

Weapons experts begin work in Iraq

MANAMA, Bahrain (AP) -Nuclear weapons experts went to work Tuesday under tightened security in Baghdad on the first U.N. inspection mission since U.S.-led allies set up the "nofly" zone in southern Iraq.

A U.N. official, reached by satellite telephone in Baghdad, said there were "no problems" during the team's full day of work.

The official, who spoke on condition of anonymity, said "a lot" of Iraqi security personnel accompanied the team, but gave no specifics.

The 21-member team which includes experts from the United States France, Germany, Italy and Poland — set out from its Baghdad hotel early Tuesday without disclosing its destination. The team returned at sunset.

Graduate programs feeling pinch of rising tuition costs

BY SANDRA PULLEY THE UNIVERSITY DAILY

Increases in graduate tuition may foreshadow similar changes in undergraduate fees as state higher education funding diminishes, said Texas Tech Executive Vice President and Provost Donald Haragan.

"No one is anxious to see tuition increased," Haragan said. "The state has had a serious deficit since 1985, and we are seeing losses in higher education."

AUSTIN (AP) - Consumer groups, citing a new study they said shows special interests contributing millions to Texas Supreme Court candidates, called Tuesday for reform of judicial campaign finances.

"The overwhelming concern is ... money talks, and the amount of money that is being contributed is obscene," said Tom Smith of the group Public Citizen.

Austin consumer lawyer David Bragg, who financed the study with other trial lawyers, said more than 87 percent of the \$11 million spent on Supreme Court races by those elected in 1988 and 1990 came from special interests. Those included lawyers, doctors and business interests, he said.

Perot to remain on Texas ballot

AUSTIN (AP) - Despite abandoning his presidential campaign, billionaire Ross Perot's name will remain on the Texas ballot this fall, state election officials say.

The deadline for withdrawing passed on Monday.

The Nov. 3 ballot will include three other presidential candidates - Republican George Bush, Democrat Bill Clinton and Andre Marrou, the Libertarian nominee.

Mark Bell, spokesman for Secretary of State John Hannah, said Perot told Hannah in a letter two weeks ago that he intended to remain on the ballot with retired Vice Adm. James Stockdale as a running mate.

"It is my intention to be included on your ballot as a candidate for president of the United States in compliance with the wishes of the citizens," Perot wrote.

until 7 p.m. Monday and Tuesday to accommodate the rush of students scrambling to buy their books. The bookstore will resume its regular hours of operation (8 a.m. to 5 p.m.) today.

Tuition rose in every university graduate program except the School of Law this fall after the Texas Legislature withdrew past restrictions on

graduate tuition rates. "I hadn't budgeted for the \$150 increase," said graduate student Michael Mosher. "My main concern is that the Board of Regents sprang

the increase on me without any notification." The board passed a measure May 15 allowing Tech President Robert Lawless to approve the assessment and collection of tuition in graduate program courses following state law.

Under Texas law, each state university determines its graduate program fees individually, but tuition increases are legislatively capped at twice the rate of undergraduate tuition. Current undergraduate tuition costs \$24 a credit hour. Graduate tuition can reach, but not exceed, \$48.

"Some universities in the state simply doubled all of their graduate tuition across the board," Haragan said. "Tech let each college decide according to the competitive areas within their curriculum."

While undergraduate tuition will rise \$2 every academic year until it peaks at the \$32 limit set by the Legislature, graduate tuition may suffer a \$4 increase per year with a \$62 limit.

"Right now undergraduate tuition is legislatively controlled," Haragan said. "But even that could change in this next legislative session."

Haragan said either the state or the student will have to pay to maintain the quality of public education.

New graduate charges will add more than \$2 million to Tech's 1993 budget. The university see GRADUATE, page 3

How I learned geography

I sure am glad I attended grade school during the Cold War.

One of my favorite times of day was when we studied geography. I thought the globe on a stick was nifty. I would often spin it as hard as I could just to see the flashy pastel colors blend together.

CHARLES POLLET

But I wouldn't take a two dollar bill to go back now and relive those geography lessons. The times they are passin' us by, and Jacque Cousteau would get lost trying to find his way around the world these days.

Let's start with the collapse of the Soviet Union. When I was in the third grade, it was all Russia. Plain, simple, easy to find on a map and, most importantly, only six letters long.

"Who is the United States' most dreaded enemy?" the teacher says.

