1992 VOTE POLITICS

Clinton, Bush win big in Super Tuesday

Bill Clinton won an unbroken string of Southern land-slides Tuesday, brushing past Paul Tsongas to establish himself as front-runner in the Democratic presidential race. President Bush notched an eight-state Republican shutout of Patrick Buchanan.

On the busiest night of the primary season, Bush won from Boston to Austin, and six states in between. He faced a dwindling protest, picking up more than 65 percent of the GOP vote in each state.

Clinton, the Democrats' pre-primary favorite until confronted with a sequence of character questions in February, had campaigned hard for Southern margins so lopsided that Tsongas would have to limp to the Midwest as the primary calendar turned north to Illinois and Michigan.

Florida had been the bitter battleground, and even there Tsongas could capture only 34 percent of the vote.

Texans back Bush, Clinton in primary

AUSTIN (AP)—Texans handed big victories to President Bush and Arkansas Gov. Bill Clinton in the biggest Super Tuesday primaries.

Bush, who calls Houston home and enjoyed the support of Texas Republican leaders, easily swept aside the upstart conservative challenge of TV commentator Pat Buchanan.

The president also led the competition for all 121 national convention delegates at stake.

"It's great and gratifying to see," said Robert Mosbacher, Bush's national campaign chairman, in a phone interview from his election night headquarters in Houston.

"Texas is Bush country. The people of Texas like George Bush," added state GOP Chairman Fred Meyer.

Texas prison system nearing compliance

WASHINGTON (AP) — The Texas prison system, which has been under federal supervision since 1980, may be "very near" to compliance with sweeping prison reforms, the federal judge who ordered them said Tuesday.

"I think in due course the Texas system is going to be in compliance. They are very near there right now," U.S. District Judge William Wayne Justice told law students during a symposium on the landmark Ruiz vs. Estelle lawsuit.

The Texas Board of Criminal Justice will meet Friday to consider a proposed agreement between state officials and prisoners' struggle over prison reforms. Although some obstacles remain, both sides said they could live with the agreement now being considered.

The plan could save the state \$100 million and relieve some overcrowding in county jails caused by a backlog of state inmates, the chairman of the Criminal Justice Board said last week.

News Texas Tech Law School faculty and students discussed proposals to restructure the school's grading system to make Tech graduates more competitive in the job market upon graduation. **page 4**

Bush, Clinton reign supreme in Lubbock County

by BRIAN COFER
 THE UNIVERSITY DAILY

Lubbock County voters overwhelmingly picked George Bush and Bill Clinton as Republican and Democratic candidates, respectively, in Tuesday's primary elections.

Bush garnered 72.59 percent of the local vote, Buchanan gained 21.64 percent and David Duke came in a distant third with 1.75 percent.

Clinton defeated Tsongas by 60.94 percent to 20.52 percent. Jerry Brown trailed with 8.77 percent of the vote.

Local Republicans said Bush's Texas victory has put him closer to nomination.

"It's really what we expected," said Bill Leavell, Lubbock chairman for Bush's re-election campaign.

"I think this (the Lubbock vote) shows the

mood of the country."

He said Bush fared well because the president is the only viable Republican candidate.

David Nelson, chairman of Bush's steering committee for Lubbock, said Tuesday's performance in Texas helped strengthen the president's campaign and clinch his nomination this summer.

"Bush is going nowhere but up and has handled his campaign perfectly," he said. "Buchanan is dead in the water. I think he will drop out after tonight."

He said at least 75 percent of Buchanan's supporters will cast votes for Bush in November.

Mary Alice McLarty, local chairwoman for Clinton's campaign, said she is optimistic that the Arkansas governor has weathered the controversial issues that have dogged his efforts

Clinton

Bush

and that these topics have no bearing on his qualifications for president.

"The Flowers' issue is a personal and not a public issue," she said. "Things happen in life, and whatever Clinton and his wife have worked out concerning the controversy is their business."

Lubbock voters expressed a variety of con-

cerns influencing their decisions at the polls.

Lila Montgomery, a financial consultant, said that despite her dislike of Bush's anti-abortion stance she voted for Bush because of his economic platform.

"He has allowed the economy to take care of itself, instead of taking artificial measures," she said.

Duane Carrico-Fisher, a Texas Tech graduate student, said he planned to cross over from the Republican primary, where he usually votes, in favor of Clinton.

"Bush is out of touch," he said.

"He thinks he speaks for the people. He says he doesn't trust opinion polls, but if he doesn't look at the polls, how can he know what the people want?"

Everybody Wang Chung tonight

Young Republicans gather at the 19th Street Depot Warehouse to celebrate George Bush's vic-

tory in the Super Tuesday primary. Bush captured all eight states holding primaries Tuesday.

Bush in; Demos still battling, profs say

by KENDRA CASEY
 THE UNIVERSITY DAILY

With Super Tuesday behind presidential hopefuls, George Bush and Bill Clinton are expected to begin concentrating on the November election, said some local political followers.

Bush captured 73 percent of the votes in Lubbock to assist his eight-state sweep in the Super Tuesday primaries, leaving Pat Buchanan with only 23 percent of the Lubbock vote and wins in no primaries Tuesday.

Ken Cosgrove, a visiting assistant political science professor at Texas Tech, attributed Bush's win in Texas Tuesday to it being one of his home states.

"Bush's problem is that he's got a strong group of about 30 percent of the Republicans that are unhappy with him," said Neale Pearson, a Tech political science professor.

Cosgrove said that 30 percent should not prevent Bush from winning the party nomination and that Buchanan helped Bush recognize and solve some of the weaknesses in his campaign.

"Bush locked it up tonight," Cosgrove said. Clinton secured 61 percent of the Lubbock voters and took seven of the Super Tuesday primaries.

Paul Tsongas brought in only 21 percent of the Lubbock votes but was able to win in his home state.

Cosgrove said Clinton had locked in the Texas vote early in his campaign, due primarily to his role as George McGovern's campaign manager.

In addition, Cosgrove said Texas is part of Clinton's

home turf and that in next week's Michigan and Illinois primaries he will have to appeal to a tougher voting population.

Pearson said he predicts a more secure opportunity for Clinton to take the national Democratic ticket.

"He's on his way to having the nomination," he said.

Pearson said also that if Clinton does well next week he will have the nomination wrapped up.

Cosgrove said candidates usually have to change their strategy from state to state in order to appeal to varying voting trends throughout the country.

"Absolutely, organization is the key in the primaries," Cosgrove said.

"I don't think this is over by any stretch," Cosgrove said of the Democratic race.

Cosgrove said in order for the Democratic party to secure a win in November, they will have to move away from focusing campaign strategies on labor unions and other special interest groups.

"It will be important for Clinton or any Democratic nominee not to seem as captive to special interest groups," Cosgrove said.

Cosgrove said during this and the 1996 elections, American politics will change a great deal.

"Like the rest of the world changed, in the next four to eight years American politics will change," Cosgrove said.

