Rambling

By J. S. Davis

Will the NRA work? Will it accomplish the purpose whereunto it was launched? Let us patiently and faithfully wait and hope.

We are now in the clutches of a famine in the midst of plenty. We are not poor as pertaining to wealth. We have as much money, as much cotton, as much wheat and other grains, as much gold and silver, oil and gas, as we ever had during boom times. Yet millions of our people are suffering with hunger and going thinly clad. An over production of cotton with millions of our people suffering for lack of sufficient cotton clothing; an over production of wheat with millions going hungry. Give the unemployed of this land a chance to earn sufficient money to take care of their needs and a Uncle Sam would have no occasion to plow up cotton to reduce the surplus—the people would consume it.

Shorter working days and weeks will require more help for the same amount of work; increased wages will stimulate the buying power of the increased number of workers. Merchants will realize an increase in their sales and more employes will be taken on. The farmer will get a better price for his cotton and peanuts and this in turn will reflect itself in business. In fact,

the ball will be rolling, the depression will be vanishing, good times will be creeping upon us and the NRA will go over the top with a bang.

Mrs. J. F. Edmondson

Mrs. J. F. Edmondson Nee Ella Bender was born in St Charles Madison County Iowa on Jan 31, 1869, when but a small girl her parents came to Texas, where they settled for a short time in Williamson County, later coming to Eastland county then to Comanche county.

She was converted when a small girl and united with the Methodist Episcopal Church, South, of which she remained a faithful and devoted member. She glorified in her church and worked for its best interests. But her great interest was in her home where she ministered to every need of her husband and children.

On November 17, 1889 she was married to J. F. Edmondson and to this happy union three children were born, one small daughter preceded her to the better land.

She had resided continuously in the Carbon community for 37 years.

She leaves to mourn her departure, her husband and two children, A. A. and J. W. Edmondson of Carbon; one sister, Mrs. W. N. Gleason, of Lone Wolf, Okla.; two brothers, Earl Bender of Eastland and L. C. Bender of Houston; two grand-children, Maynell and Edwin Edmondson all of whom were present for the funeral.

Sister Edmondson was taken

MR. COTTON-GROWER

to the Sanitarium at Gorman about the first of June then to the Harris Sanitarium at Fort Worth and was returned home about the first of July where every thing about loving hearts and tender hands could do was done for her until on Saturday night August 5, after much pain and suffering, God said "It is enough, come up higher" and her soul went out to be with God. To the loved one we would say, weep not, for you may see her in the better world. You shall miss her here and the church and community will miss her, but we do not say good-bye forever.

Her Pastor,
W. G. Gwaltney.

CARD OF THANKS

To our many friends who were so kind and thoughtful in our hour of bereavement, we extend our sincere thanks.

Hazelwood-Deeds

Miss Thelma Jo Hazelwood and Mr. Deeds of Denton were united in marriage at the Baptist parsonage Saturday at 10 a. m. Rev. Davis officiating.

Miss Thelma Jo is the daughter of Mr. and Mrs. L. J. Hazelwood and one of Carbon's highly respected girls, prominent in church circles and her many friends wish her happiness.

The young couple left immediately for Denton where they will make their home.

Notice

There will be a meeting at the Bear Springs cemetery Tuesday, August 15, at 10 o'clock for the purpose of cleaning the ground. After that the crowd will go to some convenient place and spread out.

Kenneth Davis, wife and baby visited her parents in Woodson last week end.

When Water Freezes

There is no difference between the freezing point of water that has been heated and that which has not been heated if the water is pure. In the case of tap water which is nearly pure but contains dissolved air, heating the water may drive out some of the air. This has no considerable effect on the freezing point, but may make a difference in the character of the ice produced. Hot-water pipes are reported to burst from freezing more often than cold-water pipes. This is not because of a difference of freezing point of the water, but is probably because the water in cold-water pipes contains dissolved air, which separates on freezing and forms slushy ice; while when water in a hot-water pipe freezes, it is more apt to become under-cooled and then freeze rather suddenly, forming compact ice free from bubbles, which is more apt to break a pipe.

