Meaningful degree

The Foundation for Interior Design Education Research has assured interior design students that curriculum standards provide a strong background knowledge by accrediting Texas Tech's interior design program.

Tech's program was accredited in August and JoAnn Shroyer, the interior design program coordinator, said she believes the benefits of the accredited program are unlimited to students.

Tech is the only university in Texas that offers a bachelor or interior design degree.

Jam session

Despite a mediocre turnout for the Kenny Loggins concert Monday at Lubbock Municipal Coliseum, Loggins played as though he were performing for 50,000 people.

Loggins broke into the performance with his new hit release, "Nobody's Fool," from the movie soundtrack of "Caddyshack II."

Loggins had two encore performances, singing his multi-platinum single "Footloose" and the ballads to "Forever."

Space shuttle receives 'excellent review'

By The Associated Press

CAPE CANAVERAL, Fla. — A new NASA launch directorate met Tuesday to clear the shuttle Discovery for its Thursday liftoff, hearing an "excellent review" of the \$1.5 billion spacecraft's readiness — but holding off giving a go-ahead for the final countdown.

"In general, the whole picture is very good for going flying the day after tomorrow," said former astronaut Robert Crippen, who heads the launch oversight panel created to overcome management problems that contributed to the 1986 Challenger catastrophe.

Crippen said the group was focusing on two items and needed to be certain neither would imperil NASA's first manned mission in 32 months.

Launch is scheduled for 8:59 a.m. CDT on Thursday, with the final countdown to begin early this evening. "The weather is probably the biggest question mark," said Crippen.

Cloud-covered skies and Atlantic winds loomed posing a possible threat which may delay the launching. Air Force spokesman Mike Beeman forecast "a 20 percent probability of bad weather at launch

time," but added, "That's pretty low." Historically, launches have been delayed 40 percent of the time because of weather.

Discovery's five astronauts went over their flight plan and relaxed with their wives as the ship sat surrounded by work platforms on launch pad 39B. Heat shields, removed for engine check-out, were back in place and engineers checked guidance and navigation systems. Inside the cargo bay: the Tracking and Data Relay Satellite (TDRS) to be placed in orbit just six hours after launch. A similar satellite was destroyed in the Challenger catastrophe.

One of the hardware items still in question was an O-ring in the satellite propulsion system. The other involved a small jet thruster aboard the orbiter itself — a component that could be bypassed if need be.

The \$100 million data-relay satellite had already been approved for flight when NASA discovered a problem with similar hardware being prepared for flight next February.

Crippen said an examination of the inertial upper stage (IUS) rocket that boosts the satellite to its final orbit indicated damage in the O-ring that seals the pressure needed to gain thrust for orbit. (The O-ring is not the

same part that failed in leading to the 1986 Challenger disaster.)

NASA needed to be certain the flaw was not replicated aboard Discovery, Crippen said. Air Force Col. Dennis E. Beebe said experts believed the O-ring was "damaged as part of the installation procedures," and so the problem also would not exist on the satellite aboard Discovery.

Crippen said the shuttle cargo bay would not be opened for inspection of the satellite, but that propulsion experts would conduct tests overnight on other such rockets to make sure they don't leak.

"You have heard they have a great deal of confidence they'll be able to come in and tell us tomorrow that they think they are prepared to fly," Crippen said.

The report was due at another meeting of the oversight team at 10 a.m.

Delivery of the satellite is Discovery's main mission in NASA's long-awaited return to space, and the space agency would not likely launch without being sure there was no problem.

The shuttle fleet has been grounded since Jan. 28, 1986, when a booster rocket failure destroyed Challenger and took the lives of seven astronauts.

Many NASA workers were wearing green ribbons on their workclothes this week to signify their hopes for a safe liftoff and successful mission.

Following is the day-by-day highlights of the flight of Discovery on the 26th space shuttle mission scheduled for launch Thursday:

Day One

Launch set for 9:59 a.m. EDT. Six hours, 12 minutes after launch, during the fifth orbit, astronauts release a Tracking and Data Relay Satellite from the cargo bay. Activate experiments to process materials and to study the effect of weightlessness on red blood cells and organic materials.

Day Two

Continue previous experiments and start others that examine the influence of weightlessness on crystals and other substances, photograph lightning in the atmosphere and demonstrate the feasibility of using infrared communications links in space.

Day Three

Continue experiments. Photograph the horizon "twilight glow" before sunrise and after sunset. Practice reentry procedures, including donning pressure suits and setting up a telescoping pole that the astronauts would slide down if they had to bail

Liftoff

The space shuttle Discovery is scheduled to launch 8:59 a.m. CDT at Cape Canaveral, Florida, Thursday.

Mark Hartley/The University Daily

out during gliding flight on an aborted landing attempt.

Day Four

Astronauts hold an in-flight news conference, answering questions submitted by reporters covering the mission. Deactivate experiments, stow equipment and check flight control systems in preparation for return to Earth.

Day Five

Fire deorbit engines and start an hour-long descent, with landing at Edwards Air Force Base, Calif., set for 9:55 a.m. CDT Monday.

Tech group modeled after United Nations

By DAWNA COWAN
The University Daily

As students graduate and become professionals, knowledge of other cultures and world events gained from participation in the Texas Tech Model United Nations will prepare them for interaction on a global scale.

The Model United Nations organization is based on the real United Nations, said Kevin Carruth, the group's undersecretary for external affairs.

"We think we're a unique organization because we have a wide scope of interest," he said.

Carruth said the Model United Nations, which is structured like the United Nations, includes agriculture, civil engineering, history, geography, political science and more.

