## Suit filed against general counsel

*Former Tech student accuses Pat Campbell of blocking settlement*

By Linda Carriger  
The University Daily

A former Texas Tech student represented in the John Doe vs. Joshua Mora case has accused Pat Campbell, Tech's general counsel, of blocking case settlement, according to a lawsuit filed Wednesday.

In March, Doe, a 21-year-old man who studied political science at Tech, sued

former Tech Associate Dean of Students Joshua Mora. Doe, who is using a pseudonym in the case, claimed Mora had "cajoled and forced (him) into homosexual relations."

Attorneys for Doe and Mora agreed to a \$39,500 settlement Dec. 28.

The settlement must be approved by the Texas governor and the state comptroller before money can be exchanged in the case.

Charlie Dunn, Doe's attorney, said Campbell asked former Gov. Ann Richards to delay settlement.

Dunn also alleged that Campbell has asked Gov. George W. Bush to do the same,

which is why Doe has filed a lawsuit against Campbell.

"The purpose of Mr. Campbell's contacts with the governor and his counsel were to attempt to cause the governor to disapprove the settlement agreement," the suit states. "Because of Pat Campbell's contacts, the settlement agreement has not been approved."

Campbell was unavailable for comment Wednesday.

Though Campbell is a vice president at Tech, he is being sued as an individual, not as a Tech official, Dunn said.

In the suit against Campbell, Dunn is

asking for \$39,500, the amount agreed upon in the settlement, and for interest on the amount since Jan. 29.

Dunn also is asking for any exemplary damages that the court might award his client.

Exemplary damages, which is an amount determined by jurors, are usually used to deter a person from committing the same offense twice, Dunn said.

If Campbell continues to interfere with the case, Dunn said he will take action against Tech.

Dunn said he will include Tech and Assistant Vice President of Student Affairs

Judith Henry in the lawsuit against Mora if Campbell continues to block the settlement.

In a letter to Dunn, Campbell said he would not back down until he was granted a meeting with the Attorney General's office.

"I will continue my request to discuss the proposed settlement of this matter with the Attorney General's office and continue to request that any proposed settlement be 'held' by the governor's office until the meeting which I have requested with the Attorney General's office has taken place, and Texas Tech University's position is considered," Campbell states in the letter.

## Interest rates increase

WASHINGTON (AP) — The Federal Reserve boosted interest rates Wednesday for the seventh time in a year, triggering higher borrowing costs for millions of Americans and charges of monetary overkill from critics.

The Fed's half-point increase in two key rates was followed immediately by a similar boost by major banks in their prime lending rate, pushing it from 8.5 percent to 9 percent, the highest level for this benchmark rate since early 1991.

Many home equity and credit card loans are tied to the prime, as are certain business loans, especially for small and medium-sized firms.

In a brief announcement at the end of two days of closed-door discussions, the Fed said it was increasing its discount rate, the interest the bank charges on direct loans to commercial banks, from 4.75 percent to 5.25 percent.

The central bank said it was increasing its target for the more important federal funds rate, the interest that banks charge each other, by a half-point, to 6 percent.

When the Fed began this cycle of interest rate increases on Feb. 4, 1994, the funds rate stood at 3 percent.

The latest increase means it has now been doubled in just 12 months even though the underlying rate of inflation in the United States has actually declined during the same period.

"The Fed is reacting not to inflation, but to the fears of inflation," protested Robert Brusca, an economist at Nikko Securities in New York.

The year of rate increases is enough "that we could see a recession in 1996," he said.

The Dow Jones industrial average closed up 3.0.

The bond market slumped on fears that the Fed's statement could mean the central bank will stop raising interest rates before it has decisively controlled inflation.

## Car strikes grad student

By Lisa Ray  
The University Daily

James Culhane, a Texas Tech atmospheric sciences graduate student, was struck by a car police say was driven by a drunken driver while walking his dogs at 12:15 a.m. Wednesday.

The car-pedestrian accident was the third in eight days involving a Tech student or faculty member.

Culhane, 33, sustained a broken left arm, shoulder and leg, University Medical Center officials said.

He was listed in serious but stable condition at UMC Wednesday afternoon.

Culhane was walking south on the 2400 block of 19th Street when he was struck by an eastbound 1985 white two-door Buick Regal.

The vehicle was driven by 45-year-old Robert McCollum, Lubbock Police Department officials said.

McCollum did not sustain any injuries, police said.

Culhane was not crossing at a crosswalk, and witnesses said he was walking on the median, police said.

At impact, Culhane went over the center of the hood of the car and through the windshield, police said.

After hitting Culhane, McCollum's car traveled 480 feet east on 19th Street with most of Culhane's body inside the car, police said.

McCollum turned into a private parking lot at 2415 19th Street and parked the car, said LPD Cpl. Xavier Vela.

When police arrived at the scene, Culhane's legs were through the shattered windshield, his body and head were in the passenger side of the vehicle and the left side of his face was cut, police said.

When officers began to question McCollum, they noticed a strong alcoholic odor on his breath, police said.

## Spring enrollment decreases; TTUHSC sets record

Total enrollment reaches 22,258

By Darrin Cook  
The University Daily

Texas Tech student enrollment decreased in the number of students attending spring classes, but the TTU Health Sciences Center set a record in spring enrollment, according to figures released Wednesday.

Tech student enrollment totaled 22,258, slightly lower than spring of 1994. The TTUHSC reported 1,187 students, up from last year's spring enrollment of 1,140.

"The leveling off of the enrollment is about what we expected,"

Enrollment Totals by Colleges			
Agriculture	1,305	Engineering	2,309
Allied Health	28	Graduate	638
Architecture	512	HSC	1,977
Arts and Sciences	9,574	Law	568
Business	3,459	Nursing	223
Education	1,551	Overall	22,148

said Donald Haragan, Tech executive vice president and provost.

Vonda Bredbury, director of TTUHSC student services, said enrollment figures are related to the TTUHSC's growth.

"We are making a serious com-

mitment of providing health care for the West Texas area, and these figures reflect that," Bredbury said.

The trend in the numbers over the past few years has been increasing and are expected to make an even bigger jump as soon as the Tech

pharmacy school opens in Amarillo during the fall of 1996, she said.

Enrollment numbers in the College of Business totaled 2,680 undergraduate students for the spring of 1994 to 3,067 undergraduate students enrolled this spring.

Carlton Whitehead, Tech professor of business administration and management, said one of the reasons for the college's growth is that the system is very user-friendly.

"It is great to know that are services at this school are in such demand," Whitehead said.

The reputation of the college also is another factor in enrollment growth, he said.

"Our business school receives a

lot of recognition throughout this region as well and throughout the country," Whitehead said.

Whitehead said ex-students recruiting new students into the college also is significant for an enrollment increase. The College of Arts and Sciences enrollment figures dropped from 8,765 undergraduate students in spring 1994 to 8,441 undergraduate students this spring.

The decrease is probably because of an increase in students in the College of Business Administration, Haragan said.

"The business school relaxed their requirements slightly, which allowed the numbers there to increase," he said.

## Hub City watches 'Prairie Dog Pete' today for weather forecast

By Tara McQueen  
The University Daily

Today may be the only day when good weather serves as a bad omen.

According to tradition, on Feb. 2, a groundhog or woodchuck comes out of hibernation. If he sees his shadow, the animal returns to the burrow, and six more weeks of winter weather will follow. If he does not see his shadow, spring has arrived.

Today Lubbock looks to Prairie Dog

Pete, instead of Punxsutawney Phil, to see his shadow.

The prairie dog's famous cousin Punxsutawney Phil is the legendary groundhog said to be nearly a century old and an infallible prognosticator of winter's end.

"In 92 years of Punxsutawney Phil's emergence, he has never, never, never been wrong," according to Charles Erhard Jr., president of the Punxsutawney Groundhog Club, in the book "Folklore of American Holidays."

