

LOOK! XNFU, THEY'RE HAVING SOME KIND OF EXCITEMENT ON TERRA FIRMA!!

By Vern Sanford

Outboard motors have become so common-place that most of us overlook the industrial development that has taken place.

Outboard Marine Corp. of Waukegan, Ill., has prepared a very interesting Facts Book on the subject. This is the parent company for Evinrude, Johnson, Gale (Buccaneer) Products, Lawn-Boy, Pioneer Saws and Cushman Motors.

Nearly 10,000 persons are employed full time by the various subsidiaries. They are paid more than \$57,000,000 a year in salaries and other benefits.

At the end of the first year of operation of Outboard Marine Corp. (1957), sales amounted to \$1,379,000. Net earnings for that year were only \$940,000. Gross investment in plants and equipment amounted to \$2,262,000. Total assets were \$3,782,000 with a stockholder equity of \$3,050,000.

During the first year the book value of a share of stock was 48 cents, the earnings were 15 cents a share and the dividend amounted to 12 cents per share.

Last year the annual sales amounted to \$158,713,000, with net earnings of \$9,095,000. Gross investment was \$59,396,000. Total assets amounted to \$105,727,000.

For last year the book value per share was \$9.40; earnings per share \$1.16; net working capital \$49,189,832. Cash dividends amounted to 80 cents a share.

It wasn't all easy. After the first year, when the cash dividend amounted to 12 cents per share, the company went through the war years earning less. Finally in 1947 earnings shot to 14 cents per share. They remained there until 1953, when the earnings went to 17 cents. Since 1953 they have continued to climb to the present 80 cents.

In 1953, many outdoorsmen began putting aside their small fishing motors. They demanded more speed, more power and ease of operation. They wanted horsepower and electric starting, and they got both.

They also got tired of pushing lawn mowers and bought power equipment. They found the golf course hills were getting a little steeper and they went to gasoline buggies on the greens.

So in these corporate figures we find the progress that has been made in our outdoor recreation.

What about the other recreational areas... the tackle business, for instance?

In 1953 we had just begun using a few spinning reels. Today practically every fisherman has a spinning reel of some sort, along with his conventional equipment. And we have lures by the dozen boxes.

Is it any wonder that there are more people spending more money today for hunting and fishing than for all other spectator sports combined?

We are buying more hunting and fishing licenses than ever before. And our game and fish commissions are putting more game back on areas where we had shot it off just a few years ago.

There is hardly a paved highway in Texas today that doesn't lead directly to good fishing water, or to a spot where we can hunt. Areas that were completely decimated only a few short years ago abound in game today.

It is well, because people have more leisure hours today, and more money to spend. When we go out today we want to be sure to fill our bags or creels. We want to have ample water for our sports, and parks for our camping.

As a result we also are creating a new crop for the landown-

ers. Farms that just a few years ago shot out, today have good quail crops. Some of the birds were planted there from our state game farm. Others were hatched on the spot because landowners cooperated with sportsmen and provided suitable feed and cover.

All this continues to point to the big business of the great outdoors. You can see it on every hand.

Next time you're just driving around town, count the number of boats in the yards. You'll even see some residents who are parking their boats in the garage and leaving their automobiles outside.

Where will this tremendous development stop? It won't. The outdoors today is for papa, mama and all the kids. It's a family affair.

Dividends of such companies as Outboard Marine will continue to climb... higher and higher. But this isn't the most important angle of this great development.

Greatest dividend will be in a fuller and more enjoyable life for nearly 200 million Americans who enjoy their leisure time in the great outdoors.

**WATERPROOFING**—Get your boots wet during that hunting trip? Chances are you did, unless you had a retriever with you.

Whitmire Research Laboratories, Inc., of St. Louis, Mo., has a product that is a guaranteed waterproofer. It's called WATER-OFF and it's in a spraybomb container.

It's quick-drying and will waterproof shoes, shirts, hats, coats, gloves, tents—even that golf bag or convertible car top.

**Sub Deb Club Presentation Was Held Tuesday**

Sub Deb Club presentation, a formal introduction of new members by their big sisters, was held Tuesday evening in the home of Mr. and Mrs. Homer Hudgins, with their daughter, Evelyn serving as hostess.

New members are Carolyn Faubion, Rita Walker, Kay Byrd, La Gatha Traylor, Naida Peacock, Linda Frazier, Tamala Gans, Sharon Johnson, Betty Mayfield, Ernestine Scott, Dorretha King, Ginger Gardner and Bobbie Howard. Mrs. W. T. Stapler and Mrs. Wes Hays are new sponsors and Mrs. Jerry English is the new club mother.