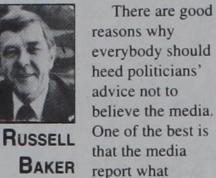

Every kid in class piped up: "Russia," or "the Russians," and even a few would chime in: "the Russkies." They thought they were the coolest kids in class because their parents had taught them the slang version. They really only wanted to see if anyone was dumb enough to ask, "Who are the Russkies?"

You ask a third grader the enemy question today, and he would say Saddam without a pause. The kid might not know how to pronounce "Hussein" or "Iraq," but he sure knows Saddam. Maybe because you can say it a certain way, and it sounds like a cuss word. Third graders are always conjuring up ways to slip four letter words into a conversation.

Ask the same eight-year-old about Russia, and he'll look at you like you came straight off the Love Boat - foreign. He might understand "Soviet Union," but don't bank on it.

Ever since Gorbachev, perestroika and glasnost - all of which happened when modern third graders were in Huggies - a simple "Russia" is no longer the correct answer.

Politicians full of fictitious facts

reasons why everybody should heed politicians' advice not to believe the media. One of the best is that the media report what politicians say.

For instance, the other night when Ronald Reagan exhumed a 1916 bromide by the Rev. William J.H. Boetcker and passed it off as the wisdom of Abraham Lincoln, television instantly pumped the fraud into millions of American skulls.

Since the Associated Press had circulated the text of Reagan's speech before delivery, forewarned TV editors could have blacked him out in the interests of accuracy when he hit the passage or lowered the volume of the ensuing applause long enough to wise up the audience.

A few words of editorial clarification would have done the trick. Something like: "The principle which Mr. Reagan says was so eloquently stated by Abraham Lincoln was stated, in fact, not by Abraham Lincoln, but by the Rev. J.H. Boetcker some half century after Lincoln's death."

I joke of course. It would take the courage of madness for television to black out or correct any part of a presidential campaign speech as "major" as Reagan's was said to be,

on the ground that TV has a responsibility to spare the public false information.

Politicians love to howl about media bias and dishonesty, but nothing infuriates them more than media refusal to acquiesce quietly in retailing the biased fictions of politicians.

usually available to the media before bound to insist the boss writes his delivery, there is rarely time enough to verify the accuracy of information that Reagan is probably the most in them.

is fussier than most TV news operations have time to be, printed excerpts of the Reagan speech with Boetcker's quotation presented as Lincoln's.

The Times did catch up with reality the next day and devoted two-thirds of a column inside the paper to setting matters right. Whether this de-confused large numbers of the millions who had been misled by the previous night's TV extravaganza seems doubtful.

In its research The Times dealt with Catherine Goldberg, a spokeswoman for Reagan who, the paper said, "maintained" that her boss researched and wrote the speech himself.

In that word — "maintained" you can see a media guy struggling with the problem of how to report what politicians say without selling the public down the river.

People in the trade know that a

THE PRESENT CAMPAIGN SEEMS TO HAVE LIFTED DECENT CONSTRAINTS AGAINST MASS MANUFACTURE OF FACTS THAT SUIT THE POLITICAL NEED OF THE MOMENT.

Anyhow, while such speeches are politician's spokeswoman is honor own stuff, just as everybody knows superb reader of other people's

Even The New York Times, which speeches since Franklin Roosevelt. I've made more of this Reagan-Lincoln-Boetcker nonsense than I intended, without even noting that Reagan, according to Ms. Goldberg, found the quotation in "The Toastmaster's Treasure Chest" by Herbert V. Prochnow. Let same now

> be noted. Deadpan. The subject I meant to aim at was how strikingly the present political campaign, as exemplified even in the dear old Gipper, illustrates one reason why Americans fear and detest lawyers.

Lawyers constantly batter people who are uninformed, uninterested and otherwise preoccupied with what Senator Joseph McCarthy used to call "facts, which if true."

Bush, Clinton, Gore, Quayle, Buchanan, Cuomo, Gramm — like lawyers trying to bludgeon a jury, all have dipped us in swamps of facts, buried us under avalanches of facts, blinded us with clouds of

facts, all of which may not be facts at all, but only "facts, which if true."

In courtrooms there are some vague limits on how detached fact may be from reality. Still the lawyer's delight in the bombardment and counter-bombardment by fact makes us fear them as tricky devils.

