

Library focuses on materials, not salaries

Church, gays battle in Caribbean

SANJUAN, Puerto Rico (AP) - The cancellation of a Caribbean gay pageant in St. Maarten is the latest setback for gays and lesbians in a region long hailed as a playground for the passionate and the uninhibited.

Militant church leaders say the issue is decency and morals. Gay leaders call it a battle over human rights. Politicians, for the most part, are keeping their opinions to themselves.

Saturday's scheduled show in St. Maarten, billed as the Caribbean Gay of Gays Male Pageant, was to have featured female impersonators from Aruba, Barbados, Curacao, Dominican Republic, Guadeloupe, Puerto Rico, St. Maarten, Trinidad and Venezuela.

tackle it.'

AUSTIN(AP)-InterimU.S. Sen. Bob Krueger said Monday that Republican opponent Kay Bailey Hutchison "shows a reckless disregard for the truth' in her statement that she was the only elected official to fight a state income tax.

Hutchison, the state's treasurer, makes the claim in a television commercial.

Krueger, a Democrat, said, "It is hard to find an elected official in Texas - Democrat or Republican - who supported an income tax."

Krueger, Hutchison and a host of others are running in the May 1 special election to fill the seat left vacant by Lloyd Bentsen, who became treasury secretary.

Hutchison's campaign defended the ad, saying she was the only statewide official in 1991 to take a leading role in opposing a state income tax.

While that falls short of the ad's claim, her spokesman David Beckwith said, "We thought it was clear, and it is."

Teachers oppose school amendment

AUSTIN (AP) - One of the state's largest teacher groups Monday announced its opposition to the proposed school finance constitutional amendment. Instead, its leaders said the time has come for an income tax to fund education.

The 58,000-member Association of Texas Professional Educators said Amendment 1 on the May 1 ballot was politically expedient for legislators but not what is best for school children.

"It is not the best we can do for now, and our children deserve much better," said ATPE President Cathy Fletcher.

Fletcher said more than 90 percent of the ATPE's 900-member House of Delegates voted over the weekend to oppose all three school-related amendments on the ballot.

"ATPE delegates also voted to support a progressive state income tax, but only if it is dedicated completely to public education with the understanding that property taxes and sales taxes must be reduced," she said.

Ominous clouds

High winds damage **Hub City**

by CASEY WESTENRIEDER THE UNIVERSITY DAILY

West Texas weather made its presence felt in Lubbock Monday as high winds caused damage to local apartment buildings, homes and schools.

Although no tornadoes were confirmed, residents and owners said they are convinced of turning wind patterns.

About 20 feet of roofing was torn off the Boardwalk Apartment complex, located at 5540 19th St.

"I wasn't here and I don't think anything hit the ground," Delbert McDougal, owner of McDougal see WINDS, page 3 luncheon where the proposals were formed. The presidents of all organizations registered with Student Organization Services were invited to attend. Students seated at each table were

assigned a topic of discussion and asked to develop viable solutions.

The topics included tuition and fee increases, registration, residence halls, organizational recruiting, the proposed grade renewal policy, a fast food outlet in the University Center, risk management and multicultural education.

"It (the luncheon to obtain ideas) worked out really well," Loveless said. "I think it was a tremendous success, and I think the students thought so too. Really, the only complaint I've heard is better food and more time."

Student Association President-elect Matt Weinheimer said, "I thought it was a very well constructed meeting and also a very well structured meeting."

Weinheimer said he would like to continue the luncheon at least twice a semester during his term as president, but said he wants to initiate ways to put the proposals to work.

Students experience physical disabilities during evaluation of handicap accessibility

by JULIE HARRIS THE UNIVERSITY DAILY

Texas Tech interior design students simulated physical disabilities, including being wheelchair-bound, on campus Monday to increase awareness and sensitivity to the needs of the Curry and Marie Gentry, assistant professor of physically disabled.

Equality in divorce

In most cases, divorce is a difficult and painful process that couples would rather not have to go through. The sad thing is that once the papers are signed, it doesn't always end there.

Possessions must be divided up in addition to custody wars, visitation rights and the dreaded alimony threat - a word most Texans have banned from their vocabulary.

Texas has no alimony laws, which in some instances is good for couples who shouldn't have to pay. Many times, alimony suits are unjust.