Punxsutawney, Pa., has a heavy stake in Phil's reputation. The annual Groundhog Day prediction is made amid great pomp and circumstance ending with the trek up Gobbler's Knob to Phil's heated bunker.

Erhard, leading the pilgrimage clad in tails and striped pants, will rap with a special acacia wood cane at the stone facade of the burrow.

He will speak immediately with Phil in "groundhog language" and translate for the assembled multitude.

Locally, visitors will look for shadows at Prairie Dog Town, located in MacKenzie State Park, Rusty Black said.

Black, Lubbock Parks manager, oversees all parks and maintenance, including Prairie Dog Town.

Black said Lubbock does not have groundhogs, but it does have a prairie dog named Pete.

Black said Lubbock's Prairie Dog Town has year-round international visitors.

"Prairie Dog Town is well known on an

international scope," he said. "We have visitors from Japan, China and Mexico."

"One group from Japan took a video because they consider prairie dogs to be an industrious animal who prepares for bad times."

Black said the Lubbock Parks Department is required to be licensed by the United States Department of Agriculture to exhibit the prairie dogs.

"No one has ever been bitten by a local prairie dog," Black said "They would run from humans."

## Police wrong in taking incentives

Police officers in Helper, Utah, have a new incentive to fight the war on drugs — a tidy share of the profits.

According to the Associated Press, officers involved in any drug seizures will personally get a cut of any cash or property they seize in drug cases.

The program, called the "forfeiture incentive resolution," will give officers about 10 to 25 percent of the proceeds and lesser amounts to backup officers.

State and federal law allows officers to seize items including cash, cars, homes or other property used in narcotics deals.

### Problems with plan

While this may seem a convenient incentive for officers who are required to put their lives on the line each and every day, it also presents several problems.

First, there's the small matter of the Fourth Amendment. The amendment protects citizens against unreasonable search and seizure.

If police officers directly profit from narcotics raids, the potential for abuse in the system would skyrocket.

With the lure of receiving a significant bonus check after a successful raid, the Fourth Amendment and the rights it guarantees could be lost in the shuffle.

Even in a profession which lists "to uphold the law" in its job description, there may be those who can be swayed by power or monetary gain.

It would be very tempting for those bad elements to place a small bag of cocaine in the home of one of the wealthiest men in town.

Ten to 25 percent of several million dollars can certainly add up on those bonus checks. The question of guilt or innocence could take a back seat to the amount of numbers in a bank account.

Helper Mayor Mike Dalpiaz said about the resolution, "Why not give our guys a reason to be a little more aggressive?"

What Dalpiaz needs to realize is that police work is not the same as working at Mervyn's.

### Unethical actions

Police officers should be arresting criminals, not working on commission — which is exactly what they would be doing.

After all, the more drug raids they perform, the more zeros appear on their paychecks.

Working on commission and being aggressive may be appropriate for retail sales, but it has no place in police work. Officers aren't dealing with clothes, cars or food, they're dealing with human lives.

A reward system has no place in a profession which requires its employees to walk the fine line of the criminal justice system.

Raids should be conducted because the person involved is guilty of a crime, not because it might provide a little extra padding in a police officer's pocketbook.

*The seven-member editorial board voted 7-0 on this issue.*

### Letters to the Editor

**LETTERS POLICY:** Letters to the editor are accepted for publication on the OPINIONS page. All letters MUST be no longer than two, typed, double-spaced pages. Unsigned letters will NOT be published. Letters must be submitted in person or by mail with picture identification and a telephone number. Letters are printed at the editor's discretion, and the editor reserves the right to edit letters for length, libelous material, spelling and vulgarity. *The University Daily* does not discriminate because of race, creed, national origin, age, sex, sexual preference or disability.

### Men's basketball needs improvement

#### To the Editor:

This past Saturday I witnessed one of the world's worst performances I have ever seen in men's college basketball.

During my time at Texas Tech I've read and heard quite a bit about how Spike Dykes should be fired, but I've rarely seen or heard anyone mention the mediocre performance of our head basketball coach James Dickey and our Texas Tech men's basketball team. The facts are that our team lacks the fundamentals, the conditioning, the composure, and the court leadership that good college basketball programs possess. I don't know if it's just me and my

10 years of playing and coaching organized basketball, but it seems all those factors reflect on the coaching of Mr. Dickey and his coaching staff.

That's not to say that Jason Sasser, Lance Hughes and Mark Davis don't deserve to shoulder some of the blame. They looked like clowns Saturday just like they have whenever they've played quality basketball teams this year. It's time for those young men to have a little gut check and respond with senior leadership, composure, intensity, and HEART. If they need any help, my number is in the telephone book.

*Aaron Racicot*

### Viewing, listening based on interest

#### To the Editor:

In response to the writer of the letter titled "Public broadcasting funding important" (Jan. 30) supporting Public Broadcasting.

1. Ideas and causes are not the reasons people listen to radio. People listen to radio (and watch television) because they find it interesting, and therefore are willing to pay for it. They pay for it by di-

rectly funding the station or buying products from its sponsors and advertisers.

2. Where would I be if I didn't watch Sesame Street? Exactly where I am today, a senior mechanical engineering major who won't have any problems finding a job, making lots of money, and paying for what I want to hear and see.

*John Herrera*

### Gore, Gingrich book deals differ

#### To the Editor:

Your columnist Eric Sanchez, in his column published Jan. 25, asserts that "members of Congress ... did not have a problem with this scenario (Speaker Gingrich's "book deal") when former Sen. Albert Gore faced the same situation a few years ago..." There and elsewhere in his column, Mr. Sanchez either

claims or implies that there are no differences between Gore's book arrangements and Gingrich's.

But for the sake of accuracy, it should be noted that there are two significant differences: First, then Senator Gore notified the Senate Ethics Committee that he hoped to write a book, and asked for the Committee's clearance, which he

got, before he had dealing with any publisher. Senator Gore then submitted his contract to the Ethics committee, where it too was approved, before he accepted his advance. Speaker Gingrich has done neither of these two things. The first that Congress or the public learned of his publication intentions was the news that he had accepted a \$4.5 million advance from a company owned by a man whom he had

lunched with one week before.

Had Speaker Gingrich in fact proceeded exactly as then Senator Gore did, he would be immune to criticism. But he behaved quite differently. And given Speaker Gingrich's role in deposing Jim Wright, surely neither Mr. Gingrich nor Mr. Sanchez can be surprised that this behavior would be scrutinized.

*Sue Tolleson-Rinehart*

### Tech shows lack of support to youth

#### To the Editor:

Has Texas Tech grown so big that they have outgrown their manners? It would seem so, as evidenced by the rude treatment given to a group of boys, aged 6-13, who tried to perform their PIPS (Players In Progress) routine during halftime at the Tech vs. Nicholls State men's basketball game last Wednesday night.

These Tahoka PIPs players, who perform basketball handling skills to music, had practiced for months to sharpen their skills.

They performed several times at hometown high school basketball games, all with the ultimate dream of performing their best show at "the awesome Texas Tech."

Instead of leaving the Tech coliseum with pride, however, these young, very impressionable boys came away with feelings of embarrassment, confusion, and a definite change of attitude toward Texas Tech.

Ignoring the fact that the crowd's reception to the boys was lukewarm, at best, with very few clapping or even bothering to notice that anything was going on down on the court, the PIPs boys enthusiastically began their routine, and were about three-fourths finished when the announcer said that was all the time they had and cut off their music — in mid-performance.

The boys, confused, continued their routine in silence, with the

younger ones looking around as the college teams began standing on the sidelines.

There were still nearly four minutes left in the halftime — plenty of time left for the one-minute conclusion of the PIPs routine, had they bothered to ask the adult PIPs coach who was standing on the sidelines.

Embarrassed and confused, the boys came to a haphazard stop, but still lifted their hands high in the traditional Red Raider "guns up" sign.

They collected their basketballs and what little was left of their pride, and ran off the court.