Flyer Sees Blaze, Turns in Fire Alarm by Radio

New York.—What is believed to have been the first fire alarm reported by radio from an airplane aloft was turned in by Mark Munn, America's Airways pilot, on the Chicago-Chicago mail run. Shortly after he took off recently he saw the roof of a deserted army reserve hangar blazing and radioed the men at the ground station to summon firemen, who put out the fire.

Take Time to Think

You hear a lot about people who can think quickly. They think like a flash when there is an emergency. It's great to be able to do that, providing you always think the right thing. But if there is any doubt about it, take your time to think. Be sure to take a little more time over or do some imitation quick-thinking which doesn't get you anywhere.—Grit.

How Many Cups in A Can?

TRANSLATING cans into cups is a thrift measure, and a great convenience, if you dislike to have a little bit of this and a little bit of that left over. For example, if your recipe calls for one and one-third cups of tomatoes, it is thrifty to buy a No. 1 can which contains this exact amount; or if the recipe calls for two and one-half cups of tomatoes you can get a No. 2 can confident that there will not be a spoonful left over.

But since few people can even remember how many pills in a gallon without saying the whole name over from the beginning, it would be useless to try to remember cans and contents. Just post this list in your kitchen, or place

it inside the cover of your favorite recipe book for reference.

Cans by Cupfuls

Can Size	Net Weight	Contents in Cups
No. 1	16 oz.	1 1/2
No. 2	1 lb. 3 oz.	2 1/3
No. 2 1/2	1 lb. 12 oz.	3 1/3
No. 3	2 lbs. 1 oz.	4
No. 5	2 lbs. 8 oz.	7
No. 10	6 lbs. 7 oz.	13

It is helpful, also, to know that a No. 2 1/2 can of peaches or pears contains from 12 to 15 halves. Apples vary widely in the number of halves; a Fancy can may contain 24 small halves; a Standard can usually contains 40 smaller halves.*

**Frankly and Directly
I Appeal to the
People of Texas**

**An emergency faces our railroad—
YOUR railroad—and Texans have
ever risen in defense of their own**

From the beginning of Texas history, courage, a spirit of independence and the willingness to fight for their home institutions have been born into Texas people. Though the bowie knife and rifle have long since been laid aside, the traditions of the early settlers live on today — when another institution, close to the hearts of Texas people, is challenged.

That institution is the Missouri-Kansas-Texas Lines. Whether the Katy made the state or the state made the Katy is not important now. Each is eternally indebted to the other — a mutual obligation that is cheerfully and proudly recognized by the people of Texas on the one hand, and the Missouri-Kansas-Texas Lines on the other.

Texas people have loyally patronized the Katy Lines through the years, with an appreciation that this railroad has gratefully acknowledged by its almost superhuman efforts to improve and humanize service, reduce rates and provide the finest facilities and equipment in America.

Now, in a time of stress, the long and splendid relationship between Texas people and Texas railroad is threatened by economic conditions. The independence of spirit and action which has made the Katy what it is for the benefit of her people, is at stake.

In such an emergency, the Katy, father and child of Texas, turns for support and cooperation to the generations of her people descended from those hardy pioneers who gathered to cheer the first Katy train to cross her prairies on that memorable day in December, 1873.

The Katy now seeks every ounce of freight, every passenger moving in its territory. It makes this appeal frankly, boldly, bluntly—

not in a spirit of humble supplication, but as a native Texas institution with a record, including the present depression, that challenges the imagination of any man who loves a courageous and winning battle. Consider, people of Texas, these facts:

1. The Katy has sought no loan of the people's money, through any governmental agency.
2. The Katy has unflinchingly paid taxes, inter and all other bills.
3. The Katy has retained its Texas identity, free from mergers and outside domination that destroy individuality.
4. The Katy has actually improved its service, facilities and equipment through the darkest days of this depression, confident of the future of our country and the future of the Great South, east in particular.

