Tips on Touring

By Carol Lane
 Women's Travel Authority

Twenty million anglers can't be wrong about the fun of fishing. But they sure can make mistakes about the best time to fish.

Here are some portents for a lucky day's catch that you can look

for when planning to drive off to your favorite piscatorial retreat.

Fish bite best when they can see best. This means they feed more when the waters are clear, not muddy. The moon seems to affect the fish's appetite too. In fact, there's a saying, "Fish bite best when the moon is bright, and this is true both day and night," that many fishermen swear by.

A good off-shore breeze is another lucky omen. The ripple on the water hides you from the fish. Rough water, however will hide the bait from the fish.

Many anglers consult a barometer before setting forth on their sport. They stay in bed if the barometer is low, but jump out early and fast when it is high or rising.

Incidentally, the warmer the water, the deeper should be your plugs, spoons or spinners as the fish seek out the cooler levels.

Actually, the enjoyment, for most people, is not in catching fish—but just in "goin' fishin'."

Better Home Lighting

IS AS EASY AS 1-2-3

Good home lighting is important! Important to your health, safety and home enjoyment. And in most cases, acquiring the good lighting that every household needs is as easy as following three simple, basic-lighting rules.

1.

Proper-size bulbs provide better light for easier seeing. Keep all lamps supplied with the right size bulb. More eyestrain is caused by dim light from small-size bulbs used in reading and work lamps than from any other source.

2.

Every socket in your home should be filled with the correct size bulb. If you allow empty sockets to appear in your household you cut down the efficiency of light fixtures, and invite accidents in dark areas where little-used fixtures are not kept workable.

3.

A ready supply of extra lamp bulbs on hand keeps every lamp and light fixture in your house ready when you need them. No more interruptions occur to work or play when you have an immediate replacement for burned-out bulbs.

"CONSULT YOUR DEALER'S CHART FOR CORRECT SIZE BULBS FOR EVERY ROOM. STOCK UP ON EXTRA BULBS . . . AND FOLLOW THESE THREE RULES FOR GOOD LIGHTING."

Rodeos are getting to be a career with Boyce House—not riding and roping, however, but writing.

The former West Texas Oil Belt editor, who is the author of "I Give You Texas," has just been appointed publicity director of the Southwestern Exposition and Fat Stock Show. This will be his fifth season with the Fort Worth show, which features the "world's greatest indoor rodeo." He served in the same capacity for the recent Heart O' Texas Fair in Waco, which likewise presented a spectacular indoor rodeo and he also directed the publicity for an outstanding outdoor show, the Possum Kingdom Roundup in Graham.

House was editor of the Cisco Daily News, Eastland Telegram and Ranger Times more than 20 years ago, and has written two books about the Eastland County oil boom.
