Roger Babson Says—

Next To Miracle Of Birth Is The Miracle of "Birth" of Seeds

Babson Park, Mass. The greatest miracle, of course, is the conception and birth of a helpless baby with its unparalleled opportunities. It is said that one reason the Chinese nation has had such a long and matchless history is because the Chinese figure their children's age from 9 months earlier than we do. Hence the mothers also give much more attention to what they do and

think during those nine months.

Importance Of Seeds

The next-wonderful miracle to the birth of babies is the "birth" of seeds. This will be the real subject of this week's column. I have just returned from the Evers Flower Farm at Lakeland, Florida—run and operated by Orris R. Evers who raises over 275,000 plants every spring and 100,000 more every fall. He is a graduate of the University of Florida and has a Master's Degree from Ohio State University. I mention this to show the importance of an education to a "farmer"! This should be an inspiration to those college graduates who think that they must be doctors, lawyers, or insurance agents in order to build a large business and make a better, happier, more beautiful world. This my friend Evers is now doing. God bless him. He knows that every seed contains a miracle.

Each Seed A Little Computer

Two facts about seeds interest me intensely; the first is the billions of seeds—both vegetable and flower-going to waste every year. The head of one company which raises and sells only

vegetable seeds sells over one hundred billion (100,000,000,000) live and active seeds each year. The second fact is that each seed is a complete factory. Had I the space I would prove this to every reader. Moreover, each "factory" knows exactly when to commence operating without the need for any labor union or any legislation. Each seed is a most marvelous automated device - far more extraordinary than any computer.

What Computers Are Now Seeking

Computers are a very wonderful invention; but they give out only what has been fed into them. This is probably true also of seeds; but nature "programs" the seed. As yet, computers do not think; but computers apparently do "think"—at least they know when to sprout or burst their shell and grow into a vegetable or into a flower or into a magnificent oak tree. You say this is merely done by seed "listening" to the sun. Or to put it another way, the sun "programs" the seed to send a sprout upward to form leaves, and a fiber downward to form roots. Truly it all is very wonderful.

Possibilities Of Computers

Computers also are wonderful; but none of the five leading computer manufacturing companies (a list will be sent gratis on request) will claim that their computers will work by doing their own thinking. They need to be "programmed", which means that the information must be fed into them by some human brain. Psychologists tell me that the time is coming when brain waves in leaving our heads will operate computers. I feel sure, too, that the day is coming when the computer will secure its knowledge from the rays of the sun, from the direction of the wind, or from other invisible data fed to it by nature.

Every Seed Is A Thinker

Now let me get back to my favorite subject of "seeds". Each seed is a miniature computer already being "programmed" by nature. It, however, depends greatly upon environment and almost wholly upon what has happened before. Let me again refer to the writings

John Patterson Family Reunion Held In Brownwood

Descendants of the late Mr. and Mrs. John Patterson, who settled in Lampasas in 1854, met for their 6th annual reunion at the Community Center in Brownwood on July 4, with 47 members attending.

Mrs. George Poe of Winters, author of the book, Angel to the Papagos, and writer of articles, spoke to the group in the afternoon on the subject, "It Makes a Difference," she commended the group on their preservation of past events and challenged them to bridge the gap between the past and the future for their descendants.

Leon R. Patterson of Wichita Falls, president, presided for the business meeting. Corley Watkins of Midland led the group singing. Gifts for the oldest man and woman in attendance were presented to Mrs. Maude Townsend of Evant and J. A. Patterson of Ballinger. A gift from the group for six years of service was presented to Leon Patterson by Greta Sue Hines of Goldthwaite.

A memorial prayer for those deceased since the last meeting, Mrs. Marvin Patterson of Ballinger and Charlie Roberts of San Angelo, was led by Cecil Patton Ballinger.

A. H. Sing, agricultural specialist from India, was a guest and conducted a question and answer period on his homeland at the noon hour.