The table, laid with white linen, was centered with an arrangement of red and white carnations. Each new member was presented with club colors and a red carnation.

Nancy Roberts, president, presided for the business session and letters of acceptance were read. Toni Johnson called the roll and gave a treasurer's report. The club voted to have a cake sale Saturday morning at 8:30 and sweaters and medals for new members were discussed.

Club will be held next Monday evening in the home of Edna Mayfield and initiation will begin.

Refreshments were served to the new members, sponsors, club mother and Nancy Roberts, LaVera Williams, Toni Johnson, Carol Ann Smith, Edna Mayfield, Frances Saunders, Martha Marks, Evelyn Hudgins, Nancy Benson.

Club was dismissed with benediction.

**IN HANTSCH HOME**

Supper guests Saturday in the home of Mr. and Mrs. T. F. Hantsche were Mr. and Mrs. Jesse Hatcher of Pampa and Mr. and Mrs. Ted Hantsche Jr.

# LONE STAR AGRICULTURE

## NEEDED: PUBLIC RELATIONS

Agriculture's greatest need to day is understanding.

This means understanding among those directly engaged in farming and ranching; understanding by those who provide services and materials to the farms and ranches; understanding by those who transport, process and distribute the plant and animal products coming from farms and ranches; and above all, understanding among the great majority of our people who live in towns and cities and who are the principal consumers of the products of our agricultural industries.

Those of us engaged in agricultural endeavors have tended to take for granted that people generally and naturally understand their basic dependence on agriculture for food, feed and fiber. In recent years we have been rudely awakened, in cotton, for instance, by the advent of synthetics.

American agriculture is thus being forced to become public relations conscious. We now must seek consumer acceptance not only of our products, but of our services, of our policies and of our true place in the total economy of the nation and the world.

Here are several avenues of attack on public relations for agriculture:

1. Correction of the misconceptions the average urbanite has about us; Especially let them understand their foods, feeds and fibers are not expensive, and producers, processors and distributors are not and will not be "rolling in wealth" at the expense of food consumers.

2. Seek to reverse the rising trend of "going to Washington" for funds or legislation on state and local agricultural problems, in the belief that it costs us less. We positively must accept more responsibility at state and local levels.

3. Clearing up the confusion between politically designed and directed policies relating to the "farm problem" on the one hand and the necessity for even stronger programs of research and education in agriculture.

4. Modern and future agriculture may merit a new tag—one that may overcome the popular concept that agriculture and farming are synonymous.

We must tell the great story of modern agriculture again and again to the general public. It's dynamic and it's basic. Everybody benefits.

We need to mobilize all of our resources promptly back of an effective public relations program.

## New Developments May Aid In Control Of Pests

The discovery by the USDA of three plant-growth regulating compounds that will exude from the roots of treated plants into surrounding soil in quantities sufficient to be reabsorbed by nearby plants gives hope of finding similar substances with plant pest control potential, says Harlan E. Smith, extension plant pathologist.

Farmers would have an important new weapon in their fight against pests if a chemical that will protect plants against diseases, insects or nematodes could be mobile within plants like these substances.

These three newly discovered substances — neta-chloro, meta-flouro, and parafluoro — are halogenated forms of alpha-methoxyphenylacetic acid (MOPA), reported in 1955 by the USDA as a promising "Systemic" with unusual ability to be moved or translocated throughout the plant. Like MOPA the three chemically-related forms can not only be translocated but can also be exuded from plant roots in their original chemical form, Smith says.

Mandelic acid, another systemic form of MOPA, was found to have no growth-modifying effect. And, although mandelic acid cannot be exuded from roots, this indicates to scientists that the characteristic of a compound to be translocated can be independent of any property it may have to modify plant growth, he stated. Thus, it may be possible to develop systemic chemicals of many different kinds to serve a variety of purposes.

Scientists in the Growth Regulator and Antibiotic Laboratory, Plant Industry Station, Beltsville, Md., who made the discoveries are continuing the research.

In much of the research, the scientists have used radioactive tracers in the systemics to track the movement of the compounds through plants. In addition, the analytical technique known as chromatography — in which various compounds are separated one from another on treated paper by a flow of an organic solvent such as alcohol — has made it possible to identify the form or presence of a chemical at particular locations within plants, the specialist adds.

