70 YEARS OF SERVING TEXAS TECH UNIVERSITY

WEDNESDAY, NOVEMBER 29, 1995

## Offensive flyers posted on door

**Message signed by Swastika Seven**

by Carrie Kilman

The University Daily

A group calling themselves The Swastika Seven possibly violated the Texas Tech Student Code of Conduct by posting flyers containing derogatory and offensive remarks in the television lounge of Bledsoe Residence Hall Nov. 21.

The flyers stated they were directed toward members of Mu Epsilon Kappa and Delta Lambda Phi, and were posted on the door of the lounge where Mu Epsilon Kappa conducts its weekly meetings through an agreement with

the Bledsoe Residence Hall complex director.

Mu Epsilon Kappa, a student organization with about 45 members, officially began in 1994 in an attempt to reach world peace by sharing popular foreign cultures, said Mu Epsilon Kappa President David Scott, a senior English major from Coahoma.

Delta Lambda Phi is a Tech fraternity for homosexual men.

Shortly before the Mu Epsilon Kappa's Nov. 14 meeting, Scott said he found the lounge occupied by a group of students playing video games.

On the following Tuesday, Nov. 21, Scott said he placed a 'Reserved' sign on the lounge door at 4 p.m., two hours before the group began setting up for the meeting.

At 6 p.m. Scott said he returned to the lounge to prepare for the meeting and discov-

ered his 'Reserved' sign had been torn down.

In its place, someone had posted a sign reading, "To all Delta Lambda Phi or Mu Epsilon Kappa members. It is impossible to reserve this room without the entire dorm's approval. Once this approval is gained (it won't be) you may continue with your faggot activities. Signed, The Swastika Seven."

A second flyer was posted on the door during the opening of the Mu Epsilon Kappa meeting, Scott said.

The second flyer read, "Here's a clue: Get Drunk, Get Laid, and Get Your Punk A— a Life. The Swastika Seven."

During the Japanese film shown at the meeting, a third flyer was anonymously posted, he said.

The flyer stated that The Swastika Seven was declaring war on Mu Epsilon because of

"intolerable acts" practiced by the group.

"The decision (to declare war on Mu Epsilon Kappa) also is based on the viewing of Japanese cartoons in a great American University such as Texas Tech," wrote The Swastika Seven. "We deem these acts to be a clear violation of implied duties of upstanding Americans."

Scott said he did not know whether the flyers were a one-time event.

"I really have no desire to see anyone on this campus hurt," he said.

"If The Swastika Seven is actually organized campus-wide, that could mean physical violence. If they are serious with what they are saying, I don't think it will stop."

Michael Shonrock, Tech dean of students, said he plans to investigate the matter.

"We really would like to get into this and

determine the avenues we have to find out who might be responsible," Shonrock said. "The sooner we can work together, the sooner a resolution can be made."

The actions of The Swastika Seven potentially could be a direct violation of the student code of conduct, he said.

Mu Epsilon Kappa members need to report the incident to the department of housing and dining services and possibly the University Police Department in case other incidents occur, Shonrock said.

"Even though it may not occur again, the alleged suspects are still out there," he said. "If it happened once, it could happen again."

The emergence of The Swastika Seven is the first of its kind that he has seen during his tenure at Tech, Shonrock said.

"It's most regrettable," he said.

## Clinton gives green light to stop federal speed limits

WASHINGTON (AP) — President Clinton signed a \$6 billion road bill Tuesday that ends the federal 55 mph speed limit that has been in place since 1974 and gives states the power to set their own, starting in 10 days.

But Clinton made clear that he had serious misgivings about the measure, fearing that its provisions will lead to more accidents, highway deaths and injuries.

"I am deeply disturbed by the repeal of both the national maximum speed limit law and the law encouraging states to enact motorcycle helmet use laws," Clinton said in a written statement.

He said he also was troubled that the law potentially exempts large number of small- and medium-size trucks and their drivers from safety regulations involving driver qualifications and truck maintenance.

"Without question these laws have saved lives," the president said.

He urged the states to act responsibly and added: "My administration will redouble our efforts to protect those who travel on the nation's highways." He instructed the Transportation Department to develop an action plan to promote highway safety.

Overall, Clinton signed the measure because he believes it will strengthen the nation's transportation

system, providing jobs and economic opportunities, said White House spokesman Mike McCurry.

"Delighted," was the response of D. Gail Morrison of the National Motorists Association who battled for provisions ending the federally mandated speed limits and motorcycle helmet requirements.

Appalled, was the reaction from safety and consumer advocates, who foresee carnage on the nation's roads.

While being "very concerned about highway fatalities," Clinton felt a veto could cost states nearly \$6 billion in "necessary highway improvement projects," including finishing missing links in the Interstate Highway system, McCurry said.

A half-dozen states have laws that raise their speed limits automatically when the federal cap comes off. The 10-day wait in the federal legislation is intended to give them time to change their minds. Other states are expected to raise their limits in the coming months.

With the end of the federal limit, Montana would have no limit at all; the limit would jump to 75 mph in Kansas, Nevada and Wyoming and to 70 in Oklahoma and South Dakota.

The 55-mph speed limit was imposed in 1974 as an energy-saving measure in the wake of the Mideast

oil embargo. Highway fatalities declined by nearly 9,000 the following year, prompting safety advocates to hail it as a lifesaver. States were later permitted to set a 65-mph limit on rural Interstates. States that failed to comply faced the threat of losing federal highway funds.

Jim Baxter of the National Motorists Association headquarters in Madison, Wis., said that while the federal speed limit was heavily opposed in the large western states, his group also drew large support from the West and East coast states in its battle to raise the limit.

"Anybody who has driven from Chicago to Miami knows we don't have a 55 mph speed limit," he said. "But people in urbanized states did suffer from a lot more intense enforcement."

At the American Automobile Association, President Robert Darbelnet said, "While we are concerned with some safety aspects of the bill. ... We do not feel passage of this critical legislation could be further delayed."

But consumer advocate Ralph Nader, Public Citizen President Joan Claybrook, and former Surgeon General C. Everett Koop suggested a veto, contending approval of the bill may cause up to 6,000 more highway deaths annually.

## IRS may tax frequent-flier miles

WASHINGTON (AP) — The Internal Revenue Service is reconsidering advice it gave that could result in an extra tax liability for workers who are allowed to keep frequent-flier miles from business trips, the agency said Tuesday.

