Red Raider ghost

This ghostly apparition was found roaming the dark corners of the Texas Tech campus near the administration building late Thursday and was caught on film by a UD photographer. Rumor

has it that the ghost is an omen of the Texas Longhorns' demise on the gridiron Saturday.

Candy Mathers/The University Daily

Removal of minister spawns oil price hike

By The Associated Press

NEW YORK — The removal of Sheik Ahmed Zaki Yamani as Saudi Arabia's oil minister sent prices of crude oil and refined products soaring Thursday.

Analysts attributed the reaction to a combination of technical factors and uncertainty over the effect his departure would have on future efforts by the Organization of Petroleum Exporting Countries to limit production to boost world prices.

Prices also were boosted by reports that Yamani's replacement, Hisham Nazer, had called for an emergency meeting of OPEC's pricing committee, indicating the possibility of a renewal of determination by the cartel to boost prices.

Some analysts speculated Yamani's departure would remove a long-respected voice of moderation within the fractious cartel, making future agreements to limit production and higher oil prices less likely.

But others said that King Fahd's move had smoothed the way to better cooperation within the 13-nation cartel and that this would boost chances for higher prices in the future.

At the New York Mercantile Exchange, contracts for December delivery of West Texas Intermediate, the benchmark U.S. grade of crude oil, jumped \$1.31 a barrel to close at \$15.04.

Prices for November delivery of refined products also rose significantly. Heating oil closed at 39.57 cents a gallon, up 2.8 cents, while unleaded gasoline rose to 40 cents a gallon, up 2.15 cents.

Several analysts attributed the buying mainly to "short-covering." In a short sale, a trader sells borrowed oil in the hopes that the price will fall before the oil has to be replaced, thus profiting on the drop in price. "Short-covering" is buying oil needed to fulfill that obligation.

Last week OPEC agreed on a production limitation agreement after 17 days of haggling in Geneva. The accord sets quotas for the cartel's 13 members until Dec. 31.

During that session, oil prices had generally hovered in a range between \$15 and \$16 a barrel. But recently they fell below \$14 a barrel, partly because traders' confidence in OPEC's ability to stick to its own quotas had been shaken by the difficulty it had in reaching the agreement.

New TTUHSC vice president says he's prepared to fill position

By SCOTT BRUMLEY

News Staff Writer

The new executive vice president of the Texas Tech University Health Sciences Center, Dr. Bernhard Mittermeyer, said he is looking forward to his duties.

"I must say I was excited after interviewing for the position at the potential opportunity to lead what I think is an exemplary institution," Mittermeyer said in a phone interview from California Thursday.

He said he realizes there will be budgetary difficulties because of current financial problems the state of

Texas is facing, but he said he hopes those difficulties will not stand in the way of progress for the TTUHSC program.

Mittermeyer said his experience as surgeon general for the U.S. Army medical corps will give him insight into the workings of a university situation. He said there are similarities between the military and a college environment.

Students can be compared to soldiers and faculty would compare with the officer corps, Mittermeyer said. Faculty and officers must work to instruct and motivate those under them, he said.

"The faculty is there for the provision of fine education, research and through the clinical practice of medicine to prepare future health care professionals," he said.

Mittermeyer specializes in urological surgery and medical management, which involves aspects of surgery and a substantial amount of pediatric work.

After touring the Regional Academic Health Centers in Amarillo, Odessa and El Paso during the selection process for the position, Mittermeyer said he was impressed by the geographic coverage potential of the satellite centers.

"One goal of mine will be to continue to work for the common good of the RAHCs (satellite centers) and the Health Sciences Center," he said.

Many high-ranking faculty members of the TTUHSC have expressed the same excitement about working with Mittermeyer that he has expressed about his new position.

"Dr. Mittermeyer is widely known for his views on the role and responsibility of the physician in health care leadership management and peer review," Tech President Lauro Cavazos said.

Cavazos said Mittermeyer is eminently qualified to provide leader-

ship in long-range planning for academic programs, clinical practice and research programs, which will be among his responsibilities.

Samuel Richards, vice president for the Health Sciences Center, said Mittermeyer will have a positive impact on TTUHSC's national image. He said Mittermeyer knows a great deal about the political workings in Washington, D.C., and that his insight could be a great help to Tech.

"Dr. Mittermeyer is a very accomplished man. Clearly, as surgeon general, he understands institutional medicine and the need for education in that field," said Dr. J. Ted Hart-

man, dean of the Tech School of Medicine.

Hartman said having an additional expert in medical management at the TTUHSC will help.

"He certainly has the administrative leadership background to help us," said Laurence Peake, dean of Tech's School of Allied Health. Mittermeyer will be a strong leader for the Health Sciences Center, he said.

"I'm looking forward to working with him when he arrives," Peake said.

FRIDAY

In today's UD:

- The Texas Tech Saddle Tramps are celebrating their 50th anniversary as a campus organization beginning today with a reception for former members. Read about the other planned activities on page 6.
- The Red Raiders return home for the first time in a month to host the Texas Longhorns Saturday in a game that pits Tech Coach David McWilliams against his old team. See the pre-game coverage in Sports on page 12.

Gorbachev plans spring visit to Latin America

By The Associated Press

WASHINGTON — Soviet leader Mikhail Gorbachev is planning to visit Latin America, apparently in an attempt to penetrate peacefully an area where the United States long has been the dominant influence, administration officials say.

The Soviet Communist Party General Secretary plans to visit Cuba, Moscow's closest ally in the hemisphere, and also is expected to become the first Soviet leader ever to travel to Mexico, Argentina and Brazil, the officials said. The trip, tentatively set for next spring, may include other South American countries as well.

Soviet Foreign Minister Eduard Shevardnadze visited Mexico City three weeks ago and laid the groundwork for the Soviet-Mexican summit, according to the officials, who insisted on anonymity.

Some officials described the prospective visit to Mexico as a normal development in relations between the two countries. They said Mexico has long been interested in expanding its diplomatic horizons and that three previous Mexican presidents have visited Moscow.

The officials added that Shevardnadze and his Mexican hosts seemed intent on not saying anything that could be construed as hostile to the United States.

Other officials, however, said they were concerned that the Shevardnadze talks and the prospective visit by Gorbachev raises the possibility of an expanded "Soviet foothold" in this hemisphere.

A long-term Soviet goal in Mexico is the opening of consular offices in northern Mexico, which would enable the Soviets to widen their intelligence-gathering capabilities in the southern United States, the officials said.

Coordinating Board

Administrators attend meeting in Austin

By JOHNSON BROWN

News Staff Writer

Top Texas Tech officials are in Austin today for the quarterly meeting of the Coordinating Board, Texas College and University System.

Even though the board's agenda doesn't contain any items of Tech concern, Lauro Cavazos, president; Donald Haragan, vice president for academic affairs and research; and Eugene Payne, vice president for finance and administration, are attending the meeting to represent the university, according to Mike Sanders, Tech director of public affairs.

Fourteen public universities are seeking approval for almost \$116 million in construction and renovation projects less than a month after higher education budgets were cut by the state Legislature by 10.5 percent. The board will consider staff recommendations to defer more than \$72 million of the projects because of stringent standards adopted by the board in April.

The Coordinating Board was established by the Legislature to authorize programs, policies and projects for Texas universities and colleges.

Procedures also are expected to be adopted for distributing \$42.5 million in funds to public universities and medical schools to cover revenue shortfalls which resulted from enrollment losses last fall.

The board also will establish a procedure for setting tuition rates for out-of-state and foreign students for the next two academic years. In addition, the board will consider recommending a constitutional amendment which would allow the state to withhold retirement refunds from former teachers and state employees who have defaulted on student loans from state programs.

In view of the financial constraints placed on higher education by the recent special session of the Legislature, the board will consider only one program request, which is the establishment of a school of engineering and computer science at the University of Texas at Dallas.

The board will award \$1 million in grants under the Education for Economic Security Act, a federal program designed to strengthen the skills of teachers and improve instruction in math, science, foreign languages and computer science.

The board also will consider amending its 1987 budget to conform to the revised appropriations bill approved in the special session of the Texas Legislature. The Legislature cut appropriations for the board's operating expenses down to almost \$330,000.

Board members will hear a report on the Texas Equal Educational Opportunity Plan for Higher Education presented by John Fainter, chairman of the governor's committee for equal educational opportunity.

According to Brenda Arkell, crime prevention officer for UPD, no action has been taken against the professor because the report was filed as an incident and there was no complaining witness.

She said if a witness were to file criminal action against the professor he could be charged with disorderly conduct, a Class C misdemeanor which is punishable by a fine not to exceed \$200.

In other police action, a Lubbock man was sentenced to six years in the Texas Department of Corrections for a burglary incident on the Tech campus. The action occurred after his probation was revoked Wednesday by 237th District Judge John McFall.

Stephen Edward Espinoza, 28, was convicted on burglary of habitation charges Sept. 5, 1985, when he was found guilty of stealing an AM/FM cassette stereo from a dorm room in

Gordon Hall. The judge revoked Espinoza's probation because he failed to report to the Lubbock County Adult Probation Office in March and he also failed to report a change of address within 24 hours to the office.

According to Arkell, Espinoza was arrested by UPD on four separate occasions. He was suspected of allegedly stealing 19 wallets between March 15 and May 6, containing a total of \$1,400 in cash. Espinoza's only conviction resulted from the Sept. 5 incident.

As part of his restitution, Espinoza was required to appear in a video explaining why he chose Tech as his place for criminal activities. The video was made for UPD officers to use in crime prevention presentations.

"Texas Tech was the easiest place," Espinoza said. "A lot of people aren't thinking (about protecting their purses and backpacks); they're

too wrapped up in school and studying."

He said his primary target area was the stacks in the library because students would leave their things in the booths while they looked for a book. Espinoza said he also frequented empty offices.

Espinoza said that when he stole a wallet he would hide it in his pants, take the money out and throw the wallet away. He also said he would take pictures of girls out of wallets.

"Nobody noticed me or suspected me of anything," he said. "I blended in on campus."

In the video, Espinoza said people should keep an eye on their property and keep offices locked when they are not occupied.

"It doesn't take long for someone like me to go in and get it," Espinoza said.

Givens fails to exhibit satisfactory job performance in Austin

**Laura
Tetreault**
University Daily
Editor

Job performance is made evident by the exhibiting of appropriate skills while in the work environment. A teacher's job performance is shown in the front of a classroom. A secretary's job performance is demonstrated while answering the phones and typing letters.

A politician's job performance also is determined by his outward appearance in terms of activities. An elected official should be organized, visible, active and responsible. District 83 State Representative Ron Givens has failed to exhibit behavior characteristic of a good, effective politician.

In March Givens notified Stephen F. Austin elementary school in Slaton that he was planning to visit the fourth and fifth grade students to see first-hand the education reforms. According to the April 10 edition of The Slatonite, the students, teachers and media were ready for Givens, but he did not show.