## USDA Has New Publication On Lightning Protection

Lightning still is listed as the causative agent in nearly one-third of all U. S. farm fires. Lightning damage is not confined to personal property for it is estimated that more than 1300 persons are injured and 500 killed by lightning every year. About 90 percent of this accident toll occurs in rural areas, states the Texas Farm and Ranch Safety Council.

Farm buildings and homes can be protected from lightning damage by the installation of an approved, complete lightning protection system. This means more than just the installation of rods, says the Council. Today's systems are engineered to collect static

charges from the entire building and the things in it and dissipate the static into the air.

The USDA has released a bulletin which gives the principles of lightning protection systems and the materials used to build them, the Council says.

Although few farmers install their own lightning protection systems, the bulletin will enable them to determine whether installation work is being done properly, and to make periodic inspections of systems already installed.

For farm buildings as well as trees, a lightning protection system consists of three parts—air terminals (rods or points), conductors, and ground connections. The terminals are copper, aluminum, or galvanized steel rods or

tubes, 10 to 24 inches long, installed at every projecting high point on a building. Conductors are the parts connecting the terminals with the ground and nowadays, usually are made of aluminum or copper cable, although rods also are satisfactory. A ground connection can be made in one of four ways; by driving a copper-clad or galvanized steel rod into the ground at least 10 feet, by stranding copper conductor cable and burying it in a trench, by clamping copper conductor cable to a buried sheet of metal plate, or by clamping it to an underground metal water pipe. Carefully made ground connections are vital to the operation of a lightning protection system, the Council adds.

## Many Prizes Offered In Junior Poultry Show of State Fair

Junior Livestock and Poultry shows during the 1959 State Fair of Texas, Oct. 9-25, will offer a total of \$24,487 in cash premiums and will feature a Beef Heifer show for the first time.

Some 2,000 Four-H club members and Future Farmers are expected to exhibit their milk fed steers, market steers, beef heifers, dairy heifers, sheep, fat lambs, pigs, turkeys and broilers.

The premium total is an increase of \$3,429 over the \$21,058 offered last year.

The Beef Heifer show will offer \$4,200 in premiums. Judging will be held Oct. 21 in Angus,

The Winters Enterprise, Winters, Texas, Friday, September 25, 1959

Brahman, Hereford, Santa Gertrudis and Shorthorn classes.

Premiums and dates of the other junior shows at the fair are as follows: market turkeys, \$800, Oct. 10; Delaine-Merino sheep \$518, Oct. 12; Rambouillet sheep, \$518, Oct. 13; market broilers, \$700, Oct. 17; dairy heifers, \$4,145, Oct. 21; milk fed steers, \$2,942, Oct. 21; fat lambs \$2,005, Oct. 21; barrows, \$4,229, Oct. 21-22-23, and market steers, \$4,050. Herdsmen awards of \$480 are also offered.

The Junior Livestock Auction sales, which come as a grand climax to the junior shows, will offer the youngsters an opportunity to take home some real folding money in their jeans. Last

year's auctions resulted in total receipts of \$136,585 for the 882 boys and girls who participated.

Among the wonders of modern life are the plots hatched up in Hollywood.

The successful man has the ability to make himself, as well as others, work.

Only an intelligent man has sense enough to recognize his own limitations.

An offensive spirit can be a dangerous affair unless you are properly prepared.

## Amusements Coming to Local Theatres

**"AL CAPONE"**  
The picture they dared Hollywood to make, "Al Capone," will open Thursday at the State theatre.

Starring one of Hollywood's all-time great actors, Rod Steiger, the man who won an Academy Award nomination for his stirring work in "On the Waterfront," "Al Capone," comes to the screen only after years of research and painstaking preparation.

"A study in evil," as it has been characterized by Steiger, "Al Capone" relates the life story of this nation's most powerful and relentless gangster—a man so powerful, in fact, that for a period of more than five years he was absolute boss of Chicago.

**"TARZAN'S FIGHT FOR LIFE"**  
"Tarzan's Fight for Life" marks the 40th Anniversary of the famous jungle adventure dramas. A Sol Lesser Production for MGM in color, the picture stars Gordon Scott as Tarzan, with Eve Brent as Jane, ten-year-old Rickie Sorensen as their adopted son, Jill Jarmyn and Cheeta. It was written by Thomas Hal Phillips, based on the characters created by Edgar Rice Burroughs, and was directed by Bruce Humberstone.