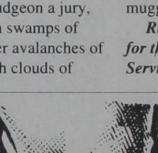

The present campaign seems to have lifted decent constraints against mass manufacture of facts that suit the political need of the moment. They are spewing out of politicians in such a gush that the poor fact-bespattered voter hasn't time to doubt more than a few hundred per day.

Surely they're just making them up, aren't they, as Boetcker just made up a Lincoln that got re-made-up by the Gipper.

As when fierce lawyers come at you with their conflicting "facts, which if true," you end up feeling like the victim of a factmugging.

Russell Baker is a columnist for the New York Times News Service. © 1992 NYTNS.

Nowadays, there are several "republics" that inhabit the former Russia. Not even Rand McNally knows how many. Eight? 10? 15? The 1991 world almanac isn't even clear on the matter. Fifteen are identified on the map, but only 10 are listed as autonomous republics. The other five must be pseudo-republics.

The most commonly known republics are Latvia, Lithuania and Estonia. The three are also known as the Baltic states. That's much too confusing for me. The only Baltic I learned growing up was the cheapest rent space on a Monopoly board.

Then there's the republic of Georgia. That throws a monkey wrench into any eight-year-old's memory, no matter how knowledgeable. He will not comprehend that a state in our country can have the same name as an entirely different country. I say we flip a coin - a good ole' American quarter, not a ruble - and the winner gets to keep the name.

The list only deteriorates from here. First is The Ukraine. Is "the" actually part of the name of the republic? How did Byelorussia (which means White Russia) get its name? Other republics include: Moldavia, Armenia, Azerbaijan, Tadzhikistan, Kirghizia, Turkmenistan, Kazakhstan, Uzbekistan and Russia. Believe it or not, there is still a republic of Russia.

Third graders must have nightmares every night, thinking about geography. Here are several countries they cannot pronounce and definitely cannot spell or find on a map. At the current rate of change, many of them won't be countries by the time they enter the fourth grade. Then the nightmare of learning the countries of the world begins all over again.

The real problem for third graders now is the turmoil in what once was Yugoslavia. According to the same almanac, there were six republics: Serbia, Slovenia, Croatia, Bosnia-Herzegovina, Macedonia and Montenegro. There are also two provinces, Vojvodina and Kosovo. Not even Alpha Bits has enough letters to spell any of these names.

The real question is: How do you pronounce "Herzegovina"?

The beauty of truly grasping the concept of geography and where countries are in the world can never be taught in any school. The only way to learn geography - the way I learned geography - is through RISK. The board game where you can conquer the world.

You had the big countries and the well-known countries and nothing else. The really great countries, like the United States, were divided into two separate countries on the playing board. There were no Bangladesh, Nepal, Oman or Costa Rica. Every country was grouped into a large enough area that could hold at least 10 armies. There was no need to be geographically correct because the winner ruled the world.

I'm just sorry that the Congo, Yakutsk and Kamchatka aren't real countries.

Put up or shut up time for action against Serbs

LESLIE GELB

The Bosnian "peace" conference under way in London has the earmarks of deadly farce. Western leaders make tough noises about standing up for principle — the principle of not legitimizing Serb conquests in Bosnia - and prepare to set up a long-term negotiating ocess.

Meanwhile they know that their efforts will ot work, or work in time, to stop Bosnian uslims from being slaughtered or driven into fugee camps.

Their game at the conference is to evade the al and alarming choice: Either do what they inciples and save lives that way; or accept erbian demands for partitioning Bosnia along hnic lines, strike the best bargain they can, nd save lives that way.

Bush officials duplicitously pretend otherise. President Bush and Acting Secretary of State Eagleburger insist they will not reward Serbian aggression and will settle for nothing less than restoration of the rights and territory of Bosnian Muslims. Yet they know that nothing they are doing, or plan to do, will bring this about.

months to show results. Yet they understand full well that there will be little left of the Muslims in of their borders with Serbia. This would have Bosnia several months hence.

Winter arrives early in the Balkans, as Europeans are well aware. Soon it will entomb the hundreds of thousands of ill-clad and unhoused Muslims.

This real policy choice of which I speak is deeply troubling to me.

It is doubly disturbing because I and others have argued for months for Western leaders to take steps that had a decent chance of avoiding the present trap. All in vain.