He said there is a generational split in voting trends, and he expects those differences to become more obvious in future elections.

**Blalack out
 Wray, Duncan to runoff for U.S. rep District 84**

by BRIAN COFER
 THE UNIVERSITY DAILY

Although Democratic voters faced a ballot filled with uncontested races, Lubbock Republicans cast deciding votes in a number of controversial races.

In the race for the nomination for state representative for District 84, Robert Duncan gained 39.93 percent of the vote, necessitating a runoff election in April with Wanda Wray, who came in second place with 21.55 percent.

Duncan said his strategy in the runoff campaign will remain the same. "We'll keep talking up the campaign," he said.

An ability to provide a stable, conservative government for Texas are major selling points for his campaign, he said.

Wray said she is optimistic about her campaign because of her pro-business approach and opposition to a state income tax.

"I feel I am as equally qualified as he (Duncan) is," she said, but added

I feel I am equally qualified as he (Duncan) is.
 — Wanda Wray

that there are numerous differences between her and Duncan.

Longtime justice of the peace for Precinct 1, L.J. Blalack suffered an upset at the hands of Tom Head who received 54.79 percent of the vote, and Val Varley, who came in second with 25.16 percent.

Beau Boulter gathered 46 percent of the vote for the nomination for District 13 U.S. Representative, currently held by Democrat Bill Sarpaluis. Bob Price followed with 21.72 percent.

In the Lubbock County sheriff's race, incumbent D.L. "Sonny" Keese captured 52.36 percent in defeating F.C. "Butch" Hargrave, who received 47.73 percent.

SA runoff election today for internal, external VPs

by STEPHEN ARMOUR
 THE UNIVERSITY DAILY

Once again students will be casting ballots today in the Student Association runoff election to fill the internal and external vice presidential offices.

"We hope we have as big a turnout as last week (when a record number of 2,931 Texas Tech students cast ballots)," said Dan Burns, an assistant director of operations in the University Center's Main Office. "But, realistically, there is always a decrease in voter turnout during runoff elections since the number of candidates is diminished."

Burns said an average of 2,000 students vote during runoff elections. He said the same number of students are expected to vote today.

"When you take out candidates, you take out their followers as well," Burns said. "There are only a total of eight candidates running in the runoff election. Last week, we had more than 100 candidates running on the ballot."

Although a glitch in the computer that tabulates the election results prevented last week's election results from being made public until Thursday morning, Burns said he does not foresee any problems in tabulation during the runoff election.

"All the problems with the computer have been corrected," he said. "We do not see any problems with the runoff."

Polls will be open in all academic buildings on campus between 9 a.m. and 5 p.m. Polls in the UC will be open between 9 a.m. and 7 p.m.

Rise of tuberculosis cases related to AIDS epidemic

by CATHERINE DUNN
 THE UNIVERSITY DAILY

Editor's note: The following is the second in a four-part series on tuberculosis. Today's article deals with the relationship between AIDS and TB.

The AIDS epidemic, which continues to bring fear to heterosexual and gay communities, now carries with it a new threat — tuberculosis.

"There's evidence to indicate that a fair amount of the increase in TB is due to the relation between TB and AIDS," said Don Kopanoff, the associate director for external relations at the Center for Disease Control in Atlanta, Ga.

From 1953 to 1984, TB decreased in the United States by 5 to 6 percent per year. By 1985, the AIDS epidemic had ended the decline.

Because the HIV virus attacks the immune

system, AIDS patients are more susceptible to the communicable disease, which can be spread by coughing or sneezing the bacteria, which causes TB, into the air. As of last Dec. 26, Lubbock reported 315 cases of HIV virus-infected people and 145 AIDS cases. Of those 145 AIDS patients, 54 are still alive.

Tammy Cook, a Lubbock HIV counselor, said that because there is a high occurrence of under-reporting, the figures do not accurately reflect the number of people in Lubbock who are HIV positive or have AIDS.

The City Health Department estimates there are about 2,000 people in Lubbock who are unaware they are HIV positive.

According to the World Health Organiza-

THE UNIVERSITY DAILY: JOHN DAVIDSON

Diane McDonald, program manager for the tuberculosis elimination division of the Texas Health Department in Lubbock, said the number of TB cases in Lubbock, which doubled from nine to 18 in 1991, is not a result of AIDS patients spreading the disease.

"In Lubbock, our AIDS patients are not the reason for the increase," she said. "Most of our AIDS patients here do not have TB."

About three or four AIDS patients in Lubbock have TB, said Darren Knox, the educational director for the South Plains AIDS Resource Center. He recommended TB testing every two months for those infected with the HIV virus.

"TB is becoming more and more prevalent in AIDS patients," he said. "It has just now started to show up (in Lubbock) in the past few months."

The number of TB outbreaks in the disease's multiple drug-resistant form has increased in people infected with HIV.

VOTE TODAY

Remember that today is the day to vote in the run-off elections for the executive offices of internal and external vice presidents for the Student Association. The University Daily encourages the entire student body to vote today. At the right of this column, find the platforms of the four remaining candidates.

These are reprinted as they were first published in our March 4 issue. Below find The University Daily endorsements for candidates. We are also reprinting them as they appeared the day of the election last week.

Some additional information: In last week's election, Michelle Sutton received 1,248 votes and Chip Adami received 784 votes in the internal vice president race. Stacy Gilbert received 1,050 votes and Greg Collier received 864 votes in the external vice president race.

✓ MICHELLE SUTTON

The University Daily's candidate for internal vice president is Michelle Sutton, currently a student senator for the College of Arts and Sciences. Of the candidates running for this office, Sutton is the most qualified not only because of her previous senate experience, but also because of her strong convictions to turn the Texas Tech Student Senate into a body representing all of Tech's student organizations.

Sutton's main concern is that the organizations that use all of their funds each year continue to receive funding from the Student Association while those that do not are educated on their responsibility to use the funds each year in order to continue receiving money from the SA.

She stressed the need for equal representation concerning the annual budget allocations for all student organizations within the senate.

As internal vice president, Sutton would be in charge of appointing senate committee members, making it possible to provide the "less recognized" organizations with the representation they deserve.

She also was adamant about gaining minority representation. She said she hopes to rid the senate of its bureaucracy and appoint committee members based on interest and knowledge rather than "popularity."

She currently is the secretary for the committee on rules and administration which handles rules for student organizations, legislation and approving bills.

Because of her experience in this position she has a firm understanding of how bills are passed and rules governing organizations concerning the allocation of university funds.

✓ STACY GILBERT

The Student Association external vice president serves as a voice for Tech and Tech students to external bodies. After an interviewing process, The University Daily editorial board feels the voice of Stacy Gilbert is the most representative voice for Tech out of the candidates running for this position.

Gilbert reiterated a theme prevalent in her campaign during the her interview with The UD editorial board when she said, "You don't run to represent a few, you run to represent all the people."

