Some FACTS About

THE UNIVERSAL CAR

Here are authentic figures from the Ford factory at Detroit. They show you just how many Ford cars and trucks have been built each month since January 1, 1921, and how many have been sold to retail customers, in the United States.

| The second secon | 57,208 63,603 |
|--|----------------------------|
| 61,886 | 87,221 |
| | 29,883 35,305 61,886 |

Total Production 127,074 Total Retail Sales 208,032

showing that actual sales for the first three months of 1921 exceeded production by 80,958 Ford cars and trucks! April requisitions already specify 107,719 addit-

ional cars and trucks and the estimated April output of the factory and assembly plans combined calls for only 90,000!

These facts clearly show that the demand for Ford products is growing much faster than manufacturing facilities to produce and were it not for the dealers' limited stocks, which are now being rapidly depleted. many more customers would have been compelled to wait for cars. It will be only a matter of weeks, therefore, until a big surplus of orders will prevent anything like prompt deliveries.

If you would be sure of having your Ford car or truck when you want it, you should place your order now. Don't delay. Phone us or drop us a card.