Western leaders answered with the worst sort an militarily and economically to back up their of cynicism and duplicity. As public disgust over Serbian horrors mounted, they tried to quiet the uproar by flying in food for the Sarajevan victims (though doing nothing for the countless others in remote parts of Bosnia). Even as they fed the dying, they secretly seemed to hope that the Muslims would give up quickly so the whole mess would go away.

U.N. monitors on the Greek and Romanian sides sharply reduced trade with Serbia and made U.N. sanctions far more effective. Months ago, they could have begun proceedings to charge Serbian and Croatian leaders with war crimes and launched non-stop negotiations to apply constant world pressure. Only in recent days and weeks have they acknowledged and just begun to act on these options.

There is still more they can do, short of land war, to force the Serbs to think again. They can threaten air attacks against military targets in Serbia, like airfields and bridges to Bosnia. They can threaten to arm the virtually defenseless Muslims - and Albanians in Kosovo, if necessary - to discourage Serbia from spreading its policy of "ethnic cleansing."

Western leaders have not been without means to influence events in the Balkans. They have chosen to ignore and deny those means, for reasons (fear of runaway separatism in Europe,

.

in the State Department, declared as much last week when he resigned from the foreign

service.

Western Europe's policy is no less cynical than Washington's. European leaders say they are beginning a new chapter in the Yugoslav peace process, one that will take several

Then the Western leaders tried to sell the phoniest of arguments. They maintained there were only two choices: massive ground force deployments and thus a Vietnam-like quagmire, or what they were already doing, i.e. feeding

In fact, there were and are lots of options short of dispatching ground troops. (Ironically, it was the U.S. that toyed briefly and idiotically with the idea of sending 100,000 troops to protect relief convoys, and verged on sliding into another quagmire.)

Months ago, Western leaders could have put

impending elections?) we are all free to speculate about. Nor will they explain why they will use air power in Iraq and not in Bosnia.

Now, in conscience, they must decide on a clear course.

If they have no intention of taking tough action immediately, they should stop posturing about principle and strike the best deal possible with Serbs to save Muslim lives. Or, far preferably, they should do all they reasonably can to honor principle and save lives. Leslie Gelb is a columnist for the New York Times News Service. © 1992 NYTNS.

Impact Tech kicks off program aimed at educating students

continued from page 1 "The establishment of the formal committee by the provost is another example of Tech's commitment to equitable, civilized and concerned treatment of all persons regardless of age, race, gender, creed, disability, national origin or sexual preference," Arkell said. "Sexual harassment and related behavior deprive persons of their right to equitable treatment."

In its first year of existence, the committee, comprised of students, faculty and staff, created response and procedure guidelines. Members published a brochure in June that defines sexual harassment, offers examples of sexual harassment, outlines the policy statement and tells where to go for counseling and support when harassment occurs.

"We have established a policy at Texas Tech so we could formalize a statement to inform students, faculty and staff that when sexual harassment occurs at Tech, the standards of the community are violated," Arkell said.

The sexual harassment committee meets monthly in the Dean of Students Conference Room in West Hall, room 250. The public is encouraged to attend and submit ideas on how to deal with sexual harassment.

During their first official meeting Monday, committee members discussed the importance of educating the Tech community about sexual harassment.

Gwendolyn Sorell, an associate professor and coordinator of women's studies, said, "The education is absolutely a must."

continued from page 1 will receive 20 percent of the funds generated by tuition increases, and individual colleges will acquire remaining revenues.

"It is more appropriate to say the university receives 100 percent of the new funds," said Vice President for Fiscal Affairs Don Cosby. "Tech retains funds to strategically provide additional support and programs."

Mosher said he doubts all of the funds produced by tuition increases will be applied to graduate studies.

"Each department is given full authority over their graduate funds," said Steve Jorgensen, College of Home Economics associate dean for graduate studies. "We divided our money up proportionally by the number of students enrolled in each department."

Graduate fees in the College of Home Economics rose 120 percent since fiscal year 1992, making it the largest Tech departmental increase.

Jorgensen said new revenues will be used for graduate scholarships, research assistance and recruitment.

Prairie View A&M, **Texas Southern** lead in violent crimes

HOUSTON (AP) - Prairie View A&M and Texas Southern universities easily led all other Texas colleges in the number of violent crimes on campus in 1991, an annual Justice Department survey shows.

The average number of violent crimes at Texas schools in 1991 was about five.