A seven-page "technical advice memorandum," reported by *The Wall Street Journal* on Tuesday, was issued in July to just one company that lets employees use business-generated frequent-flier miles for personal travel.

After a day of uproar over the memo, the agency issued a statement

saying it had "no special enforcement program for frequent flyer miles" and was reconsidering the advice it gave in the memo. The agency stressed the memo only applied to that specific company.

"It does not establish precedent for any other case involving any other employer," the agency said.

"The IRS does not want other employers to be misled by applying the analysis ... to their (employee reimbursement) plans."

In any case, the memo did not mark a policy change on the taxability of the

frequent flier miles themselves, IRS spokesman Frank Keith said.

The IRS has always said taxes are due when someone converts to personal use those frequent-flier miles earned on business trips paid for by an employer, he said.

If the policy outlined in the memo were applied to all companies, it could subject many employees to extra tax and force them through a complex calculation on their tax returns.

"This is a bombshell," said Mary B. Hevener, a tax lawyer at Weil Gotshal & Manges in Washington.

**December decorations:** Women's Service Organization member Lori Downey, a junior English major from El Paso, and Melissa Minjarez, a freshman pre-occupational therapy major from El Paso, help Downey construct the center wreath for the Carol of Lights Friday.

### The Female Factor

- There are 11,076 female students at Texas Tech
- 57 percent of administrators at the Texas Tech University Health Sciences Center are female
- Female enrollment in different programs at TTUHSC ranges from 27 percent to 89 percent

source: AAUW conference

## Tech female deans discuss women's roles in universities

by Brent Dirks

The University Daily

Women's roles at Texas Tech were discussed during the American Association of University Women seminar Tuesday.

The AAUW presented the lunch seminar "Equity on Campus: Are We Making Progress?" in the University Center Coronado Room.

Five women deans from Texas Tech and Texas Tech Health Sciences Center presented

different programs on the progress of women students and faculty at Tech.

In the College of Arts and Sciences, one-fourth of the faculty are female and three-fourths are male.

"We have made progress in the number of women faculty at Texas Tech," said Jane Winer, dean of the College of Arts and Sciences.

Even though progress has been made in the number of women faculty, the university needs to retain women faculty and move them up

through the ranks, Winer said.

Elaine Jarchow, dean of the College of Education, said there are 11,076 female students at Tech.

The number of women students at TTUHSC ranges from 27 to 89 percent in the different programs, said Pat Voderwise, dean of Tech's School of Nursing.

"We need to make the differences between men and women work to our advantages in all fields of work," she said.

Women can gain equity through education,

said Shirley McManigal, dean of the School of Allied Health at TTUHSC.

Of the 138 administrators throughout TTUHSC, 57 percent are female, McManigal said.

Even though women have made progress, McManigal pointed to an incident of sexism in the medical profession at Stanford University where a female doctor accused male doctors of sexual harassment.

"Stanford is not unique in having incidents of sexism," she said.

Readers Ask

Readers Ask is a column printed in The UD every other Wednesday to answer students' questions about health or personal safety issues. Drop boxes are set up in the University Center, West Hall and the Student Recreation Center for questions. Not all questions may be answered, but most topics submitted will be discussed.

All questions are answered by Jo Hutcherson, student health education coordinator at Thompson Hall.

mono rarely give the disease to roommates or friends with whom they have only casual contact. To treat the disease you need adequate rest and a pain reliever (such as acetaminophen- the active ingredient in Tylenol).

4. I cannot say that you are not at risk. Just read the newspapers to see the folks who apparently were a lot like you and got the disease. 5. HIV/AIDS is an optional disease. You make the choice as to whether to place yourself at risk. 6. Latex condoms, when used correctly and consistently, are 98 to 99 percent effective protection.

after symptoms are gone. Also, be careful of dehydration that could include dizziness, decrease in urine output and becoming weak and lethargic.

Q: I've been practicing safe sex so I bought some condoms and have been using them. After sex the other night, there was a tiny spot of blood inside the condom. I'm scared - what's wrong?

A: It's usually innocuous and may be the result of the bursting of a small blood vessel in the prostrate, however, make an appointment to see your health professional to check it out for sure.

Sending troops to Bosnia will create little but regret

KIMBERLY OTT
UD guest columnist

While many Americans' attention shifted from Thanksgiving to Christmas, the families of the 20,000 U.S. troops who President Clinton has proposed to send to Bosnia have more important things on their minds.

Although Clinton has repeatedly stressed that the U.S. "cannot, and must not, be the world's policeman," it seems to be exactly where we're headed.

Clinton claims he wants to send troops to Bosnia in order to protect U.S. interests and also to keep peace.

But is that really what Clinton is after, or is he primarily concerned with promoting America's peace-keeping image?

Although Congress shows no support and even opposes sending U.S. troops to Bosnia, Clinton plans to use his presidential power to override any opposition. Clinton argues that this bloody war has gone on long enough, and if America doesn't step-in and help, who will?

Maybe it is true that without America's help peace cannot be accomplished in Bosnia. But why must we send U.S. troops? Can we not supply Bosnian troops with arms and supplies without sending our own men and women?

Clinton claims that U.S. troops will serve as primary peacekeepers without involving themselves in the war. To some that may sound like a relatively safe endeavor until they learn that the land U.S. troops will be stationed on contains an estimated five million land mines woven throughout the countryside.

Clinton claims he will take full responsibility for any casualties incurred by this involvement. While that may sound noble, what difference will it make to the families of those who die if Clinton takes responsibility for the deaths or not? The only argument that causes me to hesitate briefly and consider this fiasco's credibility is the humanitarian argument. I know people are dying in Bosnia, and I know they need our help.

However, I also know that America has people of its own who are suffering and dying. I understand the President's empathy for countries less fortunate than ours, but I believe we should take care of our own first. Instead of spending the time, energy and resources to aid countries on the other side of the world, we should focus on the problems at home.

Editorial

Lawless, administrators lack good judgment

Call it poor leadership.

A memorandum from Tech President Robert Lawless was distributed Monday concerning the redistribution of classes for the fall 1996 semester.

Lawless backed away from earlier mandates, which included scheduling classes at 7:30 a.m. Monday, Wednesday and Friday and eliminating Friday afternoon classes. Instead, Lawless claims all he wanted was a uniform distribution of classes every day of the school week, meaning the same number of classes will be offered at every hour during the day.