Officers elected to serve the association for the coming year are Leon Patterson, President; H. B. Patterson of Brownwood, vice president; Mrs. Cecil Patton of Ballinger, secretary; and Webster Fields of Lometa, secretary.

In 1965, the group will meet on Monday, July 5, at the community center in Brownwood.

Mrs. Edna McMillan of Winters attended the reunion and George Poe was a guest.

VISITED PARENTS

Mr. and Mrs. Newby G. Brown, Regina, Clayton and Bret of San Antonio, visited in the home of their parents, Mr. and Mrs. Henry Vogler, Mr. and Mrs. J. S. Brown. The children returned home with their parents after a weeks visit with their grand parents.

RETURNED TO HOUSTON

Mrs. R. W. Babston returned Wednesday to her home in Houston after a two weeks visit with her sister, Mrs. E. L. Crockett and Mr. Crockett. Mrs. Babston plans to return to Winters in the fall to make her home here.

of Dr. Rufus Cole of Mt. Kisco, N. Y. Every seed proves his basic claim: That there is nothing new under the sun, and that what happens today is dependent upon all that has happened for generations before. Furthermore, seeds will someday become real economic forces, through this possibility is now almost entirely ignored. I wish I were a young man and could enjoy the great changes ahead of us; we have only tapped the great computer era! Even Edison once said to me: "Give me a few more years, and I would have seeds perform wonders such as the incandescent light and the electric motor have done for the industrial era."

MRS. JAMES WESLEY VOGLER

Carlene Killough, James Wesley Vogler Married At Ballinger Sat.

Marriage vows were recited at the Seventh Street Baptist Church in Ballinger Saturday evening at 7 o'clock, uniting Miss Carlene Killough, daughter of Mr. and Mrs. C. C. Killough, 811 North Concho, and Mr. James Wesley Vogler of Abilene.

Parents of the groom are Mr. and Mrs. Henry E. Vogler of Winters.

The Rev. Billy Crews, pastor of the church, officiated for the double ring ceremony before the altar centered with a large basket of white gladiolus flanked by tall candelabra holding cathedral tapers. The bride's chosen colors, mint green and white marked the pews.

Don Buchanan, organist, played wedding music and accompanied Deanna Kozelsky, soloist.

Candlelighters were Bo and Danny Killough, brothers of the bride. Theresa Chadwick was flower girl and Jeffrey Russell was ring bearer.

Doyle Cooper, brother-in-law of the groom, was best man. Ushers were Ronnie Onken and Dennis Rodgers. Groomsman was Newby Brown of San Antonio, brother-in-law of the groom.

Oleen Priem, Ballinger, was maid-of-honor and Miss Eris

Vogler of Winters, sister of the groom was bridesmaid.

The attendants wore street-length dresses of turquoise silk shantung designed with fitted bodice, scooped neckline and bell skirts with matching headpiece and short veil. They carried long stem white carnations.

Given in marriage by her father, the bride wore a gown of white Chantilly lace over bridal satin fashioned with fitted bodice, long sleeves fastened at the wrist with tiny satin-covered buttons. The softly pleated skirt extended into a chapel train in the back and the tiered veil of silk illusion fell from a crown of pearls studded with rhinestones. She carried a bouquet of white carnations atop a white Bible.

The bride's parents hosted the reception in the Fellowship Hall at the church.

The bride's chosen colors were featured in decorations for the table, laid with lace over green.

Mrs. Erwin Ueckert of Winters served the wedding cake. Nancy Kennedy of Ballinger, ladeled punch and Mrs. Ronny Campbell assisted in serving.

Mrs. Dennis Hunt of Ballinger presided at the register.

For her wedding trip the bride changed to a three-piece beige suit with bone accessories, beige

MOVIES

"Stage To Thunder Rock"

A remote stagecoach depot somewhere out west is the setting for the new Technicolor suspense western from Paramount, "Stage To Thunder Rock," which opens at the Fiesta Drive In, Friday and Saturday. Heading its big cast is a list of well-known stars including such names as Barry Sullivan, Marilyn Maxwell, Scott Brady, Lon Chaney and Keenan Wynn.