Is this the message Tech wants to send to our youth? That "we're bigger, and therefore more important, than you — you can come perform your little show, but we don't have to give a rip?"

Well, they got the message all right. And so did the 60-70 parents who paid good money to watch the game, only to watch their sons humiliated at halftime.

Next time we'll go back to Lubbock Christian University or South Plains College in Levelland, where we have been treated with respect, dignity, and even enthusiasm.

An education is what one should receive at a place of higher learning... is it too much to expect that basic good manners and respect of others be taught — and exhibited — as well?

*Judy Sanders*

### Pedestrian safety important campus issue

#### To the editorial board:

I want to commend each of you individually and collectively, as our editorial board, for the editorial which appeared in *The University Daily* Wednesday "Drivers, pedestrians need to pay attention."

The editorial is skillfully thought out and well written and I believe it speaks very highly of your commitment to enhancing the safety of the members of our community.

As to the content of the editorial, suffice it say, that I couldn't have said it any better myself.

Now the discouraging news. While composing this letter I was briefed on yet another car-pedestrian

accident which occurred near 19th and University early this morning. While this accident did not occur on campus, one of our graduate students was involved as a pedestrian. I know very little more about the accident at this point and I do not want the news of this accident to take away from the praise I have for your editorial.

It simply reminds us of the amount of work yet to be done. Once again, thanks for a job well done!

We appreciate you and look forward to seeing the positive results of your efforts.

*Jay Parchman*

# Motels may be added to city

By Shannon Murphy  
The University Daily

The Lubbock Planning and Zoning Commission will hear presentations from property developers today concerning six new motels that could be built in the city over the next year.

Hurt and Stell Investments, which is working with a major North Dakota motel developer, P&N Ventures Inc. and Zamco Group Inc. are involved with the property development project.

Among the projects under construction or that have been announced include:

- The Ashmore Inn & Suites, a 100-bed property east of Wal-Mart between Quaker Avenue and Memphis Avenue on South Loop 289.

- A proposed three-story, 80-unit Best Western motel inside South Loop 289 at the intersection of the

loop's frontage road and Utica Avenue.

- A proposed three-story, 78-unit Courtyard by Marriott, east of the Ashmore Inn & Suites, off South Loop 289.

- A two-story, 64-unit Super 8 Motel, along the I-27 corridor between 54th and 57th streets.

- A proposed three-story, 64-unit Fairfield Inn, just east of the Marriott along South Loop 289

- A proposed three-story, 81-unit Hampton Inn, just east of the Fairfield Inn along South Loop 289.

The new Super 8 Motel located along the I-27 corridor broke ground in January.

Hurt and Stell Investments is working with Gary Tharaldson, founder, president and owner of Tharaldson Enterprises Inc. located in Fargo, N.D., said Paul Stell, of Hurt and Stell.

"We will be doing the land development, and Tharaldson will be doing the building part of it," Stell said. "The land needs to be rezoned to accommodate the new businesses."

"It is presently a C-2 zoning, and it needs to be a C-4 zoning with specific use for a hotel," he said.

Some Lubbock residents have voiced concerns with the development of the motels, he said.

"We postponed the January zoning meeting so that we could work with these residents, and so they could be pleased with the situation," Stell said.

Officials have listened to the residents and improved on some areas they were concerned with, he said.

Stell said officials will discuss the improvements and hope the residents are pleased during the meeting.

Texas Tech students in the Col-

lege of Human Sciences department of restaurant and hotel management could gain helpful experience in their fields with the development of these motels.

"We require that before students graduate, they must have work experience to graduate," said Lynn Huffman, chairwoman of the department of education, nutrition, restaurant and hotel management.

"It is easier for students to get experience in the food service side than the lodging side, because Lubbock has more restaurants than hotels," Huffman said. "These motels will be helpful for our students to gain experience. It is important that students work while they are in school."

If students get on with a franchise and get experience now, the move up to corporate will become much easier, she said.

## Pedestrian

continued from page 1

McCollum was swaying when he walked and had slurred speech, police said.

McCollum registered 0.198 and 0.201 on two breath blood-alcohol content tests performed at the accident scene, Vela said.

He was twice the legal limit of intoxication, which is 0.10, Vela said.

McCollum was charged with intoxication assault, a higher charge than driving while intoxicated, police said.

McCollum's car sustained minor damage concentrated at the front center of the vehicle, Vela said.

Parts of the dogs' leashes were found in the passenger side of the

car and vehicle trim was scattered about the road, police said.

"I saw the limp dogs in the street, but I didn't realize someone got hit until the guy drove up in the Taco Cabana parking lot with a guy's legs sticking out the windshield," said witness Jean Fowler.

Lubbock Animal Control officials said they recovered both dogs, and they are in good condition.

In an unrelated incident, Sherry Ceniza, a Tech assistant English professor, was involved in a pedestrian-auto accident behind the English building Monday afternoon.

Ceniza remained in critical condition at UMC Wednesday.

## Tiger escapes from circus' winter cage

HUGO, Okla. (AP) — Searchers combed an area of Choctaw County on Wednesday for a tiger that escaped from the winter quarters of the Carson-Barnes Circus.

Office manager James Judkins said the 200-pound cat was discovered missing about 7:30 a.m.

"It had somehow squeezed out of a spot it shouldn't have been able to squeeze out of," he said.

The 2-year-old cat had been with the circus less than a week. "I guess the handlers didn't know how smart it was."

Judkins was worried about the tiger's safety.

"I really don't think the animal's a danger to anyone, to tell you the truth. I think it's in more danger than any people," he said.

Judkins said officials were trying to keep everything as low key as possible to prevent someone from going out hunting and shooting the tiger.

"She's been raised in captivity and never killed anything for food," Judkins said. "Our biggest concern is that someone will decide they want a trophy, or that she'll run into the road and get hit by a car."

If it were hungry, he noted it could have killed the ponies and llamas that were loose near where it escaped. An airplane searching for the big cat sighted it around Hugo Lake in Kiamichi Park.

A game ranger and sheriff's deputies were helping circus handlers search for the animal.

Judkins said someone called the circus office in the middle of the night reporting a tiger loose. But he said that happens a lot, and it turns out to be a coyote. "So most of the time, we just ignore it."

For more than 50 years the Carson-Barnes Circus has wintered in Hugo. Judkins said there are 100 animals on location.

"This is the first escape from here since I arrived 17 years ago," Judkins said.

## Radio station psychic gunned down

MIAMI (AP) — A radio station psychic who had predicted Fidel Castro would remain in power through 1995 was shot to death with her husband outside the station's offices early Wednesday.

Lillian Rosa Morales, 25, was shot after finishing her Tuesday shift at WCMQ in the Miami suburb of Coral Gables, police said.

Morales' show ended at midnight and she left through an employees' entrance, said news di-

rector Tomas Garcia Fuste. Her husband, Manuel Ramirez, 57, was waiting for her in a car near the door, Fuste said.

"When she got there, apparently somebody was shooting them both," Fuste said.

No arrests had been made by Wednesday. Police Detective tephania Cohen said politics was among the possible motives.

Morales, who used the last name Morat on the radio, had been host of a call-in astrology show for about

seven months at the station, which is aimed at a Cuban audience. Fuste said Morales included the Cuban dictator's future in her New Year's predictions.

"She said 'I know the people don't like to listen to this, but it is true. The stars show that he will be in power in 1995,'" Fuste said.

He said Morales never mentioned any threats or had any confrontations with callers.

## Study shows sperm counts continue to drop

(AP)— Men's sperm counts seem to be falling, and no one knows why.

The latest evidence of this troubling trend is a French study that found that the sperm counts of donors at a Paris sperm bank have dropped by one-third over the past two decades.

While the researchers said they could not explain their finding, they raised a variety of possibilities, including male fetuses' exposure to estrogen in the womb as well as environmental pollution and unspecified changes in diet and lifestyles.

The research, being published

Thursday in the New England Journal of Medicine, is probably the most rigorous of several studies to look at this question. Many experts remain skeptical, however.