The struggle to realize its ambition to serve better, in the face of constantly declining revenues, has been a bitter one. No complaint has been made, none is offered now. But the fight, which should win the admiration of a people who know from experience what strife is, has taken its toll. The goal is in sight, the economic skies are clearing—the Katy needs your support over the last lap of a period that has tried the souls of all men.

Texans! With confidence in your enthusiastic response is this appeal directed to you. To do your bit for Texas tradition — to help the Katy maintain its cherished independence— Katy maintains its cherished independence—a historical Texas institution—is a privilege and a responsibility you may not lightly cast aside.

How to do your Bit—

use coupon below or telephone nearest Katy office. It costs you nothing extra to join this movement. All the Katy asks is your support. Now—

What to do?

You can do three things. *First*, ship your freight via Katy—ride our trains. *Second*, use your influence on every hand to boost the Katy; opportunities are constantly presenting. *Third*, when you hear about movements of freight or know of people who intend to travel, see, phone or write the nearest Katy employee—for every Katy man and woman is in this fight, eager and anxious to pass on information to proper officials.

Use coupon below—Mr. Cahill will personally see every communication.

Government by Soviets.

That Debased Czarism
A denunciation and condemnation of the form "Soviet" name by Webster's New International Dictionary, is as follows: "Soviet" is a word, originally either one of two soviet bodies (Gillage soviet, town soviet) in the Union of Soviet Socialist Republics, established as a result of the Russian Revolution of 1917 and by the constitution of the republics of the U. S. S. R. and later by the constitution of the union, July, 1923. They are the primary organs of government based on the principle of concentration, seeking to give the power to the working classes. They are the supreme local authorities; consist of representatives chosen annually of workers (elected by shops, organizations, etc.), soldiers, and peasants; and send deputies to the Higher soviet congresses: volosts (rural district, woods (county), guberniyas (provinces), oblasts (regions), and the congresses of the constituent republics. All these soviet congresses meet annually. The highest governmental body of all is the union soviet congress, composed of representatives of town soviets and of representatives of the provincial soviet congresses. This congress elects the union central executive committee.

Rich Cream of Tomato Soup: Turn the contents of a one-pound tomato soup into a saucepan, bring to boiling and add a pinch of soda. Scald together the contents of one 2 1/2-cup can of pantry table cream and three-fourths cup milk. Pour the hot soup slowly into the hot cream

and milk and serve. A slice of stale bread may be cut in small cubes and browned in the oven for croutons if desired.

Maple Meringue Custards: Scald the contents of one 6-ounce can of evaporated milk and two-thirds cup maple syrup in a double boiler. Smooth together two tablespoons cornstarch and two tablespoons cold water and until thick and smooth, stirring all the time. Cook for ten minutes. Beat two egg yolks lightly, add a few grains of salt and pour the hot mixture into them slowly. Return to a double boiler and cook for three or four minutes. Cool. Pour into tart cases, or with the sugar made by beating egg whites until stiff, place in a shallow pan, enough to set in a oven for ten minutes. Sprinkle lightly with confectioner's sugar and cool.

Writer Has Some Doubt

A scientist thinks that weather is controlled by electricity. He brings a thunderstorm by the pressing of a button. Will powerful apparatus they will stop the lightning of their lavans and do not suppose that the electrical rain-makers will so far defy established natural laws as to bring rainstorms from unborn directions. The rains should be quite ordinary and never frankish. Ruskin said: "As men do not walk on their heads, there are natural laws that clouds do not disobey." We have always thought that man would, one of these days, determine when rain should fall and when it shouldn't, and electrical control may be the secret. But we have profound doubts of his being able to do a thing when a Gulf of Mexico hurricane comes ashore.—F. H. Collier in the St. Louis Globe-Democrat.