Oh, really? OK, President Lawless, it's easy to back-pedal now.

He and his administrators were caught red-handed, and they're guilty of incompetence.

Lawless claims he only supported uniformity in class scheduling, and no one knows how he really feels about the scheduling issue. He says his viewpoint on the situation has been misinterpreted, resulting in Monday's abrupt change in next fall's policy.

Did Lawless know about the repercussions a drastic scheduling change would create? Did he know about the scheduling change at all?

Heck yeah, he did. It was Lawless who approached the Tech Student Senate about the issue earlier this year. And, according to information com-

piled by Lewis Held, Tech biology professor and Faculty Senate member, the rescheduling was "discussed at a meeting of the Provost's Council and at a meeting of the President's Executive Council" before scheduling mandates were released.

Surely Lawless attends his own executive council meetings. If not, something is definitely wrong at this university.

If Lawless wasn't aware of the impact scheduling changes would create, why was the issue passed down with a seal of approval from Tech administrators? He is the president, after all, and should be completely aware of happenings at this university, regardless of whether he's in or out of town.

It wasn't until a meeting with College of Arts and Sciences chairmen, a department that would have been severely affected by class redistribution, that Lawless reneged on the policy. And clamoring from the faculty and student senates, and The UD about the faulty scheduling probably didn't hurt either.

Where is the competent leadership on this campus? Perhaps Lawless and his administrators should learn hasty decisions do not a smoothly run university make.

The UD editorial board voted 8-0.

Q: Are those penis enlargement surgeries for real? How does it work? What results can I expect?

A: All I want for Christmas is...oh well, never mind. The enlargement surgeries are questionable at best. Health professionals indicate that large lines would form if these were as good as they purport to be in some magazines. What is more common and not so questionable are implants when the old equipment gives out. Those range from the pump, to a vacuum, to a hinge that fastens up or down and they even offer injections. I concern about your physical attributes and their working condition that you consult a reputable health professional.

Q: I think I have mono. How can I tell?

A: The signs and symptoms of mononucleosis include fever, unshakable fatigue, sore throat and enlarged lymph glands. People with

A: Your question hinges on lots of factors. Here's some answers to your questions - you make up your mind for yourself what you will or won't do.

1. It's easier for a man to infect a woman than for a woman to infect a man. 2. If you practice risky behaviors, your chances increase - you ask what "risky behaviors...." Multiple sex partners, sex with people who have had multiple sex partners, unprotected sex and intravenous drug use through sharing needles. 3. There is a spectrum of risk - at the low or "0" end is abstinence and no needle sharing. At the high or top end of the spectrum is doing most, if not all, of the things listed in No. 2. As a "white, heterosexual male," you are probably at the low end of the risk

Q: My boyfriend has been throwing up and feeling rotten. What kind of food should he eat and what should he drink if he's nauseous, throwing up and having diarrhea?

A: Suck on cracked ice or nothing until the vomiting stops. Then, the following is recommended: water, 7-Up, Gatorade, Sprite, hot or cold tea, toast, crackers, popsicles or Kool-Aid. Add one to two food for the first six to eight hours or until diarrhea and nausea subsides. Bread, crackers, cooked cereal and bland foods you can add gradually. Also, Jell-O, rice, bananas, pastas without sauce, mashed or baked potatoes, plain pies, cookies or cake. AVOID THE FOLLOWING: milk and milk products, highly seasoned fried foods, greasy foods, pizza, coffee, juices, pepper, cinnamon and alcohol. Stay on the diet for at least two days

Q: I think smoking is like being in love with a man who's no good - you know you're a fool, but you just can't help it. What is it about cigarettes that makes me feel so good?

A: If you are like the average smoker, you take about 10 puffs per cigarette. For a pack-a-day smoker, this works out to about 200 puffs per day. Each "hit" of nicotine reaches the smoker's brain within seven seconds, about twice as fast as a syringe full of heroin injected into a vein.

Nicotine enters the brain and stimulates powerful chemical messengers that can regulate alertness and arousal and the brain's pleasure mechanism that reduces anxiety and pain.

But, I don't need to harp on the fact, as you seem to be aware, that it isn't just bad for you, it can kill you.

Students' lifestyles can be changed through faith, perseverance, beliefs

CALE HAHN
UD guest columnist

I would like a chance to comment on the idea of freedom which so many of us these days have adopted and take great pride in exercising.

For the greater part of my youth, I, too, embraced the philosophy to which so many these days adhere. Namely, in the world of Hamlet, "Nothing is either good or bad, but thinking makes it so." In the world there exists neither absolute right or wrong, that each of us is able to do whatever we want to do, without consequences to our actions or without any judgement falling upon us from another. Another tenet to this belief is that absolute fulfillment in

life comes from denying myself nothing which I may want, no matter how random or spurious that desire may be.

I was raised to believe differently by my mother. She had strong convictions about how one should live. She would say that no matter what one did, there were always consequences to the life that one chose to lead. I could choose to disobey God in my life but by no means could I escape from the effects of transgressing his spiritual laws.

While still in high school I first heard the moral philosophy which has been around for thousands of years and is the rage today.

Namely, do whatever I want, whenever I want, with whoever I want. I did just that. I was emancipated, freed from the moral shackles of an out-dated generation and an out-dated God. To say I whole-heartedly embraced this idea would be quite accurate. No more criticism or judgement from another (especially my conscience) for

those things I did. The beauty of being a follower of this...religion? I say religion because isn't that all religion really is? I mean, having a god and serving him with one's own life. My god was me. I gave to myself whatever I wanted, I made my own laws and my own system of values.

Namely, that whatever I wanted or said, goes. After all, I was exercising my own right to make choices for myself. Nobody was telling me what to do. No sir.

I entered college soon after my emancipation. Years were spent serving myself, using other people and things to fulfill some need or desire which I lacked.

As time went by, increasingly I was more lonely, more empty than ever. The more I fed insatiable desires, the more I hungered for something more, for something else. Life had to be more than what I had, more than who I was. I would find myself at parties, looking into the faces of the people I had known as my friends and

feeling an intense loneliness and isolation.

No matter how much I drank or who I would go home with at night, I couldn't shake the emptiness in my own soul. The best way to describe it would be the color gray - a dark, misty gray. That had become me, that was the tempest within.

