Proposed Water Legislation Concerns Local Leaders

Speculation that legislation will be introduced to reduce the 200 acre foot capacity allowance for ponds and impoundments to 10 acre foot capacity, without a permit, concerns local leaders.

Arthur Eggemeyer, chairman of the Runnels Soil and Water Conservation District; Hugo Vogelsan, chairman of the Valley Creek Water Control District; David Ledbetter, chairman of the Elm Creek Water Control District and A.T. Granzin, outgoing chair of the Willow Creek Water Control District all expressed concern over the change recommended by the Texas Society of Professional Engineers and the Texas Section of the American Society of Civil Engineers. filled at the regular hospital district election April 5. E.F. Albro, George R. Hill and John W. Norman, who

Mrs. Leon Frerich Named Outstanding Homemaker

Mrs. Leon (Mildred) Frerich of the Norton Community has been selected for the Outstanding Conservation Homemaker award in the Runnels Soil and Water Conservation District, according to Arthur Eggemeyer, District Chairman.

Mrs. Frerich, her husband, and four children reside on a farm near Norton where they are actively engaged in farming.

Mrs. Frerich leads a active home life. Each year she has a productive garden from which she harvests fruit and vegetables. Many of these are canned or frozen and Mrs. Frerich takes this opportunity to teach her children the skills of food preservation. The Frerich's also process their own home raised beef, pork, and mutton and, again, pass these skills on to their children.

Mrs. Frerich is also actively engaged in many community activities. For example, she has been a board member of the Runnels County Tuberculosis Association and the South Runnels Cancer Society.

Presently, Mrs. Frerich is a director of the Ballinger Communitychest, Chairwoman of the Women's Committee of the Runnels County Farm Bureau, and an active member of the Bandboosters' Club, St. Mary's Altar Society, and the Circle C CowBelles, which is the women's auxiliary of the National Cattlemen's Association.

In view of her many activities and accomplishments, not only in the home, but in the community as well, we extend our congratulations to the conservation-minded Mrs. Frerich.

C. T. Parker's Weekly News Column

If small grains have been grazed, the nitrogen content of plants has been reduced. So topdressing with nitrogen fertilizer should be considered to maintain acceptable grain yields, especially if soil moisture conditions are favorable at the time livestock are removed. Managing small grains for grazing and grain production requires timely decisions, and Parker advises farmer to begin planning today.

FORAGE-FED BEEF OFFERS OPPORTUNITY

With high pasture expenses and reduced beef cattle prices projected for 1975, forage-fed beef provides an opportunity for increased pasture income, believes Parker, county agent of the Texas Agricultural Extension Service. "Forage-fed" or "forage-finished" denotes beef that has been produced largely or entirely from forage. This includes the weaning calf in finished condition suitable for slaughter, the larger feeder calf which needs reduced amount of time in the feedlot to finish at an acceptable grade, and cattle produced to slaughter weights on high-quality pasture with or without a limited amount of grain.

Pastures in Runnels County can produce high-quality forage during an extended time of the year, notes the agent. With soil and climatic conditions favorable for growing good quality pastures, many producers are depending more heavily on forage to maximize pasture and beef cattle income. With escalated pasture production expenses, this is a practical way to maintain pasture income.

"Forage-fed beef" does not minimize the importance of feedlots in Texas, believes Parker. Instead, it offers an opportunity for pasture owners to improve income and for feedlot enterprises to maintain a profit from feeding heavier cattle.

Good soil moisture in Runnels County has boosted forage production on small grains. But some farmers are planning to forfeit spring grazing and shoot for a grain crop due to favorable grain price prospects, notes C.T. Parker, county agent for the Texas

Agricultural Extension Service

Livestock should now be removed from small grain fields so that serious grain yield reductions do not occur. With grazing, the problem is normally not under-utilization of the small grain forage but overgrazing. Moderate fall and winter grazing usually has little effect on grain yields and may even prevent lodging and increase tillering.

Late grazing seriously reduces grain yields, emphasizes the agent due to removal of the plant's growing point, loss of accumulated nitrogen in the forage, and decreased leaf area needed for vegetative regrowth.

It takes more than optimism!

The farmer/rancher is an eternal optimist. He must be—to contend with such imponderables as weather, prices and costs.