"It has not been clearly documented this is a real phenomenon," said Dr. Stuart Howards of the University of Virginia. "This study from Paris raises the level of concern a bit."

Many things can affect sperm counts, however, including the way the counting is done, the time since last ejaculation and the donor's age. Dr. Jacques Auger and others

from Cochin Hospital Group in Paris looked at trends over the past 20 years among 1,351 healthy, fertile men who made donations at the Center for the Study of the Conservation of Human Eggs and Sperm.

They found that the concentration of sperm dropped by 2 percent per year.

Men's sperm counts are higher if they have not ejaculated recently, and they go down as they get older. Even when these two factors were taken into consideration, sperm counts seem to have fallen, the researchers said.

## Gingrich admits 'Contract' may be in trouble

WASHINGTON (AP) — House Speaker Newt Gingrich admitted that key elements of his 'Contract with America' that propelled Republicans to majorities in both the House and Senate in the November elections are in political trouble.

"I'll be quite frank with you," Gingrich told a sympathetic audience of business people Wednesday night.

"I think term limits is going to be very hard to pass and I think litigation reform is just going to

be a brawl."

"We (also) need your help on the balanced budget amendment, which I think is in serious difficulty," Gingrich, R-Ga., told the National Association of Wholesaler-Distributors, an organization representing 45,000 businesses.

Gingrich also criticized the "elite media," whose bias he said "makes it hard for us to win the debate."

Term limits on federal lawmakers, a balanced budget amendment and product liability reform are but three elements of the 10-point out-

line of legislation that Gingrich has pledged to bring to votes by mid-April.

"This really matters," he said, removing a copy of the document from his jacket and holding it up to the audience.

"We really want to keep our word and we need your help."

Gingrich has made similar appeals in other speaking engagements since becoming speaker on Jan. 4. He said Republicans were facing an opponent larger than the Clinton administration.

# Team prepares for state competition

By Terri Lowrance

The University Daily

Eleven members of the Texas Tech Forensics Team are preparing for the spring state championship competition being conducted this weekend at Sam Houston State University.

The 30-member team specializes in individual speech events and team debate.

The students practice the individual speaking events of public address and interpretation, said Michael Shufeldt, a senior psychology major from Amarillo and president of the team.

"There are three types of debate," Shufeldt said.

The Cross Examine Debate As-

sociation-type of team debate is probably the most popular type, he said.

"The parliamentary type of debate is two-on-two or one-on-one," Shufeldt said.

"The topic is drawn 30 minutes before the debate."

"The Lincoln-Davis debate is one-on-one," he said.

David Williams, an assistant professor of communication studies and director of the forensics team, said team membership is open to all students.

Williams said a wide range of disciplines are represented on this year's team, including political science, communication studies, engineering and psychology students.

Availability and readiness determine which students go to competition, Williams said.

"Qualifying for national competition is also a factor that we consider," he said.

Individual speakers must place in the top three at three separate tournaments in the same event to qualify for national competition, Williams said.

Debate teams have to perform well to justify qualification for national competition, he said.

Williams said students are excited and pressured about qualifying for the national competition.

Team members have been reviewing critiques from past competitions and evaluate each other to

prepare for this weekend's tournament.

Shufeldt said about 25 or 30 Texas schools are entered in this weekend's competition.

"We have a good chance at placing," he said.

Williams said money is always a problem.

The Tech Student Association provides the team's funding, he said.

"It costs between \$1,000 and \$1,500 to go to tournaments," he said.

The money pays for transportation, hotel stay and entry fees.

"We pay for our own food," Williams said.

"We're hoping to scrape up some money for nationals."

# Tech forensics team hosts high school tournament

By Terri Lowrance

The University Daily

More than 300 students from 23 Texas high schools participated in a Texas Forensics Association Qualifying Tournament last weekend on the Tech campus.

The Tech forensics team hosted the tournament.

Some Tech forensics team members participated as tournament judges.

David Williams, director of the Tech forensics team, said this was the second year for Tech to host the event, and participation was much larger than last year's.

"We do it for two reasons," he said. "We provide the high schools with a tournament, and

we recruit for the team and the university."

Williams said most of the members of the Tech forensics team participated in speech and debate events in high school.

"They know how important this is to the high school students, and it is a way for them to give back."

One hundred-thirty awards and trophies were given out to individuals and teams at the tournament.

Plano East Senior High School placed first.

Amarillo High School placed second, and Abilene Cooper placed third.

Williams said the winners will advance to the state competition.

# Meat supplement cheaper alternative

By Donald Gillilan

The University Daily

The Texas Department of Criminal Justice has come up with a way to save money and make a profit.

TDCJ has entered into an agreement with VitaPro to nationally market, package and distribute a new vegetable-protein supplement made of soy-based chicken and beef supplement.

"The prison system and Texas taxpayers win all the way around," James Collins, executive director of TDJC said. "We save money, we have a chance to make a profit, and we create new jobs for inmates in a

new prison industry."

Larry Todd, public relations officer for TDCJ, said he believes the meat supplement will work well. Similar types of supplements were used in space programs, he said.

"It's a substitute that tastes like beef, and it's cheaper to serve," Todd said.

The supplement needs no refrigeration, does not shrink, requires less cooking time, has a long shelf life, and is easy to transport and convert to an edible product four times its dry weight, Collins said.

"What we want to accomplish is to make a profit by selling the

supplement to local jails and other prisons out of state," Todd said. "I think it will work, there's nothing unusual about it."

TDCJ will buy loads of the product from VitaPro manufacturing plants in New York and Canada, and Texas inmates will repackage it for distribution to Texas prisons and other buyers, Collins said.

"We are not going to compete with grocery stores," Todd said. "This is for the Texas penal system only."

Collins said if the sales volume warranted it, Texas prisons could become a VitaPro manufacturer and

distributor, thereby creating even more prison industry jobs.

"This is the kind of innovation and entrepreneurship that benefits both the taxpayers and the institutions," Collins said.

With the Texas prison and state jail population rising from 98,000 to 146,000 by the end of the year, there will be no reduction in the use of Texas beef, even with the addition of the VitaPro supplement, Collins said.

"We had inmates try it, and we have had some of our own staff try it," Todd said. "Most of them seem to like it."

# Animal rights activist protests sea lion capture, chains himself in cage

SEATTLE (AP) — An animal rights activist chained himself inside a floating cage Wednesday to protest the capture of sea lions.

Benjamin White of Friends of Animals chained himself inside the 12-foot-by-12-foot cage with bicycle locks and told police he planned to remain inside until they cut him loose. They did so hours later.

State and federal wildlife agents want to capture sea lions to protect

the dwindling Lake Washington steelhead fish population. The sea lions have taken as much as 65 percent of the population, grabbing the fish on their way upstream to spawn, officials said.

The National Marine Fisheries Service recently gave the state permission to kill sea lions as a last resort to protect the fish. Agents want to kill a sea lion known as No. 17 or "Hondo" that was captured last week.

# Judge rules jail cells do not treat women unconstitutionally

DALLAS (AP) — Dallas County does not have unconstitutional treatment of women in its jails, a federal judge has ruled.

U.S. District Judge Joe Kendall declined to order the county or the state to take any action on jail conditions that three women inmates,

said were unfair to women. The women had alleged that deficiencies left women inmates worse off than men.

# Texas Baptists against UIL events held on Sundays

LONGVIEW (AP) — If Texas Baptists get their way, the University Interscholastic League won't sanction Sunday events.

The state board of education is considering a proposal from the legislative body that would allow regional and state tournament direc-

tors to reschedule competitions for Sunday.

Currently, both schools must consent for events to be rescheduled for Sundays.

"It's just another crack in the door ... to take away our Sundays," said the Rev. Dr. David Jenkins of

First Baptist Church of Gilmer. "We just hate to see the possibility of it becoming a regular thing."

A UIL spokeswoman said the rule change would affect, at most, two Sundays per year for each sport or event and only if the event had to be canceled from its original date.