"Anybody can participate," he said.

Members of the model organization attend simulated meetings each year, Carruth said, at which students represent countries in the United Nations. He said each participating organization sends a list of countries it would like to represent and that the host of the simulated meeting assigns countries to each group.

Attending a St. Louis simulation in February 1989 is one goal of the Tech Model United Nations, Carruth said.

At the simulation, the Tech organization will represent Nepal.

"Nepal is one of the handful of countries that are on the Security Council," he said. "That's where the action is."

Resolutions approved by the General Assembly must be passed by the Security Council. Carruth said many resolutions require a unanimous vote.

He said although small, Nepal has as much weight in the Security Council as the United States or the Soviet

Union.

Carruth said members of the organization must research the country to learn cultural aspects and policy positions.

"You live and breathe the country you represent," he said.

Participants also must understand citizens so members can represent the people much like a governor represents constituents, he said.

Carruth said students get so involved in role-playing at the simulations that representatives get offended if derogatory comments are made about the country they are representing.

Crisis simulations also take place at the meetings, Carruth said, with situations such as military acts, aggression or stock exchange problems invented for the Model United Nations to face.

"It's a lot of fun," he said. "There's a lot of real-life drama to it."

The simulated meeting in St. Louis is one of the most prestigious simulations in the country, Carruth said. He said 140 of the 159 countries will be represented.

Members of the organization hope to sponsor guest speakers in the form of a lecture series. Carruth said because Lubbock is located in an agricultural area of the state and because the city has the International Center for Arid and Semi-Arid Land Studies, many international people come to Lubbock to conduct research.

Carruth said he hopes international visitors will speak to the organization.

The group plans to build an international studies library filled with documents and books about various cultures.

A long-range goal, Carruth said, is to host a simulated meeting at Tech.

"Instead of going away to other places, we can have them come to us," he said.

Teacher who stops gunman labeled heroine

By The Associated Press

GREENWOOD, S.C. — A teacher who was wounded while trying to stop a gunman during a fatal shooting spree in an elementary school and then held the man for police "thinks about others before herself," colleagues said.

An 8-year-old was killed and two teachers and eight students were wounded in Monday's attack at Oakland Elementary School.

"He seemed to be shooting people who were screaming," said School Superintendent Robert S. Watson. "The teacher said those who were screaming or making noise, he shot them."

City Recorder Ted Windham denied

bond Tuesday for James William Wilson, and retired state Supreme Court Justice Bruce Littlejohn, acting as a special judge, ordered Wilson to undergo psychiatric examination.

Relatives said Wilson, 19, had been in and out of a hospital psychiatric ward.

Police Chief James Coursey said Tuesday that Wilson was charged with murder and other charges were being drawn up to be served after the psychological evaluation. Solicitor Townes Jones said his office will consider pursuing the death penalty.

A 7-year-old who was shot in the neck was returned to surgery Tuesday because of complications and was in critical condition.

Coursey said Wilson walked through the school's front door Mon-

day morning, went to the cafeteria and opened fire with a .22-caliber, nine-shot revolver, wounding one teacher and three students.

He left the cafeteria and entered a girl's restroom to reload.

Physical education teacher Kat Finkbeiner followed and tried to prevent him from leaving the room, Coursey said, but when they scuffled Finkbeiner was shot in the hand and mouth.

Wilson got by Finkbeiner and opened fire in a classroom, wounding five students and killing Shequila Tawonn Bradley, Coursey said.

After emptying his pistol, Wilson dropped it. Finkbeiner told him to raise his hands and made him stay in place until a police officer arrived, the chief said.

Those who know Finkbeiner said her action came as no surprise, said Gay McHugh, principal at Lakeview Elementary School, where Finkbeiner also teaches.

When she heard a physical education teacher had helped stop the gunman, "I knew immediately it had to be her. She is always willing to go that extra mile," McHugh said.

Penny Dean, who used to teach at Oakland, said Finkbeiner "thinks about others before herself."

Dean said Finkbeiner "really cares about people. Everything she does she does with gusto."

Finkbeiner was in fair condition Tuesday at Self Memorial Hospital and has not yet talked with police, said spokesman Dan Branyon. A second teacher was in good condition.

Oswald's widow claims husband didn't act alone

NEW YORK — Lee Harvey Oswald's widow says she now believes Oswald was not acting alone when President John F. Kennedy was killed. "I think he was caught between two powers — the government and organized crime," Marina Oswald Porter said in the November issue of Ladies' Home Journal, published Tuesday.

Testimony by Oswald's widow, who married Dallas carpenter Kenneth Porter in 1965, helped the Warren Commission conclude that a deranged Oswald acted alone in the Nov. 22, 1963, assassination.

"When I was questioned by the Warren Commission, I was a blind kitten," she said.

The commission, appointed to investigate the assassination, concluded it was the work of a single gunman, Oswald. In 1979, however, the House Select Committee on Assassinations, relying in part on acoustical evidence, concluded that a conspiracy was likely and that it may have involved organized crime.

Since then, Porter, 47, has drawn new conclusions.

"I don't know if Lee shot him," she said. "I'm not saying that Lee is innocent, that he didn't know about the conspiracy or was not a part of it, but I am saying he's not necessarily guilty of murder."

Doggett announces plan for Texas judges

By LAURA MERRILL
The University Daily

Former state Sen. Lloyd Doggett Tuesday announced a four-point plan to reform the selection process for state judges at a press conference promoting his candidacy for Place 1 on the Texas Supreme Court.