"Stage To Thunder Rock" is the story of seven people, who by an act of fate, find themselves gathered in a stagecoach depot. Each one of these people have the same conflicting interest . . . 50,000 dollars in stolen bank money which Sheriff Horn (Barry Sullivan) has just recovered.

"El Cid"

Sophia Loren, the Italian beauty co-starred with Charlton Heston in "El Cid," not only is an Academy Award winner but has won every major European award as best actress.

Her new film, in which she plays the Castilian noblewoman Chimene loved by Spain's 11th Century warrior-hero, is a Samuel Bronston presentation and opens Sunday, Monday and Tuesday at the Fiesta Drive-In Theatre.

Heston is cast as El Cid, the warrior who united Christian and Moor to drive the Islamic hordes from the country he loved. The film, in Super Technirama Technicolor, was directed by Anthony Mann.

Miss Loren, who won Hollywood's highest acting honor for her performance in "Two Women," emerged as a top international star in 1961 after winning the Golden Palm Award at the Cannes Film Festival in France, the Bambi Award in Germany, and two Italian awards, the Silver Film Strip and the David di Donatello award.

hat and wore the corsage from her bridal bouquet.

She is a graduate of the Ballinger High School with the class of 1963 and was formerly employed at Smith Drug Store. Mr. Vogler is a 1956 graduate of Winters High School and is employed by the Furniture Mart in Abilene.

Mr. and Mrs. Vogler are at home, 1010 Rodgers Street, Abilene.

State Capital Highlights—

First Steps Are Taken Toward Inevitable Redistricting In Texas

By Vern Sanford
Texas Press Association

New preliminary steps, including Texas toward the inevitable realignment of congressional and legislative districts, were taken last week.

Atty. Gen. Waggoner Carr asked that the federal district court at Houston allow time for the Legislature to redraw the districts in its session next year, as the court had done earlier with congressional apportionment.

In view of U. S. Supreme Court decisions that both houses of the state legislature must be selected on the basis of population alone, Carr concluded that there is little doubt that

Texas districts would be declared unconstitutional.

Meanwhile, in Fort Worth and Dallas a committee of the Texas Legislative Council held its first public hearing seeking advice on how congressional districts should be redrawn.

A parade of witnesses was heard before the committee recessed briefly. It will move to Houston for its third hearing on July 17. A fourth hearing will be held in San Antonio. Committee spokesmen have indicated they may go to West Texas, then perhaps return to South Texas for further testimony.

A session of the full legislative council, research arm of the Legislature, is scheduled for July 27, in Austin. At that time, the Council is expected to decide whether to broaden its own study to include the explosive, close-to-home problems of recarving the state's House and Senate districts.

school fund money to local districts from \$78.50 to \$81.50.

This \$3 per capita hike represents an overall \$7,600,000 raise in available fund aid to the districts for 1964-65, based on a current estimate of more than 2,500,000 students.

Comptroller Robert S. Calvert estimated the fund for the coming school year at \$218,300,000. Board allocated \$10,500,000 to finance the cost of purchasing and handling text books. This left \$207,700,000 to be distributed on a per capita basis.

This increase means no increase in overall state aid. Allotments to all but the few prosperous "budget balance" districts for salaries and operations will be decreased by an amount equivalent to the available fund boost.

Dr. L. S. Richardson, Brasport Public School superintendent, was appointed to the 1964 state textbook committee to study books offered for school adoption.

Board also agreed to name a study committee to look into a proposal for a \$1,400,000 junior college at Pampa.

A policy change directed that more time in driver education courses be spent on behind-the-wheel instruction and less on general safety lectures.

ARMY EXAMS

The number of 18-year-olds who will be given Army mental-physical exams by Texas draft boards during August will be increased to 2,762 (from 1,816 in July).