Missing the event he had scheduled was bad enough, but Givens added insult to injury by sending a thank-you note to the school for letting him visit, according to The Slatonite.

If a politician cannot remember where he has or has not been, how can he effectively represent the views of his constituents? If Givens is not an organized man, then he should at least surround himself with people who are organized.

Givens also did not appear at the Oct. 23 debate sponsored by three faculty organizations in the University Center, but he did send his office manager to express his views at the event. Even so, Givens should be a visible leader, especially during the campaign season, so that voters can hear what he has to say, not what his manager says for him. His manager cannot speak for him in Austin while the Legislature is in session.

Givens' ability to be effective in Austin also comes into question when reading his written responses to questions published in the Voters Guide published by the League of Women Voters. His answers are incomplete, choppy sentences which do not make sense.

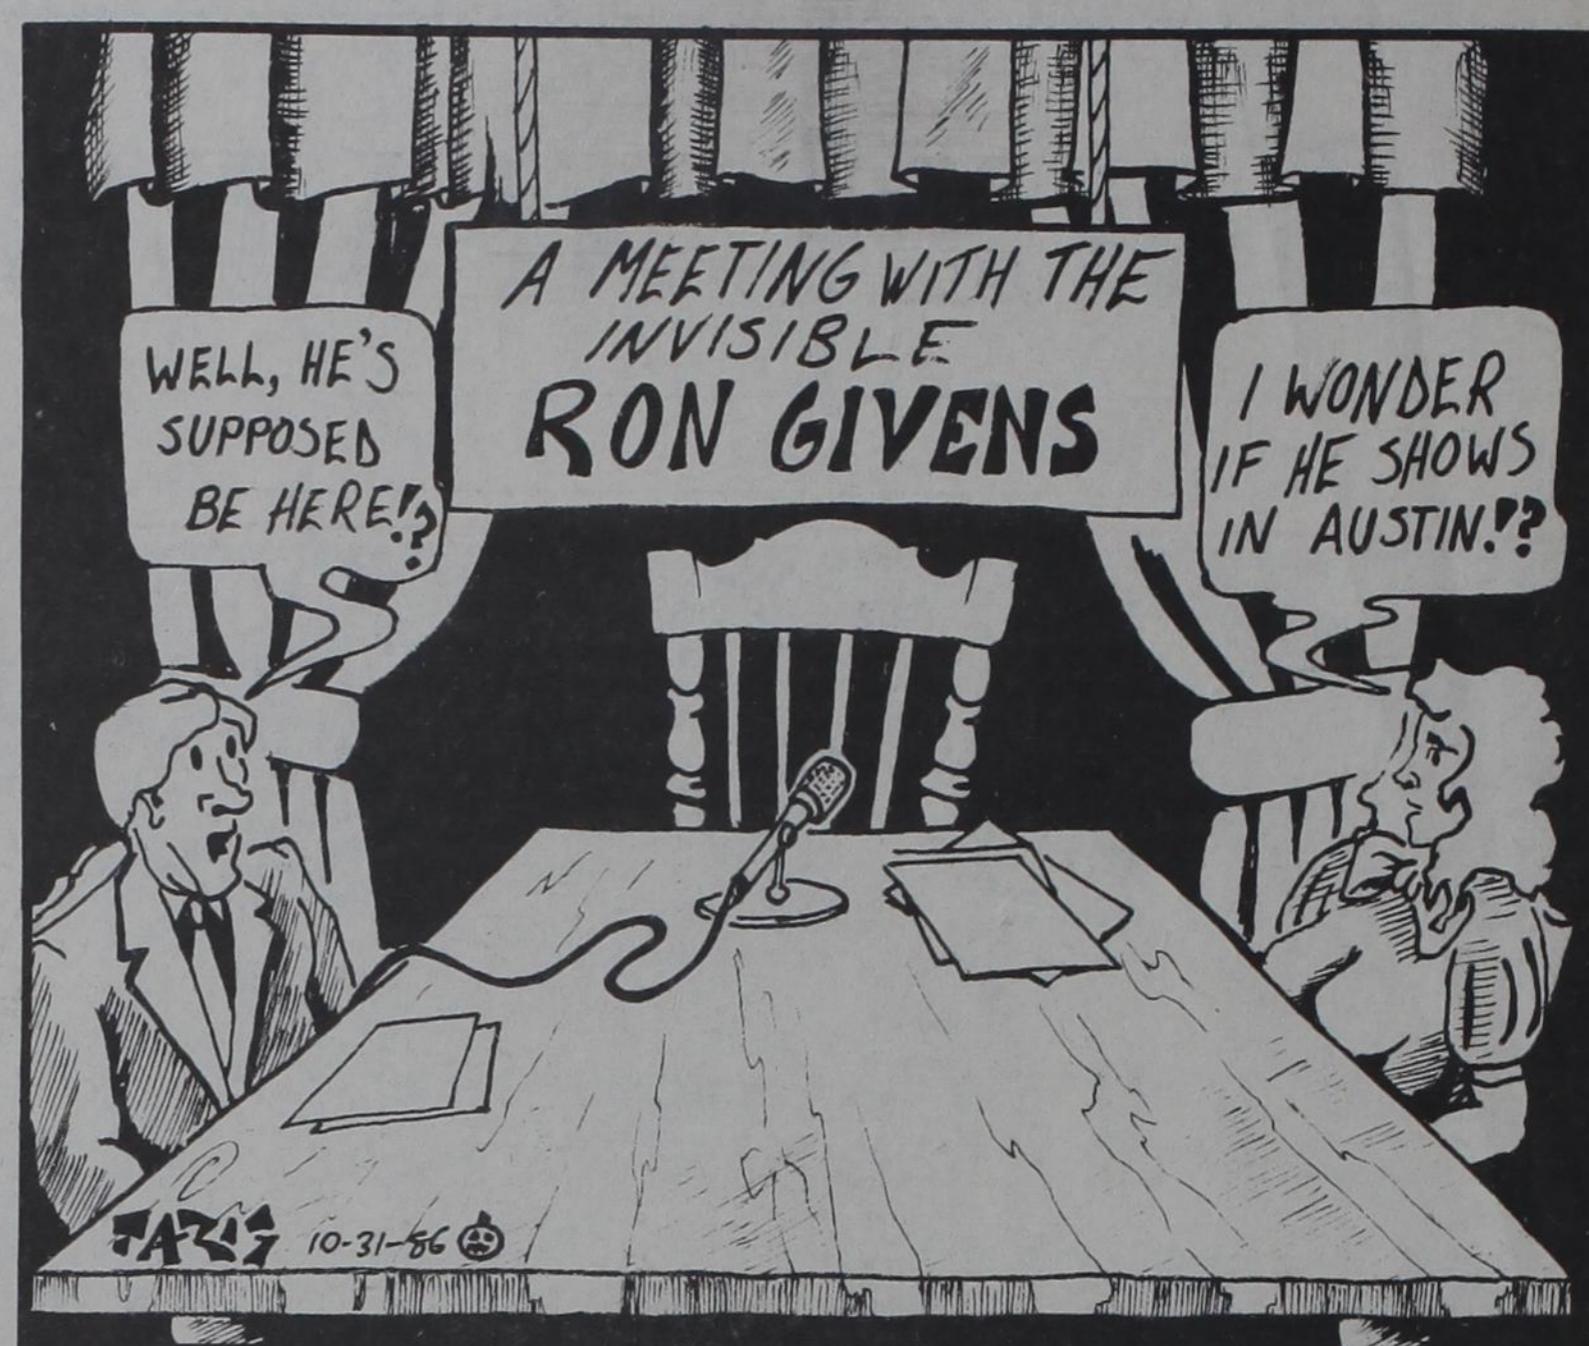

In a televised debate on Tuesday on KAMC, Givens responded to criticism that he has the ability to do the job.

by Democrat Froy Salinas, the challenger for the District 83 seat, the sloppy reply in the Voters Guide by saying he answered the questions while flying from Austin to Lubbock. Givens said the league did not edit his responses.

Since the league emphasizes that it does not support political parties, only the right of people to vote, I should not expect the league to be responsible for editing the writings of politicians. Besides, a politician should not expect others outside his office to edit his writing for publication.

Givens' voting record in Austin also has been questionable. For example, Givens voted against both the budget cuts and the temporary sales tax increase proposed during the special sessions. One of the two measures should have been supported to solve the state's financial woes. By voting down both measures, Givens failed to take a stand on how to solve the state's budget problems.

Unfortunately, disorganization and poor judgment have plagued Givens. Because of Texas' severe budget woes, District 83 must have in Austin next year a competent, strong leader who can protect the needs of the people in the area. Givens has not shown that he has the ability to do the job.

Tech gives Halloween tricks every day

**Jay
Miller**
News
Staff Writer

whose sole purpose in life seems to be perpetrating their on-going practical joke.

Perhaps some of you have been suckered into the West Hall Arena for Personal Humiliation and Frustration. The Arena is best known by its pseudonym — "Financial Aid Office" and is actually run by a group of cruel, masquerading pranksters who call themselves "assistants." That's right, they're phonies. They wear masks and laugh at the mentally deficient, financially downtrodden mob that stumbles into their chambers daily. I fell for it. More than once. Never again.

Forget the fact that every piece of university-produced literature boasts that Tech has a "Financial Aid Office." It's not true. Ask the people who have mailed in forms to the office, only to have them sit in boxes in the office for days, weeks, months and years. Ask the people who make daily pilgrimages to the arena because the "assistants" take their

phone off of the hook everyday. In other recent masquerades, the administration has worn a mask of stability while some professors have been pretending for years that they are teachers.

Another ongoing Halloween tradition at the university level is a variation of the all-time favorite Halloween game, "Bobbing for Apples." The variation is called "Bobbing for Bucks."

The game is played with university administrators, blindfolded with both hands tied behind their back, trying to bob for money out of the state's washtub while Texas legislators look on. The winner gets to keep the money. The losers are forced to cut their budgets.

So, as you can see, Halloween fun doesn't end when you grow too old to go trick-or-treating. Here at the university we have some Halloween-associated tricks going on all of the time, only now the stakes are a little bit greater than a candy bar.

LETTERS

Former b-ball player

To the editor:

Jeff Taylor is one of the best basketball players in Texas Tech history. However, he was cut by the San Antonio Spurs last week before the article in The UD was printed. The Spurs have two of the best guards in the NBA, Alvin Roberts and Johnny Moore, both former Southwest Conference stars. Taylor can play for many NBA teams. Let's hope he will find one.

R. Jeff Brown

Greeks behave well

To the editor:

This letter in response to all the articles that always seem to get printed in The UD about how bad the Greek system is here at Texas Tech. For once I thought it would be nice for your readers to hear about the one of the many things that go on among Greeks.