Gilbert expressed the conviction to do so. She also showed the combination of professionalism and enthusiasm needed to be an effective liaison between Tech and outside communities such as the City of Lubbock and the State Legislature. This will be increasingly important in the coming year as Tech will have to brace for further state budget cuts in higher education and will have to work to minimize increases in tuition and student fees while maintaining services.

Gilbert seeks increased involvement from the community, corporations and other organizations in the university that will benefit all involved.

She appears genuine in her motivation to run for the betterment of the university and not just for her own personal advancement. And as a two-term student senator from the College of Agriculture, Gilbert has the Student Association experience necessary to work effectively within the organization.

For these reasons, The University Daily encourages students to vote today for Stacy Gilbert for Student Association external vice president.

Chip Adami
 Candidate, Internal Vice President

Qualifications

- Freshman Council (Secretary 1990-1991, Who's Who Among the Freshman Class)
- Student Senate (Vice Chairman, Committee on Budget and Finance Freshman Council)
- Student Senate Legislature (Senate Concurrent Resolution 27.01 — Concerning an amendment to the Student Association Line of Succession to the three executive offices of the Student Association, Senate Bill 27.04 — Student Association Presidential Succession Act of 1991; Senate Bill 27.05 — Student Association Vice President for Internal Affairs Act of 1991; Senate Bill 27.18 — establishing methods and formulas to be used in order to determine the selection of Homecoming Queen; Senate Bill 27.19 — Freshman Council of Qualification Act of 1991.)

- Delta Delta Delta
- Agri-Techsans
- Alpha Zeta Agricultural Honorary
- Nat'l Champ Meat Judging Team
- Meat Science Association
- State FFA Vice-President

Platform

Building a WIN-WIN relationship with the community of Lubbock by starting with that solid foundation;

As Internal Vice President and the President of the Student Senate, three of my goals include: to increase student input into the allocation of student service fees, to deal with the problems facing the student body of Texas Tech by being an effective leader of the Student Senate, and to represent Texas Tech in the legislative session in Austin by lobbying for increased funding and no further cuts.

The first goal I have set as Internal Vice President is to make students aware of the student service fee, and what various services are provided by it. In order to accomplish this, I will work with the media to publicize what students are currently paying for and encourage them to submit their recommendations on how these services can be improved to the Student Association Office. I will then make sure that the Student Association President and the committee members of the Student Service Fee Advisory Board are made aware of the recommendations so that they can make reference to these in the Student Fee Advisory Board Interviews.

My second goal is to be an effective leader of the Student Senate and this can only be accomplished if the student input is received. There will be a number of issues which I plan to have next year's Student Senate address including: improvements in academic advisement, easier access to the Student Health Center at Thompson Hall, the registration process, and the traffic and parking problems.

This year along with the election ballot will be a student response form in which students will identify the problems on campus and list their priority from one to five. One of my first objectives will be to evaluate these responses, then work with the Student Senate to resolve these problems. To publicize next year's Senate activities, I will implement a new radio program in cooperation with KTXT radio to be called, "Senate Update" in which the week's activities will be discussed.

A third goal is to represent Texas Tech in the upcoming Legislative Session in Austin and to lobby for the increased funds that Tech needs for such things as the library and to discourage any further cuts. In recent years, the students of Texas

have seen increases in student health fees, student service fees tuition and the UC fee, and there is no need to support or encourage any more of a financial burden on the students. These are three of my goals that I will work to accomplish as Internal Vice President and President of the Student Senate. This year I have served a number of roles in Senate, but by far the biggest role I have served is that of a leader and this is why I am the most qualified candidate. I will make sure that next year's Senate addresses the problems on this campus which trouble all students and that we receive the student input necessary to solve these problems effectively. I have a lot of new ideas which I will implement into this position and with the help of the Tech media, I know that these ideas can and will be a success. However, my most important qualification is that I have the desire to make Texas Tech and next year's Senate a better place by opening up to the people who are most affected by the situations here — the students.

boxes. As their President, I could ensure that these procedures are followed through and that the results were channeled in such a way as to reflect the interests of the students which they would affect.

Also, I would appoint a committee and a chairperson who would distribute funds fairly and equitably for all student organizations who meet the criteria. Appointing students with an objective mindframe and the ability to compromise is vitally important because all students contribute to the funds allocated through this service and each should be treated fairly. If sufficient thought and unbiased decision making are not enforced in this process some student funds may be lost completely.

Student involvement is the key to a successful and representative senate, the opportunity for leadership is great and students should realize that their voice can make a difference; however, they must let

increase Tech visibility and through this help increase student recruitment. I would work through the Chamber of Commerce, Mass Communications, Marketing, and Dean of Students to publicize Texas Tech and all that is offered. Since the enrollment standards are now higher, freshman council enrollment is down. Recruitment in the coming years will prove to be extremely important and I will work out an effective way to market our University.

I would also like to coordinate the efforts of the Lubbock community and the student body to lobby against the proposed state budget cuts on higher education. The fact that Tech is the largest single

segment of the Lubbock economy relates to a lot of support in the community that has not been tapped. The student relations with the community could be increased by bringing in more employment recruiters and encouraging students to become involved with the community through the Chamber of Commerce. As chairman of the Projects Committee for Saddle Tramps, I helped with the founding efforts to restore the Dairy Barn. Plans have been approved and the restoration is on-line to be started by the end of the semester. I would start now on efforts to turn the building into a student center by rallying support within the community to get behind this project.

organization. It is equally as important to make a lasting impression - to incorporate ideas and move people to positive actions that will not only have an impact today or tomorrow, but in the future! It is also my belief that a person is not elected to represent a few, he/she is elected to represent everyone at Texas Tech. I have concluded each of my speeches with something a very special friend shared with me and I would like to share it with you. She simply said, "Stacy, always remember: WE'RE NOT BORN WINNERS AND WE'RE NOT BORN LOSERS, WE'RE BORN CHOOSERS! Will you choose to take an active part in the PURSUIT OF EXCELLENCE today?"

The reason, I, Stacy Gilbert, am running for this office is not for selfish reasons. I believe any elected office is to serve; therefore, I am running because I know I can be of service to Texas Tech. Serving as an officer should be something you decide to do because you know you have great ideas and a strong work ethic which would benefit the

see Texas Tech promoting positive image is through each student being prepared and ready to be excellent in their field of study. The importance of being a team player and leading by example are very significant ones. By working together and having feedback from everyone, there will be many meaningful accomplishments by the Student Association.

I have a step by step plan for developing more community involvement. This plan includes bringing in community and city business leaders to help students with such things as resumes, applications and interviewing skills. In visiting with many Lubbock leaders I have found many resources within the city and the surrounding area that we need to tap. This will build that WIN-WIN relationship, but more importantly it will allow students to become EXCELLENT! The best way that I

their position be known. Providing a way for the students to do this will be one of my priorities in the coming year.

With the recent decrease in state funding, having experienced and confident leaders to lobby for Texas Tech is imperative. Higher education is at a crossroad and it is up to us to choose the representatives who can best direct its paths.