First, Doggett would like a voluntary limit placed on large campaign contributions to ensure that lawyers do not dominate the election process, he said.

Second, he said special interest political action committee (PAC) contributions should be prohibited. Without the provision, he said, candidates will use PAC contributions as a loophole to escape limits imposed on other campaign contributions.

Doggett also said the professions

and firms of contributors should be disclosed, enabling the public to know who is backing candidates.

Finally, Doggett's reform plan stipulates that information bulletins be provided to all voters outlining the background and qualifications of judges seeking re-election. Those judges with lower profiles will benefit from this provision as well as enabling the public to be better informed, he said.

"My goal is to ensure that people on the lower rungs of the economic ladder, trying to climb up, get every bit as fair consideration of their legal problems as the few that are already sitting comfortably on top," he said.

Doggett said his recommendations are not unique, but he explained that they are a step in the right direction to restore confidence in the state

judiciary.

To set an example, Doggett has limited individual contributions to \$5,000 and has declined all PAC contributions.

"I am committed to maintaining the right of Texas voters to elect judges rather than turning that power over to Gov. (Bill) Clements."

He said elected judges are accountable for their actions and that as a judge, he would serve a six-year term. At the end of the six-year term, he said, he would not be afraid to face the public.

Doggett said he believes in a sense of ethics.

"There was never a question concerning my conduct. I do not mix private and public business," he said. "My experience as a legislator has taught me a deep respect and

Matt Brunworth/The University Daily

Doggett

understanding with regard to the separation of powers — that judges must interpret, but should never make laws in the course of deciding cases before them."

Tech administrative restructuring action shows worthy effort

Amid the frenzy and excitement of the search for and future hiring of a new Texas Tech president, another major change in the Tech administration has been overlooked.

The Tech Board of Regents has adopted a proposal to alter the administrative structure of the university. The action, which is certain to have a positive effect on both the university and the Texas Tech University Health Sciences Center, is worthy of recognition.

Under the new structuring system, the administration will be composed of a president, who will act as the chief executive officer and is directly responsible to the Board of Regents, an executive vice president/provost who will be the chief operating officer and chief academic officer of the university and an executive vice president/provost who will act as the chief operating officer and chief academic officer of the TTUHSC.

Both vice president/provost positions, under the proposal, have been filled through appointments made by the president.

In effect, the two vice president/provosts — Donald Haragan and Bernhard Mitemeyer — will be in charge of the day-to-day operations and academic procedures of the two institutions, freeing the president from routine daily tedium and allowing him to concentrate on the development and enhancement of the two institutions at the state and national level.

Also, the president would have more time to devote to fund-raising ventures for both institutions. Both Tech and the TTUHSC are in great need of additional funding for the 1989-90 academic year.

A possible setback to the restructuring is the additional funding needed to support the salaries of two vice president/provosts under the system. The system will eliminate the office of vice president for finance and administration, reassigning the financial duties of that office to the newly created office of vice president for fiscal affairs, and will eliminate the position of vice president for academic affairs and research.

The salaries of the two eliminated offices will subsidize the salaries of the new vice president/provosts. Thus, the additional financial burden on the university may be limited to a slight increase in salary for the new positions.

The suggested system is being modeled after a more sophisticated system consisting of a chancellor and two presidents. Such a system has been successful at universities with a substantially higher financial status.

Regents are to be commended for not attempting to adopt a chancellor system that would result in higher salaries for the top three administrators. Such action would defeat the primary purpose of restructuring the administration: increasing funding for the university and TTUHSC.

Although the regents have adopted the new administrative structure system, the program will not be put into effect immediately. The administration along with the board of regents must resolve details before the system is implemented.

Foreign kids pose U.S. problem

Young beggars pester El Paso

Michelle Bleiberg
Managing Editor

Working to help underprivileged children is a must in this country, but it is not a must for this country to help underprivileged children from foreign countries.

A Texas city, however, because of its fairly unusual situation — it borders Mexico — has agreed to cooperate with Juarez, Mexico, to study and help children who come to the city, El Paso, and beg on the streets.

During the summer the problem of street beggars — most of them Mexican children — grew im-

mensely. The children could be seen on about every traffic corner off Interstate 10 washing windows and demanding money. The problem drew national attention when an anonymous group paid for several billboards asking people to discourage beggars by not giving money to them.

The U.S. Border Patrol told El Pasoans that if they wanted the begging to stop, they should quit giving to the beggars.

These children no doubt are being exploited by their parents. Some are being rented for a day to adults who carry the 2- or 3-year-old on their hip to make them look more underprivileged.

Several organizations from El Paso and Ciudad Juarez plan to cooperate and begin a pilot pro-

gram next month to improve the family lives of the children.

The Border Patrol has its hands full trying to catch these 100 or so children and taking them back over the border. Now, instead of dropping off the begging children at the nearest international bridge when they are caught, the program will require the Border Patrol to take the children to the Mexican consulate.

The children then will be taken to Juarez, where social workers will try to locate and work with their families.

It is good to see that the two countries are working together to solve a problem. But the Mexican government needs to realize that these children are their problem, and when their problem spills over into

our country that does nothing for good relations.

According to a story by The Associated Press, about half of Juarez' 300,000 children between the ages of 6 and 15 are exploited or abused.

One can't help but feel sorry for these children, but it is not the responsibility of this country to help them. It is the responsibility of this country, however, to do away with a problem that not only aggravates many U.S. citizens but creates a hazard on our streets.

If one of these Mexican beggars was hit by a car and suffered serious injuries, chances are he wouldn't be immediately deported to Mexico, but he would be taken to the county hospital at the expense of El Paso taxpayers.

