Post Office Will Help In County of Area Livestock

Rural mail carriers from the Winters Post Office will leave some livestock survey cards along their routes beginning November

"Information reported on these cards is used to set the yearly inventory of livestock and poultry on Texas farms," Postmaster Ran-

kin Pace explained. Rural carriers distribute the cards at random in boxes along their routes.

"This means that not every box will get a card," Mr. Pace said. "For this reason, it's important for everyone who gets a card to return it filled out so that USDA can get a true sample of the State's livestock holdings.'

Carriers assisting with the survey are: W. S. Cooke, Route 1; Ray L. Hollingshead, Route 2; Weldon L. Collins, Route 3; W. E. Little, Route 4;

Facts and figures secured in survey are the basis for the Texas and National pig crop report and inventories of livestock and poultry on farms as of the first of the year. Stockmen and many others use this information in making business decisions.

Survey results will be widely distributed through Texas Crop Livestock Reporting Service re-

leases, newspapers, farm magazines, radio, and television.
"This annual survey has been a joint undertaking of the Post Office and the Agriculture Departments since 1924," concluded Mr.

The third try from Caskey to Young was good for 42 yards, down to Cisco's day evening in the home of Mrs. 14. With only 4 seconds left in J. C. More Tax Laws?

City officials had their annual meeting, and heard Governor Daniel give support to their main thesis-that cities need new sources of revenue if they handle the growing problems caused by Texans moving to town.

Most likely avenue is the movement to have the state abandon the property tax, so it can be used exclusively for city and school purposes. The State and Local tax Study Commission created by the Legislature in 1959 is specifically directed to report on this possibility.

Speaker James A. Turman filled two vancancies on that study group. He named Reps. Charles Sandahl of Austin and Charles N. Wilson of Trinity to work with senators and citizens who have been named to it be Governor Daniel and former Lieut, Gov. Ben

Ramsey In addition to reporting on the idea of state abandonment of the ad valorem tax, now bringing in way. about \$40,000,000 a year, the commission will report on whether other new tax sources should be

granted to cities which need them. Most startling tax news came from James McGrew, research director for the Texas Research League. He said it is a very close question whether the new sales tax will produce enough state revenue in the two years starting September 1, 1963, to keep the state's books in the black.