Being Internal Vice President is one of the most important positions a student can hold on the Texas Tech campus. This position needs someone with experience. I have that experience and more of it than either of my opponents. Also I have genuine interest in the voice of the Tech students and I am determined to see that that voice is heard. Above all the students should have a working knowledge of the Student Association activities and be aware of the power that they hold as students to influence legislation and decisions.

MAILBAG

A brief brush with stupidity

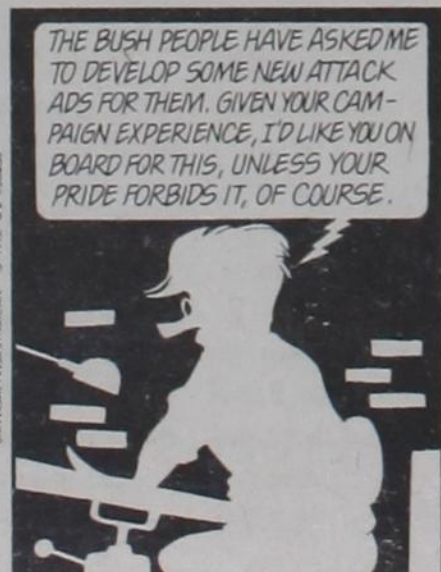

This letter is in my defense for getting written up for "Sexual Harassment" by RA's at the Murdough Residence Hall last Saturday night, March the 7th. It was around 1:30 Sunday morning (Saturday night), and I had just gotten home from a night out. I was getting ready for bed and talking with my friend Carlos from

across the hall. I was in my Hanes briefs, and he was wearing an undershirt and briefs also. I was heating up a cheeseburger in his microwave and walked from his room to mine across the hall as the night RA's were walking down the hall. Not expecting a female at 1:30 in the morning in our hall we laughed in embarrassment and Carlos said he heard the male RA giggle. They continued out our hallway and the two of us thought nothing of it. Thirty seconds later, the two RA's came back and asked us for our I.D.'s. In question of what we did wrong the male RA responded "we are going to call it SEXUAL

HARASSMENT." Dumbfounded, we could not believe what we were hearing. What happened to the privacy that we are entitled to? The rules state that no females are allowed in the male halls after 1:00 AM on the weekends. I would think that an RA would be mature enough to handle seeing someone in their underwear without being offended. Am I to blame if I sleep in my underwear? After telling my friends of this incident, we all felt that the charge is unjust and totally ridiculous. This "SEXUAL HARASSMENT" thing is getting way out of hand. What is this world coming to?

Law school debates current grading policy

by CATHERINE DUNN
THE UNIVERSITY DAILY

Texas Tech Law School's faculty and students met Tuesday with the school's ad hoc grading policy committee to hear proposals that could put Tech at an advantage when competing with other law schools for jobs.

The University of Texas's Law School's newly "inflated" grading system has brought complaints from Tech law students that Tech's current grading system puts them at a competitive disadvantage.

Texas' current system operates on a 4.3 to a 1.3 grading scale. A student who fails a course at UT will receive a grade equivalent to 1.3. Only 5 percent of Texas' students can receive a "D" or an "F" because 75 percent of the schools students receive a grade of "B-" or better, and 20 percent fall in

UT is going to be graduating people who have no business practicing law.

— Reed Quilliam Jr.

the "C" range.

Reed Quilliam Jr., a George Herman Mahon professor at Tech's law school, said that if Tech modeled its grading policy after Texas', it would make everyone happy, but it would not be a realistic representation of the grades that are earned.

"I simply don't see how any student who goes to UT can ever flunk out," he said.

"UT is going to be graduating people who have no business practicing law."

Quilliam proposed a policy resembling Baylor University's new sys-

tem. If accepted, work that is now labeled "B+, C+ and D+" will become "A-, B- and C-," respectively.

Students in the eight-member committee proposed a system which would operate on a 4.3 to 0.0 scale in which 20 to 25 percent of Tech's law students would be in the "A"-range, 45 to 55 percent would be in the "B"-range and 15 to 20 percent would be in the "C"-range.

The class average in which a student could graduate would become a "B" instead of a "C," and academic deficiency would be increased by three-tenths of a point to 2.3.

Richard Ginsburg, a first-year law student, said that if grades were inflated under the proposed policy, then the academic deficiency also should be inflated.

Sharon Weathers, a third-year law student, said she does not think grade distribution is a good idea because

most law professors will be reluctant to give 10 "As," and she does not think they should be pressured into giving a student a "D."

"We're not here to feel good about ourselves," she said.

"We're here to think and become good attorneys."

Daniel Benson, a Tech law school professor, said that with UT's recent change in its grading system, in order for Tech to remain competitive, it has to change its system. He said Tech's law students already have a handicap by being a Tech graduate instead of a Texas graduate.

Julie Joe, a first-year law student, said there is a large disparity in the grading policies between various law schools.

"There's an apparent disparity within the school," she said. "We have to have parity because our students are competitive. Our proposal to have the grade distribution posted would help keep the professors within a certain range as far as distribution of grades."

Law students can give the committee their input on the grading policy and the proposals at 4 p.m. Wednesday in the law school room 109.

Financial sessions hosted by home ec college today

by SANDRA PULLEY
THE UNIVERSITY DAILY

The lecture circuit heats up as NBC "Today" show commentator Jonathan D. Pond and Harrigan's restaurant founder David Frazier present financial sessions in the Texas Tech home economics auditorium today.

"Both of these men are experts in their area," said Elizabeth G. Haley, dean of the College of Home Economics. "Everyone can benefit from their financial planning information."

Frazier, a 1972 Tech graduate, starts the day's lectures with "Hospitality Management" at 11 a.m. During the 50-minute lecture, Frazier will tell how he worked his way through college and started his own chain of restaurants.

"David Frazier is a great Texas Tech success story," Haley said. "He proves that you can make a marketable idea a success."

Frazier began working as a busboy in a family-owned restaurant at age 9. This job spurred his interest in

cooking, which eventually led to the 1976 opening of Harrigan's, a Lubbock restaurant.

He continued his successes by developing 12 Harrigan's in three states.

Frazier was also one of the founders of the Don Pablo's restaurant chain in the Dallas-Ft. Worth metroplex.

Pond, a financial consultant, addresses a different aspect of finances in his afternoon lecture "Your Money, Your Job, Your Future." The speech focuses on the financial needs of college students and recent graduates. It begins at 2 p.m.

Pond also hosts a lecture titled "Financing a Secure Retirement in Uncertain Times" at 7 p.m. in the University Center Allen Theatre. Pond's books can be purchased at the lecture, and he will sign autographs after the session.

General admission for Pond's lecture is \$10, and student tickets are \$5. Tickets can be purchased at the door.

TB linked to AIDS

continued from page 1

During the last two years, an outbreak of more than 200 cases of MDRTB occurred in Florida and New York. Of those patients, 80 percent have already died, and approximately 90 percent were AIDS patients, Kopanoff said.