Mexico needs to do more than just rely on good relations and the United States to solve its problems.

Libertarian outlines party's stance on government, fiscal policy

E.A. Addington
Guest Columnist

Libertarians are accustomed to a certain amount of bad press, but Gary Harper's collage of out-of-text misquotes and non sequiturs (The UD, Sept. 19) so far exceeds what is permissible, even from a presenting student of the journalist's craft, that a decent respect for the opinions of my fellow citizens forces me to respond to his distortion of my positions on the issues.

A charitable view of human intelligence will not allow me to believe that a person of apparently normal mental faculties could come away from an hour-and-a-half interview with so little substantive comprehension of the matters which were discussed therein. I must therefore assume that Mr. Harper's purpose in presenting the UD's readers with such a collection of sensationalistic, atheoretical and underived material was in fact to discredit the very serious and thoughtful positions of a political party which is struggling against heavy odds to restore America, and particularly Texas, as a paragon of individual liberty and individual responsibility in a world increasingly awash in statism, altruism and irrationality.

Certainly it is the Libertarian position that, if we are going to tolerate the existence of a government at all, its activities should be limited to protecting citizens from violations of their liberties by means of force or fraud.

But what are those liberties?

They include above all the right of ownership of one's own person and of the fruits of one's labor. They include the right of peaceful self-expression, the right to sell one's products or time to willing buyers on the open market, the right to possess and dispose of legitimately obtained property as one will, the right to associate with whom one pleases, the right to be secure from violence against one's person and property — in general, the right to live one's life and conduct one's affairs in accordance with one's own best light and without forceful interference by individuals or by government, provided one accords the same rights to others.

It follows, then, that the legitimate activities of government, if any, are limited to: military defense against aggression by invasive foreign powers seeking to forcefully abridge our basic rights (which does not include defending the whole world or even the western half of it); police protection against domestic violence and infringement of property rights (which does not include imprisoning large segments of the population who have not aggressed against anyone except perhaps themselves); and provision of a system of laws and courts to protect the individual against persons using aggression or deception as instruments of personal policy, as well as against arbitrary curtailment of liberties by government itself.

Let us bear in mind that government is defined by its status as a consensually legitimized monopoly of force — that is, in a civilized society, only government is permitted to use physical coercion as an instrument of policy.

Therefore the government's use of its coercive power must be sharply circumscribed in application, lest government itself become the chief violator of basic

human rights instead of their protector.

Our failure as a free people to vigilantly restrict the activities of government to its legitimate domain — the protection of individual liberties — is responsible for the evolution of a contemporary America in which none is free, either personally or economically, and each is chained to what the Demorepublican politicians represent as the social vision of the omnipotent "majority."

Yes, we Libertarians would like to change that. Furthermore, we intend to change that. Yes, we advocate the repeal of all victimless crime laws, including those against the possession, sale or use of either recreational or therapeutic drugs, as well as those which define as criminal the pursuit of such personal pleasures as gambling or smoking tobacco on private property.

Such victimless crime laws fill our prisons to overflowing with people who should never be there in the first place, while rapists and murderers have to be set free on the public again to make room for people whose "crime" was exchanging sexual favors for money or smoking a little pot while watching M-TV.

Yes, Libertarians advocate complete and total laissez-faire capitalism as the only moral and just social system proper to a free nation, which simply means that people should be free to exchange goods and services voluntarily without government interference. We are therefore opposed to trade protectionism, government-enforced unionism, minimum wage laws (which price marginal workers out of their jobs) and government franchises and licensure laws (which grant protected-monopoly status to particular companies or professions).

We also are opposed to any arm of government providing such economically valuable services as education, transportation, health care or municipal services.

We believe that government should divest itself of such enterprises as rapidly and responsibly as possible by auctioning or abandoning these services to private sector providers ("privatization").

We believe in voluntary, decentralized charity, not in "welfare" by means of government confiscation and redistribution of wealth.

Yes, Libertarians are opposed to any and all taxes on principle. Taxation, by definition, means that the government uses the implicit threat of force to extort from individuals money which they would not voluntarily contribute to finance activities of which they do not approve.

Libertarians believe that all the legitimate activities of government should be financed by voluntary contributions and that citizens should not be restricted from contributing financially to any non-governmental activity they choose.

Libertarians believe that the government should get out of the money business. Money, like any other valuable commodity, should be provided by private enterprise. A private bank (and banks should be private, not subsidiaries of the inflation-producing Federal Reserve system) which tried to pawn off worthless paper not backed by any objective standard of value would be laughed out of the marketplace.

Texans are lucky this year. For the first time in history, the Libertarian Party of Texas has "automatic" ballot access.

There is a large slate of well-qualified candidates; we can even vote a straight Libertarian ticket. This year, freedom has a chance. Don't blow it. And please don't distort it with cheap sensationalism.

Addington is the Libertarian candidate for state Senate, District 28.

Opinion

Linkster tells rest of story

To the editor:

As Quasimodo cried, "Sanctuary! Sanctuary!" I must cry, "Equal time! Equal time!"

As the new intramural all-university singles golf champion, I of course feel qualified to dispense wisdom about any subject under the sun (and rightly so). Thus, I don't believe that a story addition will hurt.

In the September 21 issue, The UD mentioned that I had won the title on a scorecard playoff but that Jeff Lutke had — got your Kleenex ready? — missed a two-foot par putt on the final hole.