However, suppose there is the couple who has been married for 10 years with three kids, and one partner has spent those years caring for the home, children and other spouse. He or she has no job skills or education that would enable him or her to find employment.

Still, after the divorce that person must continue raising the children that the two share. Even though it is a situation of choice, it is still a situation that cannot be helped or changed, and with no source of income or ability to find income, the job is more difficult than ever imagined.

This is the economic plight of the displaced homemaker the Texas Senate addressed recently when it proposed legislation allowing a limited form of alimony, which is the first time anything like this has been addressed in Texas in more than a century.

Sen. Chris Harris, R-Arlington, has proposed a bill that alimony be awarded in Texas only in the case where a man and woman have been married for at least 10 years and where one spouse had no specific job skills or income. The support would be limited to \$1,500 a month or 25 percent of the spouse's average income, whichever is less, over a threeyear period.

It is time Texas joined other states in alimony laws. This law, of course,

Taxes, spending cuts and language

If you call a tail a leg, went the riddle attributed to Lincoln, how many legs has a dog? The answer: four, "because calling a tail a leg doesn't make it a leg."

Red-eyed with lack of sleep, WILLIAM racing to make a self-imposed SAFIRE deadline like bright students cramming before an exam, the

Clintonites slapped together a dog's breakfast of a budget proposal — and did not like what they saw.

The trouble was that it was all tax increases and — except for a huge extra whack at defense that they knew had no chance of getting past Sen. Sam Nunn - very few spending cuts. And the people had voted for spending cuts to reduce the deficit.

So Clinton decided to call a tail a leg. This required moving a bunch of items out of column A, "tax increases," and over to column B, "spending cuts."

It wasn't honest accounting, but when you are in an impossible bind and it's late at night, you do what you have to do.

That's when the Clinton proposal to tax an additional 35 percent of Social Security benefits to those over 65 who continue to work, or who were foolish enough to have saved money for their old age, went through a miraculous name change. The additional tax was no longer to be known by the harsh word "tax"; instead, it was to be called the admired term "spending cut." Lloyd Bentsen at Treasury attempted a convoluted rationale for this sleight of hand that

embarrassed his friends.

Same trick was tried with uncapping the sum on which the Medicare tax was levied, thereby raising the tax take on the highest bracket to 43 percent. It's a tax rise, plain and simple, squeezing \$12 billion out of those committing the egalitarian sin of earning money, but - behind the blue smoke and mirrors - there it appears, labeled "spending cut."

Why the chicanery, so transparent that not even the budget chief, Leon Panetta, could bring himself to defend it on "Meet the Press"? Because Clintonites had first promised two dollars in cuts for every new dollar in taxes, and then backed off to "rough balance" - but in the end they had produced no balance, rough or otherwise. On the contrary, only after four dollars are snatched out of taxpayers' pockets do we see one dollar cut - and that cut is not guaranteed.

In 60 days, the other shoe is scheduled to drop: the Hillary supplemental, with subsidies for 37 million uninsured people to be paid out of taxes on cigarettes, wine and beer and guns. And if a pistol-packing, butt-puffing Joe Sixpack cannot pay that \$90 billion freight all by himself, on comes a national sales tax.

Did we vote for this? Did Bill Clinton talk about it during his campaign, except to denounce predictions of tax-and-spend economics as "shameful"?

Of course not; not for him the Walter intention to raise taxes. Such honesty is for losers; winners zip their lip and "discover"

ever-growing deficits after the election, claiming then to be shocked, shocked at the need to raise taxes while increasing non-defense spending.

Will it fly? The polls show the customary enthusiasm for a new president who exudes energy even as he proposes taxing it. We like seeing those lights burning late, the resilient young president campaigning for his cause, whatever it is; fogies old and young find it fun to shake up the boring status quo. We tend to forgive early mistakes and little deceptions, hoping they won't grow into major blunders and a pattern of lies.