Tests are in line with President Johnson's call for examination of all newly registered men out of school and available for service. They will not be considered for immediate armed forces service. But those failing the examination will be referred to the Texas Employment Commission for advice and counsel on jobs or job training.

Only about 225 in the draft age bracket (most of them 22 or above) will be examined next month—and only 119 are scheduled for induction during August.

This is the lowest induction call for Texas since April, 1961, when the quota was 65.

INVALIDATION UPHELD

Third Court of Civil Appeals agreed with an Austin district court that a requirement in the new small loan act that Texans own more than 50 per cent of the stock in new Texas lending companies is unconstitutional.

Loan Commissioner Frank Miskell had denied applications for loan branch offices in Houston, Waco, Texarkana, El Paso, Dallas, Fort Worth, San Antonio and Arlington on the stock ownership provision.

Ruling does not apply to other sections of the 1963 law.

PARKS AND WILDLIFE DEPT.

Weldon Watson, director of the State Department of Parks and Wildlife, reports that a lot of people want state parks built near the many reservoirs under construction around the state. He feels, however, that nothing should be added until old parks are rehabilitated.

Watson made this statement when he filed a request for a \$25,700,000 budget for 1966-67. This is an increase over the current biennial budget of \$11,000,000. Included are \$7,000,000 more for parks and \$4,000,000 more for wildlife projects.

He pointed out that most of the facilities in existing parks were built by C. C. workers some 30 years ago, and they're in bad repair. He said there's hardly a beam in the cabins at popular Bastrop State Park that has not rotted out.

But Watson described a poor pay structure as the Parks and Wildlife Department's chief ailment. He said the starting salary for game wardens of about \$330 a month is so low that it is impossible to recruit "men the state will be proud of."

He wants a complete revision of the Parks and Wildlife's pay classification formula, so trainees as well as regional department heads will be paid in line with Department of Public Safety salaries.

APPOINTMENT ANNOUNCED

Gov. John Connally named Terry L. Jacks of San Marcos as district judge of the 22nd judicial district, effective August 1. He replaces veteran Judge J. R. Fuchs who resigned.

Jacks has been Hays County Attorney since 1955. The 22nd District covers Comal, Hays, Caldwell, Fayette and Austin counties. Jacks was nominated for the court in primary elections this year when Fuchs did not seek another term.

COLLEGE STUDY UNVEILED

Long-secret and long-awaited recommendations by the governor's committee for making Texas colleges and universities No. 1 in the nation have just been unveiled.

College officials and the press were briefed on highlights of the report by the Governor's Committee on Education Beyond the High School. It followed a year of intensive research.

Report now has gone to the printers and will be presented to Governor Connally and the Legislature by August 31.

Roger Babson Says—

Current Expansion Phase Of Business One of Longest in History

Babson Park, Mass., With the current expansion phase of the business cycle now ranking as the second longest in peace-time history, the tendency is to feel that cycles have been eliminated through legislation and pump - priming. This type of thinking crops up from time to time, but prolonged booms inevitably lead to careless practices which must ultimately be corrected in ensuing downswings. Conversely, recessions breed disappointment and disillusionment which curtail demand and growth and build up pressure for the next upswing.

Cyclical Swings In Borrowing And Interest Rates

Borrowings by business have been only moderate in the present period of rising business. This has been due to the accelerated internal generation of cash resulting from liberal depreciation schedules. Hence, borrowings by consumers for installment purchases and mortgages have risen more rapidly than business loans. Expansion of consumer debt markedly inflates consumer buying power and thus is a potent business stimulant. But growth in debt cannot long outpace growth in income. When debt repayments command too large a slice of take - home pay, consumer demand for durable goods and housing suffers.

Swings in interest rates, of course, are largely dependent on demand for credit. So far, the upturns in borrowings have been edging interest rates higher. As borrowing costs increase further, however, they will tend to dampen demand for durables and housing — until debts become less burdensome and borrowing costs less expensive.