On Sunday night we played Sigma Chi "A" Team in intramural football for the Greek playoffs. There was an excellent turnout in terms of moral support on both sides for the game. All through the game, both teams played with good sportsmanlike conduct. Even on the sidelines, the fans from both sides cheered back and forth at each other in good, clean fashion.

So, it should definitely be noted that fraternities and their counterparts can interact with each other; even while participating in a highly competitive sport such as football. To the Sigma Chi's: Thanks for a clean and fun game, and Good Luck!

Karl J. Reiter

Counter flick review

To the editor:

I'm not a journalist, nor am I a natural-born film critic. I do, however, have a few opinions to pass on concerning the film "The Color of Money."

Simply stated, I believe it is one of the BEST films to have been released this year.

"The Color of Money" is, quite honestly, the one film in which Tom Cruise proves he has true acting ability. As Vincent, Cruise is fiercely cocky while playing his game, only to be pulled down several notches by "Fast" Eddie Felson, the role reprinted by Paul Newman. Felson teaches Vincent how to lose and still come out ahead, for as he points out, there is a difference between "money won and money earned."

Yet "Color" is not just the story of a young player on the rise. It is just as easily the story of a comeback, here by the aging Felson who, seeing the fire in Vincent, wishes to grab hold of the power and glory he knew back when he was "The Hustler."

Overlooked by some critics is the hard-hitting performance by Mary Elizabeth Mastrantoinio, last seen as Al Pacino's sister in the rather forgettable "Scarface." Here she plays Carmen, Vince's woman, and she plays it with more guts than almost any other on-screen girlfriend in movie history.

Director Martin Scorsese's cinematography is masterful, as the camera glides around the room, almost floating around the characters. If Newman doesn't receive the Oscar for Best Actor, I hope the film wins for Best Cinematography.

Finally, the film's conclusion, in my opinion, was absolutely appropriate

for such a story of one man's climb back to the top, yet it seemed to be the one thing the audience around me did not approve of. Other than that, they sat quietly, unlike so many people in so many theaters, and appeared to relish each moment of "The Color of Money." My advice to you is go quickly and see this film. The good stuff rarely stays in town too long.

Steven C. Norwood

Laughing at religion

To the editor:

I am a Christian here at Tech and by no means do I agree with the outdoor evangelist that was on campus Wednesday. By the same token I don't agree with the advice given by Friday's guest columnist Bill Baer either.

Bill's suggestion was to laugh at the evangelist but don't let him upset you. Now come on, Tech, don't you think we laugh off a few too many things?

We are satisfied with ignorance toward spiritual matters. Bill, you yourself said that you weren't a very religious person and you couldn't tell if what the evangelist said was theologically correct. I'm not asking anyone to be religious, I just want to suggest that people start investigating who Jesus was and what His claims were.

We study Hitler, Plato and Napoleon in school — isn't it logical that we should also study Jesus Christ, the most influential being that ever walked the face of the earth?

Tech, it is about time we get serious and commit ourselves to something. After all, we can't laugh off God forever.

Mike Schatzman

Commerce experts report deficit decreases

By The Associated Press

WASHINGTON — The nation's merchandise trade deficit registered a slight improvement in September, shrinking to \$12.6 billion from \$13.3 billion in the previous month, the government reported Thursday.

Commerce Secretary Malcolm Baldrige said the report was evidence "that we have turned the corner on the trade deficit."

Private analysts agreed that the improvement — due largely to lower imports of manufactured goods, including automobiles from Japan — was welcome news. But some cautioned that it was not necessarily a sign of the long-awaited turnaround in trade accounts.

The Commerce Department said imports fell by 2.7 percent to \$30.1

billion in September, while exports dipped by 0.5 percent to \$17.5 billion.

It was the second month in a row the trade deficit has decreased.

In a separate but related report, the Labor Department said prices of goods imported into the United States rose 0.7 percent from June to September, following declines in the previous two quarters.

In all, the report said, prices of non-petroleum imports have advanced 10.2 percent since September 1985, a period during which the value of the U.S. dollar against other major currencies has declined by more than 30 percent.

Economists claim a weaker dollar will eventually help ease this nation's trade balance by making imported goods more expensive at home and U.S. goods less costly abroad.

In yet another economic report, the Commerce Department said sales of

new homes rose 10.6 percent in September to a seasonally adjusted annual rate of 690,000 units. The increase was the first improvement in sales since March, when they had soared 24.7 percent on the strength of big declines in mortgage interest rates.

For the first nine months of 1986, the United States amassed a trade deficit of \$127.8 billion, compared with a \$106.6 billion shortfall for the same period in 1985.

Americans have been importing more than they have been exporting since 1981, with last year's record deficit of \$148.5 billion expected to be easily outstripped this year. Baldrige said he is projecting a 1986 deficit of around \$172 billion, but he said that figure should drop by \$30 to \$40 billion in 1987.

But Lawrence Chimerine, president of the Chase Econometrics

forecasting service, said it was premature to say the trade deficit is turning around based on the September figures.

Senate Democratic Leader Robert C. Byrd, D-W.Va., said he was unimpressed with the new trade figures.

"The Reagan administration's policy of inaction is not working — and too many Americans are not working as a result," he said in a statement.

President Reagan, on a campaign tour through Nevada Thursday, said, "Just this morning we learned the trade deficit in September declined from its peak for the second month in a row and is now down 30 percent.

This is particularly good news for our manufacturing industries. We also learned new home sales were up in September over 10 percent; I believe the economy is on a roll and I think it is a sure bet we're about to hit another jackpot.

Texas seeks methods for hazardous waste disposal

By The Associated Press

AUSTIN — Texas should phase out landfills in hazardous waste disposal and look for safer and more efficient alternatives, the Texas Department of Agriculture recommended Thursday.

"Proven, cost efficient alternatives to land disposal exist today,"

Agriculture Commissioner Jim Hightower told a news conference, are disposed of in a safe,

"and a concerted effort by industry and the state can move us away from outmoded, dangerous, expensive land disposal methods."

Sen. Tati Santiesteban, D-El Paso, said his Senate Committee on Natural Resources would meet in Lake Jackson Nov. 19 to begin making recommendations for the 1987 Legislature.

"Clearly, the state has a duty to make sure these dangerous materials

are disposed of in a safe,

environmentally-responsible manner," the committee chairman told the news conference.

Hightower and Santiesteban noted that Texas has the dubious record as the No. 1 producer of hazardous wastes in the nation.

"Texas produces 38 million tons of hazardous waste every year, which is 5,000 pounds for every man, woman and child in the state," Santiesteban said.

A 60-page report prepared by the Texas Department of Agriculture said that up to now about 99 percent of all hazardous waste in Texas has been disposed of "on-site" — buried in landfills, placed in surface impoundments or injected into deep wells.

"Groundwater contamination is now being found at dozens of currently operating, regulated waste disposal facilities in Texas," the report said.

NEWS BRIEFS

Forest Service to stop destruction

AUSTIN (AP) — The U.S. Forest Service agreed Thursday to a week-long moratorium on destruction of an East Texas forest while Attorney General Jim Mattox determines the environmental impact.

"The U.S. Forest Service agreed to stop crushing the trees, which has been going on seven days a week at about 30 acres a day, and not to napalm any of the crushed trees acreage during the moratorium" Mattox said.

"We felt it was quite a legitimate request," said Mike Lannan, supervisor for U.S. forest lands in Texas, at Lufkin. "This will give him an opportunity to look into it."

"The operation is a cleanup behind the pine beetle infestation of several years ago and to prepare for reforestation," Lannan said. "Pine beetles are generally inactive at this time."

Four indicted in second killing attempt

HOUSTON (AP) — Members of a group who advertised their services in Soldier of Fortune magazine and were indicted on charges that they tried to kill a Georgia man now have been indicted in connection with a second attempt on the man's life.

A nine-count indictment returned on Wednesday alleges that Alice Brado, 48, of Aurora, Colo., used a Denver truck driver as a courier to pay \$20,000 to Richard Savage, of Knoxville, Tenn., to kill Dana Free in 1985.

Savage, 39, bungled the first attempt a month later, the indictment said, when a hand grenade exploded under Free's car in Marietta, Ga., but Free escaped unharmed.

Five cadets burn cross in black's room

CHARLESTON, S.C. (AP) — Like a scene from "The Lords of Discipline," five white Citadel cadets dressed in sheets and towels entered the room of a black cadet, shouted obscenities and left a burned paper cross behind.

While last week's incident sent shock waves through the storied campus, both black and white cadets agree the hazing doesn't reflect the racial atmosphere at the state military college.

"I don't think there are any tensions," said Craig Burgess, a 21-year-old senior from Lake City, S.C., and one of 126 blacks in the college's 1,960-member corps of cadets.

Swiss students observe American education, culture

By CINDY PANDOLFO
News Staff Writer

One of Max Peter's lifelong dreams had been for Swiss students to gain an impression of an American university, and that dream became a reality when a group of students arrived from Switzerland to attend classes at Texas Tech and experience West Texas culture.

Peter was a visiting professor, as well as a student, at Tech before he returned to Switzerland to teach at the Kantonsschule School in Frauenfeld, Switzerland. Seventeen students accompanied Peter when he returned to the campus two weeks ago.

Swiss student Roman Salzmann, 20, works for a newspaper and said he was impressed by the size of Texas Tech as well as by the difference in the people. He said he and his colleagues were able to talk with Tech students, but most of contact was very impersonal.

Salzmann said his first impression of Tech students was openness. People in Switzerland are much more reserved and not as friendly, he said. However, Salzmann said he noticed a lack of sincerity among Tech students.

"Sometimes I had the feeling that students here were artificial and that politeness was superficial," he said.

The educational system in the United States, and particularly at Tech, was a surprise, 20-year-old Chris Schelumpf said. He said classes

Swiss Connection

Candy Mathers/The University Daily

Roman Salzmann, left, Chris Schelumpf, Urs Klarer and Gilles Banziger, all of Switzerland, are attending classes at Texas Tech with 13 other Swiss students to experience an American university and West Texas culture. The students are accompanying their professor Max Peter, a former Tech student and visiting professor.

at Swiss universities are much less formal and students come and go freely during classes. He said in Switzerland, class attendance is not mandatory because students can read and learn at home, but students attend class anyway.

Schelumpf said he was surprised by the lack of quality at U.S. universities and the limited knowledge of American students compared to Switzerland where about 98 percent of the population is literate.

"I thought the education level of American universities would be higher," he said. "It was not. I had heard that 20 percent of Americans are illiterate and it's true."

In Switzerland not everyone attends high school. All children are required to advance to secondary school, which consists of the first nine years.

Students are then tested to determine whether or not they will attend a trade or vocational school or high school. Schelumpf said there is much more to learn in four and half years of high school in Switzerland than in America.