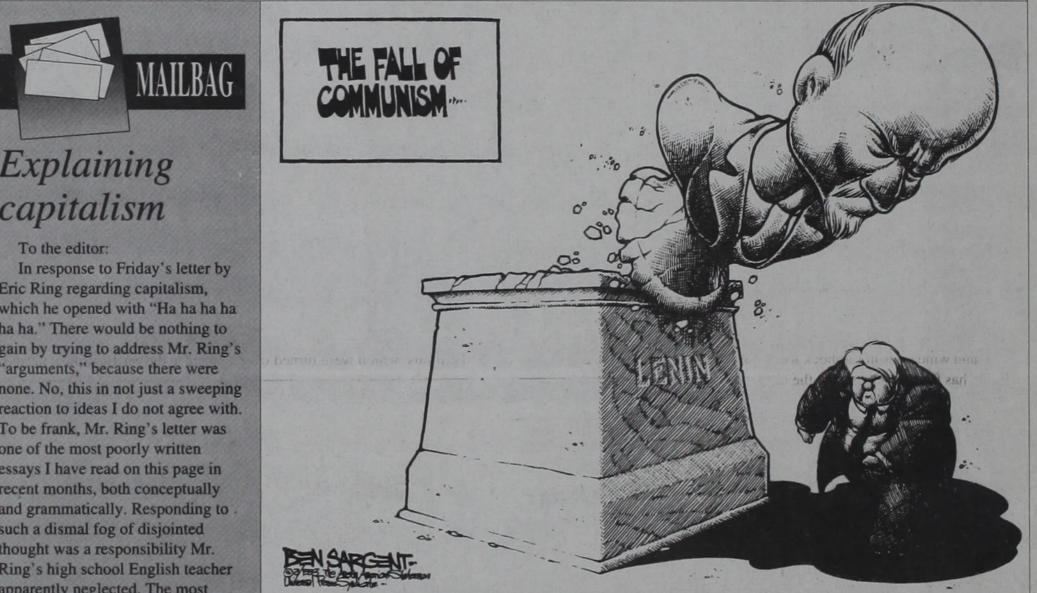

But Bill Clinton and his team, half starry-eyed and half bleary-eyed, are stumbling into an ideology that is as bad for them as it is for the nation. Does he realize where "Clintonism," as it is developing, is taking him? Price control, paternalism and protectionism lead to inflation, recession and general dismay.

Americans love the idea of Change and hate radical changes.

We want a sense of movement without getting involved in a Movement.

It would be hard for any politician to prevent 1993 from being a good year, just as it will be hard to prevent Bill Clinton from attributing this year's upturn to his own election and slapdash proposals.

Stop him, Democrats, before his desire to be different combines with his talent at telemarketing to lead your party into the black hole of statism. He calls his inchoate ideology "the new direc-Mondale route in 1984, blurting out publicly an tion," but calling a tail a leg doesn't make it a leg. William Safire is a columnist for the New York Times News Service. NYTNS © 1993.

would not apply to all couples because not all couples need it. But being a full-time homemaker and carrying on the responsibilities of caring for children, a continuation of that marriage, still deserves recognition and support.

When one spouse gives up a career or opts not to pursue one to take over household duties, the other spouse should have some sort of responsibility in aiding in the other's independence.

Three years is an adequate time to receive some sort of education or to seek employment.

The approval of a bill such as this is long overdue, and even though alimony can be an ugly thing in many divorce cases, it is necessary and the only fair thing to do.

Aid for mentally retarded

Amid the skyrocketing crime rate, increasing violent crimes without motive and heightening paranoia among average U.S. citizens, a criminal more horrible than any of the aforementioned resides - one who takes advantage of the helpless.

A legislator investigating the management of group homes for the mentally retarded released its findings Monday, uncovering "a pattern of abuse, neglect and financial mismanagement," said Rep. Ron Wyden, who's staff has been investigating the industry for one year.

One mentally retarded woman was forced to have sex with a man she called "Dad" while two other retarded women were instructed to fondle each other and watch.

The mother of a retarded man learned that her son's bathroom was to be a bucket he would have shared with two other men.

Wyden's investigation revealed that most group homes are "clean, safe and well-managed,"-but the exceptions to the standard are hideous.

Wyden said, "These are stories that deaden the soul as well as chill the blood." How true.

The director of a group established for the mentally retarded and developmentally disabled blamed the regulatory structure of groups homes - which varies from state to state - for the problem.