## Identification needed for UBS blood donors

By Guy Priel

The University Daily

In an effort to safeguard community blood supplies, the Lubbock United Blood Services has changed its Texas Tech student donation policy.

The UBS Center closed last fall because of improper procedures and has put into effect new staff and handling procedures since the center's reopening in November, said Dennis Cleveland, UBS executive director.

"To ensure safety with current blood donations, we have implemented a new identification system," Cleveland said.

Identification must include the donor's given name and birth date, Social Security number, United Blood Services assigned donor number or a picture of the donor, he said.

"This requirement is not expected to be a problem since most people already carry identification with them," he said. "Tech students automatically carry their student ID cards, so they have no problem getting in to donate."

In the past, center representatives requested identification from all donors, he said.

"The only difference now is that we are actually requiring identification from all donors who come into the center or participate in a drive," Cleveland said.

Cheryl Keefer, UBS community relations director, said there are two exceptions to the identification requirement.

"If college donors and those who

give blood for their own surgeries don't have the required identification, they will still be allowed to donate under certain circumstances," Keefer said.

If students have a computer print-out with their name, date of birth or Social Security number, a center representative will verify the information at the time of donating, she said.

"The ultimate goal of the identification requirement is to ensure the quality of the blood supply to protect our clients," she said.

Keefer said there currently is a strong need for donors. UBS uses 75 to 80 units of blood daily, she said.

"All the donations being taken until March are going to be in-house donations," she said.

Tech students waiting for a campus blood drive to donate will have to wait until later in the year, unless they go to the center, Keefer said.

"We are really trying to encourage students to stop by the center instead of waiting," she said.

The center is having to depend on donations from other locations, she said.

"Currently, we are having to contact several centers across the nation just to have enough blood to meet the daily needs of Lubbock," Keefer said.

A majority of recent blood shipments have come from the Oklahoma Blood Institute, she said.

The United Blood Services donation center is at 2523 48th St., and UBS officials encourage Tech students to stop and donate between 10 a.m. and 6 p.m.

## Department researches tornadoes, effects

By Jamie McDonald

The University Daily

When the wind begins to whip across the South Plains in the spring, it may be a sign that tornado season has begun.

The Texas Tech department of wind engineering will continue to research tornadoes this year and the effects they have in the Lubbock area, said Douglas Smith, research assistant professor of wind engineering.

"We do basic research on wind," Smith said. "We transfer the technology to building codes."

"People need some way to protect themselves, and we design shelters to protect people."

Protection from tornadoes is important to people around the world, said Ernst Kiesling, a Tech civil engineering professor.

"Every part of the U.S. is subject to tornadoes," he said. "Things we learn to mitigate tornadoes can be applied to hurricanes and cyclones. We are talking about severe winds in general."

It is important to reduce the chance of property damage because everyone is affected, Kiesling said.

"It is important that we reduce human suffering and the loss of life, but also reduce the property damage," he said. "It is costly to everyone through increased insurance rates. Economic loss is mitigated

through our research."

He said there are safety rules to follow to improve the chance of survival and reduce property damage.

"In advance, there can be better connections (built) between the roof and wall," he said. "Also, building a storm shelter can be done in advance."

"When a person is faced with the reality of a tornado, it is important to find shelter in a closet or an interior bathroom, Kiesling said.

"Get under or behind something that is structurally sound," Kiesling said. "Opening windows is not our advice because you take a risk in opening the window rather than finding protection."

Improvements have been made by constructing buildings to meet building codes, he said.

"There are national standards and local cities adopt or modify a code," he said. "A populous must want to change or improve things. The code must be written or translated, and what we know about it (wind research) can be implemented in the code."

"A major challenge is a sociological one, or a challenge of changing our practices in design and structure," he said. "Twenty-five years in the life of a structure is not that great because buildings last 50 to 100 years and change is not quick."

## AIDS hits close to home in heartland, deaths on rise

TULSA, Okla. (AP) — Not the churches, the conservatives nor anything else about the nation's heartland can stop AIDS. Not even in this God-fearing town that evangelist Oral Roberts calls home.

And now federal health statistics show that more young people die here of AIDS than are killed in accidents.

"You usually think of New York and California" when it comes to AIDS, Tulsa City-County Health Department spokesman Glenn Burnett said Tuesday. "It only shows that people are going to have to take it seriously."

Residents of this metropolitan area of more than half a million people elect the most conservative of politicians. It's a place where folks return to start families. Roberts

teaches that premarital sex and homosexuality are perversions.

AIDS counselors, however, describe Tulsa as a community in denial about the reality of AIDS.

"We're in the middle of an epidemic," said Sharon Thoele, executive director of the HIV Resource Consortium in Tulsa. "How many women and children have to have it before everyone else realizes that?"

The U.S. Centers for Disease Control and Prevention in Atlanta released figures Monday that showed Tulsa as one of 79 cities where AIDS has surpassed accidents as a cause of death among Americans 25 to 44 years old.

HIV infection-related diseases killed 50 young adults in Tulsa County in 1993, compared with 43 accidental deaths, state Health De-

partment statistics show. Unlike the national figures, however, which showed AIDS as the No. 1 cause of death in the age group, cancer led in Tulsa, claiming the lives of 57 young adults.

AIDS is still an extremely rare disease in young adults. But so, too, are all other potential causes of death in that age group, such as heart disease and cancer.

Indeed, federal statistics show that in 1993, AIDS killed just 35 of every 100,000 Americans between ages 25 and 44. The same year, about 32 per 100,000 nationally died from accidents, followed by cancer, heart disease, suicide and murder.

David Smith, a 28-year-old Tulsan, learned the hard way of AIDS' threat in the heartland.

Smith grew up in a charismatic

church in McAlester, in southeastern Oklahoma. By his early 20s, he was teaching third- and fourth-graders in Sunday school and was preparing to become a missionary.

But as a teen, he had engaged in sex with women and men. And at age 23, Smith was diagnosed with AIDS-related complex, a precursor to full-blown AIDS.

His church stripped him of his teaching duties, Smith said. His community shunned him.

"My friends at church wouldn't talk to me. Nobody would sit by me," he said. "There would be three empty pews in front of me and three behind me."

Smith now serves as an AIDS counselor in Tulsa and on an AIDS education panel that tours high schools in the area.

## Business leaders praise Clinton's new plans for Mexico after much criticism

NEW YORK (AP) — Business leaders widely praised President Clinton for his Mexico rescue plan Wednesday, calling it a bold and decisive move that contrasts sharply with his image as a waffler.

The Clinton turnaround was so dramatic because it came swiftly

after he abandoned his original plan Tuesday in the face of fierce congressional opposition, the executives said.

"This took some guts. It's not politically popular," said John Edean, vice president for policy at the American Business Conference,

a coalition of chief executives of fast-growing mid-sized corporations. "He did this because he thought it was the right thing to do."

For many months Clinton's public persona has suffered from apparent flip-flops on a range of domestic and foreign issues.

There was growing congressional and public opposition to Clinton's proposed package of \$40 billion in loan guarantees to help rescue Mexico's troubled economy.

By Monday, the plan seemed all but doomed in Congress. Final defeat seemed assured around midday,

when Clinton announced he was abandoning the plan.

But Clinton swiftly offered an alternate plan that doesn't require congressional approval: It would give Mexico \$20 billion in U.S. loans or guarantees and nearly that much in credit from the Interna-

tional Monetary Fund.

The renewed confidence in the president's leadership was most immediately demonstrated by powerful rallies in key financial markets.

The business community has been a consistent supporter of aid to Mexico's ailing economy.

15" color display, keyboard, mouse and all  
the software you're likely to need.

In the time it takes to make your first payment, there will have been three full moons, a change of season and you will have written enough pages to fill a small tome.