The Swiss students were allowed to select classes they were interested in attending while at Tech and most requested a public opinion and propaganda class taught in the mass communications department. While in class, Tech and Swiss students had the opportunity to interact and share thoughts and ideas on a diverse range of subjects from rock music to international affairs.

Schelumpf explained the differences between American and Swiss radio and said although differences exist in the media, students of both countries share common music preferences such as Bruce Springsteen and Madonna. Schelumpf also said that music is not quite as wild in Switzerland as it is in the United States.

Sightseeing excursions in Lubbock included a trip to the Red Raider Club to experience country music and a trip to a ranch in Dickens. Salzmann said the visit to the ranch gave the students a chance to see how Americans spend a Sunday afternoon.

"There was a lot of eating and drinking," he said. "They were very social."

"It is not common to spend Sunday with your family in Switzerland. Family life is different in

Switzerland.

Salzmann and Schelumpf explained the American image in Switzerland and Europe.

"Americans are aware of their position as a world power," Schelumpf said. "They have a mentality, an 'I am an American' mentality."

"It disturbs me, and the rest of the world, I think, that America wants to be the moral conscience of the world."

The peace movement in Switzerland is evidence that Swiss people have a different perception of Russia than the average American, Schelumpf said.

"The USA sees the arms race as black and white — the Russians are bad and Americans are good. That's not true," Schelumpf said.

"So what if each side has only 250 bombs, they still can destroy the world."

Salzmann pointed out the precarious position of neutral Switzerland in the arms race.

"We are the people between the two countries and we have no say," he said. "No one seems to care what we think."

The Swiss perception of President Reagan also is very different from that of many Texas Tech students.

"Reagan seems as ridiculous as James Bond the agent," Schelumpf said. "I believe Reagan comes from a time when America had to protect the world from Russia, but you don't have to do that now."

MOMENT'S NOTICE

ALPHA PSI OMEGA

Alpha Psi Omega, the theater honorary, will sponsor "Terrifying Theatre," a haunted house, from 7 p.m. to 1 a.m. today at the Actors Trading Post at 2201 Ave. H. Admission is \$3. For more information, call Jeff Johnson at 792-5574.

CLASSIFIED ADVERTISING STAFF (2 Positions)

This position involves inside sales for Classified Section of the UD. Student works with computer system and as staff receptionist. Typing skills helpful, 20-hour week. Hourly salary. One afternoon lab allowed per week.

All majors are encouraged to apply for these UD Advertising Staff positions. There are no course requirements. Student Publications is an Equal Opportunity Employer.

Horn professor enjoys mixture of teaching, researching statistics

EDITOR'S NOTE: Following is one of a continuing series of stories featuring Texas Tech's Horn professors. The nationally recognized title has been given to 34 Tech faculty members, 18 of whom currently are in residence. Today's story looks at William Conover, a professor of information systems and quantitative sciences.

By ANN McBRYDE
News Staff Writer

Although the thought of having to take one course of study in this area brings about anxiety and a feeling of dread for some students, William Conover by choice has made statistics a way of life.

Conover, a Horn professor and area coordinator of information systems and quantitative sciences (ISQS), has been at Tech since 1973 and was appointed to the Horn professorship in 1981. During that time he has had three statistics textbooks published.

He had one textbook published prior to his arrival at Tech. That text is titled **Practical Nonparametric Statistics** and is in its 12th printing.

Conover came to Tech as a professor of mathematics and statistics in the College of Arts and Sciences. Since then he has served as associate dean for research and graduate programs and now is ISQS area coordinator.

Conover is working on revising two of his textbooks: **Introduction to Modern Business Statistics** and **Modern Business Statistics**. He said that according to a report issued after the first year of publication, **Modern Business Statistics** was being used by 34 schools.

"Generally the first edition of a textbook has a tendency to be a little slow getting into circulation, but I'm pleased

with the results so far," Conover said.

Conover is teaching an introductory statistics course at the graduate level. He said he likes a mixture of both teaching and research.

"I enjoy some of both. If I had just liked research, I would have gone into the industry, and if I had just wanted to teach, I would not have gotten my doctorate," he said.

Conover said the best aspect of his job probably is working with young people.

"I really enjoy working with young students; you almost have to, to be in the teaching profession," Conover said. "It is a great job because it keeps you young."

Having been at Tech for 14 years, Conover said he has noticed a definite change in the characteristics of

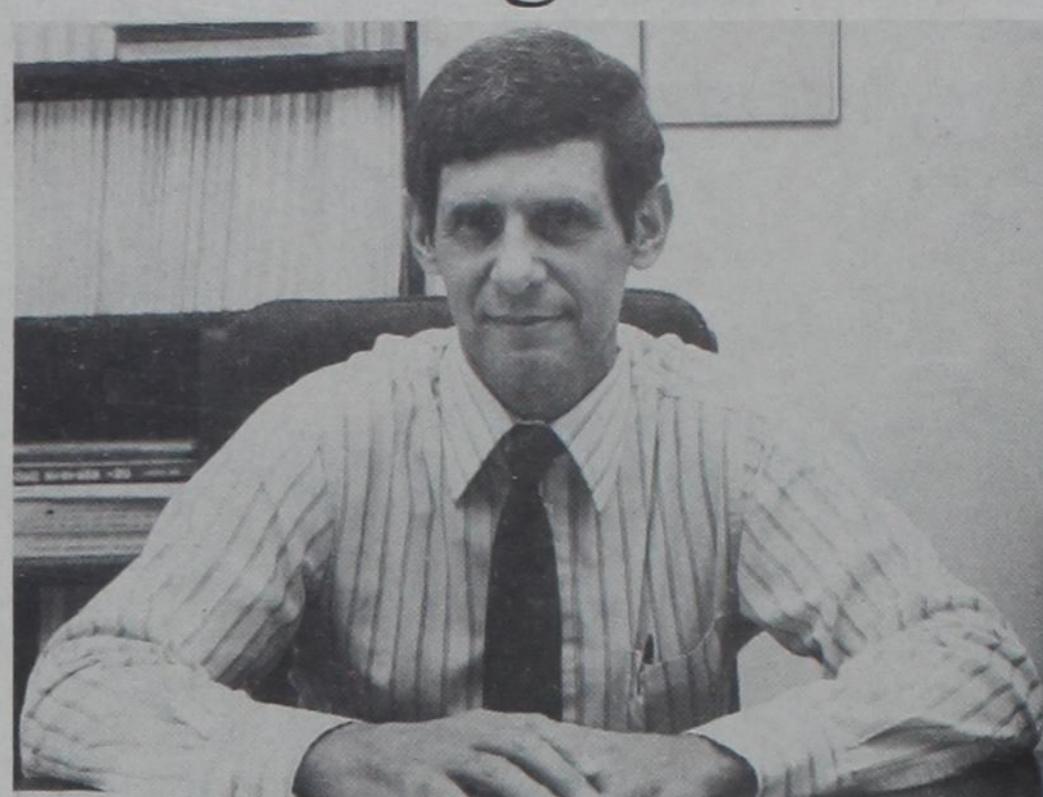

students as the years have gone by.

"Today students seem much more serious and ready to learn than they did 14 years ago," he said. "When I first came to Tech, it was a major accomplishment to get students to put the (news)paper down when class started."

"I think the new attitude has a lot to do with the stricter standards that exist in the business school."

Another aspect of his job Conover said he enjoys is consulting. He said that at times, statisticians involved in industry or government will have long-term problems and will call him to consult with them.

"I enjoy consulting because I can take the real applications of statistics and bring them back to the classroom," he said.

William Conover

Holden Hall to receive 'Freedom of Youth' statue

By HOLLY HATCH
News Staff Writer

Holden Hall will receive an addition at 10 a.m. Saturday when a bronze statue titled "Freedom of Youth" by Alford selected a poem by Elizabeth Akers Allen to express the meaning behind the work which will accompany the music.

Alford said the original statue was made four or five years ago when she was inspired by her daughter swinging on a rope in the family backyard.

The statue was donated by Rosie Sandifer Alford and her patrons through what she said was a maze of suggestions, fund-raising and artistic endeavor. The dedication will include music composed by Texas Tech music professor Mary Jeanne van Ap- peldorn specifically for the artwork. He said he thought it would be perfect

for the Holden Hall fountain.

The College of Arts and Sciences commissioned the work, and Alford formed a sculpture foundation to support the effort to raise money through her patrons.

The sculpture is the premiere piece in what Alford said she hopes will become a sculpture garden on the Tech campus.

"We hope to have a show each year in connection with the Lubbock Wine Classic called the Campus Collection," Alford said. "This would be a show attracting artists from all areas of the country," she said. "Through

the proceeds, we hope to be able to buy one new work a year to install on the campus."

Alford is both a painter and sculptor and is a nationally recognized talent. She exhibits her work at shows and in galleries all over the United States.

She attended both Tech and the University of Oklahoma for one year but said she found private study with professional artists more gratifying.

"I've considered myself successful because my work has always sold," Alford said. "But now I really feel like I'm coming into great things."

CAMPUS BRIEFS

Parking lots must be cleared for game

All vehicles parked in the band lot, C-1 and C-2 east of the stadium parking lots must be moved by 7 a.m. Saturday to make room for parking during the home football game. Vehicles remaining in the parking lot will be towed.

Art department to feature exhibition

The Texas Tech art department will have an exhibit by nationally known artist Karl Umlauf in the Fine Arts Gallery Saturday through Nov. 25.

Included in the display will be cast paper reliefs and drawings that have been exhibited throughout the artist's career. An opening reception will be from 7 p.m. to 9 p.m. Saturday.

Saddle Tramps organization celebrates half century of existence with UT game spirit activities

"Bevo Busters"

Rodney Markham/The University Daily

By JILL JOHNSON
News Staff Writer

The Saddle Tramps, a spirit and service organization dedicated to the betterment of Texas Tech, are celebrating their 50th anniversary this weekend through various activities involving both old and new members.

The Saddle Tramps came into being in 1936 when Tech student Arch Lamb was working as a shoeshine boy in West Hall and one of his customers nominated Lamb to be campus yell leader.

Upon his election, Lamb asked two classmates, Paul Bowers and Bud Thompson, to aid him in the job of

founding a spirit organization. Together they recruited 50 young men and formed the club.

The Saddle Tramps grew into a service organization over the years and incorporated into their bylaws the idea of keeping membership at a maximum of 100.

"Keeping membership at a low number keeps the group elite," said Doug Braack, a senior landscape construction major from Farmers Branch and president of the group.

Currently there are 55 members and 18 pledges in the organization.

The name Saddle Tramp originates from the time when men would ride from ranch to ranch, working in return for a meal. Braack said Lamb

intended for the Tech Saddle Tramps to do the same thing; to work hard for the school and then to move on with

celebrate the group's anniversary will begin with a reception from 5 p.m. to 9 p.m. today at the Holiday Inn Civic Center honoring all Ex-Saddle Tramps and their families.