"(Regulators) ought to be able to shut those places down," Joni Fritz, executive director of the National Association of Private Residential Resources, told the Associated Press. She said state regulators are swamped with hundreds of cases, and each state's rules are not consistent with other state's, further expanding the problem.

A quick and effective solution is called for. The mentally retarded are unable to care for themselves and appear as easy targets for sick individuals.

To overcome the susceptibility to crime, a strict regulatory body must implement guidelines and ensure that they are carried out. Whether it be Fritz's organization, the federal Department of Health and Human Services or an agency created solely to carry out this duty, Wyden's study proves the need.

capitalism

To the editor:

In response to Friday's letter by Eric Ring regarding capitalism, which he opened with "Ha ha ha ha ha ha." There would be nothing to gain by trying to address Mr. Ring's "arguments," because there were none. No, this in not just a sweeping reaction to ideas I do not agree with. To be frank, Mr. Ring's letter was one of the most poorly written essays I have read on this page in recent months, both conceptually and grammatically. Responding to such a dismal fog of disjointed thought was a responsibility Mr. Ring's high school English teacher apparently neglected. The most disgusting aspect of that letter, and of others like it, is the tone of selfrighteous arrogance with which he delivered ... gobbledygook! Reading that mess made me aware, however, of a topic that needs addressing: Mr. Ring makes repeated references to capitalism, each time confessing his ignorance of the meaning of capitalism, I wish to address the definition. Before one can discuss capitalism, one must know what it means:

A system under which there exists:

1) The sovereignty of individual rights, a government whose only purpose is the protection of these rights, specifically the right to property.

2) A complete separation of state and economics, for the same reason as church and state are (or should be) separate. IMPORTANT: This implies that the government is not pro-business or anti-business; it stays out of the realm of trade altogether, only protecting man's freedom to conduct trade, his freedom to build a business, his freedom to earn and dispose of his wealth as he sees fit.

The essential characteristic of capitalism is not industry or profit; it accomplish this it's undertaken to is freedom. Profit is the natural result of freedom. The United States to countries where labor costs are to date has been the freest country ever to exist, the highest standard of lower costs is to improve the living the world has ever seen. This

rich man and demand that he give me a thousand dollars, I have violated his rights, I have acted immorally, and I should be punished. And yet when the government discovered a permanent source of does this, the masses cheer! It is ironic that in the long run, they will have cheered their own destruction. It leads one to think that people really do believe that life is evil ... or such as Mexico is so deploring that perhaps people just do not bother to think about their beliefs at all anymore.

Teller Coates

Implementing economic theory

To the editor:

Corporate America is continuing to move its manufacturing plants overseas. For those who may not know it, manufacturing is the number one source of wealth generation. In this era of declining manufacturing we find that living standards for new generations of Americans are below that of their parents.

The primary goal of Corporate America is to increase its profits. To relocate their manufacturing plants cheaper. However, the real way to manufacturing process, so states Dr.

U.S. to save on labor costs, who will buy their product? Unemployed Americans certainly won't.

If Corporate America thinks it's cheap labor it should look to history as a reminder of how workers respond to exploitation. Their treatment of workers in countries it will soon lead to a radical labor movement. Once labor is organized they will secure for themselves wages and benefits comparable to our own. The problem for the U.S. is that our manufacturing bases will now be over there and wealth generation will raise the standard of living for them. Meanwhile back in the U.S., we pursue careers in the service sector and information technology areas. In the service sector and information technology industries, only the professionals earn high salaries. Thus the rich get richer and the common worker is unable to afford housing, education and health care.

The common argument that we live in a global economy and that economic borders are becoming more artificial is not valid. Foreign direct investment has been a common practice since 1866 when Alfred Nobel stated his first foreign plant in Hamburg, Germany and the Singer company established a plant in Glasgow, Scotland.

programs to reacquire lost skills. To say nothing of the knowledge and experience that is obtainable only on the manufacturing floor. Secondly, they have failed to design quality into American products. As a consequence, the hallmark of U.S. manufacturing is a reputation for poor quality.

Enter the Clinton presidency and a Congress dominated by a tax and spend liberal Democratic majority and the future becomes even more bleak.

Classical and Keynesian, the two most commonly accepted economic theories, agree that increased government spending and increased taxes during a period of recovery will serve only to lower interest rates. Lower interest rates alone are considered ineffective, according to the two economic theories.