What the story didn't mention was

that, on the same finishing hole, I creased a 182-yard six-iron shot out of a hole in the rough into the teeth of Hurricane Gilbert (OK, it was a drizzling rain) that hit about three feet directly in front of the hole and finished about two feet directly behind it. I made that putt, by the way, to the delight of hundreds in the gallery surrounding the green.

The point is, are we supposed to feel sorry for Lutke? Hah! No way, buster! Are you guys saying that the tournament should've gone to a guy who missed a two-footer on the final hole and not to a guy who nearly holed out a full six-iron shot and then made his putt of equal length?

Not being one to toot my own horn (we all know how painful that can be),

I hate to go on. But Britt Patton, my fellow-competitor (not "playing partner," as the TV idiots are wont to say), came only a hair's breadth from holing out a short chip shot after hitting a perfect drive and a so-so second shot on No. 18. Had that ball gone in, Lutke and I would've had to be satisfied with a tie.

I myself had the long second shot because, in an attempt to drive the ball on or near the green, I had tried to cut the corner of the hill and, after hitting it double-solid, I had just caught a branch that knocked my ball sideways and directly into the aforementioned lousy lie in the rough.

So what do I want you to do about it? I dunno. Run the letter, I guess.

Steve Finley

Free trip can be won in poetry contest

Students have an opportunity to win a trip to Hawaii if they capture the grand prize in the American Poetry Association's latest poetry contest. Other prizes include a \$1,000 first prize and 152 other prizes totaling \$11,000.

Contest entries, which require no fee, may be no more than 20 lines and must include the entrant's name and address on each page. Contestants may enter up to five poems, which should be mailed to the American Poetry Association, Dept. CN-74, 250 A Potrero St., P.O. Box 1803, Santa Cruz, Calif. 95061.

Poems will be judged on originality and sincerity. Entries must be postmarked by Dec. 31. Prizes will be awarded Feb. 23.

Techsan chosen as top college scholar

Sophomore arts and sciences major Crystal D. Erwin has been selected as a member of Outstanding College Students of America. Erwin was selected because of outstanding merit and accomplishment as an American college student.

Program to send participants to Japan

International Internship Programs is offering college students and faculty an opportunity to learn about the people, language and culture of Japan through the "International Gateway Program."

For \$1,500, each applicant is matched with a host family for one month. The host family provides two meals daily, orientation in Tokyo, medical and accident insurance and support material. Participants are responsible for airfare.

For more information contact IIP, 406 Coleman Building, 811 First Avenue, Seattle, Wash. 98104 or call 1-800-333-2225, extension 937.

\$1,500 prize available to aspiring poets

Cameron Publishing Co. has announced a new poetry contest with a \$1,500 first prize. The contest is open to all students. For contest rules, send a self-addressed, stamped envelope to Cameron Publishing Co., 1109 S. Plaza Way #422, Flagstaff, Ariz. 66001. Entry deadline is Nov. 10.

Bush proposes tax break for middle class

By The Associated Press

George Bush courted the middle class Tuesday with a modest plan to allow small savers to "put something away for a rainy day" and defer taxes on the interest. Michael Dukakis criticized another Bush tax cut proposal as a "\$40 billion giveaway" for the rich.

The vice president got in the snappiest one-liner of the campaign Tuesday when he told an audience at Miami University in Ohio that a current television show "reminds me of what interest rates might be if the Democrats get back in again. It's called 'thirtysomething.'"

The Democrats ridiculed right back.

Asked what a Dan Quayle administration might look like, Democratic vice presidential candidate Lloyd Bentsen laughed and said, "very exciting." Asked later what he meant, Bentsen laughed again and said, "I'll leave it at that."

The two vice presidential candidates are scheduled to debate on Oct. 5 in Omaha, Neb., and the jockeying for advantage already was well under way.

Democrats have criticized Quayle unsparingly during the campaign, but in an apparent bid to raise expectations about the Indiana senator's debate performance, Bentsen characterized him as a skillful debater.

Quayle speaks to Houston students

By The Associated Press

HOUSTON — Republican vice presidential candidate Dan Quayle rallied students at the University of Houston Monday when he suggested Cougars football coach Jack Pardee team up with Michael Dukakis to show him a strong defense.

Quayle, making his first campaign swing in his running mate's home state, told the 1,500 students gathered at an outdoor rally that George Bush and he would "run a campaign like Carl Lewis."

"We're going to jump like Elvin Hayes and Akeem (Olajuwon). And we're going to play defense just like

the fighting Cougars," Quayle said to cheering students at the "Election '88 Showcase."

"I read that the University of Houston has the second toughest defense in the country. I think we ought to get the governor of Massachusetts together with Jack Pardee so he can learn what a strong defense is all about."

Lewis, who is seeking to win four gold medals in track at the Seoul Olympics, former NBA star Hayes and the Houston Rockets' Olajuwon all are former students of the school.

The Indiana senator said Dukakis uses the same kind of offense used by the Cougar football team: the veer offense.

"Only his problem is that he always veers to the far left," he said as several students stood behind him holding red, white and blue balloons and "Bush-Quayle" signs.

During his speech, Quayle strayed from his speech to respond to several students holding Dukakis-Bentsen signs who were shouting and trying to drown him out.

"You listen to these people shout down here," Quayle said. "If I had to support Michael Dukakis, I'd have to shout, too. They shout because they have no ideas; we have new ideas."

Quayle planned to travel to El Paso Tuesday night.

Festival to feature Hacky Sack, Frisbee throwing

By BETH GEORGE
The University Daily

Students can bid a fond farewell to summer at the 1988 Lubbock Hacky Sack and Frisbee Festival which debuts Saturday at Maxey Park at 30th Street and Oxford Avenue.