A pep rally to generate spirit for Saturday's Tech-UT game will be sponsored by the Saddle Tramps for all students and alumni at 8 p.m. tonight in Jones Stadium.

Bus tours of the Tech campus will be conducted for all former Tramps and their families by current Saddle Tramps beginning at 9 a.m. Saturday on campus.

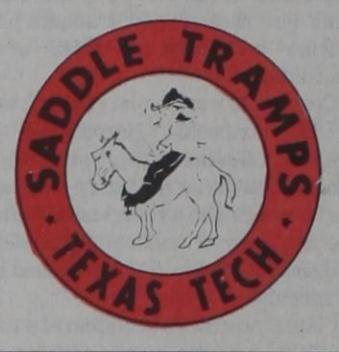

Braack said the tour will show changes throughout the campus to the alumni.

Current Saddle Tramps, alumni and families will go to Jones Stadium for the football game at 11 a.m. after the tour Saturday.

Former members will be wearing their old Saddle Tramp uniforms and will join current members on the football field before the game to cheer on the football players, Braack said.

Braack said all Tramps will ring their bells on the field about 11:30 a.m. Saturday.

A banquet for all past and present Saddle Tramps is scheduled for 5 p.m. Saturday at the Lubbock Plaza hotel. Braack said roughly 800 people will be attending the scheduled events celebrating the anniversary.

their lives.

Braack said a Saddle Tramp is a passerby known for dependability, hard work and a job well done. He commented on the changes of the group in the past 50 years.

"We (Saddle Tramps) still have the same attitudes and strive for the same goals — to work as hard as we can for Texas Tech," Braack said.

"We have carried traditions from 50 years ago and will continue to stand for the same idea of supporting Tech."

Current Tramp members sponsored "Bevo Busters" Thursday in front of the University Center, a pumpkin smashing to promote spirit for Saturday's football game against the University of Texas.

The festivities for this weekend to

Gorilla outfit most popular costume

By MISSY COSTELLO
Lifestyles Staff Writer

A lot of people will be monkeying around this All Hallow's Eve.

According to a few local costume shops, the most popular costume for Halloween this year seems to be the gorilla.

"All my fraternity guys are wanting to do the gorilla thing," said Farrell Murph, manager of Tails of Texas

Halloween fun

The gorilla costume is one of the most popular this Halloween season.

Candy Mathers/The University Daily

Varsity.

According to Penny Rowe, co-owner of Down from the Attic Costume Shoppe, most girls are choosing "feminine-type things. The most popular things this year are saloon girls and flappers."

Janice Shannon of The Joker, though, said Elvira has been a big costume request among women. "It's madness around here," she said. As to the most unusual costume asked for, she laughed, saying, "We had a

request for Coors beer cans.

"We've got Playboy bunnies which the girls like. Or the boys like, we should say."

"And, of course, as usual we have had a lot of requests for Ninjas."

So what possesses us to dress as belly dancers, werewolves, and "great big huge rabbits?"

"For one night, you can be anything you want to be and nobody cares," said Murph. "It's a rebellion against the 'social norm.' Society is much too critical. It (Halloween) gives you a chance to do anything you want. It's definitely fantasy."

"They can be someone for one night that the rest of the time they only fantasize about. I hear people say, 'Oh, wow, I've always wanted to be a belly dancer,' or 'a convict.' It's something fun and different that they can do once a year," Murph said.

"It lets your hidden personality come out," Shannon said. She said Halloween is such a popular holiday with people "because if lets them take a walk in fantasy and everybody accepts it."

Rowe said, "It's pure fantasy, and it's fun."

Theater's 'The King and I' flat

By KRISTI FROEHLICH
Lifestyles Editor

The time is the 1860s, the place is Bangkok, Siam, and the effort is — well, mediocre.

The opening show of the Texas Tech theater department's 1986 fall season opens with less than a bang with the Rodgers and Hammerstein musical, "The King and I."

The show never captures the spark that is necessary to make a typical R&H musical really work. But the less than enthusiastic performance isn't a total loss. Actually, if it weren't for the fact that this particular effort by Rodgers and Hammerstein is not their best, the play would succeed. It is not in the efforts by the actors that the play fails; it is in the material, which is well over 2½ hours and becomes very boring after a while.

The performances of Lea Barron as Anna Leonowens and John Warriner as The King are quite charming indeed except for a few weak vocals every once in a while by Barron. Warriner's characterization of the King is quite charming including his delightful accent.

But by far the most successful

'The King and I'

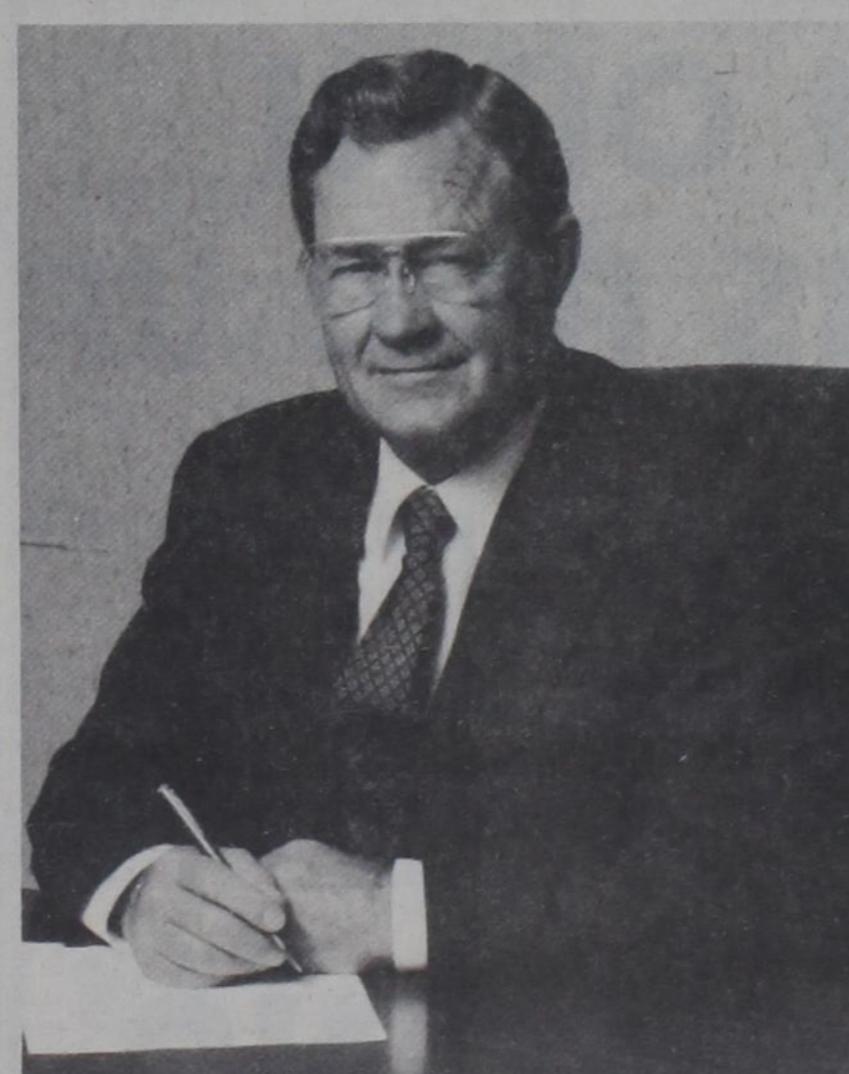

Rodney Markham/The University Daily

"The King and I" will be presented through Monday and again Nov. 6-9. All shows are at 8:15 p.m. except for 2 p.m. matinees Sunday and Nov. 9. As is typical for a mainstage production, Saturday's performance and the Sunday matinee already have been sold out, so if you are interested in seeing the show, you better get your tickets fast. Tickets cost \$6 for evening performances, \$5 for matinees and \$2 for Texas Tech students. For more information, call 742-3601.

Magazines shouldn't glorify murders

**Michael
Stephens**
Lifestyles
Staff Writer

"A single clue screamed an outrage: ONE OF LOLITA'S PALLBEARERS WAS HER KILLER! Thus reads a headline of one of the major crime journals of our day — True Detective.

Within the cheap newsprint pages of this periodical is a diatribe on the thrills and chills of law enforcement. Here is the cold, hard reality known as homicide. Look inside and find the disgusting, sweaty underbelly of middle-class

America. Oh, come on, folks, this is USDA-approved, triple A, guaranteed crap.

You've seen these things in the supermarket. The ones with a woman who's always wearing a bikini top and is either tied up or holding a gun. They're there on the rack with all the other "crap in print." In fact, they are such garbage that they are placed below yellow print mags like the Star and the National Examiner on the rack.

These magazines are saturated with stories about the "2,000-volt Climax to the Hot Love Triangle!" and "The Twisted Secret Behind Michelle's Crossbow Killing!" Yeeecchh!

What is sad about these magazines? You name it. Isn't it

bad enough that they are making light of the most despicable act of mankind, murder? The journalistic talents of the staff lack in certain areas as well: grammar, style, accuracy, little stuff like that.

True Detective is published by RGH Publishers. The UD's own Jay Miller pointed out this magazine and its ilk to me. I guess it's the kind of thing a politics reporter would need to read to keep abreast of current events.

Anyway, Jay and I were looking at the table of contents of TD and of a few of its colleagues. It was then that Jay noticed that all four of the magazines we were looking at (Official Detective, Front Page Detective, and Master Detective) had the same editor-in-chief. All four had the same staff of reporters and

were published by the same company. Here is some crime!

I haven't even mentioned the ads yet. Just by reading these advertisements, the reader can put his finger on the pulse of the decline of civilization. Through the companies you can get girls ("7 Steps to Psychic Mind Control — Get a Girl Within 5 Minutes and PAY NOTHING!"), grow taller ("With our Growth-plus tablets you can add 24 inches in 10 weeks or less!"), or make big bucks ("Have you thought about vinyl repair?").

In one of the magazines I found the 5-by-9-inch photo of man lying in a puddle of his own blood. ("Did a 'Demon Buzzard' Trigger a Shotgun Slaying?") This picture disturbed me for the same reason I usually refuse to go to "slasher"

movies now. Why do this? Or maybe the key question is: who reads this?

At the risk of sounding weepy and heavy-handed, I really think this is some sort of example of what this country has come to. If Ed Meese really wants to crack down on pornography with his little reactionary thumb, I think this is where he should begin. (Then, of course, he can move on to People, Time and National Geographic).

I wonder how harmless this stuff really is. When you devote an entire magazine to the "art" of killing people and the subsequent consequences, aren't you leaving yourself open to glorification of whatever disgusting thing you are talking about?

Christian singer Taff to perform Tuesday

Contemporary Christian singer Russ Taff will put on what some record companies are calling "the Christian concert of the year," at 7:30 p.m. Tuesday at Lubbock Municipal Auditorium. Appearing with him will be Mylon Lefevre and Broken Heart and special guest Sheila Walsh.