Sadly, increased taxes will provide new incentives to Corporate America to move manufacturing overseas.

President Clinton's proposals vaguely follow the Keynesian theory. In this sense "Clintonomics" truly is a new word for Webster's (unlike Reaganomics, which is simply another way of saying classical supply-side economics). Since Clintonomics are neither classical nor Keynesian, the President and the Democratic Congress have invented a new "economic ideology." When politicians tinker with the economy, all Americans, poor and wealthy, pay the consequences. There is only one hope left for America. Foreign investors are moving their manufacturing here. Oddly enough they are moving to the U.S. to avoid tariffs the Congress may impose to protect dwindling American manufacturing. What a paradox! Ysidro Gutierrez

is not an accident!

But why attack the profit motive? Why are people constantly using this idea as a point of argument against capitalism, as if profit were somehow evil? Is wealth evil? Is prosperity evil? Is happiness evil? Should we just break down and admit that life itself is evil? Of course not. Man lives, works and creates his own rewards. A government that attacks this process attacks to gain market share: which prolife itself, both in theory and in practice.

Consider this: If I point a gun at a management closes plants in the

W. Edward Deming, the father of Japanese manufacturing. Dr.

Deming also states that it is management who is to blame for the decline in efficiency of American manufacturing and for the high costs of manufacturing. Apparently management is still not listening to Dr. Deming.

They continue to seek short-term gains at the expense of opportunities vides long-term benefits and has been the strategy of the Japanese. If

This is entirely different from the practice of closing a manufacturing plant in your own country and replacing it with a new one overseas. This is an invention of Corporate America.

Corporate America has elected to ignore two other consequences of moving manufacturing overseas. When manufacturing moves overseas there is a commensurate loss of the "know how" of manufacturing. The workers forget how to operate complex manufacturing systems and expensive retraining

Research, Creative Activities Day to highlight, honor student work

by SANDRA RIEGLE THE UNIVERSITY DAILY

Texas Tech's Student Research and Creative Activities Day offers the chance to view Tech undergraduate and graduate student research from 10 a.m. to 4 p.m. today in the University Center Ballroom.

The Tech chapter of Sigma Xi, a national research honor society, is sponsoring the event in collaboration with Tech and its health sciences center.

"The spirit behind it is networking, to facilitate the exchange of research information at the university and develop relationships that can help," said John Orem, professor of physiology at the Texas Tech University Health Sciences Center.

The event will feature 140 displays, such as posters, from research on the fine arts, humanities and social sciences; mathematics and physical sciences; engineering/technology and biological sciences.

"The entries are intentionally broad so we do not have to exclude anyone in any one area," Orem said. "We have very broad participation."

The event will provide undergraduates the opportunity to view what graduate students are researching and presenting in the classes they will teach, he said.

"It is a kind of celebration of the different research done at this institution." Orem said.

The event also will offer students a chance to examine what other departments are researching.

Orem said research and instruction often mistakenly are viewed as being at opposing ends of the educational field.

"Research is a part of education at this institution," he said. "A good institution does both teaching and researching. Research is the major mission of a first class institution. It is one of the things we must do."

SMU grads turning long-time music dream into reality

CONTRIBUTING WRITER

Forget MTV's program Unplugged. Recent SMU graduates Jack house down at mainstream Lubbock O'Neill and Cary Pierce, who make venues, such as the Depot 19th Street up the band Jackopierce, have known from day one what pleases crowds case its music at 8 p.m. on Wednesmost, and that is the sound of an acoustic guitar. Combine two of these instruments with the band's catchy harmonies and often insightful lyrics, and fans in places between already loyal you have a recipe for success.

rock, Jackopierce has found pockets latest compact disk, "Woman As Salof fans across America. Don't be too vation" has already reached a high quick to classify its music simply beduo is blend.

"To a lot of these acoustic acts some other band may say we're pretty usual channels?

by ERIC ANDERSON folk," Pierce said. "Folk to us is sitting down quiet gigs."