I am talking to readers as equals. To one who has been where you may be now or may be at a later time. You see, I was there once. I have served my own desires and passions and was led to the bottom of a dark, deep pit.

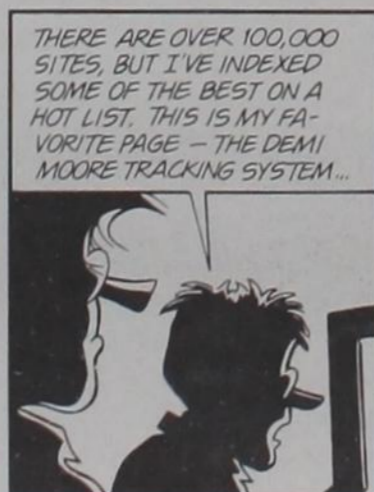

To the girl with anorexia and bulimia, I say to you: there is healing. To the drunken or drug-addicted - there is the power to overcome. To the desperate and despairing - there is hope. To the homosexual - there is love and acceptance for a god who has never turned away from you.

To the empty - there is life.

This is life I found in Jesus Christ. Cale Hahn is a senior political science major from San Antonio.

### Montford drops Senate race

AUSTIN (AP)—After looking at a possible U.S. Senate bid for months, state Sen. John Montford said Tuesday he prefers the view in Texas.

The Lubbock Democrat said he won't seek his party's nomination to challenge Republican Sen. Phil Gramm next year.

Montford, a top lieutenant to Lt. Gov. Bob Bullock, said he wants to remain in the Legislature and work on Texas issues as the federal government shifts duties to the states.

"It is obvious the states will have a greater responsibility to solve our nation's problems. I welcome the challenge," he said.

The announcement leaves three

Democrats seeking their party's Senate nomination in the March 12 primary: Houston lawyer John Odam, U.S. Rep. Jim Chapman of Sulphur Springs and Mesquite high school teacher Victor Morales.

Gramm, a senator since 1985, is simultaneously running for reelection and president under Texas' unusual "LBJ Law." The law first was passed to allow then-Sen. Lyndon B. Johnson to seek reelection and run for president in 1960.

Both Chapman and Odam praised their now non-opponent.

"John Montford is one of the best and brightest leaders in Texas today," Chapman said.

## Russians return to Tech to improve program

### Goal to bring technology to oil industry

by Charles Melton  
*The University Daily*

Russian oil refinery officials and professors visited Texas Tech to look at the possibility of improving an existing program with Tech's College of Engineering Tuesday.

The program is sponsored by the Komsomolsk Oil Refinery in cooperation with the Komsomolsk-On-Amur State Technical University and Tech.

"The visit is going very well and the program is a pilot starter for finding out what works and what doesn't

work," said Jorge Aunon, dean of the College of Engineering.

The program, which now has 16 Russian students, began in Aug. 1994, to provide Russian students an education in chemical engineering, so they can work in the oil refinery.

The students, who are studying chemical engineering, are going to go back and work as chemical engineers in the Far East, he said.

"The program is important for the College of Engineering because of the exchange of ideas and cultures," Aunon said.

There is a possibility of the program becoming a long-term program, but right now, it is in the learning process, Aunon said.

"We decided not too long ago to

send a group of students to receive education and practical experience in oil refinement in Texas," said Leonid Razvozhayev, chief engineer of the Komsomolsk Oil Refinery.

The goal of the program is to introduce new technology to the refinery for future development, he said.

The oil refinery needs specialists who understand English and current technology, he said.

"The program makes the process of introducing new technology more efficient and cost effective and makes the best use of new technology," Razvozhayev said.

The refinery chose Tech for the program because Texas is an oil-producing region and has companies like Exxon, Texaco and Mobile, he said.

"We came into contact with Tech through our colleagues at the institute in Komsomolsk," he said. "As a sponsor of students, we are sponsoring them for a significant period of time."

The institute is working to attract more students and sponsors and has had fairly good success, he said.

"Our experience will help determine how this experience will progress in the future," Razvozhayev said.

As part of their visit, the Russians have met with Tech president Robert Lawless, the Office of International Affairs and several engineering faculty members.

The group will attend the Komsomolsk-On-Amur, the Lubbock Youth Art Exchange and a dinner at Wiggins Dining Complex today.

### Mother sells teen-age son to dealer to pay off drug debt

#### Boy found after six-month disappearance

DETROIT (AP) — A 15-year-old boy who was missing for at least six months had been handed by his mother over to a drug dealer to settle her \$1,000 crack cocaine debt, police said after finding the boy Tuesday.

Investigators sorted through conflicting accounts of whether he went voluntarily, sold drugs, was used as a sex slave or was forced to smoke crack himself when he was hungry so his captors could save on food.

Acting on an anonymous tip, police found the boy in a small, run-down house in a neighborhood thick with drug dealers and prostitutes.

His grandmother said he appeared

addicted to crack. He had lost a lot of weight but seemed otherwise OK, she said.

"He's crying a lot. I think he's all right — he said he's all right," she said. "He's as sweet as he can be. He's got one hangup: It's his mother. He loves her."

Inspector Michael Hall said although police believed the boy was sold to settle his mother's debt, "We have an indication that at some point, he became a willing partner in drug dealing."

The boy appeared in juvenile court and was charged with delivery of cocaine, possession of cocaine with intent to deliver and truancy.

The 33-year-old mother was already in jail on a burglary charge and could face charges over her son.

A man found with the teen-ager, described by police as having a long criminal record, was arrested. He was not identified by authorities, but police said the mother gave her son to a different dealer, who was being sought.

"He was supposed to be working to pay off his mother's debt," said Sgt. Shelley Foy of the police child abuse unit.

He went along to protect his mother, a common response in cases involving drug-addicted parents, she said.

### Former football player on trail for gay slaying

HOUSTON (AP) — A former Aldine High School quarterback told officers he ruined his life by being involved in the abduction, robbery and slaying of a homosexual man, according to court testimony.

Demarco McCullum went on trial Monday for the July 30, 1994, killing of Michael J. Burzinski, 29.

McCullum, who was to have

reported to Tyler Junior College on a football scholarship days after his arrest, could get the death penalty if he is convicted of capital murder.

Three other defendants are awaiting trial.

A Harris County sheriff's detective read two statements the defendant made after his arrest.

In the first, McCullum, then 19, downplayed the events of that night,

which he said began with three friends and led, for no real reason, to their attack on Burzinski.