"What's scary about that is that by the time they were diagnosed with TB and AIDS, the average time before they died was 14 weeks," he said.

Anthony Way, a Tech professor and chairman of preventive medicine and community health, said that although it is true the increase in the number of people who are HIV positive is one of the reasons for the increase in TB, most people who are HIV-infected will not become TB-infected.

He said the type of exposure that is needed to contract TB is one of prolonged intimate contact, such as

between AIDS patients and their nurses or friends in a bedroom setting.

Careworkers for AIDS patients are at an increased risk of contracting the disease. Way said there are several cases in which careworkers in Lubbock have become infected with TB through AIDS patients. Knox said he does not know of any such cases.

Carl Schieffelbein, an associate director for management at the CDC, said that although AIDS has played a part in the TB increase, he hopes there will never be mandatory reporting of AIDS patients' names.

"Most individuals are responsible," he said.

"Most AIDS patients (who have TB) will work with doctors and nurses to find who may have contracted the disease from them."

Cook said that because there is no cure for AIDS, reporting the names of AIDS patients is not allowed.

Anger over sex crimes brings call for castration

by MITCHELL LANDSBERG
THE ASSOCIATED PRESS

Men wince at the word. It evokes images of eunuchs and castrato choirs, Nazi Germany and Sigmund Freud. But castration has been hauled into public discourse by a judge who ordered it performed on a child molester.

District Judge Mike McSpadden of Houston saw it as a solution to one of society's most vexing problems, sexual assault. While some people agreed, others saw it as barbaric, freakish,

cruel and unnecessary.

It's an old debate, one that goes back to at least the 1850s in this country. By the middle of this century, it was mostly discredited, but there has been a revival of discussion in the past couple of years.

McSpadden, in his decision last week, did not impose the surgery on an unwilling subject. Steven Allen Butler said he preferred to have his testicles removed than face trial for the rape of a 13-year-old girl. The crime carried the possibility of a life sentence. Instead, Butler will be placed

on a form of probation for 10 years.

In agreeing to the plea bargain, McSpadden apparently was counting on the procedure to deflate Butler's sex drive and aggressiveness. That assumption underlies most of the attempts to make castration a part of the judicial process.

The testicles produce much, though not all, of a man's testosterone, the main hormone fueling the male sex

drive. Without them, a man can still have an erection and still have sex. But his desire for it may decline dramatically.

He does not, as folklore would have it, suddenly gain a soprano voice.

That is the result of castrating boys who have not yet reached puberty, a practice that produced the famous castrato singers of the 17th and 18th centuries.

Residence halls designate substance-free floors for next fall

by STEPHEN ARMOUR
THE UNIVERSITY DAILY

Students returning to Texas Tech's residence halls in the fall will be introduced to "substance free" floors.

"The idea for the substance free floors came about through the surveys that were distributed this year and last year," said Nyla Ptomey, associate director of housing for student services. "The students who filled out the surveys requested that (the Office of Housing and Dining) implement this type of environment in the residence halls."

Substance free floors will be designated as those floors where consuming alcohol and other drugs will be discouraged.

Students who want to live on one of the substance free floors must sign an agreement during the upcoming residence hall sign-up days, March 30-April 8, in which they and their guests agree to keep the room free of substances at all times.

Ptomey said substances include alcohol, illicit drugs, cigarettes and other tobacco products such as chewing tobacco and snuff.

"The substance free floors will just provide an area in the residence halls where students

who do not want to be in a smoke-filled environment or around students who get drunk off campus and then come back and get sick all over the place have that option," Ptomey said.

Ptomey said that if students break the agreement, that student will be relocated to another hall or floor that is not substance free.

"If the student breaks the university policy regarding drugs and alcohol in the residence halls, they will be referred to their academic dean or to the Dean of Students Office," she said.

Ptomey said students currently living on the floors that are being declared substance

free will have the option of moving to another floor or residence hall if they do not want to live in the substance-free environment.

"We have already received a lot of positive comments on the substance free floors," Ptomey said.

"If there is a great demand for them after next fall, we will look into implementing them in other residence halls for the 1993-94 academic year."

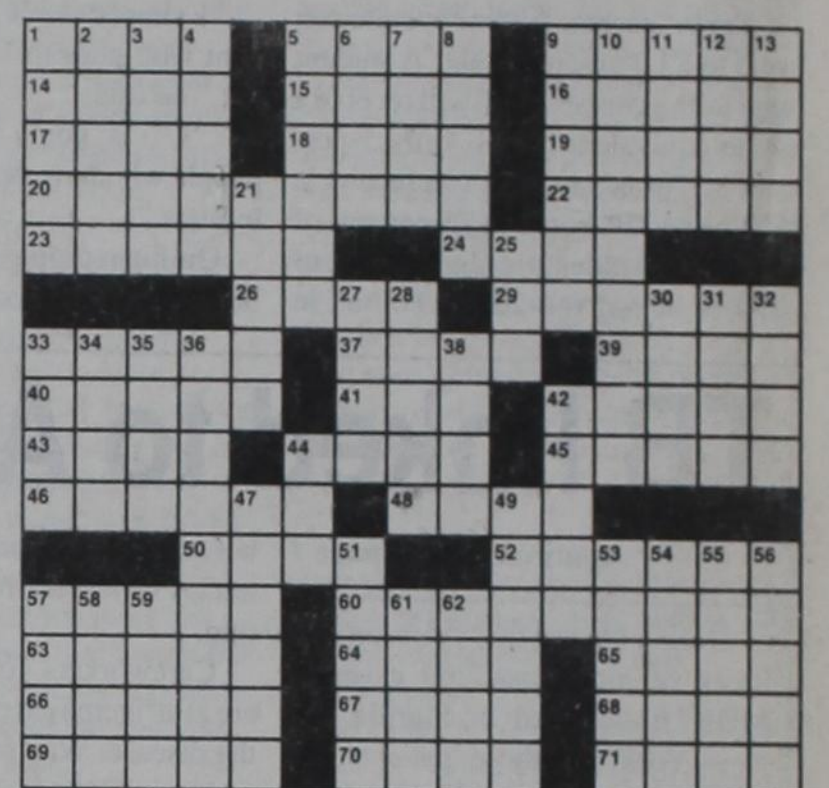

Substance free floors will be available for the fall in the following locations:

- Sneed Hall 1st floor West Wing, rooms 104-119;
- Horn Hall 1st floor South Wing, rooms 104-119;
- Hulon/Clement 5th floor;
- Chitwood/Weymouth 11th floor (first year students only).

In addition to the substance free floors, Ptomey said some students living in Coleman Hall will have to be relocated because it has been declared an upperclass hall for students with a sophomore or above standing.

Yesterday's Puzzle Solved:

Local business consultant explains Japan's workplace team concept

by SANDRA PULLEY
THE UNIVERSITY DAILY

Local business consultant Terry Waldren explained how the team concept used in Japanese production can be implemented in American corporations during his afternoon lecture Tuesday.