Jackopierce is used to bringing the friends at Christmas. We can have Warehouse, where the band will showday. The stop in Lubbock is part of a from the Lone Star State, although nationwide "connect the dots" tour, with Jackopierce trying to find new cities across America to add to its With its effective blend of folk and 3,000-name mailing list. The band's selling point of 13,000 without the aid

bel, Rhythmic Records. How does a band garner such a attention to Jackopierce we're like a rocking acoustic duo where following without going through the

"We have to dedicate 95 percent of on stools, a lot of stories, a lot of sit- it to Dallas," Pierce said. "I've had people buy 10 discs just to give to their friends and friends and friends," he said. "But the beauty of it, as I've just realized, is the record's real good."

Neither of the two is originally they both said they consider themselves Texans now. Pierce hails from Westport, Connecticut and O'Neill is an 'army brat,' and said he lived in 25 different houses before settling down into the college life. Pierce said it wasn't difficult to juggle both school and a band and added that the band cause of the band's instruments, of a major label or national distributor. always came first. Since the band's though, because the key word for this Instead, Jackopierce has a self-run la- formal education is behind them, the two said they are giving their full

"It's so far building perfectly at a perfect rate," Pierce said.

One man band sings of 'sick reality of human existence'

songs on Starlings' recent release

The songs encompass Sheehan's fight with a heroin addiction. Don't worry though, the album is far from preachy. Instead, the songs dwell on the sick reality of human existence. This is one of those compact discs that claws its way into people's attention within the first few measures and won't let go. The former teen idol combines HE FAR SIDE haunting images of murder and drugs with sexy melodies. Songs such as "Unhealthy" scream in pain about the misunderstood twenty-something generation. Sheehan's frustration and anger spill out of the speakers in this emotional song. Apparently born out of his drug habit, many of Sheehan's lyrics paint a bloody picture of an addict's life. Some explore how some people turn to drugs to escape from the realities of their miserable lives, only to have them sucked out by the very needle they hoped would save them. As nasty as the lyrics are, the release is excellent. Starlings' alternative sound is so different from what is currently popular that it stands out.

Senior realizes more to graduation than diploma

one thing that sig-BETH nified the end of RASH red tape and fees

library fees, ID card maintenance

fees, computer use fees, Thompson

Hall fees, Rec Center fees, lab fees,

they have some more. And you can't

them you can, but what's the use?

thought it was safe lady at the Bursar's Office if I needed mother is a little opinionated, and I to hang up your to pay two diploma fees because I had hate Arkansas. So, the running total backpack and two majors. She said yes, but every- now is around \$340. Then the bookhead into the real one else told me no. I guess the two store gets its proverbial hand in the world. There was fees are for those brains with two till. They want \$1.25 each for gradudegrees, not two majors. Oh. So the ation announcements. And, let me running total so far is \$24.

you had no idea to The Big Day. My parents get letters that a major university could get in the mail. I get letters in the mail. some announcements that are a little

Graduation: the king of all fee "Buy this: a Seiko watch with the seal more sophisticated. in it in gold." It's really pretty, and I As if it were not enough with would like to have it, but \$200? No. so that cost me \$20.20 for 15 an-"Join that: the Ex-Students Associa- nouncements. Plus postage: \$4.35. tion at a special first-year rate of \$10." That is worth it just to get the neat little mately \$364.55. Plus tax. window sticker. And then there is the get out without them. Well, some of brick. All you Arts and Sciences ma- announcements that I figured would jors know what I mean. The college cost me is the most important thing: Might as well go for the gusto and sells "memorial bricks" to graduates cap and gown. Fifteen bucks at the and they put them all at the north end bookstore. The round figure for

First, there's the \$12 diploma fee they want more than \$100 for one I guess, to get to say "I'm outta (not to mention the pain it is having brick. My mother thought that was the here." I'm outta here. As of Tuesto trudge all over campus in order to absolute end-all.

get the paperwork and pay the thing) "Arkansas put our names on the which I mistakenly paid twice. Call senior walk for free," she said. "All of

Canseco homers not enough in 11-5 loss

ST. PETERSBURG, Fla. (AP) - Jose Canseco hit his fourth home run of the spring for Texas on Monday, but Sherman Obando's first homer powered the Baltimore Orioles past the Rangers 11-5 Monday.

Canseco homered for the second straight day.

His two-run drive off Ben McDonald gave him the team lead in home runs and RBIs (13).