Sponsored by the Lubbock parks and recreation department, Texas Tech Recreational Sports and Wham-O, the festival will begin at noon Saturday and will continue at 1 p.m. Sunday.

Saturday's events will feature demonstrations by human and canine Hacky Sack experts and Frisbee

champions. Instructors will be available to teach beginners the basics of Frisbee throwing and Hacky Sack play and to give tips for advanced play after the demonstrations.

Previews of Saturday's activities will be presented at the Tech Student Recreation Center from 5 p.m. to 5:30 p.m. and from 7 p.m. to 7:30 p.m. today. Another demonstration will be presented at noon Friday in the University Center courtyard.

The highlight of Saturday's activities will be efforts to break the Guinness Book of World Records mark for the number of Frisbees in the air at the same time. Kim Balmer

of the Lubbock parks and recreation department said 1,933 people or Frisbees are needed to break the

standing record. The record-breaking attempt is scheduled to take place at 2 p.m.

The second day of the festival will feature a complete 18-hole Frisbee golf tournament. An official, temporary Frisbee golf course will be constructed at Maxey Park for the event.

The goal of the event is to attract involvement, which city officials hope will stimulate enough interest in Frisbee golf to justify construction of a Frisbee golf course in Lubbock. All participants who sign up for the tournament will receive a Frisbee, and prizes will be awarded to winners.

Tech's interior design program accredited

By AUDRA SPRAY
The University Daily

The Foundation for Interior Design Education Research (FIDER) has assured interior design students that curriculum standards provide a strong background knowledge by accrediting Texas Tech's interior design program.

JoAnn Shroyer, the interior design program coordinator, said she was notified of the accreditation in August.

Shroyer said she believes the benefits of the accredited program are unlimited to students.

"Students can say they graduated from an accredited program," she said. "They are assured the program meets the standards for accreditation and that their education provides the skills and knowledge level needed for entry level positions."

Shroyer said Tech is the only university in Texas that offers a bachelor of interior design degree.

The New York-based FIDER is the only accrediting body in the nation for interior design programs, Shroyer said. FIDER is composed of interior design educators and professionals who establish guidelines for accredited programs.

Tech applied for a site visit from FIDER in fall 1987, she said.

Interior design faculty members participated in a comprehensive self-study of the program which was submitted to FIDER in November 1987.

In April, three FIDER site team visitors spoke with students, faculty, local professionals and interior design advisory council members. The site team also evaluated student work projects, Shroyer said.

"FIDER looks for program support by the administration and by allied

areas, in our case, art and architecture," she said.

FIDER guidelines state that institutions must be recognized by the appropriate regional or national institutional accrediting body, require students to have a high school diploma or its equivalent, offer a program with emphasis on professional interior design education at the undergraduate or graduate level and

must have graduated a minimum of two classes in order to obtain an objective evaluation of the program.

FIDER standards specify that interior design programs must offer a bachelor's degree in interior design, a three-year professional program, a four- or five-year baccalaureate program or a master's degree in interior design.

Six other Texas universities — Stephen F. Austin State University, the University of North Texas, the University of Texas at Austin, Texas Christian University, Texas Woman's University and Southwest Texas State University — have FIDER-accredited interior design programs, Shroyer said.

Shroyer said that of the 500 interior design programs in the United States, about 78 are FIDER-accredited.

University United Way campaign begins today

By DAWNA COWAN
The University Daily

The annual kickoff for Texas Tech University's 1988 United Way campaign will be at noon today in the University Center ballroom.

Denise Jackson, director of annual giving and stewardship, said the university's goal this year is \$128,000.

Jackson is co-chairman of the United Way campaign on the Tech campus and Robert Ewalt, vice president for student affairs, is co-chairman of the Tech campaign.

Jackson said the Tech campaign is divided between the campus and the Texas Tech University Health

Sciences Center. The 1988 goal — \$92,000 for the campus and \$36,000 for the Health Sciences Center — is \$12,000 higher than last year's goal.

She said the United Way of Lubbock determines a city goal which is divided into individual goals for participating organizations.

"The kickoff luncheon is to raise awareness that this is the time of year to think about giving to the United Way," she said.

Jackson said people need to realize that they can better other people's lives by giving.

The United Way campaign will begin today and will continue through Nov. 2, Jackson said.

GARDSKI'S NEW MENU QUIZ! QUESTION NUMBER ONE: WHAT IS A "SMOKIN' MAD JACK?"

- A. A Famous Pirate
- B. A Really Hacked-off Car-lifting Tool, Or
- C. Thin-sliced Ham, Bar-B-Q Sauce, Bacon, Red Onions and Melted Monterrey Jack on an Onion Bun with Jalapenos on the Side?

If you answered A or B, you haven't been to Gardski's lately. Stop by today for something new - like a "Smokin' Mad Jack" - or enjoy one of your old favorites.

Who will push the limits?

Imaginative, energized people, the kind who work for BNR (Bell-Northern Research). These are the professionals who will extend the boundaries of telecommunications and business communications technology the world over.

Our research and development work has helped make Northern Telecom the world's leading producer of fully digital telecommunications systems. And, our continuing work in the most advanced products and services for network switching, business communications, hardware technology and transmission is dedicated to maintaining this leadership position.

At BNR, we know how to succeed, because we know who to hire. People like you.

Computer Science or EET degree students.

Familiarity with Pascal, PL1, Modula II, Protel, C or Assembly Languages as well as UNIX Operating System a plus.

Students with the above expertise are cordially invited to attend a reception, September 28th, 7:30pm located in the Lubbock Room at University Center. Or, schedule an interview for September 29th.