**BUY AN APPLE MACINTOSH NOW. PAY FOR IT LATER.\***  
We're not just making it easier for you to buy a Macintosh, we're making it easier for you to buy something else you really need — time. Because for a limited time, with the Apple Computer Loan and 90-Day Deferred Payment Plan, you can own a Macintosh personal computer, printer, CD-ROM drive or other periph-

erals without making a single payment for 90 days. Combine that with no hassles, no complicated forms and already great student pricing, and the easy-to-use Macintosh is now incredibly easy to buy. The Apple Computer Loan and 90-Day Deferred Payment Plan. The solution that gives you the power every student needs. The power to be your best.\*

**HIGH TECH**  
COMPUTER STORE  
TEXAS TECH UNIVERSITY  
East Basement Of University Center • 742-2565 • Hours 9:00am - 5:30pm

For further information visit the High Tech Computer Store in the East Basement of the University Center • 742-2565

\*Deferred Apple Computer Loans offer expires February 17, 1995. No payment of interest or principal will be required for 90 days. (Some retailers may require a deposit to hold merchandise while loan is being approved.) Interest accruing during this 90-day period will be added to principal, and the principal amount, as so increased, will thereafter bear interest which will be included in the repayment schedule. Monthly payment is an estimate based on the following information: For the Performa® 636 CD system shown here, a purchase price of \$1,918.17, which includes 7.75% sales tax, including loan fees, the total loan amount is \$2,029.81, which results in a monthly payment obligation of \$33. For the Performa® 6115 CD system shown here, a purchase price of \$2,680.42, which includes 7.75% sales tax, including loan fees, the total loan amount is \$2,963.41, which results in a monthly payment obligation of \$49. Computer system prices, loan amounts and sales taxes may vary. See your authorized Apple Campus Reseller or representative for current system prices, loan and tax amounts. Loans are for a maximum of \$1,000 to a maximum of \$10,000. You may take out more than one loan, but the total of all loans cannot exceed \$10,000 annually. A 5.5% loan origination fee will be added to the requested loan amount. The interest rate is variable, based on the commercial paper rate plus 5.35%. For the month of November, 1994, the interest rate was 10.85% with an Annual Percentage Rate of 12.10%. 8-year loans with no prepayment penalty. The monthly payment and the Annual Percentage Rate shown assume the 90-day deferral of principal and interest described above and no other deferrals of principal or interest. Students may defer principal payments up to 4 years, or until graduation. Deferral will change your monthly payments. The Apple Computer Loan is subject to credit approval. Apple Computer Loan and 90-Day Deferred Payment Plan offers available only to qualifying students, faculty and staff. Offers available only from Apple or an authorized Apple Campus Reseller or representative. ©1994 Apple Computer, Inc. All rights reserved. # Carbon monoxide poses health threat, can kill

By Guy Priel  
The University Daily

Carbon monoxide is an odorless, invisible and poisonous killer, Texas health officials warn.

"Wherever there are coals or flames without ample ventilation the gas can reach levels lethal to humans," said Quade Stahl, occupational health therapist at the Texas Department of Health.

Each year, dozens of Texans die from carbon monoxide poisoning, and hundreds become ill, Stahl said.

Last year, 51 deaths in Texas were related to carbon monoxide poisoning, said Margaret Wilson, public information officer for the Texas Department of Health.

"It's tragic that the number of such poisonings rises in periods of extreme cold, when some people sacrifice fresh air for warmth," said David Smith, Texas commissioner of health.

All Texans need to be aware of the danger of carbon monoxide, which is a byproduct of incomplete combustion, Stahl said.

"A flickering or low-burning yellow flame gives off much more of

the gas than a hot-blue flame," he said.

Vehicle exhausts, unvented or faulty gas and kerosene appliances, smoldering or poorly vented fireplaces and slow-burning fuels, such as charcoal, release large amounts of carbon monoxide into the air, Stahl said.

"Outdoors, the gas mixes with the air and is diluted to a safe level," he said. "But indoors, without good ventilation, it can reach poisonous concentrations."

People at home are often in more danger of carbon-monoxide poisoning than those in large work spaces, Wilson said.

"Small, insulated quarters trap and concentrate the gas," she said.

The main source of the gas is from burners of gas appliances that are improperly adjusted or poorly vented, she said.

"To save energy costs, newer homes and apartments are sealed tighter than older ones and may pose greater risks," Wilson said.

There have been people suffering from early effects of carbon-monoxide poisoning without knowing

why, Stahl said.

"Anyone who has awakened with a headache or dizziness after sleeping in a closed room with an unvented heater may have had a mild case of carbon-monoxide poisoning," he said.

Carbon monoxide reacts chemically to replace the oxygen in the bloodstream, he said.

"It is this lack of oxygen which causes headaches, weakness, dizziness, sleepiness, nausea and vomiting, which can progress to coma, convulsions and death," Stahl said.

Many people who are exposed do not recognize the symptoms and fall asleep without realizing the danger, said Jeff Paxton, a Lubbock family physician.

"People who notice these symptoms and are near or using a fuel-burning appliance or equipment should immediately go outside and get some fresh air," he said.

All fuel-burning appliances in newer homes should be checked regularly and adjusted properly for adequate ventilation, Wilson said.

"Pregnant women, infants and those with chronic illness or heart

problems are at a high risk for carbon-monoxide poisoning," she said.

Several hours or days may be required for a victim to regain normal oxygen levels in the blood, Paxton said.

"Students living off campus for the first time may be unaware of this problem, especially if they live in newer dwellings," Wilson said.

They may think because the place is new it must be OK, but they are sealed the tightest and have the most danger, she said. The U.S. Consumer Product Safety Commission has asked that all new dwellings be required to have carbon-monoxide detectors, which are similar to smoke detectors, she said.

"Students living in apartments are encouraged to make sure their apartment has a detector present," Wilson said.

If your apartment is not equipped with a carbon-monoxide detector, you need to make sure your landlord will put one in, she said.

"The detectors are inexpensive and easy to install, so there should be no reason not to live where there is one installed," she said.

# Some drivers use brakes incorrectly, study shows

WASHINGTON (AP) — The success of anti-lock brakes in preventing accidents apparently rides on drivers breaking old habits.

Two studies released Wednesday concluded that many drivers might not be familiar with how to use the brakes properly. Anti-lock brakes should not be pumped. Drivers traditionally have been taught to pump.

"We want to remind people that when they step on the brake, you want to push down hard and keep the pedal pushed down," said Ricardo Martinez, head of the National Highway Traffic Safety Administration, which released one of the studies.

Anti-lock brake systems are designed to prevent a vehicle's wheels from locking to give drivers better control and decrease stopping distance during emergency braking on slippery roads. About half of all 1994 cars have anti-lock brakes.

The government found that on wet roads, where anti-lock brakes work best, cars with such brakes had 24 percent fewer fatal crashes in multivehicle accidents than those without anti-lock brakes, according to Charles Kahane, statistician for the NHTSA study.

There were 14 percent fewer nonfatal crashes with anti-lock brakes on wet roads, he said.

However, drivers with anti-lock brakes were more likely to

run off the road, leading to a death inside the car 28 percent more often than did cars with old-style brakes, Kahane said.

Martinez believes drivers unfamiliar with the brake system may be turning in an effort to correct car skidding, which the brakes are designed to prevent.

NHTSA, the safety arm of the Department of Transportation, based its results on 4,000 fatal crashes from 1989 to 1993 in the Fatal Accident Reporting System, which accumulates data on all crashes reported in the United States.

NHTSA used records on 47,000 cars in accident reports from 1990 to 1992 in Florida, Pennsylvania and Missouri.

The other study, by the Highway Loss Data Institute in Arlington, Va., concluded that anti-lock brakes are not reducing the number of insurance claims or the cost of vehicle damage in crashes.

The average claim was \$2,375 for each car without anti-lock brakes, and \$2,469 for a car with them. The frequency of claims was 7.5 percent for cars without anti-lock brakes and 7.6 percent for those that had them.