"We are no longer working in a solely American market," Waldren said. "Some old factors of production are coming into the forefront today."

Waldren explained W. Edward Deming's 14-step management method as the key to Japan's recent manufacturing success. The focus of this process is to create constant goals while instituting training and leadership programs.

"Deming started this process before World War II in America," Waldren said. "When the American economy shifted, he took the process to Japan."

Waldren said that in order to remain competitive over long periods of time, companies should seek an approach which meets the needs of employees, as well as one that keeps productivity and quality high.

Japanese businesses using this approach accomplish their goals by stressing group goals, rather than individual achievements.

"Many companies resort to cannibalism during recessions," he said.

"They eat off parts of themselves in order to remain competitive."

American companies can start the team-building process by developing dynamic teams which work together with open communication, Waldren said.

In this procedure, employees are likely to make suggestions and take greater pride in their product.

Although this process takes two to five years to develop, companies usually see a 20 to 60 percent increase in productivity and product quality after the beginning stages.

"Waldren addressed problems that people who have worked in management before can understand," said Pat Larre, a family studies major.

Waldren also said that corporations need to be flexible in order to change employee needs and new technology.

"We need businesses that respond rapidly to new development," he said. "A child that is 5-years-old now has seen more changes in his lifetime than his parents and grandparents combined."

Waldren said many American companies, such as Ford, have started using the team-building process in order to rely more heavily on employee problem solving and less on management policy.

He said these companies hope to boost long-term productivity through employee cooperation.

SWC women's tourney preview

by MIKE HEWLETT
THE UNIVERSITY DAILY

The 1992 Southwest Conference Women's Post-Season Tournament marks the ninth year that the conference member schools have gathered at the end of regular season play for SWC bragging rights.

The eight teams involved are seeded in a process according to where they finish in regular season action and are paired with the team that has the opposite position in the conference. For example No. 1 seed Texas Tech plays a first round contest against the No. 8 seed Texas Christian, at 6 p.m. tonight, in Moody Coliseum on the Southern Methodist campus.

Following is a brief summary of the SWC teams, in the order of season record, and how they fared against the Red Raider women:

Texas (11-3 SWC, 19-8 overall) - The second place No. 22 Lady Longhorns gave the conference champs a run for their money during the regular season splitting a pair of games with Tech. The Jan. 11 game found the Raiders outshooting the 1991 SWC Champion 'Horns 77-65 and junior forward Cheryl Swoopes scoring 32 points to lead the contest. The second game, Feb. 12, in Austin, showed how well Texas had learned to cope with injury and the three early conference losses as they defeated Tech, 70-63.

After losing standout senior forward Vicki Hall early in the season, the scrappy Texas squad battled back in the second half of the year emerging spotless in seven games, gaining momentum for the tournament.

Players to watch - three-point specialist senior guard Johnna Pointer, freshman guard Nekeshia Henderson and junior center Cinietra Henderson.

Houston (10-4 SWC, 21-6 overall) - The No. 19 Lady Cougars came into the '91-'92 season with the look of a

contender, winning big over Baylor and Rice but then took a surprise defeat from a resurgent Southern Methodist team.

Houston managed to get back on track but hit a snag on the South Plains Jan. 25, losing the first of two games to the Raiders, 79-64. Cougar senior guard LaShawn Johnson led Houston in both contests chipping in 21 and 18 points, respectively. The second time the two teams met, the Lady Cougs had the home court advantage but familiar confines weren't enough as Tech topped Houston 80-65. Swoopes led both outings for the Raiders with a combined effort of 60 points (33 and 27).

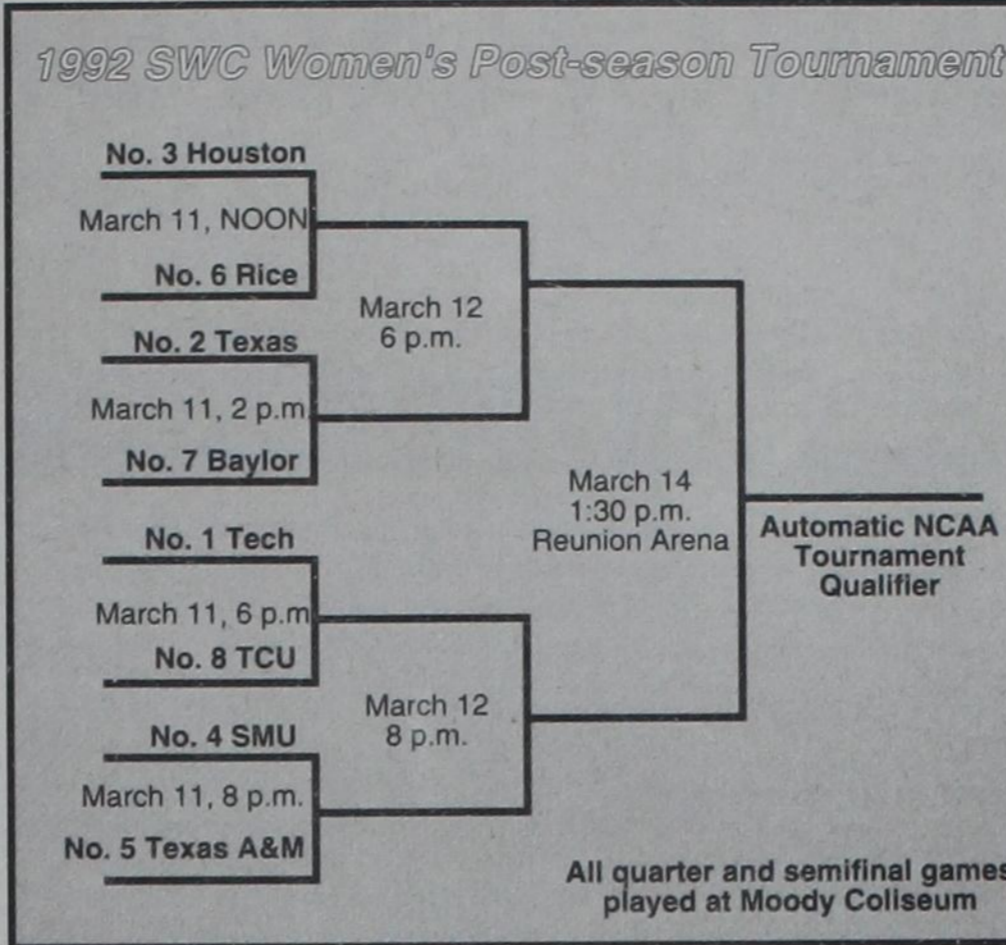

Tech was the only team to take two waps from the Lady Cougars this season.

Players to watch - outside threat senior guard LaShawn Johnson, inside strength 6-foot 3-inch senior post Darla Simpson, shot blocker junior post Margo Graham.