With two on in the sixth, Obando hit the first pitch from reliever Bob Patterson over the left-field wall to snap a 5-5 tie.

Obando, who has never played in the majors, is in a battle for the right field job with Chito Martinez, Mark Leonard and Luis Mercedes, who also homered.

Texas starter Brian Bohanon, who had thrown 10 scoreless innings this spring, stretched his string to 12 before allowing a run in the third and four in 59 Le the fourth, including a two-run homer to Mercedes, before leaving.

Bohanon gave up six hits, two more than he had his previous five appearances combined, and saw his ERA jump to 3.21. He is projected to be a long reliever this season.

McDonald, meanwhile, allowed five hits and four earned runs in six innings.

Moment's Notice is a service of the Student Association for student and university organizations. Publication of announcements is subject to the judgment of the Student Association staff and availability of space. Anyone who wants to place an announcement should come to the SA office on the second floor of the University Center and fill out a separate form for each Tuesday and Thursday the notice is to appear. ALL QUESTIONS SHOULD BE DIRECTED TO THE STUDENT ASSOCIATION OFFICE AT 742-3631. The deadlines are as follows: Wednesday at noon to be printed on Tuesday and Friday at noon to be printed on Thursday.

Sports brief

McHaney receives national award for service

A member of the Texas Tech Athletic Department will be recognized on Sunday in Atlanta for outstanding service in women's athletics.

Associate Athletic Director Jeannine McHaney will be honored as the Women's Basketball Coaches Association 1993 Administrator of the Year.

McHaney was announced as the recipient of the award Monday by WBCA Awards intern Vikki Lenhart.

McHaney will receive the honor during the Rawlings Awards Breakfast at 8:30 a.m. on Sunday at the Marriott Marquis in Atlanta.

"It's a great honor," McHaney said. "I'm sure there are a lot of capable

Indians overpower Astros 9-6 in exhibition play

KISSIMMEE, Fla. (AP) - Paul Sorrento drove in four runs on three hits Monday, including the game-winner in the sixth inning of Cleveland's 9-6 victory over Houston.

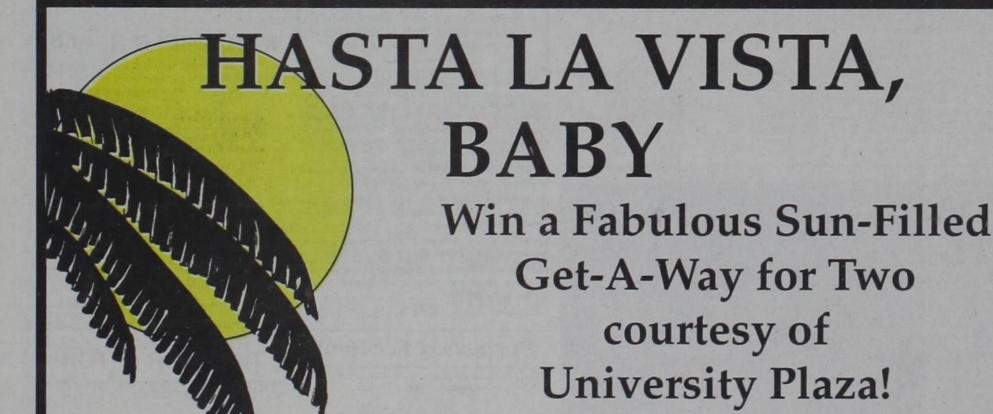

Mike Bielecki (2-1) pitched the first five innings for Cleveland, allowing six runs on nine hits. Tom Kramer pitched four scoreless innings for his first save.

Cleveland broke a 6-6 tie in the sixth inning against Houston reliever Xavier Hernandez (1-1).

Felix Fermin singled with one out, moved to second base on Albert Belle's walk and scored on Sorrento's single. The Indians added two runs in the ninth against Houston relief ace Doug Jones. Houston opened the scoring with a pair of runs in the first on one-out singles by Steve Finley, Jeff Bagwell and Eric Anthony and a sacrifice fly by Luis Gonzalez. The Astros went up 3-0 in the third on singles by Bagwell, Anthony and Ken Caminead in the fourth, scoring twice off Astros starter Mark Portugal. Mark Whiten's two-out double to rightcenter field drove in Sorrento and Alomar, who had singled.