### "SAY ONE FOR ME"

For the first time in fourteen years, Bing Crosby wears a cassock. It's for his role as "Father Conroy" in Twentieth Century Fox's joyous "Say One For Me," which opens on Sunday at the State Theatre.

The first time the "Old Groaner" donned the habit of a priest was in the memorable, "Going My Way" for which the film industry voted him "Best Actor of the Year" in 1944 and presented him with the coveted "Oscar" for his performance. Since then, Crosby has ranged far and wide in a succession of movie hits, not the least of which was "The Country Girl" that won him another nomination.

"Say One For Me" returns Bing Crosby to homeground with which he is well familiar. "I have no idea" related Crosby, "why the public so readily accepted me as

a priest in 'Going My Way' and later in 'The Bells of St. Mary's' Whatever the reason, I'm not going to second-guess the ticket-buyers they're the folks who keep us in business."

### "THE BRAVADOS,"

Gregory Peck, Joan Collins and Stephen Boyd are top-cast in "The Bravados," Herbert Bayard Swope, Jr.'s production for Twentieth Century-Fox, coming Sat. to the Fiesta Theatre. Based on Frank O'Rourke's popular Western action story, a recent occupant of the nation's bestseller lists, "The Bravados" chronicles the adventures of a revenge-bent rancher whose wife was brutally murdered by four outlaws.

Blinded by his overpowering aim to avenge this crime, he slowly, calculatingly stalks four escaped convicts whom he suspects of having committed this dastardly act.

Gregory Peck plays this relentless avenger, his seventh starring appearance in a kingsized Western drama. It also marks his fifth association with Henry King, the director who guided such past Peck hits as "The Gunfighter," "12 O'Clock High," "David and Bathsheba" and "The Snows of Killmanjaro." There is every indication that "The Bravados" will follow in its predecessors' successful path.

### Outsiders Team With Inmates To Produce Texas Prison Rodeo

Inmate contestants, plus a host of the nation's topflight television and recording stars will be the bill for the 28th annual Texas Prison Rodeo here in the prison's \$1,000,000 stadium each Sunday in October.

Big name stars such as James Arness, of the TV series, "Gunsmoke," along with Johnny Cash, popular country-style singer, open the 1959 series on Oct. 4. Dale Robertson of "Tales of Wells Fargo," and Tommy Sands, sensational singing idol of the teenage crowd, appear on Oct. 11, while Steve McQueen of "Wanted—Dead or Alive," teams with singer Johnny Horton of "The Battle of New Orleans" fame on Oct. 18.

For the October 25 performance, prison rodeo officials say they will produce two additional nationally-known stars for the closing of the 1959 series.

In addition, there will be other outside acts, rodeo clowns, inmate entertainment groups and mounted quadrilles from Pasadena and Bellville. The Houston Range Riders also will appear and for the first time the rodeo will feature a girl's barrel race event.

H. H. Coffield, Rockdale businessman, who serves as chairman of the Texas Board of Corrections and its rodeo committee, said, "We are doing everything possible to present the best entertainment feature found anywhere."

"We are of the opinion that a well-rounded show will attract more people to this unusual rodeo which benefits around 12,000 inmates of the Texas Department of Corrections."

Coffield explained that net proceeds from rodeo ticket sales are placed in the prisoners' welfare fund which is used to supply rehabilitative services not furnished by the Texas Legislature.

Reserved seat tickets at \$2.40 and \$4.40 each, tax included, may be obtained by writing Rodeo Ticket Office, Huntsville, Texas, enclosing check or money order.

Sex, power, and wealth, are what my young friends and old friends like to read about in a new book.

## WSCS Circles Met Tuesday Morning In Members' Homes

Circles of the Woman Society of Christian Service of the First Methodist Church held their regular meetings Tuesday morning in the homes of members.

The Mary Martha Circle met in the home of Mrs. Bob Hatcher with fourteen members present. Mrs. J. D. Vinson presided for a short business session and Mrs. M. E. Leeman, program chairman, led the opening prayer.

Mrs. Louisa Johnson gave the devotional and Mrs. Leeman discussed "Isn't Country a Healthy Place" and "Aren't We All Equal." Miss Hilda Bahlman told of Paul's concern over the sickness of one of his fellow workers and Mrs. W. J. Cole gave the closing thought, "The Speaking of Silence in the Church."

Refreshments were served to those mentioned above and Mesdames Jerry English, R. P. Weeks, Elmo Mayhew, G. E. Shook, Ella Ritch, Lee Herman, W. T. Stanley and C. E. Briley.