Southern Methodist (7-7 SWC, 16-11 overall) - The Lady Mustangs made '91-'92 a season of firsts for their program. This marked the first year the SMU women beat a nationally ranked team (then No. 14 ranked Houston on Jan. 26), had a record as high as .593 on the season and received a vote in the AP national poll. Quite a year for first year head coach Rhonda Rampola's corral of Mustangs.

Tech was able to handle the resurgent presence of SMU taking victories with scores of 98-76 on Jan. 8, and 91-73 on Feb. 8. High point for the Ponies in these games were senior post Vicki Walterscheid with 22 and in the Feb. 8 game junior forward Amy Severson chipped in 14.

Swoopes remained consistent in January leading the Raiders with 24 points. Tech went to a mixed attack versus SMU in the second half of the season and senior forward Tami Wilson provided the new offense gaining the high point spot for the second game

with 23.

Players to watch - inside threat 6-2 post Walterscheid, outside threats Severson and junior forward Shanell Thomas, defensive force junior forward Missy Parker.

Texas A&M (7-7 SWC, 15-12 overall) - The .500 mark that was set by the Lady Aggies this year doesn't reflect the tenacity they showed in each faltered effort.

The fact that A&M was able to take one away from second place Texas is evidence that this team has good potential and also hints at an improved level of play conferencewide. Six points was the margin between the Raiders and Lady Aggies Feb. 2 (75-69) and Swoopes' 33 helped to ice the win.

When A&M traveled to Lubbock on March 4 more was on the line than just the game.

Tech defeated A&M 84-62 and claimed its first ever conference title. Top scorers for the Aggies were junior forward Yolanda Brown and senior center Vanessa Edwards with 15 points each.

Players to watch - outside/inside potential threat senior forward Dena Russo, inside threat 6-2 center Edwards.

Rice (5-9 SWC, 13-14 overall) - Impressive individual efforts from Lady Owl players gave glimpses of optimism to an up and down season. Scoring 22 points in the Feb. 22 game versus the Raiders wasn't enough from senior guard Yolanda Stiner to help her team emerge victorious.

Rice tends to rely on strong play from its guards and forwards to win. A combined score of 191-129 separated Tech from Rice in the two games this year. A pair of Raider seniors found

playing against the Owls to be productive; senior post Jennifer Buck scored 19 in the first contest and Wilson scored 22 in the February game to lead Tech.

Players to watch - outside/inside threat guard Stiner, inside strength senior center Evenda Barnes.

Baylor (3-11 SWC, 11-16 overall) - The Lady Bears were given little to growl about this year gaining victories over TCU and Rice only.

Consequently, Tech was able to sweep the Baylor women in both matchups, with scores of 90-53 in Lubbock and 100-72 in Waco. Baylor junior forward Lanita Luckey led scoring for the Lady Bears in the two contests with 19 and 17 points each. The Baylor games proved to be good for Tech's Swoopes as she posted 43 combined points and led Tech in scoring.

Players to watch - outside/inside threat forwards Luckey and senior Deanna Fairfax.

Texas Christian (0-14 SWC, 4-23 overall) - Needless to say this season was a rough year for the Lady Horned Frogs.

Finishing winless in the conference and managing only four wins overall leaves the TCU program a prime rebuilding for the 92-93 season. In both regular season games Tech disposed of the Frogs winning the Feb. 5 contest 92-58 and taking the final game of the regular season from TCU 75-53.

Red Raider notes
Overall this season, the Raiders have outscored their SWC opponents 1,196 to 909, and averaged 85 points per game while their conference foes averaged just under 65.

Tech begins first round action of the SWC Post-Season Tournament at 6 p.m. today in Moody Coliseum in Dallas.

Sports brief

Golf team takes fourth

The Texas Tech men's golf team finished fourth at the Louisiana Classic behind defending champion Florida, Oklahoma and LSU.

Over three rounds the Red Raiders shot a 905 which was eight strokes off the winner. Tech's Colin Stoops was the highest finisher, shooting a 221 over three rounds to earn third place.

Chance Blythe and Brad Ott both finished in the top 20, with Blythe finishing 17th and Ott in 19th place.

Filling the last two spots for the Raiders was Jason Foster and Christopher Anand, each finishing 31st and 43rd, respectively.

More Rec Sports Briefs

Individuals without a team upon which to play intramural indoor soccer or captains looking for more players are encouraged to attend the Free Agents' Meeting tonight at 6 p.m. in SRC 205. Intramural personnel will attempt to match players with teams or form new teams at that meeting.

8-BALL POOL DOUBLES TOURNAMENT RESULTS

Last Thursday night, March 6 in the University Center Gamesroom, the spring 1992 8-ball pool doubles tournament was held. Eighteen teams competed in four round-robin pools to get into the championship round. The four round-robin pool winners were the teams of: Long Nguyen/Dong Nguyen, Dodge Macias/Ayman Elbanhaway, K.T. Claborn/Todd Wagner, and Michael Steward/Brian Rawlings.

The Championship Round was also a four team round-robin for which Michael Steward and Brian Rawlings came out the victors with an unblemished 3-0 overall record in the round. Long Nguyen and Dong Nguyen finished the round with a 2-1 overall record as the runners-up.

INJURY CLINIC RESUMES TONIGHT

Wednesday's Free Injury Clinic hosted by Dr. Robert Yost and the Orthopedic residents from the Health Science Center resumes tonight at 7 p.m. in Room 201 of the Student Recreation Center. The weekly clinic allows students with athletic type injuries to have a free examination and receive advice on treatment, care and possible referral. The clinic will continue each Wednesday evening.

For further information, call the Rec Sports office at 742-3351 or drop in at tonight's clinic.

UPCOMING TEAM TENNIS ENTRY DEADLINE

Intramural Sports is currently taking entries for TEAM TENNIS in the Rec Sports Office, SRC 202 this week through Thursday, March 12 during regular office hours. Late entries may be accepted, yet the availability of a preferred league may not remain. Available league information is now awaiting all interested teams at the Rec Sports Office. The format will be the ULTRA SLIMFAST TEAM TENNIS style. Each team shall play men's singles, women's doubles and a mixed doubles set each team match. The total number of games won by each team shall be tallied to determine the team match winner. Play begins after Spring Break possibly as early as Wednesday, March 25. A \$10 ball fee (per team) must accompany each entry. Each team must have a minimum of four (4) players on the roster with a possible of two (2) substitutes. All players must be eligible to participate in intramural sports.

SUMMER CAMP COUNSELORS NEEDED

Applications are being accepted for students interested in becoming counselors for the Recreational Sports Summer Sports Camp offered this summer. This camp is designed to improve the sports skills of children, but the emphasis is on FUN!

Instruction is geared so that every child will be a winner - not by defeating another child but by acquiring a new skill or by improving skills already known. This is a non-competitive camp with a recreational approach to sports. There are three, two-week sessions: June 1-12 and 15-26 for children 7-12 years of age and session III, July 6-17 for children 1-14. Sports offered during the first two-week sessions are tennis, softball/soccer, archery, basketball/volleyball and red cross swimming lessons. In the third session, volleyball/basketball and softball/soccer are replaced by racquetball and an outdoor camping section and swimming lessons are replaced by water activities. Each session runs Monday-Friday from 8 a.m.-Noon.