Prairie View, with a student population of 4,990, reported 29 violent crimes in 1991, up from 20 in 1990. Texas Southern, with 9,427 students, reported 19 crimes, down from 21 in 1990.

old school sportshirt

black & white check brushed cotton shirt with patch pockets \$39.50 with \$10 gift check

Those numbers sound very high, Rep. Bill Carter, R-Fort Worth, chairman of the House Public Safety Committee, told the Houston Chronicle.

"They need to be looked into to find the root cause. Prairie View's numbers are especially surprising, since the school is out in the country," Carter said.

Prairie View is in a rural area about 40 miles northwest of Houston. Officials at both schools downplayed the numbers, saying they reflected more diligent reporting and an increase in police personnel.

Officials ask judge to let redistricting plan stand for fall

LONGVIEW (AP) - Gregg County officials are asking a federal judge to reconsider a ruling that requires them to use a redistricting plan which creates a minority district in south Longview.

The plan could create a logistical nightmare because of its timing, officials say.

"Yes, we're going to follow the judge's mandate, but are we going to have the time to meet all the requirements before the November election?," County Clerk Mollie Barber asked Tuesday.

"We're in a quandary down here and we're quite upset about it."

County officials had admitted that their old redistricting plan was unconstitutional, but remained determined to use it anyway in November because it was used in the March 10 primaries.

Danny Craig, who lost his race for Precinct 4 constable, filed a lawsuit demanding that the election be held under the plan which created the minority district.

U.S. District Judge Robert Parker on Friday issued an order requiring the county to use the new plan.

Craig, who is black, said the decision will provide an opportunity for the minority precinct to elect a candidate it prefers.

There are no blacks among candidates seeking precinct offices in November. Dallas attorney Bill Garrett, who represented Craig, said the lawsuit was filed to allow black voters to freely express their choice.

Garrett said Parker ruled that the new plan had cured the constitutional and voting rights problems that infected the old plan.

tal in Corpus Christi, which released him Monday afternoon, said hospital spokeswoman Mary Daniel.

Adam Ogan, a county animal control officer, said it was not immediately known if the bees that attacked Snyder were Africanized, or so-called killer bees.

A sample of bees from Monday's attack was sent to the honeybee lab at Texas A&M University for identification, said Ogan, who added that there have been four confirmed killer bee attacks in San Patricio County this year.

Ogan said the bees apparently were stirred by the sound of Snyder's mowing."

Local poll serves as pulse for Bush

BY KENDRA CASEY THE UNIVERSITY DAILY

It was during a press conference in 1989, when President Bush announced that things were looking good for him, that Lubbock claimed fame to being the "Pulse of America."

Associates has conducted the "Pulse of America" poll to reflect and relate

to the White House the opinions of the Lubbock area and, ideally, to the entire country. The poll, which was started in June legitimate questions and get legiti- November regardless of the outcome

1989, reports the responses from 400 Lubbock and surrounding area residents, randomly selected by phone number, about current political issues.

"Lubbock and its surrounding area has a good demographic mix," said Lisa Nowlin with SRA.

"We think it (the poll) is America's pulse of America."

Nowlin said she thinks that because Lubbock hosts a near balanced group of ethnic minorities and various age groups, as well as a major university and an Air Force base, the results from the localized poll usually coincide with nationally conducted polls.

"It is a microcosm of the state and the United States," Nowlin said.

She said she attributes the poll's national notoriety to the August 1989 poll that addressed the issue of abortion.

"It has really heightened Lubbock's profile in the state and the U.S."

Nowlin said the poll in August showed Lubbock supporting legal abortion by about 60 percent.

Jamming to the sounds of local reggae bands and relaxing by the lake with a few friends may seem like a Labor Day dream, but it is not, it is reality.

Students may enjoy the sounds of Irie Jane, Root 1, One Nation and Panamania from 1 p.m. to 9 p.m. Sunday at Buffalo Springs Lake during the Sun Splash Reggae concert.

During the course of the day, there will be various bands performing and concessions will be available all day. There also will be a variety of T-shirts, jewelry and other items.

Tickets for the event cost \$6 in advance and \$8 at the gate. They may be purchased at Ralph's Records and Tapes, the Atlantic Club and at the gate of Buffalo Springs Lake.

Cover charge for the evening is \$4 for those under 21 and \$2 for adults.