In the second statement, also read to jurors in state District Judge Caprice Cosper's court, McCullum said he and defendant Decedrick Gainous took Burzinski to the woods, and McCullum shot Burzinski "because that is what everybody said I should do."

## Tech researcher finds link between allowances, responsibility

by Irina Maistrenko

The University Daily

The financial responsibility of college students who received allowances as teen-agers is the focus of research in Texas Tech's College of Human Sciences.

Research done by Jerry Mason, Tech associate professor of merchandising, environmental design and consumer economics in the College of

Human Sciences, on high school seniors in 1958 and 1993 showed teen-agers in 1993 did not know as much about money management as their peers in 1958.

It happened due to changes in individual needs and wants related to the economic progression of the society, he said.

During the 1950s, teen-agers had to work to satisfy their major needs: to eat, to have a place to sleep and clothes

to wear, Mason said.

The reason teen-agers work today is related to their wants: nice car, expensive clothes, new stereo.

"Unlike in the 30s or 50s, kids are not going to college — they are moving to college with tons of things they possess," Mason said.

The total amount of allowances of American children is actually many times the annual budget of the majority of Third World Nations, according

to the New York Times News Service.

A 1993 study by James McNeal, professor of marketing at Texas A&M University, found that 34 million children age 4 to 12 in the United States had a total income of \$17.1 billion.

Today, young people graduate from college with credit card debt, which was not the case 40 years ago because there were no credit cards, Mason said.

With the appearances of credit

cards, the view point of what money does is different today — another reason for teaching modern teen-agers money responsibility, he said.

Using allowances as a bribe or withholding it as punishment creates distorted financial stereotypes in teen-agers, he said.

Allowances should not be tied only to work, Mason said. The regular teen-age chorus should be separated from the allowance, he said.

## Texas briefly

### Examiner rules child strangled

GAINESVILLE (AP) — A 6-year-old boy, whose mother reported that her son was killed by a man who also had raped her, was strangled, an autopsy shows.

Gainesville Police Chief Carl Dunlap said Monday the medical examiner's office found the boy died of strangulation, committed possibly with a rope or plastic wire.

Investigators have no suspects in the case and are trying to piece together what happened in the woman's home early Saturday, Dunlap said.