So, if you are interested in working as a camp counselor, enthusiastic, patient, creative, love working with children and possess teaching skills in one or more of the sports listed above, drop by the Recreational Sports office in Room 202 of the Student Recreation Center and fill out an application. Applications are due by 5 p.m. on Friday, March 27. The current stipend is \$5/hour. This is an excellent experience to work part-time with children and still be able to take afternoon classes. For more information, contact Denise Kopriva at 742-3351 or stop by the Rec Sports Office.

WATER SAFETY INSTRUCTOR'S COURSE OFFERED

This is the course for those of you who have always wanted to learn to teach others to swim. This course teaches the newest methods of water safety instruction. The cost of this course is \$35 for TTU students and Student Recreation Center Pass holders, \$45 for community.

Session I:	Feb. 4-27 (Tues & Thurs)
.....	from 6-9 p.m. at the Aquatic Center
Session II:	April 6-29 (Mon & Wed)
.....	from 6-9 p.m. at the Aquatic Center

To reserve a place in the class or for more information, please phone 742-3896.

LET'S GO CAMPING

If you're planning a camping trip, the Recreational Sport Outdoor Program can provide you with all the necessary equipment. The Outdoor Shop has tents, sleeping bags, stoves, lanterns, and more available for a nominal fee. Shop hours are: M&F Noon-6 p.m. and TWTH 1-5 p.m. Call 742-2949 for more information.

The Outdoor Program still has spots available for the following trips:
 Palo Duro Conservation: (April 10-12) Help preserve one of Texas' finest state parks. We will help rebuild one of the trails leading through Palo Duro Canyon. There

Don't look down

Kim Becton begins her rapel down the wall during an outdoor workshop at the Rec Center while instructors John Durham and Scott Adair look on.

PHOTO BY GREG HENRY

will also be time for fun and relaxation. The cost is \$20 and covers equipment and transportation.

Caving in the Guadalupe Mountains: (April 24-26) Join us for a caving expedition and see things you have never seen before. Trip cost: \$45 and includes transportation, equipment and park fees.

WOMEN'S SOCCER TRYOUTS

The Tech Women's Soccer Club is conducting tryouts tomorrow (Thursday) from 5-6:30 p.m. at the Women's Gym Field (18th & Boston). Interested players are encouraged to attend. The club is planning to compete in two tournaments this spring that will be in Waco and Houston. Additional games are also being investigated. For more information call Carrie at 793-6526.

ENTER NOW FOR INDOOR SOCCER

Intramural indoor soccer entries will be accepted through tomorrow, (Thursday, March 12) in SRC 202. Men's, women's and co-rec divisions will be offered. Blank rosters may be picked up in the Rec Sports Office (SRC 202). Managers need to complete the roster with team member names, addresses, and phone numbers. A \$25 refundable forfeit fee is also required at the time of entry. Remember that the earlier you enter, the better your chances of selecting your most preferable playing time. Play begins Tuesday, March 24.

Coming Soon

Rec Sports Briefs

BASKETBALL PLAYOFFS MARCH ON

Intramural basketball playoffs continue this evening in almost all divisions. In Greek Black action, the KA Red/Sig Ep Red winner takes on the Phi Delt A/Sigma Chi Blue winner for the division championship at 8:35 on SRC2 while the Red title will be decided at 7:30 on court 2 between the Kappa Sig/Delta Sig A winner and the Sigma Nu A/Chi Psi A winner.

Club quarter finals were last night with the semi's scheduled for tonight at 9:40 p.m. on SRC 1 and 2. In the quarters, Lench Mob took on CA, the Ex-Tramps challenged ODP, Guanajuato played BSU Red, and the Omegas challenged 5 Guys Named Bob.

Residence Hall semi-finals are also scheduled for tonight with the Loozers playing Brew Crew at 6:25 p.m. on SRC 2 while the 10th Weymouth takes on last night's Bushwackers/Pillsner's Imbibe winner on court 1 at 6:25 p.m.

Several flight semifinal games are on tap in the Open Division tonight with flight finals scheduled for tomorrow evening. Top games in the Open Division include, The Team taking on Slow Motion, the Foundation playing '06 Style, the Scrubs challenging Above the Rest, and Technique versus Flying Circus.

Women's action continues after Spring Break. Top seeds Hoosiers, 2 Legit, and Silver Bullets remain alive while the third seeded Fillies were upset Sunday by the Tech Gladiators.

INNERTUBE WATER BASKETBALL DEBUTS

The newest intramural sport, Innertube Water Basketball, will be unveiled after Spring Break with entries being accepted March 24-26 and play beginning on Sunday, April 5. Men's, Women's, and Co-Rec Divisions will be offered if interest warrants. Scrimmage games will be offered for those interested in practicing before the season begins. Individuals wishing to enter a team should bring their players' names, addresses, and phone numbers to the Rec Sports Office (SRC 202) during the entry period. A refundable \$25 forfeit fee is required upon entry.

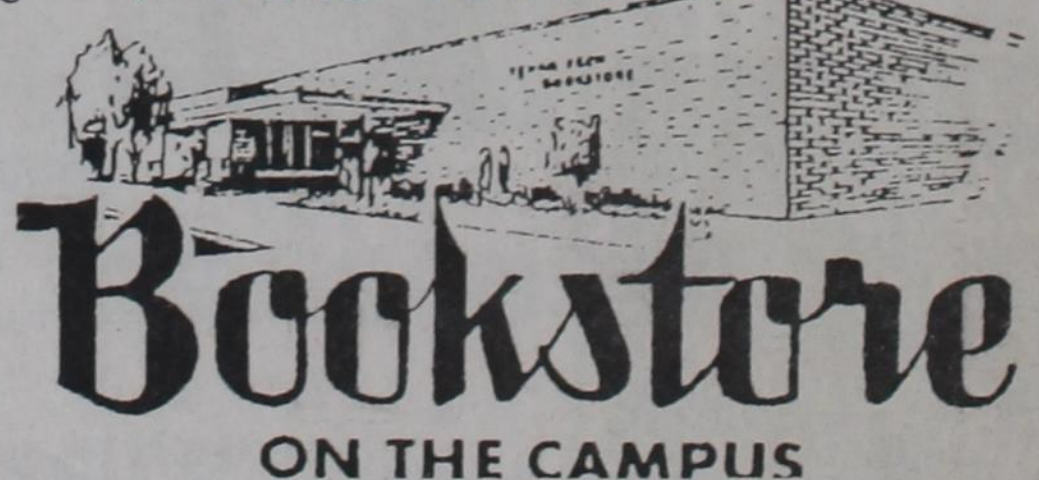

INDOOR SOCCER FREE AGENTS TO MEET

Where are you going for Spring Break?!

Steve Mendel is taking a **FREE** trip to Cancun - just because he sold his books during buyback last December!