You will discover extraordinary opportunities with BNR. Our compensation and benefits package is outstanding, and the professional possibilities are limited only by the boundaries of your imagination.

Send you resume to: BNR, INC., Professional Staffing Dept. TL9/28, 1150 E. Arapaho Rd., Richardson, Texas 75081.

BNR has locations throughout the U.S., Canada and the U.K. An equal opportunity employer.

Kenny Loggins rocks coliseum Monday despite low fan turnout

Concert becomes more jam session than formal performance

Kenny Loggins

By TRACI PEDERSON
Contributing Writer

Despite a less than mediocre turnout, Kenny Loggins and his opening act, comedian Craig Schoemaker, performed with as much energy as if the audience was more than 50,000.

Schoemaker walked on stage at 8 p.m. Monday with an act that had the audience laughing even as the first words were delivered. Schoemaker, whose routines can be seen on cable TV next month, ended his routine with an a cappella version of "The Star Spangled Banner," which won him a standing ovation.

Loggins and his band stepped out on stage at 9 p.m. to screams and applause. He broke into the perfor-

mance with his new hit release, "Nobody's Fool" from the movie soundtrack of "Caddyshack II," followed by "Playin' With The Boys" off the "Top Gun" soundtrack.

Midway through the concert, Loggins, playing acoustic guitar with his band, stepped out to the edge of the stage and sat down. Illuminated by individual spotlights, Loggins began an informal jam session with four songs, including a rendition of the classic "Come Go With Me" as well as two of his own classics, "House at Pooh Corner" and "Whenever I Call You Friend," calling on the audience to sing along.

Loggins and his band rounded out the concert with a 10-minute version of "Celebrate Me Home" off his first

solo album.

Amid cheering from the audience, Loggins happily reappeared for two encores. The first was a performance of the multi-platinum single "Footloose."

The concert closed with Loggins belting out lyrics to the ballad

"Forever."

Loggins was eager to play and entertain the Lubbock fans and despite the few numbers, he performed for well over two hours. The performance was more a fun jam session than a formal concert.

Tech pays for triumph with Hurst injury

By JOEL WEST
The University Daily

With the first victory under its belt, the Texas Tech football team headed back to the grindstone in the form of practice.

Coach Spike Dykes said the practices Monday night and Tuesday went smoothly.

"We had a good Monday night, and we were fair (Tuesday)," Dykes said following the Red Raiders' workout.

"It's always a learning process. In a learning process, sometimes you don't look as sharp as you'd like to

look. But it's just Tuesday. So, hopefully, by the weekend we'll be ready to go."

Tech's victory over Baylor Saturday did not come without a price, however. Starting offensive right guard Jessie Hurst, a 6-3, 265-pound junior from Fort Worth, suffered a knee injury on an extra-point attempt in the second quarter.

Ken Murray, assistant to the athletic director for sports health, said Hurst underwent surgery Monday on his right knee to repair ligament damage and detached cartilage. Murray said Hurst may return to ac-

tion in six to eight weeks.

Back for Tech after breaking a foot bone in the Arizona game will be 6-3, 275-pound offensive tackle Tommy Webb.

Replacing Hurst will be Nathan Richburg. A 6-2, 275-pounder from Roscoe, Richburg is not inexperienced. He was a starter in the University of North Texas game but was replaced by Webb the following week.

"You always hate to lose a good player like Jessie, but (Nathan) will do fine," Dykes said. "He's done a good job; he's been out there before. I think the guys will pick up the slack

Hurst

right where Jessie left off, plus the fact that they'll play hard for ol' Jessie's sake. Jessie's done a good job for us and he's a valuable commodity.

"That's the thing about a team — the other ones have a way of picking up the slack when the others are not there."

Tolliver's 'dazzling' day gets him weekly award

By The Associated Press

Tolliver

Billy Joe Tolliver's reputation is of a big league, \$1 million arm and 10-cent judgment.

This season he's trying to silence his critics by completing more touchdown passes to his Texas Tech Red Raider teammates than he does interceptions to the opposition.

If Saturday night's four touchdown passes in a 36-6 thrashing of the Baylor Bears is any barometer, then his initials "B.J.T." could stand for "Better Judgment-Touchdowns."

Tolliver earned The Associated Press Southwest Conference Player of the Week award with his dazzling performance against the Bears.

On the defensive side of the ball, Texas Christian linebacker Paul Llewellyn earned AP's Defensive Player of the Week laurels with nine unassisted tackles, a quarter-back sack, a forced fumble and a pass broken up in the Horned Frogs' 31-17 victory over Boston

College.

"Billy Joe is more poised and experienced now," said Tech coach Spike Dykes. "He's finally decided not to go out and try to win every game by himself."

Tolliver had 286 yards passing, the third best game in his career. He is the all-time yardage passing leader at Tech and could move into ninth place on the SWC all-time list with 71 yards against Texas A&M Saturday.

"I'm not forcing passes like I did," he said. "If the play is not there I either throw the ball away or take the sack."

Dykes gives credit to offensive coordinator Dick Winder for settling Tolliver down.

Johnson banned for life following ill-gotten gold

By The Associated Press

SEOUL, South Korea — Ben Johnson's sentence was life, imprisoned with the memory of ill-gotten gold and 10 seconds that rocked the Summer Games. Caught cheating with one of the most dangerous of all anabolic steroids, stanozolol, Johnson was kicked off the Canadian team for life, and his gold medal in the world's fastest 100-meter dash was given to archrival Carl Lewis.

