given to all runners for a \$4 fee. Entries will be accepted in person at the Rec Sports Office, 202 Rec Center, Monday through Friday, from 8 a.m. to 5 p.m. Mailed entries accompanied by the \$4 entry fee, should be addresses to Recreational Sports, Box 4390, Texas Tech University, Lubbock, Texas, 79409. Deadline for all registration is

information, call 742-3351.

## Frisbee Extravaganza Begins

The Frisbee Extravaganza, an ultimate frisbee tournament and a frisbee golf tournament, are scheduled for this Saturday. Any student, faculty, staff or spouse is eligible to participate.

Frisbee enthusiasts should fly high this weekend in the Orlando's Frisbee Extravaganza. Saturday's event is Ultimate Frisbee. Teams of seven score points by crossing the goal line of a football field. The frisbee must be passed from player to player. Starting time is 10 a.m.-entries are due Thursday at 5 p.m. in the Rec Sports Office. Orlando's Italian Restaurant will award a team dinner to the winning

team; each player of the second place team will receive a small pizza.

Sunday's play will be for individuals as frisbee golf is the game. Tee-off times begin at 12:30 and the course will be 25 holes of the Rec Sports course. Course maps are available in the SRC. The winner receives an AM/FM cassette personal stereo from High Fidelity compliments of Orlando's along with dinner for two at Orlando's. Second place will receive dinner for two and third, a large pizza from Orlando's. All entries are due Thursday in the Rec Sports Office.

# Tigers remain No. 1; Iowa climbs to No. 3

By The Associated Press

AUBURN, Ala. — The fact that Auburn has been the nation's No. 1-ranked college football team for three straight weeks doesn't have coach Pat Dye turning cartwheels. "Right now, it's just an advantage if we go undefeated and (runner-up) Oklahoma goes undefeated," Dye said Tuesday at his weekly news conference. "If I knew that would happen, I'd say it was great. But I don't see us going undefeated."

"In fact, the best-looking team I've seen has already lost a game. Maryland (No. 17 and winner of two straight after losing to Penn State) is a powerful, powerful football team. They looked awfully strong the way they manhandled West Virginia (28-0 Saturday night)."

Auburn and Oklahoma both were idle last weekend but remained 1-2 in The Associated Press poll for the third week in a row Tuesday. Southern California was upset by Baylor and plummeted from third to 18th.

In addition, South Carolina and Illinois, No. 15 and 20, respectively, last week, dropped out of the Top Twenty after suffering crushing defeats, while Air Force and Virginia made the rankings for the first time this season.

Auburn, 2-0, received 26 of 57 first-place votes and 1,087 of a possible 1,140 points from a nationwide panel of sports writers and sportscasters. The Tigers visit Tennessee Saturday. Oklahoma, which will become the last major-college team to play a game when the Sooners visit Minnesota Saturday night, received 21 first-place votes and 1,076 points.

With Southern Cal losing to Baylor 20-13, Iowa moved from fourth place to third with five first-place votes and 1,008 points by trouncing Northern Illinois 48-20.

Florida State and Ohio State, sixth and seventh last week, climbed past idle Southern Methodist, which slip-

# Hogs' QB gets top player honor

By The Associated Press

LITTLE ROCK, Ark. — If the game was "Jeopardy" and the category was University of Arkansas sports, the answer would be Sept. 21, 1985. The correct question would be: When did quarterback Greg Thomas prove he could throw the football?

On Saturday night, Thomas hung up some productive numbers — not Brigham Young numbers, but enough to get the attention of a defensive coordinator preparing for the Razorbacks. Thomas completed seven of 12 for 82 yards and a touchdown.

He had three passes dropped, was clobbered on the other two attempts, had a 32-yard scoring pass called back because of a penalty and did not

attempt a pass in the second or fourth quarter as Arkansas beat Tulsa 24-0.

Last year, with Brad Taylor and Danny Nutt at quarterback, Arkansas opponents could lay back and play the pass. Thomas, a sophomore who didn't throw a pass as a backup in 1984, had a reputation as a runner, but his passing was suspect.

"When you've got a complete quarterback, a guy who can throw and run, the defense can't load up to stop one thing," said David Lee, the quarterback coach at Arkansas.

For his performance, Thomas was named The Associated Press Offensive Player of the Week in the Southwest Conference. Linebacker Ray Berry, instrumental in the Baylor Bears' 20-13 victory over third-ranked Southern California, is

Thomas Berry

the SWC Defensive Player of the Week.

In his first start, Thomas led the Razorbacks in rushing with 115 yards against Mississippi but completed only three of 10 for 22 yards.

Thomas came out of San Angelo as a 160-pounder. He added 18 pounds before reporting as a freshman and plays at 184. He gained 94 yards on 13

attempts against Tulsa, but lost seven on a bad pitch and was sacked for losses of 10 and 3 yards while trying to pass. Still, his 74 yards led the team.

Lee said Arkansas ran the option 22 times and that Thomas made the correct read on 18 occasions.

The first touchdown pass of his college career was a 16-yarder to Donnie Centers and put Arkansas ahead 7-0. Thomas started left, set up and threw the width of the field to Centers in the end zone.

In a 13-play drive that covered 84 yards and ended in the Razorbacks' second touchdown, Arkansas faced second-and-17 when Thomas went back to pass. "It was a screen and they covered it," Lee said. "He just pulled it down and outran everybody."

# Ueberroth seeks drug testing from players

By The Associated Press

NEW YORK — Baseball Commissioner Peter Ueberroth on Tuesday asked major league players to voluntarily submit to drug testing. The players' union responded that the action may be unlawful and indicated it would tell players to ignore the request.

At a news conference, Ueberroth said he had designated a representative from each club's management to deliver letters to every major league player. The letters ask players to submit to urinalyses three times a year beginning in 1986. Ueberroth

said he had asked for responses to the letters by Friday.

At the same time, Ueberroth said he had decided to postpone any punitive action against seven players who testified in the federal drug trial in Pittsburgh of Philadelphia caterer Curtis Strong.

"Baseball is on trial," Ueberroth said, "and it has suffered public humiliation in the last few weeks, not to anybody's surprise, least of all to mine. I've wrestled with what to do as commissioner."

Ueberroth said the program would be similar to one already being used to test minor leaguers and non-playing major league personnel.

Tests would be done without notice, but would always be conducted in the player's clubhouse. They would be conducted by medical people, and he said there would be no punitive steps taken against players who tested positively.

"Anyone with a positive test would receive immediate, continued testing and treatment," the commissioner said. "He would get counseling and help appropriate to the individual."

He said baseball's winter leagues, with the exception of Venezuela, have joined the program. Venezuela was

excluded because "they have severe penalties, and we will have no penalties," Ueberroth said.

The acting executive director of the players union, Don Fehr, called Ueberroth's action "a plain, old-fashioned attempt not to bargain ... but to bypass the union."

The early indication was that players were favoring Ueberroth's proposal, with a hitch. The New York Mets voted unanimously in favor of the plan, subject to details being worked out with the Major League Players Association.
