ELECTRIC CONDITIONED LIVING • ELECTRIC CONDITIONED LIVING • ELECTRIC CONDITIONED LIVING

What people are saying about...

"I would have nothing but an electric Gold Medallion home," says Mrs. Bob Corkins of Alpine, Texas. "I like the low operating cost," says Mr. Corkins who thinks the electric bill a good value. Kathy, age 5, and Greg, age 10 months, smile contentedly, and that means they like the comfort of total-electric living. The Corkins' Early American style home has 7

rooms, 2 baths, and a covered patio-2,000 square feet of living space. The only fuel used for all purposes

is electricity. It operates a 4-ton heat pump with 15 KW Auxiliary Strip heating, 4-ton refrigerated air conditioner, electric range, washer, dryer, disposal, dishwasher, refrigerator, freezer, two 1.3 KW bath heaters, and Medallion light for living, yet operating cost averages only \$38.03 per month-22.8¢ per square foot per year!

The Corkins have been living better electrically since 1959 and are well pleased with it all."I love electric cooking," Mrs. Corkins says. "It's much better, faster and cleaner." The Corkins especially like the even heat throughout the house, and let the temperature stay at 70° year-round.

Would you like to live in total-electric comfort? Then see your electric contractor or visit WTU.

Tony plays a con man whose specialty is love 'em, marry 'em and leave 'em-but very dead, with himself as the beneficiary of their vast estates.

As Nick Johnson, the handsome and talented ladykiller, Tony is back in one of the fantastically far-out, farcial funfests that only he can handle with such verve. Tony has appeared in all sorts of roles in all sorts of films, from westerns to gangster to historical, but it is the celebrated Curtis touch and flair for romantic comedy roles that make him the top star that he is today.