So shocked were Olympic officials and athletes that when Greg Louganis made history of a more heroic sort — an unprecedented four diving medals in two Olympics — it was only a sidelight to a grim day in Seoul.

"Our national hero is not a hero anymore," said Johnson's Canadian teammate, fencer Stephen Angers.

And with that, the greatest sprinter in history handed his medal to a Canadian Olympic official, packed his bags and slipped out of the country Tuesday morning.

Earlier in the day Lewis said: "I feel sorry for Ben and for the Canadian people. Ben is a great competitor, and I hope he is able to straighten out his life."

The boxers assured America's team of at least a few more medals, advancing three into the semifinals — where they will get at least a bronze. And the U.S. women's basketball team moved into the gold-medal game against Yugoslavia Thursday by beating the Soviet Union 102-88.

Meanwhile, two U.S. gold medal-winning swimmers and a friend were questioned by police for six hours Tuesday for removing a marble lion's head from a downtown hotel last Saturday.

Dr. Robert Yost examines a student's shoulder as part of his weekly injury clinic held at the Student's Rec Center. Dr. Yost begins his free clinic tonight at 7 p.m. in room 201 of the SRC.

Steamboat Ski Trip Planned

The annual Outdoor Program Ski Trip to Steamboat Springs, Colorado is just around the corner so go ahead and reserve your spot to ski in the deep snow Colorado is famous for.

Now you can ski the powder in Steamboat, Colorado located northwest of Denver. It is famous for both it's power skiing and western hospitality. The resort is the second largest in Colorado and has 16 lifts which allows for maximum time on the slopes. You can ski trails, moguls, or the trees all in the same day. It also offers a wide variety of slopes ranging from beginner to expert.

The Outdoor Ski Program package includes bus transportation and a four-day lift ticket (with fifth-day ski option). Also provided in the package is a five-night stay in luxury condominiums adjacent to both the lifts and all the many quaint shops and

restaurants which make Steamboat one of Colorado's premier ski resorts.

"The ski trip has always been fun for the participants," Recreation Director Joe MacLean said. "Everyone has always had good things to say about it and the trip is a good way to get your mind off of school."

A \$75 deposit (\$299 total price) is all that is required to reserve a spot. Spots are limited so be sure to sign up early. Ski trip dates are Jan. 2-7 with an Oct. 15 deadline. Also, don't forget the Outdoor Program rents skis, boots and poles for only \$8 a day. If you have any questions, just call or come by the Outdoor Shop, room 206 SRC, 742-2949. Office hours are from noon to 6 p.m. Monday and Friday and 1 p.m. - 5 p.m. Tuesday Thursday.

Coming Soon

Gyms available for reservations

The Women's Gym and Men's Gym are now available in the evening for reservations by intramural teams, organizations and clubs desiring a place to practice basketball or volleyball.

Reservations can be made by calling the Rec Center reservation number 742-3352 beginning Monday of the week a team desires a reservation time. All reservations are for one hour time periods and only one reservation per team is allowed each week. It is advisable to call early in the week to reserve space.

Final walking class tomorrow

Walking can be a great form of aerobic exercise because it does not put a lot of stress on the joints, it can be very social, you do not have to invest a lot of money and you already know the basics. A final seminar is scheduled in the SRC Classroom to help you get on a walking program. It will take place tomorrow from 5:30 - 6:30 p.m. Some of the basics of a walking program will be discussed and we will walk one mile—to determine your walking fitness level which will be used to set up your own walking program. Come dressed to participate. Please register by calling 742-3352.

Cholesterol screening coming soon

The Student Rec Center will hold Cholesterol Screening on Oct. 11 and 12 from 6:30 a.m. - 9 a.m. in the Classroom, 201. The test results will include total cholesterol level, HDL cholesterol, triglycerides and a calculated LDL level. The testing will be performed by the Lubbock General Hospital lab personnel. There will be an \$8 charge. You need to call and reserve a spot—742-3352 by Oct. 9. A 12-hour fast is recommended for accurate results. Seminars will be held on Oct. 25 to discuss the meaning of the results. Results can be picked up at these seminars or any time after Oct. 25 in the Rec Sports Office. Please call 742-3352 to register.

Rec sports reservation system

With school back in session, peak usage in SRC and for the fitness equipment is certain. In order to provide fair and adequate usage for your workouts, the SRC requests that you follow the reservation procedures listed below.

Court Reservation System

1. One must be an eligible participant to reserve a racketball court in the Student Rec Center. Court reservations may be made one-day in advance of day of play by calling 742-3352 or by coming in person to the Recreational Sports Office from 8 a.m. - 5 p.m.

2. Advance court reservations for Saturdays and Sundays will be taken on Friday as described above.

3. Reservations for Mondays will be taken on Sunday between 5 - 7 p.m. for all courts.

4. Courts remaining open are available for same day reservations via in person basis at the Sport Shop or by calling 742-3828.

Stairmaster Lifecycle Reservations

Advance Reservation

1. Reservations for Tuesday through Friday may be made one day in advance by calling 742-3352 or in person in the RSC Office, room 202, 8 a.m. - 5 p.m., Monday-Thursday.

2. Reservations for Saturday and Sunday between 5-7 p.m. as described above.

Same Day Reservations

Reservations can be made on the same day during operational hours either in person at the equipment issue room or by calling 742-1995.

Liferowers

A pair of liferowers have been purchased and are operating on the lower level. At this time, these machines are for drop-in only and we require these machines to be checked out with your valid i.d. This check out procedure enables us to monitor the usage of the machines to determine whether reservations will be necessary.