Yet, it takes more than optimism in today's high cost agriculture. It takes an organization the farmer/rancher knows he can count on. Farm Bureau is such an organization. That's why four out of five farmers in the nation are members of Farm Bureau.

Farm Bureau works for agriculture on three broad fronts—

1. TO INCREASE ECONOMIC OPPORTUNITY—Through effectiveness in Public Affairs (policy development & legislative activities)
2. TO STRENGTHEN FARMERS' COMPETITIVE POSITION IN MARKETPLACE—Through marketing programs, commodity activities, market expansion
3. TO CONTROL PRODUCTION COSTS—Through group purchasing (tires & batteries), insurance protection (fire, life & casualty), group insurance (medical care)

REDDY'S REFRIGERATOR SAVINGS TIPS

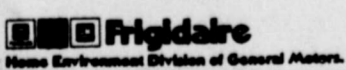

Return fresh foods to the refrigerator and frozen foods, such as ice cream, to the freezer as soon as possible. Measure and remove the quantity needed for cooking or for the table, and refrigerate the remainder at once.

Use cold controls efficiently by selecting the settings that provide about 36° F. in the refrigerator and 0° F. in the freezer.

Fill the refrigerator with food, but be careful not to overfill. Make sure that food packages don't block air vents in the freezer or refrigerator section.

Clean the condenser surfaces of the refrigerator; dirt restricts air flow and acts to insulate the condenser, forcing the refrigerator to work harder and longer to maintain proper temperatures.

Cong. Krueger Co-Sponsoring Oil Legislation

Congressman Bob Krueger announced today that he has co-sponsored a bill to exempt state-owned oil from the Emergency Petroleum Allocation Act (P.L. 93-159). Noting that less than one percent of the crude oil produced in Texas is state-owned, Krueger estimated that the state is losing about \$34 million per year, based on 1972 production figures.

The Jordan River rises on the slopes of Mount Hermon, then descends sharply as it flows through the Sea of Galilee before emptying into the Dead Sea, 1,290 feet below sea level. Hydrographic surveys have shown the river could provide power and irrigation for Jordan, Syria, Lebanon and Israel if peace comes.

Change of Policy for Collections at North Runnels Hospital

Good financial management and a high percentage of collections for services rendered is a necessity for any business activity that deals with the public. To maintain good delivery and quality health care, hospitals and other health care institutions must pay higher salaries for professional help and also higher costs for medical products involved in the care of your family and friends. In order to improve the hospital's delivery of health care to the public under sound financial management, it is necessary that FINANCIAL ARRANGEMENTS BE MADE FOR ALL OUT PATIENT CARE BEFORE IT IS COMPLETED. This includes lab work, x-rays and electrocardiograms.

Also, beginning March 1, 1975, x-ray charges will be handled as follows:

YOU WILL RECEIVE A CHARGE FOR THE PROFESSIONAL FEE OF THE RADIOLOGIST FOR: THE X-RAY THAT YOU HAVE RECEIVED. THIS CHARGE COVERS:

1. CONSULTATION WITH YOUR PHYSICIAN REGARDING THE STUDIES OF THE X-RAY
2. A WRITTEN REPORT TO YOUR PHYSICIAN
3. A WRITTEN REPORT FOR THE PERMANENT HOSPITAL RECORDS.
4. THESE WRITTEN REPORTS ARE NECESSARY EVEN THOUGH PERSONAL PHYSICIAN ADVISES YOU OF HIS REPORT ON THE X-RAY, EVEN THOUGH THE RADIOLOGIST IS NOT PRESENT AT THE TIME OF YOUR PHYSICIAN'S REPORT.

THE X-RAY CHARGE ON YOUR HOSPITAL BILL COVERS:

1. SERVICES OF THE X-RAY TECHNICIAN AND OTHER HOSPITAL PERSONNEL
2. COST OF FILM, SUPPLIES, AND OTHER DEPARTMENTAL EXPENSE
3. USE OF HOSPITAL FACILITIES AND X-RAY EQUIPMENT

THE HOSPITAL CHARGE DOES NOT INCLUDE THE FEE OF THE RADIOLOGIST

Your help and cooperation in understanding this will be greatly appreciated.