Human Judgment And Cycles

The foregoing illustrations serve to point out that certain cycles are influenced importantly by human judgment. This is true of cycles in stock, bond, commodity, and real estate prices, as well as in the above-mentioned aspects of business. In a free enterprise economy such as ours, the cyclical ebb and flow reflects the net effect of the free choice and action of the people.

Therefore, with human frailties making us prone to excesses of optimism and pessimism, cyclical movements are bound to recur; legislation and pump-priming can only temporarily affect their duration and intensity. However, periods of excesses of optimism and pessimism may be a small price to pay for our freedom of choice.

IT'S THE LAW IN TEXAS

YOU CAN'T ENFORCE A BET
Is a bet with a friend, with witnesses present, a valid contract upon which you can collect in court? Can you force a person to pay off a bet that he made you?

Jim was the town's most loyal supporter of the Marysville baseball team, even though the team was having a disappointing season. Tom, a supporter of Johnstown, a rival team, offered to bet Jim a sum of money that Johnstown would beat Marysville.

Jim was quick to accept and asked several bystanders if they would be witnesses to the bet. That weekend Marysville won, but Tom refused to pay. Jim claimed that the bet amounted to a valid and binding contract. He wanted to bring a lawsuit against Tom to collect the money that he felt Tom legally owed him. However, he was advised that he did not have a case.

The bet that they made was a gambling contract, and as such was illegal. Where both parties assert rights founded on a contract which is illegal and void, the court will refuse to enforce it, leaving the parties just where they placed themselves, and as they were before coming into court. The court has said that they owe it to public justice and to their own integrity to refuse to enforce contracts essentially violating morality or public policy. It is a judicial duty always to turn a claimant upon such a contract out of court regardless of how the character of the contract is made to appear.

In this case, even though Jim could prove that he had made a contract with Tom, and regardless of the number of witnesses Jim could call into court to swear to the terms of the contract, the contract itself was an illegal one, made for an illegal purpose, gambling, and as such the courts will refuse to enforce it.

The courts will allow great freedom to people in the making of agreements between themselves, but they draw the line when the agreement made is illegal. The courts will not aid people in breaking the law. (This newsfeature, prepared by the State Bar of Texas, is written to inform — not to advise. No person should ever apply or interpret any law without the aid of an attorney who is fully advised concerning the facts involved, because a slight variance in facts may change the application of the law.)

If projections of sharply increased business capital expenditures over the rest of this year run true, this could be the prime source of business vitality. However, the step - up in capital outlays may come too late for them to cash in on the current high level of demand. And the rising flood of goods resulting from increased plant could cause market glut and price cutting in the next recessionary period.

HEALTH LETTER

Are the "childhood diseases" here to stay? Is it still necessary to have a smallpox vaccination? Do babies inherit a "natural immunity"?

The "childhood diseases" are a myth. The fact is that these diseases are so contagious among children that most people have had them and thereby developed immunity by adulthood. But adults can and do catch them, and when they do they are sometimes much sicker than children.

Two of the so-called childhood diseases — mumps and German measles—have special dangers for the adult patient. Mumps can be damaging to adults—both men and women. And German measles, when occurring in the early part of pregnancy, can result in damage to the unborn child. So, if you are exposed to any "childhood" disease and believe you have never had it, ask your doctor what you can do to protect yourself.

It is extremely important that you and your children keep protection against smallpox up to date. True, the absence of smallpox in this country has led to a lack of public concern about this serious disease and large segments of the adult population are unvaccinated or require boosters. In some parts of the world smallpox continues to be a serious problem. If just one single undetected smallpox case should be introduced into a U. S. community, it could touch off a serious epidemic.

Is it true that a baby is protected by his "natural immunity" acquired from his mother? Some of a mother's natural or acquired immunities, if any, can be passed on to her unborn infant as her blood courses through the placenta that nourishes him, but this inherited immunity remains effective for only a short time.

In the case of whooping cough, a highly contagious disease that is especially dangerous and often fatal for small babies, there is evidence that immunity is only occasionally passed on.