### Athens attorney found murdered

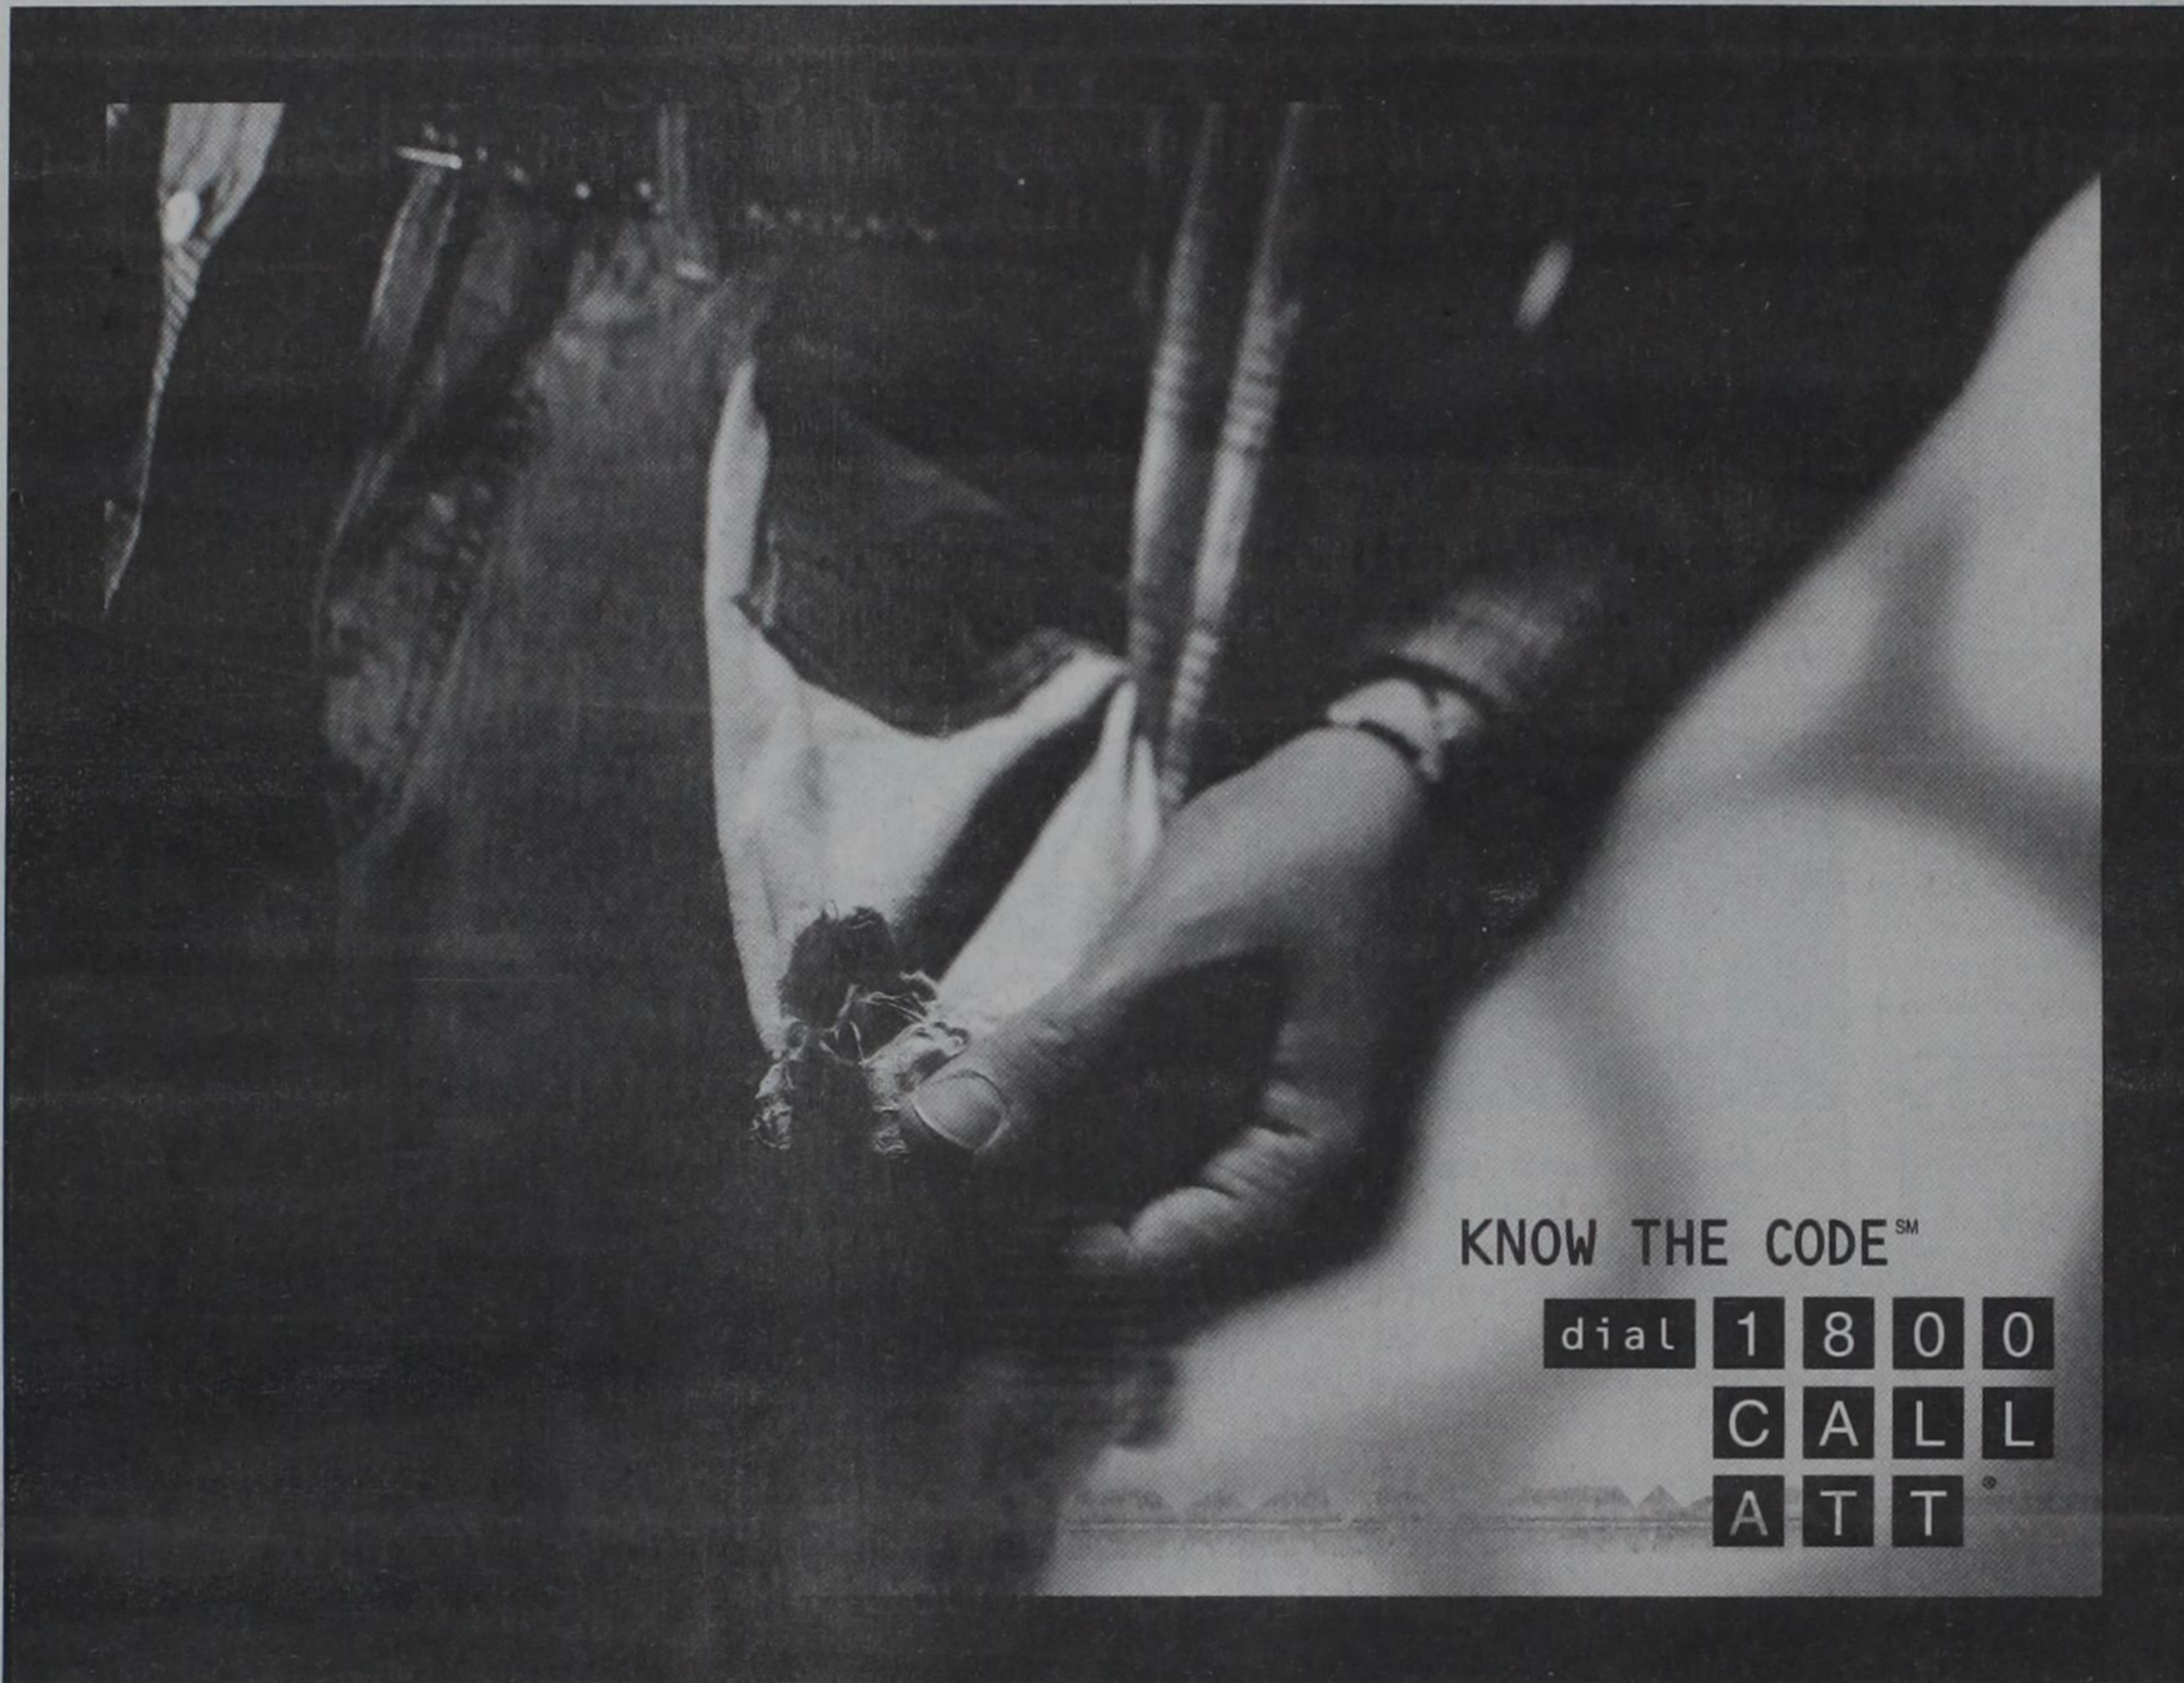

ATHENS (AP) — A former Athens city attorney who has practiced law locally for three decades has been found dead in his home, apparently stabbed in the chest.

Henderson County sheriff's deputies were searching Monday night for the killer of John Key Jr. Authorities believe the suspect was driving Key's champagne and maroon 1995 Lincoln.

A worker remodeling the guest house of Key's home found the body in the bathroom at 8 a.m. Monday.

There were few signs of a struggle. Authorities said they found bloody hand and fingerprints on a side door of the residence.

Key, who was born in Dallas, moved to Athens in 1958 after getting his law degree from Baylor. He was city attorney for several years in the 1960s.

## People briefly

### O'Grady, Day 'return with honor'

FORT WALTON BEACH, Fla. (AP) — Retired Col. George "Bud" Day and Capt. Scott O'Grady both lived up to the motto of the Air Force's 31st Fighter Wing: "Return with Honor."

Each served with the 31st, wrote memoirs after being shot down — Day in Vietnam and O'Grady in Bosnia — and used the slogan for the title of his book.

Day said O'Grady probably didn't realize his title duplicated Day's, but he said O'Grady's publisher should have known.

"The last thing I want to do is bring any grief to this young man," said Day, now a lawyer in this Florida Panhandle city. But he said he might take legal action against Doubleday Books for copying his title. Day said Doubleday might have violated a provision of Florida law that prohibits one business from interfering with the reputation of another.

"If they would have simply made an inquiry to the Library of Congress, they would have sent them information about my book," Day said.

### Letterman under fire from network

NEW YORK (AP) — David Letterman's bosses at CBS want him to stop bad-mouthing the network's prime-time lineup.

"I've been cautioned to measure my remarks in that area," Letterman said in the Dec. 1 issue of *Entertainment Weekly*.

The source of the warning: CBS Entertainment President Leslie Moonves.

Moonves relayed his feelings to Letterman after the "Late Show" host took an on-air shot at CBS' decision to air two hours of prime-time skating.

"I got a call from Les Moonves saying, 'Y'know, figure skating didn't do that badly for us, Dave,'" Letterman said. "I said, 'Great, I'll see you at the Ice Capades, Les.'"

CBS' fall in the ratings — it trails ABC and NBC — have contributed to Letterman's problems.

## Fourth-graders join to support Tech athletics

by Brian Lacy

The University Daily

They are thinking about their community, their school system and the future of Lubbock, and they are only 10 years old.

The fourth-graders at Bayless Elementary School have followed in the footsteps of many prominent members of the Lubbock community by forming a Junior Committee for Champions.