Taff, who is touring for his Medals album, started out with a family band and moved on to an Arkansas contemporary group called the Sounds of Joy. Soon after, Taff was offered a job with the Imperials.

Later Taff left the Imperials and went on and put his own band together.

For the past couple of years Taff has toured, worked on duets with various singers, traveled abroad on behalf of World Vision and begun gathering some of the material for the Medals album.

Seven-foot Tarpley excites Motta, Mavs

By The Associated Press

DALLAS — The Dallas Mavericks will open the 1986 NBA season at home against the Utah Jazz tonight with high hopes for a higher finish in the Midwest Division because of rookie Roy Tarpley of Michigan.

Tarpley, a first-round draft choice, was impressive during the

preseason at power forward.

"I may have to change my policy about rookies," said Mavericks Coach Dick Motta.

Historically, Motta has been slow to work rookies into his lineup and doesn't depend on them a lot.

However, the 7-foot Tarpley gives the Mavericks much-needed bulk under the basket, and he has displayed an excellent shooting touch.

"We have some interesting possibilities with him in the lineup," said Motta, who could field a front line of Tarpley, 7-2 James Donaldson and 6-9 Sam Perkins.

Guard Al Wood, obtained in an off-season trade, is expected to give the Mavs, the second-highest scoring team in the NBA, even more offensive punch.

Mark Aguirre, who averaged 22 points per game, and All-NBA

Rolando Blackman, who averaged 21 points, return for the Mavs, who finished third in the Midwest with a 44-38 record.

The Mavs are a fast-breaking team.

"Winning now is related to how many easy baskets you get," Motta says, "so we'll continue to work on pushing the ball up without throwing it away."

Spurs to feature running game under new coach

By The Associated Press

DENVER — San Antonio's Bob Weiss will make his NBA head coaching debut against the Denver Nuggets tonight, hoping to improve the Spurs' sixth-place finish last year in the Midwest Division.

Weiss, who was an assistant

under Dick Motta at Dallas, plans to inject a passing-game offense into the Spurs, a la Motta.

There will be some new faces on the roster.

The Spurs, who were demolished in three straight games by the Los Angeles Lakers in last year's

playoffs, obtained veteran forward

Mychal Thompson from Portland

for Steve Johnson.

In the process, the Spurs obtained the rights to 6-10, 245-pound rookie Larry Krystkowiak, who was drafted in the second round by Chicago.

Those two players give the Spurs more inside bulk to go with holdovers Artis Gilmore and David Greenwood. The other forward job

goes to leading scorer Mike Mitchell.

If guard Johnny Moore can bounce back from his bout with a rare desert fever, the Spurs will have a dynamic backcourt duo because Alvin Robertson was a starter in the All-Star game.

Robertson was named the NBA's

Defensive Player of the Year.

Terp officials name new coach

By The Associated Press

280-19 record during 10 seasons at Dunbar.

"It couldn't have happened to a better guy," said Lake Clifton High School Coach Woody Williams,

"I think it will be a job that for a while will be kind of difficult ... but knowing Bob and the type of person he is, the way he works and things he stands for, he can do a job that they'll be proud of and he'll be proud of."

Wade, 41, has had a running feud with Driesell over the years. Wade claimed the Maryland coach would not recruit in Baltimore, while Driesell complained that Wade directed his best players to Georgetown University.

A graduate of Morgan State University in Baltimore, Wade has posted a

extremely hard for us because the Texas team is a relatively new squad without a lot of experience," said Tech representative Kyle House.

"They are not bad, they just don't have a great deal of experience."

Leading Tech will be John Cook, Rob Cyrus, Erik Wayton and Scott Shields.

Raider polo squad meets young 'Horns

The Texas Tech polo team will meet the University of Texas at 10:30 a.m. Saturday in Tech's first home match of the 1986 season.

The match will be played on the Tech polo field at 19th Street and University Avenue.

Tech currently leads its division.

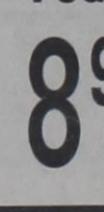

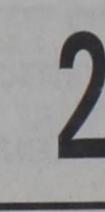

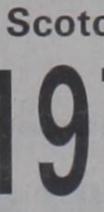

"I don't think the match should be

Tech spikers retool machinery for 7th-ranked UT

By LYNDOL LOYD
Sports Staff Writer

Trying to regroup after dropping a pair of matches to Houston and Rice, Texas Tech Coach Donna Martin's volleyball team, 9-10 this year and 2-5 in the Southwest Conference, will square off against 7th-ranked Texas at 3 p.m. Sunday at the Student Recreation Center.

The Red Raiders' starting lineup has been hit with a rash of injuries,

and Martin's biggest problem may be finding enough healthy players to compete against the powerful Lady Longhorns.

Last weekend Tech had to manage without the talents of junior outside hitter Becky Boxwell. Boxwell suffered a severely sprained ankle during the third game of Tech's game against Rice. To further complicate the Raiders' problems, sophomore middle blocker Susan Kelly was forced to leave the Houston match with

severe stomach cramps. The two spikers started limited workouts Tuesday, but both were considered questionable for Texas.

"We're pretty much out of the conference race, but we have a positive attitude about the Texas match," Martin said. "I think more than anything we will be playing for the purpose of pride. We still need to show people that we are a good team. We just fell upon some hard times."

Texas Coach Mick Haley's squad

will come into Sunday's match with a perfect 5-0 conference record. The Lady Horns are 14-4 for the year.

The Longhorns have lost just two matches since volleyball became a sanctioned Southwest Conference sport. Texas is the defending Southwest Conference champion and advanced to the finals of the NCAA South Region Tournament before losing to UCLA last year.

Leading UT is middle blocker Karen Kramer.

Red Raider netters blast ITCA tournament field

The Texas Tech women's tennis team faced little resistance as the Red Raiders swamped the ITCA Tournament field Thursday in the qualifying round of the UT-Austin event.