The next meeting will be held Tuesday morning in the home of Mrs. R. P. Weeks.

The Ophelia Circle met in the home of Mrs. Thad Traylor with Mrs. Sam Jones leading the opening prayer.

Mrs. Jim Edwards gave "Isn't the Country a Healthy Place" and the group discussed the health of this community. Mrs. Carl Baldwin gave the devotional and led the closing prayer.

Refreshments were served to Mesdames Jim Edwards, W. W. Parramore, G. W. Holbert, Sam Jones, Carl Baldwin and the host-

ess.

The Ruth Circle met in the home of Mrs. J. E. Roye and Mrs. Gattis Neely led the opening prayer.

Mrs. Frank Mitchell, program chairman, asked questions pertaining to previous study sessions and a group discussion followed. Mrs. R. C. Thomas reviewed "The Health of Town and Country" and Mrs. Glendon Presson gave "Aren't We All Equal".

A map provided, by Mrs. Mitchell, showing Texas community centers was discussed and Mrs. Gattis Neely discussed various community centers in Texas and their work. Mrs. Mitchell gave the devotional and the closing prayer.

Mrs. Jerry Ward and Mrs. R. C. Thomas were guests.

## Garden Club To Have Work Evening At City Park Friday

Winters Garden Club will hold a work evening at the City Park Friday, September 25, beginning at 6 p.m. Members are asked to bring their husbands, a sack supper, orange daylilies, orange cannas and work tools.

The regular meeting of the Garden Club will be held Friday October 2, at 9:30 a.m. at the City Hall.

"Landscaping for Beauty" will be the theme of the program and Mrs. Floyd Sims, president, will conduct a workshop on flower arrangements. Mrs. W. H. Buchanan, National Flower Show Judge of Abilene, will discuss "What is Horticulture Specimen and How it Should be Groomed."

A sack lunch will be served at noon followed by a flower arrangement workshop conducted by Mrs. K. H. Fleming, National Flower Show Judge of Abilene.

## Paul T. Vickers Seeks Delegates To Highway Convention

Paul T. Vickers, Texas vice president of U. S.-Canada Highway 83, will be in Winters, Menard, Crystal City, Carrizo Springs, and Junction Oct. 5 to seek delegates to the international 83 convention in North Platte, Neb. Oct. 7 and 8. He hopes every Texas town on the route will have one or more delegates at the meeting, he said this week.

Vickers, who was elected to head the Texas segment of the highway extending from the Canadian to the Mexican border, said Texas would benefit by increas-

The Winters Enterprise, Winters, Texas, Friday, September 25, 1959

ing travel more than any other state because of the lure of the West Texas cowboy country, the ports of entry to Mexico along 83 and the warm, dry Valley winters. He asked all chamber of commerce and highway zealots to work for delegations from their cities. Governors of all states, the premier of Canada and the governor of Tamaulipas are expected to be in North Platte for the meeting.

In a sort of way, the only people I envy are those who own a couple of dogs and a cat, and have a place where the animals can be healthy and happy.

### ENROLLED IN COLLEGE

Mrs. Roy Austin of San Francisco, California, daughter of Mr. and Mrs. J. E. Smith, has enrolled at San Francisco University. Mr. Austin is attending the Golden Gate Seminary there.

## WADDELL CHEVROLET COMPANY

Phone PL4-5870 Winters, Texas

**Chevy's done the next best thing to paving every road in America!**

First they threw out the front axle and put in torsion-spring independent suspension. Then they built wide-base coil rear springs into most light-duty models, variable-rate leaf springs into heavies. That made it—a ride you have to feel to believe. A ride that lets you move faster to get more work done in a day's time.

#### Brawnier bulldozer build!

Frames are stronger, cabs 67% more rigid. Front wheels and tires are precision-balanced. And that new suspension cushions jars and road shock that used to spell slow death for the truck's body and sheet metal.

#### More comfortable cabs!

Easier to hop in and out of too. Many models are a whole 7 inches lower outside. Yet there's more head room inside, plus more width for shoulders and hips. More real comfort!

#### Big in the power department!

With the industry's most advanced gas-saving 6's. With high-torque Workmaster V8 performance in heavyweights. With new 6-cylinder or V8 power available in L.C.F.'s.

#### More models than ever!

New 4-wheel-drive models and tandems and high-styled Suburban Carryalls. It's the handsomest, hardest working Chevy fleet ever to report for duty. See your dealer soon for a ride!

Anything less is an old-fashioned truck!
