RIDING ON BUBBLES OF AIR. Motoring Would Be Ideal If Tires Could

Be Made Thinner. In the whole mechanism of modern transportation there is nothing so paradoxical, nothing so daring in conception as these bubbles of air which we call tires. They are at once strangely nonsensical and strangely practicalnonsensical because they must endure great strains and yet are necessarily made of unendurable material; practical because nothing can match air as a shock absorber. From all the tales that we hear of tire costs and tire repairs, let it not be forgotten that motoring as we know it became possible because of the art of riding on bubbles of air had

What happens when the old fashionof iron tired, wooden buggy wheel strikes a small stone in the road? It simply rises and the entire load resting on the wheel is lifted. There is loss of power-more work for the horse, for whenever you or a borse lifts a weight energy must be expended. What happens when an air tube strikes a stone? The tube is simply punched in, as it were, momentarily! The wheel need not be lifted over the obstruction.

In order to secure this extraordinary result the air must have a chance to compress. If it were possible to build a tire with a wall as thin as a soap bubble's and yet so tough and elastic that it would both yield to blows and resist punctures and blowouts the ideal would be attained. One of the hardest technical tasks ever set was that of demanding from the rubber industry a tube which would hold air and which

would also be resilient. Air tires serve not only to make moforing luxuriously comfortable, but to protect the car itself. Were it not for hem engines would not perform their work so efficiently; gasoline would not e so economically consumed; high speed would be unttainable; steering would not be so easy; shock would not be completely absorbed .- Waldemar Kaempffert in McClure's Magazine.

Blanton Speaks for Re-Districting

ford, Stephens and Palo Pinto are put into a district with Burnett county, which borders Travis, and added to this district is Comanche county. Shortly before reporting this bill, Taylor county, my home, was cut west onto the district with El Paso. Think of it! One of the sole objects of redistricting just now is to do justice to West Texas, and then putting Abilene and El Paso in a district together, when they are over 400 miles apart, and are left to gether in a district which this year embraces nearly 300,000 people. The extreme West Texas District and the Panhandle District should contain a smaller population than any other districts for they will have a wonderful increase in population during the next five years, far beyond the expectation of any other district, and this should be taken into con- these counties have been in the sideration. Win a \$100 Prize! Someone Will Be Lucky!! WHY NOT YOU?

Important Announcement

The world gets what it demands. For many years past the American public has demanded a soft drink that is pure, that is harmless, and that does more than merely please the taste and quench the thirst. These are essential requirements of a beverage suited to universal use, but practical and progressive Americans have demanded the additional elements of tonic properties and nutritive qualities. We have labored for years to meet the public's demand for such a product and proudly make the announcement that twentieth century scientific methods have triumphed in the culmination of our Refreshing, Pure, Healthful and Nutritious Soft Drink, now ready for the

Rich Reward for a Name

Authors have boasted that their literary productions have been sold "by the word," some claiming to have received 1 to \$2, and in rare instances \$5 per word; but none have reaped the rich reward of \$100 for a single word, which is the prize we are offering for a suitable name that can appropriately be used for our new beverage. The contest is open to all Texans—men, women and children. Every person is limited to five (5) names, and all suggestions must reach our office, addressed to the "Contest Manager," not later than February 5. If several persons should suggest the same name that is accepted as prize winner, the prize will be equally divided between the successful contestants. The name accepted and the name of the prize winner will be announced in this paper. We want our friends to assist in naming the drink that is to become the favorite beverage of discriminating Texans.

Description of Drink

Our drink is a beverage for the entire family. It is not simply a flavored water charged with carbonic gas, nor is it merely a syrup compound. It is void of malt, but is rich in carefully selected food cereals, which, through the processes of manufacture, become the equivalent of predigested food. It is a brewed product, resembling in color and in taste beer, and therefore might aptly be called "a cereal beer." A generous quantity of lactic acid and albumen is contained in the drink—the former is the active food-assimilating agent in buttermilk, while the latter is the food product of the egg. Pure artesian water, boiled and sterilized, is used exclusively in the manufacture of the beverage, and we guarantee it to be scientifically and chemically pure. The color of the drink is amber and upon being poured into a glass it effervesces much the same as ordinary beer or soft drinks. The use of selected hops, through the "lupulin," which the hops contain, gives to the drink an exquisite twang and imparts the vitalizing tonic property in which the beverage abounds. The beverage will be sold in bottles sealed at the brewery, guaranteeing perfect purity.

Strictly Temperance Beverage

This dictionary is to be secured

by our readers at the mere cost of

randling. Knowing the neces-

sity of a new dictionary at the pre

and stenographers who wish to

The drink is truly a soft drink, a temperance beverage, being so recognized by the UNIT-ED STATES GOVERNMENT, which permits its sale without a revenue license. Neither does the State of Texas levy a tax nor require a license for its sale. Our drink will be found for sale, when placed upon the market, in soft drink parlors, cafes, hotels, drug and grocery stores, fairs, ball park and all places where high-class soft drinks are dispensed. The twenty-five years' reputation of this brewery stands behind the beverage as a guarantee that it is all that we claim for it. Delicious, Refreshing, Pure, Invigorating, Nutritious and Safe.

Territory Open to Dealers

We have a limited amount of good Texas territory open to reliable and responsible persons or firms for the sale of this beverage. We are ready to market the product as soon as the market selected. If interested in territory, wire or write

THE WHATCHAMA COLUMN

Laundries

(By George Martin) A man in Mexico, the Depart

ment of Commerce bulletin's, "is desirous of purchasing machinery for a small laundry." What anybody wants with a laundry in Mexico is more than we can understand, but since it is so we append a partial list of things he should get:

Above all, he must have a but ton smashing machine, any laundry worthy of the name lets no guilty button escape.

Then he will need a collar ripper and cuff frayer. This indispensable little contrivance will utterly demoralize the strongest shirt that was ever built.

Next, a clothes mixer. In these days of pre-digested food and vest-pocket bungalows by mail, every man expects his laundry ready mixed. He's sore if you send him the same colored pajamas two weeks in succession.

Some authorities claim you can't run a laundry without a machine or two to wash the clothes, but this really isn't nec-