The institute study was based on a comparison of insurance claims between 693,057 General Motors cars with anti-lock brakes built in 1992 and 514,662 same-model GM cars without them built in 1991.

# Comment about disadvantaged students creates uproar

NEW BRUNSWICK, N.J. (AP) — The president of Rutgers University came under attack Tuesday for saying disadvantaged students do not have "the genetic hereditary background" to score well on standardized tests.

Francis L. Lawrence did not deny making the statement, but said it was not what he meant.

"In spite of the fact that I did use those words, they are opposed to my

beliefs," he said at a news conference. "I regret it, I do regret it, I certainly regret those comments."

Lawrence made the comment during a Nov. 11 talk to about 30 faculty members at the Camden campus.

A recording of the speech was distributed by the faculty union; the remarks were first reported Tuesday in The Star-Ledger of Newark.

Describing his views on the use

of exams like the Scholastic Assessment Tests to assess student performance, Lawrence said:

"Let's look at the SATs. The average SAT for African-Americans is 750. Do we set standards in the future so that we don't admit anybody with the national test? Or do we deal with a disadvantaged population that doesn't have that genetic hereditary background to have a higher average?"

Gov. Christie Whitman urged the university's board of governors to hold a special session as soon as possible to allow Lawrence to explain his comment.

The student government associations of two of the university's colleges, Rutgers and Douglass, called on Lawrence to resign as head of the 40,000-student state university.

The state chapter of the NAACP did as well.

# Murder rates increase for two groups

WASHINGTON (AP) — Preschoolers and older minority women are at higher risk of being killed because murder rates are near record highs, according to a new private analysis.

Minority teen-agers and young men have the nation's highest homicide rate, according to a study released Wednesday by the independent Population Reference Bureau.

The study, "Homicide in the United States: Who's At Risk," combed a half-century of data collected by the National Center for Health Statistics and the Fed-

eral Bureau of Investigation. Among the findings were that murder rates were up for elderly minority women and preschoolers.

"We don't want to give the impression that every young child is at risk ... but this does raise the question of whether we need to be more protective of children," said Carol J. De Vita of PRB.

Some of the increase may be a result of more child abuse cases being reported, she said. "Now when a child dies it's more likely to be investigated as an abuse death."

But the figures do show a trend, De Vita concluded.

For minority children age 4 and under the 1990 murder rates were 8.9 homicides per 100,000 for boys and 8.6 for girls. Both have been climbing steadily since 1950 when they were 2.4.

For white youngsters the rates climbed from 1.0 to 2.7 for boys and from 1.2 to 2.1 for girls.

The report also found that older nonwhite women, particularly those ages 75 and older have a significantly high chance of being murdered.

The highest homicide rate was in 1980, when there were 10.7 homicides per 100,000.

# Friend testifies O.J. admitted he dreamed about killing Nicole

LOS ANGELES (AP) — O.J. Simpson confided after his ex-wife's slaying that he had dreamed of killing her, a longtime friend testified Wednesday. But the witness said he didn't tell police for fear it would hurt the football star.

"I loved this man for 26 years," Ronald Shipp, a former policeman who retired from the force five years ago, told jurors. "All of a sudden my thought processes ... like I say, I wanted nothing to do with it."

"I thought it was very ... harmful," he said.

Prosecutors won permission from Superior Court Judge Lance Ito to question Shipp about the exchange despite strong objections from defense attorney Carl Douglas, who insisted the conversation never took place.

Legal experts were divided over whether the judge acted wisely in allowing the dream testimony. And psychologists warned that dreams aren't actions and are beyond the control of the dreamer.

"If we got charged with everything we dreamed about, we'd be in

jail most of our lives," said psychologist Rosalind Cartwright, director of the sleep disorders service at Rush-Presbyterian-St. Luke's Medical Center in Chicago.

Shipp, obviously tense, was questioned by Deputy District Attorney Christopher Darden about Shipp's long friendship with Simpson and Nicole Brown Simpson, about violence in the couple's relationship and about his conversation with Simpson on June 13, 1994, the day after Ms. Simpson and her friend Ronald Goldman were murdered.

"He jokingly said, 'To be honest, Shipp, I've had some dreams of killing her,'" Shipp said. Asked about the number of dreams, Shipp answered: "He just said 'dreams,' plural."

Shipp recounted the conversation under the pseudonym "Leo" in "Raging Heart," a book by Sheila Weller about the Simpson case. Shipp said he initially told Weller about the conversation on the condition his name be kept secret, rather than going to police, because he "wanted to get this out."

According to the book, Simpson mentioned the dreams in explaining why he was reluctant to take a lie-detector test. But Ito barred any mention of the lie-detector test in front of the jury.

### Woman fired for not reporting royal visit

NEW YORK (AP) — Missed (photo) opportunity or royal gaffe? A hospital publicist was fired after failing to tell her superiors — and City Hall — about a visit from Princess Diana. The princess visited Harlem Hospital's AIDS ward Monday, but the hospital president and other city officials didn't learn about the visit until later that evening. Tuesday, the hospital's public affairs director, Pamela Hamilton, was fired. Audrey Kelly, spokeswoman for the Health and Hospitals Corp., which runs city health facilities, said, "We were very pleased to learn that Her Royal Highness visited Harlem Hospital, but both the president and chairman of HHC learned she was visiting Harlem Hospital as they were watching the 11 o'clock news that night."

# 'Scotty' beams into Lubbock

By Amy Osmulski

The most famous flight engineer in "Star Trek" history will be making a stop in the Hub City Sunday. James Doohan, who portrayed Scotty in the original "Star Trek" series, will be the guest speaker for Trek Day at the Holiday Inn Civic Center, located at 801 Ave. Q. The event will be held from 11 a.m. to 5 p.m. Tickets cost \$12 for adults and \$10 for children ages 3 to 10 and can be purchased at the door only.

Doohan

Tickets can be bought on a cash-only basis, but some merchants take credit cards. Ticket prices include an autograph from Doohan.

"This is kind of an annual event for us," said Michelle Perryman, a sales and catering representative for the Holiday Inn Civic Center. "There are so many Trekkies in Lub-

bock, and we usually have a great turnout."

Many different kinds of "Star Trek" memorabilia will be offered at the Trek Day at the Holiday Inn Civic Center, and door prizes will be given away, Perryman said. There also will be trivia contests and auctions, she said. Doohan will talk about his part in the original series, the new movie, "Generations," and he will promote the new series "Voyager." He also will be available to answer questions.

Fans will have the opportunity to fill out questionnaires about what they do or do not like about the new series.

"Mr. Doohan is a popular speaker," said Vince Minela, owner

of Star Promotions. "He takes the time to get to know and talk to his fans."

"All of the speakers are popular in their own way."

Doohan, who was born and raised in Canada, studied to be an engineer, and was a captain in the Royal Canadian Army.

He was awarded the top scholarship to the Neighborhood Playhouse in New York City, where he later taught.

He began his acting career in radio in 1953, and worked his way up through Hollywood to become Scotty in the 1960s.

"The latest movie will probably

be Doohan's last "Star Trek" appearance," Minela said. "Although, since he was on 'Next Generation,' he may make an appearance on 'Deep Space Nine.'"

Minela said conventions have always been successful in Lubbock, because there is a large following in Texas.

The conventions have a casual, family attitude, he said.

He urges people to come out early and experience the different memorabilia and costumes.

"We have tried to keep the ticket prices low," Minela said. "The autograph from Mr. Doohan itself is worth much more than \$12."

## Coretta Scott King defends daughter of Malcolm X

NEW YORK (AP) — The widow of Martin Luther King Jr. said Tuesday that federal prosecutors are targeting the daughter of Malcolm X in an attempt to tarnish her father's legacy.

Coretta Scott King joined Malcolm X's widow, Betty Shabazz, other civil rights leaders and about 200 spectators at Riverside Church in Harlem to voice support for Qubilah Shabazz, who is charged in Minneapolis with conspiring to kill Nation of Islam leader Louis Farrakhan.

