## "Marinello" Preparations

BE SURE OF THE POWDER YOU USE.

The use of powder as a protecting agent is most important. For this reason time or money has not been spared in an effort to perfect this Marinello Preparation.

Made of purest materials, carefully selected, skillfully blended, delightfully perfumed, it may be applied not only once but as many times a day as necessary, always giving the skin a liberal coating of it.

In selecting powder ge the kind nearest your complexion tint. If you are blonde, get flesh, if you are oliveskinned get cream, if you are of medium complexion get blended, of you are dark, get brunette.

HOW ISRAEL PUTNAM OUT-WITTED THE INDIAN "BEAR"

In 1758, while General Lyman's army was encamped near Fort Edward, N. Y., during the French and Indian war, sentinels at one outpost began to disappear mysteriously. Night after night a soldier was posted there and

the next morning could not be found. Only the bravest men in the army were selected for this post. General Lyman gave orders for them to call out Who goes there?" three times, if they heard any noise, and then if no answer came, to fire. But the disappearances continued until his men were panicstricken and refused to take such a dangerous station,

At last Israel Putnam, a member of Major Rogers' rangers, volunteered to go on guard at that place and solve the mystery. One hot summer night he heard a rustling in the leaves near-by. The sounds were those of an animal scuffling about on the ground for food and, peering through the darkness, Putnam saw by the faint starlight a huge creature, which he recognized as a bear, slowly shambling toward him.

Something in the bear's gait aroused the scout's suspicion. Putnam obeyed the general's orders. He challenged three times and then fired. A loud groaning and struggling noise followed and when the scout rushed forward he found the bear in its death agony. Then he turned the animal over. Enclosed in the shaggy skin, still clutcha giant Indian.

The mystery was solved. The other PAINT ROCK TO sentinels had believed it was a real bear they heard and allowed the daring warrior to get near enough to use his tomahawk before they learned

The engineers are mapping about one square mile a day, and every day brings brighter prospects for the successful development of the big enterprise. It was reported that some of the farmers who are knocking the proposition, and who have declared their intention of opposing any move to create an irrigation district, are kicking entirely too early, as they will not be included in the territory surveyed. It is now expected that the district will be so created as not to take in many of those who had conceived the idea that they were going to have a good thing thrust upon them anyway, and then if the proposition is a success, they can enjoy watching the other fellow reap the rich harvest.