Not stretching can lead to variety of athletic injuries

BY LYDIA GUAJARDO THE UNIVERSITY DAILY

Running, aerobics and weightlifting are just a few of the activities students are engaging in today. Time and time cise. again, these exercise activities are performed enthusiastically and with a lot of motivation. However, too many times, precautions are not taken to avoid injury, and even more often proper treatment is not taken.

Recently, University Medical Center has opened an injury clinic to treat injuries suffered by high school students during football workouts. Many of the injuries treated are due to a lack of stretching activity . Also, there are times when students try doing too much exercise without working up to the different strength levels.

"Students need to progress slowly up to the different levels," said Jean Michel Brisme, a UMC physical therapist. "The fact is, they need to start strength."

He said that, many times, injuries come back time and time again because people rush back into exercise before the joint or muscle is healed back to normal

"Once you have injured a joint, it always runs the risk of re-injury," Brisme said. "People just have to take it slow and do exercises at a slow pace for healing.'

Brisme said that when a ligament or muscle suffers an injury, the problem is that the muscle may never heal or regain elasticity. Therefore, the muscle is more susceptible to injury and can be injured again at a later point in time.

In order to avoid injury, several steps need to be taken. First, exercisers should stretch each of the muscle

proper precautions are not taken, people can suffer strained ligaments or twist an ankle, which will cause an exerciser to miss as little as two weeks to as much as several months of exer-

"Most of the time, people forget to do it (warm up) and just start exercising and cause an injury to happen," he said.

Brisme added that just because a person stretches, does not mean that it has always been done correctly. When stretching, a person needs to hold stretches for 15 to 20 seconds at a time and do the stretch repeatedly. Exercisers also need to remember that there should be no bouncing during the stretch.

Breathing also should factor into stretching. It should be controlled, slow and rhythmical. It is important to remember not to hold the breath while stretching.

Brisme said that before exercising, slowly and work up to their maximum a person needs to be aware of the potentiality and try not to impress friends.

THE FAR SIDE

'Pet Sematary Two' acceptable sequel for horror movie lovers

FEATURES

BY GENE VYBIRAL THE UNIVERSITY DAILY

If you're into creative death and imaginative rebirths, "Pet Sematary Two" might be a movie for you.

Edward Furlong stars as Jeff Matthews with Anthony Edwards as Chase, Jeff's father. Jeff wastes little time before being tempted by the old Indian burial grounds that bring life back to the dead.

At the very beginning, an obvious scene is set for the end when Chase's ex-wife is brought to a what creative in some parts and shocking death. Of course, Chase, realizing his son is distraught and upset by this unfortunate accident, thinks a move away would be helpful. Without a doubt the move is near the pet cemetery.

Little time is wasted before the Zowie's head may be disturbing to scene is set for Jeff's new-found some. If this doesn't do it for you, friend to find his stepfather with the massacre of a litter of kittens Zowie, his beloved dog on the will certainly turn any animal wrong end of a gun. The dead arise lover's head.

Paralympics set to begin Thursday

BARCELONA, Spain (AP) - One month after staging what many believe was the best Olympic Games of the modern era, Barcelona is getting ready to do it all over again.

The ninth Paralympic Games open Thursday, and by the time they conclude 11 days later, more than 4,200 disabled athletes and officials will have competed in 15 sports from archery and table tennis to wheelchair basketball and blind judo.

A record 86 nations have sent squads to Barcelona — 24 more than competed in Seoul four years ago - making these the largest Paralympic Games. The United States delegation alone includes 503 members, while Canada, Britain and the Commonwealth of Independent States have also sent large teams.

Yet Barcelona is only just discovering the tolerance required to stage such an event. The 2,000-year old capital of Catalonia includes few of the provisions vital to a handicapped person's day-to-day existence, such as "kneeling" buses, "audible" cross walks or wheelchair ramps.

Indeed, consciousness-raising is practically a separate event at these Games.

Cup.

Sports briefs

Brewer transfers to Eastern New Mexico

Texas Tech men's basketball coach James Dickey announced Tuesday that sophomore forward Mike Brewer will not return for the 1992-93 season.

Brewer has chosen to attend Eastern New Mexico University this fall, after playing in nine games last season as a redshirt freshman.

"I just feel like I need to devote more time to my academics and get caught up," Brewer said. "The two years I was at Tech were great for me. I feel like coach Dickey helped me a great deal in basketball as well as in life in general."