The committee, which has modeled itself after the Lubbock Committee of Champions, has three primary goals, said Leigh Anne Massengale, a fourth-grade teacher at Bayless.

"We want to get these fourth-graders involved in the community, get people involved in Texas Tech, and we want to get students interested in going to Texas Tech someday," Massengale said.

Members of the Junior Committee for Champions have to meet cer-

tain criteria, Massengale said.

"They have to be on the A-B Honor Roll, they have to be in accelerated reading, and they have to have an "H" in citizenship for highly satisfactory," she said.

"The students apply and if there's not room sometimes we have to put them on a waiting list."

The program, which started about two months ago, has gotten a lot of response.

"My husband is on the Lubbock Committee for Champions, and we were thinking about how many kids don't realize how many opportunities are out there," she said.

"We met two or three times, and we have about 110 fourth graders, and the kids seem to be really interested."

The committee has several projects to work on, said Kim Thompson, a fourth grade teacher at Bayless.

"We will be making bulletin boards showing different calendars of events and keep all the elementary students

aware of what is going on in Lubbock and at Tech," Thompson said.

"We will also have the students design a new Tech uniform, a new Tech seal design, write a new Tech fight song and interview a Tech student."

The junior committee also started a writing campaign.

"The students had to write a persuasive paper, and they chose to address the issue of tortilla tossing," Thompson said.

The letter, which went out to all

newspaper editors in Lubbock, stated in part: *The Junior Committee for Champions at Bayless Elementary wants to stop tortilla throwing at football games, and we need your help. We have many reasons for wanting the terrible tortillas stopped. Help us support Texas Tech with cheers not tortillas!*

The Junior Committee for Champions will continue to meet once a month and will expand to other area elementary schools if response is favorable, Thompson said.

## Jones vows to install grass at Texas Stadium by 1997

IRVING (AP)—Emmitt Smith should be running on grass in Texas Stadium by 1997 if he can escape being injured again until then.

At least that's what Dallas owner Jerry Jones promised on Tuesday, saying, "there will be grass, make no mistake about it."

The NFL's leading rusher was injured trying to make a cut on the slick artificial Texas Stadium turf in the third quarter of a 24-12 victory over Kansas City on Thanksgiving Day. Smith suffered a sprained left knee and could play on Sunday against the Washington Redskins.

The near miss sent shudders through the Cowboys organization.