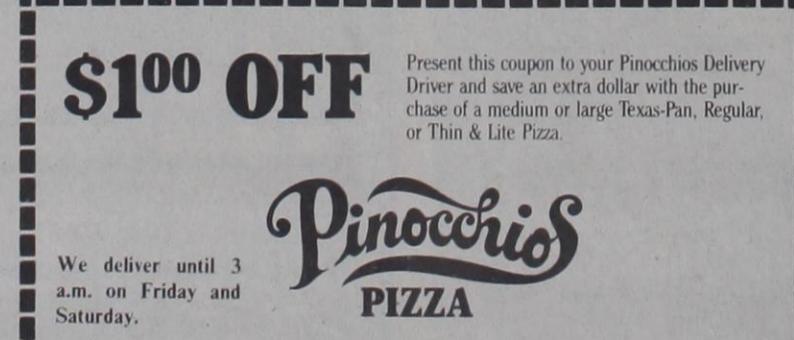

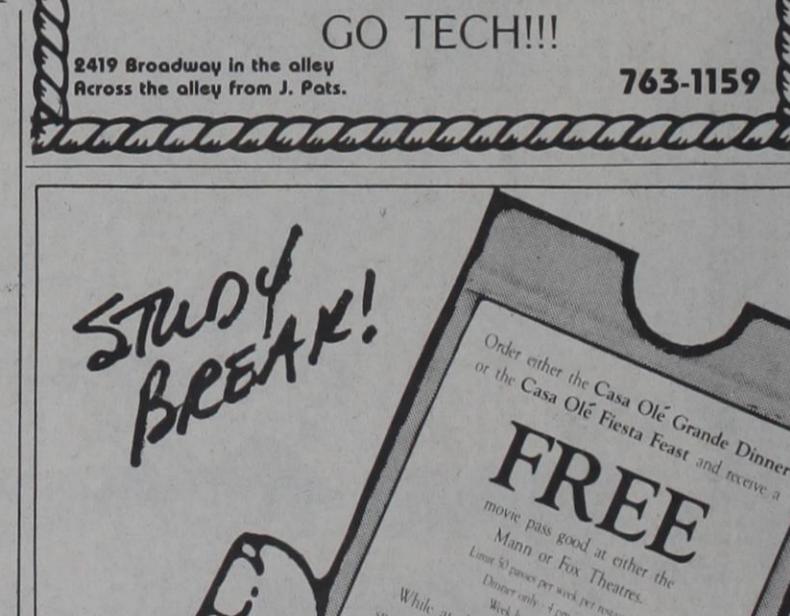

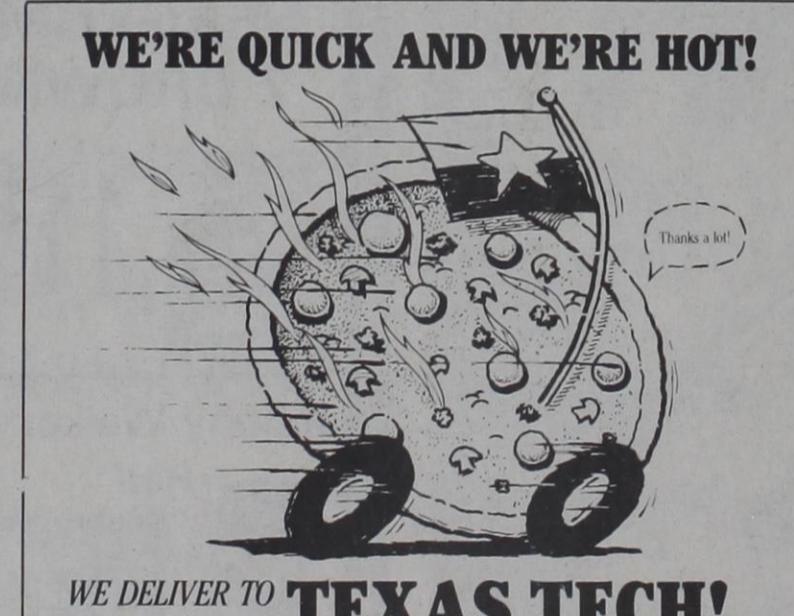

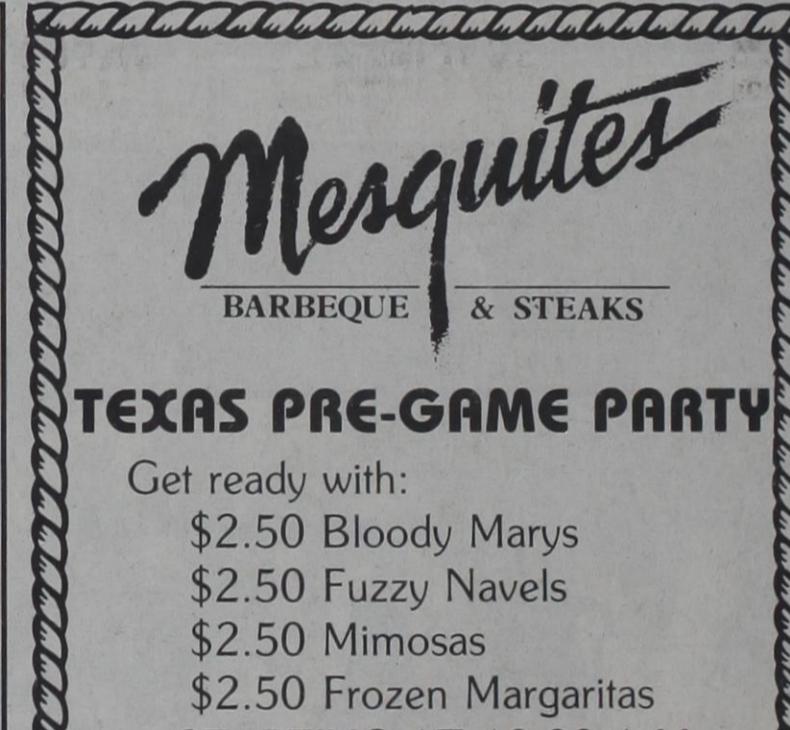

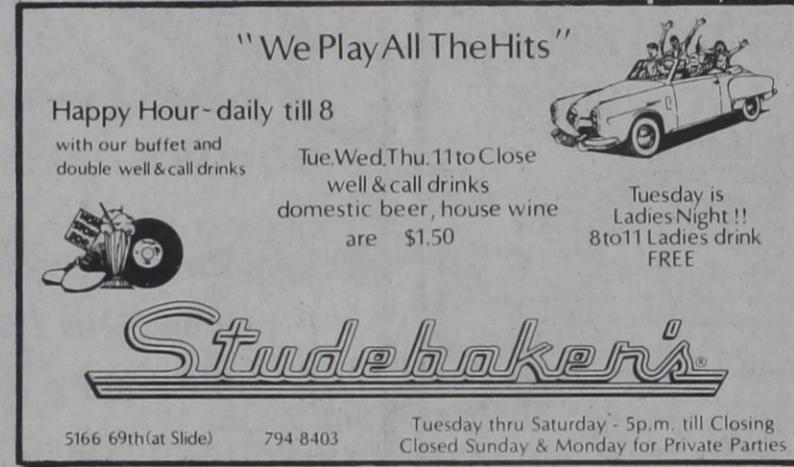

Eva Ziegler, Annemarie Walson,

Barbara Fitterer and Lisa Roberts all posted first-round wins. Cathy Carlson was the only Tech netter to be defeated in the first round of play.

The Raiders faced a no-lose situation in the second round of play as Walson faced teammate Fitterer.

Walson won, 6-1, 7-5. Ziegler beat Rice's Megan Tanner 6-1, 6-2. Roberts downed Josee Lemire of UT-Tyler 6-4, 6-2, while Hrebec lost to Houston's Kathy Foxworth 6-1, 6-0. Brigance fell 6-3, 6-1 to UT-Tyler's Sophie Barlemon.

The doubles teams went through the day without dropping a match. The No. 5-seeded Brigance-Walson pairing defeated Loonen-Papahronic of North Texas State 6-3, 7-5. The same team shut out Scott-Mitchell of Grambling 6-0, 6-0.

Tech's Ybarra takes dreams cross country

By JOHN MARK WALLS
Contributing Writer

When is the last time you ran more than 10 miles in a day? For Carlos Ybarra it's a common event at a not-so-common speed.

Ybarra is Texas Tech's number one cross country man. He's consistently finished among the top contenders in each meet Tech has been in this year and recently ran a time of 25:52 over the five-mile course at the Texas Tech Invitational. All this for a man who nearly didn't come to Tech.

Ybarra grew up in Lamesa and attended South Plains College and West Texas State University before coming to Tech. "I was so afraid, coming from a little high school and a little junior college. Then I go to Tech with over 20,000 people — that's bigger than my hometown," Ybarra said.

"But everything has worked out really well."

He first started running the mile and the half-mile in high school but could not run cross country because it was not offered in Lamesa. So Ybarra decided after high school to get the

physical maturity he needed for cross country — by joining the Marines.

"The main reason I went was because I wanted to take my time and mature a little bit. Since I didn't have any cross country experience, I wanted to mature before I started running college track," he said.

After his stint in the Marines, Ybarra went to South Plains. During his sophomore year, he finished third in the junior college national championships. Ybarra then transferred to West Texas State for one year, where he was the Missouri Valley Conference champion in cross country. "Nobody even considered me in the top 10, so it was a big upset," he said.

Ybarra left West Texas and was persuaded to come to Texas Tech by Coach Corky Oglesby. "The school (West Texas) wasn't what I wanted," Ybarra said. "I really like it here. If I would have known it was going to be this good I would have come here in the first place."

Apparently, Ybarra has found a good working relationship at Tech with his teammates and his coach.

"My teammates are fantastic," he

said. "We love everything we do together and we have a good time at the meets. Coach lets us adjust to what we have to do for the week and the upcoming month. I have a lot of experience running, and he's allowed me to use most of it the way I think is proper."

In turn, Oglesby speaks highly of Ybarra. "Carlos is an excellent team member," Oglesby said. "He's proven to be a leader among the guys and he is very well-liked. He's a hard worker and mentally tough. Carlos turns in just super workouts."

Those "super workouts" include some pretty hard training. "We try to have fun in our runs as well as good tough workouts," Ybarra said. "We'll do 60 to 70 miles a week."

Ybarra certainly maintains a world-class training regime. But he says he's not overly concerned with the numerous superstitions that often are embraced by runners.

"Other than counting every time I drink water or tying my shoelaces the same way every time or wearing the same socks, there's not anything out of the ordinary," he said.

With the Southwest Conference cross country championship Monday in Waco, Ybarra looks for the Raiders to challenge for the upper division of the SWC.

"I'm expecting to do really well," he said. "In conference we've got a shot at placing in the top five teams."

Once conference is over, Ybarra hopes to build for the future. "Hopefully, I'll get a chance to work with these guys even longer. This is my last cross country season, but I have two track seasons left. I'm going to see if I can help a couple of my friends get here," he said.

Ybarra's plans include working in track as a coach, preferably in a small high school.

"I've got a couple of years left, and I've just got to use them properly in hoping to qualify for the Olympic trials — maybe qualify for a couple of world championships," he said. "Those are some high hopes and big dreams, but I'm working as hard as I can to make them come true."

If you're a betting man, you might want to consider betting on Carlos Ybarra to fulfill his goals.

Setting the pace

Texas Tech cross country runner Carlos Ybarra puts some distance between himself and an unidentified Wayland Baptist runner earlier this year at the Texas Tech Invitational at Mae Simmons Park.

McWilliams

It's showtime for Raiders, Longhorns

By BRAD WALKER
Sports Staff Writer

David McWilliams, in his first year as a head coach, admitted that when Saturday rolls around and Texas Tech lines up against the University of Texas, he will not feel exactly comfortable.

He has been away from home for a few months now, and he already has seen both the good and the bad. He has weathered a mid-season storm, and he has led his new family of Red Raiders to one of its biggest wins ever.

This weekend, though, he may finally feel a bit homesick.

After starring as a center-linebacker in the early 1960s and coaching for 16 years at Texas, McWilliams will be sidelined opposite the Longhorns for the first time ever.

A sellout crowd of 47,000-plus is expected at Jones Stadium Saturday when the Raiders host the 'Horns,

which should help remind McWilliams that he is at home. He should be thankful the game is not at Memorial Stadium in Austin. He might have wandered to the wrong sideline and sung the wrong school song.

The game is set for a 12:04 p.m. kickoff and will be televised regionally by Raycom-TV and picked up by the USA Network. It can be seen locally on KCBD-TV, Channel 11. The radio broadcast can be heard on KFYO-AM, 790.

Tech, 4-3 on the season and 2-2 in Southwest Conference action, comes into the game favored by one point. That likely will put some added pressure on the kicking game, a trouble spot for the Raiders, according to McWilliams.

"I think there is no question we are worried about our kicking game," McWilliams said. "This week off helped us in the kicking game as much as any part of our football

team. It helped take the pressure off."

Raider kicker Scott Segrist leads the team in scoring with 32 points and is a perfect 14 for 14 in extra-point tries. He has slipped in the field goal

returners have yet to break for a touchdown, but Tyrone Thurman is averaging 8.5 yards per punt return and had a TD called back against Rice.

All-America kicker Jeff Ward

department, however, having made six of 13 this year and only one of his last seven attempts.

The punting duties have bounced back and forth between true freshman Jamie Simmons and sophomore Chris Burns. Simmons, recruited by McWilliams out of Aldine Nimitz, is averaging 37.8 yards per punt, while Burns, originally a walk-on, is netting 39.3 a kick.

Tech's much-heralded kick

heads a traditionally strong Longhorn kicking game. Ward is fresh off another game-winning field goal last week in a 27-24 victory over SMU. In the 29 wins Texas has accumulated during Ward's career, he has proved to be the difference in 13 of them.

His 53 career field goals rank him second on the all-time SWC list, three behind former Texas A&M kicker Tony Franklin. He is 10 of 10 on extra points and seven of 13 on field goals

Akers

this season. Four of his misses have come from beyond 50 yards.

Alex Waits, a freshman punter out of Plano East, is averaging 45.7 yards per punt, his longest being a 62-yarder.

Both teams enter the contest following big wins. Tech defeated Rice 49-21 two weeks ago and had one extra week to prepare for the 'Horns. Texas upset SMU in Dallas.

"Last week was a good confidence builder, and it came at the right time," said Longhorn defensive end Blake Brawner. "We always knew we were just a spark away from playing well. I hope it carries over into this week and to the next few weeks."

Brawner leads what McWilliams, who coached Brawner the past three seasons, believes to be one of the top units on the Texas squad.

"Defensively they are banged up, but they are strong in the front line, where most everybody is back," McWilliams said. "They have a lot of

depth at defensive tackle, and the defensive ends are extremely quick. They have had a lot of injuries at linebacker, and that's been a problem for them in the last few games."

Tech will try to counter with its best offense since 1976, when the Raiders were co-SWC champs. Tech is averaging 37.3 yards a game in a balanced attack, drawing 169 steps on the ground and 207 in the air.

The Raider running game is coming off its top showing of the year. James Gray and Isaac Garnett each rushed for 135 yards against Rice.

Both teams are fairly injury-free. Raider wideout Bruce Perkins is doubtful with a calf injury, but flex end Tim Tannehill is expected to return after missing three weeks with a bruised kidney. Tackle Nathan Richburg is questionable with a sprained knee.

Texas defensive tackle Steve Llewellyn and linebacker Lee Beckerman both are questionable.

What the players say ...

UT defender not letting sentiment obstruct goal

By BRAD WALKER
Sports Staff Writer

Much has been said the past two weeks about the reuniting Saturday of Texas Tech head football Coach David McWilliams with his alma mater, the University of Texas.