"Unable to discredit him in life,

those who would disparage his legacy now seek to stigmatize his family and undermine their effort to promote his teachings," Mrs. King said. "We are here today to say this will not work, and we will stand in unshakable solidarity with Qubilah's family."

Mrs. King told Shabazz she admired her "courage and determination in confronting this injustice."

"I pray that you will soon be unburdened by the triumph of justice and truth."

"With this faith, together, we shall overcome," Mrs. King said.

## Skater endorses Arctic Cat, Tigershark

LOS ANGELES (AP) — Nancy Kerrigan is teaming up with Arctic Cat and Tigershark.

The Olympic figure skater from Stoneham, Mass., confirmed Wednesday that she has signed a deal to endorse Arctic Cat snowmo-

biles and Tigershark watercraft made by Minnesota-based Arctico Inc. Terms of the deal were not disclosed.

Kerrigan won a silver medal at last year's Winter Olympics in Lillehammer, Norway.

## Raiders three-peat in recruiting

*Linemen and defensive backs highlight Tech's third strong class*

By Arni Sribben

The University Daily

Texas Tech kicked off the opening of the national football signing period by signing 20 players, 17 high school and three junior college, to national letters of intent.

"It went great," head coach Spike Dykes said of his 1995 class. "We've got 20 good players, we lost a lot of good players that we tried to recruit, but I think that happens every year. We signed 20 out of the 43 players that visited."

Headlining the list of new recruits are national 100 recruits Curtis Lowery, a 6-5, 300-pound offensive lineman from Stephenville; Montae Reagor, a 6-3, 230-pound defensive lineman from Waxahachie; and Tracy Hart, a 6-0, 190-pound defensive back from Crandall.

"The quality of the recruiting class is outstanding," Dykes said. "We did not sign any interior linemen, and that always hurts. We'll have to double up in that position next year."

Dykes said it was an unusual year, but the Raiders did a good job filling needs at key offensive positions.

"We signed three offensive linemen, and we lost three offensive linemen (to graduation)," Dykes said. "A lot of these guys

### Tech Signees

Donnie Hart, 6-0, 175, WR, Wolfthorpe Frenship	Kenny Haywood, 5-9, 175, DB, Pasadena (Calif) City College
Mickey Anderson, 6-4, 280, OL, Abilene Cooper	Kyle Allamon, 6-4, 226, TE, Lubbock Monterey
Erik Carruth, 6-4, 275, OL, Rockport-Fulton	Tim Duffie, 6-0, 215, LB, Jefferson
Tracy Hart, 6-0, 190, DB, Crandall	Curtis Lowery, 6-4, 300, OL, Stephenville
Anthony Malbrough, 5-11, 165, DB, Beaumont Westbrook	Kyle Shipley, 6-3, 225, LB, Arlington Martin
Tyseski Ardoin, 5-11, 185, LB, Beaumont Westbrook	Kevin McCullar, 6-3, 205, S, Irving Nimitz
Darwin Brown, 5-11, 170, DB, Tyler John Tyler	Montae Reagor, 6-2, 235, DE, Waxahachie
Rob Peters, 6-2, 200 QB, Katy	Carl Marshall, 5-10, 195, CB, Long Beach Community College
Sammy Morris, 5-11, 185, RB, San Antonio Jay	Elgin Johnson, 6-3, 260, Northeastern A&M J.C.
Jarrold Fisher, 6-5, 225, TE/DE, Sudan	
Phillip Hayes, 5-11, 175, RB, Carrolton Newman Smith	

were not highly recruited because they committed early."

Dykes said that Hart, along with Abilene Cooper offensive linemen Mickey Anderson, Frenship wide receiver Donnie Hart and Beaumont Westbrook defensive back Anthony Malbrough, was among the players who stuck to their early commitments to Tech.

"We feel good about this class," Dykes said. "The tailbacks (Phillip Hayes and Sammy Morris) are good. The tight ends (Kyle Allamon and Jarrod Fisher) are great."

On the defensive side of the ball, the Raiders also were successful as they addressed the need on the defensive line and in the secondary.

"We were down in that position," Dykes said of the defensive backs. "We set out to recruit four. There are some potential starters in the group. All of them can fly."

"Montae Reagor could be the cream of the crop. He is a tremendous athlete with a lot of football left in him. He could play next season."

The Raiders added three junior college players, cornerbacks Kenny Haywood and Carl Marshall and defensive lineman Elgin Johnson.

Of the three, only Haywood is enrolled at Tech for the spring semester.

Dykes said the 1995 class gives the Red Raiders strong consecutive recruiting classes.

"This is three in a row," Dykes said. "It was surprising how many of last year's class fit in last season. This class has quality across the board. Not only are they good players, but it looks like they will fit very well into the team concept."

Cowboys repeated and lost offensive coordinator Norv Turner to the Washington Redskins.

Now Shanahan has been hired to reconstruct his old team, the Denver Broncos.

## Broncos name Mike Shanahan coach

DENVER (AP) — Another Super Bowl won, another assistant coach lost.

In what is becoming an NFL trend, Mike Shanahan became the latest assistant to cash in on a Super

Bowl victory by landing a head coaching job elsewhere.

When Dallas won the Super Bowl two years ago, defensive coordinator Dave Wannstedt left for the Chicago Bears. Then, last year, the

Cowboys repeated and lost offensive coordinator Norv Turner to the Washington Redskins.

Now Shanahan has been hired to reconstruct his old team, the Denver Broncos.

## Local player inks with Tech

By Jared Parcell

The University Daily

Signing local high school football recruits continued again this season for the Texas Tech football team.

Lubbock Monterey Plainsmen tight end Kyle Allamon inked his name on a national letter of intent Wednesday afternoon, joining 19 other recruits the Red Raiders signed.

"I always wanted to play for Tech and have my parents watch me play," the 6-4, 226-pound Allamon said. "It's fun to stay here at Tech and try to do something for them."

His mother, Cathey Allamon who works in the medical records department at Tech, said she is excited about having the opportunity to watch her son play college football.

"It's awesome, just to play college football," she said about her son's decision to play at the home. "I know he's good enough. It's just wonderful. I wanted him to go Tech so I could watch him play."

Tech, along with Baylor, Texas A&M and Texas, will join the Big 12 Conference in the 1996-1997 season. Allamon, who caught 13 passes for 189 yards and six touchdowns last season, said the move by his future school had no impact on his decision to join head coach Spike Dykes' crew.

"The Big 12 will be a tough conference, but anywhere you play football is going to be tough," Allamon said. "I just wanted to play football."

Dykes said he is glad to have one of the newest Red Raiders aboard for the next four years.

"I think Kyle Allamon is one of the greatest tight end prospects I've seen in years and years," Dykes said. "He committed fairly early, and he's hung in there with us. He chose not to visit other schools and honor his commitment. We think he has success written all over him."

In January, Tech fell to Southern California 55-14 in the Mobil Cotton Bowl Classic, but the loss did not affect Allamon's decision to sign on the dotted line.

TCU may have been the big loser

Sign on the line: Cathey and David Allamon look on while their son, Lubbock Monterey tight end Kyle Allamon, signs his national letter of intent Wednesday with Tech.

in the chase for Allamon.

"I came back home after my TCU visit — TCU is a good school, and it's fun down in Dallas, but it just wasn't home," Allamon said.

Friends and teammates may get the best of his signing, because they will have the opportunity to see him in a Tech uniform next season.

"Everybody wanted me to go to Tech," Allamon said. "I pretty much agreed with them. They're all happy I'm going."

He will follow a long list of ex-

Monterey players who have attended Tech as football players.

"I knew some when I went on my recruiting trip," Allamon said. "It'll be fun just to play with them."

David Allamon, his father, who graduated from Tech, said his son's choice to play at Tech is great for the Lubbock community.

"I think it's great because it keeps the hometown kids here in town," the elder Allamon said. "He'll have more people coming (to the games) and watching him."