Brewer will not play basketball at Eastern New Mexico next season, but said he may try to play in the future.

"My plans are to sit out this year and go to school at Eastern," he said. "I might try to play next season if I feel like my academics are in good shape."

Raiders triumph over WTSU in scrimmage

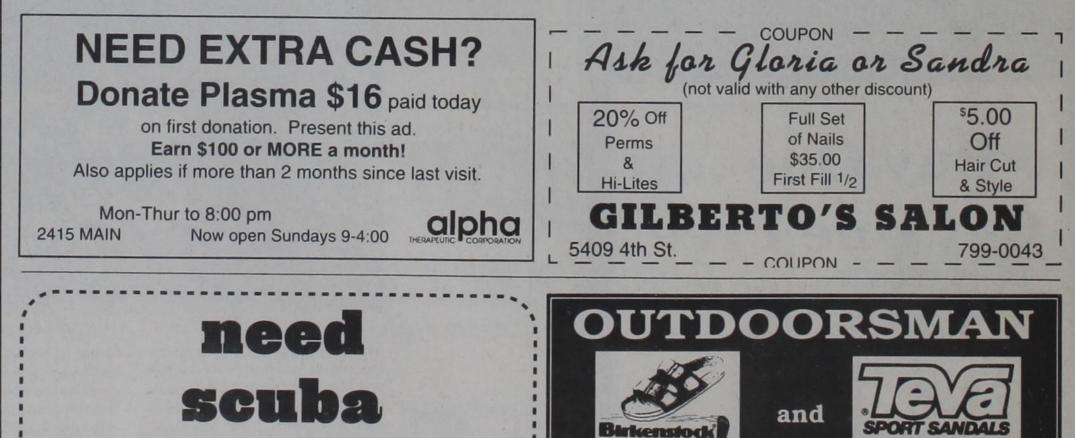

The Texas Tech women's volleyball team got its 1992 season off to a good start Tuesday night defeating West Texas State, 15-8, 15-10, 11-15 and 15-4.

The teams played a fifth game with the rally scoring system, as they Lady Buffs won 15-12.

West Texas State is the defending Division II champion, as 1,136 people showed up for the scrimmage with Tech. The Lady Buffs have won 30 of their last 39 matches at home in 1989.

The Red Raiders open their season against he University of North Texas at the Oklahoma Tournament on Friday. They will then play Northern Arizona and Oklahoma on Saturday.

The first home match for the squad is slated for Tuesday, as they will take New Mexico State in the Student Recreation Center.

THE UNIVERSITY DAILY 11

Jenkins keeps season, Cougars focused

season practice.

Kevin Batiste and Darren Woods have been declared scholastically ineligible and on Monday Zach Chatman was suspended from the team after he was charged with carrying a gun on campus.

Defensive tackle Sam Fa'aita also failed to make his summer school grades, leaving the Cougars scrambling to shore up a defense that was among the worst in the nation last season.

Houston's defenders ranked 90th among the 106 NCAA Division I-A school in scoring defense and they were 84th in total defense. The Cougars will open their season at Tulsa Saturday with a freshman and junior college transfer as the free safeties.

"What we have to do is move on and work with the guys that are here," Jenkins said. "There are some excellent athletes there. They just have to play."

The safety losses have left the starting job to Thomas McGaughey, a freshman from Houston Langham Creek and Stewart Carpenter, a junior college transfer as the backup.

Chatman and Woods were listed 1-2 at the free safety position prior to the dismissals.

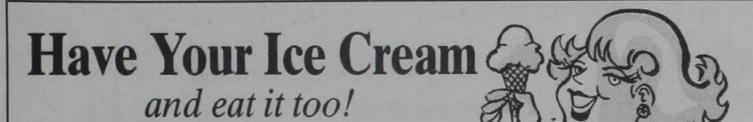

Houston athletic director Rudy Davalos said Chatman was arrested Saturday night when he was stopped

HOUSTON (AP) - Houston by campus police. There had been said. coach John Jenkins was trying to main- some altercations on the campus, three safeties since the start of pre- him. He was not in a fight," Davalos hearing.

Chatman, a senior from Beaumont, tain his trademark smile Tuesday de- Davalos said, but Chatman had not also has been suspended temporarily spite the attrition that has cost him been involved. They happened to stop from school pending the outcome of a