McWilliams has spent the major portion of his football career, both as a player and coach, on the Austin campus. He was on staff under the legendary Darrell Royal and Fred Akers from 1970 to 1985, the last four years as defensive coordinator. His '83 unit was the best in the nation.

There is, of course, another side to this weekend's story. The one of the players.

For Longhorn defensive end Blake Brawner, the game may mean just as much as it does for McWilliams.

Brawner, a senior from Richardson Berkner, started the past two seasons under McWilliams. At 6-2 and 241 pounds, Brawner led Southwest Conference linemen with 11 quarterback sacks in 1985. In the previous three years at Texas, he racked up 171 tackles, including 52 solo stops each in his sophomore and junior seasons.

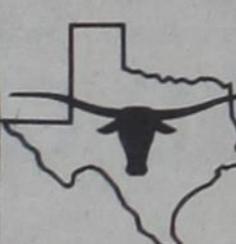

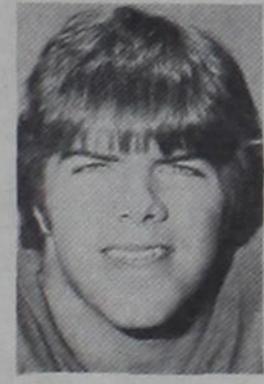

He has been a vital, consistent member of the 'Horn defense, and he has plenty of fond memories of his former boss, McWilliams.

Brawner comes to Lubbock this weekend with mixed emotions.

"It's going to be exciting," Brawner said Thursday. "But it's going to be really different seeing him in red and black instead of burnt orange and white."

Brawner does not want Saturday's events to get overly sentimental, however.

"It's going to be like any other game," he said. "He's trying to

Brawner

build a winning program at Texas Tech, and we're trying to win here at Texas."

The obvious factor of knowledge will come into play during the matchup. McWilliams knows most of the 'Horns' personnel, and the Texas players and coaches know a few things about McWilliams.

"He knows a lot about us and our strengths and weaknesses, and he will use that to their advantage," Brawner said. "Maybe our coaches will be a little more prepared, but I don't know that we will be. We never got to see Coach Mize (Tech assistant John) as an offensive coordinator. I don't know that it will have a great impact on us."

Brawner does expect to see some extra motivation on the part of McWilliams and his team against his old school. Texas has found the going rough in Lubbock in recent trips. In Brawner's only appearance here he came away with a 13-10 victory, while Tech won the meetings in 1980, 1976, and 1974.

"Tech has always played us tough there," he said. "I don't know what it is that makes the difference, but there is a difference. With Coach McWilliams, they will be very fired up to play."

Although controversy surrounds Akers and his job security, Brawner said he believes the 'Horns also will be ready to play.

Past losses leave Raiders hungry for win

By DON WILLIAMS
Associate Sports Editor

The Texas Tech defense — the veteran members, at least — still carry the bad-tasting memories of their encounters with the Texas Longhorns, memories they'll be trying to swallow come noon Saturday in Jones Stadium.

Last season in Austin, an early fluke touchdown helped the Longhorns jump out to a 14-0 first-quarter lead, which they later built to 21-0 in a game they went on to win 34-21.

With a 7-0 advantage and seven minutes left in the first quarter, Texas quarterback Bret Stafford lofted an underthrown pass toward a streaking Everett Gay. Tech cornerback Carl Carter deflected the ball, only to have it settle in the arms of Gay, who carried it in for a 69-yard touchdown.

The shell-shocked Raiders never could get back in the game.

Two seasons ago was even worse. Tech running back Timmy Smith plunged into the end zone from a yard out with 15 seconds left in the first half of a tight defensive struggle, giving the upset-minded Raiders a 10-0 lead.

Then Jones Stadium fans watched it slowly, surely, painfully fade away. Possession after possession, the Tech offense was stymied in three downs and a weary, overworked Raider defense finally wilted. Two Jeff Ward field goals — the last coming with three seconds left in the game — capped a 13-10 Texas victory.

You have to go all the way back to 1980, when the Raiders prevailed 24-20, to find the last Tech win in the series. Hence, no current Raider has enjoyed the satisfaction of beating the burnt orange and white.

"Tech has always played us tough there," he said. "I don't know what it is that makes the difference, but there is a difference. With Coach McWilliams, they will be very fired up to play."

Although controversy surrounds Akers and his job security, Brawner said he believes the 'Horns also will be ready to play.

"It seemed like that game had a

bearing on us," Johnson continued. "If we had beat 'em, I think we probably had a good chance to play in a postseason bowl game. But I think some team members let that one nag on us the rest of that season."

The heartbreaker triggered a season-ending, four-game losing streak that sent the Raiders stumbling from 4-3 to 4-7. Ironically, Tech faces the same situation Saturday, carrying a 4-3 record and bowl hopes into the contest.

But Tech senior linebacker Brad Hastings believes the afternoons of frustration could end this time out.

"It was (frustrating). We beat 'em physically all over the field (in 1984); then they came back in the fourth quarter and wore us down and were able to kick a field goal on us to win," Hastings recalled. "But I don't think this game will be anything like that. I think we'll dominate the whole game."

A two-game Raider win streak, coupled with a lackluster season so far for Texas, is the basis for Tech's optimism. Not even the Longhorns' 27-24 upset of SMU last week has made the Raiders especially fearful.

Asked if the Longhorns might be a team ready to explode, Johnson, Tech's leading tackler, replied, "To explode, I'm not so sure I'd use that word. They might be playing a little bit better now that the season's progressed."

The Longhorns stand at 3-3, with a 2-1 SWC ledger.

"I think it (the win over SMU) has been like a turning point for them," Tech senior rover Leonard Jones said. "And they're pretty high up; they're on a roll. But, hopefully, we'll take it away from them Saturday."

The Raiders were particularly successful in shutting down the Arkansas attack three weeks ago in a 17-7 upset, and Texas' run-oriented offense is comparable to the Hogs. Stafford and Arkansas signal-caller Greg Thomas have been two of the SWC's most elusive running quarterbacks, and both are high-percentage passers.

"They've got some similarities," Hastings said. "(Texas) has got a big line. They've got a different type backfield than Arkansas. Arkansas had a wishbone and Texas has an 'I,' but our defense plays well against the run, so I don't think Texas will be able to run too well against us."

The game carries special significance, of course, for first-year Tech Coach David McWilliams, who came to Lubbock after 19 seasons

with the Longhorns. The Raiders say that hasn't been a major factor during preparation this week, however.

"It's been downplayed a little," Jones said. "Everybody wants to do it for coach. He's kind of downplaying it, too, but everybody knows it's gonna be a big game regardless."

"I don't feel like we need anything like that to get us pumped up for a game if we can't do it for other reasons," Johnson added.

Closing in

Texas Tech rover Leonard Jones had his hands full against Baylor this year in Jones Stadium. Despite lopsided losses to the Bears and Texas A&M, Jones and the Red Raider defense continue to warrant respect from Southwest Conference foes.

SPORTS

Women golfers to compete at Stanford

The Texas Tech women's golf squad will participate in the 23rd Annual Stanford University Women's Intercollegiate Golf Tournament today, Saturday and Sunday at Stanford, Calif. Tee time for the 54-hole tournament will be 10:30 a.m. all three days.

A tough field will face the Red Raider golfers on the par 73, 5,886-yard Stanford golf course. Seven of the 19 teams entered in the tournament are ranked in the NCAA Top 20.

In addition to Tech and Stanford, other teams include Arizona, No. 3-ranked Arizona State, Hawaii, Indiana, Long Beach State, Minnesota, New Mexico (ranked 18th), San Diego State, Oklahoma State (10th), San Jose State (5th), USC, SMU (9th), Texas A&M, Tulsa (7th), UCLA, United States International University and Washington. Host Stanford is ranked eighth in the nation in women's golf.

Leading Tech will be Snyder junior Lisa Franklin-Beck and Lago Vista

junior Kay Linda Shive, both two-year letterwinners and the only players on Coach Jay McClure's squad this season with any substantial experience. A group of freshmen, Kelly Green and Shanna Jeffcoat, both from Kingwood, and Amy McDougall of Dumas, round out Tech's tournament squad.

In two tournaments so far this fall, Shive is averaging an even 80 strokes per round, while Franklin-Beck has come in with an 80.8 strokes-per-round average.

Tech's women golfers will close out the fall 1986 season in mid-November at the Lady Cardinal Invitational, hosted by Lamar University, in Beaumont.

SWC ROUNDUP

By The Associated Press

DALLAS — Here are the highlights of this week's Southwest Conference football games:

RICE AT ARKANSAS, 1 p.m.

Arkansas hosts an inspired Rice team as the Owls seek to bounce back from a 45-10 loss to league-leading Texas A&M last week at College Station. The Owls (2-5, 1-4 SWC) and Razorbacks (6-1, 3-1) are meeting for the 62nd time in a series which stands 30-28-3 in Arkansas' favor.

The Hogs are 9-3 in SWC play over the last two seasons.

Arkansas relies on a high-percentage passing attack by quarterback Greg Thomas, who paces the SWC in completion accuracy (61.6 percent) and in passing efficiency (154.1).

TEXAS A&M AT SMU, 2 p.m.

In a battle pitting two teams which have been in the Top 20 for most of 1986, the Aggies and Mustangs should certainly be primed for a SWC in-season classic. A&M (6-1, 4-0) eked out a 19-17 win at College Station last year en route to a 7-1 league record and the SWC championship.

SMU (5-2, 4-1) has rebounded nicely from a 6-5

overall finish a year ago and needs a win to equal that victory output in just eight games this year.

Saturday's game matches three of the top four SWC rushers (SMU's Jeff Atkins against A&M's Keith Woodside and Roger Vick), two of the top four SWC total offense leaders (A&M quarterback Kevin Murray and Mustang quarterback Bobby Watters), and two of the league's top kicking specialists in placekickers Scott Slater of A&M and SMU's Brandy Brownlee.

TEXAS CHRISTIAN AT HOUSTON, 7 p.m.

Houston (1-6, 0-4) stays in the Astrodome two weeks in a row to take on a hungry group of Horned Frogs (2-5, 0-4). This rivalry goes back only as far as Houston's entrance into the SWC in 1976. The Cougars downed the Frogs 49-21 in the Dome to inaugurate the decade-old series, and UH holds a 9-1 lead over TCU.

The Horned Frogs prevailed 21-14 in 1984 prior to advancing to the Bluebonnet Bowl, but UH scored a 26-21 victory at Fort Worth last season.

TCU running back Tony Jeffery is pushing the 1,000-yard mark after seven games with 829 yards on 114 carries to lead the conference with an average of 118.4 yards per game. UH quarterback Gerald Landry, alternating for much of the year with Mark Davis, is climbing the SWC career total offense ladder and hopes to return to action this week after an injury.