"There is a concern (about the turf) because we don't have the traction that should be out there," Jones said. "The turf is worn out enough that we're pushing the envelope. The turf is too slick."

However, Jones said he didn't

think the turf caused Smith's injury.

"I don't think it's an issue with Emmitt's injury," Jones said.

Smith didn't blame the turf but did say the injury probably wouldn't have happened on grass.

"I think grass would have given when I planted my foot," Smith said.

Smith played all of the 1994 season battling hamstring problems which were aggravated by the artificial surface.

Jones said he hoped construction would begin at the end of the 1996 season to lower the field by 15 feet and plant grass. He also wants the roof of the stadium closed. The Cowboys would have to find a strain of grass that grows indoors or put grass in for every game and remove it.

"I think grass is safer and I like the aura of it," Jones said. "You go to ice hockey games to see play on an artificial surface."

## Spikers prepared for Arkansas State

■ *First tournament match since 1992*

by Chris Parry

*The University Daily*

It's NCAA tournament time for the Texas Tech volleyball team. The Red Raiders, one of four Southwest Conference teams in the tournament, square off against Arkansas State in the first round of the East Regional at 7 p.m. today in the Lubbock Municipal Coliseum.

Senior outside hitter Diane Owens said she is looking forward to the Red Raiders' opening tournament match.

"I'm just really excited," she said. "The last time we went was my freshman year, so it's kind of nice to go out with a bang. It just makes you feel good about the season in general."

The Red Raiders faced the Lady Indians earlier this season at the Sheraton Inn Classic and defeated them in four games 15-2, 4-15, 15-3 and 17-15.

Tech coach Jeff Nelson said the

Red Raiders are not taking the Lady Indians for granted.

"They are a much different team," he said. "We will have to play our best, and we hope to advance."

Tech has won four out of its last five matches. In their last match, the Raiders scored a 3-0 victory over New Mexico. Tech assistant coach Mike Lessinger said Tech is firing on all cylinders.

"With any playoff situation, you want to be playing your best ball," he said. "The way we beat New Mexico is exactly the way you want to end the regular season."

The Red Raiders held the Lobos to .192 hitting for the match while exploding for 63 kills of their own. The emergence of junior middle blocker Jill Burness has been a shot in the arm for the Red Raiders.

Burness finished the season hitting .301 with 180 kills and 90 blocks. Senior middle blocker Jennifer Cohn has also been impressive, ending the season with 101 blocks and averaging 2.79 blocks a game.

Arkansas State, 27-6, is riding a 12-match winning streak into Lubbock.

The Lady Indians have been led by junior middle hitter Lauren Fair, who was named the Sun Belt Conference player of the year after averaging 3.33 kills per game. She has put away 353 kills this season.

Junior outside hitter Lacy Nye said the Red Raiders knows the match will be tough, but they are ready for the Lady Indians.

"We feel super about going into this," she said. "We are real confident, but I wouldn't say overconfident."

Jim Cawthon: *The University Daily*

**Tournament ready:** Lisa Hilgers, a freshman setter from Victoria, Minn., set a single season record for assists with 1,413 this season. Hilgers and the rest of the Red Raider volleyball team will make their first appearance in the NCAA tournament since 1992 when they face Arkansas State at 7 p.m. today in the Lubbock Municipal Coliseum.

## KSA, Fat Babies take championship

Rec Sports wraps up men's, women's 1995 Fall Volleyball Finals last Thursday evening

The 1995 Fall Volleyball Finals came to a close last Thursday evening with the men's and women's matches both going to three games.

The women's division had KSA and D-Day making the trip to the finals.

KSA was the undefeated team in league and in play-offs.

D-Day which had its only loss to KSA early in the season bounced back and won the finals 12-15, 15-10, 15-8.

The men's final was a copy of the women's final.

Dig This and The Fat Babies who came out of the same league had only one loss between them.

The Fat Babies had lost to Dig This early in the season and like D-Day made a strong comeback to win 11-15, 15-3, 15-8.

The Rec Sports department would like to thank these open teams for great sportsmanship throughout the season and in playoffs.

PHOTO BY: Greg Henry

D-Day, winners of All-University Women's Volleyball, are pictured above. Left to right, Maria Sierra, Delicia Cuevas, Sandra Oropeza, Maribel Aermendariz, Flandirs Lukins and Nora Munoz. Not pictured was Marival Patino.

Champions of Men's All-U Volleyball, The Fat Babies, are pictured above. Left to right, Mark McGinley, Mike Repha, T.C. Spruiell, Tim Dallas and John Higgs.

## Teams compete in weekend tournament

The last weekend before Thanksgiving brought to the Rec Center the Intramural Racquetball Doubles Tournament. On Friday and Saturday teams competed in the Co-Rec, Women's Beginners, Men's Beginners and Men's Open divisions.

Tina Abernathy and Kristen Whitley defeated Beatriz Salas and Alison Alderidge to win the women's division.

In Co-Rec, Kim Cook and Todd Crosswhite met KK Kongdara and Rusty Hanna in the most competitive finals of all of the divisions. The match went to Cook/Crosswhite 2-1, (9-15, 15-12, 15-12.)

Todd Crosswhite also made it to the finals in the Men's Beginners' bracket with his partner Todd Brown. They, however, were beaten by Kurt Shirkey and Trey Hood in another three-game match.

The Men's Open division saw some great play among the eight teams entered. It was the dominating combination of Randy Fair and Jodie Patterson who came up on top. The team went undefeated for the tournament, not losing a single game. Fair and Patterson met two highly skilled players, Fernando Gaitan and George Johnson, in the finals and outlasted them 2-0.

## Annual Turkey Trot winners announced

More than fifty runners enjoyed the near perfect weather this past weekend by participating in the annual Recreational Sports cross country run.

The overall winner was Corey Wright, who covered the two-mile course in 10 minutes and 54 seconds. Sue Spritz won the women's division in the winning time of 13 minutes and 46 seconds. Smoked turkeys were presented to the winners of the team divisions. The individuals comprising the women's team were Betty Blanton, Jonna Allen, Stephanie Hogan, Allison Nadolski and Christie Hodge.

The men's team was Jon Clark, Tim Moreno, Buddie Fulyham and Joe Graves.

Members of the successful co-rec crew were Robert Geilhausen, Glynette Carson, Amy Thomason, Doug Gardner, Lloyd Scorrow and Tiffany Grafa.
